*Third Day.*

This day's programme contained nine 20 target races at $2 50 entrance, and a special 25 target race for $50, $25 of which was donated by "Bill" Clark, and the other $25 by the Altoona Gun Club, entrance in this event was the price of the targets, 75 cents.

A prompt start was again made and an early finish was the consequence, nearly every shooter present being out of ammunition for target shooting before the close of the day. By 5 P. M. the tournament of 1894 was over so far as targets were concerned. In the nine programme events the entry list averaged just the same as it did the day before—32. The number of targets thrown was 6,810, making a grand total of 22,160 for the three days. With a larger entry list Manager Shaner could have easily made a record; as it was everybody got all the shooting they wanted, by no means a usual occurrence.

Bartlett and his Burgess gun loomed up considerably when it came to settling the average money. His percentage of 95 gave him a clear 2 per cent. over his nearest competitor, Glover. Captain Bartlett has not been shooting targets very long (since last March, I believe), but he gets there now just as often as any of them. The way he handles that "pump gun" of his when it comes down to exhibition work is a caution.

Fulford shot consistently during the three days, and took away something more than he brought with him as the result of his hand, eye and brain work. Van Dyke, who almost reminds one of Euclid's definition of a line—length without breadth—also shot away up, chasing first average closely all the time. Captain Brewer hardly seemed at home smashing targets, still he won fourth average on Tuesday with a per centage of 92⅛.

It would never do to close an account of the third day's doings without mentioning the extra event at the finish. It was a 10 target race, expert rules, entrance $1.50. J. Thurman took first money alone with a straight score, beating his son two targets. Scores:

*Fourth Day.*

After the close of the previous day's target shooting Manager Shaner started to move some of the tents from their location at the Lookout down to the field back of the home farm, about one minute's walk from the hotel lawn. At 9 A. M. some of the more eager shooters were trying their skill at live birds, shooting a few for practice.

Messrs. Worden Bros., of Harrisburg, furnished the live birds and looked after the handling of the same. The birds were a good lot for the time of year, the quality being necessarily somewhat mixed Some were screamers, while others flew like owls A remarkable feature was the comparatively small proportion of lingerers, the birds leaving the trap in the large majority of cases as quick as the trap was sprung The trappers were tired out with their previous three hard days' work and moved listlessly; the sun was extremely warm, too, which no doubt added to their lassitude. One little fellow, clad scantily to say the least, was an honorable exception, keeping all day on a jog trot that would have been no discredit to Edward Payson Weston or Charley Rowell "Uncle Jake" suggested a small subscription for the boy as a reward for his energy; "Billy" Fieles took up the idea and the collection; result, $2.85, and an increase of speed by all the trapper boys.

The honors of the day again belonged to Philadelphia. Welch won the championship and the diamond badge presented for annual competition by the citizens of Williamsport, the Keystone Shooting League, of Philadelphia, carrying off the L. C. Smith gun trophy for the three-men team championship of the State at live birds. Welch's work was something out of the ordinary run and stamps him as a dangerous man for anybody to tackle. During the day he shot at 83 birds, killing 82; missing his 22d bird, he finished the day with a straight score of 61.

The Williamsport badge contest, referred to by Mr. Jacob Pentz, produced 24 entries, of whom five killed their 15 birds. Ties were shot off in series of 5. At the end of the first series, Brewster, having dropped his second bird, was out of it. Clark, who up to this time had killed 42 straight in the various events, missed his first bird in the next series, J O'H. Denny following his example. Sullivan and Welch killed their 5, thus leaving the contest narrowed down to two. They agreed to divide the winner's proportion of next year's entrance money, but shot off for the badge. This Welch won, as stated above, Sullivan missing his 17th bird in the ties. The latter is a fine shot, and can break targets just as well as he can kill live birds; that he can do the latter was well proven by the way in which he mowed down bird after bird, centering them every time, using his second barrel very seldom, and then mainly for safety. Sullivan, by the way, is an assumed name; if you called him Brensinger he'd answer more readily. Mr. Brensinger's head is level; he says that he has been taking FOREST AND STREAM almost from its inception and cannot do without it. His feelings are shared by a large number of the male population of the States.

The L. C. Smith gun trophy brought out four teams—Altoona, Harrisburg, Pittsburg and the Keystone Shooting League. The two last named teams went to the score first and the Keystone fairly took the wind out of their antagonists who shot in the last squad. The race between the two first teams was extremely pretty, the Pittsburgs fighting an uphill race with great pluck. Frank Denny missed his first bird and it was not until the ninth round, when White missed his bird, that the score was tied. In the fourteenth round Frank Denny again fell down, losing his bird. This gave the Keystones the advantage of one bird, an advantage they kept, running out with a total of 44 out of 45 to their opponent's 43. Neither Harrisburg nor Altoona proved dangerous; it is only fair to those teams to state that the light was not of the best while they were shooting their string.

The results of the day's events are as follows:

Williamsport citizens' trophy, representing individual championship of Pennsylvania at live birds, 15 live birds per man:

*Trap Score Type—Copyright 1894 by Forest and Stream Publishing Co.*

NOTES OF THE SHOOT.

While Manager Shaner was fixing the traps on the Saturday previous to the tournament, a bald eagle sailed lazily by within gunshot. Nobody had a gun; perhaps the eagle knew it.

"Billy" Fieles has taken to his home in Christiana a memento of his visit to Wopsy in the shape of a rattlesnake killed on Friday afternoon not far from the scene of the shoot. Originally it had thirteen rattles and a button; its captor took the rattles, but Fieles took the snake.

Shaaber can roll tenpins as well as shoot. He tied for first prize in the bowling tournament which was in progress at the time of the shoot.

That German band evidently rattled Smeck. He missed two targets in quick succession, and of course blamed the band.

Manager Shaner's work at the shoot showed that he is the kingpin in his class. Given an average of 40 entries, he'd have made a record for target throwing.

Fieles exhibited one of the new Keystone traps with the electric pull attached. It worked like a charm and threw targets "out of sight."

There was no kicker at this shoot. EDWARD BANKS.

## Pennsylvania Association.

THE fourth annual meeting of the Pennsylvania State Sportsmen's Association was held Aug. 21, in the parlor of the Hotel Wopsononock. The officers present were: President, N. A. Hughes; Treasurer, James Wolstencroft; Secretary, Edward Banks; Corresponding Secretary, G. G. Zeth; Directors, Harry Thurman and Elmer E. Shaner.

Ten clubs were represented by delegates: Altoona Rod and Gun Club, Ed Kottman; Bloomsburg Gun Club, J. C. Hagenbush; Birdsboro Shooting Association, J. Shaaber (by proxy); Eagle Gun Club, Elmer E. Shaner; Harrisburg Shooting Association, H. M. F. Worden; Independent Gun Club, of Reading, John Shaaber; Keystone Shooting League, James Wolstencroft; Pittsburgh Gun Club, W. R. Fieles; Reading Shooting Association, James Smeck; Williamsport Rifle and Gun Club, N. A. Hughes; Wingohocking Gun Club, Harry Thurman.

The Bellefonte Gun Club, Braddock Gun Club, Forest Gun Club, of Philadelphia; Lancaster Gun Club, Springfied Gun Club, of Flourtown, Pa., S. B. Cummings, B. H. Warren, and Leonard Finletter were admitted as members of the Association.

Mr. Shaner, as a member of the legislative committee, stated that the committee had done nothing whatever this past year, no meeting having been called. Mr. Harry Thurman added that the reason why no meeting had been held was because the Legislature was not in session, and therefore nothing in the committee's line could be accomplished. The committee was continued.

The secretary read the following communications in regard to the carriage of dogs by rail:

ALTOONA, Pa., June 18.—J. R. Wood, Esq., General Passenger Agent P. R. R., Philadelphia, Pa.—Dear Sir: At the annual meeting of the Pennsylvania State Sportsmen's Association held in Harrisburg on Sept. 16, 1893, it was decided that this Association should use its best endeavors to obtain an improvement in the present system of carriage of dogs by rail in this State. With this end in view, the following is offered for your earnest consideration:

1. That the price for each dog so carried shall be at the rate of 25 cents for each division or part of division, over which the said dog or dogs are carried; provided, however, that the said dog or dogs are accompanied on the train by its or their owner or attendant.

2. That the owner or attendant of such dog or dogs shall, when purchasing his ticket prior to entering the train, be enabled to purchase tickets or checks at the above rate of 25 cents per division; in the case of tickets such tickets to be handed to the baggage master of each division at the rate stated above; where checks are used, the same might be stamped with the names of the divisional points and attached to the collars of each dog, each baggage master removing the check denoting his terminal point. Thus in the case of a person taking a dog from Pittsburgh to Philadelphia: He would at Pittsburgh ask for dog checks to Philadelphia, and would on payment of the sum of 75 cents, be handed three checks stamped Altoona, Harrisburg and Philadelphia respectively. These checks he would attach to his dog's collar and the baggage master of each division would detach the check denoting the terminal point of his run. The idea of the Association is that such tickets or checks shall be considered to be equivalent to the payment of 25 cents per division for each dog, and as such to be cashed for the baggage masters at such stations as you may see fit to designate. By this means the Association believes all the unnecessary trouble of seeing and feeing the baggage masters would be done away with. This trouble in the case of a person traveling at night is very great.

3. That any person going on a hunting trip shall be entitled to carry one dog free of charge. In connection with the latter suggestion the Association desires to call your attention to the fact that the Philadelphia & Reading Railroad Company, on certain sections of their road, permit any person going on a hunting trip to carry one dog with him free of charge, as suggested above. The Seaboard Air Line extends the same courtesy to hunters over the whole of their line from Portsmouth, Va., to Atlanta, Ga., during the hunting season.

In making the above suggestions the Association does not believe that it is asking too much. Shooters of all kinds are among your best patrons, and the Association trusts that you will take this fact into consideration when acting upon this letter. As it understands the matter there is no charge made by the company for the carriage of dogs accompanied by their owner or attendant, but that the baggage master is authorized to demand a fee for each dog so carried. The figure of that fee varies, but the price asked in the vast majority of cases is fifty cents per division or part of division. In many instances where a hunter is only going a few miles by rail, his dog under this system costs more than he does.

Trusting that you will give this matter your early consideration, I remain, sir, yours truly, EDWARD BANKS,
Sec'y, Pa. State Sportsmen's Association.

ALTOONA, Pa., July 26.—Mr. Edward Banks, Secretary State Sportsmen's Association.—Dear Sir: Your favor of June 18 to our General Passenger Agent has been carefully considered by that department and referred to me with all papers for reply. After looking over the ground it has not been deemed expedient at this time to make any change from our present methods in regard to the carrying of dogs in baggage cars. There are so many objections developed in the details of any plan for checking dogs, and inasmuch as all our through trains are supplied with one through baggage master from Pittsburg to Philadelphia, we think the adoption of a system of checking dogs might be reasonably postponed for the present. Yours very truly,
F. L SHEPPARD, General Superintendent.

Mr. James Wolstencroft suggested the Keystone Shooting League as the club under whose auspices the fifth annual tournament should be held. The league has grounds at Holmesburg Junction, and was chosen for the shoot in 1895.

Mr. W. H. Wolstencroft said that he was always told that it was useless to go to State shoots in neighboring States, owing to so few events being open to all. The Association, he said, could have much better attendance if all the sweeps were not open. Mr. H. M. F. Worden handed in the following motion for the consideration of the meeting: "That a committee of five be appointed by the chair to consider the propriety of amending the constitution and by-laws of the Association. The said committee to meet at the call of the president."

Mr. Thurman and the president both spoke strongly in regard to the need of some alteration in the constitution and by-laws. Mr. Hughes called attention to the remarkably large entry list achieved each year by the New York State Association. Mr. Shaaber also approved of the motion and of its object. Mr. Shaner said that in his opinion 10 bird races were too small when one came to consider the caliber of the shooters attending the State shoots.

The motion having been seconded by Mr. Fieles, the question was put in due form, and the motion was declared by the chair to have been carried. The chairman announced that he would appoint the committee after careful consideration.

Mr. Worden offered the following: "That a committee of three be appointed by the chair, with the president of this Association as chairman of such committee, for the purpose of obtaining an appropriation from the State in behalf of game preservation and protection, and to secure the appointment of a State game commission."

In support of his motion, Mr. Worden said that he would suggest that the Forestry and Game Commissions be merged under one head, adding that he not only believed such a thing possible, but that the Forestry Commission was really willing to take care of the matter of game protection. Mr. J. O'H. Denny spoke in favor of such a motion, and said that a State game warden was what was really needed.

After further discussion on the subject, the secretary read the following communication:

GREENE COUNTY, Pa., June 25.—Edward Banks, Esq., Secretary Pennsylvania State Sportsmen's Association.—Dear Sir: Before applying to your association for membership I would like to ask the following question: Would you kindly inform me what your association would do for me under these circumstances?

I have a farm of 450 acres; if left alone under ordinary circumstances there would be plenty of game. A great deal of hunting and trapping, however, is done in this section out of season. Now this hunting and trapping is largely done by neighbors with whom, of course, I would prefer to be friendly, therefore I do not care to prosecute directly. Now, should I become a member of your association could I reach these through the association by reporting offenses to you and without my being directly known in the matter? Just this one thing more than any other is destroying our game, but neighbor does not like to prosecute neighbor. A remedy, however, I think, would be for the sportsmen of the State to have certain officers whose duty it would be to prosecute.

I am at all times for the preservation of our game, and am very fond of hunting and fishing, but never sold a piece of game in my life and never wantonly killed more than I could use, nor killed game out of season. I am anxious to join an earnest association and hope to hear from you with full particulars in answer to the above question. Very truly yours, * * *

The secretary before reading the above stated that he would not reveal the name or address of the writer for reasons that would be well understood by the members present. The letter, he said, was only one more proof of the necessity of some central power which could take action in similar cases, with power and money to prosecute the guilty parties. He had written the writer of the above to the effect that the association had neither money nor authority where with to prosecute in such cases as the one he mentioned.

Mr. Worden spoke strongly in favor of prompt and thorough action in this matter, which he looked upon as of vital importance to the sportsmen of this State. The motion carried. The president announced that he would make his appointments known at a later date.

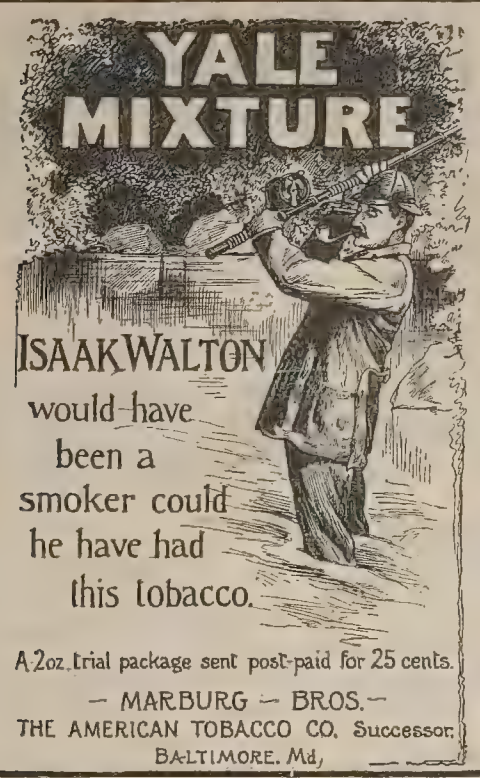
Election of officers: President, N. A. Hughes, of Williamsport, and Vice-President, James H. Worden, of Harrisburg, were re-elected to fill their old positions. The following is a list of other officers chosen for the ensuing year, Secretary, Harry Thurman; Corresponding Secretary, John C. Shallcross; Treasurer, Jas. H. Wolstencroft. Directors: John Shaaber, of Reading, Pa.; J. O'H. Denny, of Pittsburgh, Pa.; D. P. Faust, of Tremont; W. J. Vance, of Braddock, Pa.; J. H. Millspaugh, of Williamsport, and W. H. Wolstencroft, of Frankford, Pa.

Prior to the adjournment the report of the treasurer was read, received and filed.

On motion meeting adjourned.

It is evidently the intention of the members of the Association to make strenuous efforts to obtain better protection for game in Pennsylvania. To that end it is almost certain that the Association will reorganize shortly on lines similar to that of the New York State Association. EDWARD BANKS.

# Answers to Correspondents.



**No notice taken of anonymous communications**

J. D. B., New York.—You will find shore bird shooting and quail, with good salt water fishing, at Virginia Beach, at the time named.

H. L. W., Adrian, Mich.—Will you be kind enough to tell me in your next issue if there is a tool or a funnel made that will load a 12-gauge paper shell with 11-gauge wads after they have been shot, which of course leaves the edge of the shell more or less ruffled up, so in pressing the wad through the metal funnels that come with the ordinary loading sets they will not go into the shell, and it jams and breaks the shell down. Ans. You need a loader of the Barclay pattern.

R. S., Stege Station, Cal.—Could you kindly give me some information on frog culture or refer me to some one in the business. I have three ponds well adapted for frog-raising and have made thus far a good success; but they tell me that they immigrate in the winter. I stocked the ponds with a thousand little frogs last fall and they have done wonderfully well, but I find that I have lost a great many. I would like to know if they have to be fed or how to keep them in the inclosure, or if I can buy a book on frogs? Ans. We know of no book on the subject of frog culture, nor any instances where it has been successfully accomplished. Frogs prey upon the young of their own species, and this habit makes it very difficult, if not impossible, to raise them successfully for the market.

J. B, West Park, N. Y.—1. Please inform me through your Answers to Correspondents the best 12 gauge load for foxes which requires a close even pattern with the highest penetration at long range; would the U. M. C. canvasback load (No. 153) answer the requirements? 2. Can I reload a brass shell and get as good shooting as from a machine-loaded paper shell? 3. In trying to reload a paper shell, when I push in the wad the inside of the shell is pushed down ahead of it, thus spoiling both shell and load; is there any way to prevent this? 4. The sportsmen here claim the supervisors' law for Ulster county on woodcock and partridge is Sept 1. The *Brief* does not give it so. Ans. 1. The U. M. C. No. 153 load would do very well, but heavier shot as large as BB is frequently used. 2. We doubt if your results would average as well. 3. See answer to "H. S. W." 4. The last edition of the *Brief* gives the Ulster county law as you state it. The law was not filed at Albany when the previous issue of the *Brief* was published.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

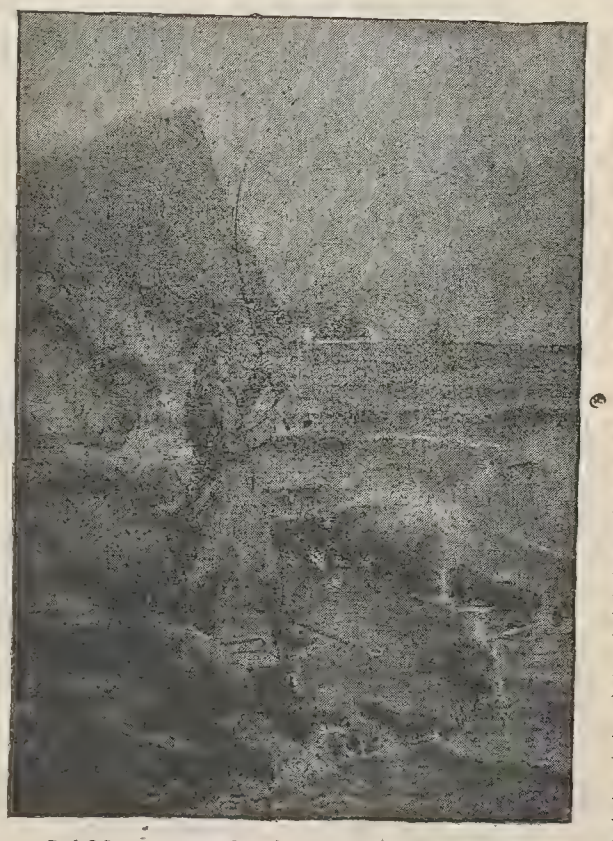
# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

JACKSNIPE COMING IN.

## AS PREMIUMS.



We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** 6 *months and any two pictures*, **$3.**

If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.

Copies of them may be seen at this office, and inspection is invited.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

SEE REDUCED HALF-TONES IN OUR ADVT. COLUMNS.

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream *one year and the set of four pictures*, $5.**
**Forest and Stream *6 months and any two of the pictures*, $3.**
**Price of the pictures alone, $1.50 each; $5 for the set.**

Remit by express money order or postal money order Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *A LESSON IN FORESTRY.*

THE story of the destruction of life and property by forest fires in Minnesota, Wisconsin, Pennsylvania and New York is the melancholy repetition of a warning often given before. A great area of forest land has been burned over, vast quantities of timber have been destroyed, flourishing towns, prosperous farms, and the little cabins of the latest settlers have been wiped out of existence; and worse than all this, men, women and children have perished by hundreds—victims of the flames that swept over the dry forests. Hundreds of lives and millions of dollars have been lost, and the people and the newspapers unite in lamenting a catastrophe whose like has not been known for a dozen years. All are eager to contribute to relieve the present suffering, and we read of train loads of provisions, tents and blankets being sent to the destitute people, contributed by the generous citizens of neighboring towns.

---

There is something curiously and sadly human about all this. We all stand about and raise our voices in lamentation over what is really a national misfortune, but we none of us appear to recollect that this calamity has come upon us entirely through our own neglect of those precautions which should have been taken many years ago. It is perfectly well known that wood will burn, that a country that has been or is being lumbered over is peculiarly exposed to forest fires, that such fires when started among coniferous—or even among deciduous trees in a time of drought—cannot be checked when once they have got fair headway. All this being known, it is the business of each State which contains extensive forests, or where lumbering is an important interest, to guard against the danger of forest fires, by providing and enforcing a system of laws for the protection, not only of their forests, but what is of far more importance, the lives of the citizens who dwell within the limits of those forests. Such laws, properly enforced, would prevent disasters like those which have just taken place.

---

A proper system of forest guardianship could not be had for nothing. If it were efficient it would cost something. But if it is worth while for a city to support a paid fire department to prevent loss within its limits, why should it not be worth the while of a State to support a system of forest guards to protect its citizens, their dwellings and its own standing timber? The taxes for the support of such a force should naturally be borne in large degree by that portion of the community whose interests are especially to be served by the prevention of fires. While the inhabitants of the State at large should pay a part of the tax, a very considerable portion should be paid by the lumbermen. They are the ones most directly benefited by the protection of the forests, and yet too often they are the very ones who start such conflagrations, if not by their own carelessness with fire, at least by the accumulations which they leave behind them as they work through the woods.

---

The subject of forest protection is one about which much has been written, but as yet with very trifling result. We have in Washington in the Department of Agriculture a Bureau of Forestry, and we have in various parts of the country a number of forest reservations, but these things are names only. The Bureau, with the best will in the world to accomplish something, has no money and no men, and the forest reservations are being plundered and destroyed in a way that shows clearly enough how little effect the name has on the adjacent population. No adequate measures for forest protection will ever be taken in this country until some intelligent interest in forestry shall be felt by the public at large, and it is the duty of every one who now feels such an interest, and is alive to the importance of the subject, to do his part to educate his neighbor on this point.

### *AN AMERICAN FLY-FISHERS' CLUB.*

WE heartily second Mr. A. N. Cheney's suggestion that there be formed an American Fly-Fishers' Club. The material for the organization is abundant and of the best quality; the advantages to come from such an association of kindred spirits are substantial; the club would be a success from the start.

Is it too much to say that the proposal now made will be put into early execution? Shall we not open the new year with a fly-fishers' club well established?

### *THE WOULDS.*

THERE are in this world two sorts of men, those who fish and those who don't.

The don'ts are divided into those who would if they could but can't, and those who could if they would but won't.

The won'ts are still further divided into those who are quite contented that they don't want to, and those who are dissatisfied with themselves because they lack the taste.

When we get as far as this we reach the man who could if he would but won't, and would if he could but can't.

Talk to him about it, and he will tell you something like this: "Yes, I know that it is a great thing to go fishing. There is my partner. He is a fisherman, says it's fun, and by the way he sticks to it and leaves me here to take care of things, I guess likely it is fun—for him. But as for me, I can't fish. I've tried it, faithfully; have sat in a boat half a day at a time; have tramped miles of stream; have gone through the motions, and caught fish, too; but that is not fishing; it does not give me the enjoyment it does others. I am not a fisherman, when I see how others like it, how much good it seems to do them, and how it brightens up the world for them, I often wish I did like fishing. But I don't and never shall."

That is what the woulds say. Just such cases have come under the notice of almost every fisherman. For there is this about field sports, that while most people are quite ready to recognize what they do for those who follow them, the taste for their true enjoyment is born in one and is with difficulty acquired in mature years. It may lie long latent; and one may take to fishing or to shooting late in life; but he must have had in him, though dormant and unsuspected, the capacity of enjoyment with the rod or the gun. Not infrequently people take up in late life the fishing rod which has been idle for years, or go shooting once more after a decade of forgetfulness of the field. They renew the sports of their early days, and with them awaken again the youthful spirit, and restore health and strength and courage, and fortitude. To be possessed of such tastes is a blessing often too lightly esteemed. The father, who endows his son, in the care-free days of boyhood, with a liking for these sports of the field, is equipping him for life with resources of healthful enjoyment.

### *DUCKS WITH EGGS.*

THE Senate Committee on Game Laws of the New York Legislature held a meeting in Rochester, last week, which is reported on another page. Senator Guy has a scheme of dividing the State into three parts—like ancient Gaul—with a separate law for each district. We are free to say that we do not think much of the plan. There is no likelihood that the task of the game protectors would be any lighter under such a system; nor is there any real reason for adopting it, except to yield to mistaken estimates of local interests. It is contrary to the growing tendency of progressive protection, which is in the direction of uniform laws for an entire State and for groups of States.

---

If Senator Guy would think a little more deeply on the subject of spring shooting asked for by certain Long Island people, he would understand that their interests are not diverse from those of the sportsmen in the central and western counties, who ask for the abolition of spring shooting. The purpose of forbidding the destruction of game birds which are making their way north to nest is to give them an opportunity to multiply and replenish the supply. A wild duck, with developing eggs, flying to the breeding grounds to deposit and brood them, should be given free passage and safe conduct, whether she fly nestward by the Long Island air line or that over Lake Ontario. The law of nature is the same in either event. The only reason that some people cry for spring shooting while others demand its abolition is that they do not understand the merits of the question, or if they do understand they are not willing to concede something of their individual, local and immediate interests for the larger and more permanent interests in which they too might share.

If there is any good reason for the protection anywhere of nesting birds and birds about to nest, that same reason holds everywhere and would hold all over the State of New York, even if there were a hundred and ten different districts with a separate duck law for each.

### *SNAP SHOTS.*

THE long and severe drought which has affected so wide an area has brought about conditions which make upland shooting anything but an enjoyable sport. Covers are wilted, the ground is parched; and the view is obscured by a depressing haze. Game has been driven from its accustomed haunts; food is scarce, and the birds are in poor condition and ill-fed. There is less attraction than usual to invite one afield. And yet there is some satisfaction after all in going once more through the old covers; and the sound of the shotgun is heard everywhere in the land, affording ample testimony to the undaunted field-going of the hosts.

---

Some hint of the popularity of prairie chicken shooting is given by our exchanges from the chicken country which report that on the opening day every private vehicle and livery "rig" was impressed into service by the gunners. Birds in the neighborhood of Jamestown, North Dakota, are reported to be earlier in the wheat stubbles than usual, and to be abundant in supply. If we are to judge from the printed reports of the bags made, the law limiting one shooter to twenty-five birds per day does not amount to anything.

---

Do not forget that where the drought prevails there is real and serious danger of field and woods fire; and that a smouldering gun wad, cigar stump or pipe ashes, or camp fire carelessly abandoned or unprotected, may kindle the destruction. Indeed there are districts where not a gun should be fired, where the danger of fire is so imminent that hunting would be almost criminal.

---

At a meeting held last week it was definitely determined that the projected sportsmen's exposition should be held in the Madison Square Garden, in this city, in May, 1895. It will extend through a week.

# The Sportsman Tourist.

## "A TERROR OF A RIDE."

It is interesting to note how some little occurrence will suggest and vividly recall to us incidents in our past lives which have perhaps lain long forgotten in memory's storehouse. It may be too, that there is no particular similarity between the two events in question, nevertheless there will be something about the one which will cause the mind to quickly revert to the other. Thus I chanced to read the other day of the narrow escape of a trout fisherman in northern Wisconsin, from death by the fierce forest fires which have been ravaging and desolating that region during the past summer, and then my mind swiftly went back to the perils which beset another trout fisherman a good many years ago in Colorado. In this latter case the peril was not from fire, but it is my belief now as I recall the moments of agonized apprehension and suspense I then suffered, that anything so tangible as fire, despite its terror-inspiring presence, would have been hailed as an absolute relief to me.

It was in the early seventies that it happened, at which time I was in the employ of an English mining company whose base of operation was about seventy miles south of Denver, and close up to the snowy range. It was a very lively camp, at least 400 or 500 men being employed in the development of the mines, the construction of the reduction works, smelter, and such other work as is incident to the building up of a mining camp. As is usually the case in these places, a considerable number of tough characters drifted into the camp, attracted by the flush times created by the company's large expenditure of money. Indeed the camp very soon became quite tough, shooting and carving affrays being of painfully frequent occurrence, while as a little side diversion the Denver stage, which passed within about four miles of camp, was occasionally held up and the mail sack and passengers were relieved of such valuables as they chanced to have about them. At this time the post office of the camp was at a stage station about nine miles distant, and every afternoon some one from the camp was sent down to get the Denver mail. It so happened that the choice often fell upon me, and much to my pleasure it may be said, for the road all the way down closely followed one of the branches of the South Platte, which in those days afforded superb trout fishing, and I was passionately fond of that sport.

From the days of early boyhood in southern Michigan, the sports of the stream and field had been to me a never ending source of delight, and while the landing of an extra fine bass or pickerel seemingly filled my cup of joy quite full, yet I never ceased to look forward to my first trout as an occasion when life would put on a new and more glorious coloring. I can well remember after my arrival in Denver, the pent up eagerness with which I awaited my first chance to cast a fly, and how, when the opportunity at length arrived late one afternoon, with what a swelling heart and trembling hand I launched the feathery lure on the edge of a dark, shady pool which I intuitively felt was the abiding place of royalty.

Ah, that first rise! It was an epoch in my life. How well I remember the sudden flashing of rainbow colors in the cool dark depths, and how wildly my heart beat when a moment later there burst upon my vision the graceful outlines of a superb trout as he swiftly cleaved the waters in his fierce upward rush. I scarcely know what happened for a moment in such a tumult of excitement was I, but in another moment I felt a violent surge as he sought to free himself, and then with a fierce throb of exultation I realized that I had him well hooked. Then the battle waxed hot and furious. Hither and thither he tore through the swift waters, varying his mad rushes with frantic leaps in the air, only to find himself still a prisoner. All at once he seemed to summon his fast tiring energies for one supreme effort, and as he gracefully fell back after a mighty leap upward, I felt with a sinking heart that sudden slacking of the line which told me only too well that he was free. I have since that time brought many a princely fellow to creel, but somehow there has always remained deep down in my heart the conviction that the trout I lost that day, the first one I ever fastened, was the most royal treasure that ever gladdened an angler's eye.

It was not long after my arrival in camp before I was well acquainted with the stream. There was not a likely looking pool or riffle for miles down that I did not know of, and the many happy hours I spent following its picturesque windings amid an ever shifting panorama of beautiful and sublime scenery, will ever remain among life's golden memories.

It so happened that owing to a pressure of work I had been unable to indulge in my favorite sport for some time previous to the afternoon in question, so that it was with more than ordinary pleasure that I contemplated my mission this day. I took about two hours to make the journey down, stopping here and there at some favorite pool, and with such success that my basket was well filled before I reached the post-office. I remember one place in particular, a long, deep, shady pool made by a beaver dam, from which I took a number of beautiful fish—eight or ten at least. Indeed, I had an ideal afternoon's sport, and it was with positive regret that I saw the log post-office loom up before me.

The Denver stage usually reached here about 5 o'clock, but this afternoon, owing to an accident down the road, it did not arrive until after 7. By the time the mail was sorted, and I had secured that intended for camp, it had grown quite dark, observing which fact, and also recalling the presence of the many rough characters in the neighborhood of late, the postmaster urged me to remain until morning. I, however, had a young man's dislike to a seeming confession of weakness in the face of possible peril, and besides I was satisfied that my failure to return before morning would probably lead my friends to believe that some harm had befallen me. Moreover, I had an unusually strong and swift horse, in addition to which I carried a big Smith & Wesson .44cal. revolver, which I could use with as much rapidity and accuracy as the average man in camp, and that is saying that I was a pretty good shot. So despite the postmaster's rather urgent invitation, I decided to return to camp that night, and in a few moments I was on my way.

I had proceeded about a mile, I should think, quite uneventfully, when chancing to look up at the top of a rather sharp hill up which I was traveling, I noticed indistinctly outlined against the faint after-glow which was still visible in the west, what seemed to be the figure of a man on horseback, standing quietly by the side of the road. It was only for a moment that I saw it, but there was no doubt in my mind as to what it was, and at the same moment there rushed into my mind with the force of almost positive conviction the thought that it presaged trouble for me. My first impulse was to turn about quickly, and ride back to the post-office, but fearing the ridicule which might be visited upon me, in view of the light manner in which I had treated the postmaster's suggestion of danger, I determined to keep on my way, thinking after all it was more than probable that my fears had greatly exaggerated the possibilities of danger for me. I determined to be on my guard, however, and drawing my revolver from the holster I laid it full cocked over my left arm so as to command the mysterious horseman when I passed him. As I drew near I saw that he was leaning forward in his saddle, and then to my alarm I saw that his right hand was resting on his holster as though grasping the handle of his revolver. I had been exceedingly apprehensive from the first, and when a moment later I slowly rode by him, my excited nerves were keyed up to the highest tension. Indeed, I don't believe that man will ever know how close he was to death, for had he made the slightest hostile demonstration, I should have shot him without a moment's hesitation. It is just possible that he caught a gleam of my revolver, or guessed from my peculiar attitude that I was maintaining a steady "drop" on him, for he made not the slightest movement, save that he slowly turned his head and followed me with a fixed and penetrating gaze. But not a word nor even nod did we exchange with one another, and when at length the intervening darkness had swallowed up the outlines of his figure, I struck the spurs into my horse, anxious to put as much space as possible between myself and the grim sentinel of the hilltop.

I had gone perhaps a hundred yards when I was startled by the sharp crack of a revolver, evidently fired by the man whom I had just passed. I was revolving in my perplexed mind the reason for this rather strange procedure, when I heard another shot some considerable distance ahead, fired evidently in response to the first shot. For a moment I pondered as to its meaning, and then like a flash came the thought to my mind that I was trapped, the victim of a cunning plot; that the man whom I had just passed had identified me as the mail carrier, and had so signaled to his fellow bandits who were lying in wait for me, and who would now be prepared to hold me up, or perhaps shoot me first.

How I did wish I had accepted the postmaster's advice and had remained with him until morning, or had acted on the impulse which seized me when I first detected the sentinel on the hilltop. But, alas! now it was too late, and with the cold perspiration of despair oozing from every pore, I sought to collect my paralyzed faculties and decide upon some plan of action. If the character of the ground had permitted, I should have sought to hide off the side of the road somewhere, but the mountain rose steep and rocky on one side, and on the other was a sheer drop of twenty feet at least to the river below, so that escape that way was out of the question. I seemed to myself to be like a rat in a pit, with no possible chance of escape, when suddenly there came to mind the memory of an old Indian cut-off or trail from the main road, which I had traversed several times. It left the main road, as I remembered, about a mile and a half above the post office, and struck it again about three miles and a half above, saving nearly a mile of travel; but it was very rough in places, and I almost doubted whether I could get through in safety at night. But the prospect did not trouble me in the least, my only fear being that I would be unable to find the opening of the trail at night, as it was pretty well obscured by bushes and trees, or that the ruffians who were lying in wait for me should prove to be stationed this side of the opening. It seemed to be my only chance of escape, however, and I determined to make a try for it.

As near as I could make out in my naturally agitated state of mind it was not to exceed a quarter of a mile from me, and after riding perhaps 200yds. at a rapid pace, I drew my horse down to a walk, and pulling him well over to the right side of the road, I sought with eager gaze for some evidence of the opening. As moment succeeded moment, however, without the slightest trace of it, a feeling of utter despair began to take possession of me, and to my feverish fancy it seemed as though each succeeding moment would bring with it a stern summons to halt, or the deadly crack of a Winchester or revolver. Once I halted, certain that I heard the low voices of men a little ahead and to the right of the road, but as nothing else followed, I resumed my way in a moment. I was just in the act of turning about, certain that I had passed the trail, when my eye was attracted by a quaking asp tree, distinguished by its lighter appearance, a few feet ahead of me, and recalling the fact that such a tree stood at the opening of the trail, I directed the horse toward it. It would be difficult to give any conception of the suspense I suffered while traversing that short intervening space, for I felt that should I fail in this attempt to find the opening, I would in all probability fall a victim to the wretches who were lying in wait for me.

It was but a second, but it seemed ages before I reached it, and when the horse passed on unhesitatingly by it, a flood of inexpressible joy rushed to my heart, for I knew that I had found the trail at last. For some little distance I rode at a walk, deeming it the part of wisdom to keep as quiet as possible until I had got well out of the hearing of any one on the road. At the same time I realized the imperative necessity of making all possible despatch, lest the highwaymen, knowing possibly of the trail, should suspect that I had taken it and should endeaver to intercept me at the other end. And so in a few moments I began to ride, and what a ride it was. The imminent peril of my situation made me oblivious to the danger of the trail, and I was soon tearing over it like one possessed.

Realizing the danger from low-hanging bows I leaned forward in my saddle with my head carried as low as possible, but in spite of this precaution my hat was soon knocked from my head, my coat sleeve was torn almost in ribbons, and my hand and arm with which I was endeavoring to shield my face were scratched and bleeding in a dozen places. Three or four times the horse stumbled and nearly fell, sure-footed as he was, and once I just escaped being thrown over his head. Once he suddenly stopped, and upon investigation I found a fallen tree lying directly across the trail, which, after some little difficulty, I managed to get around. Two or three times I heard the quick bounds of startled deer, and once a great bird, an owl I fancy, flew so near to me that I distinctly felt the fanning of its wings. As I began to draw near the main road again, a torturing anxiety possessed me lest the road agents, suspecting the manner of my escape, had ridden swiftly to the upper entrance of the trail, and were there awaiting my appearance.

At length, however, I emerged from the trail into the highway, and to my intense relief found no one waiting for me. And so I had outwitted the bold bandits, and it was with very pleasant feelings toward myself that I started my horse at a swinging gallop toward camp. I realized that I was slightly disfigured, but I could not help feeling that I was still in the ring, and by a large majority. My erstwhile acute apprehension had given way to a feeling of exuberant confidence and security, and so great was the stimulus of the reaction that I seemed to regard the recent incident as on the whole a rather interesting and not altogether unpleasant experience.

Such a thing as further trouble I never thought of, save now and then, deceived doubtless by the tumbling stream near by, I fancied I heard the distant galloping of horses. It was in this rather pleasant frame of mind that I approached what was to me at night a somewhat uncanny bit of road. The high precipitous mountains on either side drew nearer together, and the intervening space was filled with a dense growth of timber, which made the place one of inky darkness at night. The thought which caused the creepy feeling, however, to run along my spine, was the fact that a year or two before a man had been waylaid and murdered by a couple of Mexican greasers, and I had a discolored spot on a long white stone by the roadside pointed out to me as the blood marks of the victim who fell and died upon it. Despite my utter disbelief in ghosts, I never passed that spot alone at night without experiencing a very uncomfortable feeling. It seemed an ideal spot for disembodied spirits to materialize, and to my excited feelings at times it seemed as though I could detect in the dull outlines of the white stone, the indistinct contour of a prostrate figure.

I presume it was the sense of danger overcome, and the reaction from a state of high nervous tension, that made me less susceptible than usual to-night to these impressions, although they recurred to me with more or less force. Indeed, I was speculating as to whether the ill-fated traveler had no warning whatever of the presence of the Mexicans, when suddenly my horse with a snort of terror stopped still, and stood trembling like a leaf. The impenetrable darkness, the grewsome associations of the place, and my previous experience all went to make my position one of demoralizing terror. I think that to the average man there is something uncanny about a great forest at night, even when one feels that there is no possible danger at hand. The sense of helplessness which accompanies one's inability to see and protect one's self against any possible assault, seems to stimulate those superstitious chords which are latent within us all. When to this are added the elements of positive danger, and a spot steeped with grewsome associations, the situation becomes one well calculated to try the stoutest heart. Men who know not the meaning of the word fear in the face of positive, tangible danger, become under the conditions above narrated the victims of an overpowering, helpless fear.

I scarcely know how it all affected me. For several moments I seemed to be in a state of semi-paralysis, so unexpected and overwhelming was the scene of this new danger evidently so near at hand. I sat there with drawn revolver, motionless, and with a feeling of utter helplessness, awaiting the onslaught of the hidden foe. The actions of my horse left me in no doubt as to the presence of danger; and I expected that each succeeding moment would bring with it the savage cry and fierce onslaught of some wild beast, or the explosive flash of a highwayman's gun. My horse gave renewed evidence of fear, and of such a violent character, that I could not help but feel that the crisis was near at hand. I had turned him partially around, determined if possible to go back down the road a bit and decide upon my future course of action, when there came to my ears the distinct sound of horses' feet coming up the road. There was no doubt about it this time, and each succeeding second seemed to bring them perceptibly nearer. I hadn't the slightest doubt that the new comers were the ruffians whom I had foiled down the road, and rather than fall into their hands after having once escaped them, I determined to face the new danger, let the result be what it would. To my horror, however, my horse refused to budge an inch, despite my most frantic efforts to urge him on. At length, rendered thoroughly desperate by the steady approach of the horsemen, I drove the spurs savagely into him three or four times. The cruel punishment was more than he could bear, and after making two or three frantic efforts to turn around, he suddenly sprang forward with a snort of mingled pain and terror. Just before me there was a slight dip in the road, and a few feet beyond the ascent on the opposite side there was a small piece of comparatively open ground which was lighted up by the rays of the moon, which shone upon it through a sharp cleft in the mountain at the left. Just as I gained the edge of this opening I saw a few feet ahead and to the right of the road, clearly outlined by the moon's rays, a very large cinnamon bear. I saw him a moment before the horse did, and almost intuitively I reached forward and grasped the right bridle rein, realizing that as soon as the horse saw the bear, he would probably endeavor to turn sharply to the left, where the thick timber would undoubtedly quickly dismount, if not seriously injure me.

Then the horse caught sight of the bear, the scent of which had evidently all along been the cause of his fear. I really shouldn't dare give my candid, honest opinion as to the height and length of the tremendous leap which followed. Suffice it to say that, prepared for it as I was, so convulsive and vehement was it in the force of its energized terror, that my feet flew out of the stirrups, and for a moment I seemed to balance exactly on the end of my spine, undecided whether I was to fall off or stay on. In another moment, however, I luckily recovered my equilibrium and settled back in the saddle, but not in time to keep the horse entirely out of the timber. Indeed, it was some little time before I got him in the road again, and not before I had received several more thumps on my already thumped and bruised anatomy. At length, however, I swung him into the road, and I have a very distinct recollection of extending to him every possible encouragement in his efforts to get to camp as quickly as

possible. It may be said, however, that he needed very little encouragement in this direction, and the manner in which he flew up over that mountain road left little fear in my mind with reference to any one overtaking me. Indeed, it seemed but a short time before I pulled in front of the only store in camp, and when a moment later I walked inside, exclamations of surprise and alarm came from the dozen or more men who were there, my torn clothes and bleeding face and hands leading them to believe that some serious harm had befallen me.

I assured them that I was not seriously hurt, and in reply to their inquiries told the story of my night's experience. When I had finished, big Jack Perdue, the sawyer, said between meditative puffs on his pipe: "'Twas a terror of a ride, sure enough," which seemed to me at the time, and even now to have been a very happy characterization of my experience.

It may be said in conclusion that I brought my trout through in safety, and whether it was that the experiences of the night seasoned them any or not, yet it certainly did seem to me the next day when I helped devour them, that there was an extra rare flavor to them. SANCHO.

## THE SINGING MOUSE STORIES.—V.

### The Skull and the Rose.

THE Singing Mouse peeped out from the hollow orbit of the white skull which lies upon the table next to the volume of Shakspere. It reached down a tiny pink paw and touched a leaf of the brave red rose which every day lies before the skull. It plucked the leaf, which made a buckler for its small throbbing breast. It spoke.

"The rose is bold and red," said the Singing Mouse. "Blood is red. A skull is white. The rose and the skull love one another. They understand. We do not understand."

As I sat by the skull I saw a dream of the past go by. It was as you see it now.

"Do you see the waving grasses of the valleys? Do you see the unmoving front of the white old mountains? Do you see the red roses growing down among the grasses?

"It is peace upon the land. I can see one who has seen the lands. He smiles, but he is sad. He crosses the wide sea, but cares not. He travels upon rails of iron, and he smiles, but still is sad, because he thinks, and he who thinks must weep. He leaves the ship and the iron rail, and his road is narrower and slower, for he travels now by wheels of wood. He sees the valleys, and his smile has more of peace. His trail becomes narrower yet. He goes by saddle, and the mountains hem him in, but now he smiles the more. Now he must leave even the saddle, and the trail is dim and hard. See, the trail is gone! Here, where no foot has trod, where the mountains close about, where the trees whisper, he sits and looks about him. Do you see the red rose on his breast? Always the rose is there. Do you see him look up at the mountains, about him at the trees? Do you see him lay his head upon the earth? Do you still see his smile, the smile which is weary and yet not afraid? Do you hear him sigh? And what is this he whispers, here at the end of the long and narrowing way—'I know not if this be the end or the beginning!' Ah, what does this man mean who whispers to himself in riddles?

"Look! It is the time of war. There is music. The blood stings. The heart leaps. The eye flames. The soul exults. Flickering of light on steel, the flash of servant forces used to slay, the reverberant growl of engines made for death, the passing of men in cloth and men in blankets, the tramp of hurrying hoofs, the falling of men who die—can you see this—can you catch the horror, the exultation, the joy of this, I say? They come, they go; they run their race, and it is all.

"Here are those who ride against those who slay. Do you know this one who rides at the head, smiling, swinging his sword well and smiling all the time? It is he who said in the mountains that riddle of the end and the beginning—who knew that to the heart of Nature we must come, for either the end or the beginning of a happy life. Do you see upon his breast the red rose? I think he rides to battle with the rose knowing that fate will come.

"You know of this biting whistle in the air—this small thing that smites unseen? Do you know the mowing of the death scythes? Hark! I heard the singing of this unseen thing. See! he of the rose is bitten. He has fallen. Ai! ai! He was so brave and strong! His horse has gone. He is alone. The grass here was so green. It is red. The rose upon his breast is red. His face is white, but still the smile is there, and now it is calmer and more sweet, though still he whispers, 'I know not if it be the end or the beginning!'

"He is alone with Nature again. The heavens weep for him. The grasses and leaves begin with busy fingers to cover him up. The earth pillows him. He sleeps. It is all. It is done. It is the way of life. It is the end and the beginning.

"He loved the valley, the mountain, the grass, the rose. Now, since he cherished the rose so well, see, the rose will not leave him. Out of the dust it rises, it grows, it blooms. Against his lips it presses. It is the beginning! He loved, he thought, he knew. He is not dead. He is with Nature. It is but the beginning!

"Let the rose press against his lips in an eternal pure caress. There is no end. They understand. We do not yet understand."

---

The pink flame of the unreal light died away. The pageant of the hills, the panorama of the battle faded and were gone. The table and the books came back. Wondering at these words, I scarce could tell when the Singing Mouse went away, leaving me staring at the barren walls and at the white skull by my hand.

For a moment it nearly seemed to me the hollow eyes had light and spoke to me. For a moment almost it seemed to me that the rose stirred down deep among its petals, and that a wider perfume floated out upon the air.

E. HOUGH.

CHICAGO, May 10.

---

It is told of the late John Quincy Adams that a Quincy client of his, whose case was to be tried on a certain morning, was unable to get his counsel to go to Boston, or to leave his fishing boat, except long enough to write a note to the judge, which, when presented, caused that worthy magistrate to announce to the court: "Mr. Adams is detained on important business." The note read: "Dear Judge—For the sake of old Izaak Walton, please continue my case until Friday. The smelt are biting and I cant leave."—*New York Evening Post.*

### Newfoundland As It Is.

ST. JOHNS, Newfoundland.—*Editor Forest and Stream:* A handbook and guide entitled "Newfoundland As It Is in '94," has been published by the Rev. Moses Harvey of St. Johns. As this work is full of gross exaggerations respecting some of the subjects on which it treats, I should be glad for space to make a few remarks on it so as to prevent people being misled.

The soil of the island, except in a few isolated spots, is of a poor, sandy, stony nature, requiring much manure. The rich, loamy, fertile soil said to be the rule in the valleys of the Exploite, Humber and other rivers is not to be found, except in very small patches, if at all. The statement that the great barrens, large open spaces of altitude in the center of the island, such as the Whitehills north on Hale's Bay, are a "splendid ranching country, equal as a cattle and sheep raising country to the foothills of the Rocky Mountains in Montana or Alberta" is altogether an error. These barrens afford no vegetation of any kind for sheep or cattle; all they grow is white moss, coarse, sour rushes and dwarf spruce. The climate of the island is all against farming, the summer being too short and too cold. The truck system obtains, as St. Johns is the only cash market. To talk of emigration to such a place, to live by the land, is ridiculous. There is very little natural meadow in the island, and the abundant supply of nutritious wild grass and pasture" is a myth, as the rivers nearly always have steep banks, which they never overflow.

As to sport, there are a good many deer still left, though at the rate people destroy them in winter by firing buckshot into the herd, they will not last very long; and Mr. Harvey forgets to tell the non-resident sportsman that before he can kill a deer he must pay a license of $100. He who writes as if the stags has always horns of "magnificent proportions—the brow antlers meeting over the nose like a pair of hands clasped in the attitude of prayer." But horns such as these are by no means common, especially with meeting brow antlers. As a rule, a stag, even a big one, has but one perfect antler, the other is a mere prong like a finger, and the perfect one is extended out like a hand over the nose, somewhat in the fashion school boys sometimes adopt, not when they are engaged in prayer, or animated by any pious or reverential feeling, but very much the reverse!

The great barrens are described as abounding with "immense numbers of snipe;" as a fact there is hardly a snipe to be seen on them, and nowhere are they plenty. Ducks of all kinds are very scarce, as there is no food for them. Curlew, so called, at the present are rarely met with, they having deserted their old haunts. Plover also are only occasionally killed. As Mr. Harvey says, the salmon rivers have been ruined more or less by barring and poaching, but he is mistaken in saying that the fishery laws are enforced, such is seldom the case, and I must add that for some curious reason the salmon are very sulky at rising to the fly, especially those of more than 4 or 5lbs. which is the size of the great majority of the fish.

The fact is the colony have undertaken to build 500 miles of railway, which can never pay in any way, hence a frantic attempt is being made to boom the country, so as to bring grist to the mill and enable those who own land along side the track to sell to advantage.

RICHARD DASHWORD.

# Natural History.

## AN ANGLER'S DAY IN BIRDLAND.

FRIDAY May 18, a friend and myself with rods in hand left home at an early hour, *en route* for the haunts of the trout, but finding the streams too shallow and sluggish for sport with the rod we turned to smiling nature and gave ourselves up to the fascinating study of bird habits; and never in a limited space have I observed abundance and variety of bird life as I saw it that day between Lebanon and Yantic, this State, along the wooded banks of the Susquetonscot River.

The weather was warm and humid and the woods rang with the varied notes. We soon made a rare discovery, the nest of a pair of ruby-throated humming birds, which by a careful search we located on the upper surface of a maple branch overhanging the stream. Our discovery of the wee bit of moss and lichen was wholly due to the intense anxiety of the little midgets to drive us from the spot. The female as yet had deposited no eggs. We turned from the nest to watch the flight of a yellow-billed cuckoo. It was undoubtedly a male bird, as they arrive earlier than the females. He was noticeable by the long rudder-like tail characteristic of the species as he winged his way to a distant tree. Numerous song sparrows threaded their way along the bushy banks and flitted from twig to twig. The sharp penetrating cry of the red-tailed hawk cut the air; a close scrutiny of the blue ether above disclosed his dark form wheeling aloft in ever widening circles, his silhouette well defined against the fleecy clouds. An answering call was heard and he was joined by his mate and they soon were but a speck in the distance.

A great squalling in a nearby thicket proclaimed the presence of a pair of catbirds or mimits. They flew about in seeming great distress at our near approach to their nest, which contained four greenish colored eggs. Crossing a little glade numerous shifting shadows on the leaves caused us to direct our glance upward and a flock of crows passsed over the opening with heavy laborious flight. Hearing an unusual bird note we made search and saw the bird, a beautiful rose-breasted grosbeak. This was rather unexpected as they are more common in autumn and are not plentiful at any time in the United States. Hearing the querulous note of the wood pewee or phœbe bird, we saw a couple of these unassuming little birds hovering around the upturned roots of a fallen maple near the stream, and among the mass of roots and fibre was their nest in course of construction. Suddenly the uncanny *wah-wah* of a barred owl startled us nearly out of our wits, and volume of sound being any indication of size, he must have been a monster. A flock of song sparrows flew by and with a saucy little flirt of the tail dove into the shrubbery.

While crowding through a clump of spice bush or benzoin, I discovered a nest with a head and tail projecting above the rim. The occupant allowed me to come quite close before leaving the nest, which contained four eggs of an exquisite light blue. It was the nest of the hermit thrush, a bird of secluded habits with no song, but a sharp "chuck." We paused to note the movements of a scarlet tanager and remarked on the beauty of his scarlet coat and its glowing contrast to the emerald foliage as he sported among the branches above.

The woods rang with the reverberating roll of the partridge's drum as he amused himself on his favorite log in the distant recesses of the forest. On the cedar-grown knolls the robins were flitting about and their nests were of frequent occurrence in all stages of completion, from the first twigs to the perfect nest with eggs. The finches were here in number and variety. The rustle of the towhee finch or chewink was frequently heard among the leaves in the thickets; purple finches were often seen, the adult male looking for all the world as though he had been dipped in pokeberry juice and taken out before the drying process was complete. But the pet of them all is the little American goldfinch, his bright yellow and jet black plumage conspicuous among the willows, where they usually nest. One would hardly recognize this gay-plumaged little bird in the winter months by his coat of dull green neutral tint.

The flora vied in richness with the fauna of this delightful region, my friend often calling my attention to the liberal growth of wood lilies or trilliums, the large purple or bath flower and the delicate painted trillium, its wavy white flowers adorned with pinkish purple stripes at the base. The pale purple cranesbill was here, the twinflower, Solomon's seal and hosts of others.

At one of the stream's broad reaches I saw a belted kingfisher take his curious spiral plunge as checking his rapid flight in mid-air he dropped into the stream and emerged with a small fish. At the same pool a muskrat swam across with a leaf of the blue iris waving plume-like above his head.

Catching the sharp chatter of a Baltimore oriole we directed our steps to an elm tree in a nearby opening, and there saw the male bird moving restlessly among the foliage, and also located their queer purse-like nest, which swung at the tip of a drooping branch. From the apple trees of an old orchard came the strident cry of purple grackles, and on the old wall perched a red squirrel, who greeted the intruders in his domain with a defiant chatter and then scampered along the wall as though frightened at his temerity. The soft sweet twitter of bluebirds was wafted on the air, and approaching an old dead poplar by the water we saw one of these rightly named birds perched in close proximity to a hole which led to the interior of the tree, where doubtless the mother bird was fulfilling her maternal duties. The *wick-a-wick* of the high-hole or flicker was heard that day, and occasionally one was seen in his long undulating flight, or sitting crosswise on a branch—a feat never attempted by other members of the woodpecker tribe.

Sitting on a bowlder at the foot of a moss-grown ledge our meditations are disturbed by the rustle of leaves up the ravine side. We watch the spot and a large cock partridge struts proudly into view. What a subject for the artist's brush as he stands erect in a listening attitude, the grayish white bars of legs and breast, a strong contrast to the emerald background of laurels. Soon his native instinct seems to warn him of lurking danger; his eagle eye darts from point to point in the little glen, and as the unusual objects at the foot of the ledge burst upon his vision, the spell is broken, and with an alarmed and hurried *ouit-ouit* his brown body rises from the earth and followed by a whirl of leaves shoots through the trees like a meteor, and the booming of wings soon dies away in the distance.

In the fragrant meadows aflame with the scarlet bloom of the rhodora the meadow larks or starlings skulked through the fresh young grass, or from the summit of a convenient rock poured forth their liquid notes. Redwing blackbirds hovered around the shallow grass-grown sloughs, and with noisy gabble made their usual short curving flight, fluttering back to the starting point. Along the fences flitted the familiar little chipping sparrow and occasionally we caught Bob White's well known whistle. In fact it was birds everywhere. Never was there such a day, never such a locality, where all day we were entertained by Nature's orchestra. It is certainly a fact that bird life is the most abundant along water-courses where the conditions of nature are in accordance with the wants of the feathered tribe. Here the foliage is most luxuriant, insect life if abundant, material for nesting purposes a-plenty, and the necessary water for bathing and drink; and again, it is my firm belief that birds as well as human beings have an appreciative eye for the charm of nature, which are enhanced ten-fold by the presence of the murmuring stream.

---

### A Flying Squirrel.

ONE day my little boy and I took a stroll in the mountain just across the river, opposite Poughkeepsie, when we observed a nest in the top of a tree, which for size might be called but a sapling. I gave the tree a kick and out jumped a flying squirrel, which sailed to another large tree and disappeared. I surmised that he might be in the nest the next day. So I took a bag and cut a birch bough that was full of twigs and started for the capture of the squirrel. This time I gave the tree but a slight jar and instead of leaping from the tree he came out of the nest and clung to a branch. Instantly I gave the sapling a vigorous shake, so that he had no opportunity to leap and sail away, and he fell plump upon the ground. He assayed to climb the tree, but I would brush him down at every attempt with my birch bough, until I succeeded in putting my hat over him and then transferring him to the bag.

That this squirrel is a somewhat "mysterious fellow," as one of your correspondents says, is quite true; but this one would eat what other squirrels do. He got pretty tame in a few days and would show himself during the daytime. But all at once he disappeared. I thought he had found some place of egress and gave him up as lost. But one night as I sat at my desk I heard at "pat-pat" on the floor, and looking, saw the squirrel. I was astounded. I soon learned that he was a night animal, and found the place of his diurnal repose. It was between the bedclothes and right over my feet. I never handled him much, but he would run over me and into my pockets and nestle there. Just before I left New York State I sold him to a man who bought him, as I was in the post-office, where I had carried him in my pocket.

N. D. ELTING.

## A WISCONSIN HERONRY.

AUGUSTA, Wis.—"Bald eagles? of course they're bald eagles. Don't you suppose I know a bald eagle when I see one? Haven't I seen 'em flying that way by the hundreds?" Thus replied a long, lank, weather-beaten specimen of humanity to our question regarding certain rumors of a roost of birds dimly located among the pines anywhere from fifteen to twenty-five miles northeast of Augusta, Wis. Our informant was one of those queer characters who appear periodically upon the streets of any Western village in the timber districts, a perfect Leather-Stocking in inclination, but lacking somewhat his moral qualities, ready to eke out an existence by picking blue or blackberries in season or shooting deer out of season; usually well posted on any of nature's products which might contribute to his maintenance, but rather too apt to jump at conclusions on other questions.

While, personally, we had seen no bald eagles, it had been our luck to occasionally bag or stir up fine specimens of blue herons, and we noticed that those which escaped our guns invariably took a direct N.E. course from here. Others started up at various distances, took a course so as to land in the same locality, and in time we had a series of lines of flight all centering in one general locality like the spokes of a wheel, the hub, we figured, being somewhere between the North and South forks of the Eau Claire River some twenty miles away. It was natural then that we sought information from hunters and others, but the story of a great number of bald eagles pouring daily into the forks of the Eau Claire River called forth certain suppressed smiles and these in turn called out the remarks at the head of this article. Nevertheless, on July 5, a party of three, a doctor, a professor and the writer started out with team and full camping outfit to solve the question. Our route after leaving the farming district beyond Coon's Fork lay along the old "tote road" toward Wilson's Camp as far as Horse Creek, eleven miles distant, where we turned down the bank to the left, following the trail a mile until the south branch of the river was reached, which we forded without difficulty. From this point we followed an old winter road, long in disuse, which led in a northeasterly direction to Hamilton's Falls on the North Fork, six miles away. These roads through old pine choppings are hard and smooth in winter when covered by well packed snow, but in summer they are deserted and grown up with brush. The creeks and waterways have their temporary log and brush bridges washed out by the spring freshets, necessitating a sharp plunge of team and wagon down the steep bank on one side and a lift at the wheel on the other. To add to the vexation sundry dead trees are blown across the track, which have to be cut out with axe and moved to one side with heavy levers. In crossing a hardwood ridge we were delayed two hours by a windfall of large hardwood trees which are easily uprooted by the winds as soon as the protecting pine is cut away from about them. This meant two hours of the hardest kind of chopping and lifting, during which the mosquitoes, buffalo and deer flies made life miserable for man and beast. Clearing this obstruction in a heavy shower, we gradually descended toward the North Fork, jumping a log now and then with all hands at the wheels, until we came within hearing of Hamilton's Falls. Within eighty rods of this is Devine's Camp, once one of the best equipped lumber camps on the river, but having served its purpose during the period of denuding the country of its pine forests, now lies deserted, the ground about being covered with implements, water carts, wire from baled hay and huge marrow bones from the numerous beef quarters consumed by the small army of men formerly employed here.

On the way over we had noticed a scattering flight of herons centering still further up the forks, and from the hardwood ridge we could discern now and then a number coming and going from the North Fork and its branches. The two lines apparently met over a half section of tall pine timber about two miles a little to the south of east of our camp, but as it was now dusk and showery we prepared supper and turned in for the night.

Four o'clock next morning found us up, breakfast cooked, and ready for the voyage of discovery, and voyage it proved to be, with mud at times ankle deep, and every leaf supporting great drops of water, drenching us to the skin in a few moments.

Instead of keeping around to the right, where the herons seemed to fly, we made a short cut through the great pines whose tops towered fully a hundred feet above our heads, with but little underbrush beneath. As we rested among these grand columns no wonder we all echoed the Doctor's sentiment when he remarked, "If I were a squirrel this is just the place I would live, and I would like to stay here a month, anyway."

Gradually working our way toward the south edge of the pines, all at once a harsh, grunting, croaking sound greeted our ears and we stopped to listen. Then a louder combination still nearer, another off to the left, then half a dozen, which from a distance seemed not unlike a great many hogs fighting, grunting and squealing, confirmed our surmise that the roost was at hand.

We soon discovered that every pine for a distance of perhaps two acres contained a large stick nest, not flat and spread out like the nests in the cypress trees in Florida, but a huge round affair, large and deep on the outside as a bushel basket, not on the flat surface of spreading branches, but right in the very top where the tree separates into many parts. In one case where a tree formed into two great forks 30ft. from the ground, the top of each contained a nest, while a third nest was placed lower down on a side shoot; this tree, together with one other which spread out into a broad, flat top, were the only ones containing three nests, although quite a number had two. There were usually three young to a nest, and they stood upright on the nest or on branches level with it near by, and upon the arrival of the parent would all scramble into the nest, setting up meanwhile a great squawking, grunting sound, in a volume hardly to be expected from three birds.

The old bird usually alighted on the smaller branches near the nest, proceeding immediately to it, thrusting her bill well into the outstretched throat of the nearest, the heads and necks of both birds weaving back and forth during the process, the other two keeping up an infernal squalling all the while. As soon as the bill was withdrawn another bird was served in the same manner, while the third made a vain effort to get his bill down the throat of the one just fed, which would indicate that such thefts might be successfully made.

The old birds were constantly coming and going and therefore the combinations of noises were almost constant from one part or other of the heronry, the noise coming only from nests where birds were being fed. In the tree with three nests the birds in the nest being fed made the usual outcry but those in the remaining nests, not ten feet away, paid no attention to it.

The young were nearly full fledged and about ready to leave the nests, and when standing upon the branches were hardly distinguishable from the old birds except by close examination of the feathers of the breast which did not have the dashes of as deep black as the old birds.

We attempted to secure a set of young to mount for the local High School Museum, but when shot they invariably fluttered and scrambled about, finally landing on the nest.

From the old birds we selected fourteen of the handsomest, taking only one from a tree, for mounting purposes. These with our guns proved a tremendous load on the two miles through the brush, swamp and over logs to camp.

Rolling each bird in squares of cheese cloth and the whole in blankets we made ready for the return trip.

The trip out was an easy one compared to our ride in, and only one incident is worthy of record. When half way out we heard a hearty "Hello, boys, what d'ye get?" "Only a few of those bald eagles you were telling about." "Let's see 'em." He approached, and lifting a flap of the blanket exposing a bunch of long, slender toes. Lifting a little higher, his eye followed up a long vista of legs. "Let's see the other end." Peering in there a mass of long yellow bills met his gaze. Lifting a little higher, his eye followed up a long vista of necks. "Say, boys" (changing the subject), "did you get any deer?" "Didn't see a deer." "Well, if you went to Devine's Camp you passed within ten rods of my best salt lick." FRANK S. DAGGETT.

### Habits of the Rail.

SWEET SPRINGS, W. Va., Aug. 27.—I have many times seen and heard it stated that sora leave a region immediately upon the advent of the first frost. I have recently been told by two separate parties, voluntarily, that they killed sora here last fall after heavy frosts. One said he caught two in a trap set for mink and muskrat, and I killed them last fall after the early frosts. Can you offer any explanation of this circumstance? C. R. C.

[The popular notion about the disappearance of the rail with the first frosts is erroneous. Probably the greater part of the sora do go about the time of the first frosts, but we have seen them in Connecticut in November, after real hard frosts, and the few birds then killed are large and fat.]

### Turkey Buzzards in New York.

NEW YORK, Sept. 1.—While swimming in the Hudson River last Saturday at the foot of the Palisades opposite Croton Point, a solitary turkey buzzard came circling down the wooded shore, and seeing me, sailed out to investigate. I turned on my back and watched him as he came within about 40yds. and made a turn directly overhead. Satisfied that I was not to furnish him a meal he glided in shore again and continued his course down the the river, following high water mark and scanning the drift with his keen eyes for whatever dainties might escape his equally keen nose. He had lost feathers out of both wings, and looked the outcast and wanderer that he was. J. B. B.

[Commenting on our note in last issue, the *Evening Post* says that turkey buzzards are annual visitors at Unionville, Orange county, N. Y.]

### St. Augustine Song Birds.

ST. AUGUSTINE, Aug. 27.—Our Common Council passed a local bill for the protection of song birds, but of course it is useless. We've had one for years. Such laws "don't go" here. DIDYMUS.

# Game Bag and Gun.

## BEAVER TRAPPING WITH PENOBSCOT JOHN.*

BY THOMAS CHESTER.

WHEN a young man about twenty years of age I trapped one fall at Twin Ponds, on a branch of the Penobscot River, with an old Indian of the Penobscot tribe named John. He was nearly full-blooded and about 65 years old, of medium height, spare build and very straight. He was strong and rugged for his age, his limbs were supple, and he retained that light, cat-like tread peculiar to the race and which so few white men acquire. His habits were good. He was temperate in all ways save smoking and eating, kind and considerate; so a very good Indian, as most of them are when left as nature reared them, unaffected by the evils which follow in the wake of civilization, which are nearly all that reach him in his contact with the whites. John said to me: "What you think, s'posin' you me go up Two (Twin) Ponds by by and trappin' some? S'posin' we catchem some beaver, some otter, some musquash, maybe somethin' else? Maybe we do purty well, don't know, maybe so."

I told him I did not care, guessed we would, and asked him how we would trap together—how divide up the fur. He thought a moment, and then said: "Um, got no money, s'pose you got some?"

"Yes, a little."

"Well, s'pose you get something to eat for two, you and me; then you taken my canoe up and traps, maybe twenty-five, s'posin' you taken up twenty-five the same. Then we divide fur two parts, and maybe me show you how to catch ole cunning beaver. S'pose you catch some, maybe not ole, cunning fellow. Sartin he cunning ole rascal, me know him purty well."

This seemed to me to be a very good offer. I knew old John to be an excellent trapper, having followed the occupation all his life, and thought his experience and instructions would be a benefit to me, for I was then a very indifferent trapper, especially of beaver. So I told him "all right, I would go," and asked him when he would start. He said: "Purty soon, maybe three or four days; no catchem much here."

Twin ponds were part of the headwaters of a large stream which emptied into the main river from the west, about three miles below my camp. From the mouth of the stream up to the ponds was about four miles. An old tote road, which was formerly made and used by lumbermen in getting out pine timber, followed up the stream to the headwaters. The ponds themselves were each about a mile long and half a mile wide. A thoroughfare or dead wat r reach of about half a mile long connected them, and the main inlet, which empties into the upper one, is slack water, up, for a mile, and bordered on each side by low, marshy lands, conditions favorable for trapping all water game. Within a radius of three or four miles from these waters are several other small ponds, and the whole surrounding region is wild and well wooded. This section of country was well known to us both, though neither of us had been there for about two years.

Following the thoroughfare between the two ponds we came to a small rise of land. Here a good camp site was found, about eight or ten rods from the shore. The land was high enough, and dry, with plenty of spruce and fir for building purposes, and enough hard wood for fire. A small spring of cold, clear water trickled down from the side of the little hill, and was well shaded on all sides by the coniferous trees.

We chopped down trees eight or ten inches in diameter and cut them up into sections for the walls of the camp. We needed a room about twelve feet square, so cut the logs fourteen feet long; this would give length sufficient to interlock them over and under each other, at the corners, making the walls firmer and stronger. We logged the sides up about six feet, then we put on four pairs of rafters. Across these, on the outer side, we placed ribs a foot a part, then for covering over all we thatched sheets of white birch bark, making a roof proof against rain and snow, and fair to look upon. The gable ends we sealed up with long shingles or "splits," worked out of straight-grained cedar found back in a swamp. For a floor we cut down fir trees and hewed them down to plank three inches thick, smoothed and matched their edges as well as we could. Then placed some sleepers on the ground within the camp and placed the plank on them, making a very fair floor. Next we made two narrow bunks in the rear end of the camp, one for old John and one for myself. Then we built a stone fire-place and chimney up against the interior of the front wall. For plaster we used blue clay and sand, thoroughly mixed and thinned down with water. This makes a much harder and more durable cement than can be made with lime. We chinked with moss the crevices between the logs, and fitted in an old window sash with six lights of 7×9 glass, which I had taken from my camp on the river. Then we fitted in a small door in the west wall, picked fir boughs and placed them in the bunks about a foot deep, making a soft and delightfully aromatic bed

And so, after about a week of hard work, we got our camp done and everything moved into it; and congratulated ourselves much on having such good quarters. Old John standing in the room and looking it over, with a satisfied look on his face, said, "me like 'em very well; me sleepim much here." But as I shall show further on, his last expression was for a time not to be fulfilled.

The next day after we got all fixed up at camp, old John proposed that we should go up to the second pond and look for some beaver; it was rather early in the season to trap them, but we wanted one to eat. So we paddled up through the thoroughfare to the foot of the the pond and skirted its north shore up, about a quarter of a mile; here we came to an old beaver house newly repaired, and evidently occupied. Here old John began a close scrutiny of the signs—peeled sticks lying along the shore, teeth marks in the wood, clippings of the twigs along the margin of the water, and tracks made in the mud. From these observations he concluded that the house was tenanted, by only one beaver, and that one very large and very old; and by further inspection of the tracks, that it had lost one forward foot.

After these discoveries, old John looked somewhat troubled, and spoke, partly to himself, in a sort of undertone, "Sartin', he very big, cunning ole beaver. Losem one foot in trap some time. That makem scare much. Me try catchem purty hard. Maybe cheatem by and by." It was evident from the tenor of this monologue that he felt that he had found his match, or something very near it, and would have to put forth his best efforts to achieve success. Here were the representatives of two long lines of ancestors pitted against each other. The Indian anxious to catch the beaver. The beaver wary, alert and watchful to avoid and to detect all danger; both well fitted by nature to prolong existence, both having their faculties sharpened and quickened by necessities by a long life and experience. But the Indian stoically accepted the situation. And so did the beaver.

After reconnoitering to our satisfaction, we went back to camp, cut some firewood, caught some good sized trout in the thoroughfare a little below the landing, cooked and ate dinner, and talked over plans. It was about the first of October, rather too early to catch anything but muskrat; so we agreed that for two weeks or so John should work on the beaver and catch what musquosh he could; and I should cruise over the country, look up all the ponds, blaze all necessary lines and make some estimate of the quantity and kinds of game in the region.

Along about the middle of the afternoon we put some traps in the canoe and went up to the beaver works to look up a chance to set them. We found two paths, or trails, leading from the water up, back a few rods, on to the land, where the old beaver had recently been working. On one of them it had cut some poplars only the night before. Here, at the mouths of these trails, in the water, old John set the traps, while I managed the canoe. We did not go ashore as we had all necessary things aboard with us for fixing the traps. The conditions seemed very favorable; the water was the right depth; the bottom was soft, making it easy to cover the traps; old John worked with care and circumspection, and I confess that I considered the chances of getting the beaver that night very favorable. John did not appear to feel so hopeful.

After fixing the traps as well as we could we went back to camp, took about twenty more traps and set them about the shores of the lower pond for muskrats. Early the next morning we started out on our respective labors, John tending the beaver and mukrat traps and I going out to a pond about two and a half miles away and flaying a line over the route. I spent the day cruising about and exploring around the pond till the lengthening shadows of the trees on its banks warned me that it was time

*See paper by same writer on beaver habits in last issue.

to start for home. When I arrived at camp the sun had gone down, the shades of night were gathering over all around, and in the uncertain light I saw John sitting on a log in the dooryard with a dozen muskrats lying in a pile near. He seemed to feel somewhat disappointed and dejected. I greeted him, "John, you did pretty well on muskrats." "Yes, me catchem some musquash, but no getem ole beaver. He no come near 't all las' night, spose he scar'em some; he go way some other place."

It was evident that the beaver had taken the alarm, probably had sniffed in the air some taint or scent from our persons. As is generally known, the scent from the Indian's person is much stronger than is that from the white man's. Here it is that even with all his skill he labors under a disadvantage in trapping the quick-scented animals. True, he succeeds, usually, in doing away with this scent on the sticks, bushes and other objects which he may have touched in setting his traps; still, it mixes with the air and is wafted about, beyond his control, except in so far as he can neutralize it, by impregnating the air with some stronger scent, and one which may be grateful to the beaver's nose. Usually trappers carry something of this kind with them, but on this occasion we had no beaver medicine with us.

After this trial of skill in thrust and parry between old John and the beaver had been going on for a week, the Indian seemed to be losing confidence in himself. He became restless, uneasy, gloomy, and unusually taciturn. The shadows of disappointment and of hopes departing were gathering on his brow. The lines on his face were growing longer and sinking deeper. He was becoming weak and emaciated, though his appetite remained good. He would mutter in his restless, uneasy sleep, and getting up many times in the night, he would sit over the smouldering fire, brooding over his waning prospects.

In my week's cruisings I had found two families of beavers, but did not speak of them to old John, for it was rather too early in the season to catch them. But as the days passed by I became somewhat uneasy as to his condition, not knowing but that he might worry himself into a turn of sickness. So, during the night, after the seventh day of his trials, I thought the matter over and concluded to tell him next morning and ask him to go up with me and catch one or two of them, and so wean his mind away for a time from the old big one.

Early the next morning I went out to scan the weather. The signs looked bad; dark scuds of clouds were racing up from the south, following each other in quick succession, indicating a wet day. So I concluded not to go off in the woods till the storm was over. When I went back into camp old John was up and had started a fire. I told him that it looked like rain, and I guessed I wouldn't go out for that day. "Better not," said he, "much bushes; maybe getem much wet," and seemed to be glad I was going to stay with him. We had a good breakfast, then talked a while. He was slow in brightning up, but did so to some extent after a while, and proposed that I should go with him and look over the musquash traps. So we went down, got five musquas, and reset the traps; came back to camp, skinned the rats and stretched the pelts. This was a small catch, for old John had them pretty well thinned out in this lower water. They were quite plenty in the upper pond and its main inlet, but we did not wish to trap them there till we should have done with the old beaver.

After dinner we thought we would go up to the beaver traps and look for fresh signs. We found them set all right; nothing had been disturbed. We pushed further along, closely scanning the shores, till we came to the mouth of a little brook or run, which emptied into the pond. It was very small and shoal, and as we moved by I happened to look up into it and saw two or three places where the surface muck had been scraped off, showing the underlying blue clay; I thought that perhaps this might have been done by the old beaver in traveling up and down the brook, and so I called my companion's attention to it, and told him that we would back down a few rods and I would go ashore, walk up to the head of the run and look about a little, while he could go up with the canoe to the main inlet and prospect. I came to the little brook, near its source, where the water trickled out of the ground about fifty rods above the pond. I found no signs there, so followed down about twenty-five rods, and found some new works—a few alders cut down and partially peeled, a white birch cut all around, and in toward the center of the tree some 3in., and the bark eaten off in places, directly above and below the scarf. Some of this work seemed to have been done recently—the night before, I thought. All this looked quite encouraging, but the problem was to catch the old rascal. There was only about 5in. of mud and water in the brook, and under this was blue clay, compact and firm. It would be of little use to set steel traps in such a place as this; the beaver would be very likely to tear itself away; and the only other plan that promised any success was the building of an Indian killeag in the bed of the brook.

After looking the conditions all over I went down to the pond to see old John, bring him up and get his judgment in the case. He was waiting when I reached the pond, and I asked him if he had found new signs. "No, me no see 'em any good sign; two, t'ree days made; s'pose he gone away some place." I told him I thought the beaver was working upon the little brook.

When we got there he looked at the cuttings and thought them very fresh. "Sartin he come last night; maybe three, four nights; cuttem down that tree soon; gettem more bark, maybe he come to-night." Then he looked at the brook and said, "Very bad chance settem traps; not much water; beaver fight much; maybe get away." Then I said, "Suppose we make a killeag in the brook, maybe we will catch him that way. What do you think?"

"That very good way. Sartin we make killeag. We makem now, to-day."

"Well John," said I, "you'd better go down into the brook and fix it, and I will cut sticks and brush and hand to you. You can make it better than I can."

He looked at the water, then down at his low, thin moccasins and said with a gruesome twist of countenance, "much cold in there."

I told him never mind, he might put on my rubber boots and I'd take his moccasins. Then we went at it, he making the trap and I cutting and handing him the material. Soon it began to rain, and rained quite heavily all the afternoon. We were very glad to have the rain; it added much to the success of our enterprise, as it washed away all taint or scent which we might have left about the trap or in its vicinity. Old John worked carefully and skillfully and did, as it seemed to me, all that any trapper could do. It took us about two hours to make the trap; and when we got back to camp it was nearly night, and we were wet and hungry; but we didn't mind; the rain was working for us. We soon got on dry clothes, built a good fire, cooked and ate our supper; then we felt pretty well. Old John's spirits took a rise of about 20 degrees; but he had to rise about 80 more to bring him up to a normal condition. We talked a while of the probabilities of our success with the old beaver, and both of us were somewhat hopeful.

We arose quite early the next morning, especially old John, who awoke me by the crackling of the brisk fire he had burning, and speaking to me in a half jocular manner, said, "Sposem me go up, bringem down ole beaver; getem breakfas', me come back; how you likem that?"

"Like it well, John. Hope you will get it. Go ahead; I will have breakfast ready when you come back."

So he started off in the canoe. In about an hour and a quarter he hove in sight on his way back. The boat was going through the water at a rapid rate; the Indian was plying the paddle with his utmost energy. I stood on the shore at the landing watching him as he came down and felt hopeful of his success. As the canoe neared the shore with a sweep of the paddle he beached it broadside to. There in the bottom of the craft lay the beaver, and a very large one it was. As surmised, it had lost one foot, the left one forward, taken off some two years before, as the fracture was healed up and skinned over. Old John, with a radiance of satisfaction illuminating his face, asked me, "What you thinks. How you likem?"

"Oh, great luck, John; fine, large fellow; glad you got it."

"Sartin; me glad, too; big ole fellow; weigh sixty pound. He cunning ole rascal. Sometime me think me no gitem, but me keep tryem all time, by and by maybe me catchem. Sartin he here now in canoe.

I asked him if the beaver was dead when he found it. "Sartin he dead; not live long in killeag; putem my hand on him, he feelem coled; then me know he dead; no getem 'way. Then me take 'em out trap, carryem down to canoe."

The beaver was carried up to camp and laid on some splits. Then we went in to breakfast. It was a very enjoyable meal for both of us. While at table we reviewed old John's campaign against the beaver in all its strong and weak points, and the beaver's marvelous intuitions in guarding against surprise. The Indian's spirits were rapidly rising to a normal condition. The expression of his features was undergoing a rapid transformation. The shadows of gloom and disappointment were fleeing from his brow, leaving it clear and open and man-like, as nature moulded it. The kindly, considerate qualities of the man were asserting themselves. All this I noted with pleasure and satisfaction, for it betokened the success of our fall hunt. After breakfast we sharpened our knives and skinned the beaver. It was very fat and the meat looked good, and was good, as it proved when we came to eat it.

We cut off the tail and dressed the carcass; then old John said, "S'pose you putem some in pot an' boil 'em, an' me makem hoop out little ash tree an' stretchem skin." So I cut up some of the hindquarters and filled two good-sized kettles with it and hung them over the fire to boil. The liver, which is large, I washed and sliced up, ready to be fried for dinner. The rest of the meat was hung up in the shade of the trees, a little back from the camp; the weather being cool, it kept until we had eaten it all up, which did not take long.

After a while old John got the skin stretched, cleaned off and hung up in the shade to dry. It was a very large one, and the fur fine and silky, and the color very dark, shading down on the back to almost a black.

After dinner, leaving the kettle of meat simmering over a slow fire, we put some traps into the canoe, paddled to the upper pond and set them for muskrat. Then we went up the main inlet, looked about and found a new beaver house near the head of the dead water. The house was large and was occupied, apparently, by a large family of beaver. This was promising and made us feel quite elated. On the way back we went up to where we had caught the old beaver, changed the killeag, or trap, making it suitable for catching otter, which frequently go up and down these little brooks.

The Indian is always hungry. The desire, the craving for food is always present, even when so full he can hold no more. While the beaver lasted old John used to get up two or three times every night, light up the fire a little, sit down and eat of the boiled meat. I was amused, when lying awake in the bunk, to see with what relish he would eat away on the beaver's hindleg. It was fat, and the fire light flickering and playing hide-and-go-seek over his greasy face made it shine like a piece of burnished mahogany.

After trapping about two months, we thought it nearly time to be moving out. We felt sorry when we thought of leaving the place, for here we had passed many peaceful and happy days. After the siege with the old beaver, nothing occurred to mar the pleasure of our enterprise. Old John and myself worked in perfect unison. We had a good dry camp to live in; we had good health and spirits; plenty of exercise and enough to eat; and furs were sufficiently numerous to satisfy our expectations, to give zest to the business, and to pay well for our labors.

But it was now late in the fall; the weather was getting bad; the ponds and streams were frozen over, and game was not sunning much. Besides, old John was hardly able to endure a winter campaign; age was telling against him. So we concluded to gather up our traps and bring them to camp. This meant two days of hard work. Then we shod the canoe; that is, fixed long cedar "splits" over it outside to protect the bark from the roughness of the road. When this was done we fastened one end of the boat on a hand sled—we had made two while at camp—put the traps and some other things into it, and dragged them down to the mouth of the road at the main river. The river was frozen over, and trying the ice, we found that it would bear us while we drew the loads over it.

As this was to be the last night in camp, we concluded to have an extra good supper. So we baked some biscuits, fried an extra big plate of fat, tender, juicy, caribou steak, cut from a ham of one we had shot, on a back pond, about a week before, and made a dish of good tea. After supper I asked old John, whether we had better divide the fur, and how we would do it. "Sartin" he replied, "last night here; better dividem; spose me makem two piles, you takem one pile, which you like, then me takem other one." To this I assented. When he had divided up the pelts into two lots, I took the one which had in it the old big beaver skin. Then I drew it out from the pile, and handing it to old John, told him I would make him a present of it. He hesitated about taking it, but I told him I wished him to have it, for he had worked hard to get it. Finally he took it, and laying it by, said, "me like havem old beaver very much, but me no like takem from yon."

I knew that he longed to possess the skin, but his sense of fair dealing prevented him from saying anything about it. Early the next morning we loaded everything on the sleds, covered over the top of the chimney, to keep out the snow and rain, closed up the camp, and giving it a lingering, regretful look, started on down, with our loads. Our fall trapping was ended.

## THE PROBLEM OF THE WEST.

WORTHINGTON, Minn., Aug. 28.—*Editor Forest and Stream*: Your editorial in the Aug. 25 issue on "Shotgun and Citizenship" was read by me with much interest, and I hope it is only one of many that you will write on the same subject.

The idea of remedying the evil by education is an admirable one, but unfortunately it must necessarily be too slow in its effect to be of much benefit in the Northwest. These States, and particularly the Dakotas and Minnesota are peopled to a very large extent with Russians and Norwegians, the former especially being very clannish in their dispositions. They came to this country in large parties—all from one locality in their old homes and settle together and usually in a section that already contains a number of their friends. The result is that whole counties are populated by one nationality, not only the farms, but the towns as well, and it is a common thing to find every merchant in a town of the same nationality as the surrounding farmers.

They come to this country with the preconceived notions you describe, and living as they do, frequently for years without being able to speak or understand our language, are to all intents and purposes as ignorant of our laws and institutions as when they first landed at Castle Garden, their one idea seems to be that this free country means license to do as they please, regardless of the rights of others. The few people of American birth living among them, unless of the same origin as themselves, are looked upon with suspicion and have no influence with them, and any attempt to argue or reason with them is simply wasted time. Progressive ideas have little or no chance to take root. The younger generations born in this country may in time be brought to a realizing sense of what they owe to others, but the growth must of necessity be slow, they live surrounded by the influences and ideas of the older generations, and do as their fathers did before them, slow to take advantage of new ideas and having little inclination or opportunity to do so.

In their old homes they were used to being kicked and cuffed about and trampled on by those in authority, and the only law that they understand or respect is one of force. Let them once see through the medium of convictions with accompanying fines and imprisonments that our game laws are not on the statute books solely as an ornament, and they will respect them, but until this is done they will be looked on only with contempt, and not only by this class but the lawless element of Anglo-Saxon origin as well. What we need are game wardens as energetic as Warden Blow, and lots of them

That in some sections the ruinous practice of the trapper has completed his deadly work, I had ample evidence this week in the receipt of a magnificent pointer from a friend at Ouawa, Ia., an ideal chicken country. My friend is an ardent sportsman, one who would rather hunt than eat, yet right on the eve of the open season he ships his favorite dog to me for my use during the entire season, and informs me that much as he would like to use her, he cannot, as the chickens have been trapped until scarely one is left in the country.

"Stop the sale of game" is a plank on which all sportsmen should stand as a matter of self-protection, if for no other reason, for in that plank and its general enactment is the only salvation of our game. So long as a market is open in which game can be disposed of, just so long will men exist to kill and ship, and express companies be found to receive and carry it.

To the sportsmen of Illinois and New York we must first look for aid; close the large markets of Chicago, New York, etc., and the multitude of smaller ones will cease to be profitable even before we can close them up. It is the large markets that make the work of the market-hunter profitable; without them the little ones would be so overstocked that the game would not bring the cost of carriage and ammunition. W. R. H.

### A Squirrel's Immunity.

DAVENPORT CENTRE, N. Y., Aug. 29.—An unusual circumstance coming under my notice in regard to living up to the game law, I will submit it to the readers of your most enjoyable paper.

A fine specimen of the migratory or gray squirrel came into town this afternoon, and after canvasing the village quite thoroughly, at last took up his position on a fir tree directly across the street from the post-office; and although quite a crowd of people were watching his movements, he barked away complacently, and, would you believe it, no one rushed home after the proverbial "best shutin' gun in the country," nor even a boy threw a stone at this squirrel. Some one said, "That fellow seems to know that the law is not quite off on squirrels yet." "Yes," said I, "and it seems little short of a miracle that he has spent most of the afternoon in town, and still has his skin on yet." "Oh," was the rejoinder, "we don't kill squirrels nor birds out of season, nor do we dynamite trout streams either." I pity the squirrels and birds in most other towns. Ruffed grouse and "the grays" are plentiful here this season, but owing to the dry weather the "bog sucker" is not with us yet. C. F. L.

### A Gray Squirrel County.

SPRINGFIELD, Vt., Aug. 25.—The gray squirrels and ruffed grouse are very plenty around here, and the hunting this fall promises to be better than ever before. I am going to write you further about the attractions which we offer to the sportsman in the near future.

W. W. B.

## THE MOOSE CALL.

DURING these sultry dog days, while sweltering in the heat of the city, deprived of our usual outing by the stringency of the money market as applied to our own individual business, how many times does the mind revert to scenes of past pleasures—to cool, shady dells, grand, somber forests, roaring cascades where the royal salmon makes his splendid leap, and calm lakes surrounded by the everlasting hills, upon whose pellucid waters our artificial flies have trailed and fluttered many a time in the pursuit of the gamy black bass.

Above all, how pleasant it is to remember the great Canadian forests in early fall and winter, with their bracing atmosphere laden with the resinous odors of spruce, pine and hemlock. One can almost hear the crackle of the glowing camp-fire and the many voices of companions who made the days pass pleasantly as they spun yarns of field and flood, or sung the songs so dear to the heart of the sportsman.

Such an experience can never die while life remains to the enthusiastic participant. His face lights up as he speaks of the camp and its many associations, some humorous, others of an adventurous nature and all breathing the true spirit of vigorous, healthy woods life, pass in review before him as though it were but yesterday they occurred.

Can it be possible that so many years have elapsed since we captured that grand-daddy trout in the deep hole just where the cold waters of the brook merged with the river? Why, the electric thrill seems to chase up and down our good right arm to this day as we see the wonderful leaps he made, with the golden sunlight flashing from his spotted sides, and only yielding himself a captive, ransom or no ransom, when incapable of another tug. How tenderly we handle the wreck of a scarlet-ibis fly which has been laid away, honorably discharged, after bringing to net a small-mouth black bass of 6½lbs.

Again we chuckle with humor at the recollection of our Commodore hanging tooth and nail to the rustic bridge with 10ft. of water below, the wind having carried his light boat from under him. It was nip and tuck for two minutes whether he could drag the canoe back by means of the desperate hold he had secured by means of the toe of his boot, and the balance of the camp lined the shore cheering alternately man and boat, casting wagers as to the chances of a cold bath, and making the woods echo with their applause when Cincinnati brawn finally conquered the obstinacy of a Canuck birchbark, wind-driven canoe, allowing the exhausted fisherman to drop into its embrace. Those were royal days when we were sporting for sport. Game was fairly plenty, and none of us were butchers. We always had enough and to spare for the camp, and at one time after the season for venison opened, there hung outside of our shanty, deer, grouse, squirrels, the head of a moose our collector had preserved, besides several splendid strings of fish, including speckled trout, black bass and an enormous maskinonge, known as the tiger of northern waters on account of his piratical build and the rapacity of his assault. There were six of us in the party, three of whom were guides. Of the sportsmen, our able Commodore led by long odds, his service in the field having been worldwide; for, being a man of extensive means, and with a desire to see the sports of the world, he had indulged his pet hobby and ridden it to the full. Besides, there was the Doctor, who was known as an authority on many matters concerning life in the woods, and whose genial nature made his companionship invaluable. As for myself, I had been through a little service in various lines, having whipped many streams from Muskoka's lakes to Okeechobee in fair Florida, besides seeing considerable of the coast ducking grounds.

The story of such a camp in the wilderness is always interesting to the sporting public. Cincinnati has probably more lovers of fishing and gunning in proportion to her population than any city in the world, which is all the more singular because she is so unfortunately situated that to obtain any genuine satisfactory results disciples of the rod or gun are compelled to make long pilgrimages to foreign fields in Indiana, Kentucky, Illinois, Michigan and even Canada woods.

The only satisfaction we derive from such a status lies in the reflection that a victory is better appreciated after it has been cleverly won. If we could take a five-pound bass with every cast, the sport would lose its edge and finally grow monotonous.

Although I had fished in Canada waters on more than one previous occasion, this was my first genuine outing among the grand trees that go to make up what in Canadian parlance is known as the "bush." They seldom speak of woods or forest or timber over the line—the word "bush" covers everything. Under these circumstances I expected to learn many new wrinkles pertaining to the craft, nor was I disappointed in this respect. Our guides were faithful fellows, two of them French-Canadians and unique characters, the third a full-blooded Indian, whom constant association with the whites had thoroughly civilized, though Sabattis still clung to many of the idioms of his ancestors.

I was thrown much in his company, Antoine and Pierre falling to my companions. To this fact more than any extraordinary skill on my part, I am ready to ascribe much of the good fortune that attended my foraging for game, so that even the doughty Commodore laughingly yielded me the palm as the high joint of the camp.

Sabattis was as full of enthusiasm over the sport as though it were a novelty for him, and I could readily understand how my instinctive love for nature and the woods and streams must have been handed down to me generation after generation, from some such remote ancestors, who, living in this primitive state of our aborigines when Columbus found the new world, had to depend on their skill in mastering the game of the forest in order to live.

During the hours I spent with my Indian guide he initiated me into many of the secrets of woodcraft which I have never forgotten. I learned to love the forest more than ever, the deeper I dipped into her mysteries and learned her various moods.

Crouching at his side, I have seen him call in mallards and canvasbacks with only a lone home-made decoy floating on the water—while his wonderful mimicry galled the aggressive partridge cock who drummed and strutted upon a neighboring log, until I burst into a laugh at his positive frenzy, finally dropping the deluded bird as he sped away with cannon ball velocity.

He showed me the spring hole where the big trout still hovered, though the heat of summer had gone—led me to the runway along which he was sure a deer would pass when startled from its lair beyond, and so positive was his reckoning that I brought down the first buck of the open season—he took me many miles up a stream to where a colony of beaver had built a dam and constructed their settlement, where I learned all there was to know about the sagacity of this timid creature, and the methods employed by Indian hunters to capture him.

There came a time at length when all other events were eclipsed in my mind—when the climax of my outing was reached. Sabattis had discovered the tracks of a giant moose in the woods, and even the usually taciturn and cool Indian showed signs of excitement when commenting on the great size of the animal responsible for those imprints. So it was at once settled that we were at least to make an attempt to get the king of the Canadian forest, whose great horns would make a noble appearance in any dining-room, and form the subject of many a story after the table was cleared.

The moose was in the neighborhood. During one night the guide awoke me from a sound sleep and bade me listen to a faraway sound stealing across the lovely lake on whose border our camp was situated. Ordinarily I might not have noticed the faint sound, or if so have taken it for the call of some species of owl or some one chopping wood, but when Sabattis solemnly assured me it proceeded from a bull moose, every nerve in my body tingled with anticipation.

We awaited favorable conditions, for everything depended upon that. All were interested in the venture, and the Commodore, who had shot his moose some years before, gave me more solemn instructions than I could remember in a month.

At last, while seated by the fire one cool night, enjoying its cheery blaze, Sabattis touched my arm, and beckoning, said, "Come."

I knew what that meant—the conditions of breeze and moon were alike favorable. Our hour had arrived. In three minutes I had put on an extra coat—for it would be cold work out for hours on that broad sheet of water—picked up my Winchester, and stepped over to the birch bark canoe in the bow of which I was to make myself as comfortable as the circumstances would allow.

The boys all wished us luck and saw us off. Sabattis, master of the paddle, dipped his spruce blade deep into the water, and we glided out upon the moonlit lake without a sound save the faint gurgle of water at the bow.

I had seen Sabattis fashion his moose horn out of birch bark, rolled very much after the style of a cornucopia, but never for a moment imagined what a distracting, awe-inspiring sound could emanate from that ridiculous instrument of ear torture, until the time came for him to breathe into it.

We were out near the middle of the lake. The fair moon looked down on the water, over which came a faint zephyr from the western shore, stirring up the smallest of miniature waves. Sabattis declared the conditions could not be improved, and yet, with the wariness of a veteran who knows success depends on other things than an ideal conditions of the weather, bade me not be too sanguine.

Then he raised the birch bark horn to his lips, and over the lake pealed the weirdest, most awe-inspiring sound I had ever heard. The mountains, with their forest-clad sides, threw the echo back, and it seemed to rebound from side to side for quite a space of time. Words of pen could never describe it other than to say it was a conglomeration of grunts and bellows of a peculiarly distracting nature.

Luckily I had been forewarned, and hence was not driven to distraction by the uncanny call. I remember thinking of the old fable concerning the lion and the donkey hunting together, the latter being sent into the cave to scare out the goats by his braying, while his companion slew them as they emerged. When all had been killed the proud donkey asked the lion's opinion of his share in the work, to which the other replied, with a vein of irony, that he would have been as badly frightened as the goats had he not known it was only the braying of an ass.

When the echoes of Sabattis's call had died away, we sat there and listened eagerly. No reply coming, we moved further up the lake, and again the weird sound was sent rolling up against the wooded heights.

Thus an hour passed by with no result. I was ready to despair, but not so the guide, whose life had been spent in subduing such feelings as anxiety and impatience, learning such lessons from the pertinacity of the gray wolf that pursues its quarry hour by hour with a grim determination that baffles defeat.

It was just an hour after midnight, when far away we heard the answering call of a bull. At that minute I had been shuddering with the cold, but as the sound reached my ears my whole body seemed suffused with summer heat, my head came erect, and I held my very breath while Sabattis paddled toward the shore.

Presently he gave another call, and almost immediately an answer came. It was much nearer than before. Joy! the moose bull seeking a mate, was making his way toward the shore of the lake. The guide knew well how to tone his call so as to lure him on. He was an adept, a master hand at the business.

We glided on with hardly a ripple, now within easy range of the moonlit shore. We could hear the bull crushing through the brush. Gently Sabattis toned his magic call—never have I known his equal in the line of imitation. The moose was just beyond the fringe of bushes.

"Steady," whispered Sabattis.

The canoe had advanced under his noiseless maneuvering until we were within pistol shot of the shore. I watched the fringe of bushes. Bursting out from among the trees came the big moose. Into the water to his knees among the lily-pads he advanced. There he stood looking at the strange object on the lake, fearful, yet courageous. In ten seconds he would have taken the alarm and fled, but I did not mean to give him half of that time.

I confess there was something in his grand appearance that awed me, and deep down in my heart I hated to fire; but the sportsman blood was too strong, and as my cheek rested against the stock of my Winchester I took a quick but accurate aim and pulled the trigger. Immediately there was a great splashing. "He is down!" shouted Sabattis, sending the canoe shoreward with lightning speed, while I threw another cartridge into the chamber, ready to complete my work if necessary.

It was not needed—the game was mine, and on the following day the head of the giant bull decorated our camp. That was my first and last moose. Though years have passed, I never find myself upon a moonlit sheet of water without having vivid and pleasurable recollections of Sabattis, his canoe and the weird cry that emanated from his birch bark moose call.

ST. GEORGE RATHBORNE.

CINCINNATI, O.

## IN COLORADO HILLS.

DENVER, Colo.—*Editor Forest and Stream*: Our party was composed of four middle-aged men of some little experience in the hills. The object—hunting and prospecting. The outfit consisted of two horses, heavy spring wagon, tent, shovel, pick, cooking utensils, bedding and clothing, two rifles, one shotgun, and other duffle too numerous to mention, the whole making our load too heavy for either horses or wagon.

We started west from Denver over the prairie, twelve miles into the foot hills, which rise so abruptly that one wonders how he will be able to surmount them and reach the snow-clad peaks beyond.

By noon we had reached the mouth of a small cañon running west into the hills. Here is a dwelling and store combined. The proprietor said he had kept a post-office there for many years for nothing, but had quit it; but he expatiated on the beauty of the scenery and healthfulness of the place and in proof of this said he had raised a family of seventeen children without having had a doctor in his house. We deemed the proof conclusive and lapsed into meditation as to the luxuriance of everything that is indigenous to Colorado. The product was certainly better than the coyotes it displaced. He is a hale and hearty, grizzled and gray yeoman of the Rockies.

Through most of the afternoon we climbed up the cañon, camping at night near a small ledge of rose quartz. The next morning we descended Floyd's Hill to Clear Creek, a few miles below Idaho Springs. We assisted the horses and wagon brake, in holding the wagon, by tying our one-hundred foot rope to the rear axle and three of us holding back with might and main. The effect on our limbs was such that we could scarcely walk for a day or two. After passing the springs a little way we found the road obliterated by the debris of a cloud burst. Twenty men were repairing the road or relocating it. We were the first to pass. The next morning we found the first results of over-loading, in loose boxes in the wagon hubs. We wrapped canvas around them, and drove them in again as tightly as an axe could do it. The road is very rough and steep for a wagon. In an hour we had broken the tongue brace. Bailing wire and patience repaired the break. We then commenced climbing Berthound Pass. Such grand and beautiful scenery. My impotent pen would make its attempted description sacrilege. With three walking, one driving, we toiled up that seemingly interminable hill, until at last the top is reached, where the ruins of an old hostlery and stage station speak of former rest and conviviality; for, judging from the number of beer and other bottles, Bacchus must have "roosted" on this part of the backbone of the continent. In going down the northern side we had to reinforce the brake with the rope as before, but as we could scarcely walk down hill on account of our former experience, we cut some pine boughs, made a brush heap of them, tied the rope to them, I jumped astride, and away we went. Directly the lightning flashed, thunder pealed, and the rain came down in torrents, but we could not stop. What a glorious coast I was having with the horses on a trot—when a stump—the front end of the brush pile struck it, the rear went wildly in the air, and your now humbled servant, after making a jumping-jack of himself in the air, went rolling over the bank. Two men caught the rope, the wagon was cramped to the upper side of the road and stopped, when with tearful eyes solicitous inquiries were made as to my fallen condition. (The tears were caused by excessive laughter.) I was not hurt, but was willing to share my coasting with the boys.

The rain had an end, the hill a bottom and night a beginning, a wet camping ground, plenty of wood, roaring camp-fire, good supper, sweet sleep, hearty breakfast, an early start, an hour's drive and we entered Middle Park.

We had been in South Park, which is an immense hay field, and expected to find Middle Park similar, but instead the surface is covered with sage brush and short grass. The soil is good, and with irrigation, for which there is plenty of water, it too would make a great hay country. The altitude is not so great as that of South Park.

We laid our course to Grand Lake, at the head of Grand River, and extreme upper end of the Park. Grand Lake is the most beautiful and picturesque body of water it has ever been my fortune to see. We are told it is two and one-half miles long by one and one-half miles wide, and has been measured to 700ft. and no bottom found. The mountains tower above it on three sides, and on the south, from the top of the mountain to the bottom of the lake, is no break in its steep side. We rowed across, and found that while the waters were as clear as crystal near the shore, the depth made it appear inky black at its center. Trout reported to weigh 7lbs. sport in Grand Lake. We did no fishing, having caught all we needed in the river below.

We retraced our steps as far as the mouth of Willow Creek, up which rich placer ground had been reported. We did not find the right road, but started up the creek following a dim wagon track. We came to a small ranch, whose proprietor insisted that we could not get through, but we were determined to try. We had to hold the wagon for three miles to keep it from upsetting; and at one place had to let it down the hill with the aid of a rope and snubbing post. At another point we tied the rope over the top of the wagon away up the hill, made it fast, then drove about two rods, then shored up the wagon and carried the rope forward and made fast again.

We finally reached the gold camp and found a "town company" surveying a town site. There is gold there, sure enough! Perhaps $1 to the acre, I think that is a high estimate. Not being "tenderfeet," we did not buy a town lot. We hunted deer one day and grizzlies one day and fished many days, finding here our largest trout—the best one measuring 18in. and weighing 3½lbs.

The deer were very wild. We got only two shots and no meat, but we did have a good laugh. W. and I had been on a long tramp and were nearing camp, coming down a grassy ravine. Striking a bunch of willows, we separated, going on either side to scare up some grouse,

when there was a commotion in the willows and a noise as if a runaway reaper were going through. Then a large deer broke cover within 10ft. of W. and would have run over him if it had not had better instinct than he presence of mind, for the hunter was rooted to the spot with fright, and before he could think to shoot the game was 100ft. away; and he either missed it or it outran the bullet. At camp we all insisted that the latter feat was the only way it saved its life.

The next day we all went hunting grizzlies. Fresh tracks were seen, in fact so many that we could not follow any particular one out; but we saw no bears. A mountain lion threw dirt and gravel within a few feet of us, while tearing up the ground with his feet, as a protest against being run out of the brush, but we did not see him.

We now resumed our travels to Hot Sulphur Springs. On the way down, while waiting for the cooking of dinner, C., with the heavy shotgun, was shooting suckers in a muddy bayou. He got his shells mixed, getting in buckshot backed with 6drs. of powder, and while trying to step from one slippery stone to another, the gun "went off," and so did C. We deemed it unsafe to laugh until his clothes were partly dry.

Hot Sulphur Springs takes its name from springs that bubble up with an offensive smell near the town. This place seems to be the lower terminus of Middle Park. The river here breaks through the hills, making for four miles one of the wildest dashing cañons one could wish to see. Following down the Grand to the mouth of the Blue River we went northwest across the Gore Range into Egeria Park. The pass over this range is not so high as Berthound, but rougher. It is heavily timbered. Yampa River takes its rise in Egeria Park. We followed down this stream to Steamboat Springs, about thirty-five miles. It is a pretty valley, perhaps a half-mile wide. Steamboat Springs, with about 400 inhabitants, is a lovely hamlet in the hills. There are over a hundred springs within one-half mile radius. No two are chemically alike. They noiselessly bubble and boil, forced up by gas. Some are luke-warm, others delightfully cold. Some are excellent drinking water, others extremely nauseating. Another spring a few miles distant will cook your grub. A railroad has been surveyed and will surely run down this valley, and I predict that Steamboat Springs will then become the greatest health resort in the State and also the center of the best hunting and fishing district.

Our hunting camp was about fifteen miles from the springs. We reached the ground about noon, pitched camp, ate dinner and then went after deer in different directions, while the writer did camp duty, which gave him plenty of work. I had heard some shots, and directly the mail-carrier halloed, saying my partner was taking a deer down the road and needed my help. I found him exhausted, having carried a large doe nearly a mile. He was much cast down, for the law as well as our feelings, forbids killing does. This being his first deer he had taken a snap shot through the brush, to his regret, but he carried it to camp, thinking it would be the first venison in camp. While he was skinning his game we heard the signal report of a cartridge shell. I climbed the mountain side, and found C. standing by another dead doe. I protested that he should not have broken the law. He said he had stood ten minutes waiting for it to come out in sight, so that he might see its head, and thinking that even if a doe, it would be the first venison in camp. He had carried it so far and was tired out.

When we had reached camp W. had come in at a double quick pace. He was in breathless haste, said he had killed a deer, but had no knife and so had to run to camp for one and for help to get it in before dark. He was much chagrined to learn that he was not the first to get a deer to camp, but would go back and get the antlers and then his task would be done and he could then help one of us to get a pair of horns, as we had only intended to kill one buck each.

He had jumped up a dozen does and fawns, but did not molest them. Presently a half dozen deer came tearing down the hill, passing within 30ft. of him. They had doubtless got his wind, but did not rightly locate him. As they passed him like a runaway locomotive, he blazed away at the bunch and one pitched headlong down the hill and lay still. In great glee he felt for his knife, but found that he had left it at camp and had returned as above stated. He now hurried back to his deer and reached it as darkness began to gather, and to his amazement found he had killed a doe. No more crestfallen or tired man ever returned to camp than he. We surely felt sorry for him. It was a doleful day for does. No more were shot on the trip.

The next morning we changed camp four miles for better water and to get higher in the hills as the bucks browse higher up than the does.

At noon we were all ready for a hunt, but a heavy shower came up and the scrub oak was too wet to travel through. After a while the sun shone and W. and I climbed to the top of a hill and lay on a large rock watching the deer browsing on the opposite hillside and below us. The bushes were so thick they were hidden from view much of the time but we counted thirty at one time within one thousand yards. After an hour's watching I concluded I would see how close I could get to some of them, and leaving W. on the rock to "look at me now" I descended by a roundabout way to the ravine, which I found to be 100ft., wide and so full of willows I could not get through them but got into the bed of the rivulet and literally crawled on hands and knees for a hundred yards pushing my rifle before me. The sun had not penetrated here and every bush I touched produced a shower so I was thoroughly wet. While thus creeping I came upon a bear's track made since the recent shower. The effect on my hat was very strange. It became so light it would scarcely hold the hair on my head down to its proper place. I got through all right and reached camp after dark.

The next morning it was my turn to hunt. Three of us started in different directions. I started more than a dozen bucks with many fair shots, but refused them, waiting to see larger horns and about 10 o'clock found them. Some half dozen started out of a gulch. They stopped when 200yds. off to look and I let drive at the big one, shot him through the neck. He dropped in his tracks and never moved a muscle. We judged him to weigh 300lbs. I managed to dress and partly hang him up in a tree, took head and horns and reached camp at 3 o'clock, oh so tired. We secured his meat next morning, and I had the honor of getting the first antlers. We simply gorged ourselves with trout, grouse and venison. After a long stay in camp, a great deal of hunting or roaming, for we obeyed the law after the first day, we each having one pair of antlers, started for home by way of Blue River, Hoosier Pass and South Park, stopping on the way long enough to wash out enough placer gold to pay the expenses of the trip and a little over. Hoosier Pass is high, steep and rough; we were told it was steep but smooth. When we arrived on top we found the steepness all right. We again tied the brush pile on behind and B. got astride, but it was so rough he could scarcely stay there or keep his hat on his head. Half way down he said if that was a smooth road he would like to see a —— He did not finish the sentence. At the bottom of the hill the reason was apparent; his mouth was bloody, he had bitten his tongue half off. It was a rough road.

We arrived home without broken bones and with the resolve to go again when convenient. PERRY ROBEY.

## SHOTGUN LOADS.

*Editor Forest and Stream:*

This subject was discussed a few years ago in the FOREST AND STREAM and I think a great benefit was derived by many from it. As every one cannot spend a day or two testing his gun to find the best results, he is obliged to rely on what others tell him.

I have a couple of 12-bore breechloading shotguns of about 8lbs. weight, and after numerous trials at the target came to the conclusion that 3drs. by measure of either Schultze or black powder and 1oz. shot is the best for ordinary shooting, and for hard shooting, such as ducks, etc., 3½drs. powder and 1⅛oz. shot are the best loads for a 12-bore. I load as follows: First a card, one felt, and another card over the powder, and a light card over the shot, and if the shells are not filled up so as to crim properly, add another black or pink-edge wad over the powder before the felt; and when loading with nitro powder the pink-edge wad should always be used. I cannot find much difference, if any, when a card and two pink-edge wads are used over the powder instead of the felt. I use Nos. 5, 6 and 8 shot, and find that No. 6—209 pellets to the ounce—gives the best and most regular pattern. T. H. Walsh ("Stonehage") and Greener both advise 3drs. black or 42grs. nitro powder and 1⅛oz. shot for ordinary shooting, and 3¼drs. and 1⅛oz. for hard shooting. Others advise 3½ and 3¾drs. powder and 1oz. shot; but as far as I have tried, this load causes the shot to scatter and there is no certainty of a regular pattern, and in many cases a duck would escape. With good powder, such as Curtis & Harvey's or Schultze, or any other equally as strong, 3¼drs. and 1⅛oz. shot will stop any duck up to 60yds., and it is seldom they are shot at at that distance.

As to 10-bore guns there seems to be much difference in opinion as to the proper load. Greener advises 4 to 4¼drs. of best powder and 1⅛oz. shot, or if the shot is smaller than No. 6, 1¼oz.; and for hard shooting 4½drs. and 1¼ to 1⅜oz. shot, and wads the shells about the same as above described for a 12-bore. Bogardus in his book says 4½ to 5drs. powder and only 1oz. shot for duck shooting, and uses 5drs. with two pink-edge wads and 1½oz. shot for trap-shooting; and if I remember rightly Kleinman used this same load, and both these men were considered the best duck shooters in the world. All the parties agree, however, that cartridges, no matter what bore is used, should be well crimped. I have tried about all the above loads, and when pattern is taken into account, as well as the penetration, I find that 4½drs. powder and 1¼ or even 1⅜oz. shot suits my gun best, which is a 10lbs. 32in. English make. I have tried the 4½drs. and 1oz. shot, but the pattern seems to be very open and patchy.

Greener in his works claims that with this load the quantity of powder is altogether out of proportion with that of the shot, and that there is an idea prevalent that by diminishing the charge of powder below the standard charge and keeping the standard charge of shot, the closeness of the pattern will be increased. He says this is erroneous so far as it applies to choke-bored guns, and the use of black gunpowders, and in any case it is productive of irregular shooting and patchy patterns; and overloading the gun with powder and shot or with powder only causes the same thing.

By the many different opinions thus given, and no doubt I only have mentioned a few, there seems to be a great diversity in the manner of loading a 10-bore, and I would like to hear from some more of our modern sportsmen as to their ideas. SHOTGUN.

## BRAGGADOCIO.

*Editor Forest and Stream:*

What you said in an editorial paragraph about bragging gunners, that when we hear one boasting over a "tremendously long shot" and "taking to himself the credit as a mighty sportsman" we may regard him as a "novice, or, if experienced, as one not entitled to much credit," strikes the truth. I like to go out with these fellows who "never miss," and find that they are mediocre or below par. They cunningly "blow their own trumpet," and credulous persons are led to regard them as great as Commodus, who was reputed to have severed with his arrows the thongs on his rival marksman bound for execution.

I remember a colored wing shot of Poughkeepsie of whom it was said he offered to bet that he could be drinking at a spring and shoot two grouse that might be flushed while he was quenching his thirst. He would rise, grasp his gun, fire right and left, and the drumming of two more birds would forever cease. So he got a reputation. But he knew he was safe in his offer, as such a test of his skill would never be made under the circumstances mentioned.

I was quite amused the other day when a nimrod from a neighboring county, whose skill is unequalled (according to his own "brag"), told me of his wonderful work. "Two hawks," said he, "had each caught a chicken, which they were eating in a patch of high grass. I knew I'd get one, but as they rose I dropped them both. I picked them up, and also the chickens, and cooked and ate them all. Hawks are fine eating." As I am a regular reporter for a newspaper, I said, "I'll publish that for it's a good one." He most excitedly protested. "But I won't say anything about your eating the hawks," said I. "Well, don't publish anything," said he almost in alarm. After a while he said that the reason why he did not want it mentioned was because the man with whom he was staying did not want anything said about it even if I did not mention the eating of the hawks. The plausible inference is that the story was a fabrication, and he saw that publication of it would expose him as a great blower skill he does not possess. N. D. ELTING,

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

### He would not Die in Autumn.

CHICAGO, Ill., Sept. 1.—Des-chree-shos-ka Island, below Detroit, is near by some famous ducking grounds, and no marsh in the Union is more fairly international than that bounding the big Detroit River near its mouth or lining the lake below it, for time out of mind Kanuck, habitan and Yankee settler have reaped there their harvest of fowl, or at least did so before the club preserve encroached too much on the old grounds. Of these old days the language of the country still bears record, and we have evidence of the old joy in autumn's fruitful time, set down in chapter and verse. At 'Tite Côte—of course the visiting tourist goes over to the cottages on the Canadian side, or Petite Côte where the wild rushes grow out into the river and make natural redhead blinds—one is in the pleasant land of France, only a France transported and grown broader and more independent. Of course, Jack Parker knows all the marsh hunters on 'Tite Côte, and also knows all the little taverns where one can steal up in quiet canoe by night, away from the big hotels, and get such a hot supper as we did, of muskrat, frog and chicken. Not until one has eaten muskrat, so they say, can one understand all the customs of the country and be called *en rapport* with its institutions. When he has partaken of the national Canadian dish, and so established his position in the land, he can perhaps catch the full fervor of the lines handed down from an unknown author and an unknown time—lines which, in part at least of their sentiment, will at this time appeal to the sportsman who speaks Yankee idiom or the *patois* of 'Tite Côte. The tops of the big rushes were getting gray, and the winds were whispering prophetically through them as my friend stopped the boat and half in soliloquy repeated the little confession of faith which is to-day, opening day of the season, being borne devoutly in mind by all of 'Tite Côte:

I would not die in Hautumn
Ven ze ma'ash is full of game,
Ven *poisson blanc* han duck git fat,
H'an' mus'rat do ze same.
Oh, zen ze Frainchman's harves' time,
Ven game vas sell so high.
'Tis zen he make ze *l'argent blanc*
I would not vant to die!

And so say we all, whether or not we are to make any "white money" out of the duck crop, as does our shooter, who lives at Tite Côte. When the wind begins to say inviting things among the rushes, when the air bears the mysterious messages of the whistling wings, when fish or fowl, and even the humble muskrat are fat and fit for the fire—when, in short, the stirring summons of autumn is in the air and in the blood, then indeed must one, if he be aught of sportsman kind, look up above him and all around him, and murmur to himself the legend of 'Tite Côte in Canada:

I would not die in autumn,
When the marsh is full of game.

No, let it be some other, some less cheerful, less inviting time.

### Opening Day on Many Marshes.

To-day is opening day on many of the best marshes of the West. The teal and wood ducks are having trouble this minute on the channels of the Lake Erie marshes. The Mak-saw-ba men of the Kankakee will reap a harvest of Indiana wood ducks, made legal to-day. Illinois, more conservative and more wise, forbids the Swan Lake and Hennepin men to set loose their destructive machinery until Sept. 15, but Wisconsin, just to keep up the variety in our absurdly various game laws, opens the season to-day, Sept. 1. Of course, the main interest of the Chicago shooters for Wisconsin centers on the Horicon Marsh, where the birds are reported to be on hand in all their usual numbers. Not being able to go up to the Horicon Club for opening day this year, I can only guess at the number of guns on the upper half of the marsh, which would probably be two or three dozen in all. At the Diana Club 17 guns are expected to be on hand. Messrs. C. B. Dicks, Geo. Holden, W. P. Mussey, J. Hall, Charles Wilcox, H. C. Buechner, L. R. Brown, L. M. Hamline and P. F. Stone all left in due season, and will not be back till the first of next week. When they do get back, I am disposed to think, each one of them will be ready to say that he "would not die in autumn." E. HOUGH.

909 SECURITY BUILDING, Chicago.

### Ohio Game Outlook.

ROSE FARM, Ohio.—This seems to have been an unusually favorable season for the breeding of grouse. I hear of more than the usual number of covies being seen of late. Looking for squirrels last evening, I flushed a covey of not less than fifteen nice fellows. How I did long to give them right and left, but I had to refraid, for the season does not open on grouse till the first of the month. They are pretty safe, though, for a month or six weeks longer on account of the leaves on the bushes. It's a very difficult feat to bag the wily grouse when you only hear the whir and see a few leaves shaking in the direction he went. Grouse shooting is my favorite sport, and I know of no reason other than that he taxes my skill more to bag him than any other game we have.

Our prospect for quail is flattering (considering the fact that they were nearly all frozen to death during the hard winter of 1892), which is due mostly to the generosity manifested by our shooters in not shooting them last season. If all shooting men had the true sportsman's instinct, our game would need no law to protect it. Nothing will do more toward driving out that spirit of greed from man and educating him up to the plane of a "gentle sportsman," than the reading of good sportsman papers like the FOREST AND STREAM.

I think there will be an abundance of rabbits for those who prefer that kind of shooting.

There seems to be a goodly number of squirrels in some patches of timber. I haven't time at present to do much shooting, but expect to commence about Nov. 10, and spend about four weeks shooting grouse, quail and rabbits. If some brother sportsman would like to spend those four weeks with me and will write me to that effect, I will answer, giving full particulars. J. T. MARIS.

## AN ADIRONDACK HUNTING TRIP.

"ALL right, on Tuesday morning we start for Pillsbury and the Cedars." This was the exclamation of the four inmates of Wa Wa Yanda Camp, when the question of a hunting trip far back into the wilderness was, after considerable discussion, decided in the affirmative.

Our party consisted of Hank H., a good woodsman and first-class camp mate; Harry W., somewhat less experienced in woodcraft, but a good fellow and willing to learn; the humble writer and his brother, who answered to the old nick-name "Pod," and our guide, Brown, who went under the soubriquet "Comical."

Our prospective destination was Pillsbury and Beaver Ponds and the three Cedar lakes. The two former ponds are as fine deer ponds as there are in the Adirondacks.

Early on the morning of the appointed day the camp was astir, our duffle loaded into our skiffs and Wa Wa Yanda Camp soon faded in the distance as the skiffs, propelled by strong arms, sped lightly over the surface of Indian Lake, whose wind-stirred waters were flashing and gleaming under the golden shafts of the rising sun.

It was a beautiful morning, cool and cloudless, but for a few white-caps near the horizon, and reclining in the stern I enjoyed the ever-changing panorama of the shores as the boat passed by swiftly. On, past groves of dark green spruce and hemlock, whose tops the sunlight turned to burnished gold; past clumps of white-trunked birches and poplars, whose silvery leaves sighed and murmured softly to us under the gentle breeze; past little islands and an emerald marsh, over which a pair of white-headed eagles soared with graceful sweep of wings; on, till the high bank of the Lake Lewey Carry came into view, and we knew that five miles had been left behind.

The boats were beached, unloaded and carried the quarter of a mile to the Lake Lewey outlet, while Harry, the Kodak fiend of the party, took several photographs. The boats launched, we were again rowing up the Lewey outlet. Five minutes' row up the pretty little river, which had been the scene of the capture of the first deer of the season for our party, brought us into Lewey Lake. Lewey Lake is an almost round sheet of water about two miles across, with rocky bottom and shore. It contains lake trout in considerable numbers, whose weight runs up to 15lbs. In the spring the brook trout fishing is very good, but it is idle to fish for them during the warm weather. The Miami River, a noted stream for night hunting, runs into this lake.

The two-mile row to McCormack's, the only house on the lake, was soon over. The boats were hauled into the brush and overturned, and we turned our faces southeast toward Pillsbury Pond, between which and our present position twelve long, weary miles intervened. The party started, first, my brother carrying a pack basket, a .38-cal. Marlin, and a long-bladed hunting paddle; second, Brown, with basket, paddle and rod; third, myself, with pair of blankets, shell bag and Parker hammerless: next Hank, with basket and .44cal. Marlin; and last, Harry, with pair of blankets and .38cal. Winchester.

About a quarter of a mile from Lewey we took lunch at Whitfield Spring, so named in honor of one of the party. After lunch the march was continued, and the next halt was made at the lower end of Mason Lake, three miles from Lewey. Another three miles was uneventful except for the starting of a great horned owl from his retreat in a clump of pines, and the halt was made at a brook as yet unnamed. The third halt was made at the foot of a mountain, at a place called Sleigh Harbor, because the rest of the road is practically impassable for wagons, and whatever is brought in on them is transferred at this point to sleds, and is thus carried the remaining 4½ miles to Pillsbury. The last stretch was finally traversed, and five weary mortals laid down their burdens in Sturges Camp as the sun was sinking behind the mountain crests.

Steaming coffee, brown flapjacks and pork fried crisp formed the evening bill of fare, and they vanished like mist before the rising sun. Then the blankets were spread and we gladly stretched our tired frames upon the hemlock boughs., fragrant but (I know it is rank heresy) not over soft. For a while was heard the subdued hum of voices talking over plans for the morrow, but soon it died away and the only sounds were of the sleepers, while the embers glowed sullenly on the hearth and the smoke ascended in a thin thread to the open sky above.

The next morning dawned bright and fair, and preparations were at once made for the day. It was decided that my brother and I should go to Upper Cedar Lake to visit a party of three who were camping there, and incidentally to try Cedar River for trout. The others volunteered to remain in camp and do some very necessary housekeeping. Pod and I walked the few hundred yards to the pond, launched the boat and were off. Pillsbury Pond is about a mile and a half long but is very narrow, being not more than rifle shot broad at any part. It is very irregular in shape with a long bay about midway in it running southwest. The row through Pillsbury was uneventful, and on arriving at the landing of the carry to the Cedars, we drew up the boat and started over the mile trail to Middle Cedar Lake. Arriving there we launched another skiff and pulled toward the Upper Cedar. On the way we saw two ducks, but so far away that we were unable to distinguish the species. Further on eight wood ducks swung past out of range, and then we passed on into Upper Cedar. There we found one of the party ill, while the other two had gone to Little Moose Lake for a team, leaving him alone in camp—a senseless and thoughtlessly inhuman act. Upon questioning them on their return, they gave as a reason why two went that they were afraid that one might sprain his ankle, so they thought it better to go together, although leaving alone a man who had been delirious.

Pod remained with the ill man, while I went to fish Cedar River. There was scarcely any water in the stream, but where it was fishable there were a few trout. Using a fly, I caught eight, all of which were close to the legal limit, the largest being not over 8in. long. On the way back to the boat I observed many deer tracks along the creek.

The Cedars are clear, rock-bottomed lakes very prettily set in among the mountains. They are bordered with hemlock, spruce, tamarack, beech, maple, birch and poplar—oak, hickory and chestnut being unknown in this region.

Harry, Hank and Brown put in an appearance in the afternoon. Hank and Brown soon returned, but Harry went with my brother over to Beaver Pond, an excellent feeding ground for deer, and consequently famous for jacking.

When they returned, Pod said he would remain with the disabled camper, so Harry and I started back. By the time we reached the beginning of the carry it was dusk, and I had misgivings about being able to find the trail, which was entirely unfamiliar to us. However, we found it and started, and by the time we had gone half a mile it was dark; worse yet, it began to rain, and the prospects of passing a very disagreeable night in the woods seemed decidedly good. Nevertheless we pressed on, continually getting off the trail, but ever finding it again. It became so dark that we could not see our boats, and how we finally reached Pillsbury is a source of wonder to us yet. Half an hour later we were in camp, where we found John Sturges and three others. After a good supper we were ourselves again, but we registered a solemn vow never to start to go over an unknown trail again at nightfall.

We did not hunt that night, but two of Sturges's party went out. They came across three and amid a general fusilade, all escaped unscathed except for their nerves. We had not yet gone to sleep at camp, and could hear the deep boom, boom, of the shotgun, followed by the sharp crack, crack, of the Winchester.

The other two of Sturges's party went out to hunt the latter part of the night, while the rest of us sought our blankets.

When I awoke it was raining hard, and the view without was gray and cheerless. The two who had last gone out had killed a three-point buck and had brought it up from the landing.

One afternoon three of us took our rifles and at 4:30 started to take positions for a sunset shot. Hank took his station at a part of the pond called the narrows. Pod chose one of the islands at the mouth of the bay. Pulling up to the head of the bay, where a small brook came in, I ran the boat ashore. After I had sat there a while some evil genius prompted me to move further down the bay; here I sat and smoked silently while the sun sank lower and the harsh rattle of the kingfisher and the metallic *quauk* of the great blue heron were the only sounds that broke the stillness. Suddenly, after about an hour's waiting, two red objects caught my eye, moving along the edge of the little marsh at the head of the bay, some 180yds. away. A quick glance told me they were deer, but at the distance, together with the twilight, I was unable to distinguish their heads. The rifle I had was a .38cal. Winchester belonging to Harry and I quickly raised it; as the sights come up on one they promptly blurred, so I lowered it, knowing that at the distance there was no danger of the game taking alarm. A second trial met with no better success, but at the fourth I fired. When the smoke cleared the one I had fired at was not in sight and I thought it was down. The other halted at the edge of the woods, and hastily covering it I fired. It did not move. Again the Winchester spoke sharply; still again, till I thought I was firing at a dead spruce top, but at the fourth shot up went the white flag and as it vanished into the woods I gave it a parting salute. Rowing up I found that the first had also escaped unhurt, so I wended my way back to camp with my opinion of myself as a marksman considerably reduced. Later it soothed my feelings to learn that a .38-40 cartridge is not accurate for over 120yds. point blank, so I suppose I was perforating the peat moss 40ft. short of them.

That night my brother went out with Brown and returned at about 3 A. M. They had come upon a deer swimming the pond and Pod had shot. The deer was evidently hit, for it turned at the shot and swam straight past the boat. Pod fired again as it came on, extinguishing the jack by the concussion. Now was Brown's opportunity for showing his shooting prowess, and he was equal to it. Shot after shot rang out as he worked the lever, firing at random in the darkness, till all sounds of splashing had ceased. Then they returned, but on going back in the morning found it lying dead on the marsh. It was a doe, and a chance shot had struck it just back of the foreleg. Pod's first shot had sent a buckshot through the ears, not an inch above the head, which was the cause of the deer's turning.

On the morrow Hank and Brown went to Beaver Pond, while the rest remained at camp. Harry and I fished for chub in the afternoon with fair success. Later I took my stand where I had first drawn up the boat on the previous day, but none came in.

Harry held the gun and Pod the paddle that night, and made the circuit of the pond without getting a shot, and hearing only one buck in the woods.

Brown and Hank put in an appearance early in the afternoon of the next day, bringing the head of a splendid five-point buck that Hank had secured by an evening shot at Beaver. Story and song made the evening pass swiftly, and 11 P. M. Harry and the writer started out; Harry holding the gun and I the paddle. The moon was nearly full and the pond was flooded with its silvery light. There was too much light for hunting, so we soon gave it up, after putting out one and hearing two others.

The succeeding days saw our bill of fare grow less and less. Flour began to fail us, sugar was gone, likewise condensed milk, and we were down to flapjacks without sugar and coffee with neither sugar nor milk. Most of us being accustomed to such things, we did not mind it much.

Finally Pod and Brown decided to hunt Mud Creek, about two and a half miles distant, and started at noon. That evening, after another fruitless wait for an evening shot, Harry and I started for another hunt, our positions being the same as in the last. Fixing the jackstaff in the bow, we pushed off and the skiff slipped noiselessly along the shore, the rocks and stumps, half hidden by the mist, showing white and ghostly in the light.

All was quiet in camp. Hank lay asleep on the couch. As he slept he dreamed. He dreamt of long past war times; how his mother had taken active part at the siege of Memphis with the Confederates, and fancied he could hear the roar and rattle of musketry. Suddenly he awakes. Surely a quarter of a century has passed since then. Yet what is that? Crack—crack—crack—crack! above the rushing of the wind shots are ringing out on the cold night air, and the hills are echoing and reëchoing with sound. Hurling his blanket aside, he springs up. A dry splinter falling upon the embers flares up brightly, lighting up the cabin. Hank starts; then smiles and returns to his blanket, muttering, "I forgot," and all is again silent but for the mournful hooting of an owl.

Harry and I were nearing the end of the hunt. A rainstorm had arisen and I had ceased to look ahead in my endeavors to keep the boat's head in the wind. A splash made me look up just in time to see the spiteful flash of Harry's rifle. Again and again it spoke. Catching up my rifle I also opened fire. Thick and fast came the shots now at the sound, and occasional glimpses of foam as the deer went past the boat, the smoke and reports whirling away on the wings of the wind. The deer, evidently struck by some of the leaden hail, ran 40ft. behind us, turned and came back, entering the brush just forward of the bow. The number of shots fired was twenty-one, Harry firing fifteen and the writer six. On the morrow it rained in torrents, and when, on the morning of the next, we went to search, all blood or tracks would have been washed away.

On the day after this hunt Pod and Brown returned from Mud Creek, having seen no deer. They reported seeing some large trout. Brown hooked a splendid fellow, but as Brown has no use for playing a fish, he lost him, my light tackle, which he was using, being unequal to the strain of "sneaking" it.

The next day we broke camp and turned our faces homeward, The tramp to Lake Lewey with lightened loads and a down grade, enlivened by song and talk, was soon over. A halt at McCormack's, where the party was photographed, and we launched the skiffs and once more were gliding over the calm waters of the lake. We passed over the carry and rowed down Indian Lake in the soft light of the waning day as the sun sank slowly behind Snowy Mountain, until at last we reached camp as the hazy twilight was clothing the hills with purple and the white mist was rising from the water in curling billows.

That night as we lay in the tent watching the smoke wreaths curling upward in graceful curves, we talked the hunt over in low tones. We had shed little blood, but the experience was one ever to be remembered with pleasure by us. Soon the camp sank into slumber, while the weird cry of the loon echoed over the lake and the fire flared and flickered fitfully on the hearth. EURUS.

### Ohio Game.

AUG. 29.—I have just returned from a short visit to Columbiana county, Ohio, where I had the pleasure of renewing acquaintance with the elusive gray squirrel. Notwithstanding the extremely dry weather and scarcity of nuts, squirrels are fairly plentiful, though the dryness of fallen leaves, twigs, etc., prevent large scores. Among those which came into my killing distance were two, showing a freakish tendency, in that each had white-tipped tail; in one case the tail was white for five inches from its end, the other not so much. In other respects the squirrels were ordinary grays in good condition. I saw no quail or pheasants, nor any indication of their presence, although residents inform me there are a few of both in the vicinity.

Keep hammering at our "stop the sale of game" plank; it is the material of which our game protection platform must be built. TWELVE POINT.

### Adirondack Deer Hounding.

LAKE PLACID, Essex Co., N. Y., Aug. 28.—*Editor Forest and Stream:* I desire to call your attention to the fact that the law against hounding of deer before Sept. 10 is daily violated with impunity in the Adirondacks. During a recent trip from Blue Mountain Lake to the Saranacs I had occular and aural demonstration of the above fact and wondered why the law was not enforced by the proper authorities. OBSERVER.

["Observer" incloses his card but requests that his name be considered confidential. It would be a better plan for him and for all other observers of such lawlessness to report it directly to Maj. J. Warren Pond, Chief Game and Fish Protector, Albany, and to "make no bones" about having their names known.]

### Opening of the Rail Season.

THE opening of the rail season, so far as reported, seems to promise better things than for several years past. On the meadows of the Housatonic near Stratford, Conn., Mr. Henry Bishop killed fifty birds on Aug. 31, and a day or two later a single boat going up there and shoving over the ground on a tour of inspection put up over forty birds.

On the Hackensack Meadows in New Jersey some birds have been seen, and the reports for the first week of the season show birds in fair abundance. Mr. Geo. Van Buskirk brought in 36 of them on his first tide, and holds the record for a second year. Other figures were: Geo. Seiss 19, Dr. Curry 18, John J. Anderson 18, Mr. Palmer of Passaic 18, Wm. Ricardo 16, Richard Terhune 14, Harry Bogert of Paterson 14, Mr. Carman of Passaic 4.

### New Jersey Squirrel Law.

THE *Game Laws in Brief* gives this as the law on squirrels in New Jersey:

SQUIRRELS.—SEC. 2. It shall not be lawful to kill any black or fox squirrel, except only between the 31st day of October and the 16th day of December.

It response to several inquiries it may be stated that the *Brief's* statement is correct. Gray squirrels are not mentioned in the law, although the black is a sport of the gray. "If the *Brief* says so you may depend on it."

### West Virginia Game.

SWEET SPRINGS, W. Va., Aug. 29.—The prospect for deer, turkey and pheasant here this fall is very encouraging. On account of the change made in the Virginia deer law we have had no August deer hunts; hitherto we have hunted in Virginia after Aug. 15, since we are very near the Virginia line. C. R. C.

### Lake Champlain Ducks.

A LETTER from Rushmore reports a good crop of wild rice on the marsh and quite a sprinkling of ducks.

H. C. K.

### A Club for Young People.

ELSEWHERE in this week's issue will be found the advertisement of a shooting, fishing and boating club, situated on a lake that has many charms for lovers of nature, as well as sportsmen. The club offers unusual advantages to those desiring to spend their holidays with their families, and at the same time enjoy small game shooting and fishing.—*Adv.*

LAND near Birmingham, Ala., is advertised in exchange for a stock of sporting goods or a yacht.—*Adv.*

# Sea and River Fishing.

## TEXAS AND THE SOUTHWEST.

NEVER in the history of southwest Texas has the tarpon fishing been as good as it is this season. In fact, the captures of the silver king are so numerous that it has ceased to be considered a piscatorial feat to hook his glittering majesty.

Gov. Hogg and family are at Rockport and his Excellency declines to be interviewed as to the political question of the day, asserting "by Gatlins" that he has brought his wife "and the kids" to the coast to catch fish, and that he don't propose to descend to the enervating task of discussing politics "as long as the fish bite."

Hon. C. A. Culberson, Democratic nominee for Governor, which of course means that he will be the chief magistrate of this great State by 175,000 majority, is also at Rockport. He also abandons himself to the pleasures of the hour and refuses to dive into the mazy intricacies of the political situation. He comes from a family of sportsmen and his election will be hailed with delight by the votaries of the gun and rod, for through him the Texas Sportsmen's Association hope to amend the existing game laws so as to effectually put an end to the illegal slaughter.

Among the prominent San Antonians who have summered at the coast may be mentioned Mrs. F. E. Elgin, Mrs. Jose Cassiana, Mrs. Hoover, Mrs. Chas. P. Smith, Mrs. Marguerite Smith, Mrs. Olmstead, Kate Cassiana, Alice Cassiana, Ruby and Mary Mallony and Messrs. Jose Cassiana, J. S. Marquin, A. B. Caldwell, Alfred Smith, Jas. Burnett and family, State Senator Perry Lewis, Mr. Arthur Guenther and family—all ardent anglers, and every one who has been so fortunate to cast a line in the bay report the finest fishing of their lives.

The Aransas Pass railway has put in a reduced rate which is taken up by our people and hundreds have taken advantage of them and gone to the coast.

The black bass fishing near Kenville is also said to be at its height, and hundreds of pounds of the finny beauties are captured every day by San Antonio fishermen.

Reports continue to come in to the effect that the quail crop this year will be as of yore. The birds are returning from somewhere—no one knows exactly where. Bob White has been sojourning for the past three years, but he is coming back and there is no section on earth where quail are as plentiful just now than southwest Texas.

While on a recent visit to Corpus Christi, Mr. Martin, vice-president of the Mexican National Railway, hooked and landed one of the largest tarpon of the season. He has had the glittering fish mounted by a local firm, who made a complete success of the job, its silvery scales under a light coat of varnish retaining their brightness. The monster silver king will be shipped to Mr. Martin in Mexico City and placed on exhibition in his office. This is Mr. Martin's first tarpon, and he feels very proud of capturing a fish which President Cleveland would travel a thousand miles to capture.

Mitchell's Lake, nine miles south of San Antonio, is now full of water, which insures first-class duck shooting for the entire winter. Visitors to San Antonio, according to the rules of the club having the lake in charge, are to be permitted to hunt thereon free of charge, and San Antonio extends a hearty invitation to all brother sportsmen to have a go at the webfoots this winter.

O. C. G.

## A FLY-FISHERS' CLUB IN AMERICA.

ON several occasions during th past ten years I have suggested, briefly, the desirability of organizing a fly-fishers' club in this country upon the lines of the club with that title in London. In a recent issue of the *Fortnightly Review* there is an article which incidentally treats of the London Fly-Fishers' Club, by Mr. Basil Field, himself a member of the club, and one of the executive committee, from which I quote: "It rents no waters, it gives no prizes, it encourages no competitions. But it does collect statistics, organizes meetings, promotes the reading of papers, and encourages discussion, not only on technical details of the angler's craft, but on the fishing laws, river pollution, fishculture and subjects of wide interest to mankind at large. It is, however, primarily a social club.

"The library is a well-selected collection of the most important works on angling and fishculture that have yet appeared. The club owes its origin to a widespread feeling that there is something in fishing beyond the mere catching of fish. The late Francis Francis reduced it to words and the present editor of *Fishing Gazette* impressed it with life. The result was the Fly-Fishers' Club. It consists of over 300 members, British and foreign, representing the House of Lords, the House of Commons, art, science, literature medicine, diplomacy, the church, the army, the navy, the bench, the bar and the legal profession in general, manufacture, commerce and trade, wholesale and retail. In short, among its members are men of every known occupation, and some with no occupation at all. For it must be remembered that while the busy man spares time to kill fish, the idle fishes to kill time, and the one common bond that unites this heterogeneous mass of humanity is the love of fly-fishing."

The objects of the Fly-Fishers' Club as set forth in the Club Annual are as follows:

"The constitution and purpose of the Fly Fishers' Club, which is purely a social club, may be stated in brief to be:

"To bring together gentlemen devoted to fly-fishing generally.

"To afford a ready means of communication between those interested in this delightful art.

"To provide in the reading room, in addition to the usual newspapers, periodicals, etc., catalogues and books, foreign as well as English, having reference to fishing, particularly fly-fishing, so as to render the club a means of obtaining knowledge about new fishing places and vacancies for rods, and making it a general medium of information on all points relating to the art."

The club is governed by a committee of twenty-one, selected from the membership, two of whom act as honorary treasurer and honorary secretary respectively. The club has no other officers. The annual subscription is two guineas for London members and one guinea for country members. Originally the London members paid three guineas annually, but this was found to be greater than was necessary, and the subscription was reduced.

The club has twelve honorary members. Five reside in Great Britain, one in Germany and six in the United States. Country members are those who have no fixed residence in the city of London.

As long ago as in 1885, the FOREST AND STREAM said of this club: "We have been struck by the fact that there is no association of this kind in America. There is room for just such an organization here, in New York, and it could be made very popular if the right men could take hold of it."

During the nine years that have elapsed since that paragraph was written nothing has been done towar organizing such a club. But apparently there is no good reason why such a club should not be organized, and there are many reasons why it should be.

Quite naturally, the club should find a home in New York city, as it seems to be a sort of clearing house for the anglers of the entire country. Without doubt there are enough fly-fishermen in New York city, if their attention could be drawn to and their interest aroused in a club of this character, to put it on its feet at once, and with non-resident members from all over the United States and Canada, who would naturally be drawn to it, the club would very soon become a general meeting place for fly-fishermen and a bureau of information for the dissemination of knowledge in all things relating to fly-fishing. The love of fly-fishing is of vigorous growth in this country and is spreading far and wide. So that every year there are large additions to the ranks of those who practice the highest style of the contemplative angler's art; for let the most inveterate bait-fisherman catch a trout, black bass or other fish with a fly on a light rod, and ever after he is a fly-fisherman from preference.

Fly-fisherman are companionable men, and as a rule, gregarious before and after the actual fishing, even if they prefer to cast their flies in lonely solitude, so I believe that at this very moment the material for a Fly-Fishers' Club, in which the anglers of the country would be greatly interested and from which they would receive great benefit, is now going to waste for the lack of action to organize and shape it. Through the London Fly-Fishers' Club I have made acquaintances that have become friends, and have gleaned information of value, and it is this experience which prompts me to advocate a similar club in this country to draw our anglers closer together for their common benefit and mutual advantage.

FOREST AND STREAM is the agent through which the club may be brought about and that journal may become the god-father of a club that will rank with that of our cousins' over the sea.

A. N. CHENEY.

## LONDON ANGLERS AND THEIR DOINGS.

SUNDAY is a great day with the metropolitan angler. The Saturday half-holiday is of little avail here for fishing purposes. Many years ago, say between fifty and sixty, there used to be excellent roach and dace swims to be had off the Thames Embankment, and the angler then needed no railway "privilege" tickets. Now, it would be like fishing in pea soup to cast in off say Blackfriar's steamboat pier, or put in the leger from a boat at Cleopatra's Needles.

No, the Saturday afternoon — when the clerks, the mechanics and the working men in general leave business—does not give one an opportunity of getting away to fish. Unlike the country angler, the cockney piscator has a considerable distance to travel before he can get anything like decent fishing. Up here the rivers don't run by the bottom of the garden, and there is no fishing to be had out of the parlor window. In the course of a single season thousands of miles are individually covered upon fishing expeditions, but thanks to the liberality displayed by the various railway companies the club angler is enabled to travel at a greatly reduced fare. In fact, the London angler is a big traveler, and nothing is thought of covering 200 miles in a day and then being back in plenty of time to "weigh in" at night.

Each year sees a great increase in the number of anglers and clubs in London, and the sport of fishing was never more popular. It is estimated that there are quite 10,000 club anglers within the metropolis, and the clubs now number over 230. Then there are the unattached or non-clubmen, who probably number 20,000 or 30,000, so that altogether the sport of angling can lay claim to being in a very flourishing condition. The London club fishermen are governed by two associations, one being called the London Anglers' Association and the other having for its title that of the Central Association of London Anglers. The former is by far the most powerful of the two, and is known piscatorially as the "Anglers' Parliament." Mr. Philip Geen is its president; Mr. Richard Ghurney, who is sometimes referred to as "the father of the London anglers," is the secretary. Each society enrolled with this association is entitled to send two delegates to its monthly meetings. The association has a general committee, a renting and preservation committee, etc., and at the delegate meetings all matters relating to the angling world are dealt with. There is a great business air about the delegates, who sit on long rows of chairs facing the chairman and "Dick" Ghurney and his assistant. As each delegate arrives he gives the name of his club to a gentleman termed the "tyler," and he at the end of the proceedings calls the roll for the purpose of seeing how many societies affiliated to the association have been present.

Prior to the minutes of the previous meeting being read a great sharpening of pencils can be heard, notebooks are produced and the delegates look more like a corps of reporters waiting for some great speaker to open his oration than a lot of "jolly anglers." The reason for this great display of pencil and paper is that each delegate is supposed to give an account of the Association's meeting at the next gathering of his own society. When the chairman—who is generally Mr. W. H. Beckett—taps the table with his little brass hammer, and Mr. Ghurney adjusts his "goggles," every pencil falls upon its notebook awaiting for an item likely to interest brother club men. At this meeting new clubs are enrolled, complaints received and inquired into, matters relating to the renting and preservation of club waters, and railway concessions discussed; in fact, this meeting is the one where everything concerning the interests and doings of the Association's affiliated members is dealt with. The business of the Central Association, of which Mr. C. H. Medcalf is the president, is conducted in much the same manner. The delegates take notes of the proceedings, and reports are handed in by the visiting officers, etc. Mr. W. J. Wade is the secretary of this Association, and he has left no stone unturned to secure its success. Through his efforts, a grand piece of water was obtained on the Sussex Arun, where many "boncers" and "tonkers" in the roach class last season came to grief at the hands of the skilled London disciples of the rod. Lots of 2-pounders were basketed, and several fish were had up to 2½lbs. For roach, such fish are worth noting—and they are worth catching, too! In the sharp tidal waters of the Arun they fight like a trout!

The London anglers have a benevolent society, and over £200 was paid out last year to members who had encountered misfortune in their path. The society is carrying on an excellent work, and many a fisherman has had reason to be grateful for the assistance rendered him in this direction. A subscription of 1s. 1d. only a year is charged, but this would be totally inadequate to meet the calls on the fund were it not for the aid of smoking concerts, collecting boxes, etc. Recently the Anglers' Benevolent Society has secured six beds in a convalescent home at Dover, where sick members go to regain their health and strength. Very often when anglers in straitened circumstances have been sent away to the seaside, the committee have not forgotten their all but empty purses and have made them "pocket money" allowance. During the last year the committee had to deal with some extremely painful cases and I am happy to say that those in distress have been treated in the spirit of the true brotherhood of angling; where help was needed it was ever forthcoming, and as a result many a Waltonian set on his legs again in more ways than one. The Anglers' Benevolent Society is indeed a grand institution, having a noble object in view, and long, I say, may it prosper and flourish.

The clubs are mostly held at a local hostelry, and meetings generally take place twice a week. The clubs all have their president, vice-president, chairman, treasurer and secretary. Round the room many fish caught by members figure on the walls in ornamental glass cases. The fish are known as "specimens," and they range from a tiny bleak to a monster pike. The inscription on the case runs something after this style: "Bream, caught by Mr. Smith in the Thames, July 16, 1889, weight 5½lbs." Some of the fish are very fine, and large collections are to be found at some of the clubs. For instance, the Friendly Anglers' Club room is adorned with close on 150 cases, in which may be found trout of 10lbs. and 13lbs., chub of 5lbs. 14oz. and bream going 7lbs. 13oz. There is a grand show of fish at the Piscatorial Society's Saloon at the Holborn restaurant, there we have specimens of the American striped bass and the American black bass caught by Mr. T. R. Sachs. Plenty of the clubs have from thirty to fifty cases of fish on view. The leading angling clubs in London are considered to be the Fly-Fishers', Piscatorial Society, Gresham, Friendly Anglers, New Albions and the True Waltonians, and they indulge from time to time in some very grand banquets and other festive doings. The annual dinner of the Piscatorial Society is perhaps the most brilliant function in London angling circles, the occasion being one on which large numbers of ladies grace the proceedings with their presence.

Among other things discussed at the clubs are of course the competitions, in connection with which several prizes are offered each outing, some of the clubs having a prize list of something like £80 or £90 for one season. When a competition is about to take place, the secretary sends a report to the fishing papers to the effect that the "members' attendance is urgently requested" on such and such an evening, "when important business will be discussed." The London angler is noted for always arriving late at his club, so that a start is frequently not made until considerably past 9 o'clock. The worthy secretary—he is always "worthy"—then reads the minutes of the last meeting, and the chairman afterward calls for some one to propose and second that they be duly passed.

This function over, the chairman intimates that there is to be a competition next week; "but," says he, "before we proceed to the business I would thank you to give your orders—the waiter is in the room." This is by no means unwelcome news, and what with beer, whiskies and teetotal drinks the waiter gets very much mixed. But eventually the drinks are supplied, and the chairman, rapping the table, says something to this effect: "Worthy secretary and brothers, we have a competition in a week's time, and it is for you to say where you would like to go and how to fish when you get there. There are three prizes: First, Mr. Smith's £1 1s.; second, Mr. Money's 10s. 6d., and third, Mr. Bacon's ham. I don't think you will get much sport wherever you go; the water is 'gin-bright' all over the place. However, it is for you to decide." For a minute the company remains silent, and then one of the members:

Mr. Robinson exclaims, "Why not try the Arun, there are some prime roach there and bream like bellows. You'll stand a better chance in the tidal waters than anywhere just now."

Mr. Katchemall: "Well, I should like to give the Thames a turn. I'll bet I'll sneak a barbel or two out on the leger, and don't you think I don't know where there are some boncing chub. I propose we go to Staine's. They are sure to come on in the 'cool of the evening'."

Mr. Brown: "Try the Thames! I wouldn't go if you paid my fare there. It is like gin, so Harry Jones says—he was down at Sunbury yesterday—besides what about boats? Hundreds and thousands of them kicking about. And the steam launches a plunging through your swim! Might as well fish in the water cistern this time of year."

Thus suggestions follow each other in rapid succession, and it often takes an hour or so before a spot can be fixed upon to fish the match. Then if it is not a "roving" competition, boundaries have to be arranged, etc. Sometimes the event will be a "pegged down" one, and stewards are appointed at the meeting to peg out swims for the competitors. No one is allowed to go down to the river overnight except the stewards, and when the contestants reach the scene in the morning the former gentlemen have put the stakes in and numbered them. Subsequently a draw promptly decides where each man is to go, and the expression on some of their faces is a sight to behold when they do not get a pitch to their liking. There, however, they must stick or forfeit all participation in the match. Many of the London clubs are also the scene in connection with the weekly meetings of numerous smoking concerts and "visits" in the course of the year, while papers on angling are also read during the season.

The great event of the year, however, is the club's annual dinner, when the fishermen have quite a reunion and spend the evening merrily amid toast and song. The

Royal toast, I should say, is always most loyally honored, as the Prince of Wales is one of the patrons of the Thames Angling Preservation Society, and the Princess of Wales and other members of the royal family are followers of old Izaak themselves. At these gatherings the prizes won during the season are generally presented, and as the recipients rise to receive them they come in for much good-natured chaff. The annual dinner is also thought to be an opportune time to "open" a new prize list, when the company present again make promises of various articles, including the proverbial copper kettle. Some of the clubs here do not favor gross weight prize fishing, but give silver medals instead for the best specimen fish caught during the season. Occasionally very handsome challenge cups ornament the chairman's table, and some of the prizes are of a very valuable description. During the last few years the reading of papers on subjects piscatorial has much increased at the clubs, and the Anglers' Paper Reading Society's lectures have been greatly in demand. The papers read at the Piscatorial and Gresham angling societies are afterward printed and placed in the library, and form very interesting and instructive reading. The Fly-Fishers' Club is looked upon as *the* society, but the members take little or no active part in London angling matters. They meet once a year to dine, it is true, and occasionally give a "smoker," but that is all one hears of them. The library in connection with this club contains many rare works on the piscatorial art, a remark which may also be applied to the Gresham and Piscatorial societies.

In regard the competitions held over here, some of them turn out very big events. Only last March one took place up the Lea in which nearly 600 fishermen were engaged. This river and the Thames and Arun are generally selected for the competitions, and the following is a copy of one of the handbills issued in connection with a match got up by Mr. Eldridge, who runs the "anglers' train" every Sunday morning to Pulborough and Amberley on the Sussex Arun:

OPEN ROVING FISHING CONTEST,

(STARTING FROM AMBERLY) WILL TAKE PLACE ON SUNDAY OCT. 8, 1893,

For the following valuable prizes, given by Messrs.

A. A. Eldridge, "Rose and Crown," Goswell Road, London; Duke, "Houghton Bridge" Inn, Amberly; Cunningham, "George and Dragon," Houghton; Rogers, "The Cricketers," Amberley; Henly, "Black Dog," Bury; and other friends.

*List of Prizes:*

| | £ s. d. | | £ s. d. |
|---|---|---|---|
| First prize | 1 10 0 | Sixth prize | 0 10 6 |
| Second prize | 1 0 0 | Seventh prize | 0 10 6 |
| Third prize | 0 15 0 | Eighth prize | 0 10 6 |
| Fourth prize | 0 12 0 | Specimen bream | 0 5 0 |
| Fifth prize | 0 10 6 | Specimen roach | 0 5 0 |

Entrance fee 6d., which will be added to the prizes.

ALL TO START ON SUNDAY MORNING.

No live bait to be used. Jack eels, pope, dabs, bleak and gudgeon barred. Thames measure. No one to fish within 10yds. of another without his consent. One rod only to be carried. Disputes to be settled by the Stewards present. Weighing to commence at 4 o'clock. No fish will be received after 4:30 sharp. The weighing to take place at Mr. Rogers's, "The Cricketers," Amberly. All prizes will be paid to the successful competitors immediately after weighing in.

All competitors must get their tickets stamped at "The Cricketers" before starting, any one neglecting to do so will be disqualified.

Tickets to be had of Mr. A. A. Eldridge only, at the "Rose and Crown," 21 Goswell Road. Entries close at 11:30 P. M., Saturday, Oct. 7, 1893.

Stewards wearing colored favors perambulate the banks while the competitions are in progress, and it will be seen from the above bill that the latter are carried out in a thoroughly businesslike manner. In some matches the fish are registered and measured as soon as caught. This duty devolves upon the steward, and if the fish are feeding at all well these gentlemen have a pretty warm time of it. No sooner is one fish taken off the hook, and the steward is in attendance, than the cry of "Steward!" is heard in another direction, and while the angler is playing his fish the man of the white and red rosette is called upon in yet another part of the competition boundary. When the big competitions are held the railway companies run special trains to the scene of operations, and the anglers sitting in the various compartments, with their rods and boxes slung over their shoulders, look, as the train rushes by, like a regiment of soldiers, minus their scarlet uniform.

Before the competition commences it is often the practice of the committee or stewards to overhaul the contestants' bags, baskets and boxes, to see that no fish are concealed therein. This operation leads to much good-natured chaff all round, and provides rare amusement for the onlookers. Everything is closely examined, even to the parcel or cloth containing the day's provender. Small packages which perhaps only hold salt and pepper are even scrutinized, and when the fisherman's box has been stripped of its contents, and all is correct and proper, he is politely told he can put the tackle and the reels, the pepper and the salt, the beer bottle and the whisky flask, and the knuckle of pork or the piece of steak back into the box, and go to the place where the pistol will be fired when the match commences. It is only right and proper to say that I have never yet known a case during the searching of an angler's kit where fish had been discovered, which speaks volumes for the general honesty and sportsmanlike feeling prevailing among those concerned.

A pistol is fired as the signal to start fishing. Long before this the competitors have assembled in one dense mass at a given spot, and the scene when the signal is given is of an intensely humorous and amusing description. There is a wild rush along the banks to secure the well-known swims and "shops," and some of the fishermen run for a mile or a mile and a half without stopping, so intent are they in being first at some favorite pitch where they hope to make a good basket. In a marvellously short time the rods are at work, and for miles, in one long row, up and down stream, sitting on the varicolored roach boxes, are to be found followers of the man who loved Lea so well. There they patiently sit, it may be in the broiling heat of an August day, or facing the cutting east winds well known to those who go angling in the winter months. As the day wears on the villagers may be seen running up and down the banks with cans of hot tea, bread and butter, watercress, etc., which are speedily bought up by the fishermen. It is by no means an uncommon occurrence either to see an angler bring out a little spirit stove and kettle, spread a snow-white cloth by his side, and, while the kettle is boiling, cut up the bread and butter, and generally prepare for an *al fresco* tea, these roach baskets being of a very capacious character.

Just now London anglers are feeling considerably exercised over the Thames Conservancy bill, and have petitioned the County Council to get a clause inserted whereby the swans and ducks which gobble up all the ova will be removed from the river and the speed of steam launches lessened, especially in the fence months when the fish are spawning. There are several preservation bodies, the Thames Angling Preservation Society, of which the venerable Mr. W. H. Brougham is the secretary, being the pioneer in connection with the good work now being carried on up the river. Many tons of fish of all kinds have been placed in the Thames, and it is estimated that the angling public and those interested in the river have spent something like £30,000 in preserving and protecting it from the wiles of the poaching fraternity. The professional fishermen who gain their living by taking anglers out in punts have in many instances been constituted honorary river-keepers, and when the fish head up to the weirs after spawning they are sometimes out day and night, in order to see that no harm befalls them. In the matter of supporting the preservation societies, the London Club anglers might have been much more generous, but I think in time they will see the error of their ways, and each club make an annual grant for the purpose of putting new blood into the Thames. The tide is steadily flowing in that direction, I fancy, for we now have a "fish preservation week" in London, and the clubs are individually responding more liberally to the appeals made by Mr. Brougham.

And now I must reel in, for the swim is full up. I hope I have given you some idea of what London piscatorial circles are like, and if that should prove the case, and if you have been interested in them, then my object will have been attained. I have now only to wish you fraternally "tight lines" and pleasant times when you take part in the noble sport of angling.

LONDON, England. ARTHUR R. MATTHEWS.

## CHICAGO AND THE WEST.

*[From a Staff Correspondent.]*

### Fox Lake Anglers Organize.

CHICAGO, Ill., Sept. 1.—When Mr. Geo. E. Cole, president and actuating spirit of the old Fox River Association, of Illinois, laid down his baton as leader of the protective forces, the work of the latter association was practically done, for it had accomplished about all it had set out to do. Its record was the most notable of any ever made by a protective association here, and Mr. Cole has never yet had an equal as an organizing and executive officer in such work. It seems, however, that no matter how well this work is done, it will not stay done unless the protective forces keep on at it. The waters of the great and prolific Fox Lake system again began to need a guardian's care, and some of the anglers recently resolved to organize again for protection. At a meeting held at the Mineola Club, Fox Lake, last week, an organization was formed for that and adjoining lakes. A vigorous prosecution of all violators of the fish laws was agreed upon and the following officers elected: Pres., Noah H. Pike; First Vice-Pres., Albert Mason; Second Vice-Pres., Allen C. Story; Sec'y and Treas., D. S. Daly. Executive Committee: James Gardiner, Lewis M. Melander, Jr., John W. Lyke, Robert O. Boyle, J. L. Lindskog. Representatives were present from Fox Lake, Pistakee Lake, Petite Lake and Long Lake fishing clubs.

### The Best Yet to Come.

The most enjoyable part of the angling season is yet to come. In the fall, until well on toward the end of October, the bass fishing in this section is better than in the spring. The fish take bait better than the fly, it is true, and are taken in deeper waters, but they bite freely and play hard, and, moreover, one does not have the feeling that he is taking fish full of spawn. Last spring a great many heavy catches were reported from Wisconsin lakes, and many men boasted to me of the sport they had had. As a matter of fact the fish were taken on their spawning run. It is late June sometimes before the bass have finished spawning—indeed in the northern lakes of that State they are not through before the end of July. After that they do not bite so freely but continue to go to the shallow water to feed in the evenings and to less extent in the mornings. In the fall their habits change, and barring the fact that one too often misses the fun of seeing the strike at the surface, the bass give better sport on the rod. The Fox, the Kankakee, the Tippecanoe, and others of our bass streams are now or soon will be at their best. Further to the north the pine woods lakes will soon offer their best inducements to the mascallonge angler. The waning of the year approaches, but the angler's year will not be done for two months yet, unless the angler is also a shooter, as so many of ours are. E. HOUGH.

909 SECURITY BUILDING, Chicago.

### Irish Lake Trout.

The Irish lake trout has frequently been known to grow to an extraordinary size, and at one or two exhibitions of angling trophies the stuffed carcases of some very remarkable fish have been shown. The record trout, however, seems to have been taken in Lake Ennel, or Belvedere Lake, Westmeath, by Mr. Meers, of Mullingar. The fish, which naturally afforded some capital sport, was taken immediately after capture before a Justice of the Peace in the locality. It is not to be supposed that the fish had committed any offence against the law, but there seems to be a tendency on the part of the world at large to require verification of an Irishman's story, especially if it be an Irish angler; and the weight, girth, etc., of this extraordinary trout can be recorded for future generations with the legal stamp of genuineness attached to its record. The weight is returned at exactly 26lbs., 2oz., the length 34¼in., the middle girth at 28¾in., and the girth between the centre and the tail 20in., while the breadth of the tail is very remarkable, being 10½in. It must have afforded the fish enormous propelling power. It is pleasant to know that the skin will be preserved by a skilled taxidermist, and that it will be presented to the society which has charge of the preservation of the fish in the Westmeath lakes.—*Bells Messenger (London).*

### Caledonia Brown Trout.

THE Caledonia Fishing Club has had on exhibition in a Rochester, N. Y., window two brown trout taken from Spring Creek. One weighed 11lbs., the other 10¼lbs.

### Trouting on the West Canada.

THE portion of the West Canada, Herkimer county, N. Y., which experience teaches me contains not only the most trout, but stretches of stream most conducive to growth as to individual size and increase of number of the fish, is the stretch between the outlet of Deer Lake, four miles above Northwood, the Roberts's cold bed, one-half mile below. At Hickley the milling operations have almost ruined the fishing, and between the points named and that one, long stretches will be found hardly worth casting into. In the spring trout can be easily taken along the stream, a common catch being 30lbs.; but when the warm weather comes on in July and August, it takes a man who knows the pools and rifts like a book to get the wily fish. In the cold beds you will find them by the hundred after four or five very hot days. But a correspondent of FOREST AND STREAM, a great chum of mine, Ray Spears, and I have stood on shore at Fly Stream cold bed and caught enough trout in one hour to keep several large and vigorous families in trout supply for two days. Sometimes as we journeyed homeward we would notice that the air was colder; we would say, "On the rifts to-morrow," and know as we said it that the cold snap would drive the trout into the rifts and rapids, leaving the beds, which to-day were alive with them, empty and without interest for the sportsman.

We noticed last season that trout were dying in large numbers, and apparently from no disease. The peculiarity of the epidemic was that continued hot weather would usher in the devastation and then we would find trout, perhaps five or six to a pool, dead and swollen. Long investigation and observation gave us a satisfactory explanation. We found that the bark of the logs coming from the camps up stream was accumulating in the still pools when the water was low, and the heat acting on it generated a yellowish water which on three weeks' drought spread death among the fish.

Notwithstanding the lumber trouble and continued seining by natives, the West Canada with some restrictions is a fishing ground of splendid possibilities. The reins of restriction of trout destructors are held in the hands of certain residents of Northwood, and if the power be used in the future as it has in the past, 1900 will still find trout plentiful there. ROBERT P. FROEBISH.

### Adirondack Black Bass.

SCHROON LAKE, Essex County, N. Y., Aug. 23.—The record for a large fish caught in the lake at this place this season is now held by Mr. Sidney F. Rawson, of Staten Island, a guest at the Grove Pines House. This afternoon Mr. Rawson and Prof. von Holy started out for a two hours' fishing trip and within that time caught and produced at the hotel five pickerel, the largest of which weighed exactly 8lbs. The others were good sized fish, but not worthy of notice alongside the larger one. The fish was lightly hooked, and contrary to the custom of its kind, made a fierce fight. It was, however, well landed by Mr. Rawson and well gaffed by Mr. von Holy. The black bass fishing here is now fairly good, but no very large catches are reported. —

### Camp Franklin.

TROUT LAKE, Wis., Aug. 25.—The following are scores of fish caught at Camp Franklin: Judge John Barton Payne of Chicago and his friend Chas. R. Murray, in nine days' fishing, landed four muskalonge weighing 18, 16, 15 and 16lbs. respectively, also 119 black bass. The Judge landed a black bass weighing 5¼lbs.

L. M. Brown of Chicago in six days' fishing landed four muskalonge weighing 20, 16 and two 12lbs. respectively, and 76 black bass. C. J. C.

### Long Island Sound.

BRIGEPORT, Conn., Aug. 26.—Big strings of striped bass are bring taken at the mouth of the Housatonic River, Stratford, Conn. Mr. Jacob Huber of Bridgeport has caught several good-sized fish this month, averaging 15lbs. each.

Capt. Charles A. Deas, of the sloop Addie, while fishing near Bartlets Reef, New London, on the 11th of this month landed a sea bass weighing 6lbs. THE GENERAL.

### West Virginia Trout.

SWEET SPRINGS, W. Va., Aug. 29.—The trout have been very plentiful here this year. C. H. Witts caught 7 weighing 3½lbs., the prettiest string of brook trout caught in this country for some time, not in number but in size. A few days later 6 more were caught out of the same stream almost as large. C. R. C.

### Massachusetts Bass.

BALDWINVILLE, Mass., Aug. 25.—F. D. Searle and H. A. Perkins caught eight small-mouth bass in Philipston Lake yesterday which weighed 21¾lbs. The smallest weighed 2½lbs. and the largest 3lbs. 9oz. This is the largest string taken here this season. H.

### Moosehead Lake Fishing.

MOOSEHEAD LAKE, Rineo, Me., Aug. 28.—Mr. William Ziegler, well known in New York and Brooklyn, recently caught with fly hook twenty trout that weighed 69lbs. They were all caught in less than four hours' fishing.

O. A. DENNEN.

### From the Adirondacks.

BLUE MOUNTAIN LAKE, Adirondacks, Aug., 30.—I find fish and game in this region more abundant than usual.

RANDOM.

**A Stray Shinplaster**

Comes to us once in a while for a copy of "Game Laws in Brief;" but shinplasters nowadays are scarcer than Moose in New York; and 25 cents in postage stamps will do just as well.

# Fishculture and Fish Protection.

## New York Game Legislation.

THE Senate investigating committee on the game laws held a session this morning at the rooms of the Chamber of Commerce. The members of the committee, all of whom were present, are: Senator H. J. Donaldson, of Ballston, chairman; Senator John L. Childs, of Floral Park, L. I., and Senator Guy, of New York. Charles S. Burns, of New York, the clerk of the committee, was in attendance to record the proceedings of the committee. Among others present were Messrs. W. F. Balkam, A. B. Lamberton, Frank J. Amsden, Senator Cornelius R. Parsons, Assistant District Attorney Widener and Mayor Aldridge, of Rochester. From out of town, Gen. Dwight H. Bruce, of Syracuse, president of the State Association for the Protection of Fish and Game; F. S. Gavitt of Lyons, president of the New York State Central Fish and Game Protective Association; Ernest G. Gould, of Seneca Falls, president of the Honest Fisherman's Club, and A. Emerson Babcock, of Brighton, were in attendance.

Frank J. Amsden urged a stricter enforcement of the game laws. Said he: "The great point to be emphasized with regard to the protection of game is the desirability or stability in the laws made for that purpose. The frequent changes in the laws occasion great confusion, and many fishermen can justly plead ignorance of the statutes as their excuse. But perhaps this evolution is needed to render the laws perfect.

"The next point I would make is that better enforcement of the laws should prevail. There has been noticeable improvement in this respect of late through the influence principally of the State Association for the Preservation of Game. The people have also become educated and interested in the question.

"I want to impress upon you, gentlemen, the necessity for increased penalties for violation of the game laws. At present the minimum penalty is $10 and the maximum $25 for each offense. The penalty for dynamiting fish is $100, but it is difficult to convict for this offense and the penalty is seldom inflicted. Now when through the vigilance of our game protectors, setters of fyke nets are captured and taken before a justice, through influence or some other reason, they frequently get off scot free. There can be no netting without the total extinction of fish."

"Would you change the penalties which at present prevail, entirely?" asked Senator Guy.

"I think there should be increesed penalties for old offenders," replied Mr. Amsden.

Senator Guy said he feared that the establishment of more severe penalties might prevent the giving of information to the officials where offenses have been committed. A man would hesitate to give information which would result in the financial ruin of his neighbor, while if the fine were more moderate he would do so at once.

Continuing, Mr. Amsden said: "We think the law fixes the date for bass fishing much too early. Decoration Day is at present the date fixed for the opening of the bass season, but in my opinion July 1 would not be too late. We think the permitting by the law of spearing is very unwise. Nothing but angling with hook and line should be permitted in inland waters of the State. But a few years ago the waters of Lake Ontario abounded in salmon, whitefish and trout. The supply is now almost exhausted. Ten years ago on the south shore of the lake 600 men were employed in a large fish industry. The fishing was overdone with nets, and as a result we have no longer our supply of fish from Ontario.

"I do not think we require more game protectors in this district. Our present officials are doing heroic service. I want to say a few words on the subject of birds. The position which the State Association takes is this: The shooting of birds must be confined closer than is the case at present. We believe it should be restricted to the three months of October, November and December. Before the 1st of October the birds are immature and not fit to be shot."

Assistant District Attorney Widener, in his testimony, said: "Severity of the law is the only thing which will preserve the law. I think that doubling the penalty for each successive offense would be a very good plan. I would recommend that the use of ferrets in hunting rabbits be prohibited. The shooting of birds, in my opinion, should be restricted to the last three months of the year."

A. Emerson Babcock, of Brighton, addressed the committee upon the subject of shooting game birds, and said he wished the law could be amended so as to preclude all spring shooting.

Hubert B. Hallock, of Rochester, spoke of the necessity for a law prohibiting the spearing of fish. He stated that Game Protector Schwartz favored increasing fines for offenses subsequent to the first, and thought that after the third or fourth offense imprisonment should be inflicted.

Simon Marshall, Assistant Game and Fish Protector at Charlotte, testified to the trouble he had in capturing illegal fishermen. Said he: "I certainly favor much heavier penalties for infringement of the law. Many illegal fishermen immediately after paying a fine will go out fishing again with a net and more than earn the amount of their fine. There are not many bass caught by spearing to my knowledge. Suckers are very predatory fish, frequently swallowing the spawn of other fish.

"In spite of the law prohibiting net fishing within one mile from the shore I frequently find nets within half that distance from land. Still I believe the mile limit law is of benefit in restraining many from depredating. I would suggest that the bass season be made one month later than is the case at present. I think that the prohibiting of spring shooting of birds would be a grand thing."

Mr. A. B. Lamberton addressed the committee upon the "intermittent game law" which is at present in operation in Maryland. This law provides for the shooting of birds on three days of each week, and on the other three days it is prohibited. It is this way the slaughter of the game is greatly lessened.

N. S. Gavitt, President of the Central New York Association for the Protection of Game, next testified and expressed himself as in favor of different laws for different districts of the State. Said he: "I would suggest the first of July as the earliest date for bass fishing. I do not think the pickerel in our waters are a cause of the destruction of bass. I think there is no occasion for protecting the sucker fish. I caught a man the other night spearing suckers. He was much surprised and pleaded ignorance of the law, saying that they supposed that spearing was permitted in that section. This seems to be the case all over our State. General ignorance of the game laws prevail."

Ernest G. Gould, President of the Honest Fishermen's Club, of Seneca Falls, N. Y., in his testimony said that he would favor a penalty of imprisonment for the offense of dynamiting. He also thought that all shooting of birds should be prohibited in the spring and should be lawful only in the last three months of the year.

Gen. Dwight H. Bruce, of Syracuse, said: "As you all know, the price of fish as well as of meat is steadily advancing. An increase in the supply of fish is necessary before the price can be made cheaper. This increase is only made possible by careful protection of fish in our inland waters. Many entertain the erroneous opinion that all waters belong to the people. Oneida Lake some five years ago was the scene of a great deal of netting and as a result it became utterly devastated of its abundant supply of fish. Since netting has been stopped by law anyone can go to Oneida Lake with the certainty of obtaining a fine catch of fish and can be sure of paying their expenses by the sale of their catch.

"The prohibition of netting will interfere with no industry whatever. Indeed, netting should not be considered by the law in the light of an industry. In relation to the bass and trout question I do not think the season for those fish should open before July 1.

"In regard to deer I think it is the judgment of everybody that those animals should be protected. The Adirondacks are literally overrun with boys and inexperienced hunters who use no judgment in their killing of deer. Many of the hunters are inexperienced marksmen, and numbers of the deer become wounded without being killed. The hunting with jack lights is in my opinion one of the most pernicious causes of their destruction. All good men are in favor of its abolishment.—*Rochester Union and Advertiser, Aug. 28.*

---

Yesterday's testimony before the committee when added to the fund of information already obtained in the Adirondack region made Senator Guy feel that he really now knew something about what was needed by the people of the State of New York in the way of fish and game laws. He was freshly primed with the views of gentlemen who are sportsmen for pleasure, and their opinions had weight with him, but their testimony in no way influenced him to forget the opinions of that class of men who follow fishing and hunting from other motives than that of pastime.

"You may be sure that as a Democrat my sympathy is always, to a certain extent, with the masses," said Senator Guy, "and there is no danger that I shall recommend any measure that will work directly at variance with the interests of a certain class of wage earners. Now, in regard to this matter of limiting all bird shooting to three months, and entirely doing away with shooting in the spring, as was unanimously advocated by the witnesses before this morning's session, I could not conscientiously recommend any such measure. I know hundreds of people about Long Island who are thoroughly reputable and law-abiding men to whom spring shooting is an essential means of livelihood, and in whose community it is a recognized industry. Moreover, there are thousands of men thereabouts to whom spring shooting furnishes employment as guides, and thousands of farmers who make a little needed ready money by boarding parties who come out from New York for a few days' spring sport. Now, to be influenced by these good Rochester sportsmen and be entirely neglectful of the wishes and needs of these other men would be neither just nor wise. As suggested in my remarks this morning, I am strongly in favor of a report from this committee advising a partition of the State into three districts, each district to be governed by laws framed to meet the particular needs of the locality, as evinced by the testimony of its inhabitants before this committee."

"Would these districts bear the name of the localities, one being known as the district of the St. Lawrence?" asked the reporter.

"I have not thoroughly decided upon that," replied Senator Guy, "but it is more likely they would be known numerically, as Game District Number One, and so on. Another thing that I am strongly convinced of is that people in one part of the State should not be listened to with too much seriousness upon the conditions of another part of the State. I believe firmly that in a matter of this kind the man who lives on the soil, and whose forefathers lived there before him, should have the inalienable right to have a voice in the framing of rules to be enacted to apply to his own homestead. A great many rich gentlemen visit the Adirondack region and express to us their opinions as to what should be done in the way of game laws there, and the mountain hotel proprietor announces himself in favor of this or that measure, but it seems to me that the guides who make their living there, and the men who have never been from beneath the shade of its pines are the proper ones to consult as to how laws for that region shall be drawn up. This latter class, in contradiction to visiting sportsmen who have testified, are opposed to allowing still-hunting before the hounding season. Really, I had no idea that there was so much interest in the subject of fish and game, as we have found everywhere on our tour."

"Have you received while in Rochester any ideas that will influence your report?" said the interviewer.

"Yes," was the answer. "But by these ideas I will be influenced only in so far as to recommend changes in the law as applicable to this district. This again shows the necessity of districting the State, for you can see very well that if the whole suggestion of those gentlemen who testified this morning were to be followed it would be like taking the bread from the mouths of a very much larger class of people than those they represent. One thing I am glad to be quoted in: This committee will be very slow to advise any radical changes in the present law, except where those laws are found to be radically wrong. I myself am in the minority on this committee, but of course in a matter of this kind politics cut very little figure."

As Senator Guy is a close personal friend of Senator Childs and as he has evidently been told to do most of the talking at the sessions of the committee, it is pretty safe to say that what the young New York Senator says in this matter will have the support of his colleagues. To-day the committee is at Charlotte.

On another point the Senator said: "Regarding the establishment of heavier penalties for violation of the game laws, I will never for one moment lend my name to the support of any measure which dictates the penalty of incarceration for a man or boy for illegal hunting or fishing."—*Rochester Post Express, Aug. 29.*

---

## Enforcing Minnesota Laws.

MINNEAPOLIS, Minn., Aug. 30.—*Editor Forest and Stream:* Game Warden Sam. F. Fullerton of Duluth is doing good and efficient work in his district. On the 18th inst. he arrested one Matt. Kraodus for killing a doe and having in possession a fawn. He was arraigned in the Municipal Court of Duluth, and Judge Powell "assessed" him $50 or 60 days in the county jail. He went to the cooler, but will probably repent and put up his fine, as he is amply able to do so.

On the 20th inst. Warden Fullerton of Duluth arrested and brought before Judge Powell in the Municipal Court two men, Seenburg and Bergen, for using a trot line of about 1,000ft. in Caribou Lake in St. Louis county. They had a good smart attorney and fought their case to a finish, and the result was their conviction and the imposition of a fine of $50 each and costs, amounting to $104.

Game Warden Angus McLeod of Tower, St. Louis county, Minn., shows what kind of material he is made of in the arrest and conviction of one Louis Rossa. He was arraigned before Justice McGilvary for shooting partridge, and assessed $20 and costs. He paid his fine and determined then and there not to "pick any more birds before they were ripe."

So you see the good work goes on. We have several cases "on the string." Have made some arrests, and are waiting until we have time to try them."

Last Thursday, acting upon information, Wardens Farnham and Coffin appeared in the fashionable restaurant of George Magee in St. Paul with a search warrant and went through the place looking for "Rocky Mountain owls" (prairie chickens). After a time they found five neatly dressed birds in an ice chest on a platter ready to do duty on the table of some of George's high tasting patrons.

The case will be brought to the attention of the courts in the near future and results reported later. The recent decision of the Supreme Court has greatly strengthened the Game and Fish Commission, and they are now extremely active and alert in enforcing the excellent and strong game laws of the State.

The executive agent of the Game and Fish Commission recently determined to search the cold storage warehouses of the State, and he found at one of them a large number of birds, which he took possession of for account of the State.

The birds were the property of some of the most prominent citizens of the State. The recent decisions of the Supreme Court in regard to "having in possession game out of season," although killed "in season" has put a formidable weapon in the hands of the Commission for preservation of the game of that State. Heretofore it has been the custom to kill an unlimited amount of game and place it in cold storage and then to ship or use it after the open season is long past. The Commission propose to put a stop to such practices now if possible. MINNESOTA.

---

## Illegal Fishing in Pennsylvania.

IT is charged that fish spears, gill nets and set nets have recently been used in Harrisburg and vicinity, contrary to the law and with deadly effect even under the nose of a very energetic fish commissioner. Eleven boats were out along the west shore of the Susquehanna, spearing eels, bass and pike-perch (locally known as salmon). The men took nearly a half-barrel of fish. Paxton Creek was also the scene of a raid with nets into which catfish, suckers, eels, carp and bass were driven by beating the waters. The fish were sold in the Harrisburg markets and it would appear that a slight inspection of the stands might reveal at least the marks of the spears. At all events the enterprising newspaper man makes the discovery and wonders why the authorities charged with the execution of the laws have not seen as much.

---

## Fishculture Notes.

VERMONT has appropriated $500 for a new hatchery which will be located at New Durham on a brook near Mount Bet Cottage and in the vicinity of Merry Meeting Lake. The site is said to be an excellent one but the amount appropriated is much too small for an efficient hatchery. At the best the establishment will answer only for hatching trout in moderate numbers, and will be open a few months in the year.

New York will have a new hatchery building at Rockland. Commissioner Huntington has been authorized to accept the building from the contractors and to equip it for trout propagation. There is grave question whether the Beaverkill water can be utilized for the hatchery on account of its high temperature, and the supply may have to be taken from Darbee Brook or the outlet of Russell Pond.

Fish Commissioner A. F. Johnson, of Elizabethton, Tenn., obtained 500 trout from the U. S. Fish Commission three years ago and deposited them in Heaten Creek in Carter county. He reports that they have done well and he has seen some over 12in. long caught in the creek.

Gov. McKinley has appointed E. H. Shorb, Van Wert, Ohio, one of the game and fish commissioners of the State. Mr. Shorb has spent much time and money in the introduction and rearing of English pheasants and partridges, and is an enthusiastic sportsman as well as a believer in the protection of fish and game.

Five wagon loads of bass and pike were delivered at Waupaca, Wis., Aug. 17, for the chain of lakes at that place, by the State Fish Commission.

Superintendent W. W. Barrett, of North Dakota, is trying to have a fish hatchery established by his State. At present all the fish used for stocking are furnished by the U. S. Fish Commission. Devil's Lake and many other waters will soon be supplied from that source. In connection with Capt. J. W. Palmer, Mr. Barrett will visit Fort Totten to examine the springs of the locality.

The State of Oregon has a board to locate the new fishway at Willamette Falls, near Oregon City, it includes Governor Pennoyer, Treasurer Metschan, and Secretary of State McBride. They were to meet with Fish Protector H. D. McGuire on Aug. 10 to select a location. The Legislature made an appropriation of $10,000 for the fishway, which will consist of a series of connected pools excavated in the solid rock on the west side of the main fall when the water is low. In this way a gradual slope will be formed up which the salmon can readily pass when the water is high. The board has the power to remove all obstructions, artificial as well as natural, whether fish wheels, nets, lines, or other apparatus, within 50ft. of the fishway. The maintenance of such obstructions will constitute a misdemeanor, punishable by fine or imprisonment or both. The builders of the way must agree to keep it in good order for two years after its completion.

The appropriation for the Maryland Fish Commission is $7,500, a reduction of $2,500 from the amount of the previous year; but as the sum now cut off was devoted to paying for captured eels the loss will not be seriously felt. Commissioner Sudler has devoted considerable time to practical study of fish hatching stations in other States and will utilize the knowledge thus gained for the benefit of his State. T. H. B.

# The Kennel.

## FIXTURES.

### DOG SHOWS.

Sept. 4 to 7.—Des Moines Kennel Club, at Des Moines, Iowa. M. Bruce, Sec'y.

Sept. 10 to 14.—Toronto Industrial Exhibition Association, at Toronto. C. A. Stone, Sec'y.

Sept. 10 to 14.—Pittsburgh A. C. Kennels, at Pittsburgh, Pa. A. A. Batchelor, Sec'y.

Sept. 18 to 21.—Rhode Island State Fair Association, at Cranston, R. I. W. W. Dexter, Sec'y.

Sept. 18 to 21.—Orange County Agricultural Society, at Newburgh, N. Y. D. A. Morrison, Sec'y.

Sept. 19 to 22.—Orange County Fair, at Newburgh, N. Y.

Sept. 26 to 30.—Stockton Kennel Club, at Stockton, Cal. John Hefferman, Sec'y.

Oct. 2 to 5.—Danbury Agricultural Society, at Danbury, Conn. C. M. Rundle, Sec'y.

Oct. 30 to Nov. 2.—Terrier Show, by New England Kennel Club, at Country Club, Brookline, Mass. D. E. Loveland, Sec'y, 128 Tremont street, Boston.

### FIELD TRIALS.

Sept. 5.—Manitoba Field Trials Club, at Morris, Man. R. J. Gallaugher, Winnipeg, Sec'y.

Oct. 23.—New England Field Trial Club, Members' Sweepstake. A. R. Sharp, Sec'y, Taunton, Mass.

Nov. 5.—United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 6.—International Field Trials, at Chatham, Ont. W. B. Wells, Sec'y.

Nov. 23.—Eastern Field Trials Club, at Newton, N. C. W. A. Coster, Saratoga, N. Y., Sec'y.

---

## Dogs and Bathers.

*Editor Forest and Stream:*

I have noticed some sensational accounts in the daily papers this summer of men and children being attacked by large dogs while bathing. In no case have the first lurid reports been either sifted for the exact truth or followed up by reports of further action or prosecution against either the owners or the dogs. Some of the accounts—notably a very circumstantial one of an attack by a St. Bernard on a boy in the lower Hudson—bore unmistakable evidence of error, exaggeration or falsehood upon their face, and could not have been penned by any one familiar with dogs, for I

think all loving observers and students of canine nature will indorse my assertion that no dog ever attacked a human being when the latter was swimming. The particular account that I have alluded to above stated that a large St. Bernard, standing with his owner on the river bank, after watching some boys bathing, suddenly sprang into the water and made for the boy furthest out and attacked him viciously, both treading him under water and biting at him. After the details of a "fight," beyond the depth of either dog or boy, it stated that both in some way reached the shore, that the dog again sprang at the boy and tore him, and that then, for the first time, his owner interfered.

Who that knows anything of large dogs on reading the above, which I condense from memory, can not at once picture the scene more truly than the reporter does, and aquit the dog? Since I was ten years old I have owned dogs of various large breeds and no matter how obedient any one of them may have been while I was on land, or not beyond my depth in water, I found it simply impossible to swim a stroke n deep water with one of my dogs anywhere about. No command, no threat, would keep the noble and devoted animals from me the moment I struck out, and they always knew, unerringly, when my feet lost "bottom." I never had any difficulty except with the first dog—a monster, half mastiff, half great Dane—but the callow observance of a ten-year-old boy enabled me to understand him and prevent any rouble in the future. The very first time he came for me I was a little frightened at the situation and tried to swim away from him and make the shore in a semicircle, the very worst thing I could have done, the very worst thing a man or boy can do under the circumstances. Of course he could see only the back of my head, and of course he rapidly overhauled me, and equally of course his forefeet (innocent of any intention on his part) first struck my sloping back, and it was scarred by his claws and I was driven under water. Luckily I gained foothold in shallow water almost immediately. To this day I am a little proud that, at that age and in spite of my pain, I resisted the temptation to whip him and went at once to experimenting. I soon found, as I have said, that it was no use to try to keep him on shore, or to try to convince him that I was in no danger and could take care of myself in deep water. It was not his business to learn that, and he was a strictly "business dog." But I also found that whenever he saw fit to interfere and pull me out of the water, if I would pause and either float or stand upright in the water at his approach, I could easily turn which side I pleased to him and that then, if I calmly extended an arm on or above the water, in front of him, he instantly gripped it with a firm, but not at all a painful grasp, and as I always et him come up behind me, I could easily and comfortably swim in with my other arm and his assistance. I may add that I have found the same course to answer in every case and with all kinds of dogs, my dogs and the dogs of others. I would urge upon every one who may read this, that moderate degree of presence of mind required to meet such an emergency.

And now, to picture the scene of the report which I have criticised above. Can we not see the nervous and anxious St. Bernard watching these boys, restrained by his master until the usual cries and noises and the distance of one boy from shore (perhaps he may have even pretended to sink and to call for help as boys will) made this noble and self-sacrificing animal decide to disobey? Reading between the lines, can we not picture his impetuous rush and plunge? His white muzzle pointed straight for the boy's head, or the spot where it disappeared? Can we not almost see the powerful strokes of the broad, webbed feet as he breasts the river? As soon as conscious of the approach of the dog, the boy has probably turned, with another shriek, and the dog swims silently and grimly at the back of the head in front of him. Of course, the boy's back is first touched and scored; of course, he is forced under water (which would not have been the case had he held out an arm for the dog to sieze, for the latter would have turned beside the boy to seize it, and his fore feet would have had free room to plunge).

The boy comes up from his ducking, but is now terrified, probably has lost all presence of mind, and if he is a good swimmer probably has turned and faced the dog, thinking to fight him off. Remember the dog is there to save life, and for that purpose only. It is impossible to beat him off. If the dog ever reaches shore again that boy will reach it with him, that you may be sure of. But now the dog grabs for an arm whenever one is exposed (that is the chosen and best hold for a dog on an unclothed body), yet each of these attempts is thought to be a bite, and the whole is called "an attack" and "fighting." He now does just what any strong man would do; he stays there and tries to tire out the boy, who to him seems bent on self destruction. Remember that a really drowning person always flings the arms up, and you may be sure that even if the dog has to wait till the boy is really drowning he will bring him ashore by an arm. Reflect also that all the time the boy has been fighting off his true friend, those fore paws have of necessity lacerated the boy's legs, arms or chest, where contact occurred.

Of the subsequent "attack" of the dog when both have reached shore in safety, you may make what you choose. Say the boy had really hurt the dog in the water or coming out, or agree with me and set it down for a simple lie, that can be settled. But what I urge—nay, entreat—is that all who read this will do what they can to spread the understanding of a dog's purpose and the best way to assist him and to prevent injury or disaster when he is mistaken as to the need of his assistance. I reflect that once a dog thinks a person in the water needs assistance he cannot be shaken off if he is of any size. The best, therefore is to know how to help him to "meet him half way," literally. If the daily papers would copy this letter it may be the means of giving wider circulation to a knowledge that should be known.

TRACY GOULD.

TROY, N. Y.

### A Reporter's Duties.

IN alluding to Mr. Doyle's letter on fox-terrier size, that we mentioned last week, Mr. Lloyd in *Sporting Mirror* hits straight out from the shoulder on the subject of dog show reports in English kennel journals. He draws attention to the fact that men are employed to write up these shows who are interested in the animals exhibited and more than hints that they are biased in their critcisms. If any one on this side follows the career of a dog at different shows in England through the medium of the sporting journals he will surely become bewildered in the multiplicity of views expressed and no line can be formed as to what the dog is like, one can merely judge of the dog's standing from the number and character of his wins. The day of signed reports will surely come and then, and only then, shall we see some uniformity of opinion on a dog's merits, for hastily formed judgment on a dog's shape and makeup will no longer be shielded by the ubiquitous "we."

Kennel journals owe it to their readers that reports should be signed so that there may be no stabbing in the dark or self interests worked in. Of course there is some excuse for the present state of things in English reports. So many shows must be covered during the week and there seems to be such a mad hurry to get reports published the same week in which the show takes place that their reports must necessarily be written under the most unfavorable circumstances. Beyond a list of awards and a few of the general tems of interest connected with the show there is little good or gain in this "beating the record." One of Mr. Lloyd's paragraphs reads: "As a reporter of many years' standing, I have some right to write in this manner, and some knowledge of the subject I am on. I have met reporters at shows, employed by papers for the sake of economy, who have had little or no experience. It is millions that the persons alluded to have some interest in a dog or two, and if you watch carefully, and follow events, you will see that the very devil is put afoot. It was only a few months ago I noticed a certain animal cracked up to the heavens. The reporter, I am sorry to say, was interested in him. Now, these shams and frauds would soon be put an end to if the editors of newspapers were apparently not ashamed of the names of their critics, or the reporters themselves weak-kneed and brained enough to hide themselves behind that infernal 'we'."

We have a good deal of this sort of thing over here but we are proud of the fact that such reports are not admitted knowingly in these columns. Whatever mistakes are made, and we do not claim to be approaching the infallible, it is the mistake of honest conviction and not from interested motives. In writing reports it is not always necessary when a dog merits severe criticism to do so in a manner that will hurt either the feelings of the judge or the unfortunate owner. When a reporter from his experience and knowledge of the breed is certain of his ground his criticism cannot be too plainly emphasized but always in such manner that offence will not be taken by those interested in the dog. Many a budding fancier has been disheartened by such impolitic writing and no wonder he believes that the reporter has it "in for him" or is taking advantage of his novitiate. Then again we do not think it the office of a reporter to continually set up his opinion against that of the judge. The judge's appearance in the ring is, or should be, a guarantee that he knows something either as a "breeder and exhibitor" or through considerable observation at shows, of the breed he adjudicates upon, and his awards should always be criticised with a due regard to the opinion to which his position entitles him. This is too often lost sight of by the reporter whose opportunities for comparison are, at the best, not on a plane with those of the judge. There are exceptions of course: for instance when a dog, through nervousness or other causes, does not show himself to any advantage in the ring, while the reporter in going over the class quietly afterwards, is enabled to see points, good or bad, as the case may be, which escaped the judge during the excitement in the ring.

A number of exhibitors have an idea that a reporter's mission is solely to criticise the judge; if their dogs are set back the reporter is primed with material for a scathing criticism, at the first opportunity. If he is sensible he will listen demurely and write his own report afterwards; he will thus command the respect of both loser and winner in the end. This is suggested by our own experience; he who essays to report a class of say bullterriers—we do not mean to be invidious—and listens to all the contrary suggestions he will be loaded with down the line of benches, will soon find himself hopelessly muddled and he had better stick to his own individual opinion—even it be a wrong one. He will at least have written intelligently to himself.

---

While on this subject we might as well allude to the custom of merely reporting on the winners in a class and leaving the great unwashed, represented by the lower cards, to the imagination of the readers. Many times a careful review of the highly commended dogs will show grave errors of judgment and the reporter is able to apply a little balm to the ruffled feelings of the owners who know their dogs ought to have been higher up. Further, the owners of the lettered dogs are as a rule the very men who should be advised of the faults or good points of their dogs and the reason they were not placed higher. Again the man who makes the same stereotyped criticism on a dog that appears frequently at shows shirks his duties, although exigencies of space often demand that something shall be cut short, and these are the dogs that are generally sacrificed to that end. Still a reporter is not always to blame if his criticism on a certain dog is not always the same, and this has often been made much of by those who should know better. Dogs have their moods and conditions, like unto men, and a little less flesh or a little more will often in a very short time exaggerate or modify a fault that had been overlooked before or not so apparent. Still when opinions are changed some explanation is due for the writer's own sake. A conscientious, careful, unbiased reporter need not be afraid to write candidly, and with right-thinking men neither his paper nor he will suffer.

---

### Bone Producers.

AS WE from time to time have queries from our readers as to the best means of improving the bone in their puppies it would be well to draw greater attention to the benefits derived from the use of precipitated phosphate of lime. This agent is considered by more than one breeder of large dogs that we know of as far preferable to bone meal, which is difficult to assimilate, especially in puppies of a tender age. Mr. Wiggins, the breeder of the Alton—Judith litter of St. Bernards, is convinced that this agent is mainly responsible for the great bone that most of his young stock possess, as he commences to give this powder to the mother directly after service.

"Ashmont" in "Kennel Secrets," in which work elaborate instructions are given on the care of the dam when whelping, says: "To give the precipitated phosphate of lime—a product of bones—during the period in whelp is advisable, especially to large breeds, the offspring of which in these days are notoriously 'deficient in bone' and singularly liable to suffer from rickets."

Precipitated phosphate of lime is a white, odorless powder and may be mixed with the food once daily during the first month of gestation and twice daily from then on until the puppies have been weaned. For large dogs an even teaspoonful is the dose, slightly increased during the month before whelping, if a large litter is expected; and in lesser proportion for smaller breeds. If this procedure has not been pursued it is a good plan to give the powder to the puppies after weaning, say at seven weeks old, or earlier, if there are signs of deformity. The dose is a quarter of a teaspoonful for each dog once a day, with the last meal. If there is a decided tendency to deformity give the powder twice a day and increase the dose to half a teaspoonful. Breeders of fox-terriers, and in fact all breeds of dogs with whom good bone is a distinct advantage for show purposes, would do well to try this preparation.

---

We did not think it worth while to allude to Mr. Howard's letter in a contemporary, wherein he sought to defend himself on the "bribery" question by publishing the letter he sent to Mr. Elliott, over his own signature. We thought after that the case might well be left to the judgment of those who were interested in the matter; our duty was done when we called the attention of the kennel world to this attempt at bribery. The English *Stock-Keeper*, which follows events in American dogdom very closely, has this to say and probably echoes the views of most men on the subject: "Running our eye over the kennel columns of *Turf, Field and Farm* we came across an astonishing letter under the heading of 'That Bribery Case!' A Mr. T. A Howard, of Columbus, O. (we think he deserves the fullest description), dallies with the question of whether he attempted to bribe a judge. We have read the letter, and if it does not amount to bribery then all we can exclaim is what in the name of corruption is the use of an English dictionary? However, we are pleased to see that the American Kennel Club is to have an opportunity of elaborating Mr. Howard's neglected education." We do not believe that any one has as yet made any direct charge before the A. K. C. in this case, but as Mr. Howard is a delegate to that body it would seem as if some action should be taken, if only as a matter of courtesy to his fellow delegates.

## DOG CHAT.

The English setter Mandan, well known to show goers in the West a few years since, has joined the large majority. He was eleven years old last June. Mandan was owned in former years by "Dick" Morgan, who sold him to Mr. C. E. Sheldon, of Akron, O., who owned him at the time of his death. Mandan was a good show dog, winning many prizes, and as a field dog it is said that few could surpass him.

---

In the Ladies' Kennel Association recently organized in England, there are nine ladies of title, whose patronage tends to give both eclat and material aid to the Association, and there are already 64 influential exhibitors who have joined the club. Mr. George R. Krehl has laid the foundation for, we hope, many happy tête-à-têtes by donating a tea service to the Association. The club's debut will be made at the Crystal Palace show next month.

---

In a whippet racing handicap, held recently in Lancashire, England, there were 260 entries for a purse of $100. This shows to what extent this exciting sport obtains in that part of England in which the whippet racing originated.

---

Some people have peculiar ideas as to the mission of an advertisement. One prominent breeder writes us that while he agrees with us fully in the merits of FOREST AND STREAM as an advertising medium, says there has not been a demand this season for dogs of the sort he breeds, and "with forty dogs in one's kennels the demand for grub eats into the surplus rapidly, and about all one can do is to whistle to keep up his courage while passing through the woods." This is a funny argument and calculated to make one appear like the picture of the man who doesn't advertise—all wrinkles and care.

---

The man who does not advertise now is looking backward. when business is slack that is just the time to advertise most.

---

In the past year or two there has been some trouble at Canadian shows through exhibitors from this side of the border showing challenge dogs in the open classes at Canadian shows where challenge classes have not been provided. American exhibitors should bear in mind the Canadian rule that dogs eligible for challenge honors are not allowed to compete in open classes in the absence of a challenge class for their individual breed.

---

### A Notable Terrier Transfer.

Mr. H. H. Hunnewell, Jr., the owner of the Hill Hurst Kennels, though well ahead of competition in the way of brown poodles, has not been so successful hitherto with his wire-haired fox-terriers; his Oakleigh Bruiser, until the advent of Bushey Bramble, being his main dependence as a prize winner. He can now claim to hold a full and winning hand, having just purchased Cribbage, Sister Janet (late Surrey Janet), Sister Pattern and Brittle from Mr. H. W. Smith, of Worcester, Mass. This team, with Mr. Hunnewell's Oakleigh Bruiser and Bushey Bramble, places that gentleman's kennel at the top of the heap, for these dogs represent the cream of the fancy in this country. While congratulating Mr. Hunnewell upon his plucky purchase, we do so with a shade of regret if it means the retirement of Mr. Smith from this booming fancy. Wire-hairs rated along in a very desultory fashion until the Worcester fancier gave the needed fillip by importing such cracks as Cribbage, Janet and Pattern, and the influence of such importations was clearly seen in the increasing entries at some of the spring shows. The news of this important transfer was received a few hours too late for our last week's issue.

---

It is said that there are over 600 lady exhibitors at English shows. No wonder they want to have a say.

---

Mrs. Samuel Jagger, of Honley, Yorkshire, whose husband is now on a visit to this country, will be the third woman to "don the ermine" at a show on the other side. Mrs. Foster, the well-known Yorkshire exhibitor, and a clergyman's wife in Scotland whose name does not occur to us at this moment, were the first and only ladies to carry out this mild form of woman suffrage. Mrs. Jagger is to judge at Belfast show. It is very likely that when Mr. Jagger returns to this country next January he will bring his wife and their crack St. Bernard bitch Frandley Stephanie back with him. In that event Stephanie will be exhibited at New York and other spring shows.

---

From Aug. 10 to 30 there are thirty dog shows scheduled to take place in England and Scotland.

---

Pet dog exhibitors have been very busy last week in England, for one of the largest gatherings of toys and other dogs was to take place at Brighton. The specialty clubs devoted to the principal pet breeds made a grand display of challenge cups and other specials. The Toy Spaniel Club offered about 31, the two pug clubs nearly as many, while Pomeranians were not far behind, to say nothing of Yorkshires and schipperkes, for the latter of which there were two challenge cups and a number of useful specials in cutlery and cash. We mention this just to show the standing over there of some of the breeds compared to the general lack of interest in the same breeds in this country. We have a Pet Dog Club, but it does not seem to make much headway. The "paucity of judges" for these breeds may have a good deal to do with this, for, to tell the truth, the pet dog classes seem to be looked upon by the average show committee as necessary evils, the classes being tacked on to some good-natured judge willing to take them on with the rest of his assignments, and as a rule the prizes are miserably small. If the Pet Dog Club would make an effort to have judges appointed in whom they have confidence, we are confident that an improvement would soon be apparent in some of the classes that at present are lamentably weak.

---

The Pennsylvania State Sportsmen's Association have been making an effort to secure better terms for the transportation of hunting dogs on the Pennsylvania lines. Their suggestion was to have dogs checked in the same way as baggage, charging 25 cents per check on each division of the road. The passenger on purchasing his ticket to be allowed to purchase these tickets at 25 cents each, the checks to be attached to the dog's collar, and each divisional baggage master to detach the check for his particular division, and collect the 25 cents for the same at such stations as the company would designate. Thus a passenger from Philadelphia to Pittsburgh would buy three checks stamped Harrisburg, Altoona and Pittsburgh respectively. This plan would save the trouble of seeing and feeing the baggage master on every division, which is such a nuisance, especially when traveling at night. The idea, which seems a good one, did not, however, meet with the approbation of the railroad company, and no change will be made at present.

---

The recent dog show held in Zurich under the auspices of the Swiss Canine Society, gathered together 824 entries. St. Bernards, the different sporting dogs of Switzerland, dachshunds and fox-terriers were the principal breeds represented. So great was the success of this first venture that the society intends to give a large show at Geneva next autumn. The Federal Government has subscribed 25,000fr. for the purpose.

---

The French journal *La Chenil* tells rather a funny story

in the issue just received which shows the wide range of possibilities in regard to an extended use of the telephone. A master baker in Berlin owned a poodle called Phlox, noted for its intelligence. An employe also owned a female of the same breed, and Phlox often absented himself from home and spent his days at the home of the baker's man. One day the baker took Phlox with him to a neighboring village, and on his return passing near the street where his employe lived, he was not surprised when his dog left him, and returning to his home alone supposed the dog would soon follow. Evening came on, and it was getting late when he thought he would telephone to the man to send Phlox home. He did so, but the man answered that he had tried every means to send the dog off, but he would not leave. The baker then resolved to go for him himself, but a sudden thought struck him, and returning to the telephone and getting the connection, told his man to seize Phlox, bring him to the telephone and attach the receptors to the dog's ears. This was done, and the master gave *le coup de sifflet*, the cry with which he was accustomed to call his dog. The latter recognizing the sound, and evidently recalled to his duty, bounded out of doors and in a few minutes was home. What possibilities this opens up to some of the owners of the "high-class" dogs, the *modus operandi* of which will instantly occur to any one endowed with a little active imagination.

The Wankie Kennels will have a team of "Scotties" at Toronto show under the care of Mr. James E. Green, the manager. Messrs. Henry Brooks and Ames will also visit the show.

The fall dog shows when held in conjunction with the large agricultural fairs are always interesting events, and especially is this the case with the Toronto show. One would be hard to please indeed if he could not be interested in the "passing shows" that the Toronto Fair management set before their patrons. Outside of the dog show, for any one who is fond of horses and cattle, there is much to be seen, for some of the best horse flesh in the country is exhibited at this important fair, and the scene every afternoon and evening in front of the grand stand is probably more interesting and varied than at any other fair of this description.

The Englishman's abiding affection for his four-footed friends receives another illustration. In Hyde Park, the holy of holies of the London park system, is to be found a dog cemetery. It adjoins the park keeper's lodge at Victoria Gate, and contains at present about 80 graves. The cemetery appears to be a private speculation of the keeper, who takes the fees, provides the headstones, and performs the duties of a sexton. The ordinary charge for an interment is 5 shillings; the monuments, of course, vary. The keeper shows one which is said to have cost £5. The Duke of Cambridge has two dogs buried there, and he seems to have started this public institution.—*Boston Transcript.*

The Scottish terrier notes by "Stepping Stone" in the *Scottish Fancier* will prove interesting to owners of those smart little terriers. Scottish terriers are running a race with poodles in bidding for popular favor just now, and any hints from the "old hands" will no doubt prove useful to our breeders who are just entering the game. Speaking of ears, such important factors in the smart *tout ensemble* of a Scottish terrier, this writer says that some terriers get them up so much quicker than others. Worms very often keep them down, as he has no doubt they often make fox-terriers prick theirs. This is rather a contradictory theory, but there is no telling how the presence of these parasites injures a growing puppy. He says: "As the nerve of the ear strengthens, in the event of the puppy not getting up his ears in the orthodox manner, do not fail to try for worms. If that is not the cause, then the owner must use artificial means to get them up. Strong glue, melted and put on the inside of the ear, not too near the root, with brown paper, and not too hot to irritate the animal, is very good. Fold the ear neatly together, the edges on either side meeting exactly, and hold them in position until the glue has got quite hard. Leave this in until it wears off of its own accord." He also suggests a piece of Allcock's porous plaster as a substitute for glue, as the latter does not irritate the dog as much as the glue. This writer also gives some measurements of prize terriers at various stages of their growth which may prove useful to breeders as a guide in the way of comparison with their own stock:

| | Dog at 6 mos. | Bitch at 7 mos. | Same bitch at 9 mos. | Same bitch at 11 mos. | Bitch at 15 weeks |
|---|---|---|---|---|---|
| From tip of nose to inner corner of eye | 3 | 2¾ | 2⅞ | 3 | 2¾ |
| From said point to occipital bone | 5 | 4¼ | 4⅝ | 4⅝ | 4 |
| Round muzzle | 7 | 6 | 6¼ | 6½ | 5½ |
| Round chest | 16 | .. | .. | 17½ | 13 |
| Round loin | 15½ | .. | 16 | 16 | 13 |
| Round arm | 4½ | 4½ | 4½ | 4⅝ | 4 |
| Round skull | 11½ | 11 | 11½ | 11¾ | 9½ |
| Shoulder to root of tail | 12 | 14 | 14 | 15 | 12¼ |

We sympathize sincerely with Mr. N. Q. Pope, president of the National Greyhound Club, in the loss he has sustained through the death of his wife, which sad event occurred suddenly at Mechanics Falls, N. Y., Aug. 24. Mrs. Pope took a great interest in her husband's kennel of greyhounds and foxhounds, being thoroughly conversant with the different strains and familiar with their pedigrees.

Mr. J. R. Oughton, owner of the Dwight Kennels, Dwight, Ill., received, Aug. 20, a Gordon setter bitch from Mr. Robert Chapman of Glenboig, Scotland. She is by Heather Dean, and was bred July 7 to champion Heather Swell, before leaving Scotland. As Mr. Chapman's Gordons are always trained for field work this importation should be a welcome one to the Gordon fancy.

Mr. Chas. Kroeber of Brooklyn asks our aid in giving publicity to an effort that is being made by Brooklyn dog owners to have the licensing and impounding of dogs in that city placed in charge of the S. P. C. A. All those who are in favor of this are request to send their names and addresses to Chas. Kroeber, 767 Bushwick avenue, Brooklyn, N.Y. Mr. Kroeber says: "The system we advocate is the same as that in vogue in New York city, the strong points of which are: Any dog with a Society license will be allowed to roam unmolested; all dog catchers are uniformed, and they and their wagons are numbered. We are aware that there are several points in the law, such as population, etc., against us, but provided we get a good list of names to give us a good backing, we are promised success by the right parties. The population clause will be overcome through amendment by the Legislature." Brooklyn dog owners have suffered many indignities during the past years through the brutality and recklessness of the dog catchers, and any change in the method of collecting stray dogs in that city, that would prove to be humane and lawful, would no doubt be welcomed and the movement in question deserves the support of those whose dogs are continually in danger from the "grab all" tactics of the political dog catcher who does not hesitate to assault the owners so long as he gets the fifty cents for every dog he nets.

We regret to learn that Mr. J. D Shotwell, secretary-treasurer of the Collie Club, has been compelled by ill health to take a prolonged vacation. Mr. Watson, who gave us the information, also handed us a letter from Mr. Shotwell dated from Sugar Hill, N. H. What a rare place this would be to suggest to Senators as a vacation resort—in which Mr. Shotwell expresses a wish that collie breeders be notified of the closing of the sweepstakes for 1895. This is for puppies born between Nov. 1, 1893 and June 30, 1894. Entries close on Nov. 1 to be shown at the New York show of 1895. The entry fee is $5. Mr. Shotwell anticipates a return to his home on Hillside avenue, Orange, N. J., by Oct. 1.

The art of showing dogs, in all that the word implies, has almost reached perfection in England, but alongside of this *fin de siècle* smartness there are several very primitive relics of an age when the Kennel Club was in its swaddling clothes. One of these is the ring and post in ground system of "benching" at some of the one day shows. But a most reprehensible feature still in vogue at some shows, which are almost important, such as Chorley, near Manchester, where 172 fox-terriers were entered, is that of exhibitors sending in their entries without the names of the dogs. It is not necessary to point out what a wide door this opens for fraud and the running in of "ringers," and the many novice prizes that could be won under this slipshod method.

Mr. Geo Raper has been playing in rather hard luck lately if we may use such a term as "playing" in speaking of the lively round of showing, judging and reporting this veteran keeps up. Purchasing the Irish water spaniel Killanneal, said to have been a splendid specimen and a winner wherever shown, he had sent him to Chorley (Lancashire) show, but when the box was opened Killaneal was found dead. His good fox-terrier Raby Reckon also met with a mishap, and lameness prevents him from fulfilling his engagements. Mr. Raper has other strings to his bow, however, and from all reports he can turn to a phenomenally good young bulldog, Rustic Phenomenon, which he is showing just now. It is said to have an extraordinary large head, well wrinkled, with beautiful ears and shoulders, and being but eighteen months old only needs time to furnish into a grand specimen. There are no bargains to be picked up in this direction or we should advise our bulldog breeders to keep an eye on the dog. Mr. Raper knows the value of a good bulldog as quickly as anyone.

The Chesterfield Park Kennels, of Maywood, Ill., have had the misfortune to lose by death their St. Bernard Aristocracy, a very promising son of the late Aristocrat.

Rufford Ormonde's progeny is spready apace, a daughter of his having been shipped by Spratts Patent to a gentleman in New Zealand.

A new fox-terrier judge has made his début in England. This is Mr. S. J. Stephens, so well known as the owner of Stipendiary, Vice Regal *et al.* Though the critics speak well of his work on the whole, he is said to have made a slip at Chorley when he let champion Blackrock Radiance go without a card.

Whether wins count or not at Pittsburg the P. A. C. Kennel Club may count honors easy, for a Mr. Zinn, of East Liverpool, Pa., will show a family of dogs that were whelped without forelegs. Their propelling power is behind.

Mr. Ed. Booth, late manager of Col. Ruppert's kennels, came up from his Virginia farm last week and stayed over a few days before taking steamer to Hull, England, where he will stay with the old folks at home till next spring.

We very much regret to hear of another mysterious case of death at the Swiss Mountain Kennels. This time it is the rough-coated St. Bernard bitch Harmony, a litter sister to the better known Sunray. A week ago she was found dead in her kennel when the man made his morning visit to see how she and her three puppies were doing. Her appearance suggested poisoning and an analysis was made of the contents of her stomach with the result that arsenic was found.

Another old landmark in dogdom has passed away. A few weeks since we spoke of old champion Black Prince's rapid decline and Mr. Wilmerding's intention to accelerate his demise rather than let this good old field spaniel linger on. He died Aug. 24. Black Prince's honors were won before the American Kennel Club was established and when one win in the open qualified for the champion class. His life marked more than a decade, but the old dog was game to the last. The sight of a gun would rouse him from his cosy nook, and forgetting his rheumatism and other ills he would struggle along to do his duty in the field. Black Prince was by champion Benedict out of Madcap II., was whelped July 15, 1881, and during his career had won twenty-four prizes. He was bred by Mr. Wilmerding and knew no other master.

The Hill Hurst Kennels place their new purchases Cribbage and Brittle at stud, the former at $50 and the latter at $25. These, with Oakleigh Bruiser, represent the cream of wire-hair dogs so far seen in public. They also offer poodle and wire-hair fox-terrier puppies for sale; Oak Grove Kennels, Irish and English setter pups: W. L. Manderson, bull-terriers, beagles, etc.; Geo. W. Lovell, trained pointers and setters (Mr. Lovell is a good trainer and his stock can be relied upon); Jackson Kennels, Gordon setter pups; F. G. Tripp, toy bull-terriers; W. B. Stafford, pointers and setters in training, Redstone Kennels, Irish setters at a bargain. Wants: J., a well-bred bulldog; H. S. Higgins, thoroughly broken coon dog.

### Muldoon's Reformed Mastiff.

"You and I know that you can't teach people the folly of their ways," Mr. Muldoon was saying. "Why, dumb brutes have more sense about taking care of themselves than men. Take a horse for instance. If he eats anything that makes him sick you can't compel him ever to touch it again. But a man will smoke or drink himself ill and just as soon as he's well he'll do it right over. You can't make a brute do that.

"There was that big mastiff of mine. You remember him? When he was a pup I was bringing him from California and I stopped over in St. Louis. I was staying at the Southern, and they had there a little room in the back of the desk where men could go and sit down and drink.

"I was walking past there when some one called to me, and I went in and found John McCullough, the actor, a well known newspaper man, and a theatrical man, John Norton. They were all having a glass of wine, and when I went in, in answer to their call, the mastiff followed me. He sat down on the floor and looked at them. He looked very good-natured and funny.

"John McCullough took a fancy to him and offered him a drink. The dog drank a glass of wine and seemed to like it so John ordered a special bottle, and breaking up some crackers, poured the wine over them.

"The mastiff ate every particle of it, and for the rest of the night he was a frightfully drunken dog. He went staggering and falling over everything. The next morning he was just as frightfully sick. Well, do you think he ever forgot that experience, or was a fool like a man and wanted to repeat it? No; to the day of his death when he heard the cork drawn from a bottle he would get up, and putting his tail between his legs, would get out of the room as fast as he could, and if any one offered him a glass of wine it made him so mad that he would try to bite. But then men aren't like brutes," he concluded, musingly. "I know that, and I do love brutes," I said.—*Nelly Bly, in the World.*

There is one dog-catcher in Brooklyn who does not care how soon that city follows New York's example in the collection of stray dogs. There have been many complaints in past years of the atrocious conduct of some of the Brooklyn dog-catchers, but dog-catcher Thomas O'Keefe wears the boot on the other leg now. The other day this misguided young man captured a Polish Jew's dog and at once found himself surrounded by the Jew's family and a hundred neighbors. After striking him on the head with a bottle, his horse was unhitched from the wagon and the harness cut to shreds, and while he was trying to defend himself the crowd let the dogs out of the cage in his wagon, upset it and then carried Keefe to a telegraph pole, tied him fast to it and kept him there until the police freed him. Mr. O'Keefe feels injured and has resigned.

### The Homing Instinct.

The account of a dog finding his way to his old home from a distance of 20 to 40 miles, although not formerly acquainted with the road, is nothing very unusual, but when the distance reaches some 200 miles the event is worth recording. The following remarkable journey of a fox-terrier can be authenticated: A minister in a southern parish in Dumfriesshire got a fox-terrier sent him by rail from a friend near Elgin, Morayshire. After being captive a few days, he was let loose. No sooner did the dog find himself at liberty than he dissapeared; nor could any trace of him be found. To the surprise of the Morayshire people, he walked in one morning, looking famished, and lay down near the fire, and it was some time before he was able to taste food. It transpired, on exchange of letters, that he had been just seven days in traversing the distance, which, as the crow flies, is a little short of 200 miles. How he made his way to his old home is a mystery, but still an indisputable fact, as much as that he is alive and well there at this moment.—*Land and Water.*

A writer in the *Asian* who has been describing some of the English kennels for that journal, in an article on bulldogs of the present day, draws attention to the exaggerated type of some of the well known champions as follows: "In my opinion, the defects of the modern bulldog lie in an absurd exaggeration of the ordinary bull points; so much so that the dog is practically ruined for aught else than show, and this is not as it should be. The vocation of the bulldog may be gone, but it should nevertheless be bred as if it existed. The bulldog is the type of courage and muscular strength, no one wants it to be a galloper; but at the same time it should be reasonably active. It should be capable of exerting a high rate of speed for a very short distance, even if this speed be merely a matter of a series of springs, while at a slow pace, at a walk or jog trot, it should be able to travel a considerable distance. As a matter of fact, with its attenuated quarters, it is hardly able to make any spring at all worthy of the name; and with such quarters and crippled elbows, it presents such a poor figure at exercise that a man must be a very wretched walker if he be not able to walk a show bulldog off its legs. The bulldog Dockleaf, when brought into the show rings, flops down at once, and can scarcely be induced to stand up for two minutes together. He did this, to my knowledge, at the Aquarium, and again at Manchester, and it was not an easy matter to judge him. I should not have been sorry to have seen him dismissed from the ring, until his owner could prevail on him to keep on his legs and show himself. But, says the bulldog fancier, the bulldog should be "pearshaped," and he breeds him pear-shaped, until the wretched creature has scarcely any power in his hind limbs at all. Bedgebury Lion had nice-sized quarters, and stood on his hind legs as a bulldog should do, and the fancy said his quarters were defective and not lathy enough. Let the shoulders be outside the ribs, by all means, but don't let us have them swinging out from the body like a door on its hinges, or we cannot help crippling the animal for all useful work. I say that we can have immense width of chest, comparatively narrow quarters, short well-roached back, deep brisket, cut up loins and shoulders outside of the body, and yet an active, well-made dog, that would do all expected of it in the days gone by, when bull and bear baiting were in fashion."

### Large Russian Wolfhound Sale.

One of the most important transfers in the American kennel world was consummated last week. Mr. William Tulk, Jr., of the Terra Cotta Kennels, who came down from Hamilton, Ont., on purpose took back with him the Marlborough Kennels' whole team of Russian wolfhounds, composed of Ch. Argoss, Zerry, Princess Irma, Modjeska, Odrooski, Daiskie, Riga and two Argoss-Lobedya pups four months old. This represents a team of wolfhounds that has with one exception, Detroit, landed the kennel prizes wherever competed for this spring. Such crack dogs as Argoss, Zerry, Princess Irma and Modjeska, are household names in this particular fancy and Messrs. Kent and Tulk in securing such a team for Canada, must be congratulated upon their enterprise, and we trust that the success of the team will be continued. The price paid, as may be supposed, was a long one but not more than dogs of such merit should command. Mr. Huntington will, we believe, devote his fancier's energies to some smaller breeds. The Terra Cotta team will be benched at Toronto and will meet again their old antagonists from the Seacroft Kennels, with the exception of poor old Leekhoi, who met his last Waterloo at Louisville.

## Hunting and Coursing.

### FIXTURES.

FIELD TRIALS.

Oct. 23.—New England Beagle Club, at Oxford, Mass. W. S. Clark, Linden, Mass., Sec'y. Nominations close Oct. 1.
Oct. 29.—National Beagle Club. Geo. Laick, Tarrytown, N.Y., Sec'y.
Nov. 5.—Brunswick Fur Club. Bradford S. Turpin, Dorchester, Mass., Sec'y.
Nov. 7.—Northwestern Beagle Club. Louis Steffen, Milwaukee, Wis., Sec'y.

COURSING

Oct. 1.—American Coursing Club's meeting at Huron, S. D. L. Zutaverne, secretary. E. H. Mulcaster, judge.
Oct. 8.—North Dakota Coursing Club, at Oakes, N. D. A. P. Slocum, secretary. E. H. Mulcaster, judge.
Oct. 16.—Kenmore Club's annual meeting at Goodland, Kan. C. F Weber, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 23.—Western Kansas Coursing Club's meeting at Leoti, Kan. W. O. Allphin, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 30.—Cheyenne Coursing Club, at Great Bend, Kan. Ira D. Brougher, Sec'y.
Nov. 6.—Altcar Coursing Club's autumn meeting at Holyoke, Col. S. W. Vidler, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Nov. 14.—California State meeting at Merced, Cal. J. R. Dickson, secretary.

### A Run with the Awashonk Beagles.

*Editor Forest and Stream:*

After receiving our three representatives from the New England Kennel Club dog show, last April, we thought a little run would do them good and help to limber up their stiff joints, so concluded to take them out the next morning and see if we could get "Mr. Rabbit" on his feet. I woke up about 5:30 A. M. and found the morning rather misty, but it soon showed signs of clearing, and when I opened my door in response to a knock I found my friend Frank all ready to start. We soon got a pack of beagles together composed

four puppies, Zeno, Miss A., Bingo and Zip and their dam Daisy, and started for a tramp of about four miles to our first cover which was drawn blank.

We started for the next one and in about two minutes bunny was jumping for dear life with those five beagles all stretched out in line and making the woods fairly ring with the music that a lover of those little fellows likes to hear. There was Zeno singing bass, Miss A. high tenor and Bingo, Zip and Daisy taking the other parts and keeping in good time. Down along the side of the swamp they drove the game when it began to get too warm for him, so he cut through the swamp where it was very wet and then back again. Pretty soon he turned again and the dogs came to a check for a minute, but the band commenced to strike up again and up comes "Mr. Rabbit" in full view of Frank and I, giving us the full benefit of the race. First one hound would lead and then the other, pressing the rabbit so close that he took to a small patch of bull-briers, causing his pursuers some little trouble in working him out again. Finally we heard Miss A.'s high tenor bringing him back, and looking over to our right we spy the rabbit bounding like a rubber-ball back for the swamp.

Now they have all taken up his track again and it sounds as though there were fifteen dogs instead of five. On they go through the swamp for dear life, when all of a sudden there is not a sound to be heard for a few minutes, and we thought the hare had gone to earth for safety. Off we started to investigate, but had not taken three steps when we heard Daisy rout him out of his hiding place and start back with him; and then the other four pups struck in one after the other, and on they came, when suddenly all was quiet again; but not for long. The rabbit had doubled again and struck out across the open pasture for the next woods, a full three-quarters of a mile away. Then followed a race for life until they come to a small brook where the trail got mixed up, but finally it was carried across the brook to the railroad where we caught up and put their chains on them, as we were satisfied with that run for one day's exercise, as it was now eleven o'clock, and we were expected home for dinner.

Let us have more from our beagle friends, and not let the setter and pointer fanciers have it all their own way.

T. Shallcross.

### Higher Entry Fees.

*Editor Forest and Stream:*

Under the above caption Dr. Van Hummell, in your issue of Aug. 18, has commented upon the entry fees charged by the Altcar Coursing Club. As president of the club, I am pleased that he has done so. I would like to have others express their views. I fully agree with the Doctor in that the entry fees for the puppy stakes should be higher. Had the Doctor and a few others expressed these views earlier I have no doubt but that the Altcar Coursing Club's executive committee would have made the fees higher. In fact, they may do so yet if the coursing men desire it. The committee were governed, to a certain extent, in fixing the amounts as they did, by the example set them by the Kenmore Club (and I was informed that the Doctor arranged the programme) at Goodland last October. The committee branched out somewhat and left the old "rut" traveled by the older clubs, by making Puppy Stakes for both sexes and and establishing a Produce Stakes. They hesitated about increasing the entry fees for fear that it might be a failure. They also wished to see what would be the result of making stakes for both sexes before making any further innovations in their programme. Personally, I have no doubt, that had the Kenmore Club set the precedent of having high entry fees, that the Altcar Club would have followed suit. It is evident that the Doctor thinks the committee erred in following the precedent set by the Kenmore Club (and you must remember that the Doctor arranged the programme) at Goodland last October, as to entry fees for Puppy Stakes. In that I fully agree with him.

The Altcar Produce Stakes. I again agree with the Doctor in his views on the fees for the Produce Stakes. I advocated higher entrance fees, and am still in hopes that the excutive committee will raise them; in fact, I am quite certain that if a few more coursing men will come out and speak their views frankly (and we will not consider you presumptious for doing so), as the Doctor has done, and tell us how many entries you will make if the fees are raised to suit, the executive committee will give due consideration to such opinions and will fix the fees at such an amount as the majority deem best. They desire to make the Produce Stakes worth winning and will be only too pleased to have you, one and all, make such suggestions as you see fit.

Re cunning dogs. High entry fees will tend to keep them out and this alone in my opinion would be sufficient justification to make the entry fees higher. I again agree with the Doctor in hoping that our judges this year will not let any cunning dog win his course, be his name Lightfoot, Van's Peter or otherwise. L. F. Bartels.

Denver, Colo.

### National Beagle Club Trials.

Tarrytown, N. Y., Aug. 31.—*Editor Forest and Stream:* In order to avoid confusion, I will hereby state to your many readers and beagle owners that at the last meeting of the National Beagle Club of America it was voted that all beagles that will be placed first in the open classes at the New England Beagle Club field trials of 1894 will not be eligible to run in the open classes at the National Beagle Club of America field trials, to be held Oct. 29, 1894, at Hempstead, L. I., and they must compete in the champion classes.

George Laick, Secretary.

### To Hunt Wolves and Coyotes.

*Editor Forest and Stream:*

Would you be kind enough to inform me what would be the best hound to hunt and trail coyote and wolf with, or what should I breed to produce a hound that will trail and kill them? I want about thirty to forty dogs. How would a cross of English greyhound and foxhound do? Or would any of the readers of Forest and Stream give me the benefit of their experience in this matter? George Hammer.

San Antonio, Texas.

## HUNTING AND COURSING NOTES.

The premium list of the National Beagle Club's field trials is now in the mail. It is neatly arranged and contains all the information regarding the different stakes and rules for entering. Entries to all the stakes, excepting the Champion Stake, close Oct. 8, and attention is drawn to the fact that every entry must be registered in the A. K. C. Stud Book or an extended pedigree as far as can be ascertained submitted to the field trial committee. The club also reserves the right to reject any entry that from the best information obtainable and according to their judgment, is not a standard bred English beagle. While this sounds a little arbitrary, the club evidently does not mean to have a repetition of the "Pade" muddle.

• • • •

A welcome letter comes from Mr. Geo. F. Reed, of Barton, Vt., that will serve to keep the ball a-rolling on the beagle question. He writes: "Those that have must lose, is the old saying. Flash, by champion Bannerman out of champion Lou, whelped July 19, a nice litter of six dog pups sired by Sport, winner of first at Boston, 1894, in the 13in. class. On Aug. 24 four of those were killed by a young bitch that had a litter only a few days old in the next room; this bitch had never acted cross toward the pups before she whelped. I have read with interest the writings of the beagle men since we heard from the owner of Snyder. I can guess who tore up his manuscript, and I feel the same I think as he did. I have seen plenty of mongrels that were called good rabbit dogs, but I never have seen one yet that could be trusted where there was a flock of sheep, or that was good for anything on very dry running, or even in deep, damp snow where they would ball up. This part of our State is the home of the Morgan horse, and our 'Doctors' do not buy a horse expecting to get a roadster with a half cross of the Clyde, and I do not believe there ever lived a dog that could hunt four days in the week from September until March, with the kind of running my beagles have to take unless they had a three-quarter cross of the hound. September is close by, so that I can shoot a few rabbits in front of the youngsters and shall have to enter a few beagles at the trials, just to keep the judges from catching cold. I should much like to take in the Northwestern trials with some of my dogs, but it seems when the trials are through at New York there will be no time to skip to Michigan. I would sooner my dogs ran every day than take that trip on the cars. Spot R. is in season, but shall not breed her, for I want to have a little fun in the challenge class with her."

• • • •

It has been supposed for nearly two years past that the celebrated greyhound Coomassie, winner of the Waterloo cup in 1877-78, died in Mr. H. G. Miller's kennel, and what is left of this gallant greyhound is mounted in a glass case in that well known courser's home. Information, however, came to *Stock-Keeper* (Eng.) that on Aug. 22 a greyhound supposed to be Coomassie had fallen over the cliffs at Penarth, in Wales, and was found dead by a policeman. Her identity was seemingly established by the collar she was wearing, on which was engraved her name and the dates of her great victories on the Altcar flats. At the time of this Coomassie's death she was owned by a Mr. Bowring, of Penarth. Now comes the strange part. One of the *Stock-Keeper's* representatives meeting the trainer of the late Coomassie in London, gave him the above news, which was questioned, since he supposed that Coomassie had died nearly two years ago in Mr. Miller's kennel, as stated above. The question now is, when did Coomassie die?

• • • •

The Australian Waterloo cup was run off July 11. This is the chief event of the coursing year in Australia, and was brought off in the enclosure of the Victoria Coursing Club at Melbourne. The cup was won by Bloomer, who repeated her last year's victory, but is said to have been decidedly lucky in getting weak hares. She is by Livingston, winner of the cup in 1887, and runs back to the best English strains. The runner-up was Goldsmith, by Hedley—Sonnet, also descended from crack English strains.

Mr. L. F. Bartels is down at the Bartels ranch at Kit Carson, Col., breaking some of their youngsters to slips. Mr. Bartels has replied to Dr. Van Hummel, but the letter comes too late for this issue.

# Yachting.

## FIXTURES.

SEPTEMBER.

6. Rochester, Club Sail, Charlotte, Lake Ontario.
8. Sea Cliff, Ladies' Day.
8. New York Bay, Club, N.Y. Bay
8. Atlantic City Cor., Club Cup, Atlantic City.
8. San Francisco Cor., Cruise to Pacific Y. C. Regatta.
8. Philadelphia, Delaware River.
8. Cor. Phila., Wilkinson Cup, Delaware River.
8. Columbia, Club, Chicago, Lake Michigan.
10. Schoodic, Sail-off for Cup.
12. Hempstead Bay, Club, Hempstead Bay.
13. Miramichi, Race, Newcastle.
13. Rochester, Ladies' Day and Closing Review, Charlotte, Lake Ontario.
15. Winthrop, Club, Boston Harbor
15. Larchmont, Larchmont Cup, Long Island Sound.
15. Beverly, Club Cham., Monument Beach.
15. Phila., Pen., Mos. Boats, Delaware River.
15-16. San Francisco Cor., Cruise, Vallejo.
20. Plymouth, Club, Plymouth, Mass.
20. Plymouth, Club, Plym. Harbor
22. Squantum, Cham, Squantum, Mass.
22. American, Seaver Cup, Newburyport.
22. Atlantic City Cor., Trophy Race, Atlantic City.
22. San Francisco Cor., Sail to Sausalito.
22. New York Bay, Club, N.Y. Bay
22. Knickerbocker, Ladies' Day, Long Island Sound.
22. Cor. Phila., Jeanes Prize, Delaware River.
22. Phila., Final Race, Classes 1, 2 and 3, Delaware River.
23. San Francisco Cor., Sail Outside.
29. Miramichi, Race, Chatham to Newcastle.
29-30. San Francisco Cor., Cruise to McNear's.

OCTOBER.

6. Cor. Phila., Sweeps, Del. River
13. San Francisco Cor., Final Sail.
20. Cor. Phila., Club, Del. River.

The privilege of deciding the size of the challenger for the America's Cup is so manifestly to the advantage of the defender that it is hard to understand why, in demanding much that it is not entitled to, the holder has on all occasions neglected the opportunity which is thus presented. In the earlier of the Cup contests, in fact up to 1886, the challenge has come from an existing vessel, leaving no option to the holders; but since that year, on each occasion when a new challenge has been discussed—twice by the Royal Clyde Y. C. and twice by Lord Dunraven, representing the Royal Yacht Squadron—it has been within the power of the New York Y. C. to decide on the general size of the challenging yacht. Now that a new challenge is again a matter of certainty, this same opportunity practically exists.

There was a time, not many years since, when a challenge was looked upon by an influential portion of the New York Y. C. as something to be avoided in any practicable way; as involving, besides the risk of the loss of the Cup, a serious expenditure on the part of the club, of several thousand dollars, for tugboats, marks and lunches for the three trial and two Cup races. Fortunately the club has learned to appreciate the inestimable value of the series of races which have increased its membership from 450 in 1885, when Genesta raced for the Cup, to 1,050 this year; and to know that every dollar expended in Cup racing has been returned to it a hundred-fold, the debt of the former date being replaced by a very snug surplus to-day. This phenomenal growth of the club is not only so far in excess of the development of other yacht clubs, but so disproportionate to the amount of racing done by the club each year, an annual regatta and the cruise races, that it can only be attributed to one source, the distinction and prestige arising from the continued successful defense of the America's Cup. The very able business management which has brought the club to its present condition of prosperity is fully aware that the very worst thing which could happen would be the total cessation of contests for the Cup; and though the club as a body is by no means desirous of too frequent challenges, or from too dangerously fast boats, the international races are no longer regarded as a disagreeable necessity, but as the most important elements of the club's prosperity.

The exact conditions under which the challenge of last year was made by the one party and accepted by the other were so complicated and so differently interpreted by each side that it is impossible to say what may be the outcome of future negotiations for a race next year; but in challenging as it did at Lord Dunraven's request, the Royal Yacht Squadron has placed itself in a position where it can no longer effectively object on principle to the letter of the new deed of gift, and it is quite probable that some sort of an agreement, in nominal accord but actual violation of that precious document, will be patched up when the time comes; in the meanwhile it seems absolutely certain that a definite challenge will be sent before the last yacht of the summer fleet is out of commission. This is so nearly a certainty that a discussion of the terms and conditions is clearly in order.

The most important question, now that the former issue of the legality and fairness of replacing the original deed of gift by a new and very different one has been waived or conceded by the Royal Yacht Squadron, is the size of the challenging and defending yachts; a matter in which both sides are deeply interested, but which is, on the whole, of more importance to American yachtsmen than to their opponents. To British yachtsmen the building of one yacht to challenge for the America's Cup may mean much or little; it may direct the attention of yachtsmen to a certain size which will be the particular class of the year, or quite as probably only one or two boats may be built; on this side, however, it means the creation or revival of some one class of large yachts which will be the central feature of the season's racing; and which, possibly, may retain its popularity for more than one season.

In discussing the question of the most desirable size, there are three points that call for special consideration. First, the size, or class in which the defenders are relatively strongest as compared with the challengers; secondly, the size which will bring about the greatest permanent benefit to American yachting; and, third, the rights of existing yachts. There may be other minor considerations, but these three are the vital ones which now demand the attention of yachtsmen, and especially of the New York Y. C.

The first point has been, practically, the only one thus far considered by the club in declining various challenges and in restricting the contests to the mythical "90ft. class." The superiority of the American yacht of 80ft. and over to the old tonnage rule cutters of the same length has been amply proven, so far as it goes; but the other argument on the same side, based on the performances of Madge, Clara and Minerva, to the effect that British designers were really stronger in American waters in the 53ft. and smaller classes than their American rivals, is, in our opinion, of far less importance than it is generally held to be, such sizes being entirely too small for Cup racing; and with the construction of Gloriana, Wenonah and Dacotah it has lost whatever force it may have formerly possessed.

It may be safely said to-day that neither side would willingly race for the Cup with a cutter of less than 60ft. l.w.l. nor over 90; and the argument is really limited to these extremes.

The immediate possibilities are three; the building of more yachts of the present length, 87 to 88ft. l.w.l.; the building of a challenger, and consequently of other yachts, up to the full limit of 90ft. l.w.l.; and the return to the size of fifteen years since, about 70ft. l.w.l. In various discussions of this question it has been urged that American designers are specially strong in one class, as the 87ft., and correspondingly weak in others, as the 70ft., not having worked in the latter class for some years; or that they would be even better prepared to go to the full limit of 90ft. In our opinion, the strength on the American side lies not in the supposed excellence of any designers in one size rather than another, but in the size which will call out the largest fleet of yachts, and of them the largest number of individual craft and the smallest number of "syndicate" boats.

The backbone of Cup defense to-day is Mr. N. G. Herreshoff, and in view of Wasp and Gloriana, it is idle to say that the chances are better n the 87ft. class because he has never designed a 70-footer. So far as the lines and the leading features of the design are involved, it matters nothing to the modern designer whether the length be 46ft., 60ft., 70 or 90ft.; he is quite as much at home in one as another. There is, however, an increased difficulty as the size grows, in that the constantly expanding sail plans in even the largest sizes, with the strong competition in cutting down weights, make the mechanical features of the rig more of an experiment than in the smaller classes. The fleet of last year, including Vigilant, who was rerigged three times, was notably weak above the deck, as witnesed in the failure of Jubilee, the many breakages of Pilgrim, and the radical strengthening of the rigging on Colonia and Vigilant. Those designers who have had experience in the largest class, profiting by their many failures of last year, would undoubtedly be much better fitted to try again, even in a 90 footer; but they are very few in number, and there are others who should be represented in the next trial races, who have missed this special experience in the largest size.

We fancy that most yachtsmen will agree with us that syndicate ownership, though necessary at times, is in every way an undesirable feature of modern yacht racing, and that the real interests of the sport are far better served when such men as Com. Morgan, Mr. Iselin, Mr. Duncan, Mr. Belmont, Mr. Rogers, Mr. Palmer, and the Adams and Bryant brothers are sailing their own yachts, rather than drawing checks for their share of one or two syndicate boats. Without arguing this question, however, we would point out that after the costly and largely unsatisfactory experience of many members of the recent syndicates, it is likely to be a difficult matter to get together even two or three syndicates next year to put up the very large sum necessary to the construction and successful racing of a very large cutter.

The total expense of building and racing Vigilant last year has been estimated at $125,000, and this figure is probably near enough to the true amount. From this may be deducted the selling price, $25,000, leaving a net loss of $100,000. Judging from Vigilant, to go into the next trial races with a fair chance of success a cutter of the same size should be built wholly of Tobin bronze, instead of only partly plated with it; she must have at least three complete outfits of spars and sails; and she should have, in place of the crude experiment of the Hattie Palmer, a fast, staunch and powerful steam tender, of special design, fitted with cargo booms and deck winches, special towing bitts, a galley and messroom, with berths for fifty men besides her own crew, a complete diving outfit and a fairly well equipped machine shop, with portable drills and other tools driven by dynamos, offering every facility for handling and repairing the centerboard. This may seem like a fancy sketch, but it merely means the doing properly and systematically what has been done in a haphazard and defective way with Vigilant this year and last. The expense of such a tender might be lessened by her use in common by two or three yachts; but at best a new 87-footer must cost considerably more than Vigilant, and perhaps be worth even less after the races.

All sentiment apart, the modern racing yacht is nothing but a one-season toy, almost equally worthless whether she wins or loses; she may, by such a chance as this year, put in a second season without being outbuilt on the one hand or laid up for want of a competitor; but if she is built to win under existing conditions her racing life is a short one and her sale value equally small.

The interests of yacht racing at large are hurt more than they are helped by the spasmodic expenditure of extravagant sums on a few yachts, followed for an indefinite time by a penitential spasm of enforced economy which leaves them to rust at their docks while all racing languishes. From our knowledge of the past work and training of American designers, we have not the least doubt that they are one and all to-day, even stronger in the 70ft. class than in any other size,

and that, compared with British designeas, the American 70-footer would be relatively as good as the American 87 or 90-footer.

What is of vastly more importance is the fact that while a challenge from one of the larger sizes would mean, as last year, a scurrying among the millionaires to organize a few syndicates, a challenge from a 70-footer would start the laying of keels for at least half a dozen individual owners, insuring probably twice as many new yachts for the trial races. The success of Vigilant last year is an exception in the history of syndicates, not forgetting Puritan, and we look upon the general dependence upon the aid of men of wealth and patriotic feeling, but not thorough racing owners, as the weakest spot in the defense of the Cup.

---

THE popular opinion of the America's Cup places it as an emblem of supremacy over a rival nation, and its true value and most important function has been largely lost sight of. Properly used, in accordance with the words and wishes of the original owners, which have been so dishonored of late years, it is the most powerful instrument that could be devised for building up and strengthening the home fleet, of New York and the whole coast. Its power was never better shown than last season, when at a time when business was seriously depressed and yachting was feeling the effect, together with a dullness due to other causes, it brought out, at an unheard-of expense, a fleet of four yachts, of a size and type that nobody wanted, and all practically useless save for the very few races sailed last year. It was the America's Cup that brought forth Puritan, and so drove out forever the old American sloop, replacing her with a far better type, which it further improved in Mayflower and Volunteer; it is to international racing that the great improvements of recent years are due.

Enough has been seen of the large single-stickers, from Puritan to Vigilant, in the course of ten years, to prove that such a class is not adapted to the wants of American yachtsmen; of the many who have gone into it, only one, Gen. Paine, has stayed; and while it has served for some important experiments (one being how to get the poorest schooner for the most money), it is a matter of opinion whether half of the gross cost of the class would not have given far better results if expended in building up a fleet of 70-footers.

Even in this smaller class, the cost of a modern racing cutter would be enough to make some good racing men count up carefully before placing an order; but there can be no doubt that the 70-footer would not only be well within the means of many keen racing men to whom an 87-footer is out of the question, and that such a yacht would suit the general requirements, not only for racing, but for such use between times as American yachtsmen have had in the past from all classes of yachts, for summer life about the Sound. Of all classes ever existing in American waters, the 70ft., as typified by Gracie and Bedouin, has been the most popular and serviceable; and the America's Cup could be put to no higher use than in restoring the class to existense.

---

IF it can be proved that the chances are quite as sure in the smaller as in the larger classes, and that even more good would result to yachting, the desirability of inviting or at least accepting a challenge from a 70-footer can hardly be questioned; but at the same time the moral rights of existing yachts have been urged against any change. With Pilgrim a steamer, Colonia on the sale list and Vigilant's owner as reported, ready to replace her with a new yacht in the event of a challenge, the matter narrows down to two yachts, Jubilee and Navahoe. The position which Gen. Paine has won by his thrice successful defense of the Cup for the New York Y. C. entitles him to every possible consideration, and no doubt a word from him would carry more weight with the club than any argument on either side, while Mr. Carroll is also entitled to a voice. It is quite uncertain, however, that Gen. Paine is really desirous of testing Jubilee again in trial races; and even if he were, there is every reason to believe that the construction of three or four new yachts of the same size for next season would leave all existing yachts, especially those with steel bottoms, among the hopelessly outbuilt. If there is any future for the 1884 fleet under a cutter rig (short of their conversion into a bad size of schooner) it lies not in competition with new and improved yachts, but in further racing between Vigilant, Navahoe, Colonia (with a deeper keel), Jubilee (with an entire new rig) and Volunteer with some very essential improvements in her rig. The building of several new yachts to the class would probably kill all racing of the present fleet; but on the other hand, the construction of a new fleet of 70-footers would leave undisturbed these five good yachts, each capable of such improvement as would put them on fairly equal terms.

---

ONE of the strongest arguments in favor of the 70-footer, an advantage which will appeal to both sides, has not yet been touched; the lessening of absolute draft to a practicable working limit, while at the same time the proportionate draft is ample for windward work. If all considerations of expense be disregarded, it is possible, for a few special races, to carry such a draft as Pilgrim, 22ft.; but such a vessel is absolutely useless for any general racing.

The deepest of the new keel boats, Valkyrie and Britannia, draw almost 17ft. 6in., and the centerboards of the same class draw over 13 with board housed and 23 with board down. For a few match races these drafts are practicable, but they are far from desirable at all times, and any general racing of these large boats must result in material alterations in many club courses. This year there have been frequent complaints that the courses in British waters which have been sailed for over half a century by the largest keel cutters and schooners were not deep enough for the American centerboard boat.

The great size and extravagant sail plans of the modern racer demand a comparatively large draft on any given waterline, and the day has gone by when designers will sacrifice the speed of a large yacht to any consideration of convenient draft; such a mistake as was made in Thistle in 1887 and Colonia last year is not likely to be repeated; nor is it at all desirable that a fine model should be spoiled for lack of sufficient draft.

The return to the 70ft. class means a reduction of absolute draft in the keel model of from nearly 18ft. to about 13; the extreme limit found in actual practice up to the last year, very few of the largest yachts drawing over 13ft. In the centerboard type the limits would be decreased from 13 to 14ft. with board housed to about 10ft.; and the extreme draft, with board down, from 23 to about 18ft.

Not only would the lessened expense in the items of pilotage, dockage and inevitable repairs due to grounding be greatly lessened; but the class would be fitted for general racing and sailing, instead of being limited to a few special races.

Left unchecked, it is quite possible that the absolute draft may still increase, until, in a possible Cup racer of 90ft. l.w.l., it reaches an extreme of over 25ft., limiting the yacht to one or two deep harbors and to courses well out at sea.

---

IN discussing the relative merits of the 70 footers and the larger size up to 90ft., the Boston *Herald* suggests a compromise of a curious sort, the creation of a new class of 80ft. l.w.l. or thereabouts. The objections to this plan are obvious and serious enough to condemn it from the start. It does nothing for existing boats, the 87-footers, but it is near enough to them to interfere with any further racing such as we have suggested above; it is a further bar to the revival of the 70ft. class for general racing, apart from all international issues; it creates a special class of very costly yachts, a class that can never become permanent; and it thus increases the great evil of American yachting—too many poorly filled classes.

The very best thing that could happen for yacht racing in this country would be the elimination of the odd sizes of single-stickers from 80ft. upward, by their conversion into schooners or permanent retirement from racing, the similar disappearance as far as possible of some smaller classes, and the building up of four strong classes, recognized and sustained by all clubs, of the natural and always popular sizes of 30ft., 40ft., 53ft. and 70ft. l.w.l., or some equivalent measurement. There will always be individuals who will build under class limits, apparently for the sake of subsequent alteration, or to classes which exist only in club books; but the majority of yachtsmen are fairly amenable to any reasonable rules, and by systematic and concerted action on the part of clubs in encouraging those classes which prove popular for a term of years, it would be possible to bring the racing fleet down to a few strong and vigorous classes, which should be permanent and free from the yearly fluctuations which now hinder both building and racing.

---

THE action of the Royal Dart Y. C. in declaring its race off under the plea of a time limit seems to be entirely unjustified and unprecedented, the time limit which is so much admired by Americans being practically unknown in England. Even if such a limit has a legal existence in the rules of the Royal Dart Y. C., it is most unfair and unwise to revive it under the circumstances of an international race, in which the honors, such as they were, clearly belonged to the visitor. The action of its committee has been condemned by the leading English papers; and unless some satisfactory explanation is forthcoming it must work serious injury to the club.

Under the circumstances no one is likely to quarrel with the sailing committee of the Start Bay regatta for giving the race to Vigilant; but the action of the committee in moving the finish line, so as to make it possible for Vigilant to cross it in the calm can, hardly be considered a safe precedent. It is not as bad as the work of some of the Mediterranean committees, who are noted for their disregard of all rules and usages, in one case the men in a markboat actually getting up anchor after the leader had turned and rowing toward a following yacht in order to permit her to turn more easily; but any changes of courses or conditions after the start, unless provided for in advance, are likely to lead to protests and charges of unfairness.

In this case it is conceded that Vigilant had the advantage, slight as it was, in both of the drifting matches; and as a resail was impossible in each case, both races should have been awarded to her.

---

THE question of the proper crossing of a finish line, brought up by the race of the Shrewsbury Y. C., described last week, has been submitted to us for an opinion, one of the yachts, as there told, having protested the other for not crossing the line in accordance with the rules. With the printed instructions was a chart of the course, showing the actual course from start to finish in full, the directions being indicated by arrows as in the diagram published last week. According to this chart, furnished to every yacht, the exact mode of rounding the last mark and crossing the line was clearly indicated. The yacht against which protest was made disregarded the chart, and left the flag at the end of the line first on port hand, crossing the finish line in the wrong direction, then came about and recrossed it in the right direction, leaving the flag now on the starboard hand, but in so doing she did not round the flag. In our opinion the decision of the committee in sustaining the protest was a just one.

---

THE fall holiday, Labor Day, was as generally observed as ever this year by yachtsmen, the principal event about New York being the annual regatta of the New York Y. R. A., a strong southeast breeze making an exciting race for the fleet of fifty starters. We are obliged to defer the full accounts of all of Monday's races to next week.

---

As the matter of international courtesy is now to the fore in connection with Vigilant's reception abroad, we venture to quote the following from the Cleveland *Leader*, concerning the complaints against a yacht which made a long cruise in order to attend the late meet on Lake Erie, and was fortunate enough to win by fair sailing a small prize and a bunting flag. It would be a good thing for Lake Erie if more of the crack yachts from the lower lake, whether from Canada or the States, should deem the racing worth a cruise next summer, and show their racing sails off Put-In-Bay. The *Leader* says:

"Another feature of the regatta that is rather small is the disposition to criticise the Dinah since she has won the race for the big fellows. One or two Detroit and Toledo yachtsmen have made themselves conspicuous by shouting in public and private that Dinah's claim to the flag ought to be contested, that she has no business to be racing in an American regatta, and so on with a seemingly endless string of picayunish and unsportsmanlike complaints. Now, the fact of the matter is if a Toledo or Detroit boat had won the race not a word would have been heard. The Canadian boat came to the regatta, never made a complaint, took everything as it was allotted, and showed her heels to the whole crowd in the neatest and tightest race that has graced these parts for years. Not only is she a trim boat, but she sailed so much better than some of the others that there was no comparison in seamanship. If the American yachtsmen wanted to kick and protest they would better have done it before the race and then it would have come with more grace. It is a poor fighter who vilifies his opponent after he is 'knocked out.' Not all the yachtsmen have carped at the victory of the Dinah, but the shoe will pinch those who want to try to put it on."

## Conanicut Y. C.

JAMESTOWN, R. I.—NARRAGANSETT BAY.

*Friday, Aug. 24.*

AN open race over inclosed courses was sailed on Aug. 24. Weather fine, fresh S.W. wind:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| **CLASS A.** | | | |
| Haddassah, H. B. Merryman | 29.05 | 2 31 20 | 2 30 48 |

| Shadow, R. Wood | 15.07 | 1 15 42 | 1 15 42 |

Winners: Class A, Haddassah, sweepstakes. Class 1, Venture first, $25; Kaleva second, $17; I. M. C. third, $13. Class 2, Gadfly first, $20; Boodler second, $15; Victor third, $10. Class 3, Mojave first, $15; Allegro second, $10; Kaloola third, $5. Class 4, Reindeer first, $10; Alice W. second, $6; Mildred third, $4. Class 5, Vesper first, $8; Shadow second, $5; Teppoo third, $3.

Regatta committee—W. N. Murray, G. S. Plummer, H. N. Emmons, H. Selfridge, John Bullitt, Jr. Judges—E. T. Reichert, H. F. Smith, A. S. Murray.

## The Cannes Regattas of 1895.

THE prospect of Vigilant, and probably other American yachts taking part in the Mediterranean regattas of next season makes the following official announcement of interest to American yachtsmen. The indications are that the races will be more generally patronized than ever in the past, the particular locality being in fashion just at this season of the year, and the yacht races and accompanying festivities being important attractions. The races at Cannes, under the auspices of the Union des Yachts Français, will begin on March 1, 1895 and continue as follows:

First Day.—Prix d'Honneur.—A race open to all yachts entered for the races during the week. The course will be from Cannes to St. Tropez, Ste. Maxime and back again. In this race there will be eight classes, as follows: (1) Racing yachts above 20 tons; (2) cruisers, yawls and schooners above 10 tons; (3) yachts above 10 and not exceeding 20 tons; (4) yachts above 5 and not exceeding 10 tons, with a course round the Iles de Lerins; (5) yachts above 3 and not exceeding 5 tons; (6) yachts above 2 and not exceeding 5 tons; (7) yachts above 1 and not exceeding 2 tons; (8) yachts not exceeding 1 ton.

Second Day.—First heat for the special prize given by the Union des Yachts Français for yachts above 1 ton and not exceeding 2 tons.

Third Day.—Course de tartanes, borneurs, plaisanciers. Aviron—yoles, canots, youyoux, berthons, pecheurs, etc.—Illumination des yachts, Fete de Nuit, Retraite aux Flambeaux.

Fourth Day.—The Ogden-Goelet International cups: (1) value 8,000f., for yachts of over 20 tons; (2) value 4,000f., for yachts of over 5 tons and not exceeding 20 tons.

The Richard Winslow International cup: Value 2,000f., for yachts not exceeding 5 tons.

Fifth Day.—Defile of sailing and steam yachts: Banquet at the Cercle Nautique in the evening.

Sixth Day.—Prize 1,000f., for yachts exceeding three and not exceeding 5 tons. Prize, 600f., for yachts exceeding 2 and not exceeding 3 tons. Second heat of the special prize given by the Union des Yachts Français. Prize 300f., for yachts not exceening 1 ton.

Seventh Day—Prize 2,000f., for yachts above 20 tons. Prize 2,000f., for yachts above 10 and not exceeding 20 tons. Prize 2,000f., for yachts above 5, but not exceeding 10 tons. Second heat of the Richard Winslow International cup.

Eighth Day.—Third heat of the special prize given by the Union des Yachts Français. Third heat of the Richard Winslow International cup.

---

## Cohasset Y. C.

SEVENTH CHAMPIONSHIP RACE.

*Saturday, Aug. 28.*

WIND S.W. variable, with heavy puffs. Winona and Grimalkin carried whole sail, but the wind was overestimated at the start and the others in first class were reefed. Wind at start was in very heavy flaws, but between the puffs was light. Off Green Hill Madge shook out second reef. Winona steadily drew away, and at second mark had a long lead, the times from the second mark to finish being close. In It again sailed a fine race with one reef in and gets her third leg for the cup. The sport in the third class was high, Dr. Bryant finishing five seconds after Escort, but getting race on allowance by 11 seconds, his crew consisting of Mr. Jas. P. Hawes and the Doctor's boys. The Daylight had a full complement of ladies and The Senator with Mr. Crane carried the club flag around the course, Mr. Otis E. Weld and party looked on from Shadow. The last race of the series will be sailed next Saturday, and on Labor Day there will be a fisherman's race for the Cohasset lobster boats.

| | Length. | Elapsed. | Corrected. |

## Corinthian Mosquito Fleet.

NEW ROCHELLE—LONG ISLAND SOUND.

*Saturday, Aug. 25.*

THE annual regatta of the Mosquito Fleet, sailed off Echo Bay, New Rochelle, on Saturday, Aug. 25, proved the most exciting of the several successful races given by the fleet this year. A strong southerly wind made the first leg of the course, which was a triangle from Echo Bay to Execution Reef, thence to and around Matinnicock Point Buoy and home, dead to windward, and the small boats got a lively slashing up in the sloppy sea that was running.

Com. Pryer's Eurybia took the lead shortly after the start, crossing first and making best time over course.

Willie Iselin, the eleven-year-old son of the former owner of Cinderella, created quite a sensation by sailing a little ¼-rater, Tomahawk, measuring only 9ft. on the waterline, over the entire course and fairly drowning out his class competitors.

The ½-rater Goblin made a very creditable showing, but was outclassed. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| **CLASS A—SLOOPS AND CUTTERS 30 TO 35FT.** | | | | |
| Eurybia | 1 30 24 | 3 26 18 | 1 55 54 | 1 55 54 |
| Mary C. | 1 30 52 | 3 34 40 | 2 03 48 | 2 00 51 |
| **CLASS B—SLOOPS 25 TO 30FT.** | | | | |
| Amazon | 1 30 26 | 3 39 52 | 2 09 26 | 2 09 26 |
| **CLASS C—SLOOPS UNDER 25FT.** | | | | |
| Madrine | 1 32 00 | 2 29 48 | 1 57 48 | 1 57 48 |
| Caper | 1 32 06 | 3 48 20 | 2 16 14 | .. .. .. |
| Wanderer | 1 30 43 | 3 53 38 | 2 22 55 | .. .. .. |
| **CLASS D, CABIN CATS.** | | | | |
| Almira | 1 31 02 | 3 32 35 | 2 13 02 | 2 04 04 |

| **CLASS G, OPEN CATS.** | | | | |
| Narrioch | 1 32 08 | Did not finish. | | |
| Punch | 1 34 00 | 3 52 00 | 2 18 00 | 2 18 00 |
| **MOSQUITO SLOOPS** | | | | |
| Tomahawk | 1 33 00 | 4 35 37 | 3 24 07 | 2 55 38 |
| Maggie C. | 1 31 07 | Did not finish. | | |
| **MIXED RIGS.** | | | | |
| Moses | 1 31 09 | 3 54 32 | 2 23 23 | 2 21 36 |
| Cossack | 1 32 06 | Capsized. | | |
| Goblin | 1 31 04 | 4 24 57 | 2 31 42 | 2 28 27 |
| Gwen | 1 30 21 | 4 11 58 | 2 41 37 | 2 41 37 |

The winners were Eurybia, Amazon, Madrine, Kittie, Punch, Tomahawk, Moses.

---

## Lake Geneva Y. C., Sheridan and Folly Cups.

LAKE GENEVA—WISCONSIN.

*Saturday, Aug. 25.*

THE principal events of the year in the Lade Geneva Y. C., the races for the Sheridan and Folly cups, were sailed on Aug. 25 in a strong breeze, the course being 14 miles. This was the 21ft. race for the Sheridan cup, named after the famous general, and three former winners were entered—Expert, 1891, Tattler, 1892, and Precept, 1893, all built by J. H. Cornwall, of Port Washington, L. I. Against them were two local boats, Helen and Kidnapper, both comparatively new, and the winner, Lorna, a Willis boat also from Long Island Sound.

In the fourth race for the Folly cup were Com. Burritt's famous Rival, also from the Sound, and two Cornwall boats, Possum and Hallelujah, the latter a new boat built to beat Rival. The results are as follows:

| | Length. | Start. | Elapsed. | Corrected. |
|---|---|---|---|---|
| **SHERIDAN CUP.** | | | | |
| Lorna, J. M. Rumsey | 24.04 | 11 20 00 | 2 29 15 | 2 27 53 |
| Tattler, O. W. Norton | 25.00 | 11 20 00 | 2 33 21 | 2 33 21 |
| Expert, J. M. Rumsey | 24.07 | 11 20 00 | 2 37 02 | .. .. .. |
| Precept, J. Hodgkins | 24.05½ | 11 20 00 | 2 35 32 | 2 34 05 |
| Kidnapper, W. M. Napper | 24.11 | 11 20 00 | .. .. .. | .. .. .. |
| Helen, Robert Dunham | 24.10 | 11 20 00 | .. .. .. | .. .. .. |
| **FOLLY CUP.** | | Start. | Finish. | Elapsed. |
| Possum, R. K. Fairbank | | 11 16 30 | 1 27 50 | 2 10 20 |
| Rival, B. Carpenter | | 11 22 30 | 1 36 14 | 2 13 44 |
| Hallelujah, J. Winslow | | 11 23 22 | 1 37 20 | 2 13 58 |
| Mayh, H. H. Porter, Jr. | | 11 20 40 | 1 41 18 | 2 20 08 |
| Vanadia, W. S. McCrea | | Disabled. | | |
| Mystery, Benton Sturges | | 11 22 42 | 1 46 40 | 2 23 58 |

Winners: Possum first, Rival second.

Judges: Com. Ferd. Peck, Oconomowoc Y. C.; Gen. A. C. Ducat, Capt. Chas. King.

## INTERLAKE Y. R. A.

### First Annual Meet.

PUT-IN BAY—LAKE ERIE.

WHILE not altogether free from certain serious drawbacks, the Great Lakes offer great advantages for sport. which the yachtsmen between the Alleghanies and the Mississippi are availing themselves of each year to a greater extent. Just how rapidly and successfully yachting may be developed on these great fresh-water seas, depends largely on the work of organization among the various clubs and individual owners. How much may be accomplished by earnest and intelligent effort is well shown on Lake Ontario, where the organization founded in the face of many difficulties in 1884, has become notable from its success in uniting the Lake yachtsmen and enlarging and improving the Lake fleet. How very little has been done elsewhere in the same time may be seen on Lake Michigan, where between 1881 and 1891 yachting moved astern instead of ahead, though there is now visible a change for the better.

The circumstances and conditions on the neighboring lakes, Ontario and Erie, are closely similar, and yet the efforts which have attained such good results in the former case have uniformly failed in the latter. There are plenty of yachts on Lake Erie, many good yacht sailors, and not a few earnest and spirited men, such as Com. Gardner, of Cleveland, who have long worked to form a real union of the Lake clubs, but unfortunately with little success. One of the most promising attempts was made in 1885, when, on the occasion of the formation of the Western Canoe Association, at Ballast Island, a meet of yachtsmen was held at Put-In-Bay, on the next island, to form a yachting association. In spite of all that was done by Com. Gardner and others, this attempt proved a failure, and though other attempts have since been made at times to revive this organization or to start anew, the result has been the same in each case.

With a wider interest in yachts and racing all around Lake Erie, and with a large and growing fleet, the necessity for some organization has recently become still more pressing; and last winter the subject was again taken up, with the result that a new association was formed, the name being the Inter Lake Yachting Association. The clubs interested were: the Citizens' Yachting Association. of Detroit, the Cleveland Y. C., the Ohio Y. C. of Toledo, the Put-In-Bay Y. C of Put-In-Bay, the Sandusky Y. C., the Toledo Y. C. and the West End Y. C. of Detroit. The officers elected were: Com., Geo. W. Gardner, Cleveland; Vice-Com., J. E Gunckel, Toledo; Rear-Com., H. C. Kendall, Detroit; Sec'y-Treas., E. W. Radder, Cleveland; Meas., W. H. Ladd, Put-In-Bay; Fleet Surgeon, Dr. A. E. Claypool. The directors for the first year are G. W. Luetkmeyer, Cleveland Y. C.; Henry Tracy, Ohio Y. C.; Wm. Gates, Toledo Y. C.; J. J. Ackerman, Citizens' Y. A.; C. B. Lockwood, Sandusky Y. C.; C J. Lichtenberg, West End Y. C.; W. H. Ladd, Put-In-Bay Y. C. The regatta committee includes Messrs. Lockwood, Gates, Lichtenberg and Radder.

When the Lake Y. R. A. was formed on Lake Ontario in 1884, its originators, with exceptionally good judgment, looked well ahead, and at some sacrifice of immediate local interests, adopted a rule that was then far in advance of the times; the results being visible in the fine fleet of modern yachts on Lake Ontario to-day, Pappoose, Vreda, Yama, Zelma, Nox, Dinah, Vedette and many more, all the direct offspring of the new rule.

When a similar attempt at organization was made on Lake Erie a year later, the same question of measurement came to the top, but unfortunately it was dealt with in a different manner. The rules then adopted were framed with a view almost entirely to the then existing yachts of Toledo and Detroit, and all improvements and additions to the fleet were consequently discouraged from the start. The rules offered no inducement to replace the old boats with better ones, and when these old craft gradually passed away, as they have done, there was no systematic effort to build up a new fleet on a definite plan, and yacht racing died out and yachting suffered in proportion.

When the same question of measurement came up last winter in the work of organization, much the same arguments as of old were made on each side, but this time the majority were in favor of more modern rules, and the result was the adoption of the Seawanhaka rule for both measurement and classification, the classes being as follows: Class A, 50ft. sailing length and over; Class B, 40ft. and under 50; Class C, 32ft. and under 40; Class D, 25ft. and under 32; Class E, under 25ft. Whether or no a better rule may be discovered in the future, or these are the best possible classes under the rule, are secondary questions; but, in adopting this measurement and classification with the above classes, the new association has put itself in accord with the the most progressive of American clubs, and has opened the way to the improvement and building up of its fleet by yachts of modern type.

The advantages of Put-In-Bay in every way as a point of rendezvous, in a fairly central location, convenient to Detroit, Toledo and Sandusky, though not so accessible to the Cleveland yachts; with a fine harbor, good shore accommodations and attractions, and open courses, all urged its selection for the inaugural meet; and the following programme was arranged: Rendezvous on Monday, Aug. 6; Tuesday, classes A, B and D; Wednesday, classes C and E and naphtha launches, the racing being followed by a ball at night; Thursday, race for all yachts in one class, the fleet calling at Kelley's Island on the return; Friday, banquet and presentation of prizes. Special races were provided for catboats, canoe-yawls, rowing boats. etc., should any appear. The various prizes were: Open race, $50; classes A, B and C, each $40 and $20; class D, $25 and $10; class E, $20 and $10; naphtha launches, champion flag for first and silver cup for second prize. The first prize in each class was accompanied by a champion flag. One special prize was offered, the Cleveland *World* cup, for classes D and E, to be held after being twice won.

On Sunday and Monday yachts came flocking in from all quarters until there were fifty in the historic harbor, besides many launches, sailboats and other small craft. The racing began on Tuesday morning, the wind being very light S. W. The course was a triangle with 7-mile sides for class B, there being no starters in class A, that for class D being 7 miles out and return. The start was made at 10:58, Neva of Cleveland soon taking the lead. After a little while the wind fell completely and the race was declared off for the day.

On Wednesday, in order to make sure of the good S.W. breeze that was blowing at colors, an early start was called, the preparatory signal being fired at 8:24, with the start for Class B 10 minutes later. The starters were Sultana, Neva, Surprise, Scorpion, City of the Straits and Dinah, the latter from Hamilton, the smart little cutter designed and built by Thos. Dalton for the late Mr. Mallock. The first leg was a reach, with plenty of wind in the balloon jibtopsails, Neva coming to grief almost at the start, her topmast going at the cap, while the masthead was also sprung, compelling her to withdraw.

The order at the first mark was Sultana, City of the Straits, Surprise Dinah and Scorpion; but before the boats had gone far in a hard hammer to windward, there was a second "surprise" in the race; the trim Canadian cutter clawing out from under her rivals and passing them in succession until she had a clear 8 minutes' lead on Sultana when she started sheet and broke out spinaker at the second mark. Off the wind she also gained, coming in an easy winner after a well-sailed race.

The smaller class had fifteen starters. Chinook, Lotus, Huntress, Crescent, Com. Gardner, Marie, Henrietta and Iris in Class D, and also in Class E, for the *World* cup, Brownie, Whim, Laurene, Grayling, Alert and Arab. The course was less satisfactory than that of the larger boats, as it proved a reach out and back, coming home with sheets well lifted. Chinook took the lead, with Brownie second, Com. Gardner third and Marie fourth, Laurene losing her topmast. Running in, Com. Gardner went ahead to second berth, Chinook being ahead by 7m. at the finish.

The full times were:

CLASS B.

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Dinah | 8 39 40 | 12 01 27 | 3 14 23 |
| Sultan | 8 36 45 | 12 11 42 | 3 28 10 |
| City of the Straits | 8 38 06 | 12 30 36 | 3 46 45 |
| Surprise | 8 36 55 | 12 41 36 | 3 58 54 |
| Scorpion | 8 38 23 | 12 48 47 | 4 04 32 |
| Neva | 8 38 25 | Disabled. | |

CLASS C.

| | | | |
|---|---|---|---|
| Chinook | 8 43 40 | 10 35 05 | 1 49 25 |
| Brownie | 8 11 28 | 10 44 45 | 1 51 10 |
| Marie M | 8 43 04 | 10 49 52 | 1 57 20 |
| Com. Gardner | 8 43 50 | 10 42 20 | 1 59 27 |
| Whim | 8 45 10 | 11 00 35 | 2 07 21 |
| Huntress | 8 42 30 | 10 51 27 | 2 08 52 |
| Lotus | 8 41 10 | 10 53 10 | 2 09 00 |
| Grayling | 8 43 32 | 10 50 55 | 2 10 36 |
| Henrietta | 8 43 05 | 10 59 03 | 2 12 05 |
| Alert | 8 45 00 | 10 57 10 | 2 13 07 |
| Arab | 7 41 30 | 11 06 55 | 2 15 02 |
| Iris | 8 43 00 | 11 07 30 | 2 19 45 |
| Crescent | 8 44 55 | 11 15 55 | 2 31 00 |
| Laurence | Disabled | | |

Dinah wins first prize and Sultana second in Class B; Chinook wins first and Marie second in Class D, and Chinook wins a leg for the *World* cup, one leg for which is already held by Mona.

After a cloudy sunset the wind shifted during the night to N.E. and piped up hard, making a heavy sea on the lake next morning, while it still held its strength, a good gafftopsail breeze. Neva's crew, after giving up on Wednesday, turned to over a new topmast, but finally gave it up, as the mast appeared to be weak. On Thursday morning, however, they repented, and hunted up a stray pound stake, which was lashed aloft as a jury topmast, allowing them to set a jib-header. The open race was scheduled, the course being from off Put-In-Bay around the north end of Ballast Island and then to a finish off Sandusky Harbor, 20 miles.

The first incident of the day was a collision between Cynthia and Grayling, in which the latter lost bowsprit and headgear. There were seven starters, Cynthia, Alice Enright, Dawn, Neva, Josephine, Sultana and Marie. After a clever start with the gun, Sultana trimmed hard down for a beat out between the islands to the end of Ballast, working short tacks in the narrow passage. When clear of the island the course was a long reach across the lake to the finish. Neva had worked out under lower sails only, her jury topmast showing signs of weakness, but after easing off she made a shift to set a working topsail and jibtopsail, and began to gain on Sultana, finally overtaking her, when a long luffing match followed, Sultana finally bearing off after Neva had taken the lead. Neva finished first, although she lost her jibtopsail when nearing the finish, but Cynthia proved the winner, with Sultana second, the times being:

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Cynthia | 11 15 06 | 1 14 14 | 1 48 33 |
| Sultana | 11 14 00 | 1 13 54 | 1 54 30 |
| Alice Enright | 11 17 45 | 1 21 59 | 1 56 39 |
| Neva | 11 14 30 | 1 12 42 | 1 58 12 |
| Dawn | 11 16 05 | Not timed. | |
| Josephine | 11 16 33 | Not timed. | |
| Marie M | 11 15 48 | Sailed wrong course. | |

Cynthia is a shoal wide boat, designed by Mr. Clapham, and carries a yawl rig.

The N.E. wind held through the night, and there was still plenty left for the final races, Classes C and E, on Friday morning, the course for the first being the 20-mile triangle, while for the other it was out and back over one leg, again a reach both ways. The repairs to Grayling after the collision were not completed until 9:30, so the start, set for 9 o'clock, was postponed until 9:40. The first leg was a close reach, Josephine leading until near the mark, when Scud passed her, Alice Enright being third and Shamrock fourth. Running free under spinaker, Shamrock showed up very fast, and ran to the head before the second mark was reached. On the last leg, to windward, Scud pushed her hard and led just before the finish.

The race in Class E was less exciting, Brownie winning easily. The times were:

CLASS C.

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Shamrock | 9 45 00 | 1 38 58 | 3 53 58 |
| Scud | 9 44 22 | 1 38 42 | 3 54 20 |
| Alice Enright | 9 45 00 | 1 43 38 | 3 57 42 |
| Josephine | 9 43 36 | 1 44 25 | 4 00 49 |
| Lulu B | 9 45 00 | 2 04 50 | 4 19 50 |
| Dawn | 9 45 00 | 2 10 07 | 4 25 07 |
| Alborak | 9 45 00 | 2 12 03 | 4 27 03 |
| Grayling | 9 45 00 | 2 23 11 | 4 38 11 |

CLASS E.

| | | | |
|---|---|---|---|
| Brownie | 9 50 42 | 12 04 43 | 2 09 38 |
| Whim | 9 53 28 | 12 15 54 | 2 18 26 |
| Priscilla | 9 51 32 | 12 19 49 | 2 25 39 |
| Cyclone | 9 52 05 | 12 20 50 | 2 28 45 |
| Flirt | 9 52 58 | 12 29 14 | 2 36 16 |
| Unique | 9 53 00 | 12 27 10 | 2 34 10 |
| Nettie M | 9 50 56 | 12 35 08 | 2 44 12 |
| Frolic | 9 51 10 | Not timed. | |

Shamrock and Brownie each win first prizes and Scud and Whim second.

Only two launches, Restless and Sweetheart, started in the launch race, the former winning by 1:55 corrected. This ended the racing, the prizes being presented at the banquet on Friday evening, at which speeches were made by a number of yachtsmen. Com. Gardner is now in the North, being with Prof. Cook on the Miranda expedition to Greenland, and in his absence Vice-Com. Gunckel was in command of the fleet.

The meet was a success, and leaves good ground for hope that at last Lake Erie is to have a permanent yachting association and some systematic building and racing The work of organizing the association, drawing up rules, making all arrangements for the meet and carrying on the races, has been no easy task at best; but it has been done cheerfully and willingly by a comparatively small number of yachtsmen; many of them not yacht owners, but none the less interested in the success of yachting. The yacht owners and sailors have in some cases failed to appreciate the work done for them, and have failed to do their part in making themselves acquainted with the various rules and living up to them; while they have not hesitated to exercise their inalienable right of kicking at all times. The work of establishing new rules is neither pleasant nor easy, and the least that yacht owners can do is to accept such voluntary aid in the spirit in which it is offered; and to help in every way to make the enforcement of the necessary rules as easy as possible for the officers. With a mixed fleet, the yachts not yet measured, some difficulties are likely to arise under any rule of measurement; but in the present case there seems no reason why they should not be smoothed out as the rules are built to and generally lived up to by the yachtsmen of the Inter-Lake Y. R. A.

## Model Sailing in the Large Yacht Clubs.

GLENWOOD LANDING, L. I.—*Editor Forest and Stream:* Ever since seeing a model race of large yachts sailed at Glen Cove a number of years ago, I have thought of and been interested in model yacht racing. Lately the sport seems to be making headway, and now it seems to me is a good time for all interested to keep giving it fresh impetus and interest. One of the best of our West Long Island Sound yacht clubs is seriously considering the holding of a race for model yachts to wind up the season with, and I think it is an excellent idea, and only hope other clubs will follow suit and do likewise. I have heard model yacht racing characterized as child's play by a few, ignorant of the amount of science and thought which is used in model yachting from start to finish. Take the American Model Y. C., for instance, and in its fleet of over forty yachts you will find all manner of interesting experiments which have been tried, and in many cases successfully. It is science clear through, from lines to hull and rig, and then the sailing of a model yacht to develop the best speed is an art in itself. Most of the yacht clubs along the sound are on harbors having sheltered spots: often at the club house, just suitable for model yachting, and it seems a pity that such an interesting step in yachting should not be made more of. Take the New Rochelle, Larchmont, Douglaston, Sea Cliff, or Hempstead Harbor clubs. All have excellent stretches of water for model yachting, and if model yacht clubs were formed of club members as a sort of annex, every year at least one large inter-club regatta could be given that would be a sight worth seeing. Then, too, every yachtsman who really understands yachting, has ideas of his own in regard to model, rig, etc. To try these views on a full scale is costly experimenting, and often what might really be very useful is in consequence allowed to go untried. With a little skill with tools though, a model of five or six feet can be easily made at a cost of a few dollars and some time, and the idea can in this way be tried. I know that I myself have learned much in regard to models from sailing model yachts, and I consider it an interesting and and scientific adjunct of yachting, worthy of being fostered and encouraged by all the larger yachting clubs. Let those interested in the sport be heard from through FOREST AND STREAM, and let us see if we cannot make for model yachting the place it should hold in yachting. Argument is good; so as a starter I will put forward the theory that triangular and off the wind courses are the poorest devised, and that the dead to windward course is the only proper one for match races. If any one is interested enough to argue on the subject I will give my reasons later on. By the way, what does the editor of FOREST AND STREAM think of model yachting?

G. GRIFFITH CLAPHAM.

## The Newport Races.

THE final races at Newport for the 21-footers were sailed on Aug. 27 and 28, the former for a cup presented by Mr. Ralph N. Ellis, and the latter for the citizens' cup, the third heat. The race of Monday was sailed from off Tracy's Ledge buoy, around Butterball Rock bell-buoy, two rounds, a fresh southerly breeze making a reach both ways. The times were: Start 2:25:00.

| | Finish. | Elapsed. |
|---|---|---|
| Vaquero, H. B. Duryea and J. N. Rutherford | 4 17 15 | 1 50 35 |
| Houri, W. D. Duncan and T. Yznaga | 4 12 10 | 1 54 40 |
| Dorothy, H. Whitney and T. Hitchcock | 4 21 55 | 1 52 15 |
| Celia, Gould and Smith | 4 22 50 | 1 52 50 |
| Adelaide, Dr. Woodbury and T. Irvin | 4 20 05 | 1 48 55 |

Vaquero won the Ellis cup.

The last race for the citizens' cup was sailed over a 12 mile course, two rounds, between Brenton's Cove buoy and Fish Rock buoy, the wind being from the south. Vaquero touched, but went clear, while Dorothy was hung up for some time, putting her out of the race. The times were: Start 12:05.

| | Finish. | Elapsed. |
|---|---|---|
| Celia | 4 52 20 | 2 47 20 |
| Vaquero | 4 56 30 | 2 51 30 |
| Houri | 5 04 55 | 2 59 55 |
| Adelaide | 5 01 05 | 2 56 05 |
| Dorothy | Did not finish | |

The judges were Royal Phelps Carroll, L. M. Rutherford and Frederick P. Sands.

Celia, having won one first and one second, takes the cup. After the races the fleet towed back to Larchmont in time for the fall regatta on Saturday.

## Beverly Y. C.

THE protest of Gilt Edge vs. Nobska in the second Buzzard's Bay championship has been decided in favor of Nobska, who wins first prize, Gilt Edge taking second prize. Nobska wins and holds pennant.

The 213th race, first open regatta, was sailed at Quissett, July 22. The day opened with a faint northwest wind, preventing many boats from arriving in time. After the courses had been set for a northwest wind, it suddenly died out and came in light southwest. Courses were changed and southwest courses set. Courses were a run before the wind to Gunning Point, and for this distance it was light; but as they hauled on the wind for the beat to Wepecket, 8¼ miles, for second class, and to Uncalena, 7 miles, for other classes, it breezed up strongly and reefs were soon in order on most of the boats.

In second class the new Kalama did very well, while Myrtle, Anonyma, Gymnote and Bernice made a very close race, all crossing within 20 seconds.

In second class sloops, Squeteague, altered over from a cat, showed speed for the first time, and won easily.

In third class only four boats appeared, and three, including the champion, Nobska, sailed second class course and were ruled out. Nobska, sailed by a professional, easily made the best race, but was ruled out. Scintilla, sailed by Nobska's owner, went the correct course and took the prize.

In fourth class, Grilse, the little Minnetonka boat, showed up in great form, beating Fin over six minutes actual time, and the knockabout so badly that she withdrew. Grilse has a larger and better sail, with a good deal of peak. The original sail had a flat head and could not be properly held in.

In fourth class cats Dawdle was beaten by Ethel, a modern measurement cheater and really twice Dawdle's size.

There was a race for spritsail boats, a feature of the port. Judges, N. H. Emmons, J. G. Palfrey.

SECOND CLASS—CATS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Kalama, Chas. Brewer, B. Y. C. | 23.07 | 1 43 05 | 1 31 56 |
| Anonyma, F. L. Dabney, B. Y. C. | 23.08 | 1 46 15 | 1 35 11 |
| Gymnote, W. E. C. Eustis, B. Y. C. | 23.08 | 1 46 21 | 1 35 17 |
| Myrtle, D. Crosby, Osterville | 23.01 | 1 46 34 | 1 34 55 |
| Bernice, J. G. Young, Jr., B. Y. C. | 23.05 | 1 46 35 | 1 35 16 |
| Just Right, H. Packard, Mon. Beach | 23.00 | 1 54 25 | 1 42 41 |

| Rival | 12.00 | 2 15 30 | 1 51 14 |
| No Name, B. B Gifford | 13.00 | 2 20 30 | 1 58 10 |
| No Mame, Ed Swift | 12.00 | Not timed. | |
| No Name, P. Donelly | 12.00 | Not timed. | |

Winners—Class 2 cats, Kalama first, Myrtle second, Anonyma third; Class 2 sloops, Squeteague first, Susan second, Mascot third; Class 3, cats, Scintilla first; Class 4, sloops, Ethel first, Dawdle second, Markatta third; Class 5, cats. Grilse first; Class 5, Raccoon first, Scup second, Transit third; Spritsails, Emma first, Grinnell second, Nickerson third.

The 214th regatta, third open sweepstakes, was sailed at West Falmouth, Aug. 25. The day opened with a very heavy sea, a strong three-reef breeze and a dense fog; it cleared up before the start, but greatly diminished the number of entries, all the light weather boats, such as Ethel, Venture, etc., keeping out. The fog prevented the placing of the markboats early in the morning, and later the heavy sea made it stiff work for the small steamer to tow them out, the sea breaking over her and filling the boats, consequently the start was delayed one hour. The course was five and one-half miles to windward and return for second class, three miles to windward and back for other classes. The sea was so heavy that the judges' boat, a very large catboat, shipped a sea and soaked every one on board just as the fourth class came home. Susan had a walkover and withdrew. Gymnote seemed again in her old form and sailed a great race. It was much to be regretted that Grilse was not on hand; it was due to a misunderstanding of orders that she did not appear, though her crew was there, a much disgusted set of men. It would have been interesting to see her performance in a sea such as no Dyer boat has yet met; those who have sailed on her believe she would have won handily, while others think she would have been drowned out. Three boats lost men overboard but picked them up unharmed.

SECOND CLASS—CATS.

Winners: class 2, cats: 1st Gymnote, 2d Linotte, 3d, Ulula; class 3: 1st Nobska; class 4: 1st Dawdle, 2d Cygnet; class 5: 1st Kitten, 2d Turkey, 3d, Dolly. Judges, W. Lloyd Jeffries, J. G. Palfrey, N. H. Emmons.

## Indian Harbor Y. C. Regatta.

GREENWICH, CONN.—LONG ISLAND SOUND.

*Saturday, Aug. 25.*

THE regatta of the Indian Harbor Y. C. on Aug. 25 was sailed in a good S.W. wind over the regular club courses between Captain's Island, Matinnicock and Oyster Bay, one feature of the day being the presence of ladies aboard the racing craft. The times were as follows, after a close and interesting race:

40FT. CLASS—SLOOPS.

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| Banshee, Henry Doscher | 3 18 00 | 5 16 58 | 1 58 53 |
| Crocodile, Wm. Osborne | 3 14 40 | 5 15 20 | 2 00 40 |
| Mistral, C. T. Wills | 3 18 00 | 5 22 00 | 2 04 00 |

MIXED RIG CLASS—UNDER 30FT.

| | | | |
|---|---|---|---|
| Sirene, Rich. Outwater | 3 18 15 | 4 45 36 | 1 27 21 |
| Fanny, Frank Burritt | 3 21 24 | 4 50 12 | 1 28 48 |
| Wahneta, H. E. Doremus | 3 23 00 | 4 57 25 | 1 34 25 |
| Gee Whiz, C. J. Field | 3 19 05 | 5 07 45 | 1 48 40 |

21-FOOTERS.

| | | | |
|---|---|---|---|
| Maysie, Wm. Osborne | 12 49 00 | 3 32 14 | 2 43 14 |
| Blonde and Brunette, H. B. Seeley | 12 49 00 | 3 44 38 | 2 55 38 |

NAPHTHA LAUNCHES.

| | | | |
|---|---|---|---|
| Crescent, Dr. V. Mott | 5 41 32 | 6 24 22 | 0 42 51 |
| Sallie, Howard Tingue | 5 40 43 | 6 26 00 | 0 45 17 |
| Florence, L. Jackson | 5 41 50 | 6 35 21 | 0 53 21 |
| But, G. W. Pfeiffer | 5 41 57 | 6 33 25 | 0 51 28 |
| Helen, H. L. Pluce | Did not finish. | | |

The winners were Crocodile, Sirene, Maysie and Crescent.

## Larchmont Y. C. Fall Regatta.

LARCHMONT—LONG ISLAND SOUND.

*Saturday, Sept. 1.*

THE Larchmont Y. C. as usual mustered a good fleet for its annual fall regatta, being the only New York club which can call out the larger yachts for more than one regatta in a season. The absence of Ariel, she being on the ways at Greenport for painting and unable to get to Larchmont in time, spoiled the race in her class, as Emerald would not start without a competitor. Loyal, in the smaller class, was in the same fix, the only schooners starting being Shamrock and Elsiemarie. A light air in the morning game way to a moderate S.E. breeze at noon, which shifted later to S.W. and settled there, making a typical Larchmont race, the regular courses being sailed. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| SCHOONERS—CLASS C—27 NAUTICAL MILES. | | | | |
| Shamrock | 12 15 00 | 5 31 30 | 5 16 30 | 5 14 42 |
| Elsiemarie | 12 15 00 | 5 32 45 | 5 17 45 | 5 17 45 |
| CUTTERS—CLASS 5—20 NAUTICAL MILES. | | | | |
| Wasp | 12 25 48 | 4 14 49 | 3 49 01 | 3 49 01 |
| Gloriana | 12 33 50 | 4 25 00 | 3 51 10 | 3 50 59 |
| CUTTERS—CLASS 6—20 NAUTICAL MILES. | | | | |
| Minerva | 12 30 05 | 4 44 00 | 4 13 55 | 4 13 55 |
| Banshee | 12 27 21 | 4 57 20 | 4 29 59 | 4 26 58 |
| CUTTERS—CLASS 7—30 NAUTICAL MILES. | | | | |
| Kathleen | 12 28 50 | 5 17 20 | 4 48 30 | 4 44 40 |
| Eurybia | 12 29 15 | 5 29 57 | 5 00 42 | 5 00 42 |
| CUTTERS—CLASS 8—20 NAUTICAL MILES. | | | | |
| Marjorie | 12 27 49 | 5 45 00 | 5 17 11 | 5 17 11 |
| Conquiesco | 12 30 36 | 6 07 00 | 5 36 24 | 5 28 27 |
| CUTTERS AND YAWLS—CLASS 9—13 NAUTICAL MILES. | | | | |
| Louise | 12 27 37 | 3 49 45 | 3 22 08 | 3 22 08 |
| Gavilan | 12 31 04 | 3 35 10 | 3 04 06 | 3 04 06 |
| Madrine | 12 34 21 | 3 38 27 | 3 04 06 | 2 59 59 |
| Audax | 12 32 02 | 3 38 08 | 3 06 06 | 3 04 12 |
| Pyxie | 12 33 37 | 3 36 40 | 3 03 03 | 2 56 32 |
| SLOOPS, CLASS 10—13 NAUTICAL MILES. | | | | |
| Gee Whiz | 12 25 55 | 4 02 20 | 3 36 25 | 3 24 50 |
| Wahneta | 12 28 44 | 3 48 45 | 3 20 01 | 3 20 01 |
| Wave | 12 25 28 | 3 45 33 | 3 20 05 | 3 07 06 |
| Agawam | 12 28 33 | 3 52 01 | 3 23 28 | Not meas. |
| Moses | 12 30 47 | Did not finish. | | |
| CABIN CATS, CLASS 11—13 NAUTICAL MILES. | | | | |
| Almira | 12 34 42 | 2 28 30 | 2 53 48 | 2 53 21 |
| Onaway | 12 34 58 | 3 33 23 | 2 58 25 | 2 54 33 |
| Mary | 12 35 00 | Disabled. | | |
| Keora | 12 34 30 | 3 53 15 | 3 18 45 | Not meas. |
| Kittie | 12 34 05 | 3 34 14 | 3 00 09 | 2 53 46 |
| OPEN CATS, CLASS 14—10 NAUTICAL MILES. | | | | |
| Fairy | 12 35 00 | 2 50 02 | 2 15 02 | 2 15 02 |
| Violet | 12 34 43 | 2 59 30 | 2 24 47 | 2 21 58 |
| Punch | 12 34 42 | 2 51 21 | 2 16 39 | 2 13 50 |
| OPEN CATS, CLASS 15—10 NAUTICAL MILES | | | | |
| Kismet | 12 35 00 | 3 00 38 | 2 25 38 | Disabled. |
| Zelica | 12 35 00 | 3 07 15 | 2 35 15 | 2 32 02 |
| Terrapin | 12 35 00 | 3 08 43 | 2 33 43 | 2 31 46 |
| It | 12 35 00 | Withdrew. | | |
| SPECIAL 21FT. CLASS—13 NATUICAL MILES. | Start. | Finish. | Elapsed. | |
| Vaquero | 12 42 00 | 3 29 02 | 2 47 02 | |
| Hoodoo | 12 42 00 | 3 41 36 | 2 59 36 | |
| Dorothy | 12 42 00 | 3 43 00 | 3 01 09 | |
| Maysie | 12 42 00 | 3 41 45 | 2 59 45 | |
| Adelaide | 12 42 00 | 3 29 51 | 2 47 51 | |
| Celia | 12 42 00 | 3 41 04 | 2 59 04 | |
| Houri | 12 42 00 | Disqualified. | | |
| Minnetonka | 12 42 00 | Disabled. | | |
| Blonde and Brunette | 12 42 00 | Disqualified. | | |

Houri took the ground so hard that she only got off through the friendly offices of a steam launch, thus being disqualified. Minnetonka parted her bobstay and lost her bowsprit after turning Matinnicock, and withdrew. Blonde and Brunette fouled Maysie and was disqualified. The winners were: Shamrock, Wasp, Minerva, Kathleen, Marjorie, Pyxie, Wave, Almira, Punch, Terrapin and Vaquero. Mary broke the gaff fitting on her mast hoist and withdrew. Kismet was disqualified for carrying a professional. On Sept. 15 a special race will be sailed between Shamrock and Elsiemarie, and another between Queen Mab and Wasp.

## Quincy Y. C. Annual Regatta.

QUINCY—BOSTON HARBOR.

*Saturday, Aug. 25.*

THE annual open race of the Quincy Y. C., sailed on Aug. 25, was marked by two incidents, the sinking of the sloop Mudjekeewis through striking a rock, and the victory of the new Hanley boat Cleopatra, late El Paso, in her first meeting with the Boston boats. The day was clear, with a fresh S.W. wind, there was a large fleet of starters and a very good race. The times were:

## Bay Head Y. C. Third Club Race.

BAY HEAD—BARNEGAT BAY.

*Saturday, Aug. 25.*

THE third and last club race of the Bay Head Y. C. was sailed on Aug. 25 over a 15-mile course in a strong south wind. The club has had a most successful season. The times were;

## Vigilant and Satanita.

THE withdrawal of Britannia in consequence of the loss of her mate and steward by drowning, left only Satanita to meet Vigilant in the final matches of the season, the Royal Dart Y. C., on Aug. 31 and the Start Bay regatta, on Sept 1, both sailed off Dartmouth. The course for the former was a triangle of 10 miles, four rounds to be sailed; all open water. The day was hot and hazy, with a very light easterly wind at the start, 10:30. Satanita crossed first, but with Vigilant to windward, the latter soon running ahead and having a lead of 2m. 3s. when she turned the first mark at 11:04.

The next leg was to windward, against the tide, and though the speed was slow, Vigilant still gained, the times at the Eastern Mark being:

Vigilant.....12 00 04 Satanita.....12 11 55

They headed for the line with a light breeze over the starboard quarter, and were timed at the end of the first round:

Vigilant.....12 28 40 Satanita.....12 43 40

On the reach to the Skerries, Vigilant still gained, the times being:

Vigilant.....12 55 00 Satanita..... 1 11 40

Thus far they had made about 5 miles per hour, but now the wind fell even lighter, the two drifting for hours in the attempt to cover 3 miles to the next mark, Vigilant finally turning it at 5:55. The match for the 40-rating class was ended by the sailing committee at the end of the second round, but the race for the two large yachts was declared off, not having been finished within a time limit of 8 hours. No notice of this was sent to either yacht by the committee, and it was not until Vigilant's steam tender Pelican hunted her up at 8 P. M. that the decision was known. The Pelican was sent from Vigilant to notify Satanita, and finally towed both yachts in.

From all reports, the action of the sailing committee of the Royal Dart Y. C., in declaring the race off under a time limit clause is most unfair; this restriction, if it exists at all, being a dead letter; and the committee, in the case of the 40-raters, having exercised its privilege of ending the race at the conclusion of the round. The action has been generally condemned by the English papers, the *Pall Mall Gazette* saying: "The Dartmouth Sailing Committee treated Mr. Gould very badly in view of the leniency with which offences against the rules of the Royal Yachting Association have been treated throughout the season. It is a great pity, and Mr. Gould now has a real and tangible grievance. We do not remember any previous occasion upon which the clause has been enforced that unless completed within eight hours a race shall be void."

Harry Horn cables to the Boston *Herald:* "No such conduct has ever been known on this side, and it is the most maladroit piece of work yet done in the Kingdom. It certainly puts the club in an unenviable position. The weak-kneed action of the committee is condemned by every one. The result is sure to affect the future regattas of this club, especially as the prizes were allowed to the 40-rators, Carina and Corsair, which sailed over the same course and under the same conditions. The Royal Dartmouth Club some years ago was guilty of left-handed conduct to the Prince of Wales when he sailed the Formosa there. The committee are always getting into some muddle. The decision is very unjust, for the Vigilant was honestly entitled to the prize."

The Start Bay regatta, on Saturday, was sailed under similar weather conditions in all respects, but the course was different, the triangle being 14 miles round, sailed three times or 42 miles naut. They started at 10:30 in a very light air from north of east, Vigilant being 2m. ahead at the end of the first leg, 5 miles. For a time they were lost in a haze, being invisible at the second mark; but the round ended:

Satanita.....12 35 08 Vigilant.....12 35 49

They started the second round nearly even, but at the mark Vigilant again led:

Vigilant..... 1 17 23 Satanita..... 1 20 27

Again they disappeared in the haze, and when once more in sight, over an hour later, Vigilant had rounded the mark, but Satanita was making her way in, having given up. Vigilant ran up until near the line and was then becalmed and unable to finish. The sailing committee obligingly shifted the line, and finally Vigilant managed to work across, being declared the winner at the end of the second round.

## Lieut. William Henn, R. N.

A cable message from London on Sept. 1, brought the news of the sudden death of Lieut. Henn, the best known and most popular British yachtsman who has ever visited America. As usual, he and Mrs. Henn have spent the summer aboard of Galatea on the South coast, and he was lately taken ill at Dartmouth. He was taken to his Irish home, at Kildysart, where he died shortly after his arrival. Lieut. Henn and his cutter Galatea were the subjects of the two supplement plates of the *Yachting World* of Aug. 17, accompanied by the following account of his life:

"Lieut William Henn ,R.N., was the eldest son of Mr. T. Rice Henn, D. L., and Recorder of Galway, of Paradise Hill, on the estuary of the Shannon. Born in 1847, he entered the navy in 1860 as a naval cadet in Trafalgar. The crack steam frigate Galatea had him as a midshipman from 1862 until 1866 on the North American and West India station, and during the American civil war. He was present at the bombardment and capture of the forts at Cape Haytien, and at Jamaica during the negro insurrection in 1865. He afterward served in various ships in the East Indies and on the coasts of Africa, Arabia, and Madagascar, taking part in the Abyssinian war. Lieut. Henn acted as transport pilot in the Red Sea, and while cruising in command of ships' boats, captured and destroyed many Arab slave dhows, for which service he was especially mentioned in despatches. In 1872 he was selected from many volunteers, and went to Africa as second in command of an expedition organized by the Royal Geographical Society for the search and relief of Dr. Livingstone.

"In 1870 he built his first yacht, an open lugger-rigged whaleboat, which he sailed from Plymouth to the Shannon (round Cape Clear), and in her made several voyages round the coast of Ireland. In 1874 he was by his own request placed on the retired list of his rank in the navy, and that year purchased the 31-ton cutter Minnie, built by Ratsey. For two years and a half this little vessel was his home; in her he sailed nearly 15,000 miles, including a winter voyage to the Mediterranean, where in 1877 she won for him the Grand Prix at the International Regatta, Cannes (the forerunner of the French Mediterranean regattas).

"In 1877 he bought the 80-ton yawl Gertrude, built by Alfred Payne. His wife is as much a sailor as himself, and for seven years they lived on board, being continuously in commission except when the yacht was undergoing repairs. In that time they covered upwards of 40,000 miles, always wintering up the 'Straits,' and sojourning in home waters during the summer.

"At the first Nice international regatta in 1879 Gertrude secured the 'Grand Prix,' and the following day the Prince of Monaco's cup. Subsequently she again carried off the 'Grand Prix' at Nice and 'Prix de Monte Carlo,' besides others at Cannes, Mentone, Genoa, Ajaccio, Oran, and several ocean matches at home and abroad.

"For years he had wished to test the English type of racing yacht against the American, and in 1884 decided to challenge for America's Cup. He gave an order to Mr. Beavor Webb to design a 90-ton racing cutter expressly for that purpose, and the challenge was sent to the New York Yacht Club before the yacht Galatea was launched. Sir Richard Sutton, at the same time determined to challenge with Genesta, and the joint challenge was promptly accepted by the New York Yacht Club, and for Galatea they agreed to waive the six months' notice required by the deed of gift. Galatea was constructed throughout of Siemens-Martin steel by Messrs. Reid of Port Glasgow, and was the last of the big cutters built under the 1730 rule. Her principal dimensions were: Length, L. W. L., 87ft., length over all, 102 ft. 7in., beam, 15ft., draught, 14ft., ballast (lead keel), 81 tons; sail area, Y. R. A., 8,230 sq. ft.

"Owing to defective casting of lead keel she did not stand up to her canvas as well as was anticipated. She was also very unlucky, experiencing many accidents including breaking her mast in three pieces during the Royal Ulster regatta. These mishaps prevented her from crossing the ocean with Genesta; but the following year, having been altered and improved, she sailed for America with her owner and his wife on board, making a summer passage (under her ordinary trysail) of thirty days to Marblehead, touching en route at the Azores. She was beaten for the cup by the Mayflower, an 86ft., Burgess sloop, an enlarged Puritan, but the contests took place in light weather, which did not admit of either vessel attaining a high speed.

"Soon after Galatea arrived in New York, before racing for America's cup, Lieut. Henn issued a challenge to any single-masted American yacht to sail a match against Galatea from Sandy Hook lightship to and around the islands of Bermuda and back, about 1500 miles. He left the challenge open for a month, but it was not accepted. She sailed home the end of October, 1887, under her ordinary storm sails, and, in spite of a week's head winds and a heavy easterly gale which compelled her to heave to for 19 hours, made the passage from Sandy Hook to Roche's Point in 17 days, 17 hours. Her best day's run was 257 miles. She also stopped for some hours fishing on the banks of Newfoundland. Mrs. Henn, who is an excellent navigator, accompanied her husband in both trips across the ocean, and is the first lady that crossed the Atlantic in a racing yacht. She also made a cruise of 1,000 miles with him round the reefs and keys of Florida and the Gulf of Mexico in a 28ft. center-board skip jack, when the party narrowly escaped with their lives at Jupiter Inlet.

"Lieut. Henn was on the Council of the Y. R. A., and was a member of the following yacht clubs: Royal Cork, Royal Northern, Royal Alfred, Royal Clyde, Mudhook, Royal Thames, Royal Torbay, Star Bay, and Nice; and honorary member of the New York Yacht Club, Eastern of America, Corinthian of New York, Corinthian of Marblehead, Biscayne Bay (Fla.), and Royal Nova Scotia Yacht Squadron.

"Lieut. and Mrs. Henn used Galatea for a home, and kept her afloat all the year round. The Lieutenant always navigated and commanded his own ship, was a J. P for Clare, and in 1886 refused the office of High Sheriff for that county."

## Current Criticism.

THE withdrawal of the Britannia and the cancellation of all her engagements by the Prince of Wales indicates one of two things—either he has had enough of such close racing as the Vigilant has given him, or he feels that in the drowning of Mate Simons the Britannia has lost her mascot. Sailors, not excepting princes, are superstitious to the verge of fatalism. The Prince knows as well as Capt. Carter how far the genius of such an accomplished yachtsman as Mate Simons weighed in all the tricks and devices that have been so prodigally employed on board the Britannia this season. It is hardly probably that the Prince would needlessly inflict so keen a disappointment upon the public, did there not exist some very good reason for his imperative action. That there is something more in it than sympathy for his drowned sailors needs not the saying. It is to be doubted even if the Prince will sail the Britannia for the Cape May cup. He will, in all probability, adhere to his determination of absolute withdrawal, and allow Mr. Gould to sail the Vigilant over the course alone and take the cup home. There will be no unpleasant onus of defeat in such a course, and after his numerous victories the Prince can well afford to be generous.—*Mail and Express.*

The Prince of Wales has withdrawn his yacht Britannia from all the races yet to be sailed this season, and the boat is to be laid up for the winter.

No other boat can be substituted for the Britannia as the defender of the Cup without the consent of the New York Y. C., and it is not likely that will be given in the absence of any good reason for Britannia's default. It is said the Prince's determination to withdraw from the regattas is due to the accident on Saturday last, by which the chief officer and steward of Britannia lost their lives. But this is scarcely a satisfactory reason for the cancelling of the Cape May cup race.

There are those who believe that Albert Edward is unwilling to risk the loss of the honors he has already won, and is afraid of Vigilant in the challenge race. But Mr. Gould declares his intention to insist on the contest, and claims that if Britannia does not sail against Vigilant she must give up the cup.

Mr. Gould will bring his yacht home with a fairly good record at all.—*New York World.*

The American press has been very wrath about the jockeying it is alleged the Vigilant has undergone over here at the hands of Britannia. The New York FOREST AND STREAM has very kindly phonographed all the wild shrieks of the alarmed American Eagle, but as far as we can understand them, nothing more than fair play is required for Vigilant, which means that she must not be covered in running down the wind, she must not be luffed if she is trying for a passage to windward, and she must not be weather bowed. All these practices are said to be the meanest kind of jockeying, and what the Americans want is to see a sailing match rendered as uninteresting and purposeless as a steam yacht race, mainly because under such conditions, Vigilant may oftener sail home to the winning line ahead of England's champion, Britannia. It should, however, be noted that Vigilant herself has made several feeble attempts at this contemned jockeying, and no one has complained about it on this side of the water. The only way to meet the wishes of the Americans would be to sail a match something like the experimental squadron sailed half a century ago, each going off on opposite tacks of an hour duration, for half a dozen hours or so—but even then, if there should be a run home, there might be some blanketing. We do not think anyone one this side of the water connected with Vigilant has complained of the "jockeying," and we think her friends at home have made a demand on our politeness, in giving Vigilant at all times the right of way, which cannot be conceded.—*The Field.*

An impression appears to have been created that Vigilant was run on to the outlying portion of the Needles Chalk Rocks to avoid a match with Britannia over a dead to windward course. Coloring was given to these surmises by the rather hasty withdrawal of the cup and its subsequent presentation to the Royal Dorset Yacht Club; then there was the fact that the owner of the Vigilant at first declined a dead to windward match, and at last only reluctantly agreed to sail it. Beyond this, Vigilant started to sail to the rendezvous in a rather dilatory fashion sometime after Britannia had started in tow, and the owner's yacht Atalanta steamed away for Southampton Water. It was undoubtedly unreasonable to conclude from these incidents that the Vigilant was purposely sailed over the rocks, and Mr. Gould has been made the victim of an unforunate combination of circumstances. Atalanta had merely gone up to Netley to take aboard some officers of the American warship Chicago, and it was pre-arranged that she should take Vigilant in tow on her return. She caught her up off Lymington, but, as there was then a grand sailing breeze, it was thought time would be saved by Vigilant proceeding under sail, instead of losing minutes getting the towing line on board. The reported loss of the centre plate, and subsequent finding it jammed in the case, was made a great deal of, and no doubt it was somewhat stupid not to have known at once what had happened to the plate. It would be useless to attempt to disguise the fact that the manner Vigilant has been managed in this country has created, rightly or wrongly, an unfavorable impression. There was great delay in getting her officially measured, although her spars and ballasting were continually being altered, and there were all sorts of rumors as to the object of her steam tender going alongside every morning before a race. Of course a great deal of the talk was mere gossip, yet it cannot be denied that the gossips had some grounds for their circumstantial stories—.*The Field.*

## The Jockeying of Vigilant.

THE Glasgow correspondent of the Boston *Globe* has show so strongly his partiality for Vigilant in her British races that his story of the much discussed "jockeying" by Britannia must be accepted as at least perfectly fair to the American boat. According to the following account it was the luffing of Vigilant which gave Satanita the prize, the object of the American yacht being to prevent Britannia from winning:

"The three cutters crossed the line together, with Vigilant sandwiched between Britannia and Satanita. It will interest your readers to know that it is confessed the crew of Vigilant, after their drilling by Britannia, started Vigilant alongside Britannia

"The match had no sooner started than Vigilant, under the lee of Britannia, luffed her up, and being under her lee bow, that cutter was in the position of overtaking yacht. This meant, by the Racing Association rules, that if Britannia touched a loose ropeyarn aboard Vigilant, Britannia was out of the race.

"Capt. Carter being in the overtaking vessel took care not to touch any flying ropeyarns, and while doing so found himself across the Solent at Southsea instead of on his way to the lee mark. This suited the Southampton cutter, Satanita, perfectly, and with spinaker set she ran off with a lead which landed her the prize. Satanita near the finish had the other two closing up, but not enough to be dangerous.

"Britannia finding Vigilant beyond the reach of a weather bower, and on the verge of doing what she has done before, sailing round Britannia, as soon as her bowsprit was clear of Vigilant's stern, bore up, and with spinaker set ran for the mark, to find Vigilant just one minute astern."

## Canarsie Y. C. Corinthian Regatta.

THE Corinthian regatta of the Canarsie, after being once postponed, was sailed on Aug. 25, the course being 10 miles. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| CLASS A. | | | | |
| Welfare | 2 51 30 | 5 02 45 | 2 11 15 | 2 11 15 |
| Lona | 2 50 35 | 5 05 25 | 2 09 50 | 2 07 29 |
| Defiance | 2 50 30 | 5 19 27 | 2 28 57 | 2 22 13 |
| Iona | 2 50 00 | Withdrew. | | |
| CLASS B. | | | | |
| Caddie | 2 47 58 | 4 49 20 | 2 01 22 | 1 58 |
| Janet | 2 45 30 | 4 48 05 | 2 02 35 | 2 01 |
| Siren | 2 48 00 | 4 55 30 | 2 07 30 | 2 04 |
| Canarsie | 2 52 33 | 4 54 59 | 2 02 26 | 2 |
| CLASS C. | | | | |
| Meteor | 2 55 50 | Withdrew. | | |
| Flirt | 2 56 20 | Withdrew. | | |
| Ideal | 2 56 30 | 4 55 55 | 1 59 25 | 1 59 25 |
| CLASS D. | | | | |
| Ripple | 2 55 34 | Withdrew. | | |
| Pepita | 2 55 52 | Withdrew. | | |
| Strike | 2 55 30 | Withdrew. | | |
| Anita | 2 56 18 | 5 13 40 | 2 17 22 | 2 15 01 |

Meteor broke the jaws of her gaff, and Pepita capsized as she was making the last turn.

### The Cape May Cup

AS EVENTS have shown, the much talked of "cowardly backdown" of Britannia has only kept her out of two drifting matches, the final races of the season, as her owner has accepted Vigilant's challenge for the Cape May cup. The race is set for Wednesday, Sept. 5, and if Vigilant's sails are all right and her headstays stretched, and nothing goes wrong with her centerboard, it will probably be sailed on that date. The course is from off Alum Bay pier, Isle of Wight, out of the Needles passage to the western end of the Cherbourg Breakwater; thence to Cherbourg Roads out of the eastern end of the Breakwater, and back through the Needles channel to the starting line, a total distance of about 122 miles.

The start will be made at 8 A. M. and it is reported that it will be a time start, with an interval to cross in, instead of the regular one gun start. Vigilant reached Cowes on the afternoon of Sept. 3 after a hard passage from Dartmouth, being obliged to put into Portland Roads. The wind on Tuesday promised a good race, with a reach both ways.

---

As we go to press, after the above was in type, the *Evening Sun* publishes the following dispatch:

COWES, Sept. 4.—The Vigilant has met with another mishap, which may possibly prevent her starting in to-morrow's race with the Britannia for the Cape May cup.

On her passage from Portland to this place yesterday she reached a point inside the Needles, near Hathergood Point, at 1 o'clock.

A sudden shock was felt, indicating that she had struck a rock or some other obstruction, and it was found that she had lost her center board.

Howard Gould and Mr. Boyd, who were sitting at luncheon had a narrow escape from serious injury.

As the boat struck, the crank flew from the centerboard winch and struck the corner of the table at which they were sitting with such force as to break off a large piece of the top. The cogs were torn from the windlas and the entire centerboard apparatus was generally disarranged.

Capt. Haff is not certain that the boat struck, though he is not prepared to say that she did not.

He thinks it possible to have the boat repaired in time to start in the race.

If not he says he will race without the board.

Examination shows that the casting broke, throwing all of the weight of the board upon the chain.

Neither of the Goulds will be on board the Vigilant to-morrow, nor will the steam yacht Atalanta accompany the Vigilant, on account of a death in the family of the Messrs. Gould's mother.

## YACHT NEWS NOTES.

The third of the series of races for the silver tea service offered by the boat owners of Master's boat house was sailed Saturday, Aug. 25 in a strong S.W. breeze. Two 16ft. catboats competed. George Gardener's Syb and Why Not, owned by George Masters.

The course was from the red buoy off Bridgeport Light to a stakeboat anchored about a mile and a half off Black Rock light, twice around, making a distance of 14 miles.

Syb's sails set badly, and she was handled in a very poor manner, reaching too far too far to windward on the last round. Why Not won by 9.45.

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| Syb | 3 03 27 | 5 12 22 | 2 08 55 |
| Why Not | 3 03 46 | 5 02 50 | 1 59 10 |

Judges, J. G. Pepper, A. S. Meloy.

## Canoeing.

### FIXTURES.

SEPTEMBER.

3-5. Passaic River Meet.
5. Ianthe, An., Passaic River.
15. Red Dragon, Fall Regatta, Delaware River.

### A Win for Mr. Howard.

A MATCH was sailed between the canoe Spruce (Mr. J. A. Brand) and the American canoe Yankee (Mr. W. Willard Howard) on Aug. 17, off Salcombe, the course being from the yacht Tina to a flagboat moored up the South Pool Creek, thence to the second quarantine buoy in the Widegates, and thence around the Tina, four times round, leaving all marks to port, 9 miles.

The wind was very light and fluky, and the canoes started at 3 P. M. Just before the first gun Spruce shoved off from the Tina, and, as the flood tide was making she dropped to leeward fast, not having sufficient wind to stem the stream. This was an unfortunate beginning, because Yankee, launching from Mill Bay at about the same time, but further to windward, had just enough ground to travel to drift over the starting line 1m. 32s after the second gun had gone. Spruce could not get over until 12m. 25s. had elapsed, by which time Yankee had picked up a following air, and disappeared up South Pool, thus obtaining a commanding lead, which she kept through the first round. The second round was uneventful, but at the conclusion of the third things became exciting. Spruce brought a breeze down on Yankee and looked like forging ahead for the first period during the race, but Yankee, catching a light puff, drew away and cleverly sidled across the bows of Tina and got away 13m. 31s. to the good on the last lap, and a tedious race finished at:

Yankee (winner).....6 58 26 Spruce.....7 08 22

—*The Field.*

[As stated last week, Spruce is a canoe-yawl of 5ft. 6in. beam, and the race, even if other than a fluke, would prove nothing one way or the other.]

### Wawbewawa War Canoe Association.

THE Wawbewawa War Canoe Association has already established a reputation in canoeing circles about Boston, and it seems destined to soon become one of the leading canoe clubs of New England. Starting July last with but nine members, it now has a membership of nearly forty canoeists, all of whom are active paddlers, and much interested in the American Canoe Association.

On Saturday, Aug. 25, the Waltham C. C., of Waltham, Mass., held its annual regatta on the Charles River, in the presence of about 3,000 spectators, and it was here that the Wawbewawas made their enviable record. They succeeded in winning first place in the war canoe, double blade decked canoe, single blade tandem canoe and tournament events, besides making the second place in several other races. There were twenty-one fine silver cups offered for first prizes, and the Wawbewawa boys captured fourteen of these as well as seven of the second prizes. The war canoe race proved to be the most interesting, as events of this kind have never been seen in the vicinity of Boston. The race was well contested from start to finish over a mile straightaway course. The Waltham, Arlington and Wawbewawa crews were all entered, and the latter crew again showed the results of careful training under the efficient command of Capt. Louis S. Drake by winning the race with several lengths to spare. The names and positions of the crew are as follows: F. J. Burrage stroke, Wellington Wells No 2, R. D. Smith 3, M. X. Colon 4, J. W. Brown 5, C. R. Robertson 6, F. C. Perry 7, W. L. Perry 8, L. S. Lrake, Capt., 9.

### A. C. A. Membership.

ATLANTIC DIVISION: Marshal L. Bacon, Tarrytown, N. Y.

### "Valley, Plain and Peak."

THIS is the title of a little gem of a brochure recently issued by the Great Northern Railway Company, which is as unique in its design as it is delightful in its presentation. The letter press is concise and the embellishment profuse and charming. Step by step it carries the reader along its entire route from Buffalo to the Pacific by stages rapid and engaging, pointing out by full page cuts and tinted vignettes each salient feature of landscape and economic industry, *en passant*, until he presently forgets that he is not an actual passenger, and that it is the panorama which moves. Throughout the expansive game regions and stock ranges we have exquisite portraits of every animal listed on the sportsman's repertoire, with cowboys, Indians, dudes and summer girls thrown in; and accompanying each transition on the route is an enthusiastic quotation from pens of prominent visitors who have seen and admired the wonders and beauties of this magnificent transcontinental line. Altogether it is a beautiful conception and suggestive of rich enjoyment and blooming health filling the desires of all who love to range afield. During September there are low round-trip rates from Duluth and St. Paul to prominent hunting resorts on the route.—*Adv.*

## Rifle Range and Gallery.

### Golden Gate Rifles.

SAN FRANCISCO, Aug. 26.—Rifle notes from the Golden Gate are written this week in a temperature that astonishes old San Franciscoans. The U. S. Weather Bureau recorded to-day 92° in the shade. This, however, did not discourage sundry lunatics from "toteing" pistol and rifle to Shell Mound for the semi-monthly all-comers' contests of the Columbia Pistol and Rifle Club.

The honors fell to-day, with pistol, to Smith Carr, and with rifle to F. O. Young.

Pistol, Blanding medal, 50yds., re-entry:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| S Carr | 10 | 9 | 10 | 10 | 9 | 10 | 10 | 8 | 10 | 10—96 |
| | 10 | 10 | 10 | 10 | 7 | 9 | 9 | 10 | 9 | 10—94 |
| | 9 | 10 | 10 | 10 | 9 | 9 | 9 | 10 | 10 | 8—94 |
| F O Young | 10 | 8 | 8 | 9 | 10 | 10 | 8 | 9 | 10 | 10—93 |
| | 8 | 10 | 9 | 8 | 9 | 10 | 10 | 9 | 9 | 9—92 |
| Dr Rodgers | 10 | 9 | 7 | 10 | 7 | 10 | 10 | 10 | 9 | 10—92 |
| | 8 | 9 | 8 | 9 | 9 | 9 | 10 | 9 | 9 | 8—88 |
| A H Pape | 9 | 8 | 10 | 9 | 10 | 9 | 8 | 10 | 10 | 9—92 |
| C M Daiss | 10 | 8 | 9 | 9 | 8 | 9 | 8 | 9 | 10 | 10—90 |
| | 9 | 10 | 9 | 9 | 8 | 7 | 8 | 10 | 8 | 7—85 |
| F Poulter | 8 | 7 | 8 | 9 | 8 | 8 | 8 | 9 | 6 | 9—80 |

The other competitions of the Columbia Pistol and Rifle Club resulted as follows:

Roos medal for all-comers, target rifle:

F O Young.....10 9 9 9 10 8 10 8 10 8—91

Dr. L Rodgers 84, A. Johnson 84, H. Hellberg 81, C. M. Daiss 81.

Glindeman medal, military rifle: F. Poulter 76, A. H. Pape 72.

The California Schuetzen Club completed their fall shoot to-day. Several of our champion shots were conspicuous by their absence. Excellent scores were made. Strecker won the king medal, 336 points in 200 shots.

Fine scores were made on the honorary target, re-entry, E. Schuster and J. Utschig each made 74 rings, L. C. Babin 73, Strecker 72, C. Heeth 70, D. McLaughlin 69, and a long string of 68s, etc.

On the man target Utschig made 19 19 20 20—78, Walden 75, A. Johnson 72, W. Glindeman 71, etc., etc.

The Germania Club and the Schuetzen Verein held monthly bullseye shoots to-day.

The militia were practicing extensively, but no phenomenal shooting was done. ROEEL.

### Zettlers' Bi-Monthly.

CYPRESS HILLS PARK, Sept. 1.—The Zettler Rifle Club held its bi-monthly practice shoot in this park this morning. The scores of the man target were: R. Busse 57, L. Buss 57, F. Ross 55. L. Flach 55, M. B. Engel 53, C. G. Zettler 53.

Bullseye target, 3 shots, possible 3, 4in. center: H. Holges 1, G. Kraus 1, F. Ross 1, L. Flach 1, R. Busse 1, C. G. Zettler 1.

Ring target:

### Sea Girt.

SEA GIRT, N. J., Sept. 3.—The fourth annual meeting of the New Jersey State Rifle Association was opened this morning. Teams from the following States are in camp: Maine, Connecticut, New York, New Jersey, Pennsylvania, Georgia and the District of Columbia. During the past two years great improvements have been made in the ranges and the buildings located on the grounds, a fine club house being one of the special features. The accommodations for the comfort and convenience of the militia men and visitors is all that could be desired. The shooting to-day has been confined to pool and continuous matches. All of the teams have been engaged in shooting over the various ranges from 200 to 600yds., thus giving the men an opportunity to get their rifles sighted and become somewhat accustomed to the range. The morning opened dull, with heavy clouds rolling in from the east, driven by a strong northeast gale. If the weather holds fair the meeting will develop the largest attendance since the range was opened. To-morrow (Tuesday) the Interstate and Hilton trophy matches will be shot off. On Wednesday the Regimental team match (interstate) will be shot. This match is one of the most interesting features of the whole meeting to the public visitor. On Friday the President's and the Department of Rifle Practice matches will be shot. On Saturday comes the Wimbledon cup match and the wind up of continuous matches. Our next week's issue will contain a full account of the meeting.

### Rochester Schuetzengilde.

THE tenth annual shooting tournament will be held at the range at Rosenbauer's, Sept. 19 and 20. National rules and regulations to govern; distance 175yds.; any rifle not over .44cal. may be used; any sight not magnifying may be used. Four standard American targets, two for off-hand shooting and two for peg-rest shooting. On large caliber off-hand targets $50 in cash guaranteed and divided into ten targets. Standard American rest target to be shot at from a peg rest, counting from 4 up to 12. The club, after deducting 33⅓% of all moneys taken in on this target, will divide the balance on the percentage plan into one prize for every other contestant. Standard American rest target, same as above with this exception, that .22cal. rifles only will be used. Prizes, three handsome solid gold badges. Standard American off-hand target for .22cal. rifles only. There will be twelve valuable merchandiseprizes given on this target. But one prize given to each contestant. Twelve highest scores to take the prizes. Trains to the range every hour from Bay R.R. depot, North street. This shoot is open to all comers and all lovers of rifle shooting are cordially invited to attend.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable.*

### Rifle at San Antonio.

| Texas Field | 6 | 9 | 8 | 7 | 10 | 7 | 9 | 8 | 10 | 7—81 |

O. C. G.

### Schlicht Rifle Club.

WEST NEW YORK, N. J., Aug. 26.—The weekly gallery shoot of the Schlicht Rifle Club held at headquarters this evening, brought eleven members into competition for the class medals. The following scores were made: Medal winners. Geo. Schlicht champion medal, Jacob Diehl first class medal, Geo. Lautenberger second class medal, Chas. Meyer third class medal. Scores: Geo. Lautenberger 228, Chas. Meyer 232, Geo. Dorr 238, Jacob Schlicht 228, Wm. Schlicht 228, Fred. Lambrix 218, Geo. Richert 223, Aug. Meyer 227, Capt. J. Dedrich 230, Jacob Diehl 229, Geo. Schlicht 240.

### Greenville Rifle Club.

TEN members of the Greenville Rifle Club assembled at the headquarters on Aug. 31 to participate in the weekly gallery shoot. Score:

| | | | |
|---|---|---|---|
| M. Collins | 237 233 | C Boag | 232 235 |
| J Boag | 233 235 | Scheeline | 230 232 |
| Agneau | 221 226 | Chavant | 232 ... |
| Graef | 222 216 | Reuker | 196 209 |
| Hill | 217 ... | Holzappel | 201 213 |

### Excelsior Rifle Club.

JERSEY CITY, N. J., Aug. 28.—The following appended scores were made by the members of this club in regular practice this evening on our gallery range; 10 shot scores, distance 75ft.: L. P. Hansen 245, J. Binns 241, D. Kastendiek 237, R. H. Duff 234, James Hughes 233, G. G. Williams 233, G. H. Ruhland 220, Wm. Hughes 215.

### Conlin's Gallery.

MR. JAMES S. CONLIN announces that his rifle gallery in the Manhattan Athletic Club building, corner Madison avenue and Forty-fifth street, is now open for the fall and winter campaign. Mr. Conlin, by the way, has a number of ladies among the expert scorers at his range.

## RIFLE NOTES.

The New York Central Corps, Capt. D. Meerse, will hold its fall outing at New London, Conn., on Sept. 9, 10 and 11.

The Richmond County Schuetzen Corps, Capt. Wm. Stahlback, will hold its fall shoot at Silver Lake, Seyt. 12.

The German-American Society will hold a two days' festival in Ridgewood Park, Sept. 17 and 18.

## Trap-Shooting.

### FIXTURES.

Sept. 4-7.—NEW LONDON, Conn.—Standard Keystone Co.'s seventh annual tournament. James W. Clinton, Sec'y.

Sept. 11-13.—INDIANAPOLIS, Ind., second annual tournament, on the grounds of the North End Shooting Club.

Sept. 19 20.—Interstate Manufacturers' and Dealers' Association's tournament, under the auspices of the Chattanooga Gun Club, at Chattanooga, Tenn.

Sept. 20.—PENACOOK, N. H.—New England Shooting Association championship tournament, under auspices of Penacook Gun Club.

Sept. 25-20.—Rochester (N. Y.) Rod and Gun Club tournament, with Central New York League team shoot, at Rochester. J. B. Mullan, Sec'y.

Sept. 26.—Central New York Trap-Shooters' League, sixth tournament, at Rochester.

Oct. 3-5.—West Newburgh (N. Y.) Gun and Rifle Association tournament. Last day live birds. W. C. Gibbs, Sec'y.

Oct. 10-11.—Interstate Manufacturers' and Dealers' Association's tournament, under auspices of the Palmetto Gun Club, at Charleston, S. C.

Oct. 11.—LEWISTON, Me.—New England Shooting Association championship tournament, under auspices of Androscoggin Gun Club.

Oct. 22-24.—Emerald Gun Club tournament, at Dexter Park. Targets and live birds. Dr. G. V. Hudson, Sec'y, 9 Madison street, New York.

Oct. 24.—Central New York Trap-Shooters' League, seventh tournament, at Utica.

Oct. 25.—RICHMOND, Me.—New England Shooting Association championship tournament, under auspices of Richmond Gun Club.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

### At New London.

NEW LONDON, Conn., Sept. 4.—*Special to Forest and Stream:* The Standard Keystone tournament opened under favorable auspices. The first event on the programme had twenty-nine entries. Heikes took first money alone with 15 straight; Wheeler second with 14.

Second event, with same number of entries: Glover was first with 20 straight, John Fulford second with 19. Lovell Diamond bicycle was won by Gales with 24 out of 25; Cady, Sterry and Glover 23.

First money in fourth event went to Heikes and Tucker.

Four teams entered in special race. They were Oneida County Sportsmen's Association, New York; Boston Shooting Association, Worcester Sportsmen's Association, Connecticut State team. Race lasts four days.

Among those present are Col. Anthony, Ed. Fulford, Bartlett, Heikes, Van Dyke, Dickey, Glover, Capt. Mascroft, Brantingham, Bennett brothers, Tucker, Wheeler.

Targets are thrown fast and far, making shooting extremely difficult, especially as everything is at unknown angles. Every prospect of a most successful four days' shoot. EDWARD BANKS.

## DRIVERS AND TWISTERS.

The Independent Gun Club, of Reading, Pa., will hold its first annual tournament on Oct. 3 and 4, on the grounds of the Reading Shooting Association, Three Mile House, Reading, Pa. The Independents will be assisted by John Gates, James Schmeck, John Shaaber, Brooke Harrison and George G. Ritter. This tournament was originally set for Sept. 26 and 27, but owing to the shoot of the Harrisburg Shooting Association, mentioned elsewhere, it was thought better to alter it to the dates first above mentioned. The programme for both days is identical and calls for 195 shots. Event No. 8 in each day's programme is a 25-target race for teams of three men. Targets are thrown at two cents each and purses will be divided according to the American Association rules.

The Harrisburg Shooting Association will hold a towo days' tournament on Sept. 27 and 28. Live birds and targets make up the programme. Special features are two silver trophies which are offered for competition.

In FOREST AND STREAM'S account of the Pennsylvania State shoot which took place at Wopsononock, Pa., a note was made of the fact that John Shaaber of Reading could roll tenpins as well as smash targets. Shaaber tied for first prize, a bedroom suit, valued at $40, in a bowling tournament which was in progress in the bowling alley at Hotel Wopsononock during the shoot. Having left Altoona prior to the decision of the tournament, he deputed Herman Smith of that city to roll off his tie, with the result that Herman won, Shaaber becoming the possessor of the bed room suit.

The Binghamton Gun Club, of Binghamton, N. Y., have issued a programme of a "shooting tournament for amateurs only." The dates chosen are Sept 11 and 12. The first day's programme calls for 140 shots and is composed of 10, 15 and 20-bird races. The second day calls for the same number of shots, but the programme includes a two-men team race at 25 targets per man and a 25-target race for an individual championship. All the events are known traps, unknown angles. Shooting commences each day at 9:30 A. M.; targets are thrown at two cents each. The programme concludes with the following: "To the shooting public: This tournament is designed for amateurs only and to preserve it to that end only those receiving an invitation from the management or through some mutual friend will be allowed to participate. The one to whom this is addressed is cordially invited."

The West End Gun Club, of Ottumwa, Ia., have issued the programme of its third annual tournament, which is to be held on Sept. 19 and 20. The club adds $25 each day in amounts of $5 to five separate events. All programme events will be shot under the Parker handicap, viz., winners of first money in any event shoot in the next event at three unknown traps, two men up; winners of second shoot at unknown angles, the balance at known angles; each man's score in the previous event decides his position in the current one. Mr. J. R. Young is secretary and treasurer of the club.

The New Ringgold Gun Club, of New Ringgold, Pa., will hold its third annual tournament on Wednesday and Thursday of this week. Both live birds and targets will be used, the contestants in the live bird events being handicapped according to their previous records. The tournament is under the management of Messrs. B. F. Stamm and R. T. Clayton.

The Ganargua Valley Gun Club, of Palmyra, N. Y., will hold its first annual tournament on Sept. 11, shooting commences at 10 A. M. Eleven out of the twelve events on the programme are at unknown angles, the sixth event being shot under expert rules. Winners of first, second, third and fourth moneys will receive 100, 90, 80, and 70 per cent. of their entrance money respectively; the surpluss will be divided into four moneys, 40, 30, 20 and 10 per cent. as usual.

The first annual tournament of the Lake City Gun Club will be held at Spring Fountain Park, Warsaw, Ind., on Sept. 12 and 13. The programme issued by the club is a varied one, live bird and target events being interspersed in both days' lists. The club adds $15 on the first day and $10 on the second, a citizens' purse of $25, at 15 targets, expert rules, being also included in the second day's programme. Special average prizes are offered by Messrs. C. W. Douglass and H. J. Mansfield. "Professionals will be barred" is a note on the front page of the programme. For further particulars apply to Joe S. Campfield, Secretary.

"Falstaff," a member of the Onondaga County Sportsman's Club, writes that "Partridge and woodcock shooting has been very successful with many of the local sportsmen. All are in a bustle now getting ready for ducks and squirrels, which will be plenty in this section."

The programme of the Interstate Manufacturers' and Dealers' Association tournament, at Chattanooga, is given in detail elsewhere. It is well worth examining.

EDWARD BANKS.

## Maplewood Leads the Jersey League.

THE sixth of the series of team contests of the New Jersey Trap-Shooters' League, held on the grounds of the Myrtle Park Gun Club at Irvington on Aug. 30, drew out only four of the seven teams comprised in the league, a large number of the members not having received any notice of the affair, and the others hearing of it only through the brief notice in FOREST AND STREAM. The Myrtle Parks, South Sides, Climax and Maplewoods materialized, the absentees being the Unions, Endeavors and Brunswicks.

Everything was in good shape so far as the paraphernalia of warfare was concerned, and the Empire targets worked as usual, which means that they worked well. In the office things were not as they should have been, there being no carbon paper, no score pads and consequently no duplicates for the use of the sportsmen's journals, and this notwithstanding the fact that it is a rule of the league that at each shoot there shall be made duplicate scores sufficient in number to furnish a full set of scores to each paper. This was done until recently, in fact, until Secretary Hobart left on his extended Western trip, since which time there has been but little system in the scoring. The manager states that all the score sheets and carbons were in the secretary's possession, but this does not excuse the officials for not having purchased enough carbon and manifold paper to carry them through. In order to get the scores of the team shoot given below we were obliged to make our own copies. In regard to scores of the sweepstakes we were told that if we would make copies without taking the original sheets from the grounds we could do so, but that they could not part with the originals. One member of the Myrtle Parks offered to half the scores if we would copy the other half, but we respectfully declined to do any yeoman's service, hence are not able to publish the sweep scores.

The shooting was of a high order, all the team totals being fair. As usual the Maplewood team pulled out in the lead, and as there is only one more shoot to take place they are morally sure of first prize and the State championship.

Brawny Asa Whitehead, he of the unfailing good nature and 250lbs. of brawn and muscle, pulled out a clean score of 25 breaks in the team shoot, and every break was a clear smash-up of the target. Lean and lank Ferd V. Van Dyke scored a clever 24, as did J. Warren Smith, "Tee Kay" Keller and big Tom Brantingham. Al. Sickley rolled out a 23 score and was happy in consequence. Billy Drake and Yeomans did not hit their accustomed pace, still they did not materially affect the team total.

The standing of the clubs and leaders for individual prizes to date is as follows:

STANDING OF THE CLUBS.

| | Feb. | Mar. | Apr. | May. | June. | Aug. | Total. | Best four scores. |
|---|---|---|---|---|---|---|---|---|
| Maplewood | 113 | 118 | 101 | 118 | 105 | 113 | 668 | 462 |

## Shooting at Lake George.

LAKE HOUSE, Lake George, N. Y., Sept. 1.—This afternoon a shoot took place for a cup offered by the Lake House for teams of five men, 25 targets per man. Saratoga entered a team which carried off the cup with ease; the other teams entered were from the Mohican Gun Club and the Lake House. A. N. Cheney acted as referee, H. W. Packard looking after the scoring department. The following is the score:

## All-America vs. Plainfield.

WHEN the Union Gun Club, of Springfield, N. J., is about to take part in a team contest against any club from in or out of the State, Uncle Sam profits thereby, for the manager of the Unions at once begins to send "notices to appear" to shooters in all directions, not even restricting himself to those in the State, as witness the make-up of the team which represented the Unions in their contests with the South Sides, of Newark, a few years ago, when Pennsylvanians were imported to strengthen the Union team. This practice is not popular in New Jersey, and is condemned by the majority of shooters, although so long as the officers of the Union Club affirm that a man is a *bona fide* member by virtue of having paid $1 into the club treasury, there is no legal way of stopping the importation.

Some time ago a series of best two out of three matches were arranged between the Unions and the Climax, of Plainfield. The first contest, which took place on the Union's grounds, was won by that club, whose team members were from half a dozen or more towns, every member of the Climax team being a resident of Plainfied or a town adjacent thereto. On Wednesday, Aug. 29, the return match was shot on the Fanwood grounds of the Climax Club, and while all but one of the Climax team were resident members, the Union team were from no less than nine different towns. It may be a creditable act to scour a State or several States in order to secure a team, but nevertheless the practice is not a popular one, and should be abandoned.

The weather was all that could be desired on the 29th of August and the grounds were in the best of condition, the committee having this in charge being well up in their duties. "Jack" Benner was on hand with his usual urbane smile, and under the shade of the trees was a long table covered with all the delicacies of the season, so "why should the spirit of mortal be sad?" "Tee Kay" Keller was there and was engaged as usual in doing his famous hustling act. "Dutchy" Smith, the great and only, was there, and Ferd V. Van Dyke was there, lean and jolly as ever, Tom Brantingham, Dan Scott and Will Terry, Billy Pierson, Warry Squires, Harry Campbell, Joe Zeglio, Dr. Zeglio and lots of other hale fellows well met were on the grounds looking after the interests of the local club.

Of the Union members there were E. D. Miller, Springfield; A. A. Sickley and W. N. Drake, South Orange; J. H. Richmond, New York; M. F. Lindsley, West Hoboken; R Williams, Elizabeth; C. C. Hebberd, El Mora; Al Heritage, Jersey City; Ferd V. Van Dyke and R. H. Breintnall, Newark; Wm. Sigler, Montclair; A. S. Soper and F. Terry. Of the Climax team J. Zeglio was the only member not residing in or near Plainfield.

The teams comprised thirteen men each and each man shot at 25 Empire targets thrown from the Empire Co.'s new trap. Before and after the team shoot there was sweeppstake shooting, the scores of which follow those of the team shoot:

## Rochester Rod and Gun Club.

ROCHESTER, N. Y. Aug. 28.—On Friday last members and their friends to the number of 100 or more gathered on the grounds of the Rochester Rod and Gun Club to participate in a programme which had been arranged by a committee appointed for that purpose The club having got nicely located in their new quarters decided to celebrate the occasion by having a sort of house warming. In addition to the fine lunch served by Caterer Compton, the programme included a team race and a free merchandise shoot. The teams were captained by Messrs. W. J. Mann and George Borst, and as usual Mr. Mann had the winning team. In the free merchandise event the committee announced they would handicap the members as they stepped to the score, so that all would have a chance at the prizes, which were 23 in number, high men taking first choice, all ties being shot off. Following are the scores:

Team shoot, 25 singles per man:

| | | | |
|---|---|---|---|
| W J Mann, Capt. | 24 | Geo Borst, Capt. | 18 |

| Kleinhaus | 12 | McCarthy | 17 |
| Sumner | 11 | Perry | 18 |
| Beyers | 18—401 | Hadley | 23—330 |

In the merchandise event, C. Rissinger won first choice, Griffith second, Hadley third, Crouch fourth and Hicks fifth.

## Eureka Gun Club.

CHICAGO, Ill., Sept. 1.—The Eureka Gun Club of this city held their regular weekly shoot on this date. The attendance was small, the near approach of the open season on game taking many out of the city. Numerous parties were heard of as having been formed for trips to famous shooting grounds, probably two-thirds of our members being out of the city for these reasons. We, however, had an enjoyable time. As visitors we had Mr. Pumphrey of Columbus, O., and Mr. Moran of Montgomery Ward & Co. Weather hot, dry and quiet.

Scores: No. 1, 25 singles:

| | |
|---|---|
| Adams | 00110111111101010010110110—15 |

## Onondaga County Sportsmen's Club.

MAPLE BAY, Onondaga County, N. Y., Aug. 30.—The medal shoot of the Onondaga County Sportsmen's Club took place to-day, with the following result, 50 singles per man:

Class A.

| | |
|---|---|
| H McMurchy | 11111011111111111111101111111111111111111111111011111—47 |
| A G Courtney | 01111111111001111111111011111111111111111111111111—45 |
| G Arno | 11111101110111011111111010101011111111111111111111110—42 |
| A C Ginty | 11111010111111010111111111011111111111001010101111111—41 |
| G C Luther | 10010110011001110010110010011111010010111011011111—30 |

Class B.

| | |
|---|---|
| H Jones | 11010110110111111111111101111111111111011111101011110—41 |
| D Walters | 11111101101111101110101111101111101101111111011101—40 |
| Mr Febiger | 11111011111101110111111010001111111001111111111111011—40 |
| G Mosher | 01010010111111101111011001011111111101111111001—35 |
| A R King | 10011101011011101111111010100101110111110101111011—35 |
| G Wright | 10101011111010101101111101001011010111101011110101—33 |
| J Herman | 11001110101111010101110011101101100111101011—33 |

McMurchy won the medal in Class A for the second time. In Class B, H. Jones won the medal for the fifth time and it now becomes his property.

After the medal shoot, Courtney and McMurchy chose sides for a team race at 10 targets per man. The result was an easy victory for Courtney's team by 7 targets. Scores:

| Courtney's Team. | | McMurchy's Team. | |
|---|---|---|---|
| Courtney | 9 | McMurchy | 8 |
| Arno | 9 | Febiger | 9 |
| Ginty | 8 | Ayling | 8 |
| King | 10 | Mosher | 5 |
| Herman | 5 | Prittic | 2 |
| Steele | 7—48 | Holloway | 9—41 |

Mr. Febiger, who shot on McMurchy's team, hails from New Orleans, and shot as a guest of the club.

FALSTAFF.

## Wadding Material for Shotguns.

*Editor Forest and Stream:*

The American Testing Institution will conduct a series of comparative tests on wads of different materials and sizes for the purpose of determining the question as to what constitutes the best wadding material, and the most advantageous method of wadding for both black and nitro powders in shotguns.

Various guns will be used with different chambers and different diameters of bore of the same caliber and the several lengths of cases employed.

Parties desiring to have any new material intended to take the place of felt tested will kindly submit their samples to the institution before Aug. 31. No charges will be made for testing such material and any one interested in the proposed trial is at liberty to witness the experiments

The tests will commence Aug. 26 and be continued indefinitely. The result of the trial will be published in these columns.

AMERICAN TESTING INSTITUTION.

DEXTER PARK, Brooklyn, E., N. Y.

## Vernon Gun Club.

VERNON, Texas, Aug. 27.—The regular club shoot, held on this date resulted as follows: Club shoot, 15 singles and 3 pairs:

| | | |
|---|---|---|
| Lorance | 111111111111110 | 10 10 00—16 |
| Cooke | 110011110111011 | 10 10 11—15 |

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## The Soo Gun Club.

"AWAY up North," where old Lake Superior's waters kiss their final farewell to its rugged shores and go tumbling over the rocks into the beautiful St. Mary's River, a few lovers of the gun a short time since formed themselves into an organization and called it the Soo Gun Club.

This year the club held its first annual tournament. The boys were very green at the business, of course, but they were up to snuff on one thing, and raised the "added money" among themselves and a few liberal citizens of the town before the shoot.

The attendance was not large, but the affair was a success in every particular. No kicking was heard, and everybody seemed not only satisfied, but pleased with the manner in which the thing was run. This was due, no doubt, to the able management of John Parker, of Detroit, who chaperoned the Soo boys in this, their maiden effort.

The genial Rolla Heikes, whom everybody likes, headed the list. He is the champion of the world with the shotgun, and after the regular events he gave the bystanders an exhibition of his skill. Upson and Young both did good shooting, and what they don't know about shooting can't be learned in a day. Hobart was with the crack shots, but was not shooting in his usual good form. We also met Mr. C. A. Damon, a thorough gentlemen, who knows his gun and is always on hand to show off its work.

J. W. Nelson, of Duluth, took a run down to see what the Soo was doing in the way of shooting, and incidentally mentioned that Duluth would be heard from soon. Mr. Mack of St. Paul, always came up smiling, though facing the best shots in the country. And the jolly Johnny Parker, with his little 12-gauge barker, was on hand to see that everything went "straight," but he started out quite wrong, for the birds were flying strong, and when he wanted ten he got but eight. But, for all that, we "didn't do a thing to Jack."

Everything seemed to be favorable for the shoot. The weather of course, was fine, as it generally is up here in summer. The grounds are pleasantly located on the banks of the river, which made a good background for the targets. One of the shooters remarked: "I don't know of a better place for a midsummer shoot anywhere in the country. Everybody wants to come to a place like this in summer, anyhow, and you can come on the new Northwest from Buffalo, Cleveland or Detroit as quickly as you can come by rail."

"Yes," said another, "and there is some pleasure in coming to a place like this. Next year I am coming a week ahead to take in some of your big trout fishing and fresh air to brace me up for the shoot."

And they were not alone. Everybody was loud in praise of the pleasant weather, the invigorating atmosphere and the lovely river, with its hundreds of islands, its clear and sparkling water, its roaring roaring rapids and its pretty lakes and bays. Most of the visitors shot the rapids before going home.

At the traps, however, they were more successful, and some very good scores were made. The closing event was the most exciting of all; $75 added money greased the pot, and everybody started in with a determination to do or die. Most of them died. Heikes and Upson tied for first with 48 each to their credit. Parker had shot his string and had a cinch on third at least with 45. Dave Aitken, a Soo amateur, who, by the way, has figured in only one tournament previous to this, was at the bat, with 47 killed out of 49.

"He's going to tie Heikes and Upson for first," someone remarked.

Dave looked around pleasantly and remarked, "Where's the money, in 47?"

"Yes," was the reply.

"Pull," said the shooter, and as the "live bird" sailed peacefully to its resting place on the river bank one of the spectators was heard to remark that it was an awfully hard bird, anyway.

Following will be found the scores in the different events:

*The First Day's Scores.*

No. 1, 15 singles, entrance $2:

After the regular events, Harry Heichhold, an expert pencil pusher for the Soo *News*, gave an interesting exhibition of expert shooting under unusually difficult conditions, to wit: 10 birds straightaway, shooter to kneel immediately behind the trap, muzzle rest, shooter's body held in place by that accomplished instructor, Jack Parker. Harry made a clean score. Here it is:

0 0 0 0 0 0 0 0 0 0—10 goose eggs.

Next year the club will hold another shoot, earlier in August, if possible, and have good reasons to anticipate a large attendance and an even more successful event.

J. A. FRANCE

## Weir City's Business Men's Gun Club.

WEIR CITY, Kan., Aug. 24.—The tournament of the Business Men's Gun Club, given last Wednesday, was a great success and was well attended. The Galena delegation was a little late in arriving on the grounds, as they waited until Thursday to come up; but after arriving the club scared up what shooters it could find in town and held another tournament for their benefit. The number of shooters on Wednesday ran up to 23 in one event, and several events contained 20 or more entries.

The visitors present on Wednesday were A. H. Piety, Topeka; Messrs. Fay, Class and Jones, from Springfield, Mo.; Lile and McRae, from Aurora, Mo.; Best and Timberlake, Columbus; Price, Allison, Morton and Gibson, from Scammon; Thornton, from Webb City; Henry and George Pierce and Charles Mathews, Chicopee; A. Dixon, Joplin. The local shooters participating were McIlhany, Calhoun, Morrison, Holmes, Kirk, Ayers, McKim and Abbott.

The regular programme consisted of eight 20-bird races, with $10 added to No. 3, $15 added to No. 6, and $25 added to No. 8 There were also several extra events shot which were not on the programme. One of these was a rather unique race between Ben Price, of Scammon, and McIlhany, of Weir. Price challenged any man on the grounds to shoot one shell from each of twenty strange guns for $5 a side, and McIlhany accepted it. The guns were furnished by the shooters present, and the match was won by McIlhany by a margin of two birds.

Two tents were arranged for the convenience of the shoots. One of them, a large canopy top tent, was donated for the occasion by Mr. Horace Hayden, and offered ample shade for the shooters, while the other contained the gun cases.

McIlhany, Calhoun, Piety and Class were probably the largest winners the first day, though many others got in for good money and the shooting throughout was very good.

On the second day McIlhany won the best money with 67 out of 70, while Piety was a close second.

The Galena boys expect to give a good shoot in the near future, which will probably be well attended by the Weir boys. Scammon gives a shoot on Sept. 3 (Labor Day) and a very nice programme is already prepared.

Below are the scores for the two days:

*Wednesday.*

No. 1, 20 singles, $2: Fay 15, Jones 15, Thornton 15, Piety 20, Class 18, Liles 17, McIlhany 19, G. Pierce 15, Calhoun 17, McRae 10, Ayers 12.

No. 2, 20 singles, $2: Fay 15, McIlhany 17, Liles 14, Jones 18, Piety 15, Thornton 16, Calhoun 18, Class 19, H. Pierce 17, Morton 8, Morrison 13, Price 12, G. Pierce 17, Mathews 10, Timberlake 16, Allison 17, Best 14, Kirk 9.

No. 7: Piety 9, McIlhany 10, Schermerhorn 8, Leeman 7, Horn 10, McKim 3, Robertson 6, Stice 5, Grantham 7, Morrison 3. MAMELUKE.

## Live Bird Bouts and Sweeps at Saratoga.

THE live bird tournament held by the Saratoga Gun Club, Tuesday, Aug. 28, would have come pretty near being a flat failure had it not been for the impromptu individual matches in which two of the bloods of the club engaged with a "high roller" visitor from Albany, and in which the aforesaid bloods did add much to their already high local renown, and incidentally did gather unto themselves divers fat purses of shining shekels. The tournament managers made the mistake of relying entirely upon a prodigal distribution of programmes to gain a good attendance, instead of giving the event the wider publicity in press notices in big sportsmen's newspapers like FOREST AND STREAM—that is, if there be one as big on earth—and the error of their ways was shown in a poverty of attendance that made the few trap-shooting enthusiasts—natives and visitors—present look sad over what seemed a proof of the decadence of their beloved sport. Albany had the largest representation of shooters, there being present Harry R. Sweny, the most promising young trap shot in Sturgeondom, and whose previous shootings and winnings have been chronicled in FOREST AND STREAM; Stone, who has proved himself a high wall in his performance at the traps; Johnny Brewer Sanders, Sweny's youthful rival with the breechloader, and your correspondent, who was around greeting the gang long before the first shot of the day had reverberated from the adjoining woods of Horsehaven.

Among those with whom I exchanged compliments were "Uncle Sammy" Goggin and Charlie Stockwell, of Troy, and the noted Saratoga shooters, Levengston, Bockes, Gibbs, Peters and last, not least, the widely known "Wash" Coster, who, by the way, was chosen to act as referee in all of the events of the day.

The weather was simply delightful in its conditions of gentle warmth, still air and in the modified light produced by a dense haze that nearly all day long hung motionless in the dead calm. Through the blueish-gray folds of the mist the distant mountains were completely shut out from sight, and had it not been for the faintly seen foothills that bounded the horizon looking eastward from the firing points the view in that direction would have seemed like a vista of the wide ocean.

The time for the opening of the shoot had passed and the long wait for the shooters who never came was finally enlivened by a scrub match between Harry M. Levengston, Jr., of Saratoga, and Harry R. Sweny, of Albany; 5 birds, $5 a man. Levengston, who is a model of accuracy with his first barrel, scooped his 5 straight with that particular Whitworth tube, and Sweny scored equally well by the use of his second barrel on his first two birds and by nailing the other three with the right. Strange to say, the contestants agreed to a "draw," withdrew the stakes, paid for their birds and then joined the other shooters present in calling for the opening sweep. The scores in this and in all subsequent events are herewith given in detail:

No. 1, 5 birds, $5 entry, the purse divided 60 and 40%:

| | | | |
|---|---|---|---|
| Levengston | 21111—5 | Sweny | 112•2—4 |
| Goggin | 11212—5 | Perkins | 01011—3 |

No. 2, 7 birds, $5 entry, the purse divided 50, 30 and 20%:

| | | | |
|---|---|---|---|
| Levengston | 1111221—7 | Sweny | •121021—5 |
| Goggin | •221111—6 | Perkins | 1110001—4 |
| Stone | 1110212—6 | | |

No. 3, 10 birds, $10 entry, the purse divided 40, 30, 20 and 10%:

| | | | |
|---|---|---|---|
| Levengston | 1111121111—10 | Perkins | 1202110102— 7 |
| Sweny | 2101112221— 9 | *Stone | 11•1•1212w |
| Goggin | 2121112001— 8 | | |

*Shot for birds only.

An individual match between Levengston and Sweny was here interpolated. Conditions, 15 birds each, $25 a side:

| | | | |
|---|---|---|---|
| Levengston | 121111212212111—15 | Sweny | 110111212112221—14 |

No. 4, 5 birds, $5 entry, the purse divided 45, 35 and 20%:

| | | | |
|---|---|---|---|
| Levengston | 11111—5 | Peters | 10121—3 |
| Sanders | 11•11—4 | Stone | 20120—3 |
| Goggin | 1•211—4 | Perkins | 0•210—2 |

Another little side snap in the form of a scrub between Peters (Saratoga) and Sweny gave zest to the spectators' view of the show. Conditions, 5 birds each, $10 a side:

| | | | |
|---|---|---|---|
| Peters | 21022—4 | Sweny | 122•1—4 |

On the shoot-off, miss and out, Peters killed a long straightaway driver from No. 2 trap, and Sweny failing to stop the same kind of a tailer from the same box, gave Peters the coon.

No. 5, 5 birds, $5 entry, the purse divided 60 and 40%:

| | | | |
|---|---|---|---|
| Levengston | 12111—5 | Sweny | 1••12—3 |
| Goggin | 21211—5 | Perkins | 011•1—3 |
| Sanders | 11012—4 | Peters | 10210—3 |
| Stone | 11110—4 | | |

Grand song and dance act by Messrs. Peters and Sweny at 25 birds a man for $50 a side. This was brought about after a long chinning match which resulted in Peters being allowed a 2yds. shortening of the rise. The sharp fellow didn't need it, as the score will show:

| | |
|---|---|
| Peters | 2021211201011112221110 21—21 |
| Sweny | 2222121121•1121110•01121021—21 |

Tie shot off at 10 birds:

| | | | |
|---|---|---|---|
| Peters | 1111222221—10 | Sweny | 211221110•w |

No. 6, 5 birds, $5 entry, one money:

| | | | |
|---|---|---|---|
| Levengston | 11121—5 | Sweny | 1111•—4 |
| Peters | 11121- 5 | Perkins | 10•21—3 |
| Stone | 21111—5 | | |

The sixth sweep concluded the shooting. The prominent feature of the day's performance was the fine aggregate score of Mr. Levengston, who killed all his birds—57 straight. This feat is all the more creditable when it is considered that the rise was 30yds., the boundary a 30yds. circle.

HORACE B. DERBY.

## The Chattanooga Tournament.

ON Wednesday and Thursday, Sept. 19 and 20, the Interstate Manufacturers' and Dealers' Association will give a two-days' tournament at Chattanooga, Tenn. The programme to hand states that the tournament is given for the Chattanooga Gun Club, whose grounds are within twenty minutes' ride of the center of the city, electric cars running direct to the scene of the shoot.

Each day's programme calls for 150 shots divided equally into ten events. The novelty system will be shot in five of the ten events, the usual handicap, one of distance only, being observed. Know trap, unknown angle events make up the balance of the programme Entrance money in each event is $1.50. A special feature, and one of particular interest to those who will attend the shoot, is the added money, $100 being added each day by the Chattanooga Gun Club, $10 to every purse. All purses are divided 40, 30, 20 and 10 per cent.

On Friday, Sept. 21, the day following the close of the Interstate tournament, a shoot will be held, open only to Tennessee shooters and clubs. One of the objects of this shoot will be the formation of a State league, and the co-operation of all clubs in Tennessee is earnestly requested. The Chattanooga Gun Club will arrange for a State championship cup.

Headquarters for shooters during the tournament will be the Read House, opposite the Union Depot, where the rates are $2 per day and upward. Address communications for information regarding the shoot to F. I. Stone, president; F. H. Woodworth, treasurer, or Wm. White, secretary, Chattanooga Gun Club, Chattanooga, Tenn.

## Trap at San Antonio.

THE following scores were made at the regular shoot of the San Antonio Gun Club, Sunday, Aug. 26:

No. 1, 10 singles and 3 pairs targets:

| | | | | | |
|---|---|---|---|---|---|
| McCormack | 12 | France | 11 | Rothwell | 11 |
| Thiele | 11 | Vollbrecht | 9 | Smith | 10 |
| Kelley | 10 | Samuels | 14 | Veith | 8 |

No. 2, trophy shoot, 20 singles and 5 pairs:

| | | | | | |
|---|---|---|---|---|---|
| Rothwell | 13 | Grossman | 15 | Barr | 19 |
| Thiele | 17 | Wegel | 14 | Veith | 19 |
| France | 22 | McCormack | 19 | Vollbrecht | 21 |
| Kelley | 23 | Smith | 25 | Ramsdorf | 14 |
| Shields | 19 | Samuels | 25 | | |

No. 3, 15 singles:

| | | | | | |
|---|---|---|---|---|---|
| France | 10 | Vollbrecht | 7 | Shields | 8 |
| Thiele | 12 | McCormack | 9 | Grossman | 7 |
| Veith | 10 | Smith | 12 | | |

## ANSWERS TO CORRESPONDENTS.

D., Boston, Mass.—What kind of sights are used by the quickest rifle shots of this country at glass balls or moving objects? Ans, The Lyman.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

**ABBEY & IMBRIE,**

# Game Laws in Brief

UNITED STATES AND CANADA.

Gives the sections relative to game and fish seasons, limit of size or number, non-residents, transportation, etc. All in brief, but full enough for *the practical guidance* of sportsmen and anglers. Carefully compiled, and shorn of verbiage, by CHAS. B. REYNOLDS of *Forest and Stream*. The *Brief* is a standard work of reference. Handsomely illustrated with twenty-five half-tone engravings from *Forest and Stream*.

**Price 25 Cents. We send it postpaid. All Sportsmen's Goods dealers sell it.**

FOREST AND STREAM PUBLISHING CO.,

# BOOKS ON SHOOTING.

**New Editions.**

## The Modern Shotgun.

**By W. W. GREENER.**

PRICE, $1.00.

## The Gun and its Development.

**By W. W. GREENER.**

PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

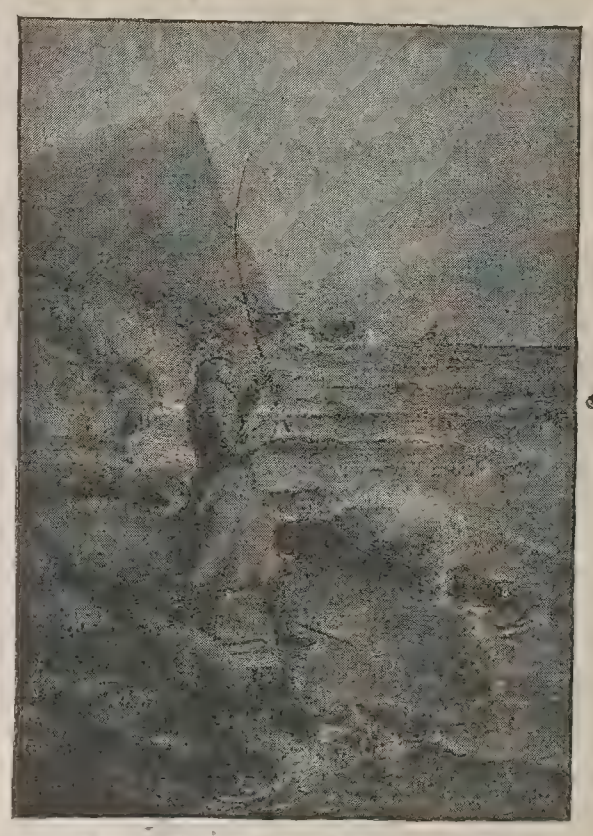
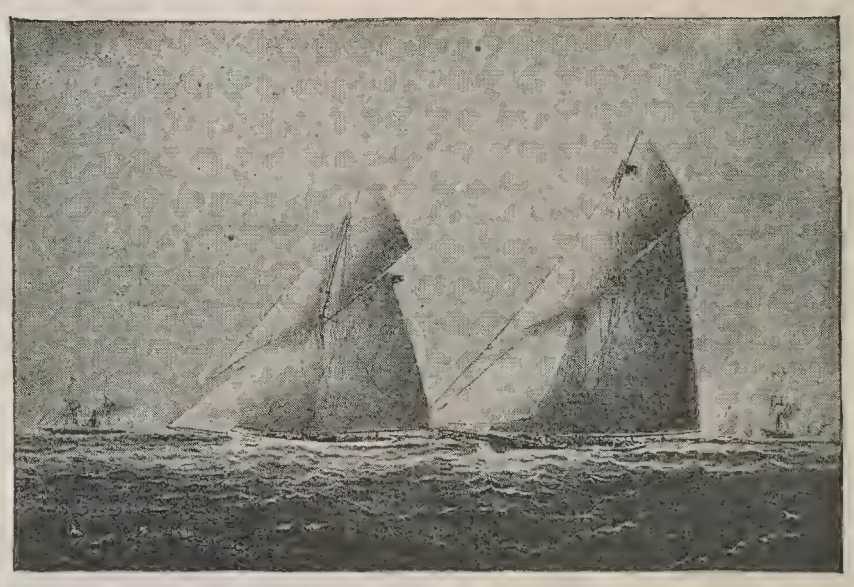
JACKSNIPE COMING IN.

### AS PREMIUMS.



We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** *6 months and any two pictures*, **$3.**



If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.

Copies of them may be seen at this office, and inspection is invited.

BASS FISHING AT BLOCK ISLAND.

VIGILANT AND VALKYRIE.

## Mr. Grinnell's Indian Books.

## BLACKFOOT AND PAWNEE.

These two volumes treating of two different tribes of Indians are full of fascination for lovers of outdoor life. Each contains a number of the stories current in the tribe to which it relates, and these are followed by a series of graphic pictures of the old wild life which is now only a memory. The stories deal with hunting, war, love, ghosts, magic and natural phenomena. They are given just as related by the old men who told them to the author, and show Indian life from the Indian point of view.

**BLACKFOOT LODGE TALES;**
THE STORY OF A PRAIRIE PEOPLE.
By GEO. BIRD GRINNELL.
pp. 360. Cloth. Price, $1.75.

**Pawnee Hero Stories and Folk Tales,**
WITH NOTES ON THE ORIGIN, CUSTOMS AND CHARACTER OF THE PAWNEE PEOPLE.
By GEO. BIRD GRINNELL.

## American Big Game Hunting

The Book of the Boone and Crockett Club.

EDITORS: THEODORE ROOSEVELT, GEORGE BIRD GRINNELL.

Entertaining sketches of hunting and exploration by members of the Club. The handsome volume comes from the DeVinne Press; a large octavo of 345 pages, with 16 full page Illustrations by leading artists. Price $2.50, postpaid.

FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

## FISHERMEN, ATTENTION!

## $225 in Gold Given Away!

## THE NATCHAUG SILK CO.

**will give nine big cash prizes for the following catches of fish taken during the season 1894, viz: From the 1st day of April to the 1st day of November inclusive, with the NATCHAUG SILK FISHING LINE:**

FIRST PRIZE— $25 in Gold for the heaviest Muskallonge.
SECOND PRIZE— $25 in Gold for the heaviest small-mouth Bass.
THIRD PRIZE— $25 in Gold for the heaviest large-mouth Bass.
FOURTH PRIZE— $25 in Gold for the heaviest Lake Trout.
FIFTH PRIZE— $25 in Gold for the heaviest Brook or Mountain Trout caught in other waters than in the State of Maine.
SIXTH PRIZE— $25 in Gold for the greatest variety and largest number of fresh water fish caught in one day by one person.
SEVENTH PRIZE—$25 in Gold for the greatest weight of any kind of fresh water fish caught in one day by one person.
EIGHTH PRIZE— $25 in Gold for the heaviest fish of any kind caught with the Natchaug Silk Line in fresh or salt water.
NINTH PRIZE— (SPECIAL) $25 in Gold for the heaviest Brook Trout caught in the State of Maine.

As the Trout caught in the lakes of Maine are acknowledged to be genuine Brook Trout, on account of the size of these fish we bar them from our Fifth Prize, and offer this as a special prize for these waters.

A sample card of our Lines sent free on application.

### CONDITIONS:

All these fish must be caught with the Natchaug Silk Fishing Line in fresh water (except Prize 8) and by fair angling.

Competitors must forward to us their full name, P. O. address, together with the description and weight of fish caught, and name of dealer from whom line was purchased, together with the name of one reputable witness affixed. On November 7th, 1894, the award will be made, and the list of succes ful competitors announced in the FOREST AND STREAM and the *American Field*.

All successful competitors before receiving their prizes will be required to send an affidavit as to their statement of fish caught.

If your dealer does not keep the Natchaug Silk Fishing Lines, order direct from

**FOREST AND STREAM PUB. CO., New York.**

### *THE MIRANDA EXCURSIONISTS.*

FOR the last fifteen years, more or less, and sometimes more frequently than once in a season, enthusiastic and sanguine projectors have been coming into this office to broach their schemes of gathering companies of fifty to a hundred sportsmen, to charter vessels for excursions to the coast of Labrador and Greenland. And year after year, not to throw cold water on the project, we have given such aid and comfort as opportunity afforded, always insisting, however, upon the inherent impracticability of the scheme. For, in the first place, there are not many sportsmen who would care to go to the northern seas, even under the most favorable circumstances. There are few who can be gone for the length of time required by such a trip, and fewer still who would willingly tie themselves up under the conditions governing excursion parties of this sort. The average man who is bent on enjoying himself wishes to be free to come and go at his own sweet will; but if he join a party of sea excursionists, he must go when the ship goes, and stay until the ship turns about. He is not his own master; there is no fun in that. He cannot get out of the fix; and there is less fun in that. This is one reason and a quite sufficient one to deter the average sportsman from joining such an expedition.

We had seen one Greenland excursion scheme after another, iridescent as a sun-kissed glacier, fade into unreality, when Dr. F. A. Cook, who had been surgeon to the Peary expedition of 1891-92, came in one day last spring, and told of his proposed expedition to Greenland on the steamship Miranda, with the customary band of sportsmen, scientists and others. When we told Dr. Cook that he would never get his company enlisted, he smiled and exhibited a roll of names of excursionists already secured quite sufficient to make certain the sailing of the ship. It did indeed prove to be the first successfully projected expedition of the kind; and in due time the Miranda left this port bound for the west coast of Greenland. There were on board fifty odd excursionits, including a number of college professors and students bent on exploration and scientific research in Labrador and Greenland; and several sportsmen equipped for hunting walrus and polar bear. The expedition was to visit Nova Scotia, New Foundland and Greenland; proceeding under favorable conditions to Melville Bay and the winter quarters of Kane and Greeley. Each individual of the party paid $500 as his share of the expenses of the trip.

The Miranda sailed from New York on July 7, having been delayed some time beyond the date originally set for departure. Misfortune overtook her when she was ten days out; seven miles north of Belle Isle, in a fog bank, she collided bows on with an iceberg, and had to turn back to St. Johns for repairs. After a detention here, she sailed once more for Greenland; and reached the harbor of Sukkertoppen on Aug. 7. Sailing thence on Aug. 9, she had barely passed out of the harbor before she again encountered disaster. She struck a rock and stove in her bottom; but succeeded in getting back into Sukkertoppen harbor. A relief party, headed by Dr. Cook, set out with Esquimaux in an open boat for Holsteinburg, 140 miles distant, where some American boats were reported to be fishing. After five days of a tempestuous journey they reached their destination, and, dispatching couriers in native kayaks up and down the coast, at length fell in with the American schooner Rigel, whose captain undertook to go to the relief of the company. In due time the Miranda excursionists were transferred to the Rigel, and the steamship in her disabled condition set out for the return voyage with the schooner in tow. Thirty miles out, at midnight, the ship began to sink; her crew were taken off by the schooner, and she was abandoned. The Rigel reached North Sydney, Cape Breton, on Wednesday of last week, Sept. 5, with all on board safe and sound, although trophies and baggage had been lost. The Miranda excursionists have brought back from their summer outing a fund of experience for exciting tales, to tell to their children and grandchildren, of shipwreck in the Arctic, more thrilling than the polar bear stories they must otherwise have been contented with. The disastrous ending of the Miranda's voyage is not likely to stimulate the excursion business in northern seas. Dr. Cook's enterprise deserved more generous reward; and we would have rejoiced to chronicle the complete success of the Miranda excursion.

### *THE SPORTSMEN'S EXPOSITION.*

HERE are some dates to keep in mind—May 13 to 18, 1895. The trouting season will then be around again; but in planning the campaign, provision should be made for a visit to the Sportsmen's Exposition, which will then be in progress in Madison Square Garden of this city. The committee having in hand preliminary arrangements reports a gratifying measure of progress. Many firms have given promise of cordial support; and the affair has already assumed proportions which assure a notable and worthy representation of the sportsmen's interests of this country. It is to be distinctively an expression of the field sportsmanship of the day, devoted specifically to the activities of the man of the rod and gun, dog, canoe, tent and saddle. The classification of exhibits as now adopted comprises:

Class A.—Firearms.
Class B.—Ammunition.
Class C.—Sporting sundries.
Class D.—Fishing tackle.
Class E.—Boats, canoes, etc.
Class F.—Camping outfits.
Class G.—Athletic goods.
Class H.—Kennel supplies.
Class I.—Zoölogy and taxidermy.
Class K.—Cameras and photographic supplies.
Class L.—Saddles and bridles.
Class M.—Sportsmen's art and literature.
Class N.—Trophies and loan collections.

The trade displays will be full and representative; and we trust that adequate attention will be given as well to the loan collection of arms and trophies and to illustrations of the hunting and fishing methods of people the world over. These are the features of the affair which will bring in the general public; and the general public must be attracted if the exposition is to accomplish all that it should do in stimulating the interests it represents, and in enlarging the ranks of sportsmen. Quite as valuable as the immediate returns to the trade which will come from the exposition as a bazaar will be the benefits reaped by them later from the awakened interest in shooting, fishing and kindred pursuits.

The meeting for permanent organization will be held in the rooms of the Hardware Club in this city at two o'clock next Tuesday, Sept. 18. Correspondence respecting the exposition is invited, and may be sent to Mr. J. A. H. Dressel, secretary, 313 Broadway.

### *SNAP SHOTS.*

To Mr. N. M. Bostwick, of Denver, should be extended sincere commiseration by the brothers of the craft. He was fly-fishing for rainbow trout the other day, in the Gunnison, that Colorado stream noted for its big fish, and was doing his prettiest to take what "Kingfisher" would term "an old sooner," to excite the envy of his fishing friends. And he thought he had it, when, after a "royal struggle," he put on to the scales a rainbow measuring 27⅜in. in length, 16in. in girth and weighing an even 8¾lbs. Full of exultation, he dispatched the prize express haste to Denver, to be shown as the largest trout ever taken with fly in Colorado, for it was a plump half-pound better than the record fish, a trout taken five years ago in Twin Lakes. But alas for Mr. Bostwick and his dream of triumph! On the very train that bore his prize was another trout taken from the same stream by Mayor Shove, of Gunnison. It was longer, larger around and heavier; a bigger big fish, a monster yet more monstrous. Mayor Shove's fish weighed 10¾lbs., and when people beheld it they were so astonished that there was little wonder left for Mr. Bostwick's exhibit.

IN the ever delightful "Uncle Lisha's Shop," it is told how a New England school meeting was broken up by the cry of a foxhound on the trail, the assembled citizens tumbling out pell-mell to join in the chase; and we believe that it is a fact of record in the South that court has been adjourned that the Bench might go fishing. When there came to the International Anglers' Association, assembled in convention at Niagara-on-the-Lake, word that the bass were running in schools off Fort Niagara, the most natural thing in the world happened; the meeting adjourned *viva voce* and *sine die*, and everybody went fishing. After the fish had stopped biting, and not till then, did the delegates reconvene to listen to Mr. J. Pringle's report, recommending that Canada be divided into three districts, with as many separate close seasons for black bass; and that the license fee now exacted from American anglers in Canadian waters should be abolished. The convention adopted the report; and a memorial embodying it will be presented to the Canadian Government.

Considerable anxiety has been felt lately over the fate of numerous hunting and fishing parties who encamped in the forests or by the lakes of the territory recently ravaged by forest fires in Minnesota. In most cases, however, it appears that these parties escaped the fires without any loss more serious than that of their camp equipage, though in several instances they were obliged to take refuge in lakes and swamps until after the fire passed over, and were subjected to great suffering and inconvenience in reaching home. It is hoped that no lives were lost in any of these parties.

Gov. Hogg of Texas has given out a declaration: "Since the war I have always been, am now, and shall continue to be for the indissoluble Union, the Stars and Stripes, law and order, the preservation of local self-government and public and private integrity." We trust that the governor believes in game protection, too. It should be noted that having killed a deer out of season in Nacogdoches county, he has settled for it like a man by paying over his fine.

The death of William Mitchell, the veteran rod maker of this city, removes from the fishing tackle trade a figure long familiar. Mr. Mitchell was rarely entertaining with his reminiscences of Dr. Bethune and others of the old school, for whom in his prime he made rods, and with whom he talked fishing. He was highly respected by friends and business associates for his integrity and high character.

When you encounter a leopard, aim to shoot him on the spot.

## WEB.

As a rule it is pleasant to be invited. When one has to offer himself, the effort is attended with more or less embarrassment, depending upon the egotism of the volunteer. An invitation to a wedding, for instance, is pleasant, provided one is not recently in receipt of a printed slip from one's banker inviting one to call. An invitation to a picnic is burdened with elements of doubt, involving ants, cholera morbus, colds and other disagreeable possibilities. An invitation to call again is replete with such delightful suggestions that one is tempted to wish oneself young again, like "Podgers" and the other blades yet in the flower. An invitation to dinner, when one is familiar with the admirable gauge of the cook and not troubled by indigestion, is pleasant without any exception, thus giving the lie to the axiom that "all general rules have exceptions." An invitation to go fishing or shooting is always in order, and attended with annoyance only when one cannot accept. You see, therefore, by these contrasts that invitations as a rule carry in their train sentiments more or less pleasurable. I am led into these reflections by an invitation lately appearing in Forest and Stream in bold face type, reading after this fashion: "All those who love a dog because he is a dog * * * are invited by the editor to consider this department as one in which they can discuss amicably," etc.

It is a privilege to love a dog—that is, some dogs. One may not be supposed to love all dogs any more than all women, horses or men. Some dogs are mean, some women not lovable, some horses vicious and some men prohibit, absolutely, any consideration in their favor—it is much easier, many times, to love a dog, much easier to overlook his foibles. Indeed his weaknesses are a constant appeal to you, because he gives you to understand that he has acted on his best information; when he makes a mistake from your standpoint, his contrition is sincere—you can swear by it—men and women leave one oftener in doubt. His charity is very broad and his forgiveness of your errors as beautiful as mothers'; he is a perpetual lesson in the school of the Master, but we heed him not, being ourselves unmindful of the Teacher; he possesses the virtue of obedience commensurate to his understanding, we understand and do not obey. The integrity of his love is beyond question, hence it is a privilege to respond in like measure, if we can—what is our favor is with him a prerogative, he has a right to be loved.

I saw Web a few weeks since. You do not know Web—he is not registered—but he has blue bood in his veins. Over in Middle Park, where he is surrounded by the comforts that should attend "the sere, the yellow leaf," he is known as Gordon. He hears his old name once a year when I call on his newer friends. His hair was once very silky, and is soft yet to the touch; his tail straight with an eight-inch feather. He is very fat now, and is turning gray about the face. We have spent many pleasant days together, and have aged, he the more rapidly, because of greater zeal in the discharge of his duties. At the mention of his old name he pricks up his ears and there is a perceptible twitch of the once handsome tail, indicative of doubt and yet partaking of hope. Upon the second mention of his name he rises slowly to investigate; he would jump to do so, but that privilege is no longer his. His steps are not steady, nor his line of approach exactly straight, but he finds the way, and when his nose touches my boot, he whimpers, very gently, throws his head a little to one side and curls the side of his lip as near to a smile as is vouchsafed his kind; he attempts to stand on two feet, and then three, and finally sits down and offers me a hand, and all the time that whimper and curl of the lip to express how glad he is. His memory is good and his affection unabated. He talks to me after the old fashion, as I caress him and look in vain for the eloquence of the beautiful brown eyes of the earlier days. He has no need of his sight to recognize me, and I, with my own not a little dim at the thought, wonder whether I should under a like affliction recognize him. The verdict upon this point lies in favor of—my friend.

Web has a companion, a black and tan colored shepherd, named Jack, who is as full of mischief as a monkey, and in the line of his duties worth half a dozen herders. He looks straight at you when you propose to send him on an errand; should you halt him after he has started on a mission, whether at one rod or many, he stops short and looks round with head up and every muscle taut. "What would you have me do? Just mention it or motion it?" is his plain interrogatory, and his ready obedience to your answer is a marvel. Jack steals Web's bone, on occasion, and knows just as well as any of us that he has done something mean, has been guilty of a breach of canine ethics, or the commandment handed down to us. He takes off the bone to a rod's distance, lies down and puts his paws upon it. By this time he has worked himself into the belief that it is his bone, duly earned by the sweat of his brow, and growls if Web makes a move. Web rarely sets up a prior claim, but when he does he treats Jack's growl as sheer bluff and repossesses his property with a dignity compatible with old age. Of his own volition Jack, aside from the occasional episode of the bone, has set himself up as guardian to Web. He watches over his general interests and uncertain footsteps with untiring fidelity. He has a way of putting himself directly across the path of his blind friend when the latter starts in unfavorable directions, and by rubbing against him and talking in a way that is quite comprehensible, even to one not a dog, turns him about and sends him to sanctuary. Last winter the ice on the river was thick and the weather very cold; the current of the Grand is swift. A hole had been cut in the ice for the convenience of the stock and had been kept open for several days. One morning Web strayed off toward this hole; to get into it was to be swept under by the current and drowned. Jack saw him, called to him, and started on the run, overtook him just as he reached the dangerous place, turned him around in the usual way and coaxed him toward the house, and seemed, as the observers declared, "tickled plumb to death" at the success of his undertaking. He jumped over and around the old dog until the latter was obliged to give acknowledgment of the service by two or three hoarse barks, a feeble dance and that unmistakable curl of the lip as they rubbed noses. Do you doubt, Mr. Editor, that there was pleasure to me in your invitation?

"Love a dog because he is a dog." How else or for what other reason would you love him? He is unlike anything else on this beautiful earth. He loves you under chiding or caress. He will fight for you and yours where he will not do battle for himself. His affection is not gauged by your garments; rags or velvet are all one to him, provided they are worn by his lover. He is faithful in your good fortune, and accepts the crust of your poverty uncomplainingly. Your success is his pleasure, your sorrow commands his sympathy. He is happy when you are and discontented when you are not. He is ignorant of politics, bonds and stocks, and bank accounts. His love is honest, and not to love what is honest is to be—less than a dog.

Denver, Col.

## COASTING ALONG THE CARIBBEAN.

On the very edge of the prairie a group of cocoa palms curved up, from the roots that were like thin brown cords to the leaves that trembled in the passing breeze and rattled against each other with a sound like that of pattering rain. Back of the palms a fence, hidden under a thick drapery of green that was jewelled with purple and pink and white morning-glories, inclosed masses of geraniums and marigolds, hollyhocks and fuchsias. The bamboo walls of the watla rose from a bed of gaudy flowers, and were crowned by a thick thatch of leaves that rose steep and high. A few meaner huts stood amid the orange, the lemon and the mango trees, above which nodded the heads of palms burdened by shining green cocoanuts. These houses were the hamlet known as Bens.

From the edge of the prairie a shining lake spread westward, farther than eye could follow in the morning light. Eight or ten miles to the north was a narrow belt of mangroves, of palmetto and of palms that were lifted in the air to dance above the shimmering sea. Beyond that belt of trees lay the Caribbean, the Mediterranean of the Americas.

Women were stirring about in the watlas. Other women were paddling off to gather firewood, or to dig cocos and yucca, or to bring bananas and yampas with which to stuff hungry stomachs at home. Naked, pot-bellied youngsters crept from hammocks made of twisted bark, and ranged themselves in shivering rows against the walls that were brightened by the first rays of the rising sun. The children waited there until the beneficent god of light drove from their trembling forms the bitter cold of the norther, which had blown itself away and left the mercury away down at 75° F., and that *was* cold.

Parrots flew in thousands, yet always in pairs, from their roosting place hidden somewhere in the forest that borders Caratasca, toward the great fields of wild bananas on Rio Platano; and every one squawked harshly as it flew. High above the parrots floated the buzzards on still pinions. In the tamarind and the marañon trees in the grove by the houses the mockingbird in russet coat, the sousanti, poured out his song in rivalry of the chorcha that is like a glorified oriole. Vireos flitted through the grove, twittering cheerfully, and out in the sunshine where the cattle were, a dingy-brown little rascal gave up the sweet melody he must have stolen from the cardinal grosbeak, and for interest of its use threw in a most entrancing trill.

Ten o'clock and breakfast time drew near. The canoes came back with stores of roots and fruits, and the children begged for food. The defenders of the inalienable right of women and children to toil for the comfort of man, threw aside the cotton sheets under which they had shivered the night hours away, and graciously ate what their women had provided.

Later the men went in their canoes out on the lake and patiently waited there for fish to come to be caught. Others took their sheet-iron shotguns of Birmingham, with a woman or two to do the paddling, and slipped along devious channels that led from the lagoon through reedy marshes where waterfowl fed. Yet others paddled along the grassy banks, where a deer might peer with fatal curiosity from the bush, or iguaua bask on the sunlit tops of thick walls of grass, or lie stretched asleep upon some limb. And others might go afoot through the thick forest in search of the white-lipped peccary that they call the waree, or after equally vicious collared peccary that roots the moist soil in many a glade of those cool woods.

Some of the women paddled across the lagoon that day to visit the narrow spit of sand and swamp that separated the inland water from the sea. On the outer edge they might perchance find wreckage or drift from the rivers, or possibly the tracks of some turtle from the water's edge to the place where half a bushel or so of eggs were buried. There was always the possibility, too, of finding a family of box tortoises, which would help fill the dinner pot—for all is good fish that comes to the Sambo's net. A fish or two, a ray perhaps, or a lot of oysters from the shallow parts of the lagoon might be added to the store in the dory before it would be beached at Bens at sunset. Then there would be feasting and sleep, and another day like this, and so on through the lives of these simple, indolent folk.

My pipanti, with its shovel-shaped bow, was unfit for the navigation of waters that curled in waves before the breeze, as the sea dory was unfit for the work of the rivers. So I sold it for a few dollars more than it cost, and paid for a dory a few dollars more than it was worth. For now I was dealing with whites who knew how to calculate and to take advantage of their fellows when opportunity offered.

In the morning we stowed my luggage in the dory, said farewell to the village, hauled aft the string that was the sheet of the cotton bed cover we used for a sail, and skimmed along toward the western end of Cartago Lagoon. Gradually the distance was widened between us and the shore, until about noon we ran under the lee of Cannon Island. There we might have climbed to the top of the island, which was perhaps 150ft. in height, and looked upon the ancient cannon which once served the purpose of guarding this the stronghold of those pious gentlemen who then enjoyed a lucrative business along this shore. They levied tolls upon vessels plying to or from the Spanish Main. Heavy tolls they were, that took ship and cargo, life, liberty and honor.

We breakfasted and dined on the shore of the island, and slept there until the dawn faintly lighted the east. Then we got away and were soon facing the surf on the bar. My men paddled near to the inner line of breakers; they surveyed it dubiously. The man who steered stood up and looked long and anxiously at the wall of tumbling water. He turned to me.

"Me no 'fraid, boss. Go troo?"

It was my turn to stand and gaze. A single glance was enough. I had no especial reason for hurrying. There was really nothing to call me to La Criba that day. Besides, I had never felt any great passion for surf bathing; and my acquaintance with sharks was already as close as I wished. If it had not been I could, I clearly saw, get both by trying to go beyond that line of breakers—for triangular fins moved to and fro between us and the surf. I sat down.

"Just as you think best," I said with as much indifference as I really felt, following with my eyes the movement of the nearest shark. The eyes of the men followed him, too.

"Plenty shaak hereaway, boss. Shaak de debbil to ketch white mans."

"Yes? Well, do as you like. I'm in no hurry to get to La Criba to-day."

"Land breeze come off to-night, suah, suah, please God. Mabbe so."

"Likely enough. Go ashore then, if you wish to, and wait for the land breeze."

So we got out of that problem. Ten minutes later we were on the sandspit. Three hours of that was more than enough for me. My notebook fully written up; more sleep during the last week than I needed; nothing of interest for me to see, and only seven miles of smooth sand, packed as hard as rock by the sea, between me and the house of a white settler.

"Come on to La Criba as soon as the sea runs down," said I to the captain. "I go."

The walk along the beach in the morning was delightful change for one who had been sitting in canoes for weeks. There was interest in the coarse sedges, the mangrove grape trees, the coco plums with their cheeks of pink shading, like the cheek of the toper, into purple. There was interest, too, in the worm-eaten ribs and decayed stem of the ship, that lay where the waves washed to and fro among their iron fastenings, and through the stone-lined tunnels that the teredo had bored through solid pine and hard oak. I wondered whether she had been driven ashore by some norther, or had been beached on this shelving shore to collect her insurance.

A deer stood on a sand dune and stared impudently at me. I raised my gun, then lowered it again, and whooped at that beast for the fun of seeing it turn tail and fly. Then I jogged on, flattering myself upon my self-denial in not murdering a deer I could not use.

There was more of present interest later, when I saw the broad footprints of a jaguar that had prowled on the sands in search of belated turtle, and had unearthed her eggs. The tough, empty shells were shriveling in the sunshine on the sand. It would have been a pleasure to have followed those tracks and put a bullet through the spotted hide of the chap that made them; but I had no dog, and I had a vivid recollection of the tale told me, only the day before, of a Waikna who was looking through a thicket near the beach for a promising heifer. He found a promising jaguar. It lay, gorged and sleepy, its head close to the broken neck of the heifer. The man was so surprised, and perhaps displeased by finding his cow in such plight, that he pushed the jaguar away with the muzzle of his gun. Luckily for him, the gun happened to be cocked, and in his excitement the hammer fell, and the beast went down with a charge of shot blown through her interior.

I had missed no cow, and feared that I would not have presence of mind to poke the muzzle of my rifle against the ribs of any jaguar I might find, and the brute might not be gorged and sleepy, so I decided that I would not look for the fellow that made those footprints.

I came to the mouth of the Rio Platano, on the banks of which dwell, far back from the sea, a small remnant of the race that once occupied the hills and plains thereabout. Possibly they are descendants of the people who carved curious devices on the walls of caves in the mountains not far from their villages on the Platano, and of the artists who cut intricate scrolls and fret in the massive boulders of dark granite that stand in the middle of the river.

Perhaps it was the skill and patience of their forefathers that carved from granite and from scoria black and porous, and adorned with graceful lines the vases and bowls, the benches and tables, the metlatls and beaters which are thickly strewn over a mountain not far away.

At all events this poor remnant of the great Lenca race are hospitable, peaceful and kindly, as well as industrious and shy. They should be studied, their language, beliefs and habits of thought put upon record quickly, for they will probably soon pass away, and with them take a number of the few links that connect our day with pre-Columbian history and art of America.

But dreaming of these things did nothing toward setting me across the still, dark, deep river. It might be that one could safely wade across, by following the bar that lay a little out from the coast line, but I had no knowledge of the depth of water there, and the surf ran high enough to wet one completely, if it did not indeed sweep him from his feet. And I thought of sharks, then shouted in hope of catching the attention of some stray Mosquito. I waited, then once more carefully studied the soft, succulent stems that run, pink and almost translucent, here and there upon the dry sand of the shore, and hold boldly up a foot above the ground blossoms that are in shape and size much like morning-glories; but these have petals that are pink and thick and fleshy, instead of thin and delicate like those of the gem of the morning.

An ancient wreck of a canoe lay on the sandy shore of the river. One side was burned to the water's edge, and the other side seemed to be half rotten. I dragged the wreck to the river and found by carefully balancing I could make it carry me in still water. I stepped ashore and yelled again, then waited for the Indian who did not come to ferry me across.

In answer to my cry a dozen feet of alligator rose to the smooth surface of the river, in the cove sheltered by the mangrove bushes and willows. He lay too low to shoot at with any hope of success, so I silently waited, while he drifted toward me. I was vexed by the delay about crossing the river, and by the fact that I was hungry; therefore, I determined to kill that ugly brute if possible. I had heard that the barking of a dog would attract any alligator that could hear it, so I tried barking. Experience on the Red River of the South at the time of General Banks's cotton capturing expedition had shown me that the squealing of a pig would lure the

saurians more certainly than the yelping of a dog, so I tried to squeal. It did not work. The notes were perhaps too high for my voice. But the alligator had drifted down until he was abreast of and not forty feet from me. I jerked my rifle up and plumped him squarely between the eyes.

I have often heard that the hide of an alligator will turn a bullet. I believed it whenever I fired at and failed to hit my game; and I shot at hundreds of them when Uncle Sam furnished the ammunition during the weary weeks when we were patrolling the ruddy Red River and the coffee-tinted Tensas. Many a time, though, I had proof that when a .45 ball, urged by a goodly charge of powder, struck an alligator, a hole in his hide was mighty suddenly made.

So it was with this moss-back veteran of the Rio Platano. The ball from my Marlin neatly dug a furrow through his skull, and scooped out what few brains the reptile had. He lay as still as any wooden stick. There seemed to be not a twitch of a muscle. The fact is that the surprise fairly paralyzed him.

I pushed off in my crazy punt, and managed to get the carcass ashore. I dragged it partly out of the water, then sat down to contemplate the prize. There was reason for believing that it was dead. But I had seen dead alligators before, so I reached over the corpse of this one and with the point of my machete tickled his ribs, on the side furthest from me. That massive tail swung around with prodigious power and promptness, and dashed a shower of sand and water into my face. I retired.

A yell from the other bank called my attention to a Waikna standing there.

"Come over and see the lagarto grande I killed," I shouted. He quickly found a canoe and paddled across. He was joyful over the death of the alligator.

"He debbil, big debbil," said he earnestly. "He ketch young cow of me by nose. He pull her nose down. She go to bottom, den he eat um up; ketch girl, too."

A few minutes later we were in the watla of the biggest authority and biggest rascal of the hamlet of Plantain. There were in the village half a dozen cocoa palms that tossed their long arms in the trade wind. Before them the sand sloped down to the curving beach, on which lay a dory hauled beyond reach of the waves. Behind the palms were four huts having walls of trunks of the papta palmetto, and the usual thatch of leaves. Back of these, their crooked branches touching the eaves of the huts, were mangrove trees that held the sands from shifting and helped them to encroach upon the wide river behind the settlement.

While breakfast was being cooked the death of the big alligator was discussed by every man, woman and child in the place. The host asked leave and proudly exhibited my Marlin, from which I had thrown every cartridge. While they peered curiously at the mysterious and most marvelous mechanism, that could load the deadly gun quicker than a man could pull the plug from his bottle of powder, they told yarns about the savage prowess of the cayman the bullet from that little gun had killed. They brought forward a trim girl of some dozen years, and showed the rows of scars on hips and thighs, where the pointed teeth of that saurian had pricked holes into which when made one might have thrust the first joint of his little finger.

She was squatting in the shallow water at the riverside, splashing the water and paying little attention to her surroundings, which was careless; but she doesn't play that way now. She found herself gathered, without due and timely notice, into the jaws of that alligator.

The girl was so surprised that she cried aloud. In fact, she screamed. Girls act that way. Her father and brother were near, and hacked away with their ever-ready machetes at the head of the cayman. He gave up the dainty meal he had honestly captured, and showed his resentment of unfair treatment by sulking at the bottom of the river. And that girl was afraid, even when I saw her a year later, to go into deep water where alligators were known to lurk.

The village was a unit in urging me to stay and kill all the big alligators in the river. The rifle that had knocked the brains out of so big a brute could surely put an end to any cayman. There were so many such reptiles in river and lagoon that pigs and puppies were almost sure to disappear before they became big enough to be of use, and it was difficult to raise babies. It was discouraging to the industries of housewives. Any one who would clear the river of reptiles would be doing a good work for the advancement of humanity—and pigs.

No right-minded man objects to doing missionary work, when it is mixed with sport. So I told them to prepare an armful of pitch pine splinters and knots, and to fasten on the sloping bow of their biggest pipanti a rude frame of four poles, to hold a bed of sand on which to make our light. The sloping part was about 18in. wide and nearly 4ft. long. Behind this we left a place for a man who was to feed the fire. Then came a screen of split bamboo.

Before sunset we paddled up the river, that we might float down with the current. It would have been better if we had gone up earlier in the day, draped the canoe in bushes and floated down about sunset; for so we could have got a shot at the score or more of caymans which we saw as we went up. They were too shy to allow us to come close enough for a fairly good shot at the flat face that showed so little above the surface of the water.

We got our pay, though, coming down. There was little difficulty about floating to within twenty feet or so of the glaring eyeballs, dazzled by the blaze of light on our bow, and it was as easy to drive a pointed ball down between those eyes. We got half a dozen clean and easy shots while drifting down; but they only sharpened our zest. We turned aud silently paddled up the river again, and got five more alligators before one of the men whispered:

"Sula, boss; sula tara!"

Sure enough. A big deer he was—for Cental America. The light fell broadly on him as he stood knee deep among the water-poppies. He never knew what hit him, but he jumped at least a dozen feet, and fell without another kick.

The men yelled their delight, then dragged the buck into the canoe; and again we floated toward the sea. But the men felt that we had done well enough. Eleven alligators in one evening made a goodly record. A fat buck for to-morrow's feasting was vastly better. It would have been unreasonable to keep silent under such a load of reason for rejoicing. So they shouted now and then, and threw the water up to fall in spray, and slapped the broad blades of their paddles on the surface of the water, with resounding whacks. It would have been a fool of a cayman that would stay within rifle shot of so much racket.

Half a dozen men were willing to carry my gun to La Cariba for me the next day, but one was enough. It was only four miles from Plantain River to the spot were we turned from the level, smooth beach and climbed over the low dune. All the dunes are low on the coast. The constant trade winds have not enough power to drive the sands into high banks, and the northers come too seldom to much move sands from the roots of the mangrove trees, the coco plum shrubs and the coarse and hardy sedges and grasses that hold the loose particles.

Behind the dunes was the usual open prairie with here and there a group of long-leafed pines or clusters of palmettos. A little further on was a grove of short, thick-bodied cocoanut palms bearing hundreds of nuts that one standing on the ground could reach.

Two houses stood beyond this grove of palms, amid a thicket of mango and marañon, orange, lemon and cacao trees. Grapevines rioted among lime trees, and the air was sweet with the odor of pineapples. Oranges and bananas, marañones and soursops, tamarinds and cocoanuts lay on benches, tables and the floor. In a corner was an iguana, the fore and the hindfoot of one side tied together to keep the reptile from running away before it should be wanted for the dinner pot. All young ladies who expect to go to housekeeping should keep in mind this simple expedient for preventing the escape of lizards.

All that the place had of interest was quickly seen and heard, although it was a spot of ideal beauty, a paradise to one who had no ambition for anything other than a life completely free from toil, discord and anxious care. But a single day sufficed to see and hear all that could interest one there. A dory sailed, the next morning, out from the little landing and slipped over the placid waters of Ebon Lagoon toward a little cay where grow olive trees that were planted, perhaps a hundred years ago, to become living monuments of a forgotten colony.

The lake extended full two miles beyond the cay, to a thickly wooded shore. Behind the belt of thickets lay savanas beloved by deer and quail and pheasants, and forests where wild pigs root in every glade, and tapirs lazily soak in every stream; where the jaguar and the black tiger, the ocelot with its pretty, spotted skin, the brown gato de montaña, and the puma prowl after troops of monkeys of various kinds, after agoutis and armadillos, sloths, ant bears and other prey. Turkeys, pheasants, quail and parrots, ducks, plover and other birds abound there.

Near sunset our dory rounded a high point and turned to the south. Half a mile of paddling against the yellow current brought us to a few houses near groves of oranges and cocoa palms. Beside the largest of these groves stood a house of unusually large size. The lower story was of stone and bricks which had been brought from Fort Wellington, nearly two miles distant, and built into walls nearly or quite two feet thick. Upon these stood a roomy, well lighted and clean structure of wood. Wide verandas were on every side, but all the hammocks were swung, and the bent wood chairs rocked in the cool breezes on the north and the east sides of the house. We looked from that veranda down upon the orange trees and the limes, on the palms between which the yellow river showed, and over them to the low island whereon Fort Wellington stood forty years ago and gave false promise of protection to the people of the Province of Victoria.

Here was then the headquarters of a prosperous colony. Rich sugar estates were on the fertile plains that bordered el Rio Negro—the Black River. Coffee estates were on cool hills near by. Ships came here for sound and big pines to make masts and yards and planking for their hulls. Of all these prosperous settlements and of that fort nothing now is except this big house of Deacon's; a few rusty cauldrons, rollers and wheels lost in the forest where mills once stood, and a few coffee trees, and here and there a cane beneath quick-growing trees of other kinds.

Ah, well, there ended a dream that might have ended in a glorious and most happy reality. And a country that might well have become the prosperous home of thousands is now the most prolific hunting ground of a hundred or so shy, peaceful Indians and the home of a few Caribs who live largely on the sea.

One still morning the few belongings left after the last gifts had been bestowed, were put aboard a schooner that was hewn from the trunk of a Spanish cedar tree. She was a little thing—only 8ft. beam and 40ft. in length, but she tossed her head daintily, took a dip or two into the shining water on the Black River bar, which the immortal Columbus crossed on the 17th of August, three hundred and ninety-two years ago. She shook the water from her back and was away over the Caribbean, bound for Trujillo, the spot where the great discoverer first set up the standard of Spain on the Western Continent.

We were sailing over notable courses. Ours was the very path over which Puizon and Solis sailed westward with their pilot, Amerigo Vespucci, in 1497. We were skimming easily and swiftly over waters where Columbus pounded into head seas for weary weeks before his crazy punts rounded Cape Gracias à Dios, and his pious crew cried "Thanks to God," as they squared their yards and ran away southward toward the highway they sought, for India. It was on these sparkling waters that the genial English gentleman, Wallace—whose name, slightly changed by Indian tongues, is perpetuated in that of the settlement founded by him and known now as Belize—plied on these waters and along this coast the trade of toll gatherer, and scuttled ships and burned towns, hanged men and cut the throats of children, drowned mothers and ravished maids, for his own delectation and the profit and glory of Old England. For such was the merry custom of those good old times.

We sailed along with sheets eased off, over the long ground swell that began to whiten under the rippling trade wind. We passed the wretched hamlet of Iriona where is, according to the prospectus of a land company, "the best harbor on this coast, east of Trujillo," and "a navigable river flowing across our lands," which river might be navigable for the white-winged ships of fancy, but is certainly not for more material craft bigger than a small canoe. The harbor might be better and more accessible than it is, if a sandbar two feet higher than the level of the sea did not extend entirely across the entrance. But the open roadstead of Iriona was a beautiful place when we sailed across it. A score of canoes were sailing here and there on its sunny surface. In some grave men were fishing for barracuda, for kingfish, for red snapper and for the kingly tarpon. In more, boys and girls of ten years or more skimmed to and fro for fun. It was fun

We threw the head of our schooner into the wind near a canoe, in which sat a weazened Carib and a girl. My Carib captain wished to buy part of a tarpon which the old man had; and a quarrel ensued about the price. The two men scolded, argued and menaced each other with fists, paddles and sticks. Half a dozen times they seemed on the point of murdering each other—but the girl sat unconcerned, dabbling her fingers in the sea beside the canoe. The captain turned to appeal to me. "That raskil ax two shillin' for little piece that fish!" he cried.

"Big fish! Bully fish!" exclaimed the old man. He didn't hold it up for inspection. He couldn't well do so, for it was fully 4ft. long.

"Fish no good; but I give shillin', one shillin' for half of 'im," and the captain showed where he would have it cut in two.

At last the price was agreed on, the fish was cut in the middle and we sailed away, the two men shouting good-natured badinage to each other as we drew apart.

The sun was behind the black mountains in the south, and the moon was red close down to the sea in the east, when we rounded a low, sandy spit that pointed to the west. We sailed along under the lee of the point half a mile, and let our anchor go. The little dory on deck went over the side and we went ashore. I strayed toward the extreme point of the spit, where scraggy bushes, and brown grasses, and wiry sedges swayed and bent before the fresh northeast winds as they bowed four centuries ago when Columbus landed on this very point, just as we had done that afternoon. It was here that he erected the ensign of old Spain; for I stood on Punto de Caxinas, the spot were the great discoverer first put his foot on the continent of America.

I stayed there long enough for my crew to transact whatever business they may have had, with whomsoever may have been waiting for them amid the thickets of palms and mangroves. One of the crew was killed by a bullet from a soldier's rifle there a few days later. They had made a landing, and the coast guard came near as the schooner was sailing away. The officer in command ordered her to heave to; but her captain wished to save the customs authorities the bother of overhauling his cargo just then, and a shot was fired to bring her to. The soldier must have been more afraid of his rifle than usual, for the bullet hit a man on the schooner. All Caribs and many white men along that coast felt profound indignation at this high-handed interference by the authorities with the time honored custom of the Caribs. For they run many a cargo of goods smuggled from Belize. I could tell of smuggling by one who was at the time honored by the title and office of Governor of Mosquitia, and so robbed the government that betrayed him. But he is now a high official, and the tale may well be told at another time.

The lights of Trujillo twinkled over the waters of the bay, nine miles away; but as no landing might be made there after sunset, we lay quietly at anchor under the lee of the point. In the morning the faint breeze sent us across in time to breakfast comfortably in the Hotel Americano, in a town that was firmly established a century before New York was discovered, long before Jamestown had existence, and even before the most ancient of towns made by Europeans in the United States was founded. Trujillo is in miles as far from New York as Denver is; in progress, Trujillo is as far from New York as—I was about to say Chicago is; but that would be impossible.

E. W. P.

## ONE MORNING.

'TWAS dark when I left the yacht. The stars were awake, however, and seemed to watch me in an interested way, as though full alive to the occasion.

Stealthily I paddled up the creek, slipping through the water quietly, as though spirits were urging my boat along.

---

Shoos-h; the bow touched the bank. I disembarked, and slowly felt my way through the swamp, bending the alders without a rustle, and parting the tangled vines with careful hand.

It seemed as though that short fifty yards of swamp had lengthened into an hundred, before the firm ground was reached.

At last I was through, and in the heavy cover that fringed the foot of the ridge. On hands and knees the crest was gained.

---

The woods were asleep. Save for the fall of an occasional something that seemed to emphasize the quiet, there was absolute stillness. Suddenly, *waugh-h, waugh-h, waugh-h-h-oo, who-o-o-o!* shouted an old screech owl in tones that made the forest ring.

Ugh! It was uncanny, that unearthly screech. So unexpected.

Silence again, as profound as before.

---

The moments pass. I begin to see more distinctly. Now I hear the flute of a cardinal as he tunes up far away in the distance. Something is moving down there in the swamp, for I hear the swish of the bushes as they spring back into place. It is not an awkward wanderer that is abroad, for the rustling that marks his passage is faint, so faint, in fact, that only an alert ear may detect it.

---

The dawn at last. With eager eyes I search the top of the towering pine that harbors my game. As the daylight grows, it seems to me that every knob, every gnarl, is a turkey, and once I even raised my gun to shoulder, so sure was I that I had discovered him.

At this early hour it is a habit with roosting turkeys to awake, stretch their long necks and look about in search of anything in the shape of danger. It is a way they have, and they never omit to follow this custom. This is what that turkey did, and his sharp eye spied me in a jiffy as I stood peering up in his direction.

One glance sufficed. With a woof-f, woof-f, of wings that told of a weight of at least 20lbs., he was off and away; another moment and I heard his derisive gobble echoing 'way back among the pines.

WILMOT TOWNSEND.

# Natural History.

## AN INDIAN MOUND.

HERE is the story of our mound exploration one summer when we were camped on the Island of Put-In-Bay, in the western end of Lake Erie. We had a boat, flat bottomed, about 16ft. long and rigged to carry a sprit-sail and pull two pair of oars. We had a small sail made for her, and said, "This sail will be a great help when the wind favors us. At other times we will row." But we never did row. When the wind was contrary we waited for it to change. We did not row five miles through that glorious summer. We stayed on one of that cluster of islands until tired of it, and when the wind came favorable sailed off to another. We fished, hunted, geologized a little, plundered the farmers' vines and generally enjoyed ourselves. But finally we did do some really serious work, and that is what I mean to tell about.

The outer barrier of Sandusky Bay is a long island named Catawba, and only separated from the mainland by a creek. We had heard of a remarkable Indian mound on the western shore of this island, and one beautiful July morning started out to find it. We had shovels, picks and all the necessary digging implements, kettle, frying pan, coffee pot, and all the more necessary feeding implements; plenty of stores; lots of muscle and pluck, and last, but not least, a favorable wind. On the western shore of Catawba Island is a little islet, barely a quarter of a mile square, called Sugar Rock. It lies in a deep bay, is connected with the main island on the north by a narrow reef of pebbles, bearing a single line of trees. On the south there is a similar reef, but it does not reach the shore; and through the interval is a passage to a broad and quiet lagoon, one of the few places where the great nelumbium shows its large pallid flowers and its wash-basin leaves.

The islet is covered with trees of good size; is rocky and uneven in surface, and on the northwesterly side rises into cliffs of some sixty feet in height. On the highest point of these cliffs, facing the west, was the mound which we were anxious to investigate. Our first camp was on the shores of the lagoon, and that proved to be a mistake. Not that the ground was hard; we were used to that, and a convenient straw-stack materially palliated that difficulty. But how thick the mosquitoes were! Right here let me enter my protest against Captain Mayne Reid. We had all read his books, and had learned that fresh pennyroyal, bruised and used profusely would certainly drive away the boldest mosquito. We were at the believing age, and believed in Captain Mayne Reid and pennyroyal, so we got lots of it and calmly prepared for night and mosquitoes. We bruised that pennyroyal; rubbed it on face and hands; covered ourselves with it. Did it hinder the robust mosquitoes of the wild and watery west? Not a bit of it. They liked it. It seemed to stir them up to a more eager activity than common, which was unnecessary. Put it down in big letters that pennyroyal as a mosquito preventive is a humbug.

In the morning we changed our camp to the western shore of Sugar Islet itself. It took a good while to get settled, and to get the commissary department properly supplied and going. One never understands how much time and labor go to supply the ordinary requirements and comforts of life, until he gets into camp and does for himself; and then he don't get the ordinary comforts; but he has some extraordinary pleasures that go far to make up for their absence; nevertheless a man who is ordinarily weak and lazy had better have a guide to do the camp work. The extra expense is cheap at its cost, and so is the extra comfort.

There was a confiding farmer near by with whom we negotiated for supplies, and obtained them at rates which seemed to us remarkable. White clover honey a eight cents per pound, splendid household bread at four cents a loaf, and chickens on the hoof at fifteen cents apiece. The latter were running loose over the whole neighborhood. We had no firearms and had to do the best we could with pebbles from the beach for artillery. There was a good deal of labor to the capture of each chicken, but lots of fun in it, and it was afternoon before the camp was organized and victualled, and we could get at the mound.

On the westerly angle of the islet, where the cliffs are highest, a level platform, approximately circular and about 60ft. in diameter, had been constructed by filling the inequalities with limestone boulders, and in the center of this platform stands a mound, at present about 10ft. in height and 40ft. in diameter. Its surface was, and is, covered with loose masses of limestone, such as are now found everywhere on the islet, varying in size, but none too large for a man to lift. Upon the mound were two or three good-sized stumps of the red cedar, their roots striking down through the boulders, and blackberry bushes and other brushwood made quite a tangle over it. Near the center was an excavation of about 4ft. deep made by a former exploring party, and we determined to attack at that point, widening and lengthening the hole. The covering of boulders proved to be from one to two feet deep, and among these enormous quantities of human bones were irregularly scattered, much broken but unmistakable. There must have been two or three bushels in the space we uncovered, which was a very small part of the entire surface. Beneath the boulders was an irregular layer of black, vegetable earth, averaging perhaps 6in. in depth, and beneath this was a hard and compact mass of yellowish brown clay, which formed the bulk of the mound. There is no such clay on the islet and it must have been brought there in canoes, and thence carried to the site on men's backs. That clay was extraordinarily hard to dig, being very tough and dense, and containing small boulders, which were always ready to catch the edge of the spade or the point of the pick. Soon nothing but the pick could be used, and it took a good many minutes to work out a shovel full of earth. We were all city boys, pretty muscular and healthy, but not used to hard manual labor, and the work told on us rapidly. But we stuck to it, taking alternately the pick, the spade and the hoisting basket, and none of us thought of giving in until we had got to she bottom of the mound. Still supper time was welcome, and the hot coffee and broiled chicken were more delicious than anything Delmonico can give us now. Then how good the pipe was as we sat around our campfire made of red cedar driftwood, and how soft the ground seemed when we rolled up in our blankets under the little tent, and how quickly we went to sleep in spite of a pint of strong coffee each had consumed. Then the glorious bath at sunrise, a hearty breakfast and back to the mound again with muscles that were stiff at first from yesterday's labors, but which limbered up after a few minutes' performance on the pick.

So we worked for two days, finding very rarely a fragment of bone, and twice or thrice an arrow head, but nothing of particular interest until nearly the end of the third day. Then we found, beneath the clay, and resting upon another stratum of black vegetable soil, nearly but not exactly in the center of the mound, a hearth of about 7ft. in diameter by 6in. thick, and composed of pebbles from the beach. Upon the hearth rested about 6in. of fine gray ashes, so completely burned that no fragment of charred wood or bone could be distinguished, and containing no implements so far as we could discover. At one end of this hearth, and almost exactly in the center of the mound, was a pile of limestone boulders, about 3ft. square and somewhat calcined on the side toward the hearth. Beneath these boulders was a deep cleft in the solid rock, such a crack as often occurs in these limestone cliffs. This we cleared of the earth and boulders which filled it, as far as we could reach, but found nothing. This was the whole result of all our hard work, and seemed to us at the time rather small; but now I am not so sure of that. Here was a site extremely unusual in character and surroundings, and exceptionally conspicuous. A great amount of labor was expended in leveling the surface and preparing the hearth, and the fire kindled there was visible for many miles around. Then came the very great task of carrying the clay from a considerable distance, and erecting the mound. All these things show that the fire was of extraordinary importance, and the accumulation of human bones mingled with the covering of boulders seems to indicate that the spot possessed some great interest, sacred or historical. Now, what was the purpose of the fire? Was it sacrificial or funereal, and are the bones among the boulders contemporaneous with the mound, or subsequent to it? I don't know, and I wish some one who does would tell me.

A. ST. J. NEWBERRY.

### The Old Back Lane.

A LONG time ago, when a boy, I thought I would look up a place to go berrying where I had not yet been. That was how I found the old back lane. To my boyish eyes the lonely path, the sunny back meadows and the roaring brook had all the charms of a new country. It was a sunny morning that I first climbed the hill with pail in hand. The fish in the brook claimed my attention; my young heart was filled with awe among the cool, silent pines, the limbs arching over the lane, through which streamed the radiant sun.

Many the happy days spent there alone or with friends. Never was there a place where berries grew so plenty and large, and flowers, wild grapes, apples and nuts so profuse, besides lots of small game in the woods, and fish and ducks in the creek. How the bobolinks did sing in that meadow, and robins and thrushes and chewinks in the pasture. Bluejays and crows were everywhere. I knew where a partridge might be found anywhere in season.

Thousands of miles away, on the sandy plains, have I thought of the cool waters and shady woods of the old back lane, and been thankful for the memory of those days.

The other day a friend and I took a walk there, and we found a saw-mill at the entrance of the lane, and a big stack of boards, and a little distance further we found our loved pines laid low. Never, it seemed to me, had I loved them so well as now they were gone—not even when I had climbed them and been rocked by the breeze in their branches, or had lain in their cool shade and watched the hawks sailing in the blue heaven. O. FRED NEUBERT.

### Devotion of a Chimney Swift Mother.

WHEN a boy, I often watched the chimney swifts, a dozen at a time, with closed wings and a wabbling motion, drop into our unused chimney for the night. In this same chimney, which first drew my attention to the birds, I once saw a beautiful thing—a tender side of bird nature.

Once, some month or more after all these little birds had taken their flight to more sunny climes, I heard a familiar twitter in the chimney, and taking out the old-fashioned fireboard found a full-grown bird lying upon the hearth. Looking more closely I discovered that he was fastened to the nest, which by his weight had fallen from its attachment up the chimney. The fellow seemed to be assured of my friendliness toward him, for he laid very still and quiet while I examined the case. I found that he was fastened by a strong hair from a horse's mane or tail, which, wrapped over his leg, bound him fast to the nest. His anxious mother, who had cast in her lot with him to remain and die too with him, for the time of insects was about gone, came into the chimney and actually waited beside me while I snipped the strong hair and released him. It was an hour or more before he got the use of his leg and learned what his mother was teaching him by flying up and down in the chimney, and then they both started on their lonesome flight to the far south. I have often wondered at this mother's generous devotion, for instinct would teach her that she must die with him if she staid, and yet she had apparently made up her mind to just that. B. B. S.

MARIETTA, O.

### Bird Calls of the Night.

WATERTOWN, N. Y., Sept. 5.—*Editor Forest and Stream:* The migratory flight of birds is now heavy in northern sections, and I would like to ask readers of FOREST AND STREAM if they have success in identifying the species by the call note that is nightly heard? Some of the voices remind one of the bobolink, and other clear whistling notes seem rightly to belong to the oriole, but it is difficult to imagine these species as abundant as would be thus indicated. Nearly all the voices, however, seem puzzling. Are these notes heard peculiar to the migratory flight?

J. QUAY.

[Many notes of night-flying migrants are to be heard at this season, but it is by no means easy to identify species by their calls. We should doubt that the whistle came from the oriole. More likely from some plover or sandpiper. The note of the bobolink is unmistakable, however.]

# Game Bag and Gun.

## HUNTING AFTER SIWASHES.

AT the second crossing of the Columbia by the Canadian Pacific R. R. in British Columbia is the mining town of Revelstoke. From here I started the last of October for Griffin Lake for a caribou hunting bout with Charlie Hathaway, in the Gold Ranges, near the divide of water five miles up the trail from Three Valley Lake on the C. P. R. in the Eagle Pass.

Charlie, who is a trained, plucky hunter and trapper, as well as an experienced "rustler of the mountains" for metalliferous deposits, had built a shack here two years ago, and in company with Tom Jones had hunted, trapped and prospected the country pretty thoroughly, but did not succeed in finding much smelter food in that section.

When we reached camp we expected to find there a small axe, which had been left last season, but it could not be found. Charlie said, "No one but Siwashes would take it away." We easily stripped off the thick, dry bark of large dead fir trees, which makes a hot and lasting fire.

Charlie said, "You rustle for fish while I fix up the camp and cook a bannock." In about half an hour I came in with ten mountain trout, ranging from 4 to 7in. long. I was greeted with a cheerful fire in the stone fireplace, a bannock just browning in the skillet and water boiling in the pot. Soon some slices of spiced bacon took the place of the bannock, and when this was fried and the tea was steeped we partook of a much needed early supper. Then I went out for a lot of fresh spruce "feathers" for our bunk. On returning I found the old damp and musty chips and dirt cleaned out of the shack, the dishes washed and the fish dressed for breakfast. Our raised framework bunk was made up, the household goods were put in place, and retiring early we talked over plans for the morning hunt, and soon lulled by the murmur of the creek,

"Slept until the dawning beam
Purpled the mountain and the stream."

Early next morning we started up the mountain on the north side of the creek, accompanied by Charlie's well-trained dog Prince, to try our luck at stopping something with horns.

On the way up the runway Charlie explained that caribou seldom traveled faster than a trot unless badly frightened, but a man following their track might go far without finding them, especially if it was the single track of a buck, which "roams" at this time of the year.

We had gone about quarter way up the mountain and I was lagging behind, when I suddenly heard a rustling. Charlie bleated like a doe or fawn, and looking up I saw him point his Winchester up the mountain, and then shifting it lower down he fired, and then sent another shot to the right down the slope of the ridge, when the dog started on the run and could not be stopped.

Coming up to Charlie on the ridge of the cross runway I did not have to wait long for the member from Griffin Lake to open his speech. "Well! I'll be taxed if I ever saw anything like that before! Nothing but a Siwash dog could have sent that buck and doe along as though the devil had kicked them! I just saw two narrow streaks of dark gray lightning through the openings, about 150yds. away, and was so surprised I missed them both. Well, the jig's up for this side of the mountain to-day."

Returning to camp and taking an early dinner we started for the mountain on the south side of the creek, and when part way up a runway saw fresh tracks of both deer and caribou, and Charlie pointed out the bones of a buck he had shot last year that struck his trail from a cross runway and followed up behind him, coming into sight about 60yds. away. It was a "soft snap" for a man with a Winchester, and the only time Charlie had been hunted by a caribou instead of being the hunter.

We followed on up the runway, which was laid out by caribou and deer generations ago, and the course could not be improved on to-day. The genius that attempts to find a better path up the mountain than that engineered by the old-time caribou, will travel on a road to disappointment.

There were plenty of swamp and spruce partridges and fool hens about, as well as numbers of large, fat red squirrels; but no big game appeared. So on coming back I ventured to break silence by shooting what proved to be a mountain harrier, with wide wings spreading over three feet from tip to tip.

The next day we tried again on another runway, and found moccasin tracks, but no horned game. The line on climbing I drew at timber limit, and followed down another runway; but Charlie went clear over the mountain, and met Ben Green, who was trapping five miles up the trail from our camp. Ben said the Indians had been hunting and drying their meat in that section for the past ten days, and that their system of hunting with dogs had driven the game to the other side of the mountain, or had frightened it so that it only traveled nights.

Charlie arrived in camp about 3 P. M., having traveled "up hill and down dale" about eighteen miles since 7 A. M., and it required several platefuls of broiled venison sirloin, that Ben had kindly given him a section of, to get him into good nature and cause him to open his mouth.

Next morning was rainy, and as we were enjoying our venison and bannock, I suggested that cranberry sauce would be a lucky accompaniment. "You shall have it," said Charlie; "this hotel has to keep up its reputation for providing all the delicacies of the season."

After breakfast we went about a mile and a half to a swamp where there were usually an abundance of low-vine cranberries, but even here the wearers of moccasins had preceded us and gathered them in. We put nearly a pint in a small bag, and they made a very nice sauce.

Another venture in the game lottery up the mountain resulted in drawing a blank, and it looked as though we were not likely to augment our larder with caribou steak.

Another rainy morning, and Charlie proposed that as the woods were very wet it would be well for me to stay and keep camp, catch fish and cook a bannock, while he tried his luck again. This programme was carried out, and about 3 o'clock the dog came into camp, soon after followed by Charlie, staggering under the weight of the hindquarters and skin of a caribou. He was greeted with a "Hurrah! Good boy! How many got away?"

While discussing a hot dinner, details of the hunt were listened to attentively. Near the top of the mountain a

family of four does, including a two-year-old, coming down the runway, were met by Charlie going carefully up. The discovery was mutual at a distance of only 50 or 60yds. Without hesitation, fire was opened on the leader, which was killed. Dropping on his knee to get below the smoke, he gave a retreating doe a shot back of the foreshoulder that dropped her, but she rose and bounded up a side runway and was voluntarily headed off by the dog, and at about 200yds. distance a second shot secured her.

As the other animals had not gone far up the mountain Prince succeeded in getting round them, bringing them to a partial halt, so that on coming up to within 150yds. or so a shot in the shoulders of one brought him tumbling dowh the mountain, and the other, shot near the heart, fell lower down.

These were the relative positions in which we found them the next day. Their skins were deftly removed, and the writer packed down the finest set of horns, to be mounted, and when near camp shot a large fox martin.

We got to camp at 5 P. M. and as our last batch of flour was used up and the weather was bad we arranged to make an early start in the morning to pack our traps and meat out to civilization.

The packing out was a severe test of endurance, and we did not stop to unpack for dinner for fear of being late to the lake. On arrival we found the boat was gone, and as darkness shut down suddenly we were obliged to camp down on the ground without time to rig up a frame to spread our skins above us for protection. We succeeded in getting a good fire, steeped some tea in a skillet, spread our skins on the ground, with blankets and rubber sheet above us, and took the pelting rain and big drops from the trees all night.

Next morning Charlie found an old dugout and paddled it round to the tie camp, got a bite to eat and ascertained that the Indians had taken the boat across two days before. Again they were ahead of us.

We rowed over and got our traps to McKenzie's tie camp at 11 A. M., where I first got food after a fast of thirty hours. After dinner we each took a pack along the railroad to Griffin Lake, and a second trip brought all our belonings to the cabin.

In discussing the hunt that night we concluded that a trip a fortnight earlier would have been more timely as it would have given us precedence of the Siwashes instead of hunting after them and taking their leavings.

F. W. R.

## TEXAS AND THE SOUTHWEST.

AGAIN has Jupiter Pluvius visited southwest Texas, and this time with a vengeance. At Uvalde, ninety miles west of San Antonio, the Leona River overflowed the entire valley and a number of lives were lost, and the beautiful Nueces River has reached a higher mark than ever before. From every driest section of the State comes news of a liberal downpour.

This insures game for this winter in large quantities. It may not be generally known, but Texas streams are the winter home of the cold-water mallard, not the bird that comes early in the fall with a rusty breast, but that noble drake in full plumage which likes to dip his reddish yellow legs in ice water. You can find him in the Guadaloupe, San Antonio, Nueces, Medina and Comal rivers as soon as the waters congeal in the North, and while it is not conventional duck shooting, yet it is pleasant to skirt the narrow streams when the leaves are sere and yellow, and plunk the green head as he springs from the shallows of a Texas stream.

### That Great Duck Story.

I see that one of our enterprising railroads has reprinted the startling account of two days' shooting by two San Antonio sportsmen, wherein they are reported having killed 812 in two days. While the statement does nobody harm, it might be well to state that the report is not true. 812 ducks is more than any four sportsmen want to kill in a week. If all the guns that come in Texas kill 25 birds to the man each day, I warrant that all visitors to Texas will return home well satisfied with the country and the chances for duck killing.

While denying the truth of these exaggerated reports, I would like to make the statement that this is the greatest duck shooting region in the United States, and they are not common ducks either. We kill all kinds of web feet, from the plebeian spoonbill up to the high-toned $5 a pair canvasback, and his majesty with the Goodyear india rubber bill and photo brown neck is not scarce either. There are lots of them, and should any Northern sportsman doubt these duck shooting statements the writer will undertake to prove the truth of these remarks with his own purse.

### Plenty of Quail.

A private letter from Beeville, Texas (about thirty-five miles from the coast), contains the welcome information that there are more quail this season than for several years past. The writer also states that the knot of sportsmen located at that point are keeping their eyes on the pot-hunter, and that the latter will not be able to ply his nefarious occupation as easily as of yore. He also says, "Stop the sale of game."

### This is a Joke.

I went into a game dealer's place accompanied by a friend whose delicate palate demanded something *récherchè*. Said he: "Have you any quail?"

"Yes," promptly said the game dealer, "and they are very fat this season."

You should have seen the button on my coat lapel indicative of a membership in the National Game Protective Association. The color of it was golden before the question, but when it heard the dull, hard plunkets as they dropped from that game dealer's lips, it turned a silver gray. Our quail season opens Oct. 1.

"Let's see 'em," said my friend, who don't know the difference between a Bob White and a Mexican spittoon.

I craned my neck away into the box of chipped ice, over which was bent the appetizing form of the dealer. He reached away down into the bottom and brought out a fat plover.

"Ain't they nice."

"Yes," said the friend, "give me a half dozen."

The dealer looked at me—I looked at the dealer, and I thought I noticed a derisive leer on his greasy countenance.

I didn't tell my friend anything about the deception. I was sorry I didn't have a go at the game man.

O. C. G.

## CHICAGO AND THE WEST.

[*From our Staff Correspondent.*]

### The Pine Woods Fires.

CHICAGO, Ill., Sept. 8.—In England, on the Continent, all over the world, the people will read of the terrible fires which within the past week have swept across great areas in the States of Minnesota and Wisconsin. They will read that in the city of Boston, on the eastern seacoast of the United States, the smoke from these forest fires was so great at one time this week as to cause great inconvenience to those who were upon the streets. Reading this, they will think that the fires must have been near Boston. Will they realize or believe the extent of this unparalleled conflagration, when they are told that the fires were burning more than a thousand miles west of Boston? The people of Boston, of New York, of all the Eastern States, have read of the fearful loss of life at Hinckley, at Pine City, along the Kettle River, all through eastern Minnesota and upper Wisconsin, from Eau Claire and Chippewa Falls to Sidnaw, the latter point being in the upper peninsula of Michigan. But will they know that these points lie separated over a square whose sides are over 150 miles each? They have read, perhaps, that over 1,000 square miles have been burned over, but if they will consult a map and compare it with the press reports from all over this square of pine country, they will be forced to the belief that the actual area of fire was many times a thousand square miles, even allowing for the fact that not one fire, but fifty different fires, seem to have broken out almost simultaneously in the most widely diverse portions of this great tract of country. We read of many countings of the identified and unidentified dead in and around the little hamlets which were hid in the great pine forests. Over 500, says one report. Another says 466, another 420, others over 500, one says "probably over 1,000." It is certain that between 400 and 500 dead human bodies have been recovered and buried. Long trenches received the dead at some of the stricken villages. It was like war. But what battle ever scattered its victims over a space of more than 100 square miles? You may find the dead of any battle some day. The dead of the forest fires of 1894 will never be discovered.

One who has never traversed the pine country of the great wilderness lying south and southwest of Lake Superior can form no just conception of its character. I think there is no more forbidding country in the world. You climb one little roll of the ground and you look about you. Only the same rolling in of the black and uninviting forest, with no rifts, no clearings, no features to free it of its horrible monotony. Log this country off, leave it full of toppings, of fallen trees and logs, of half consumed trees; let the roads through the dense tamarack swamps become overgrown, and all the trails be blotted out by the crowd of the recent growth, and you leave it still more desolate and inhospitable, still more dangerous for the inexperienced traveler. As the years pass the boughs and needles and the resinous trunks blend into glorious food for the fire demon. Nowhere else can so furious a flame be produced, and after it has raged a time the heavens become a veritable blow-pipe to intensify its fury. The touch of the forward flame is like the grip of a cyclone, aside from the destruction wrought by the heat. Now set human beings down in this country, which was unwet by any rain for over two months, and let some careless or fiendishly deliberate hand apply the needed spark, and you have roster of death, your unwritten volume of anguish and despair. What the known and unknown roster of dead and missing really is must long be one of the secrets of the woods. We shall never know how many cruisers and prospectors, how many fishermen and hunters, how many parties of pleasure or gatherings of labor were surprised by the fire. In that fateful square of 150 miles there are woods where no white man's foot has trod a second time, and waters where no line was ever cast. These may have their secrets.

### No Sportsmen's Parties Reported Missing.

At this writing no actual reports have come in of the loss of sportsmen in the fires, though narrow escapes have been frequent by those who were deep in the woods of this great pleasuring ground. Mr. and Mrs. Harry D. Stevens, of Chicago, were at Upper Twin Lake, just below State Line, Wis., and intended to stay some time yet, Mr. Stevens having only lately taken a 44-pound mascallonge (the largest reported for the season), but this week they come hurrying out of the woods, afraid to stay any longer. They said the fires were visible plainly and the heavens were all alight. Mr. Stevens says that numerous camping parties were coming into the railroad from all over that country, frightened by the fires. He had not heard of any loss of life. It seems probable that the anglers and campers, who would naturally be near the larger bodies of water, could take care of themselves even if overtaken by the fires. The little villages and logging camps situated away from streams or lakes, in the heart of the black forests, were the centers of the greatest suffering.

The fires crossed the very best part of the trout and deer country north of here. Hinckley and Pine City, in Minnesota, where so much loss of life occurred, may be better understood if we know that they lie east of the Mille Lacs country, say sixty to seventy-five miles southwest of Duluth, and perhaps rather more than that distance north of St. Paul. From there the fires swept east, clearing the great range that lies south of Ashland, Wis., north of Eau Claire and west of Iron Mountain, the latter point being, say, 150 miles east of Hinckley. The fire was not solid, but in patches, which ran into each other irregularly. It does not seem to have come much south of the "Soo line" railway, which would bring it along above Pembine and Ellis Junction on the old Milwaukee Northern road. It crossed the upper Brulé and the Menominee Brulé country, seems not to have taken in the Tomahawk Lake country, but must have included or have crossed near to the Manitowish country. All the trout and deer country southwest of Ashland appears to have been generally visited.

There is no doubt whatever that there were many parties of sportsmen from St. Paul, Chicago, Milwaukee, Ashland and Duluth in this great section of the pine woods at the time the fires broke out. Let us hope that the record of the other cities will be as free from disaster as that of Chicago now seems to be. One party of Milwaukee men had a narrow escape, I am told, but I get no particulars. It is almost too much to hope that all the outdoor people got out safe from the fire trap of the forests, but at this time we may at least suppose it possible. Against the loss of human life one hardly feels like mentioning that of animal life. Yet the loss of the latter must have been very great indeed. Along the "Soo line" in Minnesota dead deer and wolves are reported to have been seen in dozens. Far to the east of that, in Wisconsin, one track walker reports seven dead deer along one short stretch of his track. The progress of the flames was so sudden, rapid and powerful that not even the fleetest animals could escape, even though in many instances they had not been surrounded on little islands of untouched forest or swamp which were consumed after the main fire had gone further on.

As the main course of the fires were to the east and northeast, the great body of the deer was probably driven well toward the northeast corner of the State of Wisconsin. The southern migration of the deer of the upper peninsula had not yet begun, but the fires unquestionably drove large numbers of deer south out of that country. The fires were stopped partially or entirely two days ago by the providential rains, and they had not then burned to the Great Lakes. At Conover Station, at State Line, at Three Rivers, and all through the mascallonge country thereabout, deer were day before yesterday reported to be seen in most unusual numbers. No doubt the general drift of the game which escaped has been toward the upper right-hand corner of Wisconsin. If one wishes to kill his deer this October, he should by taking the Wisconsin Central, the Milwaukee & St. Paul, or the old Lake Shore & Western or Milwaukee & Northern roads, be able to meet his game 50 to 100 miles further south this season than would usually be the case.

With customary timidity a contemporary is unable to answer by itself the question whether forest fires can be caused by the discharge of firearms, and asks advice upon it in its closing sentences. Almost any reader of any paper can give the advice. Almost any hunter knows the necessity of caution while in the dry pine woods, and knows that especial care should be taken of the dropped cigars and matches, and of camp-fires also. We need not blame careless hunters for these fires in every instance this fall, however. The daily press this morning prints facts which make it seem possible that the fires were set out by conspiracy of timber pirates, who have been stealing the lumber from the public school lands, who have sought to destroy by fire the record of their theft. One paper heads this story, "The Crime of the Century." The appalling destruction which has now gone into the record of the day, leads one to think the heading well chosen if the facts are sure. The calamity has been more tremendous than will ever be realized by one not familiar with the country which has been afflicted.

### The Floods in Texas.

Meantime, from the opposite side of the country, more than another thousand miles to the south, come the reports of the Texas floods, which raged much at the same time as the Northern fires. Around San Antonio for 100 miles everything seems to have been under water. It is indeed a mighty land, that of these United States. But our Texas friends are not so badly off as they of the North, and they take heart at the thought of the waterways now filled which last year were dry, and of game to be abundant where last year it was hardly known.

### Discontented.

I am discontented that the abundant rain of this week did not occur last week, to fill up the Horicon Marsh so the boys could get shooting on opening day. It was hard pushing Sept. 1, and the bags were not large. John Yorgey made top bag on the Diana grounds, 44 birds; Dick Merrill got 32, P. V. White 31, L. R. Brown 30, C. S. Wilcox 16. Other bags ranged 10 to 25 birds. Billy Mussey, who was high bag last year, 75 birds, only got 4 birds this year. He started after his old stand, but some six shooters seem to have arrived somewhat ahead of him. This week the marsh has much more water on it, and from now on the shooting should be fine.

I am discontended with a full-page picture of seven deer, only two with horns on, which appears in the *Sporting Review*, this month. The picture shows three hounds in the foreground. It is against the law to use dogs in hunting deer in Wisconsin, or even to use dogs for rabbit hunting in the deer season. The author of the picture and of the accompanying article knows this.

I am discontented because a sportsman of New York city, whom I have tried to help to good shooting grounds in Minnesota and Dakota, says he wants to go to Dakota, but he "doesn't care how far from the railroad, if we can have a chance to ship our birds to some cold storage warehouse in St. Paul or elsewhere." I question distinctly whether a cold storage warehouse is a respectable part of a genuine sportsman's outfit. Moreover, it is against the law to ship game out of Dakota to St. Paul or any other point. Such things discourage me. Buy the *Game Laws in Brief*, and live up to it, all shooters who want to travel. Then buy a copy of FOREST AND STREAM, and live up to that. Do these two things and you will always have game to shoot in reasonable abundance. Don't do it and you won't.

E. HOUGH.

909 SECURITY BUILDING, Chicago.

### The Maine Deer Supply.

AUGUSTA, Me., Sept. 1.—On a recent fishing trip much was heard and seen respecting the abundance of game in this State. We fished where there were fish, away from the haunts of men, in waters whose capabilities we knew, where the trout holds undivided sway. No other fish inhabits the cold clear waters of this mountain lake hidden among the mountains. We saw deer daily, though not specially on the lookout for them. One evening we saw nine within half an hour and half a mile. I asked an old guide who has spent his life in that region if deer were not more abundant than thirty years ago. "Yes; fifty to one," said he. One of the game wardens said he saw and counted over two hundred in ten days while traveling through woods. I can't recall the exact number he named, but I know he said he saw fifty-two in one day.

KENN E. BEC.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable,*

## IN MANITOBA.

WINNIPEG, Aug. 31.—Mr. G. H. Merrick, of the firm of Merrick & Anderson, wholesale hardware merchants of Winnipeg, has been naughty. He is an eminent, honored citizen and business man, and those who know him all unite in saying that he is, besides, a royal good fellow—but these enumerations are not the reasons for his naughtiness.

In an evil day last week he took his gun and sallied forth to the country, not far from this city, where game abounds. He saw some ducks. On the impulse of the moment—an impulse most potent because its possessor had a gun in hand—he accumulated three ducks, and thus was guilty of a violation of the game laws of Manitoba.

An information was filed against him and the case was tried on Thursday, Aug. 30. He manfully pleaded guilty, and was fined $10 and costs for each duck, the legal penalty of the statute being not less than $5 nor more than $25.

The rest of the day thereafter was a busy one for Mr. Merrick in answering telephone calls, all of which seemed to pertain to the price of ducks, to whether the shooting was good, etc.

In Manitoba there is an admirable firmness in enforcing law. The weak and the poor are not made legal examples by invidious selection. The law is enforced for the community, and not for a class.

Game wardens are numerous and guard quite closely the highways leading into town. Any suspicious turnout is liable to search.

With all the danger attached to illegal shooting, parties go out frequently, taking care to provide themselves with fast horses, and thus equipped it is very difficult to catch them. While the officers can search the wagons of the suspected parties, they cannot search their persons.

Mr. C. A. Boxer, of Winnipeg, who will be remembered as prominent in field trial matters a few years since, is now a Government game warden. He informs me that the greatest energy is necessary to suppress the violations of the game laws, and that many difficulties are encountered in capturing the violators. For instance, after shooting chickens a game violator will skin and put them in his hunting coat. As the officer cannot search the person of the offender, and as it is difficult to classify a skinned chicken, it is readily apparent that the officers' task is not an easy one. Yet the energy displayed by the officers has a very deterrent effect on the lawless shooter, and the depredations are confined to the few.

If there was a fraction of public sentiment of such game protection displayed by the public of the States, it would be happily auspicious for the future of game therein.

B. WATERS.

## NEW HAMPSHIRE DEER.

IDLEWILD CAMP, Second Connecticut Lake, Sept. 3.—The still-hunting season opened here Saturday with Mr. Tilghman Johnston, of Wilmington, bringing in the first deer. It was taken in the South Cove with Gus Haynes as guide. The first two nights of the season were cold and wet and very unfavorable for hunting. The larder of the camp contained venison, trout, pheasants and English snipe for Sunday. Every boat is out to-night on the First and Second lakes, and several deer are sure to be brought in in the morning. Game has never been so abundant as this year, and sportsmen are delighted with the outlook. Mr. O. C. Bumford, proprietor of the Lake House at First Lake, Idlewild Camp at Second and the Sportsman's Cabin at Third Lake, has a pack of seven fine deerhounds ready for the running season, which opens Sept. 15. These veteran guides are to be at the lakes through the season: Ned Norton, Fred Washburn, Guy Haynes, Fred Hall, Dave Merrill, Bert Nutting, Jim Reynolds, Wyman Huggins and Jock Farnsworth.

Mr. and Mrs. Chas. G. Rumford, Samuel C. Rumford, Lewis Rumford, Mr. and Mrs. Tilghman Johnston, Miss Margaret Johnston, W. Poyntill Johnston, Tilghman Johnston and Harold Canning, all of Wilmington, Del., are at the camp for a few weeks' stay.

Dr. and Mrs. J. W. Whidden, and Harold Whidden, and Paul P. Gould, of Portland, are at the camp for the season. Mrs. Whidden is an enthusiastic sportswoman, being an accurate shot and an expert angler.

Mr. and Mrs. C. E. E. Whiteley, of Wilmington, joined the party Tuesday night for a week's shooting.

Mr. John Place, of Fishkill-on-the-Hudson, came Monday for a two weeks' visit in this game land.

The Idlewild Camps will be kept open till Oct. 1 this year and are a genuine sportsman's home.

There were fifty people entertained at the lakes to-day, and the houses will be full till the close of the season.

---

CLAREMONT, N. H., Sept. 3.—Opening day for hunting (Sept. 1) made a great showing here. About every gun brought in from four to six grouse, and gray squirrels in abundance. Moody More, Walter Harriman and Alden Lowell, in about three hours' hunt, bagged fifteen grays. Everybody got some. To-day Frank Haskell, Geo. Noyes and Mr. Foster bagged twenty-seven grays, and all the hunters are happy.

No water in the brooks yet. I fear it is a death blow to trout. COLUMBIA.

---

MANCHESTER, N. H., Sept. 7.—"You fellows should stop hunting for five years and then you would have something to shoot," said a prosperous Goffstown farmer to me the other day. The remark, though not conveying a new idea, was certainly a true and good piece of advice, and although it may be a long time before it is heeded by the sportsmen of this State, deserves serious consideration. A good illustration of what a close season, covering a series of entire years, will do, is had with deer in Vermont. They have been protected there for a number of years continuously, and are now reported so plenty in sections around Rutland that farmers complain to the Game Commissioners that they destroy their crops. In some instances a drove of eight or ten deer visit a field at one time, and unless watched for and driven away, do great damage. Evidently there is sport ahead in the Green Mountain State for somebody when an open season is reached on that class of large game.

The first day of September, the beginning of the game season in New Hampshire, found the conditions for hunting far from satisfactory. The severe and long-continued drought drying and scorching the whole face of nature, and leaving little but dust, dry watercourses and lifeless vegetation, where green fields, babbling brooks and thrifty plant life of every description should abound. Farmers are naturally more than usual afraid of fires being started by careless sportsmen, and from every point of view the opening has proved dull and disappointing. The best bags reported brought into the city thus far were taken Sept. 1 by A. H. Weston, H. M. Moody and Frank Dowst. 18 partridge and woodcock; W. C. Clarke, 12 partridge, quail and woodcock. After we have a heavy rain storm more activity will be found among hunters.

PAYSON.

## OREGON NOTES.

PORTLAND, Oregon, Aug. 29.—Jack McFall and Mr. Lipman have just returned from a two weeks' cruise in the Olympics for big game and fish. I listened a whole afternoon to Jack's relation of scenes and incidents of the trip. They certainly had a royal time. There was plenty of elk, plenty of bear and plenty of deer, and fish (trout) under eighteen or twenty inches were not considered worth hooking. That is a great and almost unknown country and, for fish and game, I believe it to be the best on this continent. The only trouble is that it is a hard country to get through. The character of the country affords pretty good protection for the fish and game and will for many years to come.

---

Mongolian pheasants are very plentiful, but through the stupidity of our Legislature proper protection is not afforded them. As the law reads they, as well as other varieties, may be shot after the 1st of August. It is a shame and the better class of sportsmen refrain from killing them. The idea of killing the mother that has a dozen little featherless creatures depending on her for a living is very obnoxious to sportsmen that carry a heart around with them.

---

J. Roberts Mead, George Dehardy and the writer will shoot canvasbacks on the famous Green Lake on the

Farmer Robinson, distrusting the aim of Farmer Smith, whom he has invited to go shooting with him, takes the precaution to do up old Ponto in a Yankee shot-proof dog blanket.

Washington side of the Columbia the coming season. Great sport is anticipated. The great flood that visited us last June entirely destroyed many of the very best canvas lakes, either filling them up entirely or burying the wapatos so deeply that even the beastly, disgusting carp will never be able to dig down to them. In fact the great majority of the very best lakes along Columbia Slough and down on Sauvie's Island have been entirely ruined. The current in the river carried most of the sediment to the Oregon side and left the Green Lake comparatively free. It is said that what is one man's loss is another man's gain, and in this case we are disposed to hope that the old adage may prove true. It certainly has proved true in some respects, for when Mead paid the lake a visit recently to prepare for the shooting season he found that some one that believed in the adage had been there and "swiped" nearly a thousand loaded shells, all our bedding, axes, etc. S. H. GREENE.

## TEN DAYS WITH PRAIRIE CHICKENS.

MANY moons have passed since I last sent a communication to FOREST AND STREAM, for it has been a long time since I had the pleasure of going off with gun and dog. Press of business two years ago, then World's Fair year last year (when we all felt it our duty to remain in Chicago and entertain friends) deprived me of two outings, those short seasons of relief from care and trouble which are always looked back upon as the bright spots—the oases of the dry and dusty journey of business life.

But if I have not been able to go myself, I have sent others to these shooting grounds, and, thanks to FOREST AND STREAM, have seen many persons who have enjoyed the shooting in South Dakota through information gleaned from your columns.

This year it has been my good fortune to be able once more to take two or three weeks off, and I have just returned from a most successful shoot. Successful not only from a hunter's standpoint, but because of the renewed vigor and energy which one always brings back from a few weeks' sojourn in the clear, bracing air of the high prairies of Dakota.

Our party, consisting of Messrs. W. T. Underwood and Chas. Arnd, of Chicago, and myself, started via Chicago, Milwaukee & St. Paul Railway Monday evening, Aug. 13, arriving at Armour, South Dakota, the following afternoon at 5:30. We had telegraphed ahead for a team and found it waiting us at depot. Dogs, guns and baggage were quickly loaded in, and we started for a drive of sixteen miles northwest from Armour to the little town of Harrison, arriving there about 6 P. M.

Mine host John Ernessey had everything in readiness for us and we soon had our baggage unloaded, shooting togs laid out, shell-cases filled, and everything ready for the morrow, and the opening of the shooting season (Aug. 15).

We found many hunters headed for Armour, and thought best to push out further into the country, and the results showed the wisdom of the course. To any of the readers of FOREST AND STREAM who are contemplating a trip for chickens we can recommend these grounds. A team can always be had at Armour at reasonable rates, with a good driver, familiar with all the surrounding country. Mr. Ernessey and his good wife will make it pleasant for any one stopping with them. Mrs. E. is a capital cook and ready to serve meals at any hour of the day or night; her table is supplied with the best the land affords, with an abundance of sweet butter and rich milk.

By inquiry of the conductors on the Chicago, Milwaukee & St. Paul R.R. I learned of other places along this popular road where good chicken shooting can be found. Many of the conductors are enthusiastic sportsmen, and I have always found them ready and willing to give all information needed to find good hunting grounds. One of the best locations is in the vicinity of Waubay. This is on the northern line of the C. M. & St. P. R.R. about sixty miles east of Aberdeen and 225 miles west from St. Paul. One can hardly go amiss for good shooting along the northern line of this road, but the further you get away from the larger towns the better, as almost every town or city of any size has its corps of hunters, and they keep the nearby grounds shot out. At these smaller places good shooting can be found all through the month of September and late into October, while near the larger towns one must be on hand at the opening of the season, as the birds soon become wild and scattered.

The following is our score for the ten days' shooting, and considering the fact that we hunted only in the early morning, about two hours, and two or three hours in the evening, we think the count fair: Aug. 15, 38; 16, 65; 17, 36; 18, 40; 20, 44; 21, 19; 22, 26; 23, 57; 24 (½ day), 37; 25 (½ day), 13; 27, 32; total, 407; an average of over 40.

If any of your readers desire any further information as to where to go, route, etc., I will be glad to answer any inquiries. S. C. GLOVER.

### Game in Middlesex Fells.

MALDEN, Mass.—*Editor Forest and Stream:* It gives me great pleasure to read your editorial in issue of 1st inst. of the movement to colonize the Mongolian pheasant in the Middlesex Fells. It is an idea that I have thought favorably of ever since there seemed a likelihood of the Fells being reserved. With careful trapping out of the vermin and attending to the food supply, such a colony ought to thrive and get a good hold in three or four years. With such care the grouse and quail would also increase. There are not many left, but I hear of two coveys of grouse. There are some portions of the reservation that are arable and might be continued as such to supply the necessary food, part of which might be left ungathered every year, the other part might be gathered and placed in small stacks in the most sheltered places near the roosting places; other suitable game might be added at discretion. With such a sheet of water as Spot Pond and a feeding place like Turkey Swamp, it occurred to me that wild ducks ought easily to be colonized there, and might be induced after a few years to make it a regular feeding ground. As one who has had some experience with both pheasants and wild ducks I think there is a good chance of both succeeding. It might be necessary to pinion a few of the latter for a year or two and look after them some during the winter months.

J. M. P.

### Expensive Speculating.

"DOCK" Oatley and Jim Smith, the two Foster men arrested in Olneyville yesterday morning, when carrying quail and partridge to market in the season when the killing of these birds is prohibited, have been prosecuted on warrants for each and every bird in their possession. They pleaded guilty on each case.

Oatley was fined $20 on each of fourteen cases and Smith on each of twenty-three cases The total of fines was $740 and the costs amounted to $251.50.

At noon to-day they were still in the cells at the Johnston bridewell, and they were completely crushed by the severity of the penalties imposed.

It is understood that they are able to pay the amount of money required to settle the cases, but they feel it a great hardship to pay out so much. One of them had several checks in his possession, signed by marketmen, who paid fancy prices for illegally killed birds.

If they do not pay the fines and costs they will be taken to jail. If they are committed and prefer being jailed rather than part with their gains from the illegal traffic, they will stay in jail a long time. They will be allowed twenty-five cents a day for the first thirty days, and fifty cents a day thereafter. It will take about three years to work out the total amount, including committal and jail fees.

Game Warden Penney has been waited upon to-day by a number of the friends of the two prisoners, and they importune him to "let up on them." He firmly declares he cannot do anything of the sort, and declares that the game society has entered upon a crusade against pot-hunters in this State, that will be prosecuted without distinction and regardless of who may be drawn into the toils, until the pot-hunters and "fences" learn that they must desist from their illegal traffic, or suffer consequences that are to be feared.

Mr. Penney has also been encouraged by offers to-day from numerous true sportsmen, who place at his disposal any funds that may be needed to prosecute the work, and rid Rhode Island of the pot-hunting that has depleted the game which should thrive and be plentiful in this State.—*Providence (R. I.) Journal.*

**Chickens, Ducks and Geese**

are going to be very plentiful along the line of the Northern Pacific this season. Make your arrangements to go and get some of them. Send Charles S. Fee, General Passenger Agent, St. Paul, Minn., 4 cents in stamps for "Natural Game Preserves of the Northwest."—*Adv.*

### Prairie Chickens.

RECENT reports received by the Chicago, Milwaukee & St. Paul Railway from stations in the prairie chicken country of Minnesota and South Dakota all indicate a prospect of the best hunting for years. Chickens are very plentiful and in fine condition. Duck shooting prospects are also good. Full information can be had by addressing Ticket Agent, Chicago, Milwaukee & St. Paul Railway, 207 Clark street, Chicago.—*Adv.*

---

A DEER has been seen several times of late in western Massachusetts and northern Connecticut. It is a full grown animal and shows a quick pair of heels to chance comers. At one time it strayed to the confines of Springfield, being seen in a patch of woods. Then a glimpse was caught of it in the Belchertown meadows, and a fisherman saw it swimming in the Agawam River. Later it turned up and disappeared near Stafford Springs, Conn. It is barely possible that this deer has strayed down from the Green Mountains in Vermont, where deer are protected by a very strict game law, but the better opinion seems to be that it escaped from the private herd of some wealthy resident of either New Hampshire or Vermont. Wild deer are not unknown in Massachusetts, however, in spite of the surprise caused by the sight of the one referred to. In the dense woods of Cape Cod deer still roam in a primitive state, thanks to the law which seldom permits the hunter to take a shot at them.—*Evening Post.*

# Camp-Fire Flickerings.

"That reminds me."

## MY CHANCE ACQUAINTANCE.

"FISH ain't as plenty now as they was when I come to these parts," said my aged but chance acquaintance as he removed his brierwood and sent forth a small cloud of villainous tobacco smoke which would have demoralized a polecat or put out the worst cigarette ever rolled. "The lake was chuck full of 'em then. I've known 'em to frighten the cattle when they went to drink. Many and many a time I've had 'em scare the sense out of my horses when I was hauling out logs. No wonder the lake has gone down; there's been fish enough catched out of it to lower it more 'n three feet."

There was silence for a few minutes, disturbed only by the humming of skeeters and an audible suck, suck, suck at the brierwood, which would have been a credit to the rear end of an old-fashioned hand fire engine, then he resumed:

"One of them, though, done me a good turn onct. Ye see I'd been across the lake and was a-hurrying home, as it was getting late in the day. I run my boat into a snag and punched a hole through her bow below the waterline as big as yer arm. I didn't think to try and plug it up, but rowed as hard as ever I could for my life for the shore, but I put on too much elbow grease an' broke one of my oars. Then I thought the jig was up and looked around to see how far I had to swim. I took a hasty look at the shore and a squint at the hole in my boat, and noticed the water was not coming in. Then I took a good square look at the hole, and by ginger if a big fish hadn't gone and stuck his head through that are hole hard and fast and made it tight as a drum.

"I took a little rest to sort o' catch my wind, then with my sound oar paddled as hard as I could, as I was sort afraid the pesky thing would back out and leave me in the suds. Well, sir, I got ashore and stepped on to dry land, never wet a foot."

"Have you got that fish or any portion of it?" I asked.

"No, my friend. At first I kinder thought I'd keep him, but on second thought seeing as how he'd done me such a good turn I hadn't the heart to harm him, so I pulled him out carefully and put him back in the lake. He gave one or two short jerky sort o' flips with his tail, then moved off into deep water and out of sight, sort of proudly, like as though he knowed he'd done me a favor and was proud of it." A. W.

---

TALKING about kicking guns, here is one that I can vouch for. John G., a brawny and amiable locomotive engineer of the Mexican National road, had an old Pieper gun. The locks were worn so that the left hammer would fall if you looked at it hard, and the right one would not stand a wink. There were some white-fronted geese wintering at a lake down the road a way, and John often saw them feeding in the fields by the track. So one day he went after them with a gun loaded for geese, buckshot and powder to match. (He is a generous fellow and hates to be stingy about his powder.) He had crawled up a ditch to a distance of about 100yds. from the game, and was sliding up the bank speculating on whether he would shoot or not. He had both barrels cocked and the old gun decided she would. She kicked clear back through his hand, the hammers and action lever nearly tearing off a thumb, jumped clear across the ditch and turned a summersault. "You got him," yelled his companion. "Got nothin'," said John, looking lovingly at his piece of a hand. It didn't seem to comfort him much that he had killed one goose and crippled another one or two. The boys generously suggested to him that he had better send that old gun out by itself next time. AZTEC.

# Sea and River Fishing.

## MORE ABOUT THE SALMON.

*Editor Forest and Stream:*

We all know that the FOREST AND STREAM is a great educator. And yet, while its columns teem with the opinions and researches of the most learned, there always seems to be room for those of us of more plebeian stock to air themselves and our opinions.

We cannot refrain from the observation that many important truths have found their way to the public through the columns of the great sporting paper from the pens of common, every-day sportsmen. This is encouraging, and I take the liberty of making a few more suggestions regarding that prolific subject: the life history of the salmon.

That eminent student of the subject, Livingston Stone, by very careful estimates determined that the salmon travel at the rate of about two miles a day in the Sacramento, and about three miles a day in the Columbia. At that time my friend, Judge Greene, pointed out that if such was the case more than 200 days would be required for the salmon to reach their beds in the headwaters of the Columbia. In fact it would require nearly or quite three hundred days, for some of the spawning beds are about a thousand miles from the mouth of the river. I do not know upon what facts or data Prof. Stone made his calculations, but I believe that there may possibly be some mistake about it. The McGowans, of the Cascades, have been engaged at that place and at Astoria for many years, in handling and canning salmon, and they are regarded as among the most observing students of the habits of the salmon from a strictly business standpoint. The Cascades are about 138 miles from the mouth of the Columbia, and the McGowans always make it a point to keep themselves thoroughly posted on the "runs" of the salmon so as to be prepared to receive them when they reach the Cascades. James McGowan informs me that they always calculate that the "run" will reach them in from ten to twelve days from the mouth of the river. That would make the rate of travel from about eleven to fourteen miles a day. The McGowans are careful and successful men in this cannery business and know whereof they speak.

I have read with great interest the paper on "The Chinook Salmon," read by Prof. Stone at the annual meeting of the Am. Fisheries Soc., at Philadelphia, 1894. It is masterly. In fact, the very best thing I have ever read on the subject. The friendly controversy that for years has been going on in the columns of FOREST AND STREAM on this subject, may now be considered as about settled. He sums the whole subject up in these few words: "The truth is that the evidence compels us to admit both of these apparently conflicting facts, namely, that salmon can and do live for months in fresh water without food, and that they can and do feed during some of the time that they are in fresh water."

Doubtless that is the correct conclusion from the facts as stated by Prof. Stone, and as observed by all of us who have given the subject any consideration.

J. ROBERTS MEAD.

PORTLAND, Oregon, Aug. 29.

---

The run of salmon has been the best for years and the cannery men are correspondingly all happy. It is certainly interesting to observe and pleasant to contemplate the fact that the royal chinook is not yet extinct, notwithstanding the hoary prognostications of our pessimists. I wish that every man interested in the subject of salmon, and particularly in that part of it relating to the feeding habits of the salmon while in fresh water, could read Livingston Stone's delightful paper presented at the recent meeting of the American Fisheries Society. To my mind it is the ablest presentation of the subject ever published and I am glad to see that Mr. Stone has at last given us fellows that believe that salmon do feed to a degree while in fresh water a little encouragement for the faith that is within us. You know that the U. S. Commission have always and invariably heretofore declared unreservedly that the salmon do not feed at all while in fresh water. I see that Mr. Stone has modified that declaration to the extent that while they can and do live for months in fresh water without food they can and do feed during some of the time that they are in fresh water. I guess that is about the size of it. S. H. GREENE.

## CAMP WOODBINE.

BRIDGEPORT, Conn., Aug. 23.—Monday morning, in company with Mr. Clarence A. Hayes, the greatest fisherman in Bridgeport, I took passage on the little steamer Nonowantuc *en route* for Port Jefferson, Long Island. The distance is about twenty miles and the sail a delightful one.

No need for me to dwell upon the beauties of the harbor of Port Jefferson, for every yachtsman is familiar with that landlocked bit of water where the Vigilant and many of the other big racers make their winter quarters; but as the Nonowantuc steamed into the narrow gateway, through which the tide rushes like a rapids, the view of the calm waters reflecting the blue hills that descend abruptly to the edges of the bay, with the quaint town of Port Jefferson nestling in the trees beyond, is a most delightful one and well worth a much longer journey to behold. The reports of good bluefishing on the Long Island shore had reached us in Bridgeport, so our trip was made for the purpose of adding to our stock of fish stories, forgetting all business cares and getting well burned by Old Sol.

At Mrs. Madison's comfortable little hotel we found rooms; then, after arranging for our short stay there, we sallied forth to find one "John's brother," whom we depended upon to procure our bait, boat, etc. "John's brother," being at length discovered after a tedious search along the shore, agreed for a consideration to secure everything necessary, and have all in readiness at 5 o'clock the following morning. "Sure now?" asked Clarence. "O, sure," replied the truthful youth. So, satisfied that we were O. K. as far as that was concerned, we returned to the hotel for supper.

After the meal, at Clarence's suggestion, we engaged a rowboat to visit Camp Woodbine, down near the mouth of the harbor. Clarence generously allowed me to take charge of the rowing department, while he attended to the more arduous and scientific labor of steering. I offered no objection—in fact, after a while, seeing the fatigued and overworked expression on his face despite his martyrlike efforts to conceal it, I even suggested the advisability of unshipping the rudder, allowing me to manage to steer with the oars, while he took a nap. I also offered to keep the flies and mosquitoes off him, and promised to lull his slumbers with some old, sweet melody.

"Everything but the melody part," said he. "I don't want folks on the shore to think we are blowing a fog horn as a signal of distress." (Which was unkind.) Half way to the camp we met the naphtha launch Jabberwock, with all the campers on board, bound for town. In answer to our hail, they said they would return shortly, and asked us to wait for them at the camp. On our arrival we were received by a gentleman of color from Virginia, who attends to the culinary department, and we were soon spread out in picturesque attitudes on a couple of steamer chairs, watching the approach of a thunder storm over the hills to the eastward.

Camp Woodbine, a picture of which I send you, was organized in 1893 for the purpose, as the articles of association state, of the health and enjoyment of its members by an annual outing in camp, and to that end to own and lease grounds, boats, tents and other property necessary to the carrying out of its purposes. The membership is limited to twenty.

We did not have long to wait before the launch returned, and the welcome we received made us feel at home directly. Of course we found some of the members of the FOREST AND STREAM family, notably Mr. V. R. C. Giddings, who the boys say would rather read FOREST AND STREAM than go fishing—which settles in my mind at once the answer to the old query, "What would you rather do or go a-fishing?"

The promised thunder storm drove us to the tents on its arrival, where the Woodbine Quartette entertained us with the sweetest music, to the unique accompaniment of the pattering rain on the canvas above us. The moon followed the rain, and although the invitation to spend the night in the camp was most cordial, our arrangements with "John's brother" and Mrs. Madison prevented our accepting, so we said good-night and started homeward with a favoring tide. The bay was as smooth as a mirror, the moon full and white—a perfect night; even Clarence, practical as he is, remarked it, then he fell asleep, awaking only when we reached the landing, minus our rudder, which had dropped off somewhere down the bay.

At 4:30 we were up; at 5 we had breakfast; at 5:30 we were waiting for "John's brother" and the bait; at 7:30 we were doing the same thing; ditto at 8 o'clock; at 8:15 he materialized *sans* bait; indeed he seemed surprised to think that we had expected him to procure any. Remarks followed; remarks liable to be made by a couple of disappointed fishermen; then we procured a boat, and impressing "John's brother" as a portion of the motive power, we sent the little boat flying through the surges in the direction of Camp Woodbine. A strong breeze was blowing directly up the bay, and we were wet through before we reached the camp. The campers were at breakfast when we arrived. After the meal the launch took us over to the lee shore, where in one or two hauls enough spearing were obtained to last us as long as we wanted to stay, and the Jabberwock's prow was pointed for the fishing grounds at the mouth of a little creek.

With the first of the flood the little blues began to arrive, and the spearing, jumping to escape their voracious foes, sounded like rain upon the surface of the water. And how they did bite! In two hours' actual fishing the campers—about ten in number—caught sixty-three; good-sized fish, too! We were less fortunate, for our count was only fifteen, which was all the fault of "John's brother," I can't attribute it to any other cause.

Our trip was necessarily a short one, owing to the fact that Clarence had business that called him to New York. As the Nonowantuc, on our homeward journey, bore us swiftly by the white tents on the point, the totem of the camp was unfurled, a red Jabberwock on a white field, and the little cannon loaded with the last tumbler of powder, coughed a weak salute from the foot of the flagstaff as the steamer left the bay and entered the troubled waters of Long Island Sound. Try the "harbor blues," brothers of the rod! It will cost you 75 cents round trip to Bridgeport, via the steamer Rosedale from New York, and the same amount from here to Port Jefferson via the Nonowantuc. Later in the month the fish run to about a half a pound and you have lots of sport with a light bass rod.

They break camp at "Woodbine" this coming Saturday, or I am sure you would find a cordial welcome there, and even bait.

The following is a list of the officers and members of the Camp Woodbine Association: Officers—S. B. Jones, President; N. H. Jones, Secretary; V. R. C. Giddings, Treasurer. Members—Hon. W. H. Marigold (ex-mayor of Bridgeport, and the boys say next governor of Connecticut), Messrs. A. M. Wooster, E. A. Creevey, Silas Burton, C. W. Fitch, John C. Shelton, M. L. Reynolds, A. E. Burke, M. H. Rogers, W. S. Mills, H. E. Billings, C. M. Gerdenier, Carroll B. Adams, W. C. Bryant, Patrick Coughlin. THE GENERAL.

---

### The First Bluefishing Experience.

PROVIDENCE, R. I., Sept. 5.—A few weeks ago I was taking it easy on the piazza of the Hygeia, at Block Island, feeling well content with things in general, when along came H., a typical Southerner and one of the finest all around fellows one could have the good fortune to meet. He spied me in the corner, and hailed me with "Hello, old fellow, just the one I want to see. Want to go bluefishing to-morrow? The doctor and I are going and we want to make up the party of four?"

The next morning found us at the wharf where the Birdie lay waiting for us. It was rough outside the breakwater, and Capt. Dodge rather smiled as he looked at C. and me, for he no doubt anticipated the agony that was coming. H. was a brown, robust looking chap, and we feared no harm from him. The doctor was a veteran. H. had never been in a cat before when it was rough looking. The doctor was never sick. I never had been, although a good many opportunities had presented themselves when tautog fishing down our bay here.

We rigged up in the oilskins, rounded the breakwater and with three reefs in the sail headed toward the South Light. The wind at this point was not brisk and Capt. Dodge thought we could do better with full sail out, so brought the cat up into the wind where we obtained the full benefit of the heavy swell and chop sea. In a few minutes we were off again, and cleared away the eelskin squids and lines for the blues. H. got the "blues" first. He very slowly drew in his line and said he guessed he wouldn't fish any more until some one caught something. Poor H., he was pale, and as he leaned pathetically over the cockpit side we felt sorry for him, but he braced up in a few minutes and said he felt better.

All this time C. was very intently watching the place where he thought his squid was. He didn't want to look at H. He thought the temptation would be too great, probably. And it was. He lay down in the bottom of the cockpit and groaned. The doctor and the captain smiled. I tried to, but was afraid to spoil the set of my mouth The doctor got out his cigars and passed them around. Only he and the captain and I smoked. The captain had no matches, and I crawled over C. and gave him one. That move settled it. I am certain if I had been a little selfish and kept that match and my seat I would never have had it said that I had been seasick. It did not last long, though, and the doctor and I kept on fishing. We trolled back and forth, but with not a strike, while poor C. begged to be put ashore. H. got his line in again, but soon resigned it to the doctor, and gave himself up in sympathy with C. We took a vote, and it was soon decided to put back again.

C. began to brace right up at this, and after we reached smooth water past the breakwater toward the bathing beach, proposed that we make it a sailing party. It is wonderful the amount of pluck some people have. We couldn't exactly laugh at C.'s suggestion, but took it, and wound up the trip after beating up and down the beach a few times.

The worst of it all was we caught no fish. Capt. D. did his best and we did our best, and if any of the FOREST AND STREAM readers think they could do better under the circumstances, the Birdie is always ready to make the trial. Somebody was the Jonah, and I have tried to think who it could be.

A few days after, my wife wanted to go blue fishing, but I told her that the fish were not running and probably would not for several weeks to come. I was right, in a measure, for the boats that went out for the next week or two came back with nothing, but Capt. D. says if we come down next year he will guarantee we won't come home empty handed. TODE.

---

You would think, now, wouldn't you, that *Life* would give credit for the stories it copies from FOREST AND STREAM. But just there is where you would make a great mistake.

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

### Camp "Forest and Stream's" Fourth Annual.

CHICAGO, Ill., Aug. 1.—In former years I have told of the summer camping seasons which, in company with an elderly gentleman who, my friends tell me, has a strong facial resemblance to myself, though quite unlike me in disposition or in morals, I have spent each year for some time back in one of the loveliest spots in the great pleasure ground which stretches from Chicago to Lake Superior, and from Lake Michigan to the Mississippi. Sometimes there have been friends with us, different friends from year to year, but always we two have kept the fire alive together, and we hope to do so for many years to come. I believe I have told how we discovered our spot—how we intended to run the Fox River on a fishing trip, but got to the village of Mukwonago, discovered Phantom Lake and never left it. The next year we did not leave it, nor the next, nor the next, nor the next, in spite of cottages built on our camp-fires, and of the great Phantom Inn, which took from us our best lookout knoll and two of our very best springs of living water.

In fact, we never could find a better place for our little summer camp, though it falls to my lot in the year to see a considerable amount of out-of-door country. I have followed the Wisconsin Central Line, on which the village of Mukwonago is situated, until it was lost in the pine woods, and I have followed other lines in all sorts of directions out of Chicago, but I never could find a place which suited quite so well. This year, on account of the high degree of popularity—to which Dr. Ennis had brought the Phantom Inn, we vowed we would go somewhere else. But when it came to duplicating the place where J. B. H. and Al. got the seventeen small-mouths, or the spot where the Chief-with-two-Stomachs, of beloved gustatorial memory, got the four 6lb. bass one afternoon, or the little lake where the same Chief got the bass last year which divided the Natchaug Silk Co. $25-prize for big-mouth bass (6lbs. 2oz.), or the creek where we got the small-mouths on the fly, or the place where we caught the big-mouths on the fly—why, when this was demanded of me as high hustler in general of camp sites, it was sufficient to give me pause, as they say in the school of advanced thought. To be sure, there were fish being taken in many counties near by, but could we be sure of as many in as much variety? Others might not be able to wheedle the trained bass of those much fished waters into camp, but we had always done, always taking the largest bass of the season for that section, and as large as we heard of in any other section near by. Moreover, as J. B. H. remarked, where could we find grass so green as that which grew round our former camp-fires? Where should we look for oak trees as large and rugged and beautiful? Where should we find as much wildness with as much seclusion? It might be all very well, he reasoned, to go further north, and get mascallonge, but in doing that would we not sacrifice ham and eggs, which latter are an excellent thing in camping? We might go into the pine woods, and get more aroma, but we would also get more mosquitoes, and less good bread and butter. We might get more water and more work, but where could we find as pleasant scenery, as good a return for lazy men's work, and as generally lovable a land for a camp of rest? Could we anywhere find a prettier country than the rolling hardwood hills of Waukesha and Walworth counties in Wisconsin? Lastly, J. B. H. demanded of me, where were we to find, elsewhere, a spring of ice-cold silver purity like the Kellogg spring; where should we duplicate the Beulah spring by the roadside to the lake, and how could we be sure of finding another lake with eight springs flowing into it, as our small lake had? In addition, were there not certain waters further inland which had not yet had their proper exploration? Quite aside from that, where was to be found a country where shag bark, hickory bark and oak chips could be picked for broiling fuel, almost, so to speak, at the back door of the tent? And after all, asked J. B. H., was I really sure there was anywhere else in the world a glade so lovely as the one where the big oaks made the tangle of shadow back of our last camp? And could I get butter, eggs, fresh vegetables, bass, fruit, friendship and perfect water, all along with such a glade if I did find it?

After J. B. H. asked me all these questions I hunted for a while looking for a spot as good as ours, and with no hotel near it, but at length I gave it up. The late days of June found us once more at the Wisconsin Central Depot in Chicago, with our small camp outfit checked through to Mukwonago. Old man Dillenbeck, as genial and profane as ever, brought the same old many-seated rig, as jouncy and jolty as ever, and we piled in our baggage and drove through the woods for the west shore of the lake, over roads as dusty and stony as ever. We passed the little white schoolhouse on the hill, shook hands once more with our old friend Moxon, who guards the road leading down to the lake on that side, got of him full consent and a jag of straw for our camp, and in ten minutes after that were in the leafy solitude of the west shore of Phantom.

Not so rough as the Rockies, not so wild as the pine woods of Superior, not so fashionable as the Adirondacks was our locality, but someway the grass looked wonderfully green and the woods looked wonderfully inviting. As we pulled the last small bundle out of the wagon I saw J. B. H. stand up and look about him with a sigh of satisfaction, and then I knew it would have been unwise for me to have settled upon any other camping spot in the world but this. J. B. H. looked about him. Then he cut off a chew of tobacco (he can't bite it off any more) and sighed peacefully again, and I reckon he was happy.

We discovered a tent upon our camping spot of last year, and at this we looked with hostility. But from it came four boys, and in a moment we recognized the Waukesha youngsters whom we had chartered to catch frogs for us the year before. They were out on their annual summer camping trip, and seemed rejoiced to see us. J. B. H., who loves all human beings, being much different from myself, greeted them as old friends. They all turned to and helped us pitch camp, and such a raising of tents and driving of pins never was before, because it was past sundown and J. B. H. had mildly intimated that he was hungry.

#### The Pitching of the Tent.

Very often when folks go into camp they tumble everything out in a mix upon the ground in all sorts of bundles, boxes and packages, bags, barrels and bales. Not so with our rigid system of housekeeping. We had everything packed in reverse order to its time of use, and so did not have to turn everything upside down. Aside from our provisions, two carrybags contained about all we used, including our two little Protean tents, one of which we used for a store room. Of late, however, we have grown very stylish, what with tinned soups, preserved fruits and the like. We even have marmalade, strawberry jam and the like, and crackers that come a pound in a tin box (you buy the box). Think of that—olives, even, and lemons and things! Of course all this takes another sack or two. Well, anyhow, our two original carrybags remained about the same. It was a comfort to take out first the camp lantern (for we knew it would be nearly dark when we got into camp), and then the floor cloth of the tent, and then the small camp axe, and then the handy set of iron tent pins (better than any wooden ones), and then the tent, and then the blankets. Being full-handed with our crew of boys, we had our white house up in a jiffy, with the upper floor door stretched tightly down over a bulging mattress of fresh straw which covered the entire floor. Meantime, the mess bag was opened and a small basket, carefully carried in hand from the village, was brought in requisition. Bacon and eggs must be the main fortification that first meal. It only remained to build the fire.

#### The Building of the Fire.

Now, the building of the fire is a thing to be done only after due form and ceremony. If we had sought out the exact spot for the pitching of the tent, observing minutely the slope of the circumjacent territory, and determining the main watershed with care of the most uncompromising sort, the selection of that precise spot, which, of all the many spots about, should be the site of our little hearthstone, was a matter to be undertaken with a caution and a wisdom not in the least less great. In the proper camp the position of the fire is never to be changed, let the wind blow as it listeth. At least, such is our rule, and the laying of our fire was the final setting up in place of the *ichons*, the establishment of the Lares and Penates. Your transitory fire has no such significance. Realizing these things, J. B. H. chewed tobacco very vigorously as he walked over the slope of the hill in front of our tent, foot by foot, looking studiously around. At length he made a cross mark with his heel, and I knew there was where the coffee and bacon were going to be found the rest of that trip. I would not for the world have deprived J. B. H. of the lighting of the first fire in camp. That is his privilege, and I believe there is no one act in his entire year in which he takes so absolute and unadulterated a delight as he does in this lighting of the first fire in our annual camp.

J. B. H. searched about him, and appeared with a certain stone—which I believe he had located the year before—and with a neat tap broke it into two flat halves. These he bedded well in the earth, for a sort of porch to our little cooking fire. Then he selected a certain stick, rejecting many, and cut therefrom a little bunch of shavings, scorning all paper, kerosene or kindling wood as unprofessional. These small shavings he set aflame, and added thereto dry twigs and bits of our excellent hickory bark. In a few moments the First Fire was under way. Watching it for a few moments in serene satisfaction, with legs sprawled out flat on the ground, J. B. H. took another chew, if I recollect right, though it may have been the same chew. Then he set out upon yet another important ceremonial.

#### The Choosing of the Coffee Stick.

This was nothing less than the choosing of the coffee stick. We are people of staid and regular habits and there is nothing hit-or-miss about our camp. When J. B. H. once selects a stick with which to lift off the coffee pot from the fire, that stick, as I have said before, remains sacred to that purpose for the remainder of the trip, and to burn it would be camp sacrilege. I have this year added to the bundle of coffee sticks which lie on the elk antlers in my office, the stick of 1894. It is a straight piece of hickory limb, because that happened to be the first thing J. B. H. put his hand on. It has not the knots and curves of some of our other sticks, but I think it carries with it about as pleasant memories as any. And I assure all readers that it made most excellent coffee. Many persons think that coffee berries and water have most to do with good coffee, but this is really not the case at all.

#### The First Meal in Camp.

And now the bacon sizzled, the eggs sputtered, and there arose from the coffee pot an aroma the most divine that ever greeted human nostril. Our first meal in camp was ready.

I wonder if there ever does anything, anywhere, taste half so good as this first meal in camp. All the zest of novelty, of anticipation, unites with the feeling of joy at being again away from work, the comfort of relaxation, and moreover the hunger born of the labor of getting into camp. The last meal in camp does not taste well, no matter if it were cooked by a *chef*, because then you are going away, and you feel sad. But the first one—really, let us not think of any other, for the time at least. And let some skillful pen try elsewhere to tell about it. I shall not ever say how many eggs we fried, nor how many cups of coffee we drank. But it was all very pleasant, there by the lantern light. We ate classically, lying at full lengh on our stomachs, as the Ancient Greeks did, not having yet discovered any boards to make a table. I am not scholar enough to quite approve the Greek idea of lying on the stomach while you eat. It may be classical, but I don't think it gives a fellow a chance. In the morning we built a table, an elegant one, full three fet square, with legs driven into the ground. I do not read that the Greeks had any board fences, and this may account for the fact that they didn't have any tables.

#### Conservatism in Camp Cookery.

I had brought into camp this year, in a special effort to have the best equipped camp we ever had, one of the complete and very excellent Buzzacott camp cooking outfits, the smallest size, but of the same sort as that supplied to the United States army. This outfit will cook anything, from beef gizzard down to charlotte russe, and will cook all over and around itself, bread, meat, coffee and potatoes, all at the same time and all on a space about a foot square. We found it really the *ne plus ultra* of a camp cooking outfit, and I would want nothing better. I poured out the more than half a hundred ingredients which go into the compact steel box which makes the oven, and laid out a bewildering supply of utensils for sharpening, carving, straining, stewing, frying, boiling, broiling and serving, enough to make J. B. H.'s eyes take on an inquiring cast. But when I came to set out a nice square-cornered pan for the frying of the eggs, do you think he would use it? Not a bit of it. He said he always had been used to eating eggs fried in a round skillet, had fried them that way himself, had always seen his wife fry them that way and his mother before that fry them the same way, and that was good enough for him. Eggs fried in a square pan might be good, but he didn't believe it and wouldn't risk it. In short, he wanted the old skillet, and wanted it right away, and a bit crestfallen, I had to go and get it. Happily I had been wise enough to bring both outfits along, and could fish out the old black spider which had served us in the past.

J. B. H. was good enough to approve of our new coffee-pot, because it held enough and had a wide bottom. Our old coffee-pot with its round bottom, he had stigmatized rightly for three years as being all that a coffee-pot should not be. I could never get J. B. H. to let me show him how many things I could cook at once on the new outfit, and he preferred to burn his fingers rather than use the new hooked lifters which would have obviated all that, but he deigned to approve of the little six-legged wrought-iron stand which makes the "stove" in the Buzzacott outfit. We discovered that by its use we saved nearly all our fuel. We cooked with less than one-quarter of the fire we ever had used before, and when we left the camp our ashes could almost have been covered with the brim of one's hat. This was quite a revelation, even to J. B. H., long used to building little fires for cooking. I am in hopes next year to get him to use some of the things which I tried furtively from time to time to smuggle into commission about our fire. Maybe he will, next year. You can't do these things all at once. I kind of think he had his eye on the flat-backed stew kettle this year.

After supper we joined our young neighbors at the big camp-fire they had built of old stumps, and had a pleasant talk with them. We found that the young rascals were keeping a very slovenly camp, and not bearing to see them growing up in bad ways, we gave them some valuable advice about policing their camp, which they dutifully obeyed, burning up a lot of rubbish they had left knocking around, and tidying up their camp to a very respectable degree. They assured us that frogs were abundant this year, and what with this assurance and the six dozen speckled croakers we had brought up with us, we felt pretty well off for bait.

In short, we felt pretty well off for everything. What we did in the way of big bass I shall tell later. But already this first night we were eminently well pleased that we had decided again upon coming to Mukwonago. For see, about us the shade was as thick as though we were miles deep in a wild forest. We could barely hear the lapping of the lake, and from our quiet hill could not even see the lights of the dreaded hotel. We were very well content. The boys said they had dug out the old spring at the bottom of our hill, and that the water was better than ever, at which J. B. H. smiled cheerfully. They also said that no one was catching any bass, at which we both smiled cheerfully, because we knew very well that most summer people can't catch bass any more than a cow can catch a mouse. We knew the bass were only waiting for people who lived in tents and made small fires.

"I'm glad they aren't catching 'em," said J. B. H., grimly, "but I shouldn't wonder if we do it." With which he took another chew, and turning his face to the fire stood gazing calmly into it, as one who had settled at least one point to the satisfaction of his own mind. And so Camp FOREST AND STREAM'S fourth annual seemed to me very well begun.

---

### Bait-Casting Record Broken.

Mr. F. B. Davidson, secretary of the Chicago Fly-Casting Club, and about the whitest sort of fisherman one is apt to scare up of a summer day, writes me the following very interesting letter. So long as records are to be broken, there can not be any better man to break them than Mr. Davidson, or any who will wear his honors more modestly. He says:

"Some time ago I noticed in FOREST AND STREAM, in Mr. Cheney's notes, an item in reference to the world's bait-casting record, of 140½ft., average of five casts, held by Mr. E. C. Sturgis, of Chicago. On Aug. 18, at the Chicago Fly-Casting Club's weekly club contest, I was fortunate enough to fracture this record slightly, and also to put several points on the longest single cast on record, viz., 170ft., made, I believe, by Mr. Leonard. I intended to write you last Sunday, but did not remember what Mr. Sturgis's record was, and started to look up the item in FOREST AND STREAM. After spending all Sunday morning and several hours during the afternoon in looking through my back numbers, I found I had forgotten what I had started out to find, having become too interested in the reading matter. During the week I obtained the figures for his record, and give you mine below:

147 — 1 = 146ft.
177 — 6 = 171ft.
155 — 12 = 143ft.
140 — 4 = 136ft.
161 — 0 = 161ft.—757ft. Average 151⅖ft.

"At the succeeding weekly club contest, Aug. 25, I made my former record look rather insignificant by making the following average:

163 — 11 = 152ft.
173 — 0 = 173ft.
171 — 4 = 170ft.
174 — 5 = 169ft.
176 — 4 = 172ft.—836ft. Average 167⅕ft.

"You will notice that four of the casts exceed Mr. Leonard's single cast of 170ft. The above figures are taken from the club records, and the officers of the club will certify to their correctness. I don't like this idea of blowing my own horn, but as secretary of the club, and in order to have the club get credit for holding the record both for average and longest single cast, I am forced to state officially what I have done as a member of the club. Kindly publish the figures as given above in FOREST AND STREAM as a basis for records in the future.

"The boys are doing good work at these weekly meetings, 85% out of a possible 100% in accuracy and distance fly-casting, being considered rather below grade. The club does not give as much attention to long distance fly-casting, for, as a rule, it is not the kind of casting that catches fish.

"I expect to take a run down the deer old Kankakee Sept. 8, going from Shelby, Ind., to Momence. This will take from two to three days, and is a very enjoyable trip. The last time I made it I saw more fish in the river than I ever saw before anywhere in the same length of time, but the conditions were not favorable for catching them. From letters I have received the fishing on the Kankakee is extraordinarily good, and I anticipate a good time. Will let you know about the trip on my return."

The above is pretty good for the club secretary, but what ought the executive committee and the president to do? By the way, I recall that the president, which is now editor of a religious and dramatic paper published in Chicago, was formerly much puzzled to know which was his tail fly, his hand fly, his stretcher and his dropper, and used editorially to reverse them and mix them up sadly, the which, in his joint position of double-Jove-like dignity, he really didn't ought to do. In case of hand-books and keys to the angler's art, I can cheerfully recommend the president to confer earnestly with the secretary, Mr. Davidson, who knows which fly is which, and who also, as may be seen by the above records, knows a bit of angling in general. And still Chicago leads the world.

### Possibly Quadruped.

CHICAGO, Ill., Sept. 1.—The editorial "we" sometimes gets persons into trouble. Not long since I noticed on the editorial page of a sporting publication which is (or was) issued from St. Louis, some comments on the activity of the black bass. The editor went so far as to say, "in fact, we have had them to jump from between our legs when wading and fishing for them at night in midstream." So careless and indefinite a remark as to the editorial legs leaves the impression that possibly the editor was a multiped or maybe a quadruped. It almost reminds one of that other historic editor, who said, "On account of our wives' absence, we are forced to get out the paper alone this week." E. HOUGH.

909 SECURITY BUILDING, Chicago.

## ANGLING NOTES.

### Death of the Hon. A. B. Abbott.

THE Mohican Rod and Gun Club of Glens Falls, N. Y., has been called together for the first time to take action upon the death of one of its charter members, a death by accident so startling that a whole community paused to wonder, and then to mourn, for a citizen universally esteemed. The morning of Aug. 27 Alson B. Abbott of Glens Falls left the breakfast table and went into a small room to clean a gun that his son might make a prompt start with a companion for a day's shooting. Suddenly there was a loud report as the gun was discharged, and upon entering the office Mr. Abbott was found dead on the floor with the gun at his feet. Just how the accident happened no one can tell, for Mr. Abbott was a careful, methodical man, perfectly familiar with firearms, and the last man, perhaps, in the community to take any liberties with a loaded gun. While Mr. Abbott was a sportsman with both rod and gun he was more particularly devoted to fishing and was an enthusiastic angler. I first met him on a trout stream more years ago than either of us wished to tell, as they are years that are passed, but from that first meeting till his death I found him a delightful companion, a sportsman in the highest sense of the term and a Christian gentleman.

Upon the organization of the Mohican Rod and Gun Club Mr. Abbott was among the first to join it, and took an active interest in all its objects, but more particularly in opening the Hudson River for salmon and the necessary legislation to bring it about. My last conversation with him was in regard to the necessity for enforcing the 8in. black bass law, and about the desirability of a law limiting the number of black bass to be caught in one day by one rod, if we desired to preserve the bass fishing.

### Non-Resident Mohicans.

In one of my notes in this column of FOREST AND STREAM I said that so many applications for membership in the Mohican Club had been received from gentlemen residing at a distance that it had been found best to change the constitution to admit them. I have not a complete list of non-resident members of the club at hand, but I wish to give such as I can call to mind to show how widespread is the interest taken by sportsmen in opening the Hudson for salmon by building fishways, for it is this which has influenced most of those I will name to join the club.

Robert C. Lowry. Dr. W. Seward Webb, William W. Ladd, Jr., Henry P. Wells, Judge Randolph B. Martine, H. T. McCoun, Robert B. Carpenter, of New York city; Archibald Mitchell, Norwich, Conn.; W. H. Rogers, Boston, Mass.; Ralph Peverly, E. B. Warren, Com. J. B. Simpson, Philadelphia, Pa.; William D. Cleveland, Houston, Tex.; Capt. John J. Phelps, Teaneck, N. J.; Com. W. C. Witherbee, Port Henry, N. Y.; ex-Fish Commissioner Henry Burden, Le Grand C. Cramer, Troy, N. Y.; Joseph A. Powers, Lansingburgh, N. Y.; J. M. Northrup, Jr., Fort Edward, N. Y.; D. S. Griffin, Sandy Hill, N. Y.; John A. Dix, Thomson's Mills, N. Y.; Hon. Howard Conkling, George H. Rockwell, Luzerne, N. Y.; Charles F. Burhans, Warrensburgh, N. Y.; George R. Fish, Bolton, N. Y.

### An Unhappy Trout Family.

During the past few years I have been asked many times about planting brown trout in waters containing native brook trout. Soon after the brown trout were introduced into this country I planted some of them in waters containing brook trout, and afterward became convinced that I had made a mistake in so doing, since which time I have advised that great care be exercised in planting the brown trout, as they grow so much more rapidly than our native trout, they may destroy them in some waters.

In July last my brother, Mr. F. A. Cheney, of Elmira, N. Y., wrote me that if possible he would like to make a fish pond, or rather stock some water with fish. He is the manager of the Elmira Municipal Improvement Co., which includes the Elmira Illuminating Co., and he said in part:

"We get our water at the electric station from two artesian wells 14in. in diameter and are connected, flow through a pipe for a mile and then into a cistern at the station. The cistern is 30ft. long, 12ft. wide and 10ft. deep. It is under cover, but lighted from windows from three sides. The bottom is gravel and the water is so pure and clean that in looking into it the cistern appears to be empty. The flow is about 1000gals. per minute and the temperature of the water summer and winter is constant at 51½ degrees Fah." In reply I told him the water was suitable for trout if he could provide food and advised him get some trout from James Annin, Jr., and at the same time get a quantity of shrimp and moss from Caledonia Creek, which Mr. Annin would send with the trout. Next he wrote me under date of Aug. 9, as follows:

"I received from Mr. Annin yesterday 35 brook, 35 brown and 35 rainbow trout; the latter are about 6 or 7in. long and the others from 9 to 10in. I got also the shrimps and the moss and have planted the moss in boxes at the bottom of the cistern. I have found shrimps in a stream near the station and my foreman gathered a pailful, and I believe I can get a supply in this stream if they fail to breed in the moss."

I did not see him until Sept 5, when he made a report about his trout which causes me to write this note.

As I have already said, on arrival in Elmira the brook and brown trout were about the same size, none over 10in. and none, apparently, under 9in. in length. The brown trout began to grow very rapidly, so rapidly that, having occasion to net one out that had choked with a piece of liver, it was found, about the 1st of September, to be 12in. long and to weigh 15oz. The life of this trout was saved by removing the liver from its throat. As soon as the trout were accustomed to their new quarters the brown trout began what seemed to be a persistent war upon the brook trout, but never attacked the smaller rainbow trout.

The foreman, Mr. Dittmar, took a great interest in the trout and watched them as constantly as he could, and they could be observed night and day as the cistern room was provided with electric lights. When he reported to my brother that the brown trout were bent on destroying the brook trout out of pure cussedness, my brother had an aquarium made 40×20×20 to stand on the edge of this cistern, where the trout could be under close observation, and specimens of the various kinds were put into the aquarium and the specimens changed from time to time. As a rule the rainbow trout would jump out of the aquarium very promptly back into the cistern until a screen was placed to prevent them. In the aquarium the war was waged against the brook trout by the brown trout until four were killed. The two species were so nearly of the same size that one could not swallow the other, but the brown trout would bite the brook trout on sides and belly until death resulted. They would chase them into a corner and keep them there, and the brook trout gave evidence of their fear of their enemy. Occasionally a brown trout would get a good hold of a brook trout nearly its own size and would then swim around the cistern or aquarium holding him in its mouth until both were netted out. Not once did the brown trout attack the smaller rainbows, their attack being directed against the brook trout only.

All the trout were well fed with shrimps, minnows and liver. Two of the rainbow trout choked to death by trying to swallow minnows too large for their gullets. For feeding the fish a cage was made of screen-wire, and this was lowered into the cistern at feeding time and the dead food thrown into the water over the cage; any food that escaped the fish would fall to the bottom of the cage and was removed when the cage was raised, and thus the water was kept pure. The trout soon learned to know that the lowering of the cage into the cistern meant food for them, and, too, they soon learned to know that a landing net lowered into the water meant a trip to the aquarium; so they quickly gathered together over the first and fled from the second. The trout thrive in the cistern, and will be watched during the fall and winter for any new developments; but can any one explain why the brown trout wage war on the brook trout and not on the rainbow trout?

### Round-Up of the Salmon Season.

Mr. John Mowat, in writing me of the salmon season in Canada, says that on the Restigouche Rev. Dr. Rainsford, of New York city, was high hook with about 100 fish. That Messrs. Kennedy, Hollins, Fearing, De Forest and Penfold had gone fishing on the upper pools right up to July 15. That Mr. Lansing, of the Restigouche Salmon Club, killed 60 fish to his own rod in the month of June. Col. Sweeny, of England, fishing the famous Sweeny pools belonging to the estate of the late Capt. Sweeny, killed 130 fish. On my way home from Lake St. John a few days ago I met a gentleman in the cars between Quebec and Montreal who told me he was one of a party of American gentlemen who were negotiating for the Sweeny pools, either to buy or lease them, in which case they will go to a Connecticut city.

Mr. Mowat killed ten salmon and seven grilse in three days on the Upsalquitch, and Mr. Alexander Mowat and Mr. Bray sixteen fish at Kedgwick.

The Governor-General of Canada was obliged to postpone his trip up the Restigouche previously referred to in these notes, but fished the home pool of the Restigouche Club at Metapedia for one day. The fish in this pool averaged about 22lbs., largest 38lbs. Mr. Mowatt concludes with the sage statement: "There are miles of water in which salmon will not rise, other places they rise at certain stages of water and are useless at any other stage. The fact is no salmon pool is good at all stages of water." A. N. CHENEY.

### Large Brown Trout.

THE large fish taken in Spring Creek, recorded last week, were caught by Mr. P. V. Crittenden, president of the Caledonia Club, of Rochester, N. Y. The weights were 10¾ and 11lbs. Our correspondent O. S. B. writes:

"As they lay on a cake of ice in the window of a downtown restaurant with a scarlet-ibis hooked in the mouth of one and a queen-of-the-water in the other, they were a sight to call up memories in the heart of the angler who has been 'chained to business.' Later in the week in the same window was displayed a muscalonge from Rice Lake, Canada. A card on the ice stated the weight to be 21¾lbs., but he looked heavier."

Harry Annin, 16 years old, son of a fishing father and chip of the old block, is credited with three brown trout taken from the same waters this season, running 10¾, 11¾ and 12lbs.

*Communications for publication relating to business should be addressed to the Forest and Stream Pub. Co. If addressed to an individual they will be subject to delay in that individual's absence.*

## NEW HAMPSHIRE FISHING.

MANCHESTER, N. H., Sept. 7.—The same conditions that blight the gunner's pastime also made our brook trout fishing the past season nearly a total failure, and in most directions has spoiled it for years to come. The usual amount of lake and pond fishing has been enjoyed, and as far as my observations extend I judge the sizes of the strings of bass, perch and pickerel have exceeded those of previous years. Massabesic Lake has stood the brunt of the bulk of the onslaught with a creditable record. My personal experience there certainly has been very encouraging, particularly in the line of gamy black bass—a fish that is not appreciated and encouraged to a fraction of the extent it should be by our Commissioners and those who have charge of the stocking of our waters. The Fish Commissioners are experimenting with lake trout fry in Massabesic, putting a few in each season. Thus far none have been seen after being introduced except those found inside other fish, several instances of which have occurred. The introduction of a few full grown lake trout, able to take care for themselve against other fish, and a heavy penalty for catching them seems to me to be a more practical way to make progress toward establishing their species there.

What seems a far better way for the State to expend its energy and money, however, is to transfer its efforts from an experiment to a certainty, and propagate black bass there instead as extensively as possible; then the Commissioners would be working for a fish which they know flourishes in that lake, can take care of itself, has no superior as an attraction among fishermen, and, therefore, cannot be too plentiful, where now already found, to please anglers. Many of our anglers have, as usual, spent vacations at either Maine waters, Connecticut lakes, or Winnipiseogee, Wentworth, Sunapee or Newfound lakes, with generally pleasing results.

Mr. William C. Clarke, one of the best known and successful sportsmen and wing-shots in the State, and also the popular president of the Hillsborough County Game and Protective Association, is the leading candidate for Mayor of this city, and will receive united support from his numerous friends who love rod and gun. PAYSON.

### The Sale of Brook Trout.

FOR several months FOREST AND STREAM has been advocating as a plank in the sportsman's platform the following: "The sale of game should be forbidden at all times." If such a law could be enforced, it is very obvious that it would not be very long before the depleted game sections of our country would once more afford pretty fair sport. I believe some such measure is equally imperative for the further protection of our game fish. Take the brook trout for instance—the time was not so many years ago, when they were as plenty as could be wished for, but a continual wanton slaughter has made them so scarce as to become a luxury commanding a high market price—as a result, a very tempting opportunity during the season is always before the poacher to secure and sell a mess of trout. The market demand very soon cleaned out the streams and it was deemed advisible to pass a law prohibiting express companies from accepting and shipping them. It was thought that this would largely put a stop to the drains from this source, and it did; but the market poacher soon got around and evaded the law, and in some way or other the fish markets and restaurants manage to always have a fair supply on hand. But the trout are growing scarcer every year, notwithstanding the efforts that are being put forth to change the state of affairs, the State distributing in the neighborhood of 3,0000,000 trout fry each year and spending quite a sum for protectors, in addition to work in the same line being done by numerous protective associations. So that something else must be done, and I think a little progress, and perhaps a great deal, can be made by entirely prohibiting their scale. In any event, unless some effective measure is discovered and put into effect, it will not be very far in the future when brook trout will only be found in club preserves, where it takes a thousand or two to be the owner of one share.—*H. S. B., in Troy Times-Union.*

### A Day With Captain Seavey.

KENNEBUNKPORT, Me.—If, when you happen here you want fish in plenty and a fine sail in a good safe boat there engage Capt. Seavey.

One day last month our party of five had that pleasure, leaving the port about nine o'clock and returning at four; although our actual fishing time was less than four hours, yet we managed to catch over 200 weight of goodly seafood. To one who is unaccustomed to deep-sea fishing, the novelty paid for the labor, for it is hard work to pull up 100 to 150ft. of line every time a fish is on, and oftener yet to replenish the bait. However, with a lighter line, a lighter sinker and smaller and sharper hooks than is the custom of the regular fishermen, much pleasure can be obtained. Provided (and a most important provision too), that the individual is not overcome by mal-de-mer as was one of our party. The skipper would call out "Chum, Robert, chum," and Robert would "chum" accordingly, but the fishes being denizens of great depth did not profit thereby.

For some persons to be "rocked in the cradle of the deep," lacks a proper rhythm, though it may bring forth volumes of harmony.

To say nothing of the cod and haddock with which we could have filled our baskets had the latter been large enough, the pleasant sail in the clear, bracing ocean air amply repaid us for the outing. W. H. R.

### Rock Codding on the Maine Coast.

KENNEBUNKPORT, Me.—There is codding and codding. The ordinary manner of catching codfish is not angling but genuine hard work; long hand lines, clumsy hooks and half-pound sinkers, consequently the fish comes up like a log from a depth of sixteen to twenty-five fathoms.

The rock-cod, however, differs from his plainer kinsman in being found about the rocks in water 30 or 40ft. deep. He is of a beautiful bronze-red, and with his clean-cut build is as handsome as a trout. If one uses a stiff rod with a fine linen line and sharp hooks the sport is well worth the candle, for a 4-pounder will fight so hard that he has to be played some moments before the reeling in can be safely accomplished. Soft clams are a good bait and probably crabs would prove efficacious also, as the food of the rock-cod is gleaned from the rocks.

W. H. R.

### The Record Fish of the Gunnison.

DENVER, Sept. 3.—I inclose article from Gunnison *Tribune* of Sept. 1: "Mayor Shove, in company with Larry Lawrence, J. H. Collins and Alfred Butters, went down the river fishing on Wednesday. The boys had fair luck until in the afternoon, when Gene hooked a whale. It was impossible to draw the monster to shore, so Gene and the fish decided to have it out right there in the middle of the water. They went at it hammer and tongs, Izaak Walton rules, and for forty-five minutes both contestants showed wonderful gameness. At the end of this time, however, the trout had to give up the fight and turned his nose heavenward. With the perspiration rolling down his face in torrents, Gene brought the vanquished victim safely to dry land and was proclaimed champion of the whole country amid loud huzzas. By the aid of the four the fish was assisted into the buggy and the boys were in such a hurry to get to town that the vehicle only struck the high places. Gene and Larry were smiling so loud that when they struck the Zugelder Hill the noise was heard and by the time they reached town a crowd of sports were gathered on the corner. "Oh, you're not in it," cried the excited mayor, and the next instant he exhibited a trout that by actual weight and measurement was the largest fish ever caught in this vicinity. John Latimer's tape line said 29in. in length, 16in. around, while Jake Miller's scales pointed to 10¾lbs. It was a rainbow trout and its long sides were a combination of beautiful hues. Mr. Shove sent his catch off to Denver to have it mounted, and when it is returned will be put some place to serve as a living advertisement of the wonders of the roaring Gunnison."

I have a personal letter from Mr. E. P. Shove, who is cashier of the First National Bank of Gunnison, and in every way reliable, vouching for the measurement and weight of the fish caught. Mr. Shove had a No. 6 coachman and a 7oz. rod. H. M. O.

### Metabetchouan Ouananiche.

IN camp on the Metabetchouan River, near Lake St. John, on Sept. 3, 4 and 5, the Rev. Dr. Henry Van Dyke of the Brick Church, in New York, took 32 ouananiche or landlocked salmon, weighing 136lbs. The largest fish was 5¾lbs., and the average over 4lbs. They were taken with small trout flies, hare's-ear, Reub-Wood, professor and dark-coachman. They were all weighed with an English tested balance. Guides, Ferdinand and François Larouche, from the Hotel Roberval.

## Fishculture and Fish Protection.

### Fishing for Frost Fish in New York.

COPY of a resolution passed by the Commissioners of Fisheries at a meeting held Tuesday, Aug. 14, 1894:

*Resolved*, That frost fish may be taken in any of the inland lakes between the first day of November and the fifteenth day of December in the same year, with seines and dip-nets between the hours of sunrise and sunset. Persons desiring to take frost fish by seines or dip-nets must notify the Commissioners of Fisheries at their office, 53 Broadway, New York, of their intentions so to do on or before the first day of November in each year, and no person except such as shall have notified the Commissioners of Fisheries of their intention so to fish, shall have the legal right so to do. All lake trout, brook trout, California trout or other game fish taken while fishing for frost fish must be returned to the water at once without unnecessary injury.

A list of the persons who shall have applied for such permission will be filed in the office of the Chief Game and Fish Protector, Albany, New York, and any person who may fish without having notified the Commissioners of Fisheries of their intention so to do will be arrested and prosecuted.

L. D. HUNTINGTON, Pres., EDWARD P. DOYLE, Secy.

### New York Fish Laws.

SYRACUSE, Sept. 7.—I presume that all intelligent anglers will assume that my remarks in relation to the bass and trout season before the Senate Committee at Rochester were misquoted by a local newspaper; but lest there may be some who will not do me such justice let me state that what I did say was in favor of having the trout season open universally May 1, and the opening of the bass season made from June 15 to July 1, suitable to the temperature of water and the spawning season.

I made a plea for the better enforcement of the laws, and for uniform laws, with boards of supervisors divested of the power to pass special laws without the approval of the Fish Commission. I also took position against the proposition to divide the State into districts with a special code of laws for each. DWIGHT H. BRUCE.

## The Kennel.

### FIXTURES.

DOG SHOWS.

Sept. 10 to 14.—Toronto Industrial Exhibition Association, at Toronto. C. A. Stone, Sec'y.

Sept. 10 to 14.—Pittsburgh A. C. Kennels, at Pittsburgh, Pa. A. A. Batchelor, Sec'y.

Sept. 18 to 21.—Rhode Island State Fair Association, at Cranston, R. W. W. Dexter, Sec'y.

Sept. 18 to 21.—Orange County Agricultural Society, at Newburgh, N. Y. D. A. Morrison, Sec'y

Sept. 19 to 22.—Orange County Fair, at Newburgh, N. Y.

Oct. 2 to 5.—Danbury Agricultural Society, at Danbury, Conn. C. M Rundle, Sec'y.

Oct. 30 to Nov. 2.—Terrier Show, by New England Kennel Club, at Country Club, Brookline, Mass. D. E. Loveland, Sec'y, 128 Tremont street, Boston.

FIELD TRIALS.

Oct. 23.—New England Field Trial Club, Members' Sweepstake. A. R. Sharp, Sec'y, Taunton, Mass.

Nov. 5.—United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 6.—International Field Trials, at Chatham, Ont. W. B Wells Sec'y.

Nov. 16.—Eastern Field Trials Club, at Newton, N. C. All-Aged, Eastern Subscription and Selling Stakes. Entries close Oct. 1. W. A. Coster, Saratoga Springs, N. Y., Sec'y.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

### Manitoba Field Trials.

THE Derby winners were: Delhi first, Cynosure second, Tony Boy third. All-Age winners: Brighton Toby first, Topsy Rod second, Allene third. Full report by Mr. Waters in our next issue.

### An English Fox-Terrier Kennel.

THERE are not many dog men who see *The Asian*, published in India, and as our terrier fanciers always like to hear about the other man's kennel, we doubt not that John Brown's interesting account of a day in Capt. Keene's kennel will prove amusing and instructive, as it touches on a good many things that interest terrier men and others. Capt. Keene is a well-known breeder of fox-terriers, bull-terriers, Dandies, etc., as well as a judge, in England. We pass over the preliminary courtesies of the visit and find Capt. Keene and his visitor in the former's den:

"You will see a lot of old friends on the walls around you. There's old Fuller and Nettler and Diamond, terriers of thirty years ago; that is old Sam; all are foundation stones of our modern breed. There's grand old Belgrave Joe. Here are Result and Vesuvienne, two of the very best that ever lived That large photograph of the head of the bitch I took myself. Yes, her ears are hung very high, but she is a grand bitch for all that, though I prefer the dog myself. These are the cracks of the present day—D'Orsay, Venio and Vice Regal. Not much like Vice Regal? No, it isn't. Ems has not quite hit him off, but the other two are excellent. This is my own bitch, Vesure; she was killed in my own kennels in a fight with two other bitches of mine. Those are two bull-terriers I had; this is a life-size head of my old Dandie, Border Viper. You know I have not been showing fox-terriers very long, only about two years. I had bull-terriers for a time, and then I went in for Dandies. The Dandie is a grand dog; he is slow, of course, and no good for following a horse, but otherwise he is one of the best and gamest of our terriers. Old Border Viper, 'Shem' I call him as a kennel name, is one of my especial favorites. He never leaves my side. Yes, I am very fond of Scottish terriers, too. I have a bitch which I shall show you presently. I know you will be greatly interested in her. Yes, that is a good photograph of a setter, isn't it? I took it myself, caught him instantaneously in the act of sitting. Come and look at this enlargement of the same picture."

"It is as good as any professional work."

"Oh, I dabble in a lot of odd things in my leisure moments, I am very much interested in the principles of breeding, heredity, and atavism. I have been making some experiments on the subject of the influence of a previous sire, which I know will interest you. Certainly, I grant the influence. The question is, is it physical or mental? I am now inclined to think the former. I have been having some correspondence with Romanes on the subject. We must have some further talk about that, let's go to lunch now, and then we will stroll over the grounds."

After tiffin, we lighted our cigars, and made our way to the kennels.

"What sires have you here now?" I asked.

"Only Starden's Victor, a little dog I have a fancy for. I have Hunton Billy, but he is not here at present. His Excellency is at the stud in town. Yes, he is too big I allow, and I don't breed from him myself. Everlelyn was quite right to chuck him out at Wolverhampton, and I don't quarrel with the verdict. I quite agree with you regarding the demerits of the type of the present day. I am of opinion the cracks of the day would hold their own if exhibited with the best specimens of, say, ten years ago, but the tag rag and bob-tail of the existing type are awful to behold. However, as you say, the evil will cure itself in time, and I am waiting for that time. You will not see an over-sized dog or bitch, that I am breeding from in my kennels to-day. They are small and compact, and when the craze for large, leggy, lathy terriers dies out, and I am convinced it will, my time will come. * * * See, here we are. This is Persistence, by Venio out of Determination, by Decision. What do you think of her?"

"She is a lovely little bitch."

"She is quite the pick of my kennel at preseut. How she would have been 'all there' if exhibited ten years ago, but compare her with that seven months puppy by her side. He is what I call a specimen of the present type. I don't like it a bit. Persistence has won seven prizes for me, three firsts, three seconds and a third, beating Stephen's Ethel Newcome sold for £150. She has splendid shoulders, in which she takes after her sire. She has a first-rate narrow front, and look at her jacket. The Vicary makes an excellent cross for the Clarke breed. In fact, I think it is the only cross to set it right. I am thinking of sending the bitch to Dominie. I hope to get some good ones from her this season. This is Starden's Victor, bred by Major How, by Result out of Forest Queen, by New Forest. He is a seventeen-pound dog, and as game as a pebble. He worked with hounds for two or three years. I am going to breed freely from him this season. With his style and breeding I think he ought to make a successful sire. He is a little dog I have a great fancy for. The bitch with him is Souville, by Belgrave—Sequence out of Deshabille. I shall put her to him bye and bye. Come here, I want to show you what I think one of the best Dandies of the day. Here she is, Lowland Lass, by Netherby II., by Border Viper, by Border King. I claimed her at Edinburgh at her catalogue price, and am of opinion I did a good business. What do you think of her?"

"She is a very nice bitch, but I don't altogether like her coat."

"Oh, she is a bit off coat at present. Still, I don't think a Dandie's coat should be too hard or altogether hard. A proper admixture of hard and soft hair is what we want, a coat like that of a fox. I expect to breed some good ones from that bitch. Before we cross the road there is another bitch here that I expect will take you a bit by surprise."

"What? a white Scottish terrier. I don't know that I ever saw a white one before."

"No, I am not surprised at it, I believe her to be unique. I don't know that there is another white one in the world."

"Where on earth did you raise her?"

"I thought this would interest you. When, some years ago, we were quartered at Berwick, we had some very good Scottish terriers we used out shooting, but their color used to bother me. I was always afraid of shooting them in mistake for a rabbit. I then took it into my head to try and breed white Scottish terriers, and I failed. I put a white wire-haired fox-terrier dog to a Scottish terrier bitch. The result was a litter of puppies all blacks and brindles and in shape, taking after the shape of the dam I then tried a white fox-terrier bitch and a Scottish terrier dog, again no white puppies. They were all black this time, except that they had a few white hairs on the chest. In shape they again took after the Scottish terrier. A third time I tried a white fox-terrier dog with a Scottish terrier bitch, and again a litter of black and brindles, and all practically Scottish terriers, with very little evidence of any cross. A fourth time I tried breeding from one of the bitches, the results of the cross, and again all the pups were black and brindles, with perhaps just a few white hairs on them. These experiments show the prepotency of the Scottish terrier when crossing it with the fox."

"It is, of course the older and the purer breed"

"There is no doubt about it. Still one would have thought a white puppy would have, now and then, appeared in a litter; or, at any rate, one with a fair amount of white. I had intended selecting the whitest ones, and breeding from them again, till I had attained my object; but as far as I had gone I had made no progress whatsoever."

"But what about this white bitch then?"

"I am coming to that. One day I read in an account of the Ayr show that a white Scottish terrier was being exhibited there. I immediately fired off a telegram to secure her, and she was ultimately purchased for me at what I consider the very low figure of five quid ($25). This is the bitch before you. White Heather, by Athol II. (a light gray brindle) out of Judy (a dark gray brindle), all previous ancestors being the usual blacks and brindle colored ones. I afterward learned, on inquiry, that there had been one other white puppy, a dog, in the litter, but that he had died. I presume I was able to buy White Heather cheap, as no one else had thought of the curiosity of her color; they may even have considered the color objectionable, not being the usual one. In all other points she is an excellent Scottish terrier, and I consider I was very lucky to get her. I then thought I might possibly breed white ones from her. I put her to the Scotch terrier Kildee, and she missed. She is a very uncertain breeder. I tried her with another dog and she missed again. I then put her to Kildee again and she had seven pups, but no white ones among them. The fourth time I put her to one of my half-breeds from the white fox-terrier cross, and again a litter of blacks and brindles. So you see I have not made much progress in my attempt to produce a race of white Scottish terriers. White Heather still stands alone as a unique specimen.

"She is not an albino either."

"No, not a bit of it. There is another Dandie here, if you care to see her—Lowland Peggy, by Border Viper out of Bracken, by Mars. She is in whelp to Border Viper. Shall we cross over now to the other kennels? We were talking just now of the influence of a previous sire. I tried an experiment in the case of fowls. Do you see those white Leghorns? I penned up a number of hens with a Langshan cock for some time, and then separated them entirely. For a month they had no access to any cock at all; and I then put them with a white Leghorn cock of their own breed, and hatched a few broods. The young birds were in all cases, except one, apparently pure Leghorns. There is the exception before you. Look at his coloring, and look at the feathering down the outsides of his legs down to the feet. The influence of the Langshan cock is very plainly discernible in him."

"Yes, it seems so."

"I am now experimenting with guinea pigs, as being rapid breeders. I have put this rough boar to three smooth sows. When they have littered I shall try them a second time with a smooth boar of their own breed and note the result. The rough, long-haired guinea pig is quite a distinct breed, with marked peculiarities. The sows I am using are young ones, and have never been bred from before. I am giving the experiment every chance. When you come to see me again I may have more interesting information to give you. Now here is a little bitch, quite of the old school, Viana, by Venio out of Vernia, own sister to Venilia, dam of Vesuvienne."

"Yes, she is a nice cobby little terrier with great bone and substance."

"Of course, with the present rage for flat shoulders and very narrow fronts she would not be in it at a show."

"Yet she is fashionably bred."

"Well, you see they all come from the same foundation stock. There is no reason why there should not be small, compact ones and long, lathy ones in the same litter. It is just a question of show fashion. The cobby ones have had their day, and the long leggy ones are now having a turn. When you come home again the weathercock of fancy may have veered round once more. What do you think of this one? Viatka, by Venio out of Volka, own sister to Vengo."

"Don't like her so well."

"She is a bit full in the eyes, short in head and heavy in ears, but otherwise she is not half a bad bitch. Her legs and feet are very high class. She is now in whelp to my dog Starden's Victor. I expect you will like this bitch better."

"I do She takes me tremendously. If she were just a trifle smaller in ear—"

"She would be a high class show bitch, that just puts her out of the running."

"What's her name?"

"Finale, by Venio out of Determination, by Decision. I am not letting her out, as she is such a fighter. This is the bitch that killed Vesure, she is a little demon when she gets her blood up. Yes, there was another bitch mixed up in the row, but it was practically Finale that did all the fighting. It is no barking around with her, she means business when once she starts."

"I am glad to see that show fox-terriers have not lost pluck, whatever else they have changed in."

"No, the pluck is right enough. Redmond's Dominie and D'Orsay are as game and keen as they can be. Old Venio is a hot one, I can tell you, Vice Regal is the same. Despoiler is a little devil, and the bitches are as bad as the dogs. I can hardly take three or four of mine out together. They get up a row among themselves, or with something they meet on the road, and then it is a business to part them. Come in and look at the pups. Here is the dam. Determination, by Decision, out of a bitch by Result. She is the dam of my bitch Persistence. The pups are by Clive Newcome; there are four of them, three dogs and a bitch."

"They look nice, sturdy little beggars, and as healthy as possible."

"I think they are very promising. See, I have not cut the tail of this one I am going to leave it to see how he looks with an undocked tail."

"Won't that stand in his way at shows?"

"I don't think so. I don't see why it should. I don't imagine they can pass over a dog that was otherwise good, merely because his tail was uncut. This one has a naturally short tail, and looks as if he would carry it well. Nowadays they often do little more than pinch off the tip, and what's the difference between a dog with an inch of his tail cut and one uncut altogether"

"There's something in that. Personally, I don't care for the very long dock; but unless they dock to a reasonable length they might as well leave the tail alone, as nature made it."

"Now, what do you think of the condition of my dogs?"

"I think they are all as fit as possible."

"So do I, and put it down to my meat feeding. Very few men give any meat at all, but I allow it freely with, in my opinion, the very best results. I don't think it natural for a dog to be a vegetarian."

"Captain Keene is a member of the Kennel Club and of the special Fox-Terrier and Dandie Dinmont Clubs. He is an excellent judge of a terrier, and judges in a sound, intelligently, commonsense fashion, without displaying any of the curious idiosyncrasies of the faddist. I know very few men of whose judgment I have a higher opinion. But he is more than a mere judge. He is a sound, practical breeder, thoroughly conversant with the principles of breeding, and is moreover a keen observer of nature. With a well stored memory, he does not trust memory alone; his note books, recording the results of his observation and experiments, are kept in a careful and business-like manner; and his kennel books are the picture of neatness. The remarks I have noted regarding the white Scottish terrier bitch White Heather, and the attempt to raise a breed of white Scottish terriers will, I feel sure, be read with interest by all doggy men."

---

Our transatlantic voyaging fanciers are having some difficulty in getting home again, the steamers being so crowded that passage must be secured some time ahead. Advices from the other side received to-day (Friday, Sept. 7) state that Mr. Mortimer will leave on the Etruria, which is expected to arrive Sept. 8. Mr. Oldham has also been delayed, and will not reach New York till Monday, Sept. 10, on the Berlin. Both these gentlemen are down to judge at Toronto, and they will have little time to get rid of their sea legs before handing out the ribbons. Mr. Oldham will unavoidably be a day late, so spaniels will not be judged at Toronto until Tuesday, Sept. 11.

### Des Moines Show Awards.

THE awards at the first annual bench show of the Des Moines Kennel Club, Sept. 4 to 7, were as follows:

HANDLER'S PRIZE.—1st, Lewis; 2d, Ehrhart.

MASTIFFS.—CHALLENGE—1st, C. E. Bunn's Sinaloa.—OPEN—*Dogs:* 1st and 2d, C. E. Bunn's Marquis and Ealderman. Reserve, Platt Bros.' Jack Raglan. Very high com., W. L. Shepard's Jack. High com., Mrs. G. W. Collins's Grover C. *Bitches:* 1st, C. E. Bunn's Mina Minting; 2d, C. C. Stephenson's Queen. Reserve and very high com., Platt Bros.' Ruby Chancellor and imported Lady Cobrey. *Puppies:* 1st, Platt Bros.' Lady Van; 2d, M. J. Olsen's Colonel.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—1st and 2d, C. A. Pratt's Sir Bedivere and Rustic Beauty.—OPEN—*Dogs:* 1st, A. C. Shallenberger's Alton III; 2d, J. R. Hurlburt's Alton Boy. Reserve, W. A. Quigley's Complete. *Bitches:* 1st, A. C. Shallenberger's Alta Berna; 2d, C. A. Pratt's Lady Adelaide. Reserve and high com., Fordham Kennels' Myrra and Luce Floretta. Very high com., W. E. Dougherty's Lady Lowden.

ST. BERNARDS.—SMOOTH-COATED—CHALLENGE—1st, C. A. Pratt's Alton II.; 2d, A. C. Shallenberger's champion Melrose. Reserve, J. W. Farnof's Lawrence Garza.—OPEN—*Dogs:* 1st, A. C. Shallenberger's Patrician; 2d, C. A. Pratt's Argyle Alpha. Reserve, W. M. Everts's Sir Nero. Very high com., J. W. Farnof's Illinois Pontiff. *Bitches:* 1st, C. A. Pratt's Lady Judith; 2d, Fordham Kennels' La Flora. *Puppies:* 1st, J. W. Farnof's Illinois Pontiff; 2d, E. Baker's Prince. Reserve, A. J. Doll's Minnetonka.

GREAT DANES.—*Dogs:* 1st, H. L. Robinson's King William; 2d, J. C. Wees's Beau Brummel Reserve, C. F. Huttenlocker's Col. Moro. Very high com., F. S. Anderson's Sandor. High com., Fordham Kennels' Kaiser. Com., W. S. Mars's Prince Bismark. *Bitches:* 1st, F. S. Anderson's Flora A.; 2d, A. K. Wolfe's Princess Lucile. Reserve, Fordham Kennels' Lady Inca. *Puppies:* 1st and 2d, Fordham Kennels' Ina and Una Reserve, W. S. Mars's Prince Bismark. High com., A. M. Williams's Brutus W.

BLOODHOUNDS.—Equal 1st, J. H. Naylor's Jack Shepard and R. Williams's Vigilant.

DEERHOUNDS.—1st, C. H. Ballinger's Highland Maxey.

RUSSIAN WOLFHOUNDS—*Dogs:* 1st, C. H. Ballinger's Osmaday. *Bitches:* 1st, C. H. Ballinger's Zemoza.

GREYHOUNDS.—*Bitches:* 1st, A. L. Goodrell's Vera.

FOXHOUNDS.—CHALLENGE—*Dogs:* 1st, Dr. L. C. Sauveur's Ranger.—OPEN—*Dogs:* 1st, R. Williams's Argonaut. *Bitches:* 1st, R. Williams's Bow Spirt.

POINTERS.—CHALLENGE—*Dogs:* 1st, Elridge Kennels' Rush of Lad. OPEN—*Dogs* (over 55lbs.): 1st, Glenrock Kennels' Molton Banner; 2d, F. L Fleer's Gamester. *Bitches* (over 50lbs.): 1st, C. H. Clark's Emblem. *Dogs* (under 55lbs.): 1st, J. L. Adams's Lad of Rush; 2d, Mrs. N. W. Stark's Ned Stark.

ENGLISH SETTERS—*Dogs:* 1st, H. Pape's Cactus; 2d, R. K. Armstrong's Bald Rock. Reserve, J. Pederson's Zippo II. Very high com., H. Northwood' Wordsley Dude and O. E Pearson's Dom Pedro II. High com., J. W. Shriver's Jack Burwyn and R. B. Cottrell's Young Climax. Com., F. Hoare's His Royal Nibs, G. W. Hamilton's San Fran and E. Stewart's Van Bibber. *Bitches:* 1st, J. Brett's Flower of Sulphur; 2d, Stout & Cottrell's Sousie. Reserve, F. Perkins's Chic. Very high com., J. Pederson's Faydelle and J. Brett's Maid Marion. High com., J. Pederson's Lady of Gloss and G. W. Hamilton's Tony's Romp. Com., J. S. Carpenter's Betsy Rickat.—PUPPIES—*Dogs:* 1st, W. G. Hyland's Chris.

IRISH SETTERS—CHALLENGE—*Dogs:* 1st and 2d, Dr. L. C. Sauveur's Pride of Patsey and Montauk, Jr. *Bitches:* 1st, Dr. L. C. Sauveur's Elfreda.—OPEN—*Dogs:* 1st, M. Barttison's Bob, Jr.; 2d, I. Gray's Patsey's Pride. Reserve, Lake Shore Kennels' Shamrock Bruce. Very high com., Claremont Kennels' Chief Red Cloud. High com., H. C. Hansen's Dan, W. Kirby's Kay and J. C. Hansen's Red. *Bitches:* 1st and reserve, Claremont Kennels' Pride's Beauty and Pride's Heather; 2d, Dr. L. C. Sauveur's Delphine. Very high com., B. F. Lewis's Mollie. High com., Seminole Kennels' Buffalo Madge.—PUPIES—*Dogs:* 1st, Claremont Kennels' Pat's Gleam *Bitchs:* 1st, Claremont Kennels' Pat's Rose.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st, J. R. Oughton's Heather Lad; 2d, Dr. S. G. Dixon's Leo B. *Bitches:* 1st, Dr. S. G. Dixon's Lady Waverly.—OPEN—*Dogs:* 1st, W. O. Lindley's Homer S.; 2d, S. G. Nordstrum's Dan N. *Bitches:* 1st and reserve, Dr. S. G. Dixon's Sante Marie and Maid of Waverly; 2d, J. R. Oughton's Dwight Effie.

COLLIES.—CHALLENGE—*Dogs:* 1st, Seminole Kennels' The Squire. *Bitches:* 1st, Seminole Kennels' Metchley Surprise.—OPEN—*Dogs:* 1st, J. W. Wakem's Chesterford Hero; 2d, Willowdale Kennels' Moray. Reserve, G. L. Evans's Trump II. Very high com., Seminole Kennels' Prince Charley. High com., E. W. Kidder's Duke. *Bitches:* 1st and 2d, Seminole Kennels' Ormskirk Maid and Cora Belle of Nessledown. Reserve, H. M. Jones's Lady Al De Ber II.

IRISH WATER SPANIELS.—1st, B. F. Lewis's Kitty of Cork.

FOX-TERRIERS.—*Dogs:* 1st, H. Northwood's Wordsley Trapper; 2d, W. F. Clarkson's Raby Pitcher. Very high com. reserve, Dr. G. B. Darby's Lansdowne Triton. Very high com., Mrs. Spencer's Striker, Dr. G. B. Darby's Lansdowne Poverino. High com., J. F. Belt's Hillside Royal, A. Rhys's Woodbury Gamester. Com., S. H. Kerfoot's Jerry. *Bitches:* 1st and 2d, Dr. G. B. Darby's Lansdowne Trim and Lansdowne Dimity. Reserve and very high com., Mrs. Spencer's Riot and Della. *Puppies:* 1st, Mrs. Spencer's Lillay; 2d, A. Rhys's Woodbury Gamester

POODLES.—BLACK, CURLY, FRENCH—CHALLENGE—*Bitches:* 2d, H. G. Trevor's Chloe.—OPEN—*Dogs:* 1st, H. G. Trevor's Emperor; 2d, J. B. Ellison's Ithel. *Bitches:* 1st, Mrs. M. V. Eberhart's Queen Zip.—RUSSIAN CORDED—1st, Mrs. R. I. Carter's Black Jack; 2d, Leo.

BULLDOGS.—*Bitches:* 1st, Eberhart Pug Kennels' Lorna Doone.

BULL-TERRIERS—*Dogs:* 1st, F. L. Dever's Bellerby King; 2d, Dr. A. E. Balson, Jr.'s Craydon Bob. *Bitches:* 1st, Hawkeye Kennels' Hawkeye Duchess; 2d and reserve, F. L. Dever's Lowland Duchess and Croydon Flyer. Very high com., F. W. Phillips's Satin, Dr. G. B. Darby's Lansdowne Thelma. High com., John Harris's Iowa Girl. *Puppies:* 1st, Dr. A. E. Balson, Jr.'s Croydon Bob; 2d, F. L. Dever's Croydon Puss. Reserve, F. E. Griffith's Zeke.

SKYE TERRIERS.—CHALLENGE—*Dogs:* 1st, C. A. Shinn's Elphinstone. *Bitches:* 1st, C. A. Shinn's Bessie.—OPEN—1st and 2d, C. A. Shinn's Lady Stafford and Nellie.

SCOTCH TERRIERS.—*Dogs:* 1st and reserve, A. F. Hertzler's Kiltib and Rattler; 2d, Chesterford Park Kennels' Colored Preacher. *Bitches:* 1st and 2d, A. F. Hertzel's Bessie and Blossom.

YORKSHIRE TERRIERS.—OPEN—1st, B. F. Lewis's Nellie.

BLACK AND TAN TERRIERS.—OPEN—*Dogs:* 1st, Chesterford Park Kennels' Chesterford Victor. *Bitches:* 1st, Chesterford Park Kennels' Betsy.

ITALIAN GREYHOUNDS.—OPEN—*Dogs:* 1st, F. H. Hoyt's Tacco; 2d, J. W. Mack's Jeff. *Bitches:* 1st, F. H. Hoyt's Vitta; 2d, J. W. Mack's Blue Bell.

PUGS.—CHALLENGE—*Dogs:* 1st, Dr. L. C. Sauveur's Attraction; 2d, Lake Shore Kennels' Duke Howard. Reserve, Eberhart Pug Kennels' Eberhart's Cashier.—OPEN—*Dogs:* 1st and 2d, Eberhart Pug Kennels' Patsy Bolivia and Sir Douglas. *Bitches:* 1st and reserve, Eberhart Pug Kennels' Queen Zitka and Lady Verne; 2d, Miss D Mownie's Topsy.—NOVICE—1st, Eberhart Pug Kennels' Good Boy; 2d, Miss C. Mownie's Topsy. Reserve, Mrs. Crout's Grif W. *Puppies:* 1st, Eberhart Pug Kennels' Juliet.

IRISH TERRIERS.—CHALLENGE—1st, H. O'Connor's Galtees.—OPEN—1st, E. Kirk's Ned; 2d, B. F. Lewis's Blue Ribbon.

DACHSHUNDS.—OPEN—*Dogs:* 1st, Joseph Wedekind's Nips. *Bitches:* 1st, Joseph Wedekind's Red Riding Hood.

BEDLINGTON TERRIERS.—OPEN—1st and 2d, John Hopkinson's Beechgrove Blue Bell and Beechgrove Leader.

MISCELLANEOUS—(Under 30lbs.).—Equal 1st, B. F. Lewis's Frank and Mrs. H. W. Hugle's Snyder. Reserve, Ada Ragsdale's Beppo. (Over 30.bs.): 1st, John Hopkinson's Prude.

---

An instance of the homing faculty in spaniels is related by a correspondent in the *Field* (Eng.) who lives at Hertford, near London. The dog was sent to Leighton Buzzard to be trained by a game-keeper. A servant took the dog by rail from Hertford to Kings Cross Station in London and walked him across to Euston Station, where he saw the dog off; it arrived at its destination in due course. On the 8th, about 8 A. M., the dog returned to Hertfort, and the owner has since heard from the keeper that the latter took the dog out on morning of the 7th inst., found him very shy, and shortly after missed him, and he was naturally surprised to hear a few days after that the dog was at his old home. The writer says: "No doubt there are other instances of dogs returning home long distances, but I should say seldom of dogs nine months old."

### Southern Field Trials Derby Entries.

THIS club's Derby entry, considering the depression in field trials this year, must be highly satisfactory to the members. The total number is forty-seven, English setters of course predominating, the pointer men only entering four; three of them are from the Charlottesville Kennel and one from the Hempstead Farm.

ENGLISH SETTERS.

NELLIE BRENT—Pat Henry's black, white and tan bitch (Tremont—Countess Leda).

MILDRED LEE—Pat Henry's black, white and tan bitch (DeSoto Boy—Gladstone's Girl).

JACK SCALES—Pat Henry's black, white and tan dog (DeSoto Boy—Gladstone's Girl).

MARS—Pat Henry's liver and white dog (DeSoto Boy—Gladstone's Girl).

CYNOSURE—Avent and Thayer Kennels' black, white and tan bitch (Roderigo—Norah II).

CHENNESTINE—Avent and Thayer Kennels' black, white and tan bitch (Roderigo—Norah II).

COLUMBINE—Avent and Thayer Kennels' black, white and tan bitch (Roderigo—Norah II).

ROMANCE—Avent and Thayer Kennels' black, white and tan bitch (Roderigo—Norah II).

VIGEROS—Avent and Thayer Kennels' dog (Count Gladstone—).

TORY DIOMID—F. R. Hitchcock's black, white and tan dog (Count Gladstone—Tory Della).

TORY DOLTED—F. R. Hitchcock's black, white and tan bitch (Count Gladstone—Tory Della).

TORY BELL—F. R. Hitchcock's black, white and tan bitch (Count Gladstone—Tory Antoinette).

TORY LUNA—F. R. Hitchcock's black, white and tan bitch (Roi d'Or—Tory Diamond).

TORY LAURA—F. R. Hitchcock's black, white and tan bitch (Roi d'Or—Tory Diamond).

DASHING NOVICE II.—Manchester & Wartrace Kennels' black and white bitch (Gladstone's Boy—Queen Novice).

GLADSTONE'S SUE—Manchester & Wartrace Kennels' black, white and tan bitch (Gladstone's Boy—Hope's Gem).

RUBY'S PEAR—Manchester & Wartrace Kennels' black, white and tan bitch (Antonio—Ruby's Girl).

LADY MILDRED—Blue Ridge Kennels' black, white and tan bitch (Antonio—Ruby's Girl).

TOM BEGGS—Blue Ridge Kennels' black, white and tan dog (Antonio—Ruby's Girl).

NELLIE FOX—Blue Ridge Kennels black, white and tan bitch (Antonio—Can-Can).

GENEVIEVE S.—Blue Ridge Kennels' black, white and tan bitch (Antonio—Countess Rush).

TONY BOY—Blue Ridge Kennels' black, white and tan dog (Antonio—Laundress).

NORA IV.—Minnesota Kennels' liver and white bitch (Roderigo—Nora III.).

MOLLIE—Minnesota Kennels' black, white and tan bitch (Roderigo—Nora III.).

DOLOROUS—Minnesota Kennels' black, white and tan bitch (Roderigo—Nora III.).

JOCK—Minnesota Kennels' black, white and tan dog (Paul Boy—Canadian Lill).

JOE CUMMINGS—J. W. Renfroe's dog (Antonio—Picalo).

HARROLD SKEMPOLE—H. S. Bevan's black, white and tan dog (Whyte B.—Nettie Bevan).

IDA B.—Bryson & Bedford's black, white and tan bitch (Tremont—Leda).

IROQUOIS—Fox & Seller's black, white and tan dog (Antonio—Can-Can).

TONY'S GIRL—Fox & Seller's black, white and tan bitch (Antonio—Can-Can).

MOUNTAIN MAID—Wm. Neu's black, white and tan bitch (Antonio—Florence Gladstone).

EUGENIE—P. Lorillard, Jr.'s, black, white and tan bitch (Eugene T.—Dell).

ADVERSITY—P. Lorillard, Jr.'s, black, white and tan bitch (Eugene T.—Dell).

PALOMA—P. Lorillard, Jr.'s, black, white and tan bitch (Eugene T.—Lou)

ZERALDA—P. Lorillard, Jr.'s, black, white and tan bitch (Eugene T.—Lou).

SHAD—P. Lorillard, Jr.'s, black, white and tan dog (Eugene T.—Lou).

LORIS—P. Lorillard, Jr.'s, black, white and tan dog (Eugene T.—Lora).

ANNIE OF ABBOTTSFORD—Edward A. Burdette's black, white and tan bitch (Gladstone's Boy—Bohemian Girl).

EMMA T.—James R. Foster's liver and white bitch (Dave R.—Betty B.).

JACK KING—Jackson & Denmark Kennels' black, white and tan dog (Tennessee Rod—Phyllis).

MARY JANE C.—Jackson & Denmark Kennels' black, white and tan bitch (Tennessee Rod—Phyllis).

LADY CLARE—Jackson & Denmark Kennels' liver and white bitch (Prince Lucifer—Clare).

POINTERS.

TIPPO—Charlottesville Field Trials Kennels' liver and white dog (Rip-Rap—Monterey).

DELHI—Charlottesville Field Trial Kennels' liver and white dog (Rip-Rap—Queen II.).

SEPOY—Charlottesville Field Trials Kennels' liver and white dog (Hob-Nob—Diana).

HEMPSTEAD DON—Hempstead Farm Kennels' liver and white dog.

### Toronto Show.

THE Toronto people do not feel in a very amiable spirit, as this year the effect of Pittsburgh clashing dates is plainly felt with an entry of 545 dogs against 630 last year. The quality of the dogs, however, is said to quite make up for the deficiency in numbers. Mastiffs have 17 entries, St. Bernards 51, bloodhounds 1, Newfoundlands 4, great Danes 6, Russian wolfhounds 15, deerhounds 3, greyhounds 22, foxhounds 16, pointers 18, English setters 34, Irish setters 9, Gordon setters 8, collies 18, bulldogs 1, bull-terriers 25, Irish terriers 16, Dandie Dinmonts 3, Bedlingtons 6, Scotch terriers 25, Skye terriers 6, black and tans 10, French and Russian poodles 18, Irish water spaniels 5, Clumber spaniels 2, field spaniels 18, cocker spaniels 53, dachshunds 4, beagles 17, fox-terriers 45, wire-haired fox-terriers 32, Yorkshires 7, toy terriers 2, pugs 6, King Charles spaniels 6, Prince Charles spaniels 1, Italian greyhounds 1, Airedale terriers 4, miscellaneous class 4.

There is a feeling abroad that if the A. K. C. recognizes Pittsburgh wins—but this is not at all probable, as the P. A. C. Kennel Club did not send in their application in proper form—the Canadians will not ratify their agreement for reciprocity between the A. K. C and C. K. C. clubs. This is probably mere rumor, and should not influence the cooler heads.

TORONTO, Ont., Sept. 10.—*Special to Forest and Stream:* Show opened this afternoon with a fair lot of dogs. Very few of the old exhibitors are here, and the show seems slow comparatively. Only one judge, Mr. Mortimer, was on hand, the others are expected to-morrow. Many of the classes lack both quality and numbers; but the terrier classes are well supported. Sporting dogs do not come up to average. Spaniel classes filled well, also Scotch, bull and fox-terriers. Among the visitors are Messrs. Brooks, Donner, Bunn, Green, Higginson, Wixom, Fellows, Platt, Tricket, Merrill, Davey, Tulk, Kirby, Turner, Corrigan, Smith and Miss Griffin. Only mastiffs, St. Bernards, Newfoundlands, great Danes, greyhounds, wolfhounds, deerhounds judged to-day. Weather fair, and show promises to be more exciting to-morrow. H. W. L.

### The Gordon Trials.

NEW YORK, Sept. 10.—*Editor Forest and Stream:* The prizes to be run for at the Gordon setter field trials on Oct. 24 next will amount to about $200—perhaps more, if subscriptions and entries come in as is expected.

The proportion to be awarded to first, second and third winners will be stated later on. The weather has been so dry that no dog could find birds before the late rain, and much time has been lost out of the short period for training. So it may be necessary to set forward the date of trials to Nov. 13, of which due announcement will be made next week. Entry fee $5 and $10 to start, open to all Gordon setters.

In the meantime every Gordon man is urged to send in his entries or state how many dogs he intends to run as soon as possible.

Assonet Neck, Mass, is much nearer and less expensive to reach than the South, and a large entry should result from that fact alone. Retrieving will not be required, as Massachusetts law does not allow quail to be shot this season, and the conditions of the trials under N. E. F. T. C. rule are nearer to private shooting than those of most field trials.

JAS. B. BLOSSOM, Pres. G. S. C. of A.

## DOG CHAT.

Mr. Washington A. Coster sends us the particulars of the stakes that are to be run off at the Eastern Field Trials, commencing Nov. 16 with the Members' Stake. This good old field trials club, undaunted by the bugaboo of hard times and general business depression, comes to the front once more with a programme of events that should satisfy even the most mercenary field trial dog owner. Their enterprise in the face of difficulties should be considered when the entries are made, and for the honor of the sport the Eastern Field Trials Club should be supported by every sportsman who has a dog fit to compete.

After the Members' Stake is run off, the prize for which is $100, cash or plate, the regular stakes commence on Monday, Nov. 19, with the Derby, the prizes for which are $300, $200 and $100. First forfeit, $10; second forfeit, $10 paid Sept. 1 and $10 additional to start. Entries closed May 15 and were published in FOREST AND STREAM June 9. The All-Aged Stake is for pointers and setters that have not won a first in any All-Aged open stake at the Philadelphia, Southern, United States or Central trials. Prizes $300, $200 and $100. Forfeit, $10 and $20 additional to start. Entries close Oct. 1. Another popular stake is the "Eastern Subscription" for all pointers and setters, with prizes of $300, $150 and $50. The subscription is $50, payable Oct. 1. Each subscriber may start any dog he pleases, whether his property or not, and the nomination is transferable to any person not objectionable to the club. The first round in this stake will consist of a two hours' heat; afterward the running will be at the discretion and direction of the judges.

A new feature in the trials will be the "Selling Stake," for which any dog that has not been placed at any recognized field trial is eligible. The fee is $10, payable Oct. 1. In addition, the starting fee is 5% of the selling price, to be paid the night before running of stake, and $300 is the limit in price, which must be placed on each dog at the time of filling. The winning dogs will be offered at auction by the club at 9 P. M. on the day of the announcement of awards. Another new and commendable feature is a certificate of excellence, which will be given to all dogs showing merit as good dogs in this stake, signed by the judges, president and secretary of the Club. The prizes will be $200, $100 and $50.

These prizes call for an outlay of $2,150 and we trust that field sportsmen will support the trials with an entry that will at least save the club from loss. Other information in regard to the stakes will be found in our business columns.

---

A show in the States is preferable with a good many exhibitors to one in Canada with its attendant annoyance of customs and frequent change of cars, and we were not surprised to see an entry of 400 dogs for the coming Pittsburgh show. Mr. Davidson, who will judge all breeds, excepting mastiffs, which are taken by Mr. Wade, will have no easy task, as some of the best dogs in the country, outside of his specialties, will be there.

### A Show at West Chester, Pa.

A very satisfactory show was held at West Chester, Pa., in connection with the Chester County Agricultural Society, Aug. 30 to Sept. 1. About 250 dogs were benched and Mr. W. W. Silvey, a well known Philadelphia dogman gave out the ribbons. I am unable to give a full list of awards as there were no catalogues. An excellent lot of foxhounds were shown and some good setters, among them being the Irish setters from the Seminole Kennels in charge of Ben Lewis, on his way to Des Moines. Pride of Patsy won in challenge dogs over Montauk, Jr., and Elfreda took the corresponding ribbon for her sex. Delphinne won in open bitches. In Gordons Leo B. looked after the challenge prize. In collies the winners were The Squire, Metchley Surprise, Shepherd's Lad, Prince Charley and Shepardess. Gamester won in pointer dogs and Emblem in bitches. There was a capital show of Skyes with Mr. Shinn's well known winners to the front. Next year it is expected the show will be under A. K. C. rules, as a kennel club will be formed W. K.

---

In our last issue we spoke of Mr. Hunnewell's purchase of Mr. H. W. Smith's wire-hair cracks, and at that date did not know whether Mr. Smith intended to retire from the fancy or not. We are glad to learn, however, that he will still be very much in the fancy but will depend only upon dogs of his own breeding, to win further fame, imitating the example of Mr. "Beverwyck" Rathbone. He still has some good brood bitches that can be depended upon to throw game stock, which gameness is always preferable to mere bench show glory. Since selling his terriers Mr. Smith has repurchased the well-known high stepper and carriage horse Sky High; which he sold to Anthony Drexel last fall. This grand hackney has won first at three consecutive shows in New York, in addition to a number of prizes in tandem, etc. He is probably the most superb actioned horse yet shown in this country, and what is more to the point Mr. Smith can handle the reins over him in such manner that his grand quality is made the most of.

---

It is stated that the Stockton, Cal., show has been declared off, the show people being unable to overcome the difficulties that were met with in the preliminaries.

---

Dick Morgan wrote us the other day that he would be at the Pittsburgh show, where he might be seen about handling dogs this year.

---

Hard times have brought down the stud fee of Cribbage from $50 to $35. See advertisement.

---

Mr. Hunnewell in purchasing Cribbage, Janet, etc., did so with the intention of depending in the future on his own dogs to carry out his breeding projects. He has some of the best blood now and he should be successful.

---

As every one knows now, Mr. Wellman's North Pole dash did not materialize, owing to the unexpected collapse of his vessel in the ice packs. We were greatly interested in the experiment Mr. Wellman made of using the Belgian draught dogs instead of the native Esquimaux. The Belgians were found to be in the little ice work they were called upon to

do totally unfit, their feet becoming frost-bitten and so sore that they had to be shot. This is the result we anticipated in a recent issue. Belgian streets are pretty rough, but they are as billiard tables compared to hummock ice.

The loss of the Miranda, that took a large party to the shores of Greenland, or tried to do, will be interesting news to the fox-hunting friends of Mr. R. D. Perry, who was one of the party, but escaped the final disaster by leaving the ship for Upper Labrador after the first accident, spoken of some weeks since.

The crack fox-terrier, champion Dorsay, fell over a cliff and was seriously lamed.

Argyle Kennels have purchased the St. Bernard Lady Judith from Mr. Wiggins.

The Pittsburgh show entries number 413, and are dispersed over the benches as follows: Mastiffs 3, St. Bernards 22, great Danes 3, bloodhounds 1, Newfoundlands 1, Chesapeake Bay dogs 1, Barzois 2, greyhounds 3, foxhounds 5, bulldogs 3, bull-terriers 7, Prince Charles spaniels 1, collies 24, beagles 11, Skye terriers 6, Irish and Scotch terriers 8, spaniels 9, black and tan terriers 12, pugs 21, Mexican hairless 2, Boston toy 1, pointers 49, English setters 28, Irish setters 32, Gordon setters 7, basset hounds 2, poodles 6, fox-terriers 31, dachshunds 4, Italian greyhounds 7, miscellaneous 8. Selling class 75.

In mentioning the sale of Southern Beauty, the noted greyhound, to the Terra Cotta Kennels, the proprietors say that we were in error in crediting Mr. Purbeck with the ownership of this greyhound, as they purchased her from Mr. Geo. S. Thomas. We were aware of the fact that Mr. Thomas has had the management of Mr. Purbeck's dogs, but Southern Beauty has always been entered in Mr. Purbeck's name, and we naturally credited this gentleman with the ownership of this bitch at the time of sale, not being aware of her transfer to Mr. Thomas since the spring shows.

Mr. Henry Jarret, owner of the Chestnut Hill Kennels, ran down to Wilmington, Del., the other day and picked up a couple of good dog pups by a son of Christopher out of Sadie Wilkes, first at Washington. He went one better and also bought their dam; she is a sister of Prince Wilkes.

During Mr. Bradbury's absence in the West, at the coursing meetings, the wire hair fox-terrier stud dog Halifax Revival, will stand at the Seacroft Kennels, Manchester-by-the-Sea, Mass., in charge of Mr. W. Turner, the manager, to whom all communications regarding services should be sent.

During Mr. Lacy's absence from this office at the Toronto and Rhode Island shows, it is desired that all matter pertaining to the kennel department, to insure prompt attention, be addressed to Forest and Stream Pub. Co.

Mr. A. C. Bradbury, manager of the Maybrook Kennels, Englewood, N. J., leaves for Huron, S. D., this week, taking with him the greyhounds Royal Crest, Judge Burnaby, Will-o'-the-Wisp, Miss Dollar III., Jim Boy, Southern Belle and Lady Pembroke. This is a good team, and we trust that Mr. Bradbury may be able to put them in such condition that the Western coursers will not run all the decided courses. The four first named have tasted the alkali dust of the plains before, Royal Crest being no mean foe in any company, as his victories at the Oaks and Huron meetings demonstrated.

Mr. C. D. Bernheimer seems to have relinquished his idea of getting together another kennel of fox-terriers. His fancy is running *à la Française* just at present, having purchased some poodles from the Meadowmere Kennels, of Southampton, L. I. The transfer included Rajah, a noted winner, and three young bitches. After John Stokes left Mr. Huntington's kennel he took Mr. Hearn's old kennels at Passaic, N. J., with the intention of starting a boarding kennel. Mr. Bernheimer has now taken the kennel and installed John Stokes as manager.

Mr. Mortimer did not come on the Germanic last Friday, as expected. Among those who were waiting at the dock was Mr. Ed. Corrigan, manager of the Meadowmere Kennels, who was expecting twenty-four poodles that Mr. Mortimer purchased in Paris for Mr. Trevor. From all accounts poodles seem to be the best selling dogs of the day, and we hear of one or two fanciers who intend to try their luck with the "curlies." Their smartness, intelligence and "chic" carriage commend them as ladies' pets, and as such there seems to be a good demand.

The American Kennel Club is making a collection of catalogues of every dog show held in America. Among the collection so far gathered there are several very interesting mementoes of the old dog days. One catalogue is of the New York show of 1881, said to be the first interleaved catalogue of a dog show issued in America. Probably, excepting the New York show, one of the earliest catalogues in existence is that of the Philadelphia State Kennel Club show, held in the Horticultural Hall, at Philadelphia, in November, 1877. As showing the changes in dogdom since then we note that there were 25 Newfoundlands entered in the dog class and 5 in bitches. Pointers and setters were the principal breeds represented and classes were well filled in "native English setters" and "native red and red and white setters, either Irish or crossed." Classes were also made for "black and tan or crossed, black and white and tan Gordon setters." Only two fox-terriers were entered! Beagles and greyhounds filled well, and black and tan terriers with 32 entries must have been an interesting gathering to say the least, while Skye terriers with 38 entries shows a dropping off in the fancy at the present time, though probably one of our present day Skyes was worth a bushel of the 1877 crop. We notice in this catalogue that the performing dogs are referred to as the troupe of "canine graduates." If any one has spare copies of the older shows, the A.K.C. would be glad to receive them, as all these old catalogues should be kept as valuable records.

The *Stock-Keeper* (Eng.), no doubt very justly, draws attention to the slipshod form of crediting which some of our contemporaries use when they are in need of padding from that journal. While we agree with our esteemed contemporary in the cause for grumble we think it would have been more to the point if it had been invidious for once and not included all kennel journals under the condemnatory allusion to "*our American contemporaries.*" The italics are ours, and we use them, invariably.

### Without "Forest and Stream"—Never!

I HAVE had no outing this summer, as yet, but hope to take a trip to south eastern Oregon next month. If I do, and meet with any pleasing incidents, I will send you some notes of the trip. I could get along without bread and meat in the house for a while, but without FOREST AND STREAM—never! AREFAR.

## HUNTING AND COURSING NOTES.

The date of the Altcar Coursing Club meeting has been changed to Oct. 30. This is the same date as the Cheyenne meeting, and further change may have to be made.

# Hunting and Coursing.

## FIXTURES.

FIELD TRIALS.

Oct. 23.—New England Beagle Club, at Oxford, Mass. W. S. Clark, Linden, Mass., Sec'y. Nominations close Oct. 1.
Oct. 29.—National Beagle Club. Geo. Laick, Tarrytown, N.Y., Sec'y.
Nov. 5.—Brunswick Fur Club. Bradford S. Turpin, Dorchester, Mass., Sec'y.
Nov. 7.—Northwestern Beagle Club. Louis Steffen, Milwaukee, Wis., Sec'y.

COURSING

Oct. 1.—American Coursing Club's meeting at Huron, S. D. L. Zutaverne, secretary. E. H. Mulcaster, judge.
Oct. 8.—North Dakota Coursing Club, at Oakes, N. D. A. P. Slocum, secretary. E. H. Mulcaster, judge.
Oct. 16.—Kenmore Club's annual meeting at Goodland, Kan. C. F Weber, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 23.—Western Kansas Coursing Club's meeting at Leoti, Kan. W. O. Allphin, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 30.—Cheyenne Coursing Club, at Great Bend, Kan. Ira D. Brougher, Sec'y.
Oct. 30.—Altcar Coursing Club's autumn meeting at Holyoke, Col. S. W. Vidler, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Nov. 14.—California State meeting at Merced, Cal. J. R. Dickson, secretary.

### American Beagle Club.

TARRYTOWN, N. Y., Sept. 7.—*Editor Forest and Stream:* At a meeting of the National Beagle Club of America held in the A. K. C. rooms Sept. 6, there were present H. L. Kreuder, H. F. Schellhass, J. W. Appleton, George Laick, Geo. W. Rogers, John Bateman, A. D. Lewis, N. A. Baldwin.

The committee on selection of grounds was authorized to make hotel arrrangements and arrange for kennel room for the dogs during our field trials. A vote of thanks was given to Messrs. J. W. Barnum, A. D. Lewis, and Thomas H. Terry of Hempstead for their sportsmanlike action of offering their grounds on which to hold the trials.

The president was empowered to appoint a committee of one to change the constitution and by-laws so as to make the secretary and the treasurer two separate officers, and the secretary was instructed to notify the members of the club. The president appointed Mr. Schellhass. The executive committee divided into two parties for the purpose of nomination of officers for the coming year. Meeting then adjourned to Oct. 11, at 3.30 P. M.

The premium list and entry blanks for the fifth annual field trials are now ready and have been sent to every beagle owner whose address is known to the secretary. Should there be any one that we missed, the secretary will cheerfully forward a copy on receipt of name and address. Our trials promise to surpass any ever held in America.

GEORGE LAICK, Secretary.

### Coursing Meet Fees.

INDIANAPOLIS, Ind.—*Editor Forest and Stream:* In your issue of Sept 8 Mr. L. F. Bartels has an article about high entry fees. He states that the Altcar Club placed its entry fees so low because the Kenmore Club last fall had done so. The entry fee for both stakes at Kenmore meet was $10. How that compares with a $5 fee in the Altcar Produce Stake I fail to see. Q. VAN HUMMELL.

# Yachting.

20. Cor. Phila., Club, Del. River.

THE abuse of the Goulds in the American press since they ventured to purchase and race Vigilant has at least been bold and outspoken; but even this cannot be said of the attack of the New York *Herald* last week, through the medium of an unknown foreign correspondent, who, in turn, quotes some straw "American yachtsman;" the whole thing being indorsed by an editorial, as quoted elsewhere.

Apart from the contemptible insinuations as to Mr. Gould's standing as a yachtsman, the proposed certificate of ability, or respectability, is as absurd as most of the *Herald's* practical suggestions in naval architecture and yachting.

Mr. George Gould, whose standing as a yachtsman is thus covertly attacked by the *Herald*, joined the New York Yacht Club at the age of seventeen (in 1881), and the Larchmont Y. C. a year later, owning and racing for a couple of seasons one of the crack boats of the day. Even at this time he was intimately connected with his father's vast business interests, assuming responsibilities such as few men of his age are capable of bearing. As the demands on his time became greater, he gave up yacht racing, but for the past dozen years he has owned a large schooner, making his home aboard each season with his family.

This year, at the age of thirty, he has returned to yacht racing in a way that might put to shame many older and more experienced yachtsmen. He has purchased the fastest yacht afloat, secured the services of her designer, her sailmaker and the first of American racing skippers, with able assistants in every department, and he has left to these experts the work with which he does not pretend to be more familiar than they are.

There are two things in this season's work which show the character of the man; so far as has thus far appeared he has not, from the first, interfered in any way with the experts that he placed in command of the yacht; he has used every effort to race the boat on all possible occasions, he has spared neither time nor money in overcoming the obstacles which beset him in the way of accidents and failures of hull and gear. Even his most severe critics have not accused him of hurting the boat's chances by meddling with her captain. What is even more in his favor is the fact that the whole expedition was undertaken quietly and unostentatiously, without a boastful word, or a threat of the dire defeat in store for the foreign fleet at the hands of the American champion; and afterward, when disappointment met him on every side, he has quietly kept his own counsel and has taken his beating manfully, without a word of evasion or excuse. There are very few old yachtsmen who could stand the test that Mr. Gould has been put to, of losing gracefully, or who would avoid, as he certainly has avoided, the mistake of expressing his opinions when the sting of defeat is yet keenest; and thus putting himself on record in a way that he would afterward be ashamed of.

The sole fault that Mr. Gould has committed is the fact that he dared to risk the defeat of an American yacht by putting her into open races in which the chances were not all in her favor; and in putting the claim made for her last year, of champion of the seas, to a test which, though necessarily severe, is no more than is needed to prove her right to that ambitious title.

So far from any condemnation and repudiation by the New York Yacht Club as representing American yachtsmen, which is what the *Herald's* proposal would amount to, Mr. Gould has, even in his defeat, fully proven his right to recognition as a representative of the best class of young American yachtsmen, bold, modest and spirited, sparing nothing to win but taking his losses like a man.

IF the *Herald's* plan could be put into practice the result would be edifying in the extreme. Living up to the spirit of the plan, an ideal jury to pass upon the qualifications of ambitious young yachtsmen would be composed of such "prominent yachtsmen" as those whose views so often ornament its columns, men who still believe that the schooners of 1870 are faster than the racing craft of to-day, who still swear by Kirby's Arrow as the fastest singlesticker ever afloat, who pronounce Vigilant a copy of Steers's sloop Julia, and who measure the merits of a steam yacht by the cubic contents of the wine bins. Even such a jury, acting up to its own standards, might find it a difficult matter to impugn Mr. Gould's standing as a yachtsman. If they were to question him by the old-time standard of a true yachtsman before the age of steam, the ownership of a big, slow, and boxy schooner, he could point to the old Hildegarde. If they accepted the more modern standard, the ownership of a shapeless, unwieldy and inconvenient steam yacht, he could show one quite as big, homely and generally unfitted for real steam yachting as any other American-built craft. If they were to go further, and question him on the practical details of sail making, seamanship, navigation and centerboard construction, it is quite possible that they might find grounds for disqualifying him; but such a course would be manifestly impossible, as their own ignorance of such matters of practical yachting would put it out of the question. On the whole, we fear that the *Herald's* proposal is not likely to be acted upon by any club, here or abroad.

### Open Boats in Huntington Bay.

LABOR DAY was celebrated on Huntington Bay, L. I., by the energetic sailor men of the vicinity and their friends by a boat race in which there were three classes entered, for silk pennants as prizes. The first class was for sloop-rigged sail boats; second class, catboats 20ft. long and upward; third class, catboats less than 20ft.

The course was from the float in front of Locust Lodge, to Target Rock on Lloyds Neck, to Mason's dock (Eatons Neck), to the float and repeat. The afternoon was clear, wind strong N.E., a good sea on.

At 3 o'clock the gun gave the signal for the start, the boats having been playing around the line in beautiful form since the firing of the preparatory gun. Some six catboats crossed the line simultaneously. During the entire race the boats were visible and their movements distinguishable from the shore. The sloop Leader, Capt. Cheseborough, of Northport, crossed the line the winner.

The catboat Gertrude, Capt. Tom Brown, of Huntington Bay, outsailed all the other catboats. Spray, Capt. H. Gordon, of Huntington Harbor, won in the second class catboats.

Interest was most centered upon the contest between Gertrude and Shadow, for Shadow, owned by George W. Brown and C. Scudder, has been considered the fastest boat of her size in Huntington. The race was won in a little over two hours. Gertrude gained the prize by 6m. 5s corrected time.

The shores were lined with enthusiastic friends. Prizes were delivered to the winning captains, and the judges of the race in accordance with the sentiments of the crews and their friends are to appoint a committee to organize a yacht club which shall consist of boats belonging to all the harbors included in the boundaries of Huntington Bay.

### Indian Harbor Y. C. Special Races.

GREENWICH—LONG ISLAND SOUND.

*Monday, Sept. 3.*

THE Indian Harbor Y. C. celebrated Labor Day by a series of three races, one for the 21-footers, the last for the Osborn cup; one for cabin cats, for the Wells cup, and a private match between Banshee and Crocodile. Before the race the cats Hornet and Areka were in collision, the latter being badly damaged. There was a strong east wind and a sea. Houri made a poor start, having to recross, and finally gave up. The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| 21-FOOTERS. | | | | |
| Maysie | 12 45 00 | 3 15 05 | 2 30 05 | .. .. .. |
| Vaquero | 12 45 00 | 3 17 02 | 2 32 02 | .. .. .. |
| Houri | 12 45 00 | Withdrew. | | |
| CABIN CATBOATS. | | | | |
| Kittie | 1 00 00 | 3 21 20 | 2 21 20 | 2 18 20 |
| Almira | 1 00 00 | 3 30 20 | 2 30 20 | 2 28 20 |
| MATCH RACE. | | | | |
| Banshee | 1 11 32 | 3 47 00 | 2 35 28 | .. .. .. |
| Crocodile | 1 12 19 | 4 05 25 | 2 53 06 | .. .. .. |

Maysie wins the Osborn cup, Kittie the Wells cup and Banshee the private match.

### Sewaren Land and Water Club.

SEWAREN—STATEN ISLAND SOUND.

*Monday, Sept. 3.*

THE third regatta of this season of Sewaren Land and Water Club was held on Labor Day over a six mile trianglar course on Staten Island Sound.

The start was over an imaginary line from the new club house to the cutter Volo, and the boats sailed twice over the course. The wind was sharp from the northeast and a lively sea was running. The race was without time allowance and the first, second and third boats going over the course and crossing the finish line were awarded the prizes. The summary is as follows:

| | Start. | First Round. | Finish. |
|---|---|---|---|
| Monsoon, D. G. Whitlock | 10 45 25 | 11 42 45 | 12 43 15 |
| Latona, G. L. Boynton | 10 45 30 | 11 45 30 | 12 51 45 |
| Gypsie, W. E. Walsh | 10 45 00 | 11 47 30 | 12 53 15 |
| Cosmos, H. Cooper | 10 48 00 | 11 48 30 | 12 55 30 |
| Ripple, W. H. Smith | 10 44 30 | 11 47 45 | 12 55 45 |
| Drusilla, T. A. Stoddart | 10 45 25 | 11 53 00 | 1 00 45 |
| Clarkson, Clarkson | 10 45 20 | 11 40 00 | Did not finish. |
| Margil, Thos. W. Hawkins | 10 45 15 | 11 46 00 | Disqualified. |

The first prize, a silver lamp, goes to Monsoon; second prize, silver sugar scoop, to Latona, and the third prize, photographs, to Gypsie.

### Bayswater Y. C.

BAYSWARER—JAMAICA BAY.

*Monday, Sept. 3.*

AN open race was sailed over the regular club course, distance, 12 miles. Weather cloudy, east wind:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| SLOOPS. | | | |
| Essex, Mr. Austin | 20.00 | 2 26 54 | 2 18 39 |
| Millie, Cyrus Mott | 25.10 | 2 04 50 | 2 02 25 |
| Toboggan, Samuel Babcock | 28.03 | 2 04 30 | 2 04 30 |
| FIRST CLASS CATS. | | | |
| Edith, Wm. Armstrong | 23.04 | 2 04 28 | 2 04 28 |
| Berth, D. C. Brookes | 21.00 | 2 06 38 | 2 04 18 |
| Alice May, Mr. Moller | 22.06 | 2 02 00 | 2 01 10 |
| SECOND CLASS CATS. | | | |
| Grimalkin, D. Whitford | 17.11 | 1 13 39 | 1 13 06 |
| Meta, L. D. Pettit | 19.00 | 1 03 14 | 1 03 14 |
| Susie R., E. Roehr | 16.03 | 1 17 10 | 1 15 47 |

Winners: Sloops, Millie; first class cats, Alice May; second class cats, Meta. After the race Bertha capsized, all hands saved. Regatta committee B. J. Danklefsen, F. L. Richmond, Richard Mott.

## Current Comment.

It must be universally admitted that Britannia is faster than Vigilant, having defeated her in every kind of weather. All true sportsmen agree that the contests were fought honestly and squarely, despite some American press comments which are likely to injure the cause of international racing. Mr. Gould and the New York Yacht Club will not endorse these comments. Mr. Gould has gained many friends here, and all regard him as a first-class sportsman, while the manner of leading yachtsmen on the other side when they dealt with the last challenge for the America's cup showed it was their aim to bring the yachtsmen of both countries closer together and promote international racing We trust that American yachtsmen will continue their annual visits, thereby improving the sport of yachting.—*London Morning Post.*

---

The disadvantage of the centerboard for big cutters was conspicuously shown in the successive accidents to the Vigilant. It may have been a defect in the new casting fitted at Southampton, although we hope that not even the American press will suggest foul play. Still the liability to be crippled for an indefinite period if a single casting gives way is a serious drawback to the type that Vigilant represents.

Everybody sympathizes with Mr. Gould, who is an adversary pleasant to meet. We trust that his yacht will sail many more races in British waters. The Vigilant is by common consent an admirable example of her builder's art, and even now experts are not agreed that, if equally well handled, the American would prove less able than her antagonist.—*London Times.*

---

"A good boat badly handled" will be the verdict in the case of the Vigilant. Ever since the American champion reached British waters she has been the victim of a series of blunderings. She was started in races before she was in trim to race, the result was a number of mortifying defeats. It was next discovered that her sails did not fit, and the boat failed to do herself justice. Then just previous to an important race she was run on a rock and her centerboard jammed. Having repaired the damage the boat started yesterday to sail for the Cape May Cup, the capture of which would have atoned for all previous faults. Hardly had she got well under way when her discerning managers banged her against a rock, and away went her precious centerboard.

While Gould announces his willingness to go into a 122 mile race with the Britannia, centerboard or no centerboard, the proposition is absurd. An American cup defender without a centerboard would be a novelty. Since the sloop has been in foreign waters she has started in eighteen races, of which she has won six and lost eleven. There would be no fault found with the loss of races had not the boat been handled in so slovenly a manner. As Haff's ability in the past has been proven, his suggestion that he is getting too old must be accepted. Meanwhile the American yachting public will have to grin and bear it. There is an earnest hope that the next time a representative American yacht is sent to England she will have competent handling.—*New York Evening Telegram.*

---

It is no use beating about the bush in regard to the feeling which now exists on this matter. One thing certain is that Mr. Gould will not find it possible to engage in any more matches with His Royal Highness, who is, above all things, a right good sportsmen, and thoroughly English in that respect. As such he naturally resents the unusual methods which have been adopted as regards the Vigilant.

The Prince is perfectly ready and willing to meet any good American sportsman who may bring crack yachts over here, but deprecates entirely such slipshod and unsatisfactory tactics as have been developed in the Vigilant-Britannia matches of late, which methods, unfortunately, instead of stimulating international yachting, have caused bitter feeling. That supposed losing of the centerboard, which was only jammed, the excuses of a drunken sailor at the centerboard, and this final mess with the centerboard, do not come within the Prince's idea of what first class yachting should be.

An American gentleman here to-day said, reflecting very much the ideas of the Prince, that in future it would be well in international yachting that an understanding should be come to, that any American coming over here to challenge for first class races, should bring with him a certificate from the New York Yacht Club that he is a representative yachtsman, so that in future no rich man who is not a sportsman would be liable to create uncomfortable situations, such as could not possibly occur in the case of a genuine yachtsman.

The same rule could be applied to English yachtsmen going over to challenge the United States. It is to be hoped that the New York Yacht Club will at once take up the matter.

* * * * * * * *

A Commercial Cable despatch from Homburg brings what will presumably be to yachtsmen on both sides of the Atlantic the last words on the Vigilant's career in English waters.

It is a despatch which will be an authority for the conduct of all future yachting events of an international character—more especially those between England and America.

The Prince of Wales, as the premier yachtsman of England, has shown the utmost courtesy and consideration in dealing with what the Commercial Cable despatch describes as "the unusual methods adopted as regards the Vigilant."

The Prince, we are told, is perfectly willing to meet any good American sportsman who may take a crack yacht over to England, but he deprecates entirely the slipshod and unsatisfactory tactics developed in the case of the Vigilant.

A gentleman who is said to reflect the ideas of the Prince of Wales, and evidently speaking authoritatively, says:

"In future it would be well in international yachting that an understanding should be arrived at that any American coming over here to challenge in first class races should bring with him a certificate from the New York Yacht Club that he is a representative yachtsmen. *** The same rule to be applied to English yachtsmen going over to challenge in the United States."

No fairer proposition could be made. Let these paragraphs be adopted in the rules and regulations of yachting clubs on both sides of the Atlantic.—*New York Herald.*

---

The Vigilant-Britannia record shows, in number of wins: Britannia 11, Vigilant 5. Four of these races were lost by the Vigilant's flukily running into calms after having held a winning lead varying from three to seven minutes. If the winds had held true the record would not improbably have been: Vigilant 9, Britannia 7. That wouldn't have materially influenced the opinion of yachtsmen on the merits of the boats, but it would have a very soothing effect on a good deal of captious criticism.—*New York Sun.*

---

The Vigilant has broken the record of coincidences and has again been forced into retirement by the second loss of her vexatious centerboard, which yesterday collided with the same rocks it struck acquaintance with on the eve of an important race. The Prince of Wales is naturally a little nettled, as he had been obliged to keep the crew of the Britannia in commission only, as it proved, to wait upon another accident. The Vigilant's campaign for this season is thus brought to an abrupt finale. But Mr. Gould's gallant fight against what seemed to be insuperable obstacles marks a record of American pluck and determination. In such contests it is not the victory or the defeat of the moment that signifies, but rather the ability to take defeat, if it comes, as a part of one's vicissitudes. Mr. Gould received some severe lessons at the outset, but they did not discourage him. He simply went forth to other combats, winning at last a fair share of the events in which Vigilant competed. Altogether the record is encouraging to American yachtsmen. To have won a single victory against such odds as the American yachts was called upon to fight, was almost phenomenal.—*Mail and Express.*

---

Ill luck has pursued the Vigilant to the end. At the last moment she is obliged to forego the chief object for which her owners took her across the ocean. No lover of honest sport can read of her last misfortune without regret, and the disappointment is the greater because the singular accident which has twice befallen her will easily be turned into an argument against the principle in yacht building which it has been supposed had been vindicated by the success of this country in all the contests for the America's Cup. It would seem as if the rock bottom of the waters around the Isle of Wight is too near the surface for centerboards like that of the Vigilant. Yet, surely the British pilot who has determined the Vigilant's course ever since she entered British waters ought to have known that fact—*New York Tribune.*

---

Mr. Gould has lost nothing in the estimation of British or American yachtsmen by defeat. He did all in his power to achieve success, and is entitled to the thanks of American yachtsmen for so pluckily carrying the American colors under difficulties.—*Baltimore American.*

---

If she had been beaten out and out whenever she raced there would have been at least something conclusive about the contests, but as it is we are still sure that the centerboard model is the ideal one for yachting, and our British cousins are just as certain that it is not.—*Providence Journal.*

---

It is a great relief to all Americans interested in the noble sport of yachting to learn that Vigilant will take no further part in English races this season. One can now take up a newspaper without a nervous dread of finding in it a cable despatch saying that some new mishap has befallen her centerboard. Nothing quite so uncertain as that centerboard has ever appeared in international yachting. In one race it was hopelessly jammed; in another it was dropped; before another could be begun it had either fallen to the bottom of the sea or had in some mysterious manner hidden itself from the gaze of its friends Several times official inquiries were necessary in order to say exactly what had become of it. Formal statements, accompanied by affidavits, had to be made in order to satisfy the public as to whether it had really dropped out or had been wedged, or its chain had broken. Just where the "pesky" thing is at this moment, whether lying at the bottom of the sea or hanging from the bottom of the yacht, or hidden away in its trunk, seems to be uncertain. There are many wise opinions put forth to the effect that if the centerboard had behaved better, Vigilant would have won more races, but it cannot be claimed that its behavior has demonstrated the seaworthy qualities or scientific merits of centerboard yachts.—*New York Evening Post.*

---

"Mr. Gould cannot be considered to have come happily out of the Cape May cup business. He at first insisted that he would hold the Prince of Wales to the contest, when it suited his boat. He now finds himself compelled to accept the favor he declined to concede. The accident which is alleged to have caused the difficulty is not intelligibly explained on behalf of Mr. Gould; it is not surprising to hear that the news of the mishap was received in many quarters with derision. There is a suggestion of 'hanky-panky" about the manner of the incident, which was at first kept dark; that does not commend itself to the British nation."—*Westminster Gazette.*

---

Now the races are closed, it is plain that the British is far the better record. It is true that much of the English boat's lead was gained in the inland races on the Clyde, but the races were fairly sailed, and the British boat deserves the credit for her victory. As far as the big sloops are concerned, this season's racing leaves the clear victory with the British champion —*Boston Advertiser.*

---

## Vigilant.

THE report which reached New York just as we went to press last week was unfortunately true in every detail, and was fully confirmed by the fuller dispatches next day, Wednesday, Sept. 5, the date set for the Cape May cup race between her and Britannia. On Tuesday at noon Vigilant was inside of the Needles on her way from Portland to Cowes, after a rough passage from Dartmouth, where she sailed her last race on Sept. 2. In crossing Alum Bay there was some sea and a good breeze; the yacht was several miles beyond the point of the former accident, when, after a shock, the cogs in the hoisting gear broke, the chain ran out, revolving the cranks rapidly, and then the chain parted and the board really sunk in the sea.

The following account is given by the *World* in an interview with Mr. Howard Gould, who was on board, Mr. George Gould being on his way from Paris:

"Vigilant will be laid up immediately and her crew will be shipped home as soon as she is dismantled. This will probably be within a week. We shall never race Vigilant again. I must admit that she is not suited for English waters. It is most unfortunate that we should be compelled to end the season's racing in this manner. The only explanation I can give for the loss of the centerboard is, that the casting made at Southampton was defective.

"The accident occurred yesterday, just as we were inside the Needles. We were sailing in five fathoms of water. A friend and I were sitting at lunch, when suddenly the machinery of the centerboard began revolving backward. The cogs failed to hold the wheels, and they flew around at a great rate.

"It was then evident that the board had dropped and was hanging by its chain. The board gave Vigilant several very hard bumps as we dragged it along for some distance, and then suddenly it broke entirely off.

"There is absolutely no truth in the statement that I had a very narrow escape from serious injury by the crank or any other part of the centerboard machinery flying off.

"As to the cause of the accident, I do not believe that we struck a rock or anything else, and the pilot was in no way to blame for the accident. The chart plainly showed that we were in 5 fathoms of water, and it is a mystery to me that the accident did not occur while we were in the open sea. Coming from Dartmouth the sea was very rough, and there must have been a great strain upon the board. When the accident occurred we were in comparatively calm water, and it was calmer still when we lost the board entirely.

"After our arrival here we made up our minds to race, centerboard or no centerboard, so long as we were allowed to ship extra ballast enough to make up for the loss of the centerboard. We had shipped an extra crew, and were going to do our best to recapture the Cape May cup.

"Of course, if we had insisted, Britannia would have raced; but I felt that we had no right to jeopardize the cup in this way. We could hardly have hoped to do ourselves justice without any centerboard, and had Britannia won, as she probably would, America's chance of seeing the cup again would have been small, as Britannia would only have to win it once more in order to become its possessor.

"There seems to be a fatality about our centerboard over here, and Id on't wonder that the English don t like them; I don't like them myself now. Why, one of the things we hoped to prove to them was the desirability of using centerboards But I guess that the lesson must now be taken the other way. Centerboards are certainly the last things one wants on most of these courses. The pilots here can never realize how much we draw with them, and there is constant danger from that source."

Hathergood Point, off which the breakdown occurred, is barely a dozen miles from Cowes, and the yacht continued under sail to that port, where Mr. W. G. Jamieson and Col. Sterling went on board, on the invitation of Mr. George Gould, who had just come in from Cherbourg in the Atalanta, and made an inspection of the broken winch. The Messrs. Gould offered to sail the race the next day, as originally agreed, provided they were allowed to take on board four tons of lead to be stowed inside, in place of the weight lost in the centerboard. The following telegram was sent by Secretary Grant of the Royal Yacht Squadron, to the Prince of Wales, at Homburg:

"*To His Royal Highness, the Prince of Wales:*

"Vigilant reports loss of centerboard again yesterday. Is willing to race without it. Will you allow Gould to withdraw his challenge altogether provided he is willing, or will you hold him to it?

"(Signed) GRANT, Cowes."

To this the Prince replied as follows:

"*Grant, Royal Yacht Squadron, Cowes:*

"Though Gould has put me to considerable inconvenience by again losing his centerboard, I am perfectly willing to forego the race if he withdraws his challenge. (Sigued) ALBERT EDWARD."

The following messages passed next day:

"*To the Prince of Wales, Homburg:*

"Have had head taken off centerboard trunk. Found board quite gone. Knowing you would not like to race under such circumstances, have allowed Gould to withdraw his challenge.

"(Signed) WILLIAM JAMIESON."

"*William Jamieson, Yacht Britannia, Cowes:*

"Telegram received. Quite approve your decision.

"(Signed) ALBERT EDWARD."

To have sailed the race with Vigilant thus disabled would of course have been most unsatisfactory; as it could have been no test of the two yachts; and a victory by Britannia would naturally have been discounted by every one, her antagonist being disabled.

This time there was no question, from the first, that the centerboard was gone completely; but all is conjecture as to the exact cause and details of the mishap. It is stated that the casting of the large cog-wheel in the hoisting gear, made at Southampton, was defective; and in other accounts, that the new hook, lately made at Southampton, was also defective. As far as the hoisting gear is concerned, there has been no news on this side of any alterations or repairs to the original parts; and as the hook is not only under 13ft. of water, but is buried deep in the lead keel, it could not have been examined. It is certain that either the hook or some other part of the forward supporting gear gave way, throwing all the weight, some four tons, on the chain and hoisting gear at the after end; and that the unusual strain proved too much for the gear wheels of the hoist, the cogs stripping and finally the chain snapping when it had run out. No one seems to know whether or not the yacht actually grounded; but it is quite probable that she did not, and that the whole breakage was due to the straining of the heavy board for several days in the sea.

In the first breakdown, of Aug. 18, there were two violent shocks as the board struck; but this time the shock was so light as to leave serious doubt as to whether the yacht touched in any way, Mr. Gould stating that it did not. The first effect of the board striking, unless it were very far down and the rock or other obstacle was so near the keel that the fore edge first took the blow, would be to raise the board in the trunk; after which the board would drop heavily, probably parting the chain and throwing the entire weight on the pin and hook. Nothing of this kind took place, and from the circumstances as reported, the most plausible inference is that either the new hook or the pin broke, not from a blow from without, but as the result of the constant straining of the board and its attachments in rough water.

The mishap was not generally known until next day, when people assembled to witness the race, and much disappointment was expressed; but so far as the yachtsmen of Cowes and the British papers are concerned, with one or two exceptions, the main feeling has been one of sympathy with the owners of the yacht. Britannia lay in readiness in Cowes Roads, with thirty-eight winning flags flying, the token of her success this season. Atalanta and Vigilant were anchored near, Mr. George Gould being with his family on the steam yacht. Shortly after noon Vigilant set her ensign in salute to Britannia, and started in tow of Atalanta for Southampton, where she will lay up. Atalanta will also winter on the other side, the Messrs. Gould returning to New York about the end of this month by steamer. Capt. Haff and the others of Vigilant's crew will soon return by steamer.

---

## A Racing Circuit on the Sound.

*Editor Forest and Stream:*

Ever since the publication of my former communication regarding a racing circuit, in the FOREST AND STREAM, I have been asked by many prominent yachtsmen to outline the scheme, which was, I confess, rather indefinitely proposed.

The Long Island Sound Y. R. A. should embrace all the representative yacht clubs on the Sound. It would not be at all necessary to make any changes in the racing rules of any of the clubs, as the association officials would simply be charged with the framing of a circuit that would give to each club a permanent racing day. This circuit could be made up something like this:

SPRING SESSION, MAY TO JULY, 1895.

May 30, Larchmont Y. C.
June 1, New Rochelle Y. C.
June 8, Sea Cliff Y. C.
June 15, Seawanhaka C. Y. C.
June 22, Indian Harbor Y. C.
June 29, Knickerbocker Y. C.
July 4, A town cup.
July 6, Douglaston Y. C.
July 13, Corinthian Mosquito Fleet.
July 20, Riverside Y. C.
July 27, New Haven Y. C.

SUMMER SEASON, AUG. 2 TO 17.

No Sound dates. Any club on Sound can hold special regattas during these days. They are left blank on account of New York Y. C. cruise.

FALL SEASON, AUG. 17 TO SEPT. 14.

Aug. 24, fall regatta Knickerbocker Y. C.
Aug. 31, fall regatta Larchmont Y. C.
Sept. Labor Day, New Rochelle Y. C.
Sept. 10, Seawanhaka Corinthian Y. C.
Sept. 14, New Haven Y. C.

The fall season can be prolonged to accommodate other clubs, in fact there is no reason why we should not race throughout September. But this is is a rough plan. The idea is simply this, that a racing yacht owner would know where to send his boat, and would be assured of classes.

The fixtures would be made up so that a boat would commence at one end of the Sound and finish at the end of the circuit, *i.e.*, New Haven.

This association should be made up of the different clubs, but they would only contribute enough to its support to insure the proper administration of its offices. The clubs would give the prizes, and would have their own racing rules.

The race committee of the Y. R. A. would act as judges at all races, and would see that each club was given sole right to its assigned day. I have purposely avoided a universal racing rule, simply because that is a matter that could be settled by the delegates to the Y. R. A., from the different clubs.

You will notice that I have made room for a town cup—now this is an idea we ought to take up. Let the new Y. R. A. give a day every week to the town nearest the last fixture. The town could get up subscription cups, and I feel positive that this new feature would prove very attractive. On May 30, knockabouts would race; the next Saturday would be the New Rochelle day—now take the Wednesday between and let that be for the town of New Rochelle, and the Wednesday following for the residents of Larchmont—cup. Now we go over to Oyster Bay. The S. C. Y. C. has its regatta on Saturday. The following Monday the Cottagers cup of Oyster Bay could be sailed for. Then we go to Indian Harbor and on the following Monday race for the Greenwich cup, and so on to the end of the season. This plan would insure plenty of good sport and would certainly increase the interest in yachting.

C. M. CONNOLLY.

NEW YORK, Sept. 1.

---

## Cohassett Y. C.

*Saturday, Sept. 1.*

THE seventh and concluding race of the series was sailed in a fair S. E. breeze which hauled S. on last leg, but held true, giving a pretty race.

Grimalkin got the start, followed by the rest well bunched. Winona parted throat block at start and was badly handicapped, but repaired damage quickly and finished second, passing through the whole fleet, except Grimalkin; the latter having been fitted with a jib has now the typical Cape rig and shows herself to be a very different boat, having won the fifth race in a reefing breeze and the seventh in a light wind. The finish was very pretty, the winner being saluted by The Senator, and the visitors being Shadow, Daring, Faustina and several others with parties. Escort won in third class as the wind was light.

FIRST CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Grimalkin, Com Howe | 22.10 | 1 17 28 | 0 56 43 |
| Duster, Mapes Bros. | 22.02 | 1 19 37 | 0 58 22 |
| Zig Zag, Gaumars & Wheelwright | 20.02 | 1 23 42 | 1 00 48 |
| Winona, H. Braman | 26.08 | 1 19 02 | 1 00 50 |
| Pickaninny, H. Adams | 20.08 | 1 25 00 | 1 02 32 |
| Frances, J. N. Willcutt | 21.08 | 1 27 12 | 1 05 29 |
| Dione, H. B. Tower | 21.11 | 1 27 22 | 1 05 51 |

SECOND CLASS.

| | | | |
|---|---|---|---|
| Modoc, Geo. D. Silsbee | 16.06 | 1 28 46 | 1 02 19 |
| Elta, A. A. Lawrence | 16 10 | 1 35 10 | 1 09 00 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Escort, J. Richardson | 14.02 | 0 36 25 | 0 24 37 |
| Hazard, F. R. Pengram | 15.05 | 0 39 05 | 0 27 51 |
| Trident, Dr. J. Bryant | 13.07 | 0 42 45 | 0 30 47 |
| Watermelon, H. M. Knowles | 14.07 | 0 48 03 | 0 36 29 |

The Cohasset Y. C. gave a race for the working boats of Cohasset, which was a great success; 18 spritsails entered, in size from 16 to 18ft. waterline; all fine, able boats Start was at anchor with sails furled. Wind strong N.E and so much sea that judges had to land under the lee of Brush Island and start the boats from the point to Round Rock. At the gun the sails were put on like a flash and anchors walked in, and all were off in a bunch before the wind, cracking on fore and mainsail and some improvised spinakers. The course was the usual 6 mile first class club course, and though the wind let up a little there was plenty of it and a very heavy sea. The boats kept well together and made a fine sight. The race was sailed without restriction, other time allowance. The winning skippers were: Levi Cadoze, first, $12; J. Jason, Jr., second, $9; Frank Martin, third, $7; F. Atwood, fourth, $5; J. Grassie, fifth, $2.

QUAMINO.

---

## Sailing Dories.

*Editor Forest and Stream:*

In your issue for Aug. 25 I see some questions which I will try to answer:

1. "Do dories work well under sail?" The ordinary straight-sided dory works fairly well, and the round side, Beverly dories are very handy and fast under sail.

2. "What sort of a sail would make a 16ft. dory most handy?" For speed I should deck her over fore and aft and put a coaming on, and then rig her on the same style as a 21ft. jib and mainsail. If a good deal of ballast is put in and a large crew carried, they will stand a large sail. If wanted only to knock about in, I should not deck her over, but give her large leg-of-mutton or spritsail.

3. "What are the most approved dimensions of a dory?" The fastest dory anywhere round here is the Snipe, and her dimensions are, as near as I can remember:

| | |
|---|---|
| Over all | 20ft. 10in. |
| L.w.l | 16ft. 4in. |
| Bottom | 15ft. 3in. |
| Beam, about | 4ft. 6in. |
| Centerboard length | 3ft. 8in. |
| Width of bottom | 24in. |

There is no skag used for the rudder of a dory that I have ever heard of. I should be very glad to answer any other questions I can for you.

A. N. HIGGINSON.

MANCHESTER, Mass., Sept. 3.

---

## Miramichi Y. C., Aug. 30.

THE annual race for Vice-Com. Stewart's pennant, which was postponed from the 16th to the 30th, was started in a calm. The course was from Chatham to Bay du Vin, 22 miles. The tide was with the yachts, and also what little air there was. The starters were Maude, Oriana and Learig. The two latter went away together, leaving Maude far astern, and it was nip and tuck with them for ten or twelve miles, first one being ahead and then the other. The wind came in ahead when they were seven miles from the start, but was light and fluky. At Pt. Cheral, about half way, the wind came steady and brisk from the southeast, and the yachts made a long leg across the bay and a couple of short hitches up the shore to the finishing point. The big sloop dropped Oriana steadily in the last half of the race, finishing 7m. 15s. ahead, but Oriana wins on time allowance:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Oriana, J. L. Stewart | 23.09 | 6 49 00 | 6 41 20 |
| Learig, A. S. Burr | 27.00 | 6 41 45 | 6 41 45 |
| Maude, J. C. Miller | 23.09 | Not timed. | |

## New York Yacht Racing Association.

SIXTH ANNUAL REGATTA—NEW YORK BAY.

*Monday, Sept. 3.*

THE sixth annual regatta of the New York Y. R. A. was sailed on the usual date, Labor Day, and this time in a strong easterly breeze, making wet and exciting work for the smaller craft of the associated local clubs. The entry list was large, 114, but of these only 51 crossed the line, off Bedloe's Island, and many of these were handicapped through a disregard of the plainly printed instructions. This small display was due in part to the customary delay in getting to the start, some of the yachts coming a distance of 20 miles through crowded tidal waters. Instead of dropping down to Bay Ridge or Communipaw on the previous day and being on hand early in the morning, fresh and with boats in racing shape, the majority depended on a favoring wind and tide to enable them to make the trip on Monday morning, arriving before the start. A rough sea on the Lower Bay kept the Shrewsbury fleet at home, and a strong breeze up the river did the same for the many boats that hail from above New York. There is no good reason why this association, with its large membership and but one race in a season, should not see a fleet of 150 yachts over the line, and by united efforts on the parts of the clubs and individual owners, this end might easily be reached, making the Labor Day race one of the principal events of the year in New York waters.

The regatta was sailed over the usual courses:

Course 1.—For classes A, B, C, D, E, and F: From starting line around Red Nun Buoy, No. 12, leaving the same on port hand, and return; distance, 27 statute miles.

Course 2—For classes G, H, 1, 2, 4, 6, and 7: From starting line around Swash Channel (red) Bell Buoy, leaving the same on port hand and return; distance, 21 statute miles.

Course 3—For classes 3, 5, 8, and 9: From starting line around Black Buoy No. 9, leaving the same on port hand and return; distance, 15 statute miles.

Course 3—For class 10: From starting line around Black Buoy No. 11, leaving the same on port hand and return; distance, 12 statute miles.

There was a strong easterly breeze, making a reach out and in, but with sheets close hauled on the way down, and many turned in single reefs, while some even took two tucks. Starting with an hour of the ebb gone, there was quite a sea from the tide, and it was rough and wet work for the sandbaggers The starters were:

| | | | |
|---|---|---|---|
| Bessie | 11 29 30 | Hilma | 11 55 55 |
| Exile | 11 30 15 | Alida | 11 56 15 |
| Lottie | 11 33 18 | Lizzie B | 11 58 13 |
| Coquette | 11 33 36 | Miller | 11 58 38 |
| Forsyth | 11 33 51 | Henry Dauer | 11 58 55 |
| Reliance | 11 34 09 | Frank | 11 59 34 |
| Pavonia | 11 34 22 | You & I | 11 59 36 |
| Lurline | 11 34 37 | Emma R | 12 00 00 |
| Aeolus | 11 37 18 | Torment | 12 00 06 |
| Win or Lose | 11 40 34 | Chip | 12 00 20 |
| Hustler | 11 42 37 | Tempest | 12 00 24 |
| Clara B | 11 45 20 | Cinch | 12 01 11 |
| Mosquito | 11 45 43 | Millie | 12 01 30 |
| Zetes | 11 46 15 | Rip | 12 01 43 |
| Alf | 11 46 29 | Little Dean | 12 01 50 |
| Polly | 11 46 49 | Own | 12 02 05 |
| Cygnet | 11 47 16 | Pauline B | 12 03 00 |
| Mary | 11 48 37 | Ella R | 12 03 58 |
| Acorn | 11 49 18 | Molly Bawn | 12 04 01 |
| Minnie | 11 49 20 | Eureka | 12 04 02 |
| Surprise | 11 49 00 | Typhoon | 12 04 21 |
| Anaconda | 11 39 00 | Kilkenny | 12 05 10 |
| Bell | 11 52 31 | Shandon | 12 05 19 |
| Norman | 11 54 33 | Camille | 12 06 31 |
| Tough | 11 54 43 | | |

Nineteen were handicapped.

The way out was marked by a mishap, the sloop Coquette carrying away her mast when above the Narrows; she was towed to Keyport for a new one.

The turning of the outer mark in the sea was a severe test of seamanship for some of the fair weather sailors, and some of the boats made a very poor showing under reefed canvas, failing to come about. Only one capsize took place, the open boat Mosquito, at the turn. Her crew were taken off and she was towed in by the police boat Patrol. There were several protests, all of which have not yet been decided. The Boston 21-footer Exile was protested because the cabin house lately put on her was under the limit, 12 high at the side The full times were as follows, subject to protests which had not been decided up to the time of going to press.

CLASS B—CABIN SLOOPS AND CUTTERS, 62FT. AND OVER 53FT.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Anaconda | 11 39 00 | 3 11 53 | 3 32 53 | 2 59 00 |
| Aeolus | 11 37 18 | 3 11 00 | 3 33 42 | 2 46 19 |

CLASS E—CABIN SLOOPS AND CUTTERS, 38FT. AND OVER 32FT.

| | | | | |
|---|---|---|---|---|
| Coquette | 11 33 36 | Carried away mast. | | |
| Lottie | 11 33 18 | 3 57 57 | 4 24 39 | 3 18 25 |

The judges were Capt. J. C. Summers, A. Dahm-Peterson and A. F. Adams. The regatta committee were A. F. Adams, G. E. L. Hinrichs, M. W. Bronson, E. Langerfeld, William Ross, Jr., F. M. Randall, F. W. Creegan and Garrett Van Horne.

## Lake Geneva Y. C.

RACE on Sept. 1, distance fourteen miles. Weather fair, wind light.

| | Length. | Start. | Finish. | Elapsed. |
|---|---|---|---|---|
| Expert, J. M. Rumsey | 24.07 | 11 26 16 | 2 19 11 | 2 52 55 |
| Precept, J. Hodgkins | 24.05½ | 11 27 04 | 2 42 31 | 3 15 27 |
| Vanadis W. S. McCrea | 20.04 | 11 28 48 | 2 45 33 | 3 16 45 |
| Mephisto, Edwin Nortin | 22.11 | 11 25 32 | 2 45 50 | 3 20 18 |
| Rival, B. Carpenter | 21.00 | 11 26 45 | 2 44 50 | 3 18 05 |
| Kidnapper, W. Napper | 24.07 | 11 25 57 | 2 47 03 | 3 21 06 |

Expert wins in the 24ft. class, Precept second. Vanadis wins in 21ft. class, Rival second.

## Beverly Y. C.

THE 215th race, fourth open sweepstakes, was sailed Sept. 1, at Monument, in smooth water and a light southerly air. Courses were 14¼ miles for second class, 8¼ for third and fourth class sloops, 5 miles for fourth and fifth class cats. Interest centered in third class, as Mojave came round from Newport, and it is a close call between her and Nobska. Mojave had to take out some ballast to get into class. She got a fine start in the lead, while Nobska started under the lee of two boats. Mojave sailed well and earned the prize fairly. In second class Gymnote had it all her own way, while Grilse beat her class both on and off the wind. She is now in shape and sailing fast:

SECOND CLASS CATS.

| | Length. | Elapsed. | Corrected. |

Winners—Class 2 cats, Gymnote first, Bernice second, Kalama third; Class 3, cats, Mojave first, Nobska second, Colymbus third; Class 4, sloops, Grilse first, Fin second, Kitten third; Class 4, cats, Dawdle first.

Judges, N. H Emming and W. Lloyd Jeffries.

---

The 216th regatta, second open race was sailed on Sept. 3, at Monument Beach, in a northeast breeze, strong enough at start to make several boats, including Mojave and Nooska, put in a couple of reefs; but the wind lightened and reefs were shaken out.

The special class included Memory, a Herreshoff fin from Newport; she looked in splendid condition but did not point with Chappaquoit. Their course was to Scraggy Neck buoy No. 8, Bowbells buoy and a beat home, 14 miles.

Second class ran to buoy 10, had a beam wind to Bird Island and a beat home, 10¼ miles. Gymnote with a patch on her side as a reminder of Saturday's collision, sailed in great shape. Kalama, Myrtle, Venture and Bernice had a hot race, being all within 35 seconds.

Third and fourth classes ran to Pines, had it over the quarter to Abiels, a long beat home, another ran to Pines and a short beat home, 8¼ miles.

On the first beat boats crossing the flats had a large advantage. Fin did not dare to try as tide was low, and Grilse stuck to Fin. Result was Dolly led Grilse on this round a few seconds, but the latter spun out a lead on the short round. She is now sailing well.

In third class Mojave had given her full allowance to Nobska and had ten seconds to the good at the end of first round, but Nobska reversed the order on second round. Mojave made a short hitch that seemed unnecessary to many.

Among the little fellows, Waskite, who has been considered slow, sailed for the first time and belied her reputation.

It was noticeable that though the race was open to all, yet 30 out of 38 boats belonged to the club and only one prize, a third, went to an outsider.

SPECIAL CLASS.

| | Length. | Elapsed. | Corrected. |

Judges: F. E. Cabot, W. Lloyd Jeffries, N. H. Emmons, H. S. Carruth.

## Drusilla and Memory.

A SERIES of three races for a purse of $500 last week, off Newport, between the two Herreshoff fin-keels Drusilla and Memory, the former owned by Louis M. Rutherford, being about 36ft. l.w.l., built in 1892, and the latter, owned by W. N. Murray, being some 4ft. shorter, and new this year. Neither being measured, an allowance of 7m. for 20 miles was agreed upon. Drusilla has a pole-masted rig, carrying only the three lower sails, while Memory has a topmast, with topsails and jibtopsails.

The first race was sailed on Sept. 5, the course being from off Mitchell's Point Rock around the buoy off Point Judith, about 20 miles; much of it outside in a heavy sea, the wind being fresh S. W. Drusilla was steered by H. B. Duryea, with her owner and Woodbury Kane on board, while Memory was steered by Capt. Champlain.

The start was made at noon, Drusilla leading over the line, under whole lower sail, Memory having a reef in her mainsail and but one headsail. On the long beat to Point Judith against a heavy sea, Drusilla gained 18m on Memory; but off the wind the latter set her clubtopsail and jibtopsail, making up 5m., being beaten by 11m. 1s. even time.

The second race, on Sept. 6, was under very different conditions, a very light north wind, shifting to S.W. The course was from Rose Island around Nyatt Point Buoy, 20 miles, the first leg being to windward. At the start Drusilla led, but as soon as Memory set her clubtopsail and jibtopsail she took the lead, being 10m. ahead at the turn. A shift of wind to S.W brought the two hard on the wind for the finish, but an inopportune calm kept the two drifting until 9 P. M., Memory finishing with Drusilla far astern.

The third race, on Sept. 7, was sailed in a good breeze, the course being 10 miles to windward from Brenton's Reef Lightship, S.S W., and return. Drusilla led at the start and continued to gain, footing faster and pointing higher until she turned the mark 6m. ahead. Running home free, Memory caught but failed to pass her, the two finishing with Drusilla a few feet in the lead. Memory wins the three races, the agreed allowance of 7m. giving her the last race easily.

## Brooklyn Y. C. Fall Regatta.

BATH BEACH—GRAVESEND BAY.

*Monday, Sept. 3.*

THE Brooklyn Y. C. sailed its annual fall regatta on Labor Day, over courses on the Lower Bay, the wind being from the east and quite strong. The times were:

CLASS D—CABIN CATS.

The winners were Tabitha, Adele, Ileika and Dorothy.

# MODEL YACHTING.

## An International Contest.

THE American model yacht Marjorie beat the English model Maude yesterday afternoon in a drifting match at Prospect Park Lake. The course, a quarter of a mile to windward, was covered twice. A time allowance of 21 seconds was given the Maude. The first time over the Marjorie finished 1 minute and 16 seconds ahead, and the second time she beat her little rival by 5 minutes and 34 seconds.

A light, unsteady breeze blew across the big lake from the southwest. Shortly after 4 o'clock Herbert Fisher, owner of Marjorie, brought his yacht out of the boat house near the reservoir and launched it off the float. All her sails were set and she bore off across the lake winning loud applause from a crowd of youngsters. Mr. Fisher followed in a rowboat. Maude was then placed in the water. Mr. Haseldine, her owner, intrusted his craft to the hands of one of the lake boatmen. Wm. V. Hansen, of the American Model Y. C., who acted as referee, also followed the yachts over the course in a rowboat.

The start was made near the shore at the lower end of the lake. Both yachts bore off on the port tack at first. When it came time to go about, the sailors in the rowboats turned the little models around and started them off on the other tack. Marjorie with her immense sail area was able to utilize a greater share of the puffy wind. She gained rapidly on the first few tacks and was well in the lead when the steam launch made a tour of the lake. The waves of the steam launch proved mountainous billows to the little craft. They bobbed up and down, especially Maude, which was closer to the launch, and their sails flapped helplessly in the wind.

Mr. Haseldine with his friend, Edward Hurst, viewed the race from the little point which juts out into the lake near the reservoir. They were the only representatives of John Bull present.

"I wish I had another suit of sails with me," remarked Mr. Haseldine, as he noted the widening distance between the two boats. "The Maude I knew would not make any kind of a showing against this modern boat. It is hardly fair to call it a race. Indeed I had no idea of racing her here when I brought her over. I should, however, like to see the crack English model yacht meet the fastest American model. If there were a stiff breeze to-day my boat would do much better."

While making the course the second time the Maude was becalmed before going about on her last leg. The tall trees which lined the shore at that point intercepted the breeze.

The course, which it took twenty-three minutes to sail, is easily covered in five minutes with a good breeze by the majority of boats in the American Model Y. C. fleet.

Mr. Haseldine sails for Hull, Eng., on the Galileo next Saturday. He will endeavor to arrange a regular international model yacht race by obtaining the consent of Com. Bruce, of the Kingston Model Y. C., to bring the fastest English model to this country to sail against the fastest American model on Prospect Park lake. Mr. Haseldine praised the American Model Y. C. highly, and was much pleased with the course on the lake. The only thing he regretted was the scarcity of wind. The time was as follows:

*Brooklyn Eagle, Aug 30.*

---

The Philadelphia Model Y. C. had their annual Labor Day race in the cove back of Petty's Island yesterday. There were only three entries, Princess, Vindex and Iroquois. There was a light east-southeast wind when they started at 3 P. M., Vindex in the lead. In the run to the outer mark Vindex held a better course than her opponents, and the outer mark was rounded as follows: Vindex 3:16:22, Princess 3:18:25, Iroquois, 3:18:28. Iroquois fouled the Princess and had to make an extra jibe, and then the gooseneck of her mainboom carried away, which practically threw her out of the contest. A plucky attempt was made to repair the damage, and the boat was held in the contest, but she did not hold a good wind. The finish was: Princess 3:25:18, Vindex 3:26:05, Iroquois 3:29:40. According to the handicap rules of the club Vindex wins the race by 3s.

---

The Keystone Model Y. C. had a race for 36in. model yachts yesterday in the cove back of Petty's Island, for a silver cup. Commodore Porter, of the Philadelphia Model Y. C., acted as judge, starter and referee. Over twenty yachts started at 4 P. M. in a light southeast breeze, which freshened toward evening. Clifford led off, but was soon passed by the White Lily, and after many changes the outer mark was rounded as follows: White Lily 4:52:05, Clifford 4:52:28, Willie 4:53, Scott 4:54:20, Marguerite 4:56, Daisy 5:02, Black Hawk 5:03:50. White Lily and Scott had the race to themselves, the finish being: White Lily 5:30, Scott 5:30:05, Marguerite 5:35:28, Daisy 5:42:06 —rest not timed.—*Philadelphia Times, Sept. 2.*

# YACHT NEWS NOTES.

The new bulb-fin 21ft. yacht Ko Ko won first place in the open race for that class in Hamilton on Sept. 3, beating the ten Hamilton starters without time allowance. Among the latter was the Scalawag, a similar craft, which had previously been invincible, having won five first places in as many starts this season. The Ko Ko was designed by W. P. Stephens, the yachting editor of FOREST AND STREAM of New York. Mr. W. G. Mackendrick, her owner, has spared nothing in trying to make her the fastest boat in her class on the lake. Her leg-o'-mutton mainsail and other canvas was made by F. M. Wilson of Port Jefferson, N. Y., her hollow spar by L. K. Young & Co. of Bridgeport, Conn., and she is fitted with halyards of phosphor bronze wire, so that her canvas when once hoisted will not sag. Ko Ko intended to start from Toronto Saturday, but the heavy southwest wind and heavy sea prevented her, and she left the following morning at 6 o'clock, and had a dead beat to Hamilton. When off Bronte about 6:30 P. M. she experienced the tail end of the storm that was wrecking things around the waterfront here. The sky was obscured by the smoke, and all that gave indications of the storm was the crashes of thunder. The wind had been blowing steadily from the southwest all day, and when it suddenly veered around all the canvas was quickly on deck. Twice did this occur, and in the short space of ten minutes the wind blew from the north, south, east and west, and intermediate points, finally settling down to a hot northeaster, under which they made the piers, bowling along at a terrific rate, with three tucks in the mainsail and the spinaker set. The crew were Mr. F. Leyden, Mr. Bull and W. G. Mackendrick. The Ko Ko floats the Royal Canadian Yacht Club burgee.

The following challenge, in the New York *Sun*, has resulted in an agreement for a series of two races between the two cabin cats, Mary, designed by Mr. Philip Ellsworth, son of "Capt. Joe," and Almira, owned by H. W. Hanan. Almira was built in 1890 by Hanley, to beat Harbinger, then the crack of the Cape cats, also a Hanley boat. She has been for several seasons in New York waters. Mr. Ellsworth's challenge reads: "I desire to sail my cabin catboat Mary a series of three races against any cabin catboat in the country for a cup or a stake of $5 to $500 a side, the Almira, Kittie or the Win or Lose preferred." One of the races will take place on the Bay, one on the Sound and the third will be settled by tossing for choice. The boats are so closely matched and so well known that the races promise to be specially interesting. The first race was won by Almira, on Sept. 10.

We have received a copy of the mid-summer number of the *Yachting World*, the new English yachting weekly, this first essay being quite a large magazine in a handsome illuminated cover. It contains a number of sea stories by Clark Russell and others, with a history and description of the Royal Yacht Squadron, and also biographies of Mr. Watson and Lord Dunraven, designer and owner of Valkyrie. The number is very fully illustrated, the text including many good half-tone pictures of new yachts, while there are six supplemental plates, with portraits of Messrs. George and Howard Gould and Lord Dunraven, also Vigilant and Valkyrie, and two reproductions from paintings of yachting scenes by Barlow Moore. Apart from the stories, the pictures alone are well worth preserving.

Since his departure for Europe early in the summer nothing has been said of Gen. Paine's whereabouts, but he has been reported lately in Glasgow, the guest of Mr. James Bell, head of the Thistle syndicate. Jubilee was hauled out last week for the winter at McIntyre's yard, Quincy.

The Sewaren Land and Water Club now owns a handsome club house, dock and float at Sewaren, New Jersey, on the shores of Staten Island Sound, and only 45 minutes from New York city and the offices of its members.

Lasca and Fleur de Lys, schooners, have both laid up at Southampton for the winter.

"Investigator" will oblige by sending his address.

## FIXTURES.

SEPTEMBER.

15. Red Dragon, Fall Regatta, Delaware River.

### Wabewawa War Canoe Association.

THE sixth annual fall championship regatta of the New England Amateur Rowing Association was held on the Charles River, Boston, on Labor Day in the presence of over 10,000 people, and the Wabewawas were again successful in capturing the war canoe trophies.

The city of Boston had appropriated $500, which, together with $500 from the association's treasury, was expended for the prizes; and it is needless to say that they were well worth the rigid training necessary to obtain possession of them.

The Wabewawa War Canoe Association had entered two strong crews and the Boston public had an excellent opportunity to witness the skillful paddling of this new and prosperous organization. The senior crew won quite handily and the junior crew gave the Waltham boys a great race for second position.

The prizes consisted of nine large loving cups, together with an elegant silk banner suitably embroidered, valued at $125, and the boys are extremely happy over their great victory.

Capt. Drake's crew, that was so ably commanded, consists of the following paddlers: F. J. Burrage stroke. Wellington Wells No. 2, Rodger D. Smith No. 3, M. X. Colon No. 4, R. A. Ballou, Jr., No. 5, C. R Robertson No 6, F. C. Perry No. 7, W. L. Perry No. 8, Louis S. Drake, captain, No. 9.

There have been three war canoe races in New England this season, and the Wabewawa has been the winning boat in each regatta. For this reason the members of the association feel very proud of their 25ft. craft, which is but one year old and holds two New England championships already. Altogether the future of the Wabewawa War Canoe Association seems to be extremely bright.

## CANOE NEWS NOTES.

The fall regatta of the Red Dragon C. C will take place on Sept. 15, off the club house, Wissinoming Station, Pennsylvania R. R., the races being called at 2:45 P. M.

The annual regatta and clam bake of the Rochester C. C. will take place on Sept. 15 at the club house, Irondequoit Bay.

# Rifle Range and Gallery.

## SEA GIRT.

### New Jersey State Rifle Association Annual Meeting.

NOT since the days when Creedmoor was in its prime has there been such a successful meeting as was held last week on the New Jersey State range at Sea Girt

In some respects the meeting at Sea Girt excels Creedmoor in the fact that the entries in the Interstate and Hilton trophy matches this year exceed any entry ever made at Creedmoor. When New Jersey withdrew its support from the old Brinton range at Elizabeth in 1884 and opened the new range at Sea Girt, rifle interests received, as it seemed at the time, a black eye, but it looks now as though it was the elevation of the rifle in the State. At any rate, the camp ground and range at Sea Girt has developed one of the finest and most complete in all its appointments to be found in America.

Gov. Greene was one of the first State executives to take an active interest in building up the range, and added much to his popularity by his zeal in procuring legislative enactments in the interests of the State militia and the new range. Gov. Abbett, who succeeded Gov. Greene, and Geo. T. Werts, the present executive, have taken great interest in forwarding the interests of the State militia, and the result is New Jersey's militia is in a most flourishing condition.

Outside of the influence of the State executives mentioned there is another who has, by his active zeal, done much to place the State militia on its present footing. We refer to Gen. Bird W. Spencer, Inspector-General of Rifle Practice. Gen. Spencer is an enthusiast on military training, and many of the individual members of the State militia owe whatever success they have achieved to the personal attention given to them by Gen. Spencer. Among the other members of the staff who were prominent for their interest in promoting the interests of militia may be mentioned Gen. James M. Van Valen, Gen. E. P. Meaney, Col. John C. Owens, Col. John T. Van Cleef, Col. Wm. F. Decker, Col. A. R. Kuser, Capt. DeLancey G. Walker and others. The range superintendent, Capt. James L. Bodwell, who was prominent in years gone by as the superintendent of the Brinton range, has been in charge of the Sea Girt range since it was opened in 1884; the practical knowledge of Capt. Bodwell in range matters has been a factor in adding to the range the completeness which is to be found in all the appurtenances which go to make up a perfect range.

The opening day, Monday the 3d, was devoted to pool and continuous matches preparatory to the more serious work of the morrow, which included the Interstate and Hilton Trophy matches.

On Tuesday morning the camp was astir at an early hour and as soon as the breakfast was over the militiamen began to gather at the firing point of the 200 and 500yds. ranges, where an hour was devoted to practice and pool shooting. The conditions of the Inter-State Military match were as follows: Open to teams from each State and Territory in the United States, consisting of twelve members of the regularly organized and uniformed National Guard or militia of such State or Territory, including the District of Columbia. Distance 200 and 500yds., position at 200yds. standing; at 500 yds. prone. Weapon, any military rifle which has been adopted, authorized or issued as an official arm by any state or government. Ammunition any. Prize.—To the team making the highest aggregate score, a large bronze "Soldier of Marathon," presented by the Commander-in-Chief, on behalf of the State of New York to be shot for annually, and to be held during the year by the Adjutant-General of the State whose team may win it; value $350. Also a medal to each member of the team. The trophy was won last year (1893) by the District of Columbia team. When the hour arrived for opening the Interstate match six teams were on hand to participate, viz., Maine, New York, New Jersey, Pennsylvania, District of Columbia and Georgia.

Seven teams were entered for the Interstate and Hilton, and the members of most the teams were on the ground on Monday, in fact some of the teams had been in the camp for several days previous. Maine was represented with 12 men. The New York team came down Monday night; New Jersey had her team on the ground; Pennsylvania, District of Columbia and Georgia were also represented by strong teams.

The weather which had been threatening rain for 48 hours previous cleared away in a measure, giving a good gray light, the wind blowing lightly from 9 to 11 o'clock. Inspector General W. Choate, of the Maine team, was the first man to open the ball at the 200-yard point, scoring a bullseye. This shot was followed by a general fusilade up and down the line, and the Interstate match for 1894 was in full blast. There were no exceptionally high scores made at the 200-yard point. The highest individual score 46, was made by J. J. Montjoy, of the Pennsylvania team and Capt. C. A. Reed, of the New Jersey team; when the 200 yard stage was finished, it was found that the New Jersey team was in the lead with a total of 506 points. Maine and Pennsylvania were a tie for second place with scores of 504 each; District of Columbia team was fourth with 503; Georgia fifth and New York sixth.

At the 500-yard point the competing militiamen began to hunt the bullseye at a great rate, the first squad of the New Jersey and District of Columbia team in particular doing some fine work Col. A. R. Kuser, of New Jersey making 49, and Sergt. C. W. Dickey, of the District team making 47. The competition between New York, New Jersey, Pennsylvania and the District of Columbia teams was quite close at 500yds , the scores of these teams at this distance are as follows: New Jersey 538, Pennsylvania 532, New York 530, District of Columbia 527. The total scores of the two distances gave New Jersey 1044 points and the winner of the interstate match. Pennsylvania was second with 1036. The Connecticut team which was entered for the Interstate did not participate on account of all of the team not appearing on the ground.

RECAPITULATION.

| | | | |
|---|---|---|---|
| New Jersey | 1044 | Dist of Columbia | 1030 |
| Pennsylvania | 1036 | New York | 1020 |
| Maine | 1006 | Georgia | 1003 |

Hilton Trophy match, open to teams of twelve from the United States of America. A. The army of the United States, one team from the troops stationed within each of the three military divisions—Atlantic, Pacific and Missouri (three teams in all). B The United States Navy (one team). C. The National Guard or uniformed militia of the several States and Territories, including the District of Columbia (one from each State or Territory). The match was also open to teams from foreign countries. Distances, 200, 500 and 600yds. Rounds, 7 at each distance. Weapons, any military which has been adopted, authorized or issued as an official arm by any State or government. Prize, a trophy presented by Hon. Henry Hilton of New York to be shot for annually at Creedmoor or such other range as the National Rifle Association of America shall select, to be held during the year by the head of the corps or organization whose team may win it, to be returned to the N. R. A. at the expiration thereof; value $3,000 Also a medal to each member of the winning team. With the Interstate disposed of next came the Hilton; the fact that the contest for the Interstate had developed a close race between four of the leading teams caused a decided sensation among the militiamen and the visitors who were on the range as to which would be the winner in the coming match. The captains and members of four of the teams felt that they had an even chance in the contest, so when the first stage was opened at 200yds. every contestant was tuned up to the highest tension.

The success of the New Jersey team in the previous match seemed to have added steadiness to its members, and while none of them put up full scores the general average was so high that when the 200yds. stage was finished it was found that the New Jersey team had broken the record for all previous matches at this distance, with a score of 367. The best previous score was made by Massachusetts, 364, in 1884, and District of Columbia 364 in 1883. The men of the New Jersey team now felt that their prospects for adding the Hilton trophy to the Interstate was good. The New Yorkers and the Pennsylvanians, however, were hard after the Jerseymen, the Pennsylvania team being only 4 points behind and the New York team 8 points.

At the 500yds. point the shooting was fine and many good scores were made Sergt. R. Watkins, of the Pennsylvania team, made a full score of 35 points; three other members, Pvt J. W. Burns, Sergt. H. J. Mehard and Pvt. T. F. Shonert each made 34. Eleven of the twelve men in the team made 30 or better, the exception was Pvt. G. W. Stout, who had 28 with a miss in his scores. The total for the team was 381. The District of Columbia team shot in fine form in this stage and rolled up a total of 373 points.

The finish of the second stage now showed a decided change in the relative positions of the leading teams. The Pennsylvania team was now leading by 13 points with a total of 744, the District of Columbia team was second with 731, New Jersey was third with 726. Some of the members of the latter team took a decided drop in the last stage and the possibilities of the Hilton trophy remaining in New Jersey were decidedly uncertain. The day was getting well on towards evening and the light poor. With the opening of the third and last stage the shooting showed a decided falling off in the general average of the competing teams. The New Jersey team fell back to sixth place at 600, its total for this distance being only 324. Pennsylvania and District of Columbia run so close that the winning team could not be designated until the last shot was in the target. The two last men of the Pennsylvania team shot in fine form considering the existing conditions, each making 31. The District made a good fight but the fates were against them although they beat the Pennsylvanias on the last stage of points it was not quite enough to win. Pennsylvania closed the match with a lead of six points with a total of 1088, against 1082 for the District of Columbia team.

REGIMENTAL TEAM MATCH (INTERSTATE).

Open to teams of six from the regimental, battalion and separate company organizations of the national guard of the United States or of the U. S. army. Won in 1891, 1892 and 1893 by D. C. N. G. The weather Wednesday was cool and cloudy, with light winds blowing from 9 to 11 o'clock. At the 200yds. range the shooting was only ordinary, 44 being the highest individual score at this distance, made by Chapman and Cookson of the 2d Maine, and Cook, of the Engineer Corps, D. C. The best team total at this distance was made by the 1st Maine team with a score of 256. Troop A, of Georgia, was second with 251. The shooting of these two teams was somewhat of a surprise to the other contestants, for they had looked upon the "Yankees" and "Crackers" as not being in it at any stage. Georgia and Maine have taken but little interest in developing the shooting ability of their national guard, and whatever success has been achieved seems to be due to the efforts of the individual members

When the teams went back to the 500yds. point it was expected that a higher average would be made by those States which have given more attention to the development of their troops. It was conceded that the Engineer Corps of the District of Columbia would come out of the contest first, with Pennsylvania and New Jersey close behind. When the last shot was in the target and the scores footed up it was found that the Engineer Corps team was ahead as expected with a score of 269. The second Regiment of Maine was second with 260, and Troop A of Georgia third with 253.

The best individual scores were made by Corp. R. P. Carleton, of the Engineer Corps, with 48; Corp. E. A. Guptill, 2d Maine. 47, and Lieut. G. Kemp, 3d Pennsylvania, 47. The total for the two ranges gave the Engineer Corps, District of Columbia, first place with a total of 514. The 1st Maine team second with 507, Troop A, of Georgia, third with 502. This closed the first stage of the Interstate regimental match, the second stage was to be shot to-morrow (Thursday). The conditions called for two skirmish runs of 20 shots each.

The fact that five of the teams were close together in their totals for the first stage of the match, there being only 15 points difference between the first and fifth, caused a decided feeling of interest as to the final results on Thursday.

The first event on Thursday was to be the last stage of the interstate (regimental) match. The wind was blowing from the south and east with an evident intention of settling southeast, and the heavy clouds that shut out the sun looked rather wet, but the appearances were deceitful. There was no rain, and as Bugler Milburn, shortly after 8 o'clock, sounded the notes of assembly for the opening of the match, straggling gleams of sunshine appeared here and there through the clouds. The runs were made in rapid order, and by 2 o'clock the match was finished. The Engineer Corps, D. C., won first place; the Second Regiment, D. C., was second, and the First Maine Regiment third. Following the interstate match was an exhibition of rapid skirmish firing with the Springfield rifle by Private Wm. McClelland, of the Twenty-first U. S. Infantry. Private McClelland started out to fire forty shots in the same number of runs (10) that the troops in the interstate match had done using twenty rounds. He succeeded in firing his forty shots at the eighth halt. He fired nine shots each in two halts. His forty shots were on the target and were recorded as follows: Eleven 5s, sixteen 4s, thirteen 3s, total 158. The exhibition was not given so much for accuracy as to show how quick the Springfield could be manipulated. His style of holding the rifle was what is termed the "saw-buck." His time in firing in the two halts when he fired nine shots was 25 and 26 seconds respectively, and he claimed that had the rifle extracted the empty shells freely he could have exceeded the number of shots in each halt.

### WIMBLEDON CUP MATCH.

Open to all citizens and residents of the United States. Distance, 1,000yds. Thirty shots. Weapon, any rifle within the rules; cleaning allowed. Position, any without artificial rest. Eighteen-point handicap for military rifles; six-point handicap for special military rifles.

The Wimbledon Cup match which used to be one of the features at Creedmoor in years gone by had a larger entry this year than has been made for many years. Unfortunately, the day set for the match, Saturday, proved to be unfavorable for long-range shooting. The day opened dark and cloudy with a heavy southeast wind sweeping across the range, and to make the conditions more unfavorable, just after the match was opened a heavy shower came up which necessitated a postponement until after lunch. About 2 P. M. the match was reopened with ten men competing. The wind had increased in force since the adjournment in the forenoon and was blowing half a gale, and to still further increase the difficulties of the marksmen heavy showers again set in and continued all the afternoon; the consequence was that good scores were out of the question. Pvt. Peter Finnegan of the 69th New York Regiment won the trophy on a score of 116. S. J. Scott of the Engineer Corps was second with 106. Gen. W. S. Choate of Maine was one of the unfortunate ones who had started his score in the morning, but in resuming the shooting he found his sighting astray, and before he could get fairly on to the target he was out of the race. He shot the new Crag-Jorgensen army rifle. Mr. Appleby shot the Berthier naval rifle, .236cal. E. A. Leopold shot a .25-40 Maynard. J. C. Postell shot the plain military rifle without special sights. Scores:

### ALL-COMERS' MILITARY MATCH.

Open to everybody, distances, 200 and 300yds, position, standing at 200; kneeling or sitting at 300yds. 7 shots at each distance.

Rifles, any military rifle adopted and issued by any State. This match was another event that developed spirited competition. The best shots in the teams representing the several States seemed to feel that they individually were compelled to secure the honor of winning the All-Comers' Match. This feeling was particularly acute with those who had not secured first place on some of the other events. Five of the best marksmen on the range and representing almost as many States made a spirited effort. For the top score, this rivalry resulted in high scores. S. P. Wetherald, of the Engineer Corps D. C., shot himself into first position, beating E. A. Robertson, of Maine and F. C. Wilson, of Georgia, one point. Scores:

| | | | |
|---|---|---|---|
| S P Wetherald, D C | 33 | 31 | —64 |
| Pvt E A Robertson, Me. | 32 | 31 | —63 |
| Pvt F C Wilson, Georgia | 33 | 30 | —63 |
| Pvt P E Kent, D C | 31 | 31 | —62 |
| Gen Choate, Maine | 33 | 29 | —62 |
| J G Murray, Maine | 32 | 29 | —61 |
| W McClelland, 21st U S A. | 29 | 39 | —68 |
| Major J M Pollard | 30 | 30 | —60 |
| Col C McClay | 29 | 30 | —59 |
| Sergt C Chinn | 31 | 28 | —59 |
| Lieut G B Young | 27 | 31 | —58 |
| C P Pratt, Pennsylvania | 30 | 28 | —58 |
| Capt H R Gosser | 28 | 29 | —57 |

### REVOLVER MATCH.

Distance 20yds., 5 shots on American standard target, reduced to 100yds., position standing, off-hand, use of one arm only allowed. The revolver match received a good deal of attention and developed the fact that the military marksmen have given this arm considerable attention. Among the visitors for this contest were J. T. B. Collins of Bayonne, N. J., and C. B. Bishop, of the New York Revolver Club. Scores:

| | | | |
|---|---|---|---|
| C Richmond, Georgia | 44 | 43 | 43—130 |
| J Collins, New Jersey | 43 | 41 | 41—125 |
| Lt Phillips, 1st N. J. | 41 | 41 | 40—122 |
| C B Bishop, Clifton | 43 | 48 | 27—118 |
| Gen W Choate, Maine | 39 | 38 | 37—114 |
| Col W F Decker | 42 | 36 | 35—113 |
| C B Pratt, Penn | 39 | 38 | 33—110 |
| A S Eichberg, Ga | 34 | 32 | 29— 95 |

### DEPARTMENT OF RIFLE PRACTICE MATCH.

Open to all Inspectors of Rifle Practice and to all members of the New Jersey State Rifle Association distance 500 and 600yds., 25 shots at each distance, both ranges to be shot over the same day, any military rifle, position any. No re-entries being allowed, each competitor was compelled to nurse both his gun and his nerve. Capt. J. E. Bell, of the second District of Columbia Regiment, and Col. A. R. Kuser, of New Jersey, had a close race for first position. Capt. Bell won the trophy by 5 points. Scores:

| | | | |
|---|---|---|---|
| Capt J E Bell, 2d D C. | 115 | 111 | —226 |
| Col A B Kuser | 115 | 106 | —221 |
| Capt A H Graff | 108 | 106 | —214 |
| Lieut G B Young | 116 | 97 | —213 |
| Col J C Owens | 109 | 98 | —207 |
| Lieut-Col W S Ritter | 105 | 76 | —181 |
| Gen Spencer | 104 | 69 | —173 |

### THE SCHUETZEN MATCH.

All-comers' continuous match, distance 200yds., position standing; number of shots 7 on the American standard target, with 11in. bullseye (the bullseye including the 7 ring): any weight rifle with any trigger pull, palm or other rest allowed. When firing, the muzzle of the rifle must be kept outside the loop-hole of the shelter. The allowance for military rifles will be four points on each string. Cleaning allowed between shots. The aggregate of three scores to count for all prizes. The Schuetzen match, an all-comers' and continuous match, open during the week, was gotten up to attract the German-American marksman who use the heavy rifle with the palm rest. The Schuetzens, however, did not materialize to any great extent during the week. The only representatives of the "guild" to be seen were L. P. Hansen, of Jersey City, and E. Fisher, of Hoboken. The New York Rifle Club was represented by Messrs. C. E. Gensch and J. E. Young. Wm. Hayes, who has developed a first-class ability as a military shot and coach, returned to his old love for the time being and shot his heavy 15lbs. Schalke rifle. He made the three best scores ever put up in the Schuetzen match on this range. The military marksmen also gave this match a good deal of attention. Scores:

| | | | |
|---|---|---|---|
| W Hayes, New Jersey | 65 | 64 | 66—195 |
| L Hansen, New Jersey | 63 | 62 | 62—187 |
| E J Cram, Maine | 64 | 59 | 59—182 |
| Col W F Decker, N J. | 60 | 61 | 58—179 |
| C H Richmond | 63 | 57 | 56—176 |
| J B Taylor | 59 | 57 | 56—172 |
| C B Pratt | 58 | 58 | 56—172 |
| S P Wetherald, D C. | 58 | 54 | 54—166 |
| E Fischer | 54 | 54 | 56—164 |
| C E Gench | 53 | 54 | 54—161 |
| F C Walls | 51 | 50 | 57—158 |
| J G Dillion | 48 | 53 | 51—152 |
| O N Beach | 45 | 54 | 48—147 |
| J M Stewart | 47 | 46 | 48—141 |
| Major Harries | 36 | 49 | 40—125 |
| Gen Spencer | 44 | 43 | 37—124 |

### MEMBERS' MATCH.

Two hundred yards, open only to members of the New Jersey State Rifle Association; rounds, 7; position, standing; weapon, any military rifle. This match for the past three years has been won by Col. A. R. Kuser, and as the Colonel is one of the best military shots in the State it was expected that he would win it again this year without much trouble. Major D. A. Currie, however, was a factor in the competition this year that was overlooked. The Major won the trophy on the following score: 5 4 4 5 5 5 5—33.

### HAYES MEDAL MATCH.

Open to everybody; distance, 500 and 600yds.; prone, with head toward target, at 500, any at 600; 7 shots at each distance; rifle, any military adopted or issued by any State. This trophy was presented to the Association by Wm. Hayes, of Newark, N. J., a man who probably has a larger acquaintance among the riflemen of America than any other individual member of the fraternity. Of all the marksmen who were competing for prizes during the week there was hardly one that did not make an effort to secure the trophy. The competition was so spirited that it resulted in one full score, made by Col. A. R. Kuser, and one score of 34 by Geo. E. Cook, also one of 34 by Geo. E. Cook, of the Engineer Corps, District of Columbia. Messrs. Cook and Kuser tied on their scores, but Cook got the medal on account of his score outranking that of Col Kuser. Scores:

| | | | |
|---|---|---|---|
| G E Cook, Dist of Col. | 32 | 34 | —66 |
| Col A R Kuser, N J. | 35 | 31 | —66 |
| Sergt J C Postell, Ga. | 33 | 32 | —65 |
| Major G M Pollard, Ga. | 32 | 32 | —64 |
| Major G H Harries | 34 | 29 | —63 |
| W McClelland, U S I. | 32 | 30 | —62 |
| Sergt Brooks, N J. | 32 | 30 | —62 |

### THE KUSER MATCH.

Seven shots at 500yds., position prone, head toward target, rifle, any military, open to all comers. The Kuser match received as much attention from the competing marksmen as any other event on the programme, and resulted in one full score and five of 34 out of a possible 35. Corp. R. P. Carleton of the Engineer Corps was first and Col. E. C. Farrington of Maine second. Scores:

| | | | |
|---|---|---|---|
| R P Carleton, D. C. | 35 | 34 | 33—101 |
| Col Farrington, Maine. | 34 | 34 | 33—103 |
| Wm Hayes, N J. | 34 | 34 | 33—101 |

### TRENTON INTERSTATE FAIR MATCH.

Open to everybody, distances 200 and 300yds., carbines allowed one point on each distance. In this match two of the Georgia team came in first and second. Scores:

| | | | |
|---|---|---|---|
| F C Wilson, Georgia | 33 | 31 | —64 |
| H Blun, Georgia | 29 | 30 | —59 |
| J A Wells, New Jersey | 30 | 29 | —59 |

### THE TRENTON CUP.

Presented by Col. A. R. Kuser, to be shot for annually; to be held by the winner during the year; open to everybody; rifle, any military; distances, 500 and 600yds.; 10 shots at each distance. The Trenton cup brought together the best marksmen on the grounds in an effort to secure the prize. The honor of winning it fell to Gen. W. S. Choate of Maine. Appended will be found the scores of the principal competitors:

| | | | |
|---|---|---|---|
| Gen Choate, Maine | 46 | 40 | —86 |
| Pvt Young, En Corps, D C. | 42 | 42 | —84 |
| Pvt McClelland, 21st US Inf | 43 | 41 | —84 |
| E M Carnochan, D C. | 47 | 37 | —84 |
| P E Kent, D C. | 40 | 43 | —83 |
| Sergt McCann, 6th N J. | 39 | 38 | —77 |
| J H McGibbons, D C. | 39 | 36 | —75 |

### PRESIDENT'S MATCH.

The President's match, one of the old and popular events at Creedmoor, was put on the programme this year. This match was always popular with the militiamen, and its resumption this year brought out a stronger competition than ever. Sergeant C. W. Dickey of the Engineer Corps won first place. The conditions were seven shots at 200 and 300yds., and seven shots at 500 and 600yds. Scores at the 200 and 300yds. ranges:

| | | | | | | |
|---|---|---|---|---|---|---|
| Wetherald | 63 | Beele | 60 | Robinson | 59 |
| Wilson | 62 | Young | 60 | Pollard | 59 |
| Scott | 61 | Clay | 59 | Dickey | 59 |
| Choate | 61 | | | | |

Scores, 500 and 600yds.:

| | | | | | |
|---|---|---|---|---|---|
| Dickey | 64 | Robinson | 57 | Clay | 55 |
| Young | 62 | Wilson | 57 | Choate | 55 |
| Scott | 62 | Pollard | 55 | Wetherald | 55 |
| Bell | 60 | | | | |

## Sea Girt Echoes.

One of the pleasant incidents of the week at Sea Girt was the presentation of a gold watch and a G. A. R. suit of clothes to Capt. Jas. M. Bodwell, the superintendent of the range, by the employes. The presentation was made by Gen. Spencer.

The Georgia team was one of the most popular group of marksmen in the camp. Their week's visit to New Jersey has filled each individual member with an enthusiastic desire to come again next season. The visit of this team was made under great difficelties; they could get no appropriation from their State to pay for the expense of the journey, and each member had to pay his own way.

The men from Maine were another group who made a good impression both in their shooting and social qualities. Gen. W. S. Choate, the Inspector General of the State and Col. E. C. Farrington, Inspector of Rifle Practice, are worthy representatives of the old Pine Tree State, and the efficiency of the team in rifle practice which they brought to Sea Girt indicates that the National Guard of that State is in the hands of men who are capable of bringing it to a high state of efficiency. Maine will be represented at Sea Girt in 1895 if she realizes the value and welfare of her citizen soldiers.

The Pennsylvania team and the District of Columbia team were composed of men who are fit representatives of this glorious land of liberty. With such men in the ranks of its militia no State in the land need fear the onslaught of anarchy and socialism.

New Jersey may well be proud of the men who represented her at Sea Girt this year. Gen. Bird W. Spencer and his staff are fast bringing the National Guard into a high state of efficiency. The State camp and range at Sea Girt demonstrates the fact that the State is treating her troops with liberality. Who can demonstrate that the outlay is not well invested?

Capt. Cann, of the Georgia team, is the latest edition of the New South. If the old Cracker State would send a regiment of such men on an expedition into the North they would make a clean sweep, provided their digestive organs could hold out.

The team from New York was hardly up to par in shooting ability. With her many regiments to draw upon, she should be able to turn out a team that would be invincible.

During the week there was a straggling group about the camp with a sort of "I am lost" appearance in their manner, and as if to impress the expression upon the mind of the camp each individual had a "nutmeg" fastened to his cap. These men were the representatives of the 3d Connecticut Regiment; they were part of a team that was entered to take part in the Interstate military match, but as the rest of the team did not materialize they could not go into the match. As a regimental team they entered the Interstate regimental match, and secured sixth place in the first stage, making a total of 482; in the second stage (skirmish) they were in tenth place with a total of 694, giving them a grand total on both stages of 1,176. The shooting of the team gave evidence that it contained good material. We are of the opinion that Connecticut is another State that needs a little internal shaking up to make her appreciate the fact that her militia is worth looking after, in order to put it in condition to be useful in a time of need.

## Schlicht Rifle Club.

WEST NEW YORK, N. J., Sept. 8.—The weekly gallery shoot of the Schlicht Rifle Club held at headquarters this evening, the appended scores were made: Medal winners: Geo. Schlicht champion medal, J. Diehl first class medal, J. Schlicht second class medal, J Dedrick third class medal. Scores: Geo. Richert 225, Aug. Tribout 210, Louis Dorr 212, Wm. Schlicht 223, Jacob Diehl 231, Jacob Schlicht 234, Geo. Schlicht 242, Conrad Schlicht 215, John Dedrick 222, Aug. Meyer 222, H. Aufderheide 227, Chas. Meyer 231,

## Rifle at San Antonio.

THE long drawn contest for supremacy in the San Antonio Gun Club came to an end on Sept. 2. Each contestant put in a string of ten shots at each shoot, but before starting on the record score he must announce himself as such.

This proved to be a cruel rule to a good many. One would start in and make a rattling score, announce himself for a record string, slap in a horrible mess in ten shots, then break the record afterward. With very few exceptions the contestants put in their worst shooting when on the trophy shoot.

The rest shooting does not come up to the usual shooting strength of the club, but possibly our rest shooting is a trifle more difficult than it is elsewhere.

Mr. Arthur Guenther leads at the 200yds., rest and any, and this wins first trophy with a total of 488, an average of $97\frac{3}{5}$.

Mr. Albert Steves comes in a good second with a total of 476, average $95\frac{1}{5}$.

Mr. E. Seffel wins the trophy for best off-hand shooting, his record being a total of 362 points, average of $72\frac{2}{5}$.

Mr. G. Altmann comes in a very close second with a total of 361, average of $72\frac{1}{5}$.

The practice on Sept. 2 was spirited and good scores were made, especially at the off hand racge. 200yds, muzzle rest:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| A Steves | 9 | 11 | 10 | 10 | 11 | 9 | 9 | 10 | 9 | 10—98 |
| E Dasch | 9 | 10 | 11 | 9 | 10 | 9 | 11 | 8 | 9 | 10—95 |
| W Herple | 10 | 10 | 10 | 9 | 7 | 8 | 6 | 11 | 12 | 8—91 |
| Goldbeck | 9 | 9 | 9 | 8 | 10 | 12 | 6 | 9 | 8 | 9—89 |
| G Heye | 10 | 11 | 9 | 12 | 11 | 8 | 7 | 9 | 8 | 10—95 |

200yds, off-hand:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Texas Field | 10 | 9 | 9 | 10 | 9 | 6 | 6 | 8 | 7 | 8—82 |
| A Steves | 10 | 4 | 6 | 7 | 7 | 8 | 9 | 9 | 7 | 7—74 |
| E Seffel | 7 | 7 | 9 | 9 | 8 | 7 | 7 | 9 | 5 | 10—75 |
| G Altmann | 9 | 7 | 9 | 7 | 7 | 8 | 7 | 7 | 6 | 10—77 |
| A Guenther | 7 | 7 | 10 | 4 | 6 | 7 | 7 | 8 | 9 | 9—74 |
| A Uhl | 10 | 7 | 7 | 4 | 6 | 7 | 6 | 8 | 9 | 9—73 |

O. C. G.

## Hartford Rifle Club.

HARTFORD, Conn., Sept. 8.—I inclose you scores made by the Hartford Rifle Club at their regular bi monthly shoot this afternoon. German ring target, 200yds off-hand, weather rainy and very misty, making the bullseye at times almost imperceptible. Medal match, one entry:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| H M Pope | 21 | 23 | 24 | 22 | 20 | 23 | 24 | 24 | 25 | 18—224 |
| F K Rand | 23 | 23 | 17 | 20 | 17 | 24 | 23 | 21 | 15 | 22—205 |
| W J Dunbar | 22 | 23 | 18 | 14 | 18 | 24 | 21 | 19 | 14 | 17—191 |
| H A Fox | 16 | 22 | 21 | 22 | 14 | 21 | 9 | 19 | 22 | 20—185 |

Re-entry match: Pope 222, 216, 214. Rand 211, 214. Dunbar 183, 186. Fox 164.

Three shot handicap:

| Pope (scratch). | Rand (2 points). | Dunbar (8 points). | Fox (15 points). |
|---|---|---|---|
| 25 21 22—68 | 19 19 24—64 | 24 18 16—66 | 13 10 14—52 |
| 20 21 21—62 | 24 20 20—66 | 22 19 11—60 | 10 0 23—48 |
| 19 21 22—62 | 21 13 22—60 | 21 0 19—48 | 11 11 14—51 |
| 22 24 24—70 | 24 24 22—70 | 17 16 13—54 | 20 15 18—68 |
| 24 24 16—64 | 19 20 21—59 | 24 21 19—72 | 10 18 17—50 |
| 13 21 24—57 | 23 23 17—65 | 22 23 18—71 | |
| 21 23 21—65 | 20 17 24—63 | 14 19 24—65 | |
| 23 24 22—69 | 23 21 15—61 | 21 19 14—62 | |
| 24 24 25—73 | | 19 17 13—57 | 16 22 21—74 |

H. M. POPE, Sec'y.

## The Blumenthaler Co. No. 6 N. Y. S. B. No. 1.

HELD their yearly festival Sept. 2, at Fort Wendel; it brought together a great many good shooters. There were three prizes on the target of honor: first, J. Aigeldinger with 49; second, W. Hicks and G. Gross with 47. On the Medal Target were three: first medal, W. Hicks with 152 points; second, F. Nowicki with 152; third, H. D. Muller with 151 points. The principal part of their festival was the distributing of the six handsome silver goblets won during the summer shoot; champion cup, H D Muller 8,106 points. W. Hicks 8.105 and F. Schill, 7,952, F. Nowicki 6,517, J. Maurer 6,448 and J. Necaise 6,273.

The festival was a grand success and every one departed at a late hour all having a good time. The festival was under the management of Capt. F. Schill, H. D Muller, F. Bauernschmid, J. Maurer, R. Nolse, F. Wendel, G. Gross and J. Dux. HENRY D. MULLER

## Greenville Rifle Club.

GREENVILLE, N. J., Sept. 8.—The weekly gallery shoot of the Greenville Rifle Club held this evening resulted in the following scores: Robidoux 234, C. Boag 234, Purkess 240, Dorrler 241, Chavant 232, Daniels Renker 215, J. Boag 233, Collins 224, Scheeline 231, Agneau 229, Gotthardt 225, Graef 198, Holzapfel 221.

# Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Sept. 11-13.—INDIANAPOLIS, Ind., second annual tournament, on the grounds of the North End Shooting Club.

Sept. 19 20.—Interstate Manufacturers' and Dealers' Association's tournament, under the auspices of the Chattanooga Gun Club, at Chattanooga, Tenn.

Sept. 19-20.—OTTUMWA, Ia.—West End Gun Club's third annual tournament.

Sept. 20.—NEW BRUNSWICK, N. J.—New Jersey Trap-Shooter's League.

Sept. 20.—PENACOOK, N. H.—New England Shooting Association championship tournament, under auspices of Penacook Gun Club.

Sept. 25-20.—Rochester (N. Y.) Rod and Gun Club tournament, with Central New York League team shoot, at Rochester. J. B. Mullan, Sec'y.

Sept. 26.—Central New York Trap-Shooters' League, sixth tournament, at Rochester.

Sept. 27-28.—HARRISBURG, Pa.—Harrisburg Shooting Association; live birds and targets

Oct. 3-4.—READING, Pa.—Independent Gun Club; targets.

Oct. 3-5.—West Newburgh (N. Y.) Gun and Rifle Association tournament. Last day live birds. W. C. Gibbs, Sec'y.

Oct. 10-11.—Interstate Manufacturers' and Dealers' Association's tournament, under auspices of the Palmetto Gun Club, at Charleston, S. C.

Oct. 11.—LEWISTON, Me.—New England Shooting Association championship tournament, under auspices of Androscoggin Gun Club.

Oct. 22-24.—Emerald Gun Club tournament, at Dexter Park. Targets and live birds. Dr. G. V. Hudson, Sec'y, 9 Madison street, New York.

Oct. 24.—Central New York Trap-Shooters' League, seventh tournament, at Utica

Oct. 25.—RICHMOND, Me.—New England Shooting Association championship tournament, under auspices of Richmond Gun Club.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

1895.

April 3-5.—Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York.

May.—Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

June 19-21.—CLEVELAND, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

## DRIVERS AND TWISTERS.

The Emerald Gun Club's tournament, on Oct. 22-24, at Miller's Dexter Park, will be the first tournament of more than one day's duration ever given by a New York city gun club. Oct. 22 and 23 will be devoted to targets. On Oct. 24 the Empire City handicap will be shot off, 26 to 33yds. handicap, boundary 80yds., entrance $10, birds extra, class shooting, 4 moneys, 4 misses out, gun in any position, The Emerald Gun Club adds $100 to this event. Handicapping committee: T. H. Keller, W. Fred Quimby, Milt Lindsley, G. V. Hudson, M.D., and Louis H. Schortemeier. Forfeit $3, to be sent with entry to G. V. Hudson, M.D., 9 Madison street, New York city. Entries close when first gun is fired. The first 15 birds of the handicap will constitute another event, extra entrance money, straight shooting, high guns to get the money, entrance to either or both optional. Handicap unknown to shooter until he steps to the score. "Tee Kay" will manage the contests, both for targets and live birds.—LOUIS H. SCHORTEMEIER, Chairman Tournament Committee.

A word as to the management of the New London tournament. Penrose, of course, was the general manager and hustler of the shoot. By the time set for the opening of the tournament everything was in

working order. Screens, painted a dark green, shielded the trapper boys, who stood up to their work, a deep trench having been dug the whole length of each screen. This trench not only permitted the trappers to attend to business standing up, but also allowed "John" W. Dunbar, the superintendent of the factory, to get around from trap to trap when any attention was needed. In the cashier's office, Jas. W. Clinton took the entries and arranged the squads, while Mr. Benjamin Lee looked after the paying out of winnings. The cashier's office, together with the blackboards and manifold tables, were placed between the two sets of traps. At the upper set of traps, James Hammill, as referee, called out "dead" and "lost," according to the old style; Frank M. Curtiss acting as referee at the lower set and using the more modern horn and bell to denote breaks and misses. Referees' work was by no means easy, fractional breaks of a very slight character being quite common.

On Sept. 21, the day following the close of the Interstate Manufacturers' and Dealers' Association's tournament at Chattanooga, Tenn., the Tennessee State shoot will be held on the same grounds. All events are at known traps, unknown angles, and are open to residents of the State only. Event No. 6 on the programme will be a team shoot, teams to be composed of 6 men each, 15 targets per man, known traps, unknown angles, amount of entrance fee and character of trophy to be agreed upon, winning team to be given certificate, trophy to be open to competition on terms to be agreed upon on evening of 20th by representatives of competing teams.

"Bilderback's Trap-Shooter's Memorandum" is the latest thing in a trap-shooter's line. The memorandum book contains columns for the entry of targets in each event, number broken, entrance money, money received, amount won, amount lost, and remarks. The book, which is 4½in. by 2½, contains a number of pages sufficient to cover fifteen days' shooting. The idea has been copyrighted by "Bilderback," Charles Fehrenbach, Fourth and French streets, Wilmington, Del.

It a was Heikes tournament at New London. Rolla carried off the Standard Keystone trophy on the first day with 69 out of 75, after a tie with Col. Anthony; the L. C. Smith trophy on the second day with a total of 46; on the third day he won the Winchester repeating shotgun with a clear score of 25, and the Peters Cartridge Co.'s trophy with 47 out of 50.

The first week of October, 1895, has been claimed by the Keystone Shooting League, of Philadelphia, as the week in which it will hold the annual tournament of the Pennsylvania State Sportsmen's Association. The club's grounds are at Holmesburg Junction, on the line of the Pennsylvania Railroad.

The Ohio Trap-Shooters' League have fixed upon May 15-16, 1895, as the dates on which their next annual meeting and tournament will be held. The tournament will be under the auspices of the Buckeye Gun Club of Dayton.

The next contest for the club championship of New Jersey takes place on Saturday, Sept. 15, at Rutherford. The fight next Saturday is apparently between the Boiling Springs and Climax gun clubs.

The Mt. Kisco Rod and Gun Club, of Mt. Kisco, N. Y., will hold its fall tournament at its shooting park on Sept. 20 and 21. For programmes address H. E. Wood, secretary.

The Worcester Sportsman's Association, of Worcester, Mass., is holding a tournament this week. Among those who will take part are Heikes, Van Dyke and Bartlett.

New Brunswick, N. J., has been chosen as the scene of the next meeting of the New Jersey Trap-Shooters' League, Thursday, Sep. 20.

Don't forget the Interstate Manufacturers' and Dealers' Association's tournament at Chattanooga, Tenn., on Sept. 19 and 20.

Straight scores were exceedingly rare at New London when the high class of shooters present is taken into consideration.

EDWARD BANKS.

## The Proposed International Contests.

THE mere mention of the possibility of a meeting between the live bird shots of the United States and Europe has aroused a remarkable degree of enthusiasm. The subject has been a fruitful topic of conversation among trap-shooters for the past ten days, and the unanimous wish of all is that such a meeting may take place.

The idea is still in embryo, nothing beyond the simple preliminaries in the way of sounding the feelings of the Europeans on this matter having been done. Mr. J. Seaver Page, one of the most expert live bird shots in this country, is the prime mover and agitator of the plan to bring about an international series of live bird matches. But Mr. Page does not stand alone; he is ably seconded by Messrs. Edgar Murphy, Fred Hoey and others, every one of whom is anxious to try conclusions with the foreigners at the traps.

Mr. Page expresses himself as more than hopeful of a successful outcome of the preliminary proceedings. When in England recently, while taking part in the events of the international week at Hurlingham, and at the Gun Club, Mr. Page broached the subject of an international contest to members of both clubs. Capt. Forester Leighton, Capt. Shelley and Mr. Hopwood of the Hurlingham Club, Messrs. Robert Beresford and the McCorcodale brothers of the Gun Club, at once became interested in the affair and may be trusted to do their share toward bringing off the series of matches which it is proposed shall be held.

An excellent feature is the interest displayed by some of the most noted French experts, Messrs. Journu, Gervais and Drivon. France can unquestionably select a strong team to uphold the honor of the tricolor; a glance at the records made by the Frenchmen during the recent international week readily shows what they can do.

Italy could also furnish her quota toward a team in an international contest. Signor Guidicini has many compatriots who know how to handle the shotgun effectively at live birds.

There has been some talk about amalgamating the gun clubs of the different countries of Europe, and making the match one strictly between the United States and Europe. Englishmen and Frenchmen, however, do not favor this plan, but prefer to make it a team race of an international character. The trophy to be shot for, it has been suggested, shall be a cup or something of that nature, the team which wins it a certain number of times to become the ultimate owner of the cup or trophy.

Although, as has been said, everything is as yet in a state of uncertainty, the scheme may take on a more tangible shape at any moment. One thing is certain, however, and that is, that the United States of America stand ready to put a team in the field either against the combined clubs of Europe or in a purely international contest.

## Trap at San Antonio.

SAN ANTONIO, Texas, Sept. 2.—The trophyy shoot of the San Antonio Gun Club is narrowing down to a few contestants. The conditions of the contest are somewhat peculiar, the trophy going at the end of the season to the shooter credited with the highest number of wins in the various trophy contests. J. N. Rothwell leads with 4 wins, closely followed by Abe Samuels, August Thiele and A. C. Paris; Mr. Paris' score in the shoot of Sept. 2, placing him only one behind the leader. The shoot is at 20 singles and 5 pairs. Considerable betting on the ultimate winner of the trophy is being indulged in, Mr. Samuels being apparently the choice of his clubmates, while outsiders seem to fancy the chance of Mr. Rothwell. All things considered the race is an open one but the end is near. The following are the scores made on Sept. 2: No. 1, 10 singles and 3 pairs: France 11, Samuels 11, Paris 8, Rothwell 9, Smith 13, Veith 12, Thiele 10, Cann 9. No. 2, 15 singles: France 8, Samuels 8, Paris 12, Rothwell 11, Veith 9, Thiele 8, Epstein 11, Vollbrecht 6, Smith 10, Grossman 10, Shields 10, Cann 5. No. 3, for trophy, 20 singles and 5 pair, first class: Samuels 23, Rothwell 23, Thiele 17, Veith 25, Paris 26, France 24. Second class: Smith 21, Vollbrecht 17, Epstein 14, Shields 17, Grossman 13, Barr 22, Cann 12, Weyel 12, Rahmsdorf 16. No. 4, 30 singles: Paris 18, Rothwell 24, Thiele 21, Vernor 25. No. 5, team shoot, 15 singles: Rothwell, captain 14, Paris 11, Vernor 11, Smith 10, Epstein 14, Rahmsdorf 7, Meyel 7; Total, 74. Samuels, captain 9, France 12, Thiele 8, Veith 12, Barr 5, Shields 6, Cann 8; Total, 60.

## New Utrecht Gun Club.

THE New Utrecht Gun Club has issued its schedule of fixtures until Dec. 31, when the club year ends. Several valuable prizes are offered for competition both at live birds and targets. Mr. C. Furgueson, Jr., has presented a cup representing the championship of the club at live birds for 1894. The cup, which is called the New Utrecht cup, is shot for under club rules and club handicaps, and will be awarded to the member making the highest average in two-thirds or more of the club shoots held. Each shoot will be at 10 pigeons. The club will award a second prize to the member making the second highest average during the year, under conditions same as provided for the New Utrecht cup. The E. C. Powder cup is of sterling silver, to be shot for under New Utrecht Gun Club rules and handicaps. Shoots will be held every month, and the cup will become the property of any member winning it three times in succession. Each shoot for this cup will be shot as a sweepstake ($3 entrance), and from each sweep will be taken the sum of $5, which will go with the cup to the member eventually winning the latter. As prizes for inanimates, the club will present to the two members making the first and second highest averages for the year suitable prizes or trophies, as heretofore. If sufficient interest is taken in these shoots, they hope to give a handsome sterling silver cup to the winner of the first prize. The opening shoot of the club at targets takes place next Saturday afternoon, Sept. 15, on the Third avenue grounds.

## Endeavor Gun Club.

THE Endeavor Gun Club, of Marion, N. J., held an all-day shoot on Labor Day, Sept. 3. The entry list was large, some thirty-seven shooters taking part in the programme events. The score sheet for event No. 1 having been mislaid, that column must remain a blank. A glance at the other totals will show that the boys were not only finding the empire targets, but were cracking them. This was only to be expected, as the company was pretty warm. Among those present were Breintnall, Van Dyke, Bartlett, "Shorty," Hoffman, Capt. Money and his son Noel, Drake, T. W. Morfey, Brantingham, Richmond, Youmans and Eddie Collins. In No. 7, at 25 targets, there were eighteen entries, making a total of 450 targets thrown during the race; of that number 383 were broken, making the percentage for the eighteen shooters of a trifle over 85 per cent. In addition to the twelve events on the programme three extras were shot off. The weather of course was all that could be desired.

The conditions under which the programme events were shot were varied: No. 2 was everything known; No. 3, unknown angles; No. 4, expert rules; No. 5, expert rules; No. 6, everything known; No. 7, everything known; No. 8, everything known; No. 9, everything known; No. 10, expert rules, use of both barrels; Nos. 11 and 12, everything known. Scores:

## The Americans on British Trap Grounds.

*Editor Forest and Stream:*

I regret exceedingly having ever publicly criticised the treatment accorded to Americans at the Gun Club and Hurlingham. Having been a guest at those clubs, no matter how contemptible the treatment, I should have remained quiet. To club men, I apologize for the "break." To sportsmen, in closing this controversy finally, I give a few plain statements, and they may decide for themselves whether Capt. Money in his recent letter to your paper states facts or fiction. The statements in the newspapers were incorrect. Following is my version of the affair:

First—Mr. Welch, *mirabile dictu*, now indorses Capt. Money's letter, though disgusted at the treatment he received, announced on the Gun Club grounds Tuesday, June 26, "I have enough," stopped shooting, and, although he went to London especially to shoot during International week, June 25 to June 30, he did not again shoot until the last day. I personally engaged Mr. Welch's return passage at his request for July 18. He, however, left England July 4. Mr. A. Clinton Wilmerding, president of the American Spaniel Club, Mr. E. L. Post, and, I think, Mr. Alburger, will confirm the above.

Second—Capt. Money told me he was thoroughly dissatisfied, said we were all badly handicapped, and stated that although he had tried, he could not succeed in having our handicaps changed.

Third—The *Shooting Times and British Sportsman*, of June 23, 1894, espoused our cause, and issued the following in connection with the scores of one of the shoots in which one of our party had divided the stake: "We were extremely glad to see one of the visitors to the fore, as we consider them very severely handicapped, which is scarcely the way to encourage them or others to come again. Twenty-seven yards is a fair mark to start a stranger till one sees what he can do; then, if he wins a good prize or shows very marked superiority, put him back a bit. But give him a chance to start with; and it seems rather rough on foreign shots, who come immense distances to compete with us, to be stuck on the back marks to begin with, however fine shots they may be."

Fourth—The statements relative to the 2yds. difference in distance of trap from handicap mark at Hurlingham, also the changing of the trap-puller at the Gun Club were made by Mr. Post. No reflection was cast upon the Hurlingham Club as the captain implies, Mr. Post simply said that the 2yds. was a greater handicap to the long-distance men than to the short. The changing of the trap-puller at the Gun Club certainly gave good grounds for our suspicions and confirmed Capt. Money's warning to us mentioned later in this letter. We were singularly unfortunate (?) in drawing end traps and hard birds, and one day a record was kept and members of our party drew end traps time and time again, and this in connection with the strong wind blowing, certainly was an additional handicap to the unfair handicap marks from which we were shooting. We were not alone in our suspicions, for I myself overheard conversations among Englishmen on the subject. Mr. Post says the trap-pulling was denounced by certain shooters friendly to us, the result being that the trap-puller was removed. This occurred near the end of our shooting. I was not present at any meeting, but know the trap-puller was removed and a new man put in—certainly some one must have felt as we did in the matter and followed it up. The man certainly was not removed without cause. Now let me give you Mr. Post's experience after the puller had been changed. He states he went to the score and shot; he drew an inside trap, the first, he said, for some time, and upon turning to leave the score, three gentlemen came out from behind the railing and congratulated him upon his having drawn other than an end trap. Isn't this a peculiar and suggestive occurrence? Does any one who may read of this experience of Mr. Post's believe otherwise than that we were discriminated against?

Fifth—In making public the following, I beg to state that it is done with regret and only after careful consideration. I have never before made public anything told me in confidence, but after the reflections Capt. Money has seen fit to cast upon me, all fair-minded men will agree that the situation warrants it. One evening on board the Britannic talking over pigeon shooting—this on our way to Europe—the Captain stated that the end traps would certainly be pulled for us at critical times; to be plain, we must expect it, as he knew the trap-puller, and we would surely be discriminated against, and wound up his statement by saying that "the worst of it is the trap-puller was formerly my gardener, and I got him his position there." Now, in connection with this, does any one believe that the Captain told this in fun? Not much; he gave it out as positive. He has shot on these same grounds for years, and he must have had some good reason for warning us as he did. Now, however, he says the opinions I have expressed are absurd; possibly they are, but he certainly then held the same views and now publicly seems to have changed for reasons best known to himself.

In conclusion I desire to say that by many we were treated very cordially, among them being Capt. Leighton, Capt. Shelley, Lord Westbury, Capt. Harvey, Mr Sutcliffe, Mr. Noakes, Mr. Walter Smith, Col. Salkeld, Sir Geo. Buckanan, Mr. Martin and Mr. Eley.

All of the above is indorsed by Mr. Post, and such parts as refer to Mr. Wilmerding, by him.

FREDERIC G. MOORE.

## Wilmerding Gun Club.

WILMERDING, Pa., Sept. 1.—The Wilmerding Gun Club held a one-day shoot on this date. The conditions of the shoot were, professionals barred, known traps and angles, bluerock targets, winners of first and second moneys in any event to shoot next event under expert rules. The winners in the various events were as follows:

No. 1, everything known: A. Mackert 7, Bell 7, J. Gilm 6, Nelson 6, McEntosh 5, Skillman 5.

No. 2, same: A. Mackert 9, Hamilton 9, McEntosh 8, Lovett 7.

No. 3, 15 targets: Hamilton 13, Lovett 13, Gilm 13, Nelson 12, Skillman 11, Bell 10.

No. 4, 10 targets: Hamilton 9, McEntosh 8, Skillman 7.

No. 5, 10 targets: Nelson 10, Gilm 8, Bell 8, Messner 7.

No. 6, 20 targets:

Bell.....00101111111111111000—14

No. 7, 10 targets: Bell 9, Nelson 6, Jones 9, Gilm 8, Messner 7, Skillman 7, Lovett 7.

No. 8, 10 targets: Lister 10, Skillman 8, Gilm 8, Messner 8, Hamilton 8, McEntosh 7, Bell 7.

No. 9, 15 targets: Scott 15, Boyd 14, Armstrong 13, Nelson 12, Lovett 12, Jones 12.

No. 10, 10 targets: Nelson 9, Armstrong 9, Hamilton 9, Gilm 8, Bell 8, Scott 7, Boyd 7, Rhinehard 6, Lister 6.

No. 11, 10 targets: McEntosh 9, Hamilton 9, Boyd 8, Armstrong 8, Nelson 8, Jones 8; Scott 7, Rhinehard 7, Wilson 7.

No. 12, 10 targets: McEntosh 10, Bell 10, Rhinehard 9, Hamilton 9, Armstrong 8, Scott 8.

No. 13, 15 targets: Skillman 14, Boyd 13, Armstrong 13, Hamilton 13, Wilson 7, McEntosh 7.

No. 14, 10 targets: Skillman 9, Hamilton 8, Wilson 7, McEntosh 7.

No. 15, 10 targets: Armstrong 10, Skillman 9, Bell 7, McEntosh 7.

A. A. MACKERT, Sec'y.

## Rye Gun Club.

RYE, N. Y., Sept. 3.—The Rye Gun Club was organized Aug. 30 with the following members: Leroy Gamen, Michael Doyle, Peter Hodgins, Wilbur Lyon, John Billington, Jr., William Allen, Harry Billington, John Budd, Samuel Gedney, Frank Field and Edward J. Pope. The officers elected were: President, Leroy Gamen; Vice President, John A. Billington, Jr.; Secretary, Edward J. Pope; Treasurer, Wilbur C. Lyon. Directors: John A. Budd and John S. Gedney; Captain, Michael Doyle.

The club have leased very pleasant grounds and propose to erect a suitable club house as soon as possible. Weekly and monthly trophy shoots will be held throughout the season.

The following scores were made at the opening shoot on the above date:

No. 1, 5 live birds:

| | | | |
|---|---|---|---|
| W Lyon | 10111—4 | J Bulkley | 11011—4 |
| J Budd | 11011—4 | M Doyle | 01101—3 |
| E Pope | 11010—3 | L Gamm | 00111—3 |

No 2, 5 live birds:

| | | | |
|---|---|---|---|
| J Budd | 11101—4 | L Gamm | 01011—3 |
| E Pope | 11100—3 | W Allen | 10111—4 |
| J Bulkley | 11101—4 | R Held | 11110—4 |
| M Doyle | 11011—4 | | |

No 3, 5 live birds:

| | | | |
|---|---|---|---|
| J A Budd | 11111—5 | J W Bulkley | 11111—5 |

No. 4, 10 targets:

| | | | |
|---|---|---|---|
| L Gamm | 0110010011—5 | R Held | 0010110110—5 |

## Championship of British Columbia.

VICTORIA, B. C. Aug. 26.—The one hundred bird match for the provincial championship was shot over the traps of the Union Gun Club at Oak Bay yesterday. The day was an almost perfect one, the contestants in fine form, and as a result some remarkable shooting was done. J. C. Maclure, with a score of 93, broke the record for British Columbia, this being the highest score ever made in the province; F. S. Maclure took second place, with a score 88. He broke the last 46 targets straight, the longest run ever made in any match in British Columbia. J. C. Maclure and F. S. Maclure each broke 48 out of the last 50 targets. The result of the match is to give J. C. Maclure the B. C. Championship for 1894. F. S. Maclure still claims the live bird championship, no contest having taken place since 1893. The winner of match, Mr. J. C. Maclure, receives a neat gold badge beautifully engraved and bearing the inscription set in blue enamel, "Championship of British Columbia, 1894." The days scores are as follows:

J C Maclure.....1111111111011111011111011111111111100111111111111111

## Adams County Sportsmen's Association.

HANOVER, Pa., Sept. 4.—The annual picnic of the Adams county sportsmen was held yesterday in the beautiful grove of Hon. W. H. Dicks, on the bank of Himes' Dam. There was a good attendance of the sportsmen of the county and also a number of visitors from other counties were present. In all, about one hundred persons enjoyed the sport of the day.

After the annual business of the organization had been transacted, the remainder of the day was spent in shooting live birds, over 600 live pigeons being used. The following are the scores in the three shoots:

No. 1, 5 live birds: I. Hoecht 4, A. Jacobs 4, C. D. Wisler 4, C. W. Malaun 5, C. Gochnauer 5, G. M. Jacobs 4, G. B. March 4, S. E. Weaver 5, J. R. Darone 5, H. F. Wehler 5, C. C. Spangler 5, L. Pottroff 5, C. S. Shirk 7, J. F. Bucher 3, D. K. Gotwald 2, A. E. Wireman 5, E. E. Albert 5, C. C. Weaver 4, R. Ertter 3.

No. 2, 10 live birds. R. Ertter 8, A. Jacobs 9, E. Fissel 8, H. G. Wehler 9, C. Gochnauer 8, J. R. Darone 10, L. Pottroff 8, F. Morrison 6, A. E. Wireman 10, S. E. Weaver 4, C. S. Shirk 10, J. F. Bucher 8, D. K. Gotwald 8, C. C. Spangler 6, G. M. Jacobs 9, L. Reinecker 8, C. D. Wisler 6, J. Morrison 10, G. B. March 8, W. H. Dicks 10.

No. 3, 9 live birds: A. E. Wireman 7, R. Ertter 6, E. Fissel 7, G. M. Jacobs 9, J. R. Darone 8, D. K. Gotwald 5, S. E. Weaver 8, C. S. Shirk 9, L. Reinecker 8, J. Menges 3, G. Wolford 9, J. F. Bucher 4, H. G. Wehler 7, J. Wolford 4, J. Morrison 7.

## NEW LONDON, CONNECTICUT.

THE seventh annual tournament of the Standard Keystone Company was brought to a close on Friday evening last, Sept. 7, after four days of a continuous fusillade at targets. In one respect the tournament was a curiosity—the way the targets got away from the "cracker-jacks" was a caution. Mr. H. A. Penrose, of the Standard Keystone Company, managed the tournament, and kept things running at a rate that gave those present all the shooting they wanted each day by at least one hour before sundown. But Mr. Penrose had been asked to make the shooting hard, and he succeeded in doing as he was requested. The conditions of the tournament were everything at unknown angles, experts 18yds. rise, the balance at 16yds. The new model of keystone traps, with the company's electric pull attached, were used and were keyed up to the top notch, targets being thrown 70 and 80yds. The combination was too much for the vast majority of shooters present; so much so, in fact, that on the third day experts were advanced to 16yds., the others moving up to the 14-yard mark.

That the poor records made on the first two days were not wholly attributable to the extra two yards is conclusively proved by a reference to the scores after the change had been made. There was something else at fault, and what that was puzzled, and still puzzles, many of those who put up their money and shot through the programme. The location of the traps probably had a good deal to do with it.

The tournament took place about two and one-half miles from New London along the line of the electric railway that runs to Ocean Beach. Two hundred yards to the right of the streetcar line, up a hillside that was sufficiently steep to cause a quickening of the breath on the part of those who had an abundance of adipose tissue, a line of tents showed where the tournament was to take place. Parallel with the slope of the hill stood the screens behind which the two sets of traps were located, No. 5 trap in each set being considerably more down hill than No. 1. The shooters, too, stood lower than the traps, and shot up hill, the hillside being rounded off. Whether these two circumstances were to blame for the scores or not, will probably never be settled. At any rate it was claimed, and the claim seems reasonable, that the flight of the targets from traps so located must necessarily be deceptive; left-quarterers, that climbed the hill, in reality being thrown much higher than they appeared to be, while right-quarterers, which followed the slope of the hill, were really dropping much faster than most people imagined. The question was thrashed out over and over again during the four days of the tournament, and at the end the positive answer had not yet been given.

The chief results of the tournament was to place Rolla Heikes and his Winchester on a higher plane than ever, putting him practically in a class by himself, and, also, to show that 10-gauges should scarcely be allowed to stand on an equality with 12-guage guns. Glover and H. G. Wheeler are both excellent target shots; to use an accepted term, "they're about as good as they're made." These two experts wield 10-gauge guns and wield them effectively. The increased powder charge which they can use in their weapons and the larger dose of shot which they are consequently able to hurl after the targets, must necessarily give them a larger effective killing circle over their 12-gauge companions who stand on the same mark. The opening event on the

*First Day.*

was an extra, the regular programme being held back a little to allow the shooters from the State of Connecticut to arrive at the grounds. It was fully 10:30 before the first regular event was called. By that time it had been discovered that something was wrong, ciphers were far too common. Glover shot well, but he had the advantage of shooting the first two regular events at the 16yds. mark, going straight in each event. He was then transferred to 18yds. and shot there, except in the trophy events, until the close of the second day, when he and Wheeler were moved up to the 16yds. mark together with the other experts. This class was composed of Heikes, Dickey, Van Dyke, Bartlett, H. G. Wheeler, Upson, E. D. Fulford, Glover, "Jones" and "White."

The race for the Standard Keystone trophy brought out 23 entries, Heikes and Anthony tieing with 47 each. In the shoot off at 25 targets Heikes won with 22 to the Colonel's 20. For the Lovell diamond bicycle, Gates and Risley tied with 24 each. The tie was not shot off, Gates giving Risley value received for his chance. Scores:

*Second Day.*

The second day was much the same as the first in every condition, save that there was more wind. The sun barely showed himself for more than a few minutes, and barring the wind everything was favorable for good scores. Wheeler broke 182 out of the 210 called for in the regular programme events, beating Heikes and Upson by one target, each breaking 181. Wheeler won the Colt hammerless gun donated to the highest scorer in the third event, breaking 23 out of 25, Heikes, Gates and Savage were only one target behind him with 22 each. In the State team race the Boston Shooting Association team gained one target on the leaders, breaking 102 to the Oneida county team's 101, leaving the New Yorkers two targets ahead on the two days' shoot. Thirty-seven shooters took part in the programme events, the entries averaging throughout the day about 24 in each event.

The L. C. Smith trophy, won last year by Mr. O. R. Dickey, of Boston, with a score of 49, was won by Heikes with 46 breaks, Colonel Anthony, Upson and Savage taking second place with 45 each; Dickey was third with 43.

Among the new arrivals on this day was Captain Money, of the American E. C. Powder Co., who found the targets just as difficult as the rest of the boys. Scores:

*Third Day.*

Early this morning the weather looked threatening; the wind had shifted completely around and came directly across the traps from the east. A few gentle showers did fall while some of the first events on the programme were being decided, but toward noon the sun came out and the afternoon was simply a perfect one for breaking targets. The wind died away to nothing and the Sound at the back of the shooters was as calm as a duck pond.

According to the arrangement announced the previous evening, amateurs moved up to the 14yds. mark, experts taking their stand at 16yds. Better scores were the natural result but still nothing of a phenomenal result was recorded. Forty-five shooters took part in the programme events, the entries averaging nearly twenty-seven.

In event No. 3, 25 targets, Winchester repeating shotgun added, Heikes came out ahead with 25 straight, Wheeler and Willey being second and third with 24 and 23 respectively. In connection with this race a rather amusing incident occurred. Heikes had left one of his guns down town—his favorite gun. Finding he was not doing well with the one he had with him he dispatched a boy to New London for the other. Just as Heikes was stepping to the score to shoot his string, the boy was seen running up the hill from the streetcar track with Rolla's winning gun In two minutes it was out of the case and the result was as above—25 straight.

The State team race left the New York team with ths substantial lead of 11 targets for the Bostou men to overcome on the last day. Strangely enough, all through these contests E. D. Fulford was the weak man on the New York team. E. D. has shown conclusively of late that he is an expert target shot, but he had a hoodoo with him at New London, and he couldn't down it.

In event No. 7, Peters Cartridge Company's trophy, Heikes was once more to the fore with 47 out of 50. Van Dyke, who shot more like himself in this event, and Glover, tied for second place with 45. Col. Anthony was third with 44, dropping his forty-second, forty-third and forty fourth targets, when he had a good chance to once more tie Heikes. The colonel's work in the trophy events to date is worth looking at, showing as it does what the Tarheel State representative can do when it comes to a long race. In considering the scores made by the shooters, it should be remembered that all events throughout the tournament were at unknown angles

Among the new arrivals to-day were W. M. Thomas of the U. M. C. Company, and his son. Young Mr. Thomas is not a shooter, but he can ride a wheel, coming from Bridgeport to the Pequot House, New London, 72 miles, in about eight hours. A. C. Courtney of the Lefever Arms Company, put in an appearance late in the afternoon, but did not shoot.

*Fourth Day's Scores.*

The programme as arranged for this day called for 215 shots, the special events being the fourth round in the State team race, the team race between East and West, and the 100 target race for the championship of the United States. The most important additions to the list of shooters were "Milt" Lindsley and A. G. Courtney, both of whom dropped in for the last day of the tournament.

The race for the individual championship resulted in a victory for Glover by one target. His winning score was 93 as against Connor's 93 last year. Heikes and Wheeler were close up with 92, Wheeler dropping his 100th target. Upson was third with 90, E. D. Fulford fourth with 88, Bartlett and Gates dividing fifth money, with a score of 86. The conditions of this event, as stated in the programme, are that it shall "determine who is the champion target shot of America from year to year. The prize is a handsome diamond ring, that is duplicated each year, and becomes the personal property of the winner. The conditions are 100 targets, open to the world, entrance $5. Rule, known trap, unknown angles, purse divided, 40% to second, 30% to third, 20% to fourth, 10% to fifth." As will be noted, the 10-gauges were away up in front.

The result of the State team race is given in detail below, the Oneida County Sportsman's Association winning the carload of targets. The team race between East and West was not shot.

Below is given a summary of the programme events on this day's card:

This contest resulted in a win for the Oneida County Sportsmen's Association of New York State by the small margin of 6 targets, the Boston Shooting Association, of Boston, Mass., making a grand rally on the fourth and last day. The following is a summary of each day's work, with the totals:

| | Oneida County Sportsmen's Assoc'n. | Boston Shooting Association. | Connecticut State Team. |
|---|---|---|---|
| First day | 109 | 106 | 100 |
| Second day | 101 | 102 | 87 |
| Third day | 101 | 92 | 82 |
| Fourth day | 105 | 110 | 90 |
| | 416 | 410 | 359 |

The Worcester Sportsmen's Association shot in this race, making 88 on the first day; it then withdrew. A team from Rhode Island shot on the second day, scoring 62.

The individual scores of the members of the winning team are: Glover 92, Gates 88, Bartlett 84, J. Fulford 81, E. D. Fulford 71. Glover's 92 is the top score in the race, Wheeler, of the Boston team, being a good second with 91.

No. 6, individual championship of the United States at targets, 100 targets per man, known traps, unknown angles, open to the world entrance $5. First prize, diamond ring; purse divided, 40% to second highest score, 30% to third, 20% to fourth and 10% to fifth. 18 entries:

## Northville Gun Club.

NORTHVILLE, Mich., Sept. 3.—The Northville Gun Club held its first tournament on the club grounds at Northville, Mich., on Aug. 30 and 31. It was pronounced by all shooters present, some sixty in number, one of the pleasantest and most successful shoots they had ever attended. The attendance was not quite as large as was expected, but this is attributed to the fact that duck shooting commences on Sept. 1 and many sportsmen, who would otherwise have been on hand, had made arrangements to go to the marshes on those dates to be ready at break of day on Sept. 1. It was an enthusiastic gathering, however, and the visiting shooters were loud in their praises of the courtesies extended by the Northville Club. There were eleven events on the card each day, the Parker handicap governing all sweepstake events.

The grounds are located but a short distance from the hotel—a ride of a few minutes and you are there. Bluerock traps and targets were used. The traps were placed on a low piece of ground called Yerke's Flats. The background was poor as there were high hills heavily wooded directly in front and to the right of the traps. All the shooters except a few were using black powder, but before the day was over Mr. John Parker convinced many of team that the only load to use was American wood powder loaded by the Chamberlin Cartridge and Target Co. in Winchester shells.

Among the trap shots present were W. R. Hobart, representing the Winchester Repeating Arms Co.; Mr. John Parker, with his L. C. Smith gun, American wood powder and the Chamberlin Cartridge and Trap Co. load; Messrs. Renick, Marks, Klein, Brady, of Detroit, Mich.; Mr. Donaldson, of Windsor, Ont.; Mike Low of Milford, Mich., Osmun, Windate, Linderman, Giddings, Stewart, Webb, Cooper, Cutchler, North, of Pontiac, Mich.; Shaw, Hicks, of Novi; W. S. Yerkes, Thornton, Butler, Green, Hueston, W. H. Yerkes, R. C. Yerkes, Simmons, C. Harrington, Harmon, Gilder, of Northville. The following are the scores:

*First Day.*

No. 1, 10 targets, entrance $1: Parker 8, Thornton 9, Hueston 8, W. Yerkes 6, Clay 7, John Shaw 7, Donaldson 10, Klein 9, Harmon 8, Butler 7, Hobart 9, Renick 19, Low 8.

No. 2, 10 targets, entrance $1: Hueston 6, Harmon 9, Parker 8, Butler 8, Green 9, Windate 7, Linderman 3. Webb 4, W. H. Yerkes 8, Harrington 3, North 7, Osmun 5. W. G. Yerkes 9, Giddings 5, Cutchler 9, Hobart 9.

No. 3, 10 targets: Klein 10, Thornton 7, Hobart 7. Harman 7, Yerkes 7, Cutchler 7, Green 5, Stewart 7, Low 9, Wakely 7, Kemmel 8, Stewart 9, Clay 8, Cooper 7.

No. 4, 10 targets, entrance $1: Klein 9, Clay 6, Cooper 7, Linderman 6, Yerkes 9, Giddings 7, Osmun 9, Wakely 8, Thornton 7, Webb 9, North 6, W. H. Yerkes 7, Rennick 9, Hueston 8, Butler 8, Donaldson 8, Parker 7, Windate 7.

No. 5, team race, Detroit and Northville:

Detroit.

Harmon.....11011101111101l—12
Osmun.....10110101101111—11

With the last event ended the day's shooting. The farmers in the vicinity of the village were in great hopes that the tournament would act in the capacity of a rainmaker, but were doomed to disappointment. In the evening the visiting shooters were pleasantly entertained by the Northville Gun Club in their club parlors.

*Second Day.*

No. 1, 10 targets, entrance $1. Renick 10, Donaldson 8, Kline 8, Parker 8, Butler 9, Gilder 7, Hobart 10, Osmun 10, Harmon 9, Windate 7, Cutchler 8, Clay 8, Webb 8, North 8, Cooper 2.

No. 2, 10 targets, entrance $1. Green 8, Thornton 8, Kimmel 5, Linderman 4, North 10, W. G. Yerkes 7, Clay 8, Stewart 7, Giddings 6, Webb 4, Hueston 7, Gilder 4, Windate 7, Cooper 4, Kline 8, Donaldson 9, Parker 8, Cutchler 8, Hobart 9, Renick 6, Osmun 7, Butler 5, Harmon 6.

## Sturgis Gun Club.

STURGIS, Mich., Sept. 1.—Inclosed find scores made on the first day of the Sturgis Gun Club's annual tournament. The shoot was held on the club grounds near this city. All events were shot at known traps and angles. Many shooters absented themselves from this tournament owing to a report that small-pox had broken out in the city. The report proved to be true, but there is no cause for alarm.

No. 1, 10 targets, entrance $1.25: Waruf 5, F. C. Marantette 10, Spicer 7, C. Marantette 7, Kolb 8, Stacy 5, Williams 6, Allin 4, McKerlin 7, Preston 7, Neve 6.

No. 2, 15 targets, entrance $1.45: Waruf 12, P. Marantette 9, Stacy 13, Kolb 13, Spicer 11, F. C. Marantette 14, Preston 15, Neve 10, Williams 8.

No. 3, 10 targets, entrance $1.25: Waruf 10, Stacy 6, Kolb 10, F. C. Marantette 9, Spicer 8, P. Marantette 7, Williams 5, McKerlin 3, Allin 7, Preston 5, Neve 6.

No. 4, 10 targets, entrance $1.25: Neve 7, Preston 10, Stacy 9, P. Marantette 7, Kolb 9, F. C. Marantette 10, Waruf 8, Spicer 5, Williams 7, Harding 8.

No. 5, 20 targets, entrance $2.50:

Preston.....11100110111111111111—16
Waruf.....11111111111111111011—19
Kolb.....11111111101101111101—17

Marantette 11101101011111111111—17
Harding...11011111101100111101—15

No. 6, 15 targets, entrance $2.25: Waruf 14, Kolb 14, Preston 11, Turner 10, Neve 8, Davie 12, Spicer 13, F. C. M. 13, Uixon 13, C Marantette 13, Harding 12.

No. 7, 10 targets, entrance $1.25: Davie 8, Waruf 8, Spicer 9, Preston 6, Neve 9, F. C. M. 9, Stacy 9, Kolb 7, Uxion, Allen 6, Turner 7, McLaughlin 7.

No, 8, 10 targets, entrance $1.25: Preston 9, Davie 6, Neve 7, F. C. M. 8, Harding 6, P. Marantette 6, Waruf 8, Turner 7, Stacy 6, Uixon 6, McLaughlin 7, Spicer 9, McKerby 6, Williams 8, Walker 6, Flanders 7, Shoecraft 6, Dr. Runion 7.

No. 9, 15 targets, entrance $2.50: Davie 11, Stacy 12, Preston 13, McKinly 10, Neve 12, Williams 11, Turner 13, Uixon 10, Allen 10, Waruf, 12, F. C. M. 14, Spicer 12, Dr. Runion 10, Stoughton 10, Shoecraft 10, Walker 10, Rommel 9.

No. 10, 15 targets, entrance $2.50: Davie 8, Waruf 12, Preston 12, Neve 11, Stacy 9, F. C. M. 15, Nixon 11, P. Marantette 12, Galaway 10, Turner 12, Heary 12, Spicer 10.

A BYSTANDER AND READER.

## Trap-Shooting at Little Rock.

LITTLE ROCK, Ark. Sept. 1.—The scores in the two last contests for the Pulaski county medal are given below. On Aug. 21, the day was dark and threatening, and the targets being thown as low and as hard as possible, J. W. Irwin's score of 43 out of 50 was good work.

On Aug. 28 the weather was more favorble, the day being clear but extremely hot. The attendance was only fair. Dr. L. F. French won the medal with the excellent score of 46. The conditions of the contests are 50 singles, unknown angles. On Aug. 28, Dr. J. H. Lenow and S. M. Apperson shot a live bird match, 25 live birds per man, loser to pay for the birds. The doctor won by 4 birds, killing 16 to his opponent's 12. The scores in the medal contests: Aug 21:

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## Manitou Beach Club.

ROCHESTER, N. Y., Sept. 5.—*Editor Forest and Stream:* Inclosed are the scores made at the tournament of the Manitou Beach Rod and Gun Club, on Labor Day.

The chief feature of the day was the contest between Charles Skinner, aged 12 years, son of George W. Skinner, of Manitou Beach, and Bradley Palmer, aged 14, son of Joseph W. Palmer, of this city. Both of the lads have won for themselves laurels in the handling of the shotgun, and there was much interest manifested in the match by the old gunners. The Grand View Beach Railroad Co., to make the contest more interesting, donated a beautiful gold badge to be given to the winner. The contest was for 100 birds and was divided into four sections of 25 each. Master Skinner took the lead at the beginning and held it until the end, thus capturing the prize. In the first quarter he did remarkable shooting, succeeding in dropping 24 out of 25 birds. The summary of the event was as follows:

| | |
|---|---|
| Skinner | 1111110111111111111111111—24 |
| | 0011111111111111011110110—20 |
| | 0110110110111111110101101—18 |
| | 1111011110011101111111000—18—80 |
| Palmer | 0001110001110110101011101—14 |
| | 1001010010011910111111001—14 |
| | 0101110110011111110011110—17 |
| | 1011011101011110101011111—13—63 |

This is the second time Master Skinner has defeated Palmer. Several weeks ago Judge Warner presented a badge for a 50-bird race, and Skinner won by the score of 39 to Palmer's 38. Brad. Palmer will be remembered by those who attended the State shoot at Utica the past summer. It was there he made the remarkable run of 54 straight.

No. 1, 10 birds: C Lane 10, E. C. Meyer 9, Lowden 9, H. M. Stewart 8, Austin 8, Richmond 8, McCarthy 7, Borst 7, C. Skinner 7, Palmer 6, Rickman 5.

No. 2, 15 birds: H. M. Stewart 15, Borst 13, Meyer 11, C. Lane 11, Glover 10, Austin 10, McCarthy 8, Palmer 8, Richmond 6, Maguire 6, Rickman 5.

No. 3, 10 birds: Austin 10, C. Skinner 9, Richmond 8, Stewart 8, Meyer 7, C. Lane 7, Borst 5, Lane 4, Maguire 4, W. Farrar 4, Rickman 3.

No. 4, 10 birds: McCarthy 9, Meyer 9, Norton 8, Stewart 7, Borst 7, Glover 7, Austin 6, C. Lane 6, Richmond 5, Rickman 5, Hutchinson 4, Rogers 3.

No. 5, 15 birds: Lane 14, Lowden 13, Norton 12, Stewart 11, Rickman 11, Meyer 11, Austin 11, Lewis 10, Richmond 9, McCarthy 9, Borst 7, Maguire 6, Bruff 5, Hutchinson 5.

No. 6, 15 birds: Meyer 14, Austin 13, Mehaler 12, Lewis 12, Stewart 12, Lowden 11, C. Lane 11, Richmond 9, Norton 7, Borst 3.

No. 7, 10 jack rabbits: Meyer 10, Lewis 10, Austin 10, Palmer 10, McCauley 9, C. Lane 8, Beyer 8, Borst 8, Stewart 8, Norton 7, Richmond 6, Nichols 6, Lowden 6, Rickman 4.

No. 8, 10 jack rabbits: Meyer 9, Richmond 9, Austin 9, Lowden 9, Lewis 8, Norton 8, Stewart 8, Rickman 6, Byer 5, C. Lane 5, Farrar 3.

No. 9, 15 jack rabbits: Lane 13, Stewart 12, Norton 11, Lewis 11, Byer 11, Rickman 10, Meyer 10, Borst 9, Lowden 9, Glover 9, Nichols 7, Rickman 7, Richmond 6, Austin 5, Norton 5, Mehaler 5, Hadlock 4, Borst 2.

No. 10, 10 birds, gun below the elbow: Stewart 7, Maguire 7, Byer 7, C. Lane 7, Meyer 6, Lewis 6, Lowden 6, Richmond 2.

No. 11, 10 jack rabbits, gun below the elbow: Stewart 9, Meyer 8, Richmond 8, Austin 7, Lewis 7, Lowden 7, Lane 6, Byer 6, McCarthy 5, Rickman 5, Hadlock 2.

No. 12, 10 birds, gun below the elbow: Meyer 9, Austin 7, Lane 5, C. Skinner 5, Rickman 4, Fleckenstein 1.

## New England Tournament.

PUTNEY, Vt., Sept. 5.—The grand New England Shooting Association tournament, held on the grounds of the Putney Rod and Gun Club, is over and I do not think such a grand burlesque was ever offered to trap-shooters since the genius of the human race first conceived the idea of a clay-pigeon. Oh, it is wonderful what a farce can be made of a trap-shooting tournament, when the prime movers fail to put in an appearance and the shoot is left to wander aimlessly about and manage itself. About six weeks ago the secretary of our gun club received a letter from the secretary of the above named Association saying they wished to come to our place and hold a shoot, and they would furnish everything, including programmes, birds, traps and men to personally conduct the tournament. To this our club was only too glad to agree, and accordingly left no stone unturned to have our grounds in perfect readiness for the Association managers to go ahead and arrange traps, etc., to suit themselves, congratulating ourselves on the good fortune that led the Association to select our town as a suitable place to hold a shoot. In due time proper notices appeared in the leading sportsmen's papers and programmes were forwarded to our club for distribution among the shooters in the vicinity. A week before the day set for the grand (?) event a set of empire traps were sent to our club, and accompanying them was a market-basket partly filled with cotton, and so far as we could discover, nothing else.

We also received advices that a sufficient number of targets would be shipped from the factory to last both days, and as Mr. Hebbard was advertised as manager of the Association tournament we expected that he and the birds would be on hand promptly; but alas, our fondest hopes were not realized, and whether they were lost, strayed or stolen no one in this vicinity has been able to ascertain.

The day before our shoot was to commence the genial countenance of our old friend and club mate, Henry Warren, appeared among the boys, whose pleasant nature assures him a cordial welcome from every one who has ever had the pleasure of meeting him. He had his gun and lots of shells with him and did his share toward grinding into dust the targets he had sent us, he being the inventor and maker of the hub targets, which were used on this occasion owing to the non arrival of the others.

The first train from the North Monday morning brought Mr. Wetherbee, president of the Association, and Mr. Renehan, of White River Junction. The look of disgust of Pres. Wetherbee when he learned that no one had appeared to perfect arrangements was a study for an artist. In the meantime a party of six had driven over from Townshend, Vt., so with our own boys we could muster about 15 shooters, who shot in the various events the first day. In the team championship event only two teams were entered, one from the Putney Club and one from Townshend, the former proving to be winner. The Individual Championship event at 30 singles resulted in a tie between W. E. Ayer and A. J. Ayer, the former winning on the shoot off. As the $300 badges advertised by the Association were not shown to any one in this town it would be considered a great kindness to the respective winners if some one would forward a photograph to show the extent of the winnings. The second day's programme was reduced to 3 events, the principal one being a merchandise match at 25 singles, which brought out 13 entries. As enough prizes were offered to give each shooter one, everybody quit a winner, the only clean score being made by McNulty, who missed 25 as gracefully as any one could.

Mr. Wetherbee used us in a first-class manner, and had all the Association managers treated us in the same manner, we should have no occasion to find any fault.

[Judging from the above that there had been some misunderstanding in regard to the running of the New England tournament at Putney, Vt., we called upon Mr. Hebbard as soon as the above was received. Mr. Hebbard informs us that he has never managed a tournament for the Association, but that he merely provides empire traps and targets at the Association tournaments and looks after them during the shoot. His opinion was that being advertised to manage the tournament was a misunderstanding of his position in the Association. Regarding the non-arrival of the targets Mr. Hebbard produced undeniable proofs that both traps and targets were shipped to Putney on the same day and at the same time. He was, of course, unable to solve the mystery of their going astray, the traps having arrived at Putney in ample time for the tournament. Mr. Hebbard explains that business of importance prevented personal supervision of the working of the traps at Putney.]

W. E. AYER.

## Iowa Falls' First Annual.

IOWA FALLS, Ia., Aug. 29.—*Editor Forest and Stream:* The first annual tournament of the Iowa Falls Gun Club closed to-day. The attendance was fair and the weather fine; keystone targets were used and thrown about 50yds. The management was excellent, and any one who attends a tournament given by the Iowa Falls Gun Club can be assured of a good time. The club gave four nice prizes for the four best averages, and there was no dropping for place. There were eighteen events at targets and one at live birds, a total of 291 targets and 10 live birds. First average was won by Budd with 275, second by Grimm with 273, third by Christianson with 270, fourth by Frazier with 264.

C. W. BUDD.

## Morfey beats Lenone.

WILLARD PARK, N. J., Sept. 3.—The Morfey—Lenone race at 100 live birds per man, for $100 a side was decided to-day in favor of Morfey, who killed 93 to Lenone's 86. Under the conditions as arranged, Lenone was conceded 20 birds by his opponent. The match was brought off in hazy weather with a southwest wind blowing across the traps. The birds in many instances were slow to start, need flushing very frequently; once started, they were fast enough to please everybody. Lenone is not satisfied with the result, hence another match under precisely the same conditions will take place. No date has been fixed, but a forfeit has been posted to bind the match. Morfey used 48grs. of E. C. loaded in U. M. C. trap shells. Ed. Morgan acted as referee, Wm. Dutcher being official scorer; trappers, C. Wright and Tom Smith. Score: Conditions: 100 live birds per man, 30yds. rise, 50yds. boundary, modified Hurlingham rules to govern; Lenone conceded 20 dead birds by Morfey, $100 a side:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

The following 7 bird sweep was also shot on the same date, two moneys, $5 entrance, Hurlingham rules:

| | | | |
|---|---|---|---|
| Lenone | 2111111—7 | Wright | 2212221—7 |
| Morfey | 2121212—7 | Morgan | 2221101—6 |

On Sept. 4 the members of the Paterson Gun Club shot for the club medals at Willard Park with the following result: Conditions: 10 live birds, 30yds. rise, 50yds. boundary, modified Hurlingham rules to govern:

| | | | |
|---|---|---|---|
| T W Morfey | 1122221211—10 | G Hopper | 2122012202— 8 |
| Ed George | 1010001220— 5 | Ed Morgan | 2122111220— 9 |
| C Wright | 2120021222— 8 | R Boyle | 2021102222— 8 |

## Winnipeg Gun Club.

WINNIPEG, Man., Aug. 31.—The Winnipeg Gun Club held a tournament on Aug. 23, thus bringing to a close its season of 1894. The most interesting event on the programme was the contest for the championship of Manitoba. The conditions were 50 single Winnipeg blackbirds, expert rules, $5 entrance. The event brought out 13 entries, Rowand, Luxton and Andrew tieing for the championship. In the shoot off at 10 targets, Andrew broke 9 to his opponents' 7, winning the championship. Scores:

# Answers to Correspondents.

### No notice taken of anonymous communications.

W. L. C., South Boston.—I understand that upon entering Nova Scotia a duty is assessed upon sportsmen's guns, although the money is refunded upon returning. Does this apply to guns of English make? Ans. Yes.

AZTEC, Mexico.—1. I have heard that there are bighorns in the Sierras of Chihuahua; is it likely? Do they inhabit any except snow-capped ranges? 2. What is the "black jaguar" mentioned by your some time Honduras correspondent, De Veras? (He ought to write some more.) 3. Is there a comprehensive manual of American mammalia, and if so what would it cost? Ans. 1. Altogether likely. The notion that bighorn are Alpine animals is an entirely erroneous one. They have been driven to the high, rough mountain peaks, but only within the last twenty-five or fifty years. Once they were found on the plains. 2. A black form of *Felis onca* which is not very uncommon. 3 No such work, unhappily.

A. L. R., Montreal, Canada.—Would you kindly tell us (1) the difference there is between raccoon, wildcat or what we call in French in Canada *chat sauvage*. 2. The French name for raccoon? 3. The French name for opossum? 4. The natural history of these two animals or what books to be consulted in that matter? Ans. 1. The raccoon is an animal belonging to the group known as *Arctoridea* or bearlike mammals, the wildcat or *chat sauvage* to the *Felidæ* or cat family. The two are about as different as a dog is from a cat. 2. *Raton*. 3. The name opossum is of North American Indian origin and we are not sure that it has a vernacular French name. In some of the French works on natural history it is called *didelphe*, which of course is derived from the Latin generic name *Didelphys*. The common French names are *opossum* and *sarigue*. 4. We have no space to give particulars. Consult the Standard Natural History for main facts about them, *i. e.*, as to structure and habits.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where we get back a good deal more than cost of catalogue and postage.

**ABBEY & IMBRIE,**

18 Vesey Street, New York City

**MARSTERS HAS WORMS**

**Sand Worms 12 and 15c. per doz. White or Blood Worms, 25c. per doz.**

**I am with you again with lower prices for Fishing Tackle. I find by experience that putting down the prices and not decreasing the quality, it increases my business every year.**

One lot of Split Bamboo Fly and Bass Rods will be sold at $1.19 until all are sold. These rods are all nickel mounted, solid reel seats, silk wound, extra tip, complete in wood form and will give satisfaction.

Length and weight of the Fly Rods are: 9ft., 6oz.; 9½ft. 6½oz.; 10ft., 7oz.; 10½ft., 7½oz.; 11ft., 8oz. Reel seats below hand.

Length and weight of the bass rods are: 8½ft., 9oz.; 9ft., 10oz.; 9½ft., 11oz.; 10ft., 12oz., 10½ft., 14oz. Reel seats above hand.

No. H—A special lot of Hard Rubber and Nickel, Raised Pillar, Multiplying Reels with Balance Handle and Side Spring Click, 40yds., 68 cts., 60yds., 78 cts.; 80yds., 88 cts.; 100yds., 98 cts.

Any of the above reels sent by mail for price and 10 cts. extra for postage.

No. E—Special lot Hard Rubber and Nickel Raised Pillar Click Reels, 40yds., 38cts., 60yds., 48cts. Sent by mail 5cts. extra for postage.

No. C—Nickel-Plated, Raised Pillar Multiplying Reels, with click and drag and screen oil cup, 40yds., 58c.; 60yds., 68c.; 80yds., 78c.; 100yds., 88c.; 150yds., 98c. 10c. extra for postage.

Single Gut Leaders, mist color, 1yd., 20c. per doz.; 2yds., 40c. per doz.; 3yds, 60c. doz. Double Gut Leaders, mist color, 2yds., 75c. doz. Hand Twisted Gut Leaders, 10c. each, 90c. doz.

THE NEW IDEAL RIFLE

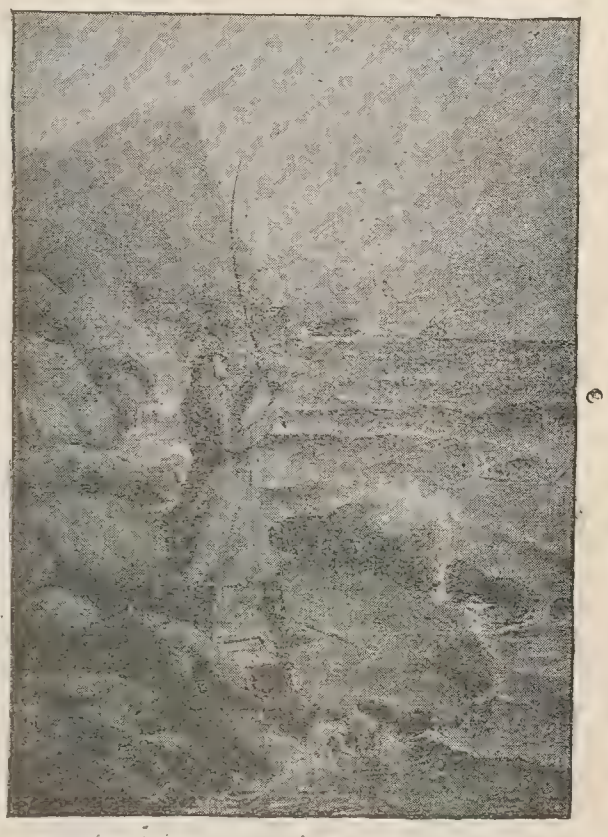
# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

JACKSNIPE COMING IN.

## AS PREMIUMS.



We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** 6 *months and any two pictures*, **$3.**

If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.

Copies of them may be seen at this office, and inspection is invited.

BASS FISHING AT BLOCK ISLAND.

VIGILANT AND VALKYRIE.

# Standard Works for the Sportsman's Library.

ANY BOOK HERE NOTED WILL BE SENT POSTPAID ON RECEIPT OF PRICE BY THE FOREST AND STREAM PUBLISHING CO., 318 BROADWAY, NEW YORK.

## ANGLING.

### The American Angler's Book.

Combining the natural history of sporting fish, the art of taking them, with instructions in fly-fishing, fly-making and rod-making, and directions for fish breeding. Description of salmon runs, inland trout fishing, etc. By THAD. NORRIS. 80 illustrations. Cloth. Price, $5.50.

### American Fishes.

A popular treatise upon the game and food fishes of North America, with especial reference to habits and methods of capture. By G. BROWN GOODE. With numerous illustrations. Cloth, 496 pages. Price, $3.50. This is, by far, the most popular work which has ever been published on the fishes of America, and is the book that no angler who takes pleasure in knowing the fishes which afford him sport, can afford to miss.

### Book of the Black Bass.

Comprising its complete scientific and life history, together with a practical treatise on angling and fly-fishing, and a full description of tools, tackle and implements. By JAMES A. HENSHALL, M.D. Illustrated. Cloth, 470 pages. Price, $3.00. Dr. Henshall's monograph is the standard work.

### More About the Black Bass.

Being a supplement to the "Book of the Black Bass." By JAMES A. HENSHALL, M.D. Fully illustrated. Cloth, 204 pages. Price, $1.50. This is a supplement or sequel of Dr. Henshall's first volume, in which the author's aim is to bring the subject matter down to date.

### Fly-Fishing and Fly-Making for Trout, etc.

By J. HARRINGTON KEENE. With plates of the actual material for making flies of every variety. Illustrated. Cloth, 160 pages. Price, $1.50. The matter of the book embraces everything which the fly-fisherman wants to know about the senses of fish, practical fly-fishing, casting and fly-making; with list of standard flies and their dressings; the feathers, silk and other material used in fly-making, there are samples of all, attached to blank sheets like pictures by way of illustration.

### Fishing Tackle.

Its Materials and Manufacture. A practical guide to the best modes and methods of making every kind of appliance necessary for taking fresh-water fish and for the equipment of the angler and fly-fisher. With 454 illustrations and explanatory diagrams. By J. HARRINGTON KEENE. Price, $1.50.

### With Fly-Rod and Camera.

By EDWARD A. SAMUELS, President of the Massachusetts Fish and Game Protective Association, author of "The Ornithology and Oölogy of New England and Adjacent States and Provinces," "Among the Birds," Associate Editor of "The Living World," etc., etc. Cloth, 480 pages (7×9½in.), 147 illustrations. Price, $5.00. The author is known as one of the most devoted and expert salmon fishermen of America. The volume is likewise noteworthy as an example of the rare possibilities of amateur photography.

### Fly-Rods and Fly-Tackle.

Suggestions as to their Manufacture and Use. By HENRY P. WELLS. Illustrated. Cloth, 364 pages. Price, $2.50. The most exhaustive work on the subject in print.

## MANUALS.

### Game Laws in Brief.

Laws of the United States and Canada Relating to Game and Fish Seasons. For the guidance of sportsmen and anglers. Compiled by CHARLES B. REYNOLDS, Editor of *Forest and Stream*. Paper. Price, 25 cents. Gives all sections relative to game and fish seasons, limit of size or number, non-residents, transportation, etc. All in brief, but full enough for the practical guidance of sportsmen and anglers. Carefully compiled, and shorn of verbiage. Handsomely illustrated with numerous half-tone engravings from *Forest and Stream*.

### Woodcraft.

By NESSMUK. Cloth, 160 pages. Illustrated. Price $1.00. A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain English.

### Tricks of Trapping.

Camp Life in the Woods, and the Tricks of Trapping and Trap Making. Containing hints on camp shelter, all the tricks and bait receipts of the trapper, the use of the traps with instructions for the capture of all fur-bearing animals. By W. HAMILTON GIBSON. Illustrated. Cloth, 300 pages. Price, $1.00.

### Log Cabins.

How to Build and Furnish Them. By WILLIAM S. WICKS. New and enlarged edition. Price, $1.50. Mr. Wicks might have called his book "Every Man His Own Log Cabin Builder," for he has set out to describe fully and particularly each detail in the process of construction. Plans are given for cabins, large and small, with details of exterior and interior.

### Hints and Points for Sportsmen.

Compiled by "SENECA." Cloth. Illustrated, 224 pages. Price, $1.50. This compilation comprises six hundred and odd hints, helps, kinks, wrinkles, points and suggestions for the shooter, the fisherman, the dog owner, the yachtsman, the canoeist, the camper, the outer, in short for the field sportsman in all the varied phases of his activity.

## SHOOTING.

### Names and Portraits of Birds

Which Interest Gunners, with Descriptions in Language Understanded of the People. By GURDON TRUMBULL. Cloth, 222 pages. Price, $2.50. The average gunner with this work at hand would have little difficulty in identifying the contents of his bag from the text alone. Identification is further facilitated by portraits of the birds.

### Antelope and Deer of America.

A comprehensive scientific treatise upon the natural history, including the characteristics, habits, affinities and capacity for domestication, of the Antilocapra and Cervidæ of North America. Second edition. By JOHN DEAN CATON, LL.D. Cloth, 426 pages, 50 illustrations; steel portrait. Price, $2.50.

### The Gun and Its Development.

With Notes on Shooting. By W. W. GREENER. Breechloading Rifles, Sporting Rifles, Shotguns, Gunmaking, Choice of Guns, Chokeboring, Gun Trials, Theories and Experiments. Fully illustrated. Cloth, 770 pages. New edition. Price, $2.50.

### The Art of Shooting.

An Illustrated Treatise on the Art of Shooting. With Extracts from the Best Authorities. By CHARLES LANCASTER. Illustrated with numerous drawings from instantaneous photographs. Price, $3.00. New edition.

### Field, Cover and Trap-Shooting.

By CAPTAIN ADAM H. BOGARDUS, Champion Wing Shot of the World. Embracing Hints for Skilled Marksmen; Instructions for Young Sportsmen; Haunts and Habits of Game Birds; Flight and Resorts of Waterfowl; Breeding and Breaking of Dogs. With an appendix. Cloth, 493 pages. Price, $2.00. There is no other man in this country—or in any other, for that matter—better fitted to teach a novice the art.

### The Still-Hunter.

A Practical Treatise on Deer-Stalking. By T. S. VAN DYKE. The information contained in "The Still-Hunter" is as exhaustive as it is possible to make it. 390 pages. Price, $2.

### The Breech-Loader and How to Use It.

288 pages. Price, $1.00. A book for that numerous class of sportsmen who delight in a day's shooting, but have neither the time nor the means to make the sport a life's study.

## CAMP AND HOME.

### Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By ROWLAND E. ROBINSON. Cloth, 187 pages. Price, $1.00. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact in all the other characters introduced.

### Sam Lovel's Camps.

A sequel to "Uncle Lisha's Shop," by ROWLAND E. ROBINSON. Cloth. Price, $1. When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living creatures.

### Pawnee Hero Stories and Folk-Tales,

With Notes on the Origin, Customs and Character of the Pawnee People. By GEORGE BIRD GRINNELL. Cloth, 417 pages. Illustrated. Price, $1.75. New edition, revised. Like most Indian tribes, the Pawnees are story tellers. They have a vast fund of folk-tales and traditions, which have been handed down from father to son, and transmitted from generation to generation. Years ago, when the tribe lived in Nebraska, the author of the present volume camped and hunted with them, and joined in their village life. The nights were given up to story telling, and many of the tales told in the lodge and by the flickering camp-fire were carefully translated and written down. When published they excited great interest. They are tales of daring and adventure, weird accounts of magic, mystery and the supernatural; relations of the ways of life in the old, wild days; stories of war and the craft of war parties, the history of the tribe as treasured by the very old men. There is mother-wit in these stories, they are full of humor, sentiment, pathos and human nature.

### Blackfoot Lodge Tales.

The Story of a Prairie People. By GEORGE BIRD GRINNELL. Cr. 8vo., $1.75. In this volume the story of the Blackfoot tribe is told by a friend, one who has hunted with them on the prairies, slept in their lodges, lived in their camps, and shared their daily life. The stories which constitute this history have been taken down by the author from the lips of the narrators, and are given without change as told to him. There is a singular and charming freshness about the stories, which give the history of renowned warriors of ancient and modern times, show how ancient customs arose, and explain natural phenomena. The account of the daily life, customs, and history of the Blackfeet presents a series of graphic pictures of savage life in peace and in war.

### Our New Alaska;

Or, The Seward Purchase Vindicated. By CHARLES HALLOCK. Cloth, 209 pages, illustrated. Price, $1.50. Mr. Hallock's writings are always vivid and full of life.

## THE KENNEL.

### Dogs: Their Management and Treatment

IN DISEASE. A Study of the Theory and Practice of Canine Medicine. By ASHMONT. Cloth, 208 pages. Price, $2.00. The *Forest and Stream* says that this is one of the most valuable treatises on canine management and therapeutics that has appeared on this side of the water.

### Kennel Record and Account Book.

Boards, $3. An indexed volume of 180 pages, consisting of a series of carefully prepared blank entry forms suited to the registration of all kennel events and transactions.

### Dog Points and Standards.

First Lessons in Dog Training, with the Points and Standards of all Breeds of Dogs. Paper, new edition, 106 pages, revised to date. Price, 50 cents.

### Training vs. Breaking.

Practical Dog Training; or Training vs. Breaking. By S. T. HAMMOND, Kennel Editor of *Forest and Stream*. Revised and re-written. To which is added a chapter on training pet dogs, by an amateur. Cloth, 165 pages. Price, $1. A book for dog owners, who, by the instructions here plainly given, can successfully train their hunting dogs.

### Modern Training;

Handling and Kennel Management. By B. WATERS. Illustrated. Cloth, 373 pages. Price, $2. This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

### House and Pet Dogs;

Their Selection, Care and Training. Paper, price 50 cents.

### Lee's Modern Dogs.

History and Description of the Modern Dogs (Sporting Division) of Great Britain and Ireland. By RAWDON B. LEE, kennel editor London *Field*. Illustrated, 584 pages. Price, $6. This is a standard work by an acknowledged authority, and is up to date. It treats all sporting breeds exhaustively. The illustrations are idealized portraits of typical specimens.

### Kennel Secrets.

How to breed, exhibit and manage dogs. By ASHMONT. The dog from the time he is conceived to the time he curls himself up for his last long sleep is treated from every standpoint that could possibly occur to a man of wide experience with dogs. Every important subject that has engaged attention has been fully discussed, generalities being held practically valueless and misleading. Illustrated, 344 pages. Price, $3.00.

### The Spaniel and Its Training.

By F. H. F. MERCER. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, $1.

### Scientific Education of Dogs for the Gun.

By H. H. Cloth. Price, $2.50. The instructions are the result of the author's amateur practical experience of 37 years. *Forest and Stream* says: "This work is a very well written treatise upon the subject, containing some new ideas and much that is interesting and instructive to the new beginner as well as not a little that will be beneficial to even old hands to study."

## YACHT AND CANOE.

### Small Yachts.

Their Design and Construction, Exemplified by the Ruling Types of Modern Practice. With numerous plates and illustrations. By C. P. KUNHARDT. New ed., 470 pp. of type and illustrations and 87 plates. Size of page, 14½×12½. Price, $10. This book is intended to cover the field of small yachts, with special regard to their design, construction, equipment and keep.

### Steam Yachts and Launches;

Their Machinery and Management. By C. P. KUNHARDT. With plates and many illustrations. New ed., 267 pp. Price, $3.00. A complete review of the development and present status of the marine engine and boiler as applied to steam yachting.

### Canoe and Boat Building.

A Complete Manual for Amateurs. Containing plain and comprehensive directions for the construction of Canoes, Rowing and Sailing Boats and Hunting Craft. By W. P. STEPHENS, Canoeing Editor of *Forest and Stream*. Cloth. Fourth and enlarged edition, 264 pages, numerous illustrations, and fifty plates in envelope. Price, $2.00.

### Canoe Handling.

The Canoe: History, Uses, Limitations and Varieties, Practical Management and Care, and Relative Facts. By C. BOWYER VAUX ("Dot"). Illustrated. Cloth, 168 pages. Price, $1.00.

### Yacht Architecture.

By DIXON KEMP, Associate of the Institute of Naval Architects and Member of Council. Second edition. Super-royal 8vo., 530 pages, numerous plans and designs. Price, $16.80.

### A Manual of Yacht and Boat Sailing.

By DIXON KEMP, Associate Institute of Naval Architects (Member of the Council). 750 pages, with numerous plans and designs. Price, $10.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

SEE REDUCED HALF-TONES IN OUR ADVT. COLUMNS.

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**
**Price of the pictures alone, $1.50 each; $5 for the set.**

Remit by express money order or postal money order Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *PORTRAITS IN INK.—VI.*

A POT-HUNTER.

HE is a farmer who finds his best recreation in the woods and waters, with gun and rod, in the few respites that are given him from the toil whereby he conquers a livelihood from the soil.

There is a break in the dull round of labor when planting is done and hoeing time not yet come, when he goes a-fishing after his own fashion, and he deems the day the less ill spent if he bring home a catch that serves to break the monotonous fare of a farmer's table. Then there are days in haying when he follows the time-honored advice, "When it rains too hard to work, go a-fishing," for he cannot choose his days, only make the most of such as come to him.

The day laborers that he hires have a freer choice than he, between work and pastime, and while he toils in the sun, he sees the gentleman angler and the market-fisherman plying their rods on his own stream, and hears the guns untimely thinning the broods of woodcock in his own alder copses.

Of a summer Sunday he strolls out to the woodside pasture and watches a fox and her cubs at play about the threshold of their underground home, or if he fears the raid of some bounty-hunter or vengeful poultry breeder, he gives the vixen an unmistakable hint to move to safer quarters. If her Thanksgiving antedates his by two months or more, he overloooks the mistake in the calendar and forgives the venal sin for the sake of future sport and possible expiation in the days of the sere and yellow leaf, days that shall bring freedom to the old hound, now yawning and whining in the leash at home, and more to himself than he now enjoys.

When haying and harvesting are over, he robs less exacting labor of an occasional day to prowl along a willowy stream beloved of wood duck or to crawl in the sedgy borders of the haunts of dusky duck and teal, or he makes his stealthy way in the constant shade of wood roads and forest by-paths and ferny margins of the woods, where the yet unbroken flocks of grouse are likely to be, and if he stalks two or three wary birds and brings them to pocket from tree or ground, or from the air by rare chance, or gets one raking shot at a logful of sleeping wood ducks, or into a huddle of shy duskies, or a passing flock of swift-winged teal, he counts it a good day's sport, with tangible and sufficient proof thereof.

But if he has none of the rewards, the fatigues of the day are rest from toil and care, and so not unrequited.

In the later days of the year, when woods are in the fading gray of autumn, or winter has overlaid the russet with white, he ranges upland and lowland with hound and gun, hunting foxes, matching his knowledge against their cunning, and he is thankful to be the winner, but not cast down if he is the loser in the game.

If he kills the fox, he thriftily saves the skin, and prizes it the more if it is prime and marketable.

He is a close and intelligent observer of nature, and freely imparts to congenial listeners what he learns of her secrets; but concerning his love of her he is as reticent as of the love of his sweetheart.

For all expression in words, you would imagine that her infinitude of beauties are displayed in vain to him in all moods and seasons, yet his tell-tale face informs you how they satisfy his soul and fill his heart with unwritten, wordless poetry.

He is friendly and generous to sportsmen who meet him in a like spirit, but not over-hospitable to such as only make a convenience of him, his home and hunting grounds.

The first sportsman in the land does not observe close seasons more religiously than this jealous guardian of nesting and immature birds, of fox cubs and all young fur-bearers, yet he will not be converted to the belief that it is unsportsmanlike or unfair, in proper season, to shoot a fox before hounds, or stalk a sitting grouse, or catch a trout with a worm, all of which he does not only without compunction but with absolute satisfaction, and therefor he is arraigned as a pot-hunter. What say you, gentlemen of the jury, guilty or not guilty?

### *RAIL FOR BEGINNERS.*

THE days are still hot, but the nights are growing cool. Sap is flowing very slowly through twigs and branches, stems of weeds and grasses are hard and woody, and fields are browning to their winter tint. The leaves of the trees, yellow with ripeness, or black and burned at their edges from the long drought, loose themselves from the twigs and one by one twirl slowly to earth. The full round September moon shining all through the night gives light to many migrating birds, and he who is abroad after dark may hear their voices, some familiar and some strange, but all falling from the passing hosts on high. He listens unperceived to scraps of the talk of an unseen multitude, and might surprise many secrets, could he but taste of that food told of by magicians of the East which enables the partaker to comprehend the language of birds and beasts.

The hosts which pass above us are vast in number, but they are invisible, and not many men have looked upon any portion of the migrating army in its passage. Yet a few earnest naturalists have spent nights in lighthouses and have seen and recognized some members of the passing throng as they flew within the circle of the light, or bewildered, strove to pass to it through the protecting glass; and often one may find in the morning, after a foggy night, at the foot of a lighthouse tower or on the deck of steamer which plies on some large sheet of water the bodies of those who have perished on their travels and who will never see the south land, toward which their tireless wingbeats were swiftly carrying them.

Eagerly looked for among the feathered army is the little sora, or rail, about which long clustered many a myth, for it was hard for our forefathers to believe that his feeble flight could carry him over long journeys, and it was easier to imagine that he changed his shape, and was to-day a bird of the upper air and to-morrow a frog living in the mud of the stream's bed. Although the rail is reared in all our fresh-water marshes, his range extends far to the north as well, and when the nights grow cooler he moves southward, flying by night and dropping into the wild rice meadows that he knows so well at the approach of day, and there rests and feeds till moonrise next night, when he sets off again.

He is a simple little bird of deliberate flight and easily killed. Now and then if you are shooting on the edge of the marsh there is an opportunity for a quick shot as a rail shows itself above the grass for a couple of feet only before it reaches the shelter of cat tails or weeds where the boat cannot go, or if a gale is blowing, the rising bird is swept away and a good allowance must be made for him. But ordinarily, in fair weather and on the wide marshes, he is a poor marksman or woefully out of practice who fails to knock down nine out of ten of the rail which rise before him. To knock down, however, is not always to boat, for the crippled rail is skillful in hiding himself in the grass or weeds. Of course misses are made by all of us, because we are human, but for most of those made at rail there is no legitimate excuse.

No sport is more pleasant and easy than rail shooting. In fact, it is luxurious, and we are disposed to think too much so for adult and skilled sportsmen.

No bird serves better as a practice mark for the beginner, and we incline to the belief that some day when we are all more advanced and more generous, this one will be reserved solely for those who are learning to shoot. There is something rather unsatisfactory in the destruction by a good shot of these slow, awkward little birds, and they should be reserved to be shot only by women and children and other beginners. A provision might be inserted in the game law of each State like this: "No male person above the age of fourteen years shall at any time pursue, capture, shoot, shoot at or kill any rail, rail bird, sora or ortolan, or any wading bird of the family *Rallidæ*."

Such a law would seem rather hard to many men who each year look forward to the rail shooting as a sort of practice to get them in shape for the fall shooting; and it would be a distinct hardship to the gourmands who longingly anticipate the season when this most toothsome bird shall appear on the table. Yet there are many who will hold that the man who can turn over the buzzing quail in the brush or stop the hurtling grouse as he darts through the forest has no business to shoot rail.

### *SNAP SHOTS.*

AS BEARING on the remarks on the range of the sharp-tailed grouse printed in FOREST AND STREAM a few weeks ago, our recent information from the Northwest on this species is interesting. The unexampled dryness of the past summer, while it has wrought havoc among the farmers' crops, has resulted in the hatching and rearing of large broods of birds, and over a great portion of Minnesota, both the Dakotas and Manitoba, prairie chickens are more abundant than for several years. In certain sections there has been a good deal of illegal shooting, but there has not been enough to make very much impression on the number of birds over the whole area. Moreover, to the west of the country named, in Montana, Assinaboia and Alberta, as far west as the Rocky Mountains, grouse are very abundant, and the settlements in much of that region are so widely separated that good shooting can be had at almost any point. In the neighborhood of Winnepeg considerable activity has been shown by the game wardens this season, and they have made a number of arrests for illegal destruction of grouse. In fact it seems as if a better sentiment was growing up all through the Northwest on this subject. We have a recent note from Galt, Ontario, which speaks of a large covey of young prairie chickens having been seen there. These were probably sharptailed grouse, although there is no means of positively identifying them.

---

The arguments advanced against summer woodcock by a Wilkesbarre correspondent, in another column, are not new, but they have the great merit of being facts, and are put by our correspondent in a very terse and forcible way. Especially to the point is his statement that one reason for a scarcity of woodcock during the autumn flight is the destruction of young birds in summer. Summer shooting like spring shooting should be done away with everywhere, but it is curious to see with what persistency the old idea that July 4 is the proper date to begin shooting woodcock holds on. It might be supposed that the State of Pennsylvania with its great wealth and intelligence would be quick to take any advanced position on all matters of game protection, but as we all know, legislators are proverbially uncertain.

# The Sportsman Tourist.

## VACATIONS—PAST AND PRESENT.

"As travelers oft look back at eve,
When eastward darkly going,
To gaze upon the light they leave
Behind them faintly glowing;
So, when the close of pleasure's day
To gloom hath near consigned us,
We turn to catch one parting ray
Of joy that's left behind us."

FOREST AND STREAM of June 4 has just reached me. By the light of the camp-fire I have glanced at it, and while resting at noon by the trout stream, where the trout reflect the gorgeous tints of flowery banks and soft summer skies, I have read and re-read its pages; and they have furnished me with a host of pleasant recollections. When I was a small lad my passion for rambling first asserted its sway. Almost every Saturday from April to November would find me wandering over the Orange Mountains. Sometimes I would take the train on Friday afternoon and spend the next day at Lake Hopatcong or among the hills of Sussex or Orange counties. Until the middle of July I was armed only with the tin can of the botanical collector, a light geologist's hammer and a microscope; but after the woodcock season opened on the upper Passaic marshes and the young grouse whirred through the forests, when the rabbits watched the ripening grain and gray squirrels chattered among the unopened chestnut burrs, my companion was an old muzzleloader—a weapon the mere possession of which would invalidate any accident insurance policy ever written.

When I arrived at years that warranted greater freedom from parental supervision—parental supervision while on a vacation was to me rather a source of delight than of unwelcome restraint—I would camp for weeks at the Water Gap, or, with knapsack on back, tramp through the romantic Catskills, up and down the classic Hudson and the picturesque Housatonic. And during college vacations the mountains of northern New England were my stamping ground. It was in my freshman year that I caught my first *fontinalis*, in a meadow on the northern slope of old Graylock. It was only a fingerling, and I was prouder of that little trout than I would be to-day of a five-pounder landed with a seven-ounce rod. But my favorite walks were through southern Vermont. As a rule, Pittsfield was my starting point. My first day's tramp would bring me to North Adams or Williamstown. Thence, as fancy would dictate, I would go by easy stages through Pownal, Wilmington and other equally beautiful and retired hamlets to Woodstock, or, taking the western side of the range, I would stroll through Bennington, Shaftsboro and Dorset to Rutland. My route back to New York would be down the Connecticut Valley or across to Lake George and down the Hudson.

The last of these rambles is brought to mind by the paper to-night. It was early in July that I went up to Troy by the night boat, thence to Rutland, thence, over the Green Mountains in sight of Killington and Pico, to the little village of Bridgewater, where I found excellent board at $2.50 per week. Those were halcyon days. Under the maples and pines I read and rested. Sometimes I would climb to the summit of the neighboring peaks, at dawn to catch the melodious strains of the hermit thrush, at noon to find some rare *habenaria* or to doze on mossy couch, where the rich green was besprinkled with the shade-loving *Oxalis acetosella*, and again at sundown that I might feast upon the delicate tints of dying day, as they fell upon the valley of the wandering Connecticut or upon the far-distant, purpling crests of the White Mountains. One day I had an idea that I wanted a dinner of fresh brook trout. I could not catch them, but an old man who lived up on the brook at the foot of Pico offered to fix up a first-rate meal for the small sum of 25 cents. Experience since has taught me that all the trout I ate were plebeian chubs, but they were good just the same. And the people! The old New England farmer can never be duplicated in the West. Why, a trip to Boston or to New York was the event of a lifetime, and a man who had seen Washington or Chicago was, locally, a veritable Stanley. Far from those eastern meadows the breezes waft the odor of the new-mown hay and the clear, ringing music of the whet-stone on the scythe and the dreamy echo of the village church bell. It is a long time since I have been in any place of worship other than the grand "first temples;" but, were I back among the hills of Vermont, I believe I could listen to one of those long, prosaic sermons, could watch the fair-faced rustic maidens, with their quaint costumes, always half a decade behind the times, chat with the grave old deacons and enjoy myself even more than I did when all the world seemed gay.

From Bridgewater I went to Tyson Furnace and spent the month of August by Plymouth Pond, than which a more beautiful spot is not to be found in the length and breadth of the land. Here I angled for the sluggish dace and shot the loudly drumming partridge. I have wondered that some club of sportsmen has not secured possession of that chain of lakes and tributary trout streams and of the encircling hills, where among the heavy timber the dun deer loves to hide. It would make as valuable a property as any that I have ever seen—in fact far superior to Greenwood Lake, Hopatcong, or Mohonk and the waters could be easily stocked with either trout or bass.

When the first frosts painted the mountains crimson and gold, I went back to crowded streets and to my desk as an aspirant for journalistic honors. Those mountains of New England, how I loved them and how eagerly did I look forward to another summer beneath their shadows. How little did I imagine as I flew past Toby and Sugar Loaf and Haystack and Tom and Holyoke, that I should never behold their faces again. How little did I dream as I looked from the car window at the stately elms at Whately and Old Hadley, that, when next their leaves were sere and yellow, I should be wandering beneath tropic skies, far from the land of the stars and stripes, beside the broad Pacific. How little did I know that my brother and I, bosom friends and confidants from the very cradle, had enjoyed our last outing together. I thought that Bridgewater, only a few miles from the Woodstock railway station, was in the wilderness, but here I am, 150 miles from the locomotive whistle and thirty miles from the post-office, and yet I do not feel as much out of the world as I did on some of my boyhood vacations.

---

But all this has nothing to do with this year of grace nor with the mountains of southern Utah. I have been long enough in this part of the Rocky Mountain region to "size it up." While there is better trout fishing in the tributaries of the Columbia and Snake rivers, more big game among the Wind River mountains and along the Sweetwater, finer grouse shooting on the prairies of Nebraska and Dakota, larger flocks of ducks on the Chesepeake and among the Suisun tules, as an all around game country this is not to be despised. My last letter was written from Ike's shearing camp and I told of trouting on Mammoth and Asay creeks. I had begun to believe that the natives told the truth and that these trout would never rise to a fly, but one day, as my grasshopper dropped upon the riffle, there was a break. The waters parted. There was a sheen of silver spotted with rubies, a thousand tiny drops glinted with all the hues of the rainbow, hung for an instant above the white, foaming rivulet, melted in the stream that gave them birth, and the prize was won. That settled it. Out came the brown hackle, professor, coachman, dusty-miller, black-gnat and grizzly-king. My success no longer depended upon pole and clothesline, but upon rod and reel, upon cunning and endurance. Did the trout rise? Well, I should say so. With dull and sober flies my luck has been immense. I have been able to furnish eighteen able-bodied men with one square meal of trout per diem, and I have been surfeited with my own sport.

One morning before breakfast I strolled across the divide to the Mammoth. A hard tramp of two miles brought me to the "black rocks." Here in a narrow gorge the waters dashed and boiled, and above them the lofty long-leaved pines stretched their sinewy arms across the cañon. Here fell no ray of sunlight, but an eternal gloaming reigned and the thunder of the torrent drowned the rustling of winds and the song of birds. Out upon a jagged boulder I stepped, balanced my rod, twirled my wrist, and the long line straightened over the seething flood. For a second the brown-hackle was tossed on pearly crests on the way to the edge of the dark pool that was my objective point. An instant it poised in air between the bejeweled ridge and the placid water below. Flash! Strike! Whizz! Can you not tell the rest of the story by the tingling of your finger tips? Talk about those Rocky Mountain lions being deficient in gamy qualities! Bah! It's all gammon. There is no trick or dodge known to an old Restigouche salmon of which this unsophisticated rustic was ignorant. For the nonce I imagined that I was dreaming, and that a tarpon had inadvertently swallowed my bait. But I had all the business to which I could properly attend without letting fancy run riot. The rascal leaped, sulked and tried his best to get a slack line, but most of all did he endeavor to get the line around the roots of a pine tree that was of no earthly use in so unpropitious a spot. It seemed to me that I spent an hour in getting him to my net, and by the time he was landed I was ready for breakfast. On returning to camp that little trout tipped the scales at 4lbs. 2oz.

Nightly around the camp-fire sat the shearers and herders. Their work ended only when it was too dark to see. They were a strange assortment of men. During the month of June the shearers make the only cash that they possess throughout the entire year. Few, if any, have been outside of the Territory, and to the younger ones the world is bounded by the surrounding hills. Through the night air rang the strains of accordeon and harmonica, and many were the tales of hunting and adventure that I gathered for future use. One story, however, filled me with indignation. Dave Hatch claimed to have killed six mountain sheep last winter without stirring from his tracks. I wish that I possessed sufficient evidence to cinch him for the crime.

But Ike's 8,000 sheep have been shorn. The wool has been sacked and is already on its way to Salt Lake and we are up on the summer range. It was a two days' walk. The country is impassable for wagons, and all provisions are brought up on burros. I have become more attached to the shepherd dog than to any specimen of the genus *homo* that I have met in the country. No two herders use the same form of expression in working their animals, so I simply whistle and point out that which I want done and my faithful friends obey as well as though they understood my thoughts. We have pitched camp on Houston Mountain, within a mile of the summit. A short walk brings me to snow and to a spot whence I can overlook "Dixie" and the vast valley of the middle Colorado. Two miles below us is good fishing in some nameless creek, but the main attraction big game, fresh sign of bear and deer being everywhere abundant, though I have not yet had a chance to fire the rifle.

Whew, but it is cold! Every night half an inch of ice forms in the water bucket, though during the day the temperature rises to 70 and 75°. There is an entire change in the flora. Below us is the long-leaved pine, but here there is only the red pine and spruce, and a few feet above us no tree but the quaking aspen will grow. Many of the flowers are such as I have found upon the summits of the New Mexican Mogollons, but I have found a new columbine that is a salmon-colored beauty. Many of the southern songsters are here for their summer vacation. I have heard a note that sounds exactly like that of the Eastern brown thrush. This is also a great region for Indian relics—arrow-heads and curious pottery of a uniform burnt umber color and hard as flint.

Sunday afternoon, the last Sunday in June, the Sunday when the mountains of New England are in their loveliest dress. How many school children and business men are to-day dreaming of nothing but the approaching vacation? I sit alone in the tent. Ike has gone to Panguitch for supplies; it will take him four days to make the trip. Brig, the herder, left at sunrise for a neighboring camp to secure matches, flour and tobacco; he cannot return before dark. I have four matches in my pocket and there is scarcely sufficient flour in the sack for me to make a small slapjack for supper. But lambs are plentiful and that is one consolation. Old Trust lies beside me and my rifle is ready for a shot at any game that may come within my range of vision. From the aspens on the mountain side comes the bleating of the sheep and from the forest below the vesper song of the birds arises. The sun slopes slowly to the west. Twilight comes apace. One of my matches must be used to light a fire, and the fire means that this rambling screed must come to a close.

SHOSHONE.

## TWO WEEKS AT WABASIS.

LAKE WABASIS is situated in the northeastern part of Kent county, in the State of Michigan, about 25 miles from the great furniture manufacturing city of Grand Rapids, and 9 miles from the nearest railway station. It derives its name from an Indian chief who, for some misdemeanor, was exiled to a territory within a radius of two miles of its shores, and who one day venturing beyond the territory allotted to him was slain by one of his own tribe. It is a picturesque body of water, bounded on one side by high, rugged hills, while the opposite shores are low and marshy, the whole being surrounded by a heavy growth of timber. The country around abounds in trout streams, and the lake itself, being well supplied with a variety of fish, and fed by numerous small creeks of the purest and coldest water, affords an excellent place for lovers of the piscatorial sport to spend a week or two in camping out.

Here the pickerel darts among the reeds in quest of minnows, and the black bass snaps at the luckless fly that falls within its reach. Perch of the largest size are found in great abundance, and will almost bite at the bare hook. Occasionally a crane flies lazily across the lake and settles in the tall reeds that line the shores to watch for his dinner of tender frogs and tadpoles, and now and then a wild duck starts up with a rush from some quiet bunch of wild rice, which grows in abundance.

What better place than one such as this for the overworked business man or any other man who, as the summer months advance and the atmosphere waxes warm under the concentrated rays of Old Sol, feels the need, or at least the inclination of taking a brief respite from the toil and strife of city life. Go, then, all you who are suffering from such an attack, to some such secluded spot as this, for even at the numerous resorts and watering places there is a sort of restraint put upon you, but here, in the wild, free woods, away from the criticisms of the outer world, you can wear your clothes until they stand alone if you feel so disposed, and shout till the welkin rings with no one to exclaim at your rudeness. Your step becomes elastic and your skin acquires a complexion that would do credit to a pretzel. How good everything tastes, and what an enormous quantity you can stow away under that old vest! It would do your sturdy ancestors good to watch you and cause your landlady to turn away in fear and trembling at the thought of your return. Then at night, who of you who have been there, have not enjoyed the pleasure of sitting around the crackling camp-fire, relating some past experience of your own or perhaps listening to the more thrilling ones of some greater tale teller than yourself.

The season was pretty well advanced, and one July night my two friends, B. and C., and myself came to the conclusion that for the next two weeks life would be a burden to us if passed within the limits of the city; so after consulting an old pioneer who had been over the ground and knew the country like a book, we decided to start on the following Saturday for Wabasis. We secured the rental of a good tent and boat, an old wagon, and lastly, a horse.

As the end of the week drew near we became anxious to set out, and by Saturday night had everything in readiness to start; so after removing two or three sections of a lumber pile kindly placed against the gate by some of our thoughtful friends, we loaded up our wagon, attached Bucephalus to it and sallied forth into the night with great expectations and a goodly supply of pork and beans and other articles necessary to the welfare and comfort of an expedition of this sort.

For the first ten miles, or as far as Plainfield, there is a good gravel road, and by occasionally shouting at him and getting out whenever we came to a hill, we managed to keep Bucephalus awake. At the Plainfield toll-gate a figure arrayed in night robes and a piece of old carpet appeared shivering upon the scene (it was a very cold night for July) and exacted our toll. After leaving Plainfield the roads became quite sandy and traveling more difficult, and at 7 A. M. we reached Silver Lake, a beautiful sheet of water with prettily wooded banks and hard pebbly beaches, a fine place for picknickers. There is a story current among the neighboring farmers of a miser who buried his gold somewhere in the vicinity of this lake. Many have searched for it without success. Here we stayed until the following Tuesday, when we struck out for Wabasis, reaching it about noon of the same day. A party of campers from Greenville, just getting ready to leave after a two weeks' stay, reported a very pleasant time, with plenty of good fishing.

Our camp was situated at the west end of the lake near a small creek, which besides supplying us with the best of drinking water, served as an excellent refrigerator, being the best possible place for keeping butter, eggs, milk, etc., which were supplied by a farmer about a quarter of a mile distant. That night (we having neglected to dig a trench around the tent) it rained. The water ran in under the tent, wetting the bedclothes and making it exceedingly disagreeable for all concerned. The next morning, however, the sun came out bright and warm and we felt like new men. Breakfast over we proceeded to the lake, taking with us a good spoon hook and strong line. Keeping pretty close in shore we trolled for about fifteen minutes without getting so much as a nibble. I was sitting in the stern holding the line, and just as we rounded a point where the reeds grew pretty thick felt a decided pull. The fish jumped clean out of the water and the line straightened out with the long, slim body of a fine pickerel about 2ft. in length hooked to the other end of it.

"Give him line; no, haul him in; let me manage him," and similar other pieces of good advice were launched at me with great rapidity, but being unable to follow all of these at once, and having a good stout line, I hauled away. Nearer and nearer to the boat, hotly contesting every foot of the way, came the unwilling fish, occasionally leaping clear of the water and showing his bright, mottled sides. He was almost alongside and I had just begun to feel pretty sure of him, when flop! with a swish of his tail and a savage jerk he tore himself loose and was gone, never to return. It was one of the meanest things I ever saw a fish do, and a sore disappointment to us; but not to be discouraged by a slight mishap of this sort, we persevered and in a short time secured several fine bass. After this we made numerous excursions, exploring all parts of the lake, never, however, forgetting to take along our fishing tackle, and almost invariably returning with at least a fair catch.

Bucephalus was always allowed the freedom of the grounds as there was good pasturage all around, and the place being inclosed by a fence, he could not stray far. One morning while we were still in the land of dreams, he managed in some unaccountable manner to open the lid of our provision box, which we kept just outside the tent, and before we were awake devoured 3lbs. of crackers and a loaf of bread, besides slobbering over everything else in the box so that we were compelled to renew our stock immediately. On another occasion he succeeded in getting hold of a bag of oats which we kept just inside the tent and fed to him only on state occasions, but we caught him in the act this time and prevented him from gorging himself, which he probably would have done in short order if left to himself. He was a very wise and knowing animal and possessed the queerest appetite of any horse I ever had the fortune to run across.

There was plenty of good sport to be had, and on leaving Wabasis we took with us as large a supply as could be disposed of among our friends. On the last day of our stay, C. and I secured in one and a half hours, seventy good sized perch and bluegills, some of the perch weighing as high as 1½lbs. This was the best record made on the trip, which will long be remembered by all concerned in it as two of the most enjoyable and well spent weeks of their existence. The sum total of expense netted each individual only $7.50, which is, I think, a very reasonable figure for two weeks of solid enjoyment and healthy sport. I will say in conclusion to all who are similarly inclined that I know of no better way than this to spend a summer vacation and can heartily recommend this mode of travel.

W. H. BARLOW.

## THE DYING SUGAR MAPLE.

WHEN walking through the woody way,
That pleasant leads to the North Bay,
With rod and line and landing net,
And angler's hopes full joyous set,
Oft have I paused to catch again
A sweetly-perfumed airy vein,
That a soft wind across my path
Did striking to my senses waft.
And oft have hunted toward the wind
In tangle thick some flower to find,
That adds such sweetness all unseen
To northern woods, half ever-green.
This often done in summer time,
Not on me then did fortune shine.
In other woods when autumn came,
With dog and gun, I found my game;
I got it not by casting hook,
Nor shooting of swift-flying duck,
Though rod and gun had lured me out.
Great Nature teams with other sport;
Five senses keen, thought on each waiting,
Find pleasing game without life taking.
I saw where stood a stump decaying,
A fungus broad upon it growing.
It was a maple, large and old,
Slow yielding life from earthy mold.
I broke from it that living growth,
That odor sweet came startling forth!
Great Homer tells when warrior fell,
Life came from wound with blood as well;
And I with faith did fain receive
This thought so pleasing to believe—
As soul of saint at death goes flying—
'Tis the sweet soul of maple dying!

MOOSEHEAD LAKE. NELSON MERRILL.

### The Yellowstone Game Exploration Trip.

LOUISVILLE, Ky., Aug. 11.—*Editor Forest and Stream:* I yesterday read the last of the thirteen articles which appeared in FOREST AND STREAM in the last winter Park expedition. I wish to say that I was greatly delighted with the whole series and it seems to me that that was one of the noted expeditions in the history of the Park. What was written about the segregation strip will convince all Americans who are not, as Mr. Hough says, either "idiots or fools," or I would add a still more numerous class of those who would sacrifice the whole Park to place a dollar in their pockets. I would like to suggest the propriety of getting those articles into pamphlet form. They would be of great value. H. M. C.

### Good Books for Every One.

THIS is a reading age. Young and old, rich and poor, buy and read books. To meet these demands there has been an enormous production of printed books, good and bad, and a great competition in the book trade, which has resulted in the publication of standard works at prices that seem absurdly low when compared with the prices charged for the same volumes a few years ago.

For many years the Forest and Stream Publishing Co. has been known as the largest publishers in America of works on outdoor sports, and in that time it has supplied many thousands of its readers with volumes on the especial subjects, and with the lapse of time the trade in such volumes has been constantly increasing. With this trade in special lines has of late come an increased demand for works more general in character, and this demand is growing day by day.

To meet these requirements of our customers we have made arrangements by which we can furnish a number of the standard works of English and American authors at prices far below those at which they can usually be obtained, and we have, therefore, issued a small General Literature Catalogue, which will be forwarded free of charge to any one who may apply for it. In the list of works which we can furnish are found such authors as Walter Scott, George Eliot, Washington Irving, Charles Dickens, John Ruskin, Cooper, W. Clark Russell and many others almost equally well known.

These works are arranged in series, their prices varying from 50 cents to $1.50 a volume. All the works are cloth bound except those at $1.50 a volume, which are bound in half morocco with gilt top. We have no doubt that as soon as this catalogue becomes known to our readers, they will avail themselves of its privileges.

We have recently imported second-hand copies of several rather rare and out of print books on sport. Among these are Elliot's "Carolina Sports," Lamont's "Yachting in Arctic Seas," Dodge's "Hunting Grounds of the Great West" and others. Prices of these will be forwarded on application.

### Prairie Chickens.

RECENT reports received by the Chicago, Milwaukee & St. Paul Railway from stations in the prairie chicken country of Minnesota and South Dakota all indicate a prospect of the best hunting for years. Chickens are very plentiful and in fine condition. Duck shooting prospects are also good. Full information can be had by addressing Ticket Agent, Chicago, Milwaukee & St. Paul Railway, 207 Clark street, Chicago.—*Adv.*

# Natural History.

## THE CHARACTER OF THE ROBIN.

I KNOW of no bird whose manners are so expressive of energy and vigilance as those of the robin (*Turdus migratorius*). Other birds are often to be seen leisurely and idly moving about as though they had no particular object in view, or chasing and picking mock quarrels with each other, just by way of pastime, but the robin is never to be seen acting thus. Whatever he does, is done with the air of it being a strict necessity and in a uniformly energetic manner, whether it be his most common occupation of exhuming earth worms, or that most important of bird doings, the construction of a nest. As for his vigilance, it is rarely that he is not on the lookout for danger; his most frequent attitude is one expressive of watchfulness and suspicion.

I am watching as I write several birds who are picking up the various bugs and worms to be found in a newly spaded piece of ground in the garden below; and among them is a robin. The other birds, a couple of catbirds and some song and chipping sparrows, as they do not see any danger, are not expecting it and move about in a perfectly unsuspicious and confident manner. But the robin has scarcely unearthed one worm, when he must stop and listen and look about him. He mounts a lump of earth for the purpose of having a better view of his surroundings, and his observations being reassuring, he descends with a sudden rush, and putting his head close to the ground (as if he were a most nearsighted bird), he jerks out a worm with most unexpected abruptness. Then carrying his prey, perhaps some four or five inches long, with him, he ascends his hillock and listens again.

He has a nest in a pine tree some distance away; not a very wisely designed nest for purposes of concealment, for it is placed on the end of a branch, and festooned with strings of white rags, so that it can be seen a long distance away; and judging from his constant vigilance and worrying, he believes everybody is conspiring against it. I fail to sympathize with a bereaved robin as much as with most birds, for the reason that his grief is so obtrusive, and that he has previously shown, on all occasions where his fears have been awakened, an equal amount of it. His behavior in this latter respect has often debarred him from my assistance, for it is impossible to know by the amonnt of alarm he shows, whether he merely fears trouble, or his young hopefuls are being murdered before his eyes.

The robin is not given like some birds to singing his song wherever he happens to be, when he takes the notion. He apparently considers a song of too much importance to be sung at all times and places. It is interesting sometimes to watch a robin preparing to sing, and his manner during the interruptions to which he is liable. I was watching one day a robin who, after the manner of robins, was diligently digging for worms in a newly ploughed field, beside an old barn. He had worked for some time, and carried many beakfuls of grubs and worms home, when he stopped by way of rest and recreation to sing a song. But first he looked about the field to see that there were no other birds to lessen the supply of worms, and seeing none he started for the roof of the barn. Then after having taken the usual survey of his surroundings to make sure of it being safe to be off his guard a few moments, he, with the air of one dismissing all other thoughts from his mind, settled down to his song. He was apparently just becoming oblivious to all else, when a sudden shriek of triumph and defiance from a rival robin, who had taken possession of his hunting grounds in the field below, brought him to a sense of outward things with a start. He listened intently, and his attitude grew wrathful, but he hesitated to leave his perch; he was in a mood for singing and loth to go to battle and work just yet. The challenge was not repeated and he was in a too elevated mood to mind the loss of a few worms. So after waiting a little he began again, and his clear hopeful notes were ringing out afresh when the offense was repeated. He did not wait now for consideration, but with a shriek of wrath and defiance, he started for that bird. I could not see them, a fence being in the way, but I am certain that other bird found an even more determined opponent than usual to deal with.

C. A. TYNDALL.

## FLYING SQUIRRELS AS PETS.

MOHONK LAKE, Ulster County, N. Y., Sept. 1.—A friend has just handed me a cutting from a paper with the above heading, and coming from FOREST AND STREAM, I am impelled to answer it, as I have had the same responsibility laid on me.

I had three baby squirrels given me in the early spring of 1893. They were very easily tamed, and I gave them nuts to eat and branches to climb over, and thought I had provided for all their wants. After a month or so I found there was something wrong, as they seemed weak or hurt, two of them dragging their hindquarters and running with difficulty. After watching them carefully for some time I came to the conclusion that I was not feeding them their natural food, and then I tried to picture their life and what they might eat under such conditions. I began by trying even at this late day to supply the loss of the mother, and gave them milk, which they would take from the end of my finger a drop at a time. Sometimes I sweetened it very slightly and warmed it. When they tired of this and would not take it, I gave them a thin custard—slightly sweetened, but the best thing of all, and the one that seemed to give them the most strength was rice pudding—the old-fashioned poor man's pudding. A little glass dish of the milky part with a little rice left in it was put on their table in the evening and in the morning was well eaten. Then I tried mushrooms with great success.

My next experiment was in making the conditions of their life more natural. I got a good-sized, common kitchen table, had an edge put round it a couple of inches high, filled it with wood earth and planted it with moss, grass, ferns and a few mossy stones. At one side was a glass dish for water, which I was careful to have fresh every evening, for the flying squirrel is nocturnal, sleeping all day, coming out as the sun goes down, and eating very little till about 10 o'clock or later. I put a long mossy stick at the back of the table, and round the edge, hanging down, I tacked a chintz or rather printed cheese cloth curtain to keep them from falling off, as I feared they could not cling to the wooden edge. I put a small cage—a flying squirrel cage—at one end of the table and filled the floor of it with moss, this because they are passionately fond of the turning wheel and spend hours in it, all three at a time, getting the exercise of many miles of running, I should think. Next, some branches with plenty of twigs, one leading to the floor for a ladder in case they fell off, and some to the window curtains on either side of the table.

By chance I found they eagerly eat roses, the end of the rose leaves, maple blossoms and the ripened seed vessels, the nuts of the witch hazel, the acorns of the scrub oak, and indeed all acorns, and the pine cones as they open in the autumn. From these they pick the little flying seed. All these I give them on the branch, so that they may take them off and so keep their teeth in order. I give them all kinds of fruit. They will pick quite a large bush of blueberries in a night, leaving hardly a berry. The nut they like the best is the soft shell almond. All the others they tire of, even of chestnuts. I give them English walnuts, pecan nuts and peanuts and beechnuts.

Occasionally I find a piece of well rotted hemlock in the woods. This they tear all to pieces, rolling themselves in the scraps. They take earth baths quite regularly. When they stop I know it is time to put fresh wood earth under the moss, which of course I keep lightly watered. On the wall I have a bracket covered with a piece of cloth, again to keep them from slipping off the smooth wood, and on this is a double-lidded basket (a candy basket). I keep one lid a little raised by resting on the turned in handle. In it I put some cotton wool. Over it I throw a handkerchief, as they do not like the insecurity of the open lid. In this they live in perfect content (they are uneasy if the basket is on the table). They have grown strong and vigorous and are in perfect condition, and of course very tame.

This is a very long letter of suggestions, but there was much to say, and all of it necessary for the health of these fairy-like little creatures. I should be glad to hear of your five and that they are doing well.

EMILY D. TYSON.

*Editor Forest and Stream:*

Anent flying squirrels and what they eat. We had one in our cellar once some six years ago. We bought potatoes a bushel at a time, and now and then some were missed. Some telltale pieces led to the discovery of a considerable quantity snugly stored away under a platform. Cakes and other eatables were attacked, and one time a cake filled with English walnut meats was nearly consumed. It was a mystery how mice or rats could reach these things, placed as they were. Finally a new tin wash boiler was procured to protect them. One night my lucubrations were disturbed by noises from the cellar, and taking a lamp I went down. The culprit was perched on the side of the boiler. He allowed me to come, lamp in hand, near enough to touch him, and remained some time. I thought him a squirrel. I had never seen a flying squirrel, but when I had gone back up stairs readily identified him from the description and illustration I found in the encyclopædia.

A taxidermist friend wanted him, and we were willing to part with one who had caused us so much annoyance. A box trap was improvised and the game secured. My friend came for him and saw him plainly in the trap, and took him home in the passenger car. When he transferred him to a wire cage he found that he had a large, ferocious rat, and the wood of the box trap was eaten nearly through. In ten minutes he could have escaped, and what might not have happened in the car is hard to tell.

There was no doubt about the squirrel having been there, however, for we learned that one had been turned loose shortly before by a nearby neighbor. We never heard of it after, nor were we troubled by rats, either before or afterward.

Here is one instance where the squirrel failed to drive out the rats. WYKIE.

### Barn Owls.

SIOUX FALLS, S. D.—While in Nebraska I saw a pair of owls that while perhaps common enough elsewhere were new to me and also to those in that vicinity. They were captured in a nest that was found in the schoolhouse, and perhaps a brief description may be interesting to your readers. The birds were about grown and stood about 10 or 11in. high, were brown on the back and white on the breast, the feathers on the head and neck stood out and gave a round shape to the head with no evidence of the familiar ears common on owls. The beak was completely buried in the feathers which were white, while around was a narrow circle of brown feathers giving the appearance of a monkey's face, a name given the birds by the finder. Whether the bird is rare or not I do not know, but no one in the vicinity ever saw one like it before. W. R. H.

[The owls are no doubt barn owls (*Strix pratincola*).]

### The Call of the Coon.

ESSEX COUNTY, N. Y., Sept. 10.—*Editor Forest and Stream:* There are doubtless among the readers of FOREST AND STREAM those who positively know what the call or whistle of the raccoon is, if indeed he has any, loud enough to be heard any distance. Until last fall I was sure I knew the call of the coon; now, however, I am sure I do not. Old hunters about here laugh at the amateur who tells of hearing coons whistling by night. They say that every time, if it were traced up, it would be found to be a small owl, and this is my personal experience. Last fall I was attracted about nightfall to the door by the familiar sound. I could almost have sworn it was a coon down by the lake. Presently, however, a small owl flapped out of a pear tree near by. I would very much like to hear from "them ez knows."

HEATHCOTE.

### Tame Rose-Breasted Grosbeak.

PRINCE'S BAY, N. Y.—A lady here in the village has a rose-breasted grosbeak which she has had since last April. He whistles away all day and seems to enjoy life with the rest of the family, being very tame. I thought it was a rare bird in these parts. A. L. H.

[While the rose-breasted grosbeak is nowhere a very common bird it has a wide range and is not infrequently seen in captivity. It makes a beautiful pet.]

# Game Bag and Gun.

## CHICAGO AND THE WEST.

[*From our Staff Correspondent.*]

### Up in the Arctics.

CHICAGO, Ill., Sept. 15.—A Winnipeg, Man., journal has the following to say in regard to a journey well up into the Arctics recently made by a lady of adventuresome turn of mind. The McKenzie country remains as yet comparatively little known by even the most daring of American travelers. Mrs. Shaw-Colcleugh's successful feat will entitle her to the respect of the sterner sex even though it win the horrified surprise of the fairer. But there is no telling what woman is going to do these days. One can only regret that a lady showing so much pluck and determination could not resist the temptation to fall into poetry. The account says:

Mrs Emma Shaw Colcleugh has returned to the city from another of those trips which have given her much celebrity as a traveler. Always seeking out unbeaten tracks for her journeys, she this year decided upon going to the remote and little known McKenzie River region, where only one other white woman tourist had ever preceded her, and that was Miss Taylor, daughter of the late U. S. Consul. Mrs. Colcleugh's trip occupied over three months and during that time she covered fully 6,000 miles. Speaking of her trip to-day, Mrs. Colcleugh said it was not one that she would recommend to the average tourists, as there were many little drawbacks to be met with that would frighten those who could not find pleasure unless it was associated with the luxuries of palace cars and sumptuous hotels. She had, however, accepted everything as she found it and managed to get along very comfortably. The character of the country, its remoteness from civilization, the old trading forts and their historical connections, the various Indian types met with, and the novel life on the open boats on the unnavigable stretches had a charm and fascination all their own which were truly interesting and keeps one's imagination continually active. The northward journey terminated at Fort McPherson, on the Peel River, near the 17° of latitude. Here Mrs. Colcleugh had the good fortune of finding a camp of Eskimos from the Arctic regions. She found these strange people very interesting and brought away with her poetical, photographic and other souvenirs of them. Mrs. Colcleugh secured much data for magazine articles and lectures which she intends to give to the public shortly. Besides her prose description of the rivers, lakes, scenic wonders of the North, Hudson's Bay forts, etc., she also composed several poems on scenes and incidents met with on the journey. On the way home an unlooked for delay occurred and provisions running short the rations were limited to pork and bannock for several days; but the keen air and excitement inspired by the surroundings gave one such an appetite that this substantial food was eaten with a relish. The steamboat journey on the McKenzie River alone from Slave Lake and back was 4,000 miles. Mrs. Colcleugh speaks very highly of all the Hudson's Bay officials, who treated her with every possible courtesy and kindness.

### Again the Butchers.

A FOREST AND STREAM friend who lives in Nebraska sends me the following under date of Sept. 7:

"I inclose a clipping from the *Daily State Journal* of Lincoln, Neb., for Aug. 29, telling how a party from there are killing game in the West. It will not be many years before these same fellows will be wondering where the game is all gone. I do not claim to be perfect in that line, but will say that out of several trips in the West, aggregating nearly five months, in the big game regions, and with parties of from five to ten, we never in that time killed as much game as this party of 'gentlemen' seem to have slaughtered in a few days, mostly to rot, as anyone must know who has hunted in the west. H."

The clipping reads:

The Fremont (Wyo.) *Clipper* tells of the exploits of a company of hunters composed of H. M. Rice of this city, A. Wannfried of Omaha and several Chicago gentlemen in northern Wyoming. Mr. Rice is quoted as saying that they shot sixty-four antelope, nineteen elk and nine bear, and for that reason their wagon was so heavily loaded they could not proceed on their way to Yellowstone Park without returning to Lander to rid themselves of the results of their prowess.

It is an old story, this of senseless, absurd, cruel and inhuman butchery. It creates no surprise to hear that the butchers are at it again. But it will never cease to create disgust in the heart of any man who has really the shadow of a claim to the misused title of gentleman.

### There Are Doves in Mexico Also.

A gentleman who is well known in FOREST AND STREAM by his too rarely seen pen name of "Aztec," writes all the way from San Luis Potosi, the same being a *ciudad* located away down in *Mexico Viejo* (get on to my Spanish), as follows:

"I was amused and pleased at your account of the dove 'holocaust' in Tennessee. I began to shoot doves during the four years I lived in California. Since coming here I have kept it up, as this country is full of them summer and winter. After about ten years' practice I was beginning to get ashamed of myself that I still missed about two out of three, and had made up my mind that I was no sort of a shot anyhow. I can kill ducks pretty frequently, and though I have had very little practice for a long time, can give a fair account of myself with quail. I had long had a suspicion that it was easier to kill a duck even on a pass and in the wind than to stop a traveling dove, but I was just a little timid about saying so. Just let a dove have business at a pond about two miles away and be going with the wind besides, and the fastest member of the duck tribe is not in it with him.

"By the way, it is a common thing to meet with the prejudice against dove shooting even in the South, where they are so abundant. The negroes of the old regime think it both a shame and a waste of ammunition to kill a dove, and many Southern ladies will not eat them. The darkies hold that it is wrong to kill the descendants of the bird that brought good news to Noah in the Ark. As for the ammunition question, it was a common notion in the country districts of southwest Missouri, where I was brought up, that even Bob White was not worth a load of shot, except when there was a probability of potting a flock."

Some time, if I ever go to Mexico again, I shall inaugurate another war of extermination in company with "Aztec," feeling sure of his sympathy if we only get every other bird, any maybe not that.

### Wants to Know About Skis.

Mr. Hugh P. Blackinton, of Blackinton, Mass., will pardon me if I print his letter asking for information about *skis:*

"I am very fond," he says, "of all winter sports, and for several years past have gotten much pleasure in long tramps over our Berkshire hills on Indian snowshoes. Last year for the first time I attempted to navigate with the Norwegian *ski*—on a home-made pair, made with only the vaguest idea of the essential points; but crude though they were, they served to make me realize the possibilities of grand sport in them. With a little practice I learned to coast easily on them, but was not able to wear them on a tramp with any comfort. The motion seemed very awkward and hard, and I could not make a go of it up hill. Your description of corduroying up a grade, I think, makes this point clear with me; but I do not understand how you keep your toe in the toe-cap. Is there a strap (which can be detached) going up over the heel to keep the foot from sliding backward, and if so, how is this usually attached?

"Can you wear the *skis* with moccasins, or is it necessary to wear a heavy boot as a support to the toe in pushing the shoe?

"In walking along a side grade when the ice has formed under my foot I find it almost impossible to keep my foot from sliding off the *ski* and thus disengaging my toe from the cap. I presume a heel strap—if such a thing is used—might in a way remedy this difficulty—though I hardly see how it could be overcome entirely.

"I am very much interested in this sport and am bound to have some of it this winter, and if you could give me some suggestions as to making my *skis* or refer me to any book giving me this information and posting me a little more thoroughly as to their use, I shall be grateful."

There is no book on *ski* going so far as I know, and it would be worthless if there were one. The only way to learn a sport is to practice it, at first if possible under one proficient in it. Mr. Blackinton's troubles are those usual with the beginner on *skis*. He needs first of all a good pair of *skis*, which he can get by addressing any sporting goods house in St. Paul (I don't know why Eastern dealers do not keep them, and do not see why the sport is not more generally practiced in the East) He will find that the *ski* has a heel strap which will hold the toe from slipping back out of the toe strap. This heel strap is not fastened to the *ski* at the heel, as that of course would destroy all play of the foot up or down, which is as necessary with the *ski* as with the web shoe. Some of the finest *ski* men, however, will not strap the *ski* to the foot at all, and on the most dangerous runs it is best not to do so, as a fall would then possibly wrench the ankle. In a swift coast the *ski* runner drives his toes well forward into the toe straps, and as the *skis* always go ahead, and he always goes as fast as they do, he needs no firmer connection with them than is thus afforded. Most men in ordinary travel want the *ski* strapped on, but this does not give firmness so much as security against losing the shoe. In taking a side hill one walks on the inner edge of his *skis*, with only the edge holding on the snow, and sometimes with his heel clear inside of that and off the *ski*, giving him firmer grip on a smooth crust. His strength and stiffness of ankle must give him control of the shoes here, for all the heel-strap does is to keep the foot in the toe-strap. To gain this control over the *skis* takes muscle and practice, but one needs the proper footwear. This I described in the Yellowstone Park papers lately published in FOREST AND STREAM. A moccasin will do if worn inside a stout overshoe. A "heavy boot" would not do at all, but would ruin the foot. One needs pliable yet firm foot covering of a sort to turn the grinding snow.

The *ski* gait is not so tiresome as that of the web shoe, because one does not have to lift the *ski* at each step, and he has the great privilege of resting while going down hill. There is no more pleasant feeling in the world than that of the *ski* step on a gentle grade—unless it be the exhilaration of the run where one takes no step at all, but only glides. The art of getting up hill is uncommunicable by words. The only way is to see another fellow do it, and then try to do it one's self.

In a hilly country of long grades, and of snow that packs to any extent, there is no reason for the existence of the web shoe except the reasons of conservatism and custom. In a country like that of the Park the web shoe would rightly be scoffed at as being unfitted to the environment. The web shoe is at home in level country, soft snow, and timber, where one has to climb around and pick his way over logs, etc. I should like to see the sport of *ski* gain a footing in the East. It is a manly sport, far and away passing tennis, golf, bicycling and tiddledewinks.

### Improved the Senator's Health.

Despatches say that Gen. Nelson A. Miles, Senator John Sherman and party were at Hot Springs, S. D., last week, shooting prairie chickens and bathing, and that Senator Sherman's health was improved. By which?

Mr. J. M. Jones of Chicago, his friend John Howley, once of Chicago but now of New York city, and other friends have set out for Dakota on their regular annual hunt after chickens.

### Colorado Deer.

Mr. W. J. Letts, of Sedalia, Mo., writes me:

"Four tenderfeet would like to take a trip to the mountains of Colorado for pleasure, and deer, and as our time would be limited to fifteen or twenty days would not want to go a great way from railroad. Can you recommend place, guide, and give estimate of cost of guide and wagon transportation?"

The gentlemen are taking altogether too little time for a pleasant and successful trip of the sort they propose, and they are moreover asking some questions I can't answer and which I wish some one out in Colorado would. My friend Dick Merrill, of Milwaukee, tells me that he and his friends had good success deer hunting north of Delta, Colo., (on the D. & R G. Ry.) They were the guests of Henry Koehler, of the Bar I ranch, north of Delta, and they took 26 pack horses of the Bar I into the mountains with them. The Bar I outfit is hardly guiding for anybody, but perhaps Mr. Koehler would advise an inquirer whom to address in that section for a guide and outfit. Mr. Merrill and his friends got plenty of deer. Will some Colorado friend do better than this for us by way of specific advice?

### Base Libel and a Snake Story.

A few weeks ago I was at New York. I always like to go there, it is so restful. It is a pleasure to hear the meadow-larks singing on the fence in the morning, and to look out of the window and see the hired men going out to milk the cows and get the early chores done; and in the evening it is nice to sit on the steps of the main store and look at the teams hitched to the fence around the court house, in the Union Square, and see the boys taking the girls into the ice cream saloon at the corner of the Square—it's a real good place, too. Anyhow, if I hadn't gone to New York I probably wouldn't have gone to Altoona, up in the Pennsylvania mountains; and if I hadn't gone there, I wouldn't have had this snake story, the truth of which I will leave to Mr. Edward Banks, who has joined the FOREST AND STREAM family in New York, and who cannot, therefore, err on the side of accuracy.

Mr. Banks and I rode up the picturesque narrow-gauge road, which climbs 1,500ft. in its seven miles of crookedness, to the Hotel Wopsononock, where the big trap tourment was held the week before. Having nothing else to do, we walked out into the woods, over some good ruffed grouse country, hoping to start a bird or so for the pleasure of seeing them go, just as one sets off any sort of fireworks. We didn't find any birds, and I lay down and went to sleep, while Mr. Banks read FOREST AND STREAM, an arrangement we found mutually satisfactory for a time, though Mr. Banks alleges I snored, in which he must certainly be mistaken. Well, we were walking home along the road a little later, when all at once we heard at our feet the universally understood and always terrifying note of a rattlesnake. Instinctively we both sprang back, and on the instant saw the rattler, a great, lazy, fat, black fellow, about 3½ft. long. He was lying at full length on a flat rock, with hardly a bend in his lazy body, but the stubby tail was erect for about 3in. of its length and was running faster than a milk-shake machine. He was a buzzer, sure. It is all a mistake to think a rattlesnake has to coil before it can rattle. He can rattle with both hands tied and in any sort of shape.

The old fellow crawled about three or four inches toward the cover when we jumped back, and seemed to say that it could be peace or war, just as we liked. We declared war, and threw a stone which struck him on the tail. In an instant he was on guard, in a loose coil, or rather loop, his body lying in horseshoe shape on the ground, his head up about six inches. We flung other stones in rapid succession and hurt him badly, but he never showed the white feather or tried to get away. He only struck once, that after he had been stove in amidships, and when he struck he showed no judgment whatever. He sprang out of his loose coil as quick as lightning, and drove his fangs sheer against the flat rock on which he had been lying. This was in quite the opposite direction from us. In striking, he sprang from a very loose coil, and went to a distance of all but about six or eight inches of his length. Perhaps he would have struck oftener had not the rock hurt his teeth, or had we not disturbed the alignment of his spinal column soon thereafter. This snake was very black, especially near the tail. Mr. Banks said it was the male snake, and that the female, of a yellower color, was no doubt near by. (A great many rattlesnakes are killed in that locality.)

We carried our prize back to the hotel, and decided to feed it to Dick, the pet raccoon which makes one of the main attractions of the hotel. Dick is usually good natured, and we had tousled him around all the morning. Now he was asleep in his box, but when we poked the snake in to him, he woke up and came out, following it eagerly. Mr. Banks pulled it away from him and Dick ran to the end of his chain and stood up on his hindlegs, in evident ill temper, because he bit me when I tried to touch him then, as he will any one when he is feeding. As soon as Dick got hold of the snake he set deliberately to work to eat it, and began directly at the head as being the tenderest part. He bit the rattler's head all over and tried to eat the softer parts, including the tongue. If he knew that that was the dangerous part of a rattler he didn't let on about it, and acted as though he had eaten many a one before. He did not actually eat the head, but only the crushed portion of it, He is so old that his teeth are bad and he could not tear the snake up very well, though he did all he could with his claws. He rejected the skin altogether, but as soon as he had gotten a hole or two torn through it he took the snake to his water-pail and carefully washed it, after coon fashion, and then worked at it diligently for an hour, finally leaving it hardly more than a flat piece of skin. Whether he ate the poison bag or not I don't know, but he started in at that end as though he was exploring for *delicatessen*. No doubt the poison would have been harmless had he eaten it. I think the fangs of the snake were broken when it struck on the rock, though we could feel them snag slightly on the string with which we explored the upper jaw.

If there is a Wopsononock rattler of female persuasion which is shy a dark-complexioned consort, she can have the same, or satisfaction for the same, by applying to Dick, the hotel coon; but I am disposed to think that she would best keep some distance away from Dick, or he will add her to the obsequies. I wonder if wild raccoons attack wild rattlesnakes, but we are not yet far enough along to say more than that one tame raccoon ate one dead rattlesnake.

There are two young red foxes also kept captive at this hotel, the slimmest, thinnest things one ever saw, and the most unspeakably suspicious and shy. Yet toward evening they grow lively, and romp and play like a pair of kittens, so far as their chains will allow them. Not so the big wildcat in the grated cage. He is perennially out of humor, and growls if you come within 20ft. of him. All the above animals are native in number around Altoona, as well as deer and turkeys and squirrels in abundance also; all of which it surprised me to learn. To the Western mind there is no game so far East as that.

### Chicago Includes Russia Also.

As long as Chicago and the West has gotten so far East as this, it might as well take in Russia, too, and I don't mind telling what I know about hunting bear in Russia. My information comes from Mr. H. J. Sprengle, who was the representative of the W. W. Greener gun at the World's Fair. Mr. Sprengle once lived in St. Petersburg, and while he was up in this office the other day he told me how they hunt bear in Russia. He says it is a very expensive sport, but not difficult nor extremely dangerous as it is sometimes practiced, though the bears are very large.

The bear hunt comes off in winter, after the bears have gone into their hibernation quarters. When the peasants of a village learn there is a bear required, they go out and locate one in his winter quarters, thus saving the hunter a deal of trouble. Then the head villager demands a certain sum, which may be over $50, often less, for the privilege of a shot. He does not guarantee the hunter to kill the bear, he only guarantees that he will get a shot, or get a chance for a shot. If the hunter is one of experience, he will not pay over his money till he has had his shot, for there are tricks in this trade. A live bear is worth

more to the village than a dead one, and if the hunter is thought to be easily imposed upon, the line of beaters will drive the bear out so that it will be impossible or difficult to kill it; but they will hold on to the money just the same.

After the financial arrangements are concluded, the hunting party sets out in the morning and repairs to the spot where the bear is snoozing away in his six-months' nap. The hunter can, in some cases, go up to the edge of the hole in the snow, poke his gun against the bear's head and blow him into the ursine hereafter. If he is a very brave man, he takes the chance of a shot on the run, the bear being herded up to him, like an ox, by the line of beaters, which is apt to include pretty much the entire male population of the village. If he shoots, he has to settle, and the excuse of no meat doesn't go. Russia is the only place I know of where they shoot bears at the trap. They are high rollers over there. I never heard of this before, but there is no telling what is liable to be happening around Chicago.

### From Far Away Alberta.

Some one has sent me a copy of the Edmonton, Alberta, *Bulletin* of Aug. 27, on one page of which I notice several items which might make one think it a curious and unknown country, this far-away Alberta, and one where the wildness is not yet all gone. We read of the wood buffalo, thus:

Of the wood buffaloes shot in the Athabasca district last week only one specimen has found its way to town. This was brought down last week by J. Carlton of Fort Chipewyan and was the only one shot by him this winter. He brought the whole hide; head, hoofs and tail intact, so that it could be set up as a museum specimen. The hide is 10ft. in length, its girth 8ft. The wood buffalo is fast becoming extinct. The Indians hunt them whenever they can. In season or out is the same to them. They follow them for weeks at a time, very often being unsuccessful, but they are fond of the meat and will endure many hardships to get it.

There are ducks, also, as witness:

The duck shooting opened on Thursday, and several sports in town hied themselves off to the nearest lakes only to find the ducks swimming about with down on and quite unable to fly. Last spring was a very late one and as a consequence the ducks did not begin to lay until late in May; the result is the birds are late in maturing and will not be ready to shoot for at least three weeks. Local sports have decided to defer their shooting until the birds can fly.

E. HOUGH.

909 SECURITY BUILDING, Chicago.

## MAINE AND THE EAST.

MR. J. E. HALL, well known in the Boston paper trade, is a lover of the woods and streams. But the line and rod, with the shotgun in season, must be there. He hopes to start, with a party of friends, in a day or two for their own special camping ground. It is on the West Branch of the Pleasant River, in Maine. They go in by the Katahdin Iron Works, and thence some six or eight miles by buckboard and carry to West Branch Pond, where they have a camp. The spot is said to be a beautiful one and the fishing excellent. Mr. Hall especially mentions the tramp in through the woods. The shotgun is taken, at the proper season, and ten or twelve birds is the usual quota for the camp, without much hunting. But the carrry is not always dry and dusty, though it may be this year. It is sometimes very wet in fact, and wading has to be done through brooks and swampy places. The party this time will include Mr. Hall's brother, H. C. Hall, of J. J. Hall & Co, Mr. DeFord of State street, and Mr. Chas. E. Pierce of the New York Biscuit Co.

Mr. N. G. Manson, Jr., of Bellows & Manson, is at Camp Leatherstocking, his own beautiful place on Cherry Tree Point on Richardson Lake. Mr. Bynner of the Cambridge hardware trade is with him, and also Mrs. Bynner. His brother, Mr. H. Manson, is there. Oscar W. Cutting is guide and chief factotum about the camp. His courage cannot be beaten, and he is getting down to the new steam launch, that Mr. Manson has put in this season, with a good deal of skill.

Mr. Henry Whitmore, better known in the Boston *Herald* office, where he is real estate editor, as "Harry," is off for his vacation, and Mrs. Whitmore is with him. They go to Allerton Lodge, on the east shore of Lake Mooselucmaguntic, the guests of Mr. Hal Haskell, son of Hon. E. B. Haskell, of the Boston *Herald*.

The bird shooters along the Massachusetts shore are somewhat discouraged. The weather is fearfully dry, and the swamps and marshes are destitute of water. Birds fly along shore, but they do not stop. Their feeding grounds are dried up. Mr. Claude B. Tarbox has been out again at Byfield, but saw very few birds. He scarcely fired a shot, though hearing a few yellow-legs. At Ipswich Bay and at the mouth of the Ipswich River a few beach plover are reported. Mr. Henry Powers mentions a bag of sixteen or seventeen made on Labor Day. But he says that the beach was overrun with gunners and with birds very scarce. An expert gunner at that point says that there is little inducement for him to try for birds at present. In the first place, there are too many gunners firing at targets of all sorts to such an extent that not a bird would alight. Later the mass of gunners will have got tired, and then he will put out his decoys and be ready. A few flocks of young black duck have been seen at that point, and one or two bags have been made by those who know where to go.

Mr. Charles L. Bly is just back from a very pleasant fishing trip to Round Mountain Lake in Maine. There were three other gentlemen in the party with their wives, besides Mr. and Mrs. Bly. They went first to Billy Soule's at Pleasant Island, in Cupsuptic Lake, but finding almost too many people there they concluded to try Round Mountain Lake again. The fishing they found good, for the gamy small trout of that region, and the woods are beautiful as ever. Deer are plenty, and they saw numbers of partridges or ruffed grouse.

A pitiful story of deer slaughter is current in the Rangeleys. I do not know that it is true, but it comes to me from sources that there is no reason to doubt. But the difficulty in such cases is to get positive evidence. At the best much comes from hearsay. A Boston merchant, who owns camps there, is reported to have killed five deer this summer under the jacklight. He did not get the coveted antlers—he should have known that it was not the season for fine heads—and so he kept killing. He simply took photographs of his booty, and then sunk them in the lake. This is an old trick; that of killing moose and deer in close time, and then, since they cannot be brought out to camps or settlements, why, tie a stone to the carcass and sink it. But permit me to plead right here with the man who shot those deer. Why will he do such a thing? He is only robbing his brother hunters of sport that rightfully belongs to them, in the open season. Then if he wants to butcher, why hire out with some butcher and bleed calves. Or he could, some evening, get a chance to butcher lambs, if he would apply at the abattoir. I hardly think that the law will ever reach him. He has money and can easily shut the mouths of guides. As for wardens; well, let the wardens answer.

I learn that the number of hunters going into Maine this year is something almost appalling. The quantity of deer there has been so thoroughly advertised that the Maine Central and other railroads will reap a rich harvest out of the hunting travel, as they have already done out of the fishing travel. Wonder if these roads will feel kindly toward the FOREST AND STREAM and other papers for what they have done in making the game and fish situation known? Already the gunners are moving that way. It comes to me from good authority that the baggage master on one of the Bangor & Aroostook trains had twenty-four rifles aboard the other night, and that a dozen a day is not at all a large number. "The woods will evidently be full of them" by the time the season opens. Experienced hunters, who have annually visited certain sections in Maine, tell me that they are positively afraid of their lives this fall if they attempt to hunt where there are so many guns.

SPECIAL.

## SPORTSMEN'S EXHIBITION.

THE following notice was sent out last week to all the gun, fishing tackle and sporting goods houses in New York and vicinity:

NEW YORK, Sept. 1.—Dear Sir: Pursuant to a call issued by a number of prominent firms, a meeting was held August 27, at the rooms of the Hardware Club, for the purpose of considering the question of holding an exposition of sportsmen's goods.

It was decided at this meeting that an exposition be held at the Madison Square Garden, in May, 1895, and the undersigned were appointed a committee to make the neeessary arrangements, and to call a general meeting on Sept, 18, to effect a permanent organization which shall carry the project to a complete success.

The committee has made arrangements wiih the Madison Square Garden Co. to hold the exposition, to last one week, from May 8th to 13th inclusive, and to allow proper time to erect and remove exhibits. The Garden Co. agrees to assume the entire financial responsibility.

The committee has divided the exhibits into the following classes, which it is thought will completely cover all desirable lines:

Class A.—Firearms.
Class B.—Ammunition.
Class C.—Sporting sundries.
Class D.—Fishing tackle.
Class E.—Boats, canoes, etc.
Class F.—Camping outfits.
Class G.—Athletic goods.
Class H.—Kennel supplies.
Class I.—Zoölogy and taxidermy.
Class K.—Cameras and photographic supplies.
Class L.—Saddles and bridles.
Class M.—Sportsmen's art and literature.
Class N.—Trophies and loan collections.

The committee having thoroughly canvassed the matter, is fully convinced that a grand and successful exposition can be held, highly educational and of great benefit as an advertising medium to all who may take part in it. A number of prominent firms in the different lines, have warmly entered into the project.

The meeting will be held on Sept. 18, Tuesday, at 2 P. M., at the rooms of the Hardware Club, in the Postal Telegraph Building, corner of Broadway and Murray street, and will hear the report of the committee, elect officers, appoint committees and curators, and take such steps as shall succesfully launch the undertaking.

It is desirable that there should be as large an attendance as possible, and you are earnestly requested to be present. Should this be impossible, please be represented by proxy Kindly inform the secretary, at the earliest possible moment, of your willingness and intention to be present. Respectfully presented. THE COMMITTEE.

CHAS. TATHAM, of Tatham & Bros., Chairman.
CHAS. DALY, of Schoverling, Daly & Gales.
F S. WEBSTER, of the Webster Studio.
JUSTUS VON LENGERKE, of Von Lengerke & Detmold.
J A. H. DRESSEL, Sec'y,
of Union Metallic Cartridge Co., 313 Broadway, N. Y.

The meeting thus called was held in the rooms of the Hardware Club on Tuesday last for the purpose of forming a permanent organization. Among those present were Col. P. G. Sanford, Capt. A. W. Money, Messrs. J. A. H. Dressel, Wm. Lyman, W. K. Park, Chas. Daly, Chas. Tatham, Justus Von Lengerke, Armin Tenner, T. W. Franklin, H. A. Penrose, F. S. Webster, J. W. Spalding, Chas. Wiebusch.

The meeting was called to order at 2:15 with Charles Tatham in the chair. Minutes of last meeting were read by Secretary Dressel, who then read a number of letters from firms interested in the exhibition, written in answer to the circular letter recently sent out. These contained a reasonable amount of encouragement, and several important firms stated their intention of exhibiting. The report of the executive committee was accepted.

Then the question of holding an exhibition came up. Mr. von Lengerke moved that an exhibition be held in Madison Square Garden May 13 to 18. The motion was seconded. Secretary Dressel stated that the cost of the exhibition, in addition to the rent of the Garden ($8,500) would include carpenter work, which at the last cycle show amounted to $3,500; music, which at that exhibit cost $1,000; advertising and the maintenance of a bureau of information. Revenue would be derived from the sale of the programme and from the restaurant.

In the discussion which followed, Mr. Spalding, of the firm of A. G. Spalding & Bros., asked what kind of fixings would be used for the exhibits. He said that often the booths and fixtures cost more than the rental of the spaces, and that he believed in having some uniform arrangement for all exhibitors.

Mr. von Lengerke answered that while a uniform arrangement for bicycle exhibitors had answered very well, it would not do in the present case, where the exhibits differed so greatly. He cited the case of guns, boats and natural history specimens, which would each require a different display.

Mr. Spalding answered that his sole object was to limit the expense which always resulted from rivalry of exhibitors.

Mr. Daly said that he did not see how it would be practical to limit the exhibitors as to their fittings. Mr. Webster said that he believed the success of the exhibition depended on the display, and that he would be glad to see rivalry and enterprising exhibits. Motion to hold exhibition was carried.

Four days will be allowed members to prepare their exhibits, and two days to take them away. The cost of spaces will range from $30 to $200, varying according to location and size, the average price for a space 9½×12½ being $100.

Mr. von Lengerke moved that a permanent organization be formed to be called the Sportsman's Exhibition Association, and that signatures be secured from those present pledging themselves to exhibit. Motion was carried.

Mr. Dressel then read the form of pledge, as follows:

We, the undersigned, agree to become members of an association, the object of which is to hold an exhibition in Madison Square Garden May 13 to 18, 1895.

The following signatures were secured: The Schultze Gunpowder Co., Fred. Sauter, Walsrode Smokeless Powder Co., Wm. Lyman, Armin Tenner. Wilkes-Barre Gun Co., Cornwall & Jespersen, Colt's Patent Firearms Co., Rolla O. Heikes, Chamberlin Cartridge Co., E. I. DuPont de Nemours & Co., Frank Lawrence, Union Metallic Cartridge Co., Hartley & Graham, Remington Arms Co., Bridgeport Gun Implement Co., W. W. Hart & Co., Tatham Bros., Winchester Repeating Arms Co., Wiebusch & Hilger, Ltd., Union Hardware Co., Standard Keystone Target Co., American E. C. Powder Co., Brooklyn Knitting Co., Spratts Patent, Ltd., A. G Spalding & Bros., Geo. Barnard Co., Schoverling, Daly & Gales, Forehand Arms Co., Narragansett Machine Co., F. S. Webster, John T. Bailey, W. G. Paddock, Stewart & Stau, Von Lengerke & Detmold, J. H. Studer.

Mr. Franklin moved that temporary officers hold over till election of board of directors. Motion seconded and carried. Moved that a nominating committee of seven, composed of members, temporary executive committee and two additional, be appointed to select permanent officers for organization. Carried. The committee composed of Chas. Tatham, Chas. Daly, F. S. Webster, Justus von Lengerke, J. A. H. Dressel, T. W. Franklin and J. H. Studer, then adjourned for fifteen minutes. On their return the following slate was named:

President, Chas. Tatham; Vice-Presidents, Chas. Daly, Wm. J. Bruff, J. Walter Spalding, John H. Hall, A. W. Hooper, Chas. Imbrie, Solomon Turk, G. B. Grinnell, Wm. Hart, Chas. Wiebusch, T. W. Bryant, Dr. N. Rowe, A. C. Gould, L. C. Bruce, A. W. Money, J. H. Studer, Chas W. Mowry, J. Seaver Page, Wm. Lyman, F. S. Webster, Eugene DuPont; Secretary, F. S. Webster; Treasurer, J. A. H. Dressel; Executive Committee, Chas. Tatham, Chas. Daly, J. von Lengerke, F. S. Webster, J. H. Studer, T. W. Franklin, A. Walter Spalding, J. A. H. Dressel, P. G. Sanford. The nominations were ratified.

### Connecticut Game.

TORRINGTON, Conn.—The law is off on quail, woodcock and partridge the first of next month. There are quite a good many of these birds especially quail; I know of nine coveys within two miles of this village back a few miles in the country. The farmers report partridge plentier than they have been in five years. If any readers of FOREST AND STREAM want to have a good time shooting and fishing during the months of October and November, western Connecticut is a very good place to get it.

FRANK GRANT.

EAST HADDAM, Conn., Sept. 10.—The wild oat crop is very luxuriant this season and rail birds unusually plenty along the Connecticut River, and the beneficial effect of the trespass law is evident from the increased number of grouse, quail and woodcock. I have noticed in particular the woodcock, as they can be flushed from any undergrowth bordering the meadows. This, of course, is in a measure due to the dry weather driving them to the low ground for moisture, but they have also increased in numbers visibly to the observing sportsman.

P. A CLARK.

HADDAM, Conn., Sept. 11.—*Editor Forest and Stream*: I have not seen or heard of a woodcock this summer—the ground has been so dry, even in places usually wet and marshy, that I am sure the poor birds could not get their accustomed food. What the effect may be on our fall flight of this charming bird I cannot tell, but I fear they will be like the proverbial angel's visits. Quail were heard quite often in nesting time, but I have seen but one covey, and that was a splendid one of fully sixteen nearly grown birds, about a week since. There are some partridges scattered through the woods, and the season seems to have been favorable for rearing the young of both these birds, for they cannot endure rain and heavy dews any better than young turkeys. I hope for some sport with quail and partridge. A.

EAST HADDAM, Conn., Sept. 17.—The rail bird shooting has not been as good for years as at the present time. The following are some of my records since the first of September: The first day I bagged 15 birds, the second 27, the third 29 and the fourth 30. This is only two hours' shooting, as the tide only lasts about that time. The expense connected with this sport is very small, as you can get a man and boat for $2.50 per tide.

As some of your readers are not familiar with this shooting, I will endeavor to explain. The rail bird is nearly as large as a quail, and lives by the side of the river and in the covers and creeks that empty into the river. They feed upon the wild oats that grow on the banks. At low tide they can be hunted with a dog, but the best time is at high tide, when you can push a boat through the oats and get them up. They are very fine eating and cannot fail to tickle the palate of any American epicure, when nicely browned and served on toast. B. A. R.

### New York Game Prospects.

ITHACA, N. Y., Sept. 15.—Since my last letter referring to the game prospects in this locality, a marked development of the supply has manifested itself and I am able to report more accurately. The long continued drought confined the woodcock to very small ranges of cover; consequently a larger number of birds were shot than is usually the case. It's not often that one is able to shoot the longbills in early September on their summer ranges, as it was possible to do this year. Ruffed grouse are plentiful in most every part of this country, and late advices from Schuyler, Seneca, Cayuga, Cortland and Tioga county show that the supply is fully up to the average. The squirrel and rabbit season opened Sept. 1, along with the ruffed grouse season, and the gray squirrels are unusually plenty. Rabbits abound in goodly numbers, and later on will afford pleasant sport for the owners of beagles. M. CHILL.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable*

## SUMMER WOODCOCK SHOOTING.

WILKESBARRE, Pa., Sept. 13. — *Editor Forest and Stream:* As the question of midsummer woodcock shooting is being discussed quite freely pro and con by the sportsmen of this State at the present time in consequence of the proposed change in our laws concerning the season for the killing of that bird, I wish to be afforded an opportunity of expressing through your columns my views on the subject, as I know that through this medium they will reach more Pennsylvania sportsmen than in any other way.

Our Legislature has made the slaughter of woodcock lawful at any time subsequent to July 4 in any year, and many of our gunners who term themselves sportsmen and are members of clubs the object of which is the protection of game, avail themselves of the questionable privilege so inconsiderately permitted of commencing their work of carnage upon the gamiest of game birds at this unseasonable date. Many sportsmen and ornithologists allege, and I am inclined to believe that woodcocks raise two broods in a year. If this be true, the second brood has not been hatched, or, at any rate, is not sufficiently matured to care for itself when the law makes its slaughter legal. But whether two broods are raised in a year or not, I know, and every hunter experienced in the bagging of this bird is aware, that its killing in the month of July is not sport but pothunting. The birds killed then are often only half-grown, unable to fly with strength and easily knocked over in their sluggish flight by the veriest tyro. At this season woodcock shooting is no more to be compared with woodcock shooting in the true season (two months later) than bullhead fishing is with bass fishing. Woodcock in the dog days may almost be killed by the country lad with his slungshot, and with a shotgun require no skill, while in October it requires all the skill of an adept to fill his bag, and is genuine sport.

Prior to the close of the moulting season, which commences in the early part of August and closes in the latter part of September, the bird is not edible. The old birds are sick, lean and lousy after the period of incubation, and the young birds are insufficiently matured and not fit to be placed upon the table until their return from the uplands with their new plumage. The arguments used by the advocates of the midsummer season expose the true inwardness of the persons who advance them and are unsportsmanlike in the extreme. They are, that the birds are plenty in the month of July, and are easily shot, while in the month of October they are scarce, scattered and difficult to be shot. To a sportsman such arguments are simply absurd, as his mission is not the destruction of the game he seeks, but the pleasure derived from such excursions; and the more skill required, and the greater the difficulty of securing the game, the more pleasure it affords and the greater the sport.

Where is the sportsman who takes greater pride in a large bag of game easily secured than in a smaller one obtained with more difficulty? I never saw him. For this reason he refrains from joining the motley band which sallies out early in the morning of our nation's birthday and works havoc among the cocks of the wood, although the law gives him license so to do. He prefers to await the return of the bird from the moulting grounds, at which time it is full grown, strong, healthy and wary, and its killing something more than mere slaughter. Upon the statement that the bird is at this time naturally scarce and scattered, I take issue. It is scarce and scattered because of the merciless slaughter of young birds two months before, and if unmolested until the close of the moulting season, the birds, although more gamy and affording better sport, will be just as plentiful as at the opening of the midsummer season and not more scattered. D. J. W.

## THE PRAIRIE CHICKEN WAR.

WARREN, Minn., Sept. 9.—*Editor Forest and Stream:* War is raging throughout northern Minnesota and Dakota between the sportsman and the prairie chicken and grouse.

As in the Japan-China war, the odds are in the Japs' favor, so it is here; the sportsman as a rule fares the best in most of the expeditions that are taken.

Prairie chickens and grouse are found in goodly numbers throughout northern Minnesota, and resident sportsmen say that the crop of birds has not been so great for years. The season has now been open about ten days, and it is becoming difficult to approach within gun range of a covey of wise old prairie chickens. Not so with their cousin, grouse. His intellectual qualities are of a different stamp. He allows you to approach him and almost trample on him before he thinks of his personal safety. He of course finally attempts escape by flight, and then his female companion and their dozen offspring try to fly the gauntlet in pairs or threes and so on, until the happy family is extinct or in a badly demoralized condition.

There are a good many hunters now in this part of the State; the greater part of them are St. Paul and Minneapolis men. Some have been here since the season opened and more are arriving. Every day chartered cars are coming in containing sportsmen and their wives, porters, dogs, guns and camp outfits. Some of them go back with a respectable showing for their trip, while others could carry all they shot in their vest pocket.

I was amused last night by listening to a Minneapolis man who was telling some of his experiences at chicken hunting on this particular trip. It seemed that he had very poor luck in bringing the birds down, and after several days of unsuccessful shooting he became desperate and resolved to slaughter a chicken in any way that might present itself. When he had reached this decision he braced up and drove on. Presently his dog came to a stand, and with gun in hand he alighted from the wagon, and with a severe determination and a beating heart he commenced his journey in the direction of his dog on his hands and knees. After reaching his animal friend, he tried to locate the game by following out a direct line from the dog's nose. At last he discovered the bird, and found that he was almost upon it.

He stopped and took in the situation of things. He thought of catching the bird alive, and then he remembered that his game bag as yet lacked its first chicken. Then he thought it would be fairer and more the part of a true sportsman to throw his hat at the bird, scare it up, and shoot it on the wing. But again the thought of his empty game bag shot through his mind. At last he concluded that, on the whole, the best thing that he could do was to take deliberate aim, shoot the bird sitting, and kill it instantly so that it would not suffer pain. With the last resolution in mind he pressed the trigger. After the smoke cleared away, he picked up what was left of the bird after the charge of shot had first taken its allowance of elegant prairie chicken breast; and if no accident befell this gentleman, he arrived in Minneapolis early this morning with his vest pocket full of prairie chicken.

Every one who shoots a great deal will now and then make, and see made, some remarkable shots; but I think the longest shot I ever saw was made on a flock of chickens the other day by my partner, "Shorty" Stuart, with a Winchester shotgun. Our dogs came to a stand, and we alighted from the wagon. No sooner had we done so than the covey took to wing, fully 90yds. away. To shoot at that distance never entered my mind, but my friend Stuart concluded to shoot once for fun. We were both amazed to see three birds drop from the flock. We stepped the distance and found it 107 long paces to the first dead bird. The shot used was No. 7, 1⅛oz.

R. E. M.

## TEXAS AND THE SOUTHWEST.

THE first "norther" struck San Antonio on the 11th inst., breaking up the heated term and setting all migratory birds on the move. Thousands of plovers, curlew, blue-wing teal and shore birds have passed over this city in the past two weeks *en route* to the feeding grounds and winter resort *par excellence* to be found only on the Texas coast. Good bags of blue-wing teal are being made on the fresh-water lagoons along the coast, but the weather is so hot that the Texas sportsman has not yet donned his gum boots.

### Death of a Sportsman.

On Sept. 13 at 9:30 P.M. the soul of Geo. Paschal, one of nature's noblemen, passed to its maker. Mr. Paschal was mayor of San Antonio and one of the most successful lawyers in Texas. He was an ardent sportsman, taking advantage of every spare moment to pursue his favorite pastime. An excellent shot, a splendid fellow in camp, a good blade at story telling, perfectly at home with the black bass, George was beloved by all men in this section who handle the gun and rod. He was indefatigable in the enforcement of the game laws, and secured the first conviction in Texas of a dog thief. We all mourn his loss.

### Game Plentiful.

The reports keep on coming in from the Southwest to the effect that game of all kinds will be very plentiful this winter. Deer, turkey and all kinds of large game are reported abundant in the western counties, while quail, turkey, plover, etc., infest every county from the Colorado river to the Mexican line.

### Texas Buffalo.

A cowboy whose name could not be ascertained, tells that he saw the buffalo herd spoken of in these columns, two weeks ago in Valverde county, at nearly the same point designated in the account published some three months ago. He says that he certainly saw them and that he knows them to be buffalo. He claims to have counted about thirty head. O. C. G.

### Luck Reported.

NORTH HUDSON, N. Y., Sept. 13.—*Editor Forest and Stream:* The following is our report for the opening of the hounding season at the above place. Mr. Sidney Phelps of Troy, N. Y., Mr. Chafey, the proprietor of Pine Ridge Cottage, and myself, with John Greenough as guide, and two hounds, Major and Towser, started on the morning of the 10th inst., and started our first race at 7:20 A. M. The doe, a large one, was killed at 8:40. The second race was run at 10 o'clock, and was finished with another large doe at 11:55 in a driving rain storm. The hounds were started again at 2:30, but lost off soon after on account of the storm.

On Tuesday, the 11th inst., we started first race at 7:45, and another large doe was the result at 8:20, the quickest race of the day. The second race began at 9:50, after another doe, which we missed, although she was shot at by myself at a distance of 60 rods in the brush alongside of the river. The next race was at 11:20, and ended in another doe at 1:30 P. M. The fourth race and last began at 3:10 and ended at 4:25, brought us a very large buck, weight 223lbs., as fine a pair of antlers as has been seen in this part of the country in many years; 13 prongs all in the velvet, and not a scratch or break. I shot him through the heart as he leaped out of the river. The head has been sent to Troy to be mounted. I shall bring it back to Brooklyn on my return next week.

This we think pretty good luck, five deer in seven races, and we feel proud enough to write you an account of it.

A. H. SCHEER.

### A Bear in the Brush.

SWEET SPRINGS, W. Va., Sept. 11.—*Editor Forest and Stream:* I have been baiting a bear pen this fall. This morning on going to the pen as usual, I found the bait gone. Evidently it had been pulled off of the trigger by a bear, or possibly a dog. I tied the bait more securely, and I hope to catch one soon now.

What I am writing to you for is to know if there is any market for live animals? If I can get the bear down out of the mountains all right, can I sell him anywhere and for enough to make it worth my while? I am almost sure of catching one as I have caught three in this same pen during the past two years.

Of course, you know it is the common black bear, generally medium size. C. R. C.

[Live bear are not very uncommon and we presume do not bring great prices. Perhaps some reader may care for a pet of this kind. But you haven't caught the bear yet.]

### Carrier Pigeon Shot.

MACOMB, Ill., Sept. 1.—*Editor Forest and Stream:* About four weeks ago a farmer near this city shot on his farm a carrier pigeon with a silver band around his leg marked "S., 16845." I understand the letter S. means that the bird was two years old, hatched in 1892. I write this thinking it may strike the eye of the owner of this number; and if it should I would be pleased to hear from him. W. O. BLAISDELL.

### The Professor and the Bear.

SPOKANE, Wash., Sept. 5.—Prof. Yeager of our city schools is home from a three weeks' trip along the Pend d'Oreille River, between Newport and Box Cañon. Among his trophies is a beautiful bear skin with three bullet holes in it, put there by the professor while bruin was still wearing it. Early one morning the campers were disturbed by a rustling in the bushes, and on looking out of the tent the professor saw his bearship making off with a quarter of venison which had been hung on a limb. In a dispute over the ownership of the meat the professor had the best of the argument.

Mr. Yeager says the country along the Pend d'Oreille from Newport to Box Cañon is alive with game of all kinds, and he pronounces it the best chicken, duck and goose country he was ever in.

He is a professional photographer and spends his summers in that vocation. "The scenery," he says, "is the finest I have ever been privileged to focus, and I have taken over 300 plates this summer in that beautiful country."

Newport is a station on the Great Northern Railway, 45 miles east of this city. The town is prettily located on the banks of the river, about a mile from Albani Falls, directly above which the railway bridge crosses.

D. E. C.

### Western Game.

SIOUX FALLS, South Dakota, Sept. 6.—*Editor Forest and Stream:* Chickens in southwestern Minnesota and northwestern Iowa are reported as being unusually plentiful, and in the vicinity of Worthington, Minn., are so to my own knowledge, as the bags of myself and friends and also others, can testify. Chickens are, however, exceedingly wild and strong, as much so as is usually the case in October. Another thing I notice is that with rare exceptions the birds are all in the corn fields, which I think will account for the reported scarcity of birds in many cases.

Ducks around Worthington will be exceedingly plentiful as most of the sloughs are dried up elsewhere. In a few hours' hunt the other day with two friends I saw fully 500 teal and mallards in less than a mile, and succeeded in bagging all we wanted for our own use. Had we been so minded we could have easily killed a hundred. Later on when the flights begin the lakes in that neighborhood will be fairly alive with them. W. R. H.

### Rail in the Mountains.

SWEET SPRINGS, W. Va., Sept. 11.—*Editor Forest and Stream:* I see in FOREST AND STREAM and in other papers accounts of the great plenty of rail in Connecticut, New York and eastern Virginia. Last fall we had a great many rail here, that is for the mountains; I killed about 150 or more and others killed more.

I am anxiously waiting a storm with an easterly wind in hopes of having some shooting like last fall. I want to ask you and the readers of FOREST AND STREAM whether the great abundance of rail on the coast would indicate that there will be plenty of rail inland or not?

C. R. C.

[We should think so. But it is not yet certain that the rail are unusually plenty this year.]

### Climbing on the Plank.

EDWARDS, Miss., Sept. 10.—*Editor Forest and Stream:* Your platform of "Stop the Sale of Game" is bearing fruit here in the greatest quail district in the South. There is a general statutory law protecting quail from March 1 to Oct. 1, but by law the county supervisors have especial care of the game in each county. At a late meeting of the board of this, Hinds county, protection to game birds was extended until Nov. 1, and it was made absolutely unlawful to hunt for market at all. The sportsmen here regard this as a great triumph over the pothunter and game hog.

Quail are more plentiful than for years. The covers are alive with them. R. S. W.

### The Bear Season Is On.

ESSEX COUNTY, N. Y., Sept. 10.—*Editor Forest and Stream:* Elijah Simonds has trapped two more bear, this time near "Seventy," in the town of Lewis. He is now after one under Raven Mountain, on the north side. There are towns and farms all around this small mountain, and a very unlikely-looking place for bear.

Wm. Ritson, a trapper of the Boquette region, has trapped two also this summer. He said the finest pelt he ever got was secured in July. It was very black and the hair tight. HEATHCOTE.

### Fleeing from Fire?

ST. LAMBERT, Canada, Sept. 14.—*Editor Forest and Stream:* During the last four days my friend, Mr. C. E. DeWolf, and I have come across nine wild pigeons on Moffat's Island, opposite the City of Montreal, going south, probably driven by fire from Minnesota or Michigan during that dreadful week. What think you of it?

J. EDGAR BUCHANAN.

### Compartment Cars on the Pennsylvania Limited.

THE American people of to-day are the best travelers in the world. They require the best accommodations, and it is the aim of the railroads and the sleeping car lines to supply them. Many people desire exclusiveness in their accommodations which has heretofore been provided in the drawing and staterooms. The demand for the drawing-rooms is increasing, and in order to meet it the Pennsylvania Railroad Company has added to the already comprehensive and complete equipment of the Pennsylvania Limited a compartment car. This car, finished in the usually luxurious style of the Limited cars, contains two large drawing-rooms and seven state-rooms. The drawing-rooms contain a section and one lower berth, the state rooms one section. Both have complete and individual lavatory arrangements.

In this car one may enjoy all the privacy of a hotel room, and travel almost as much secluded as in a private car.

The Pennsylvania Limited, leaving New York every day at 10 A. M., Philadelphia 12:20, Washington 10:30 A. M., Baltimore 11:40 A. M., and arriving at Chicago 9 A. M. next day, is the only perfectly appointed Limited Express running between the Eastern cities and Chicago.—*Adv.*

### Chickens, Ducks and Geese

are going to be very plentiful along the line of the Northern Pacific this season. Make your arrangements to go and get some of them. Send Charles S. Fee, General Passenger Agent, St. Paul, Minn., 4 cents in stamps for "Natural Game Preserves of the Northwest."—*Adv.*

# Sea and River Fishing.

## TROUTING IN NEW BRUNSWICK.

I LAY more claim to being an angler than a writer and had rather cast a fly than trail the pen. But if all the brothers of the angle would do the first and neglect the latter I fancy the pages of good old FOREST AND STREAM would soon be uninviting to many of its readers. So I send in my quota of experiences for the "good of the cause."

I found myself on the waters of a stream in New Brunswick. At this period the water was low, clear and warm in the lower stretches of my favorite river. The trout were consequently lethargic and dull, loath to rise to a fly however attractive. Tiring of my efforts in this part of the river to induce *fontinalis* to be friendly, I took it in my head to go to the upper stretches of the stream and test my skill in the dark, deep, cool pools near its source. So with two canoes, four guides, tent, food, gun, rods and other impedimenta our small flotilla set out. A journey of five days was before us, at the end of which we pitched our tent upon a point of high land at the junction of a small brook with the larger stream and contiguous to the pools where the trout ought to be found. It was a wild region, sixty or more miles beyond any human habitation, the approach to which was a continuous ascent from our starting point, to overcome which required constant use of the setting poles of the guides and a continuous exercise of muscle. Many miles of the distance the guides dragged the canoes, the water being too shallow to admit of progress otherwise. The constant friction of the river, sand, and gravel upon the bottom of the birch bark canoes did not tend to improve their seaworthiness. Frequent halts were required to make repairs, which eventually resulted in the exhaustion of the pitch and cotton of our stores adapted to close leaky seams and fractures resulting from that style of navigation.

Still we got there, and arranged a comfortable abiding place for angler and guides and prepared for business. About sunset of the day of our arrival, and after putting the camp in order, with my two pet guides I essayed to test a promising pool near camp.

The guides quietly placed my canoe at the margin of the pool, upon which I gently laid the flies. Didn't the water fairly boil! The trout of the pool were at home. Away went the flies, seized by eager mouths; the reel sang a melody; the rod bent like a willow bough in the wind; two fish were firmly hooked and proceeded to test the light tackle to the best of their ability, and render matters very interesting. A few minutes' violent exercise sufficed to calm the exuberant spirits attached to the hook, and soon they came with much struggling within reach of Johnny's net and were safe in the canoe, rapped on the head, and laid quietly upon some grass to be admired. They were a pretty pair; one of 3½lbs. weight, the other 3¾, 7¼lbs. for the two—a good beginning.

Angler and guides lighted pipes—the festive mosquito had appeared. After a brief rest and examination of leader and flies, which seemed perfect, another cast was made. Two swirls—the flies disappeared with a rush and nearly took the rod overboard. A 20-pound salmon could not have exhibited more strength. A regular fight ensued, lasting some minutes. When the strain relaxed the line was easily recovered, and Johnny netted a "measly," subdued trout which only scaled 4¾lbs. One had escaped. All the leader below the coachman had been carried off by the absconder. Of course the larger was lost; 'tis always so. His weight? Well, call it 10lbs.; 6 probably. It was now dusk; we had plenty of trout and too many mosquitoes, so we returned to camp and exhibited to the wondering eyes of the guides the beautiful fish. Supper, a smoke and a chat occupied a few hours, when the camp became silent and all sought a needed rest on our beds of fragrant boughs.

The cook's shrill voice announced breakfast the morning following at an early hour. Now I lay no claims to being a dude. I do not go to the woods to do penance, but for comfortable sport and relaxation; consequently my kit contains a well assorted variety of articles requisite for enjoyment. My guides understand what is required of them and rarely fail to contribute their pro rate of duty. Of the four with me on this occasion, three were fair cooks, the fourth was a camp artist and a *chef*. A couple of pieces of boards supported upon a pole resting on forked sticks driven in the ground at either end, was his table. This was first covered with thick paper, upon which was spread a snow white damask cloth, an enameled ware plate well warmed and resting upon a napkin; silver-plated knives, forks and spoons rested near by; a china cup with a saucer was ready to receive the coffee, and seated on an empty box, the angler ate breakfast consisting of golden flesh trout, nicely broiled and dry as flour; light biscuit, straight from the camp oven; butter, fresh and firm; coffee, distilled from the berry grown in Asia; as dainty a breakfast as a camper out need desire.

The morning was calm, clear, and cool, the surroundings pleasant, and while enjoying the pipe a survey of my location disclosed a clearing of about two acres in extent surrounding our camp void of large trees, but overgrown with brush two feet in height, mostly blueberry bushes laden with ripe fruit. In years agone it had been a loggers' camp; a bear trap at one side contained the remains of an unfortunate bruin who had fallen a victim to his hunger or curiosity; on the other was a small hunter's shelter in fair condition. It was Saturday; trout pools were near, water, wood and berries were at hand. A council was held and decision made to remain in this place until Monday or longer before continuing our up stream journey.

This matter settled, one canoe containing myself and two guides, with suitable appliances for the business in hand, not forgetting material for lunch and an axe, pushed into the stream to make a day of it among the pools. The day was without incident, except that one lusty trout insisted on taking refuge under the canoe, evidently expecting thereby to get clear of the hook to which he had become attached, in the desire to gratify curiosity or secure a tempting bit of food. He was a 6-pounder in the water, and fought well for his life. A bamboo tip was smashed in the skirmish, but the angler and Johnny combined were too much for him; he came to the net at last, was knocked on the head with a stick —weighed 4lbs. on the scale—and laid with his brethren in the bottom of the canoe. Returning to camp about 4 P. M. the score was thirty-one trout weighing 47lbs. A query arose as to method of properly disposing of the fish. We had too many for food and too many to waste. We were in a dilemma, but our guide, Jimmy, was equal to the occasion, "Bah gosh, we smoke him." Acting on this suggestion, bark was peeled, a salting trough improvised therefrom, fish split, cleaned, laid therein, lightly sprinkled with salt, covered, weighted down and left for the night. The hunters' camp was cleaned, covered with bark and converted into a smoke-house, in which on Sunday morning were hung the trout and a fire started with fuel of white birch wood, producing abundance of smoke. We kept up the fire for about forty hours, with the result of a choice lot of nicely saved smoked trout.

Now, a 2lbs. smoked trout when properly manipulated by an ingenious cook furnishes a dish next in quality after smoked Atlantic Coast salmon, and those which were then and subsequently processed in a similar manner furnished choice morsels not only to our party but to friends to whom I donated such of them as I was able to convey to civilization.

Sunday was a charming day, and one of leisure. I never cast a fly on the first day of the week no matter what may be the inducement; hence this Sunday in August was spent about our pleasant camp, resulting in discovering that the blueberry patch in which we had our camp was a pasture ground for several families of full-grown grouse.

Good appetites were attendant upon the evening meal, and night closed in upon a band of gossipers occupying positions around the camp-fire. I smoked and listened to the wonderful tales of the guides—their experience of former years. The Oracle predicted rain shortly. The smokehouse was made secure for the night, and all sought their blankets.

Our weather prophet had been right. Rain commenced falling about midnight and continued through the night. Early morning was dark and gloomy. A storm of rain with wind prevailed, but our tents were dry and no large trees, if blown down, could reach us. We were safe from accident from that quarter. Breakfast was cooked and eaten under difficulties; wood was gathered to keep up the camp-fire, and all indications pointed to a rainy day in camp. About 10 A. M. a change of wind was noted; the rain ceased, the clouds drifted away, and soon the sun shone bright and warm.

It was voted too late to move camp that day, so an early lunch was partaken of, after which, with my guides, I visited the adjacent pools. Many handsome trout were taken and retained; small ones, if uninjured, were returned to their native element. I was not there "for count." Returning at an early hour, Billy, the *chef*, had a surprise. He, with his assistant, had been manipulating the shotgun. Nine fat, plump grouse, denuded of feathers, and nicely prepared for the culinary process, were lying in a pan. Billy was proud of his success, and greeted our returning party as we came in sight, in substance as follows: "Bah gosh, I'll ketch it more as you. See most as dix perdrix in he pan, one more of it keep for look." The one "keep for look" was a beautiful male bird in full and perfect plumage, not a feather disarranged or broken; no mark of injury discernible upon the closest inspection, evidently captured by some process unusual. Inquiring as to the mode by which this bird was taken, Jimmy produced a pole, in length of about ten feet, from one end of which attached thereto, and pendant therefrom, was a thread of moderately thick twine perhaps three feet long, with a running noose at the end. This grouse when disturbed had flown and alighted upon a branch among the lower limbs of a small tree, where he stood upright. With the apparatus described, Jimmy had quietly crept within easy reach of the bird, encircled its neck with the noose, then with a quick and sudden jerk had secured his prize beyond any possible chance of escape.

Reserving from the day's catch trout sufficient for the camp, the remainder were prepared for the smoke-house and duly deposited in proper position therein with their fellows.

Preparations were made to depart up the stream the following morning. All articles not needed for the ensuing three days were cached in a place secure—except from wandering bears. A comfortable night was passed, breakfast partaken of and with canoes lightly laden, we started on our way. Low water, sandbars and sharp rocks, played havoc with our birches. Fallen trees and brushwood obstructed the narrow stream, but a few blows with a keen axe delivered by strong arms cleared the former. Setting poles judiciously applied removed the latter. Wading here and poling there we slowly made our way into a part of the river where we had never been before. Reaching a spot at the junction of the stream, the route became uncertain; a sandbar prevented further progress. A portage became necessary, and lifting the canoes bodily this was safely passed. Night found us twelve miles on our way and within four miles of our destination, when we made camp.

Inspection of the canoes in the morning resulted in finding one wholly unserviceable; it could go no further without repairs. Inventory was taken of materials necessary for that purpose, but it was a discouraging outlook. Something must be done—we knew that, but how to do it, was the query.

We held a palaver; Johnny, who was the eldest, finally said we must "shoo him the canoe, must get gum and patch him first." Arranging for the "get gum" from the surrounding spruce forest, and to cut some small cedars from which to split and prepare shoes, false bottoms, for the birches, myself and two guides proceeded, leaving the remaining two at camp to "get gum" and prepare shoes. Three hours' poling and wading brought us to a lake, one of three in a chain, of which the stream was the outlet. Paddles were applied and the birch moved smoothly over the shallow mud-bottomed, surface-covered pond, where lilies, reeds and rushes contended for the ascendency—a very paradise for deer and ducks had any been in the country. Through a tortuous channel we passed into the second pond, a lovely body of water, with gravel bottom. A few casts of the fly developed it to be the home of numberless trout, quite differently marked from those in the stream and of less average weight, bright as newly coined silver, with brilliant crimson spots, most beautiful fish. Slowly paddling across the pond we reached a gravel bar, over which the canoe was stopped, and in deeper water shoreward was truly the home of *fontinalis* and many of him. About twenty minutes was spent in casting, the result of which was many trout averaging about 8oz. each.

Resuming the paddles we moved to the third body of water, in length about four miles, with an average width of one and one-half miles. This body of water was also stocked with trout of medium weight, and doubtless the home of a larger variety. The water was deep and cold and everything indicated that good sport could be had by trolling. Heavy fish were seen to break the water, but no single fly or combination of flies would provoke a rise, and as no trolling appliances were of the outfit the canoe was headed campward. When we arrived we found a repaired canoe, cedar shoes for the canoes nearing completion, and Jimmy with a cut leg from a glancing blow of his axe. The first accident had occurred. Eighty miles from civilization, two damaged canoes and a wounded comrade did not tend to create hilarity in our quintette. Jimmy had tightly bandaged the wounded leg and could hobble and was not discouraged. Removing the bandage exposed the gaping wound the width of the narrow blade of his camp axe. I produced from my "ditty bag" my needle, silk, sticking plaster, scissors and bandages and proceeded to close the gaping wound, which was successfully accomplished. The edges were brought together and made fast, strips of plaster applied to secure the edges of the cut in place, bandages encircled the whole, which was then wrapped with a stout silk bandanna, and barring a stiff leg Jimmy declared he was "so good as never was before;" pronounced me no end of a man whose canoe "he push for nothing forever." Surgical work had occupied so much time that canoe shoeing was suspended for the day, to be resumed at an early hour the following morning.

About 4 A. M., the clip, clip, of the little axes awoke me to find "all hands and the cook" busy finishing and putting in place the cedar strips on the bottom of the birches, joining them together and fastening them to the canoes by an ingenious use of some wire found at an ancient lumber camp, and by 6 o'clock the canoes were in the water ready to receive us. Soon the breakfast was eaten, and the camp packed and ready to be put on board. Embarking about 8 A. M. we pushed out on our return, reaching camp Cache at 11 A. M., accomplishing a distance in three hours which had consumed nearly seven on our up trip. Here we halted for the remainder of the day and night; in the meantime reducing our baggage to a minimum bulk in readiness for an early start in the morning. We found the smoke-house and cached stores undisturbed, and leaving camp we again reached civilization at the end of the second day thereafter, and thus closed an exceedingly pleasant outing.

ABERDEEN.

## A STARVED TROUT.

*Editor Forest and Stream:*

In your issue of Aug. 11 appears an article commenting on a trout which recently died in the aquarium of Mr. F. H. Francis, of Belfast, after a fast of eight months. You say, "If true, it ought to be verified," thereby implying a doubt. Your account of the fish was based on an article which I furnished to a State paper. I will give you the facts in the case, for the trout was seen by myself nearly every day from the hour in which it was placed in Mr. Francis's tank until it died.

Mr. Francis is a retail dealer in boots and shoes, and has his place of business on Main street. He is an ardent fisherman and loses no opportunity to indulge in the pastime. He has a small aquarium in his store both for his own satisfaction and that of his customers. His favorite fish are Swan Lake trout. He has one male that must weigh between five and six pounds which has been in his tank more than two years.

Swan Lake is a pretty sheet of water in the town of Swanville, six miles from Belfast. In this lake are some of the largest and handsomest square-tailed trout to be found in the inland waters of Maine. Trout weighing 8lbs. have been taken, while 5lbs. fish are common. While very plentiful, the fish will not take the hook readily, and comparatively few fish are taken.

For several years the State has maintained a hatchery at this lake with a view to stocking this and other waters of the State. The lake also contains numerous smelts and other food upon which the trout thrive.

Last November when the commissioner was stripping fish for eggs, Mr. Francis had obtained a female trout after she had been relieved of her spawn. The fish was put into the tank along with the male before mentioned. The female was about 20in. long, and when in condition must have weighed 4 or 5lbs. The fish did not eat, which was not suspicious, for trout do not eat much from the fall until into February. At the latter date the male began to eat, but the female could not be induced to take anything, in fact the female did not eat, with but one exception, from November until she died in July following, a period of eight months. Once last spring after a long trial she swallowed one or two small worms. At one other time Mr. Francis says she took a small piece of meat into her mouth, but he thinks she did not swallow it. The fish became much emaciated, shriveling up to half its former size. The male trout ate everything that was given him.

The fish died in July and was given to a fish dealer who dissected it. The intestines were found to be perfect, and apparently there was no trouble with the organs. The most remarkable feature was the entire absence of blood. There was not a single drop of blood either in the gills or body of the fish. The flesh had lost its pink color and was white and dry.

The above are the facts—you can draw your own conclusions. That the fish died of starvation there can be no doubt, but why she refused to eat I do not know.

BELFAST, Me. R. G. DYER.

### Loss of Trout by Drought.

HADDAM, Conn., Sept. 11.—*Editor Forest and Stream:* The dry summer has nearly destroyed the trout in our small streams throughout the State. Many of the streams are entirely dry for long distances. I walked over the bed of one where a year ago last spring I put in 4,000 young fry, and there was not water enough to wet the soles of my shoes, and of course the poor trout have perished. Even in the larger streams the water has been so low that only shallow pools have remained, which has enabled the water snake, that persistent and deadly foe of the trout, easily to capture its prey. Even with restocking it will require several years of favorable seasons to again replenish our streams. A.

## ANGLING NOTES.

### Planting Young Salmon.

THE time is drawing near when the first plant of fingerling landlocked salmon will be made in Lake George, and I believe it is the intention of the U. S. Fish Commissioners to make a similar plant, which will be the third in as many years, in Lake Champlain.

I have examined the streams flowing into Lake George during the past summer, at high water and at low water, and selected those in which to plant the young fish, and all those selected seem to offer everything that is desired for them; pure water of low temperature; absence of sawmills and dams; no predaceous fish to prey upon the salmon—except it may be brook trout; and plenty of food.

Last summer Mr. Rowland E. Robinson wrote me upon the subject of planting salmon in the tributaries of Lake Champlain, and I intended to quote from the letter at the time, but I was away from home fishing and the letter was mislaid until now. He said:

"Your mention of the salmon planting in Lewis Creek [this was in FOREST AND STREAM June 2, '94] some twenty years ago, reminds me that you may be interested to know that, so far as I know, not one of the fish ever returned to the stream, nor, indeed, that one ever got out of it of his own volition, even so far as the lake. The fry were put in so far down-stream that they were exposed to the attacks of almost every predatory species that inhabits Lake Champlain. Three years ago a large number of landlocked salmon were placed in the same stream, although in what part I have not been able to learn. If they were put in well up-stream, where there are no large predatory fish except an occasional pickerel, and where brook trout are yet found, there is a reasonable chance that some may pull through to maturity and a home in the lake; but if, as is rumored, they were turned out below the last dam on this stream, doubtless they have all gone to the living tombs that so speedily closed over their kindred in 1874. It is a pity that such experiments in stocking streams should be only half tried."

The intimation in Mr. Robinson's letter that the landlocked salmon were not properly planted, or rather that they were not planted in suitable waters, was a surprise to me, I may say a very unpleasant surprise, and it is a matter of regret that his letter has slumbered in my letter box until this time.

About the time referred to I had been to Vermont by direction of the U. S. Fish Commissioner to examine and select waters for planting yearling California salmon, and later I went with the U. S. fish car and planted the fish in the waters I had selected. From Arlington, Vt., on the Battenkill, I came home, and the car went on the same night to Maine to get the landlocked salmon mentioned in Mr. Robinson's letter for Lake Champlain. I heard from the car when it arrived at Essex Junction, that there had been a considerable loss of young salmon in transit, but never until I read Mr. Robinson's letter did I suspect that the planting might be fruitless through the selection of the waters in which the plant was made, or rather plants, for the fish were planted in several different places. I do know this, however, that when I left the car the men on it had orders to plant the fish in waters selected by a resident of Vermont, who had made the suggestion as to proper waters to the U. S. Fish Commissioner, and I feel sure that the men obeyed instructions; so if there was fault in planting it cannot be charged to the U. S. Fish Commission.

I may say just here that I have a great respect for the ability of the landlocked salmon, once it has grown to fair size, to take very good care of itself so far as predatory fish are concerned, if I may judge from recent experience.

Two weeks ago to-day I caught a ouananiche at the foot of the big chute in the Grand Discharge, and a few moments later I caught a pike from behind the same rock that had harbored the salmon. The ouananiche weighed 3½lbs. and the pike 14lbs. Rather queer tenants of the same pool, for a tandem of such ouananiche could have gone down the throat of the pike without touching a fin at the entrance gate.

### Views of a Veteran.

It is always very pleasant to quote what the veteran, John Mowat, may say about fish and fishing, as he speaks from long experience and close observation of the fish of Canada. In a recent personal letter he says: "This has been a very favorable season for the angler on the Restigouche. I believe there is no river on this continent that can approach it as a salmon stream, either in size and number of fish, easiness of access and particularly in its freedom from all danger to the sportsman. I have not the slightest doubt that nearly if not quite 2,000 fish have fallen to the angler's rod this season, and although some of the pools formerly good have not turned out as well as usual, many have done much better. Changes owing to ice and heavy currents on the gravel bottom of the rivers are continually going on, some places deepening, others filling up, thus causing the fish to select new 'lay spots' or resting places, and in which the early running fish invariably rise to the fly.

"I see that a much larger proportion of grilse than usual are with us this year. That they are in for the first time from the smolt stage, having been ten months at sea, is undoubted. They are perfect for propagating purposes, and all males.

"If all the males come in at this stage, which I think is a correct view, then any year when they are plentiful would of necessity show a large stock of that year's product in the sea, as I believe it is now conceded that the female requires a year longer at sea to mature. There is so much of probability attending the habits of salmon at sea—where they go, how long they remain, period of return, etc.—that a great deal of what is written is theory and assertion.

"I have again received proof that Atlantic salmon will become landlocked and thrive. I saw a full three-pound salmon caught in Parker's Lake which was planted there three years ago. Samples of the same hatching were got there last year weighing 1½lbs. The fish was somewhat darker in color and deeper in body than our sea grilse, otherwise perfect. I have noticed that the trout in this lake are much deeper-bodied than any sea or river trout. The salmon was moulded similarly. Why should this be?

"I caught a smolt last week so unusually large and full that I was curious to see what it fed on, and opened it, to find it quite full of milt so ripe that it would almost run. It is useless to theorize about the reason why this smolt was so out of *rapport* with its thousand of fellows on their way to the sea.

"So far as I have heard none of the Bay or Labrador rivers can begin to show scores equal to the Restigouche. I have heard a proposition mooted to limit the rod catch to a certain number, say twenty-five or thirty fish to a rod. Should the Restigouche Club and riparian owners agree nothing would be easier, and it would show the netters that the angler does not wish to catch the last fish even if he could.

"That there have been one hundred rods on our rivers this year I have no doubt. Many only for a week or a few days. One party of two were on the water for three weeks, and I believe they had some salmon quite close to shore but failed to land them. However, angling must be learned by practical application. The best score of one rod was thirteen fish. Quite a decent day's work.

"A fine body of parent fish, betweeen 500 and 600 salmon, many of them monsters, are now in pond here ripening for the hatchery, and they are quite a sight at times when they play like a lot of children out of school. Particularly is this so when the rising tide enters.

"Trout here are no object, they don't count. The 6 and 7-pounders we read about in FOREST AND STREAM are not here. We call 3 or 4-pounders big ones, but they are not taken every day. June and September are their months with us, and from ¾ to 1lb. the usual size. They are like salmon, they have their 'lay places' and the angler, if not introduced must find them out for himself. Throwing a line hap-hazzard on our large rivers will not do; the angler must know where to get fish."

What Mr. Mowat has observed of the landlocked Atlantic salmon in Parker's Lake, I have observed in lake trout, but instead of being constant it is exceptional to find them as he describes the salmon and brook trout. Occasionally I have taken a short, deep-bodied lake trout with rich, salmon-colored flesh, darker externally than its fellows. In more than twenty-five years' fishing, I have taken not over a dozen of these fish, which some fishermen pretend to think are a different species. I have always said, and say now, that the difference is merely one caused by the quantity and quality of the food. When asked why different trout in the same lake should subsist on a diet so different as to make them very unlike in appearance, where probably the same diet was available to all, I could only say, for the same reason that one man eats toast or rolls for breakfast, and another man eats pie.

### American Fly-Fishers' Club.

During a recent visit to Canada to seek the ouananiche at Lake St. John, I talked a little with anglers that I met about the formation of a fly-fishers' club in New York city to be modeled after the club of this name in London. My article in FOREST AND STREAM of Sept. 8 had not then appeared, but every one with whom I spoke on the subject was warmly in favor of the project. Since the publication of my letter Dr. Drummond, of Montreal, president of the St. Maurice Club and director of the Laurentian Club, has called at the office of FOREST AND STREAM and expressed a great interest in the proposed club, and a desire to assist in its organization. He said that the clubs with which he was connected, and all Canadian sportsmen, felt that something of this kind ought to be done and that New York was the proper center for it, because the Canadians were much nearer to New York than New Yorkers were to Canada, and also because a very large proportion, 60 per cent. he said, of the membership in Canadian clubs were Americans.

Dr. Drummond expresses my idea exactly when he says Canadians are much nearer to New York than New Yorkers are to Canada, and the same may be said of other portions of the continent, for I believe I expressed it that New York was the great clearing house for anglers of all the States and Canada. My companion on the trip to Lake St. John was a member of the Laurentian Club (although he has never visited the preserve), but he lives in Texas. He was heartily in favor of such a club as I proposed and when I asked him where it should be located he said there was but one place, New York City. With that he gave me names of sportsmen from different parts of the South whom he vouched for as certain to become members.

Very lately I gave a Canadian gentleman a letter of introduction to the London Fly-Fishers' Club, and he came back a member of the club. New York is much nearer to Canada or Texas than London. This day's mail brought me a letter from Mr. W. S. Eames, of St. Louis, and he says: "Anent the proposed Fly-Fishers' Club, permit me to urge upon you the propriety of your assuming command of the enterprise, and forcing the matter to an immediate issue. I have not consulted the 'brethren' here, but feel safe in saying that I can assure at least twelve local enthusiasts who will do their share as members of the proposed club. New York is a good place for the home."

I now feel perfectly sure that the American Fly-Fishers' Club will become a fixed fact in the near future, for those who have already expressed themselves as favorable to the organization are sufficient to insure its success, as their names stand for success in whatsoever they may take a lively interest, and a club of the character that I have outlined will appeal to fly-fishers throughout the continent.

I confess that it is a relief to find that Dr. Drummond believes that New York should be the home of the club, because in Canada I met one fly-fisherman so enthusiastic over the proposal to form such a club that, although he lives on this side of the line, I was somewhat afraid that he would, in his enthusiasm, organize a club in Montreal or Quebec before my letter could appear in FOREST AND STREAM advocating New York.

### Scale of Hooks.

I will answer three correspondents at once by stating that I gave the old, or Redditch, style, and the new style of numbering fish hooks, in FOREST AND STREAM of Jan. 20, 1894, page 52. The figures of the hooks were not given, but the numbers of the two styles were given one above another for convenience in comparing them.

### Chart of Fish Hooks.

In FOREST AND STREAM of Sept. 1 I offered to send charts showing sizes of fish hooks under the new and old scale, etc., to those who might first apply for what I had on hand. The supply was soon exhausted, and I now have over a dozen requests for charts to which I cannot respond. I have sent to England for a new supply, and if those who have sent me their names will be patient with me I will soon be able to send them the chart.

A. N. CHENEY.

## NOTES FROM THE FISHING WATERS.

SWANTON, Vt., Sept. 9.—*Editor Forest and Stream:* J. P. Rich, E. J. Harwood, of Scranton, and Dr. Charles S. Hart, of Montana, as the result of one day's fishing on the reefs near Hotel Champlain, Maquam Bay, caught 20 bass; 6 of them weighed 22lbs., 1 weighed 5lbs. 2oz., 3 weighed 4½lbs. a piece, 2, 4lbs. a piece.

We have had excellent luck the whole season, as this is an excellent place for black bass, as you see they average large. C. T. D.

[Is your arithmetic all right?]

REYNOLDS, Wis., Sept. 1.—A party consisting of Edward K. Lore and Roland Lore, of St. Louis, Arthur P. Hosmer and Tom Ferris, of Chicago, started from J. B. Mann's resort on Trout Lake and camped on Lake Gresham, a distance of about four miles.

They were gone six daye and caught 38 muskallonge, the largest weighing 23lbs. and the smallest being 5lbs.; 265 pike, the largest 7½lbs. and smallest 2lbs., 17 black bass, the largest 5½lbs. and smallest 1½lbs. They threw back all muskallonge less than 5lbs., pike less than 2lbs. and bass less than 1½lbs. While anchored and casting for bass, Ed. Lore hooked a 16lb. "musky" and had to fight him 18 minutes before he was able to land him. Hosmer has the record in this section for large muskallonge, having landed an old warhorse of 35lbs. weight.

Master Roland Lore, a youth of 12 years, succeeded in catching the largest bass, unaided, the fish weighing 5½lbs. as stated. Tom Ferris used his Kodac for a coaxer, which no doubt accounts for this elegant sport.

T. R. F.

GREENWOOD LAKE, N. J., Sept. 13.—L. J. Louis of Brooklyn caught, Saturday and Sunday, 44 bass and 3 pickerel, average weight of all 2lbs. F. Haug, John Iffland, C. J. Charles and E. Kokoschniegg of Newark caught, yesterday, 35 fish, 4 bass weighing 3½lbs. each, 1 pickerel 3½lbs. R. L. P.

CLAYTON, N. Y., Sept. 12.—Hon. M. B. Wright of Susquehanna brought in a 40lbs. muskallonge; J. N. Vache of New York a 15lbs. muskallonge. Both are guests of the Walton House. The fish were caught on Skinner spoon No. 8. T. M. E.

ESSEX Co., N. Y., Sept. 10.—The wall-eyed pike fishing is fine off Split Rock Point (Champlain); 2½lbs. pike are common. HEATHCOTE.

ITHACA, N. Y., Sept. 15.—The other day a private pond located in Dunby, a village a few miles south of Ithaca, was emptied of water, and the commoner sort of fish which the pond contained were drawn off by the wagonload. An enormous quantity of fish was secured. A good many carp ranging in weight from 1 to 14lbs. were taken, together with a big lot of large-sized pickerel. In fact, the pond was literally chock full of fish, and clearly disposes of the theory, held by some, that more than three or four varieties of fish do not thrive in water covering limited areas.

At present, Cayuga Lake anglers located at this end of the lake are taking a great many so-called German carp, running in weight from 2½ to 8lbs. Another species of carp, called English carp by some local fishermen, and silver bass by others, are taking bait freely these days. They do not average as large of the German carp, but are said to be quite as toothsome. Angle worms are used successfully as carp bait at this point. M. CHILL.

### Canadian Trout Preserves.

DR. DRUMMOND, of Montreal, who is president of the St. Maurice Club and one of the board of directors of the Laurentian Club, has recently returned from a long trout fishing expedition in the territory controlled by those two associations. This territory, that is to say, that leased by the Laurentian and St. Maurice, covers an area of about 120 square miles and its principal lake is Wayagamack, which, lying about 100 miles north of Three Rivers, has a shore line of not far from 50 miles. This lake is remarkable for the abundance and the large size of its brook trout. It is believed that it contains no lake trout. The largest trout taken there this year, which weighed over 6lbs., was caught by Dr. McBurney, of New York, and Dr. Bosworth also fished there and took some good ones. Two gentlemen from Toronto secured a number of large fish.

In seven days' fishing Dr. Drummond's party caught four or five trout each of which weighed over 5lbs., and they took thirty or forty weighing more than 4lbs. apiece.

The territory covered by these clubs is pretty much an unbroken wilderness. It was lumbered over many years ago, but the timber on it, although second growth, is now large. There is some mineral wealth in the shape of iron ores, but settlers are very few and far between. No red deer are found there but there are some moose and plenty of caribou and bears. In fact it is not unusual for travelers to see caribou from the deck of the steamer.

### Tennessee Bass.

TRIMBLE, Tenn., Sept. 14.—*Editor Forest and Stream:* Solon Moss, one of Trimble's most expert anglers, made the largest catch of fish of the season a few days ago at Rees Lake, three miles from town. The lake is but a hundred yards or so in length and fifty or sixty in width. Charley Hendricks guided the boat for Moss, who began fishing at 11 A. M. The fisherman used a minnow troll, and when he ceased fishing just before sunset had landed seventeen trout, the aggregate weight of which was 35lbs., the largest weighing 4¾lbs. Of course in some localities this would be considered poor fishing, but it is the largest catch of trout ever made near Trimble.

JONAS JUTTON.

*The FOREST AND STREAM is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable*

### A Fly-Fishers' Club.

ALPINE, Bergen County, N. J., Sept. 11.—*Editor Forest and Stream:* I read with much interest Mr. A. N. Cheney's suggestion under the heading of a "A Fly-Fishers' Club in America," and I heartily indorse it, as—to use a hackneyed phrase—it will fill a long-felt want. I believe that no branch of angling is so clogged with traditional fancies and uncertainties as fly-fishing, and a club that encourages discussion would do much toward elucidating these and a great many other vexed questions by enabling members to interchange experiences, compare notes and thus to separate truth from fiction. The social feature is also one well worth considering. The common love of fly-fishing creates a kind of freemasonry among its devotees, and it is but natural that they should delight in opportunities of meeting their brother anglers once in a while to indulge in "fish talk." Last, but by no means least, such an association would commend itself for the influence it could exercise on fishing laws, fish-culture, etc. A club of this kind could enforce a great deal of useful legislation where individual efforts often fail, and inasmuch as its efforts would be directed, not to any special waters, it having none, but to the country at large, it would *ipso facto* constitute itself the champion of the angler in America. C. B.

## The Kennel.

### FIXTURES.

DOG SHOWS.

Sept. 18 to 21.—Rhode Island State Fair Association, at Cranston, R. I. W. W. Dexter, Sec'y.

Sept. 18 to 21.—Orange County Agricultural Society, at Newburgh, N. Y. D. A. Morrison, Sec'y.

Sept. 19 to 22.—Orange County Fair, at Newburgh, N. Y.

Oct. 2 to 5.—Danbury Agricultural Society, at Danbury, Conn. C. M. Rundle, Sec'y.

Oct. 30 to Nov. 2.—Terrier Show, by New England Kennel Club, at Country Club, Brookline, Mass. D. E. Loveland, Sec'y, 128 Tremont street, Boston.

FIELD TRIALS.

Oct. 23.—New England Field Trial Club, Members' Sweepstake. A. R. Sharp, Sec'y, Taunton, Mass.

Nov. 5.—United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 6.—International Field Trials, at Chatham, Ont. W. B. Wells. Sec'y.

Nov. 16.—Eastern Field Trials Club, at Newton, N. C. All-Aged, Eastern Subscription and Selling Stakes. Entries close Oct. 1. W. A. Coster. Saratoga Springs, N. Y., Sec'y.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

## TORONTO DOG SHOW.

AS NEW YORK marks a turn of the wheel of time for American fanciers, so Toronto marks the beginning or the ending of another year of fancy for our Canadian cousins in dogdom. At this show all Candians in any way interested in dogs make a point of attending and discussing the advance or the reverse in the character of their different fancies. This year, we are sorry to say, there were forebodings that the Toronto Fair show has seen its best days as a canine *fête*. In this we can scarcely coincide, for, though the show was lamentably weak in quality in many breeds hitherto well represented, this may partly be accounted for by the general business depression, the excessive freight charges now to be incurred when exhibiting, and the fact that the Pittsburgh show clashed and secured a number of American kennels that generally show at Toronto. Notably was this felt in pointers, setters, collies and some of the larger breeds. Another cause may have been in the increased entry fee and less prize money offered. These are defects that can be remedied, and next year, with a clear course, Toronto's management may again have cause to congratulate themselves as in days of yore. The local attendance was not so good as we have seen, and many familiar faces were absent.

The show seemed to labor under a cloud in other respects, too; for instance, the judging was delayed by the non-arrival of some of the judges. Mr. Mortimer returned in time to assume his official position on Monday afternoon, but Major Taylor was delayed by the Manitoba field trials and did not begin work till Tuesday noon. Then Mr. McEwen did not show up till Tuesday, and Mr. Oldham unavoidably earned the blessings of the spaniel men by not putting in an appearance till Wednesday. As he was delayed on the ocean at the time the show commenced it was manifestly impossible for him to do better, he could not get out and walk. He hurried up to Canada as fast as the trains could carry him after landing, and made up for the delay by the expeditious manner in which he got through his classes, finishing all by Wednesday night. Of course these delays precluded the possibility of a marked catalogue. There was little kicking at the awards, and the show ran smoothly, was well managed, the rings well served and the stewards, Messrs. Sweetman Royle, Fraser and Dr. Mole, did their arduous work in a clever manner. The show was kept clean and well disinfected by Little's Phenyle and with "Capt." Murphy in charge of Spratts biscuit menu, the dogs were well catered to

Mr. C. A. Stone the superintendent, on whose shoulders devolved most of the labor both in preparation and during the show, worked as usual with a will, and experience now greases the wheels of his executive ability in such degree that the furrows of care are not so deep as they used to be. His good work for this show is appreciated by his fellow fanciers and to show this he was presented on Tuesday evening, at the Auditorium in Toronto, with an engraved testimonial, handsomely framed, setting forth his many virtues and praising him for the work he had done in years past. Afterwards the evening was devoted to speechifying, recitations and songs, under the able chairmanship of Dr. Mills, who carried himself with dignity and a *bon camaraderie* that was totally at variance with preconceived ideas. At a late hour he resigned the chair to Mr. Higginson and the rest of the night was devoted to fun and frolic. A number of the Toronto Kennel Club members were prominent in the gathering, and Messrs. Mitchener and Shepherd among others entertained the company very acceptably. Pressure on our columns this week forbids our devoting any more space to this part of our story and therefore we turn at once to a description of the different classes.

MASTIFFS (*James Mortimer, Judge*).—This grand old breed does not seem to make much progress in Canada, the only good specimens so far shown hailing from the States, and this year's gathering was no exception. This time Mr. Bunn ran up from Peoria, Ill., and saved the entry from mediocrity. In challenge bitches, no challenge dogs were entered, Lady Coleus, looking really well and much better than last year, scored easily over Attraction in head, ears, body and size, as well as character. Open dogs (5) saw a little more competition, as Ealderman and Leamington fought their battle over again, but unfortunately for the latter, under the same judge as at Chicago. Ealderman has a more massive skull, but this is so offset by his peculiar muzzle, faulty eyes and more than peculiar ears, which are too small and not well carried, and color, that one passes over Leamington's large ears, correct in every other particular, and comparing his head all round gives him the palm. Ealderman is a bit better in back, but depth of body, size, bone and general character are in Leamington's favor. Grimsby Caution is an old face, and is not in the same class with the winner, too small. Beaufort's Beau, vhc., is weak in pasterns, light in bone and faulty in set on of stern, and head should be shorter. Nigo, hc., has not improved; his full, staring eye and light, houndy body are against him. Bitches (4) proved a "snap" for Minna Minting, who, though small, is brimful of quality. Cerene loses to her considerably in head and body and condition. H. R. H., third, is not massive enough in skull and too light in muzzle. Ilford Bess, vhc., is showing age, has a fair type of head, but needs more substance; nice body and legs well formed. The winners in novice class (6) have been mentioned above, but big dog as Ealderman is compared to Minna Minting, the latter's quality and correct type should be recognized.

ST. BERNARDS (*James Mortimer, Judge*).—Really outside of one or two entries, and those from the Argyle Kennels, there was nothing on the benches demanding a second glance, and it is unfortunate that the dogs from the latter kennel were shown in poor condition, though perfectly healthy. Such animals as Sir Bedivere and Rustic Beauty stand to the fancy in the same light as a Patti or a Calvé in opera and neither of the latter would risk their reputation by singing before the public when troubled with a sore throat. As one breeder remarked, "Is that the great Sir Bedivere? Well I don't think he's any great shakes, there are a half a dozen better ones here to my idea." So much for coat and prettiness and he looked no deeper. This seems to be the trouble with Canadian breeders of St. Bernards, their dogs are nearly all wofully lacking in substance and head properties—running snipy and weedy but pretty enough in coat and markings. One or two of the Alton litter would work wonders up there. Sir Bedivere and Rustic Beauty were alone in their respective challenge classes, but both were thin and out of coat and Arthur was evidently just keeping them in good health and summer condition. It is dollars to doughnuts they will look very different when seen at New York next spring. Open dogs brought out a mixed lot of nine, one absentee, Warwick, Jr. Imperial proved the winner, a leggy, light-bodied specimen with a fair head if it was shorter and more massive, shows some quality and is an active mover; Duke of Wellington, second, has a fairish head, better if broader and deeper, moves poorly but good body, coat and front. Earl Douglas is well marked and was in very good coat but his head is too snipy; Prince Imperial has a better skull than muzzle, is lacking in blaze, nice coat but lacks quality all through; Don Nora, also vhc., has a weak head but is pretty well built otherwise; the others scarcely deserve mention, Sir Havelock's head is still snipy. The bitch class (9) was better, but out of coat and poor in flesh as Lady Adelaide II. was, she had no difficulty in scoring; Artilla, second, well shown, is too long in head and houndy but her body, legs and coat are very commendable and she well deserved her place; Vera, third, an almost white bitch, has an excellent deep, long body and good legs, but her head is too flat and narrow; Lady Martin, vhc., shows quality but is too light in head, good front but shown thin and was out of coat; Queen Vic, vhc., needs more stop and width of head, was not well shown, body fair but showing her bag. Lord Ponto was the best pup but is faulty in forelegs and head is too long, body very fair, will improve; Lady Wallace is plain in head; Twilight is houndy in ears, good front and nice smooth coat.

In smooth challenge dogs Alton II., shown very thin, had no competition. Challenge bitches had no entries. In open dogs (3) two very fair ones appeared in Clovis and Argyle Alpha, and the former's sweet quality would suit one of the other sex; he is prettily formed all over, but there should be more of him; like all the Keeper family, his head is beautifully marked, body is light at present, and coat should be closer and shorter; given more bone and substance and size he would be hard to beat. Argyle Alpha was thin and lathy-looking, and his lack of shadings give his head a plain look, but it is well shaped and more massive than the winner. Dawn, third, is plain-faced and straight behind. Four turned up in the bitch class, and Lady Judith had no difficulty in winning from Linda, though the latter has a head showing quality, carries too much coat and is not true in front. Lady Wallace took third, and Wilda, vhc., mixed in coat, shows some quality in head and is well formed in body, running third very close for place. Clovis, Imperial and Lord Ponto took the money in novice dogs (10), and nothing of any moment followed them, while Artilla, Vera and Linda were easily picked as winners in the bitch class and have been described above. The Argyle Kennels won the kennel prize, and Sir Bedivere was considered the best in the show, of course.

Bloodhounds had but one entry, Roger Williams's Vigilant, and was marked absent.

NEWFOUNDLANDS (*James Mortimer, Judge*).—A poor lot, and only one considered good enough for first, Charlie, who is faulty in head and ears and coat not flat enough; little type or quality about him. Afterward Rover was brought in and awarded an extra first, which he was well entitled to, as he scores over the regular winner in general type, head, ears and coat, and is a better one than we generally see; I think he won last year. Second and third were rightly withheld, all curly black dogs are not Newfoundlands.

GREAT DANES (*James Mortimer, Judge*).—A great falling off in quality here, not a good one in the lot. Challenge entries drawn blank. Open had two entries but one was absent leaving a bloodless victory to Don Cæsar Jr., a very throaty, coarse headed dog with a curled tail and no type or character about him according to the sort of Great Danes we expect to see nowadays. In bitches (2) Ruth, a coarse sort of harlequin with all sorts of faults won from a fairish brindle in Brenda, who is too lippy but has a better head, cleaner and longer, than the winner though weak before the eye, and is heavy in shoulders; neither are above mediocrity. Brenda won in novices from one whose name was not in the catalogue, a coarse headed one.

RUSSIAN WOLFHOUNDS (*James Mortimer, Judge*).—The strongest lot of these handsome hounds that Canada has yet seen, faced the judge. Mr. Huntington having transferred his team to the Terra Cotta Kennel the local kennel made a good start though dissappointed in some of the main issues—notably the kennel prize. In challenge dogs Argoss and Col. Dietz competed but the former scored so much in loin, shoulders, ribs, feet and quarters that the issue was scarcely doubtful; at the same time, Col. Dietz is an improving dog and only needs more flesh to make a harder fight. In bitches a fine trio came forward and Ch. Zerry being thrown out for her very slight chorea, left the battle between Princess Irma and Svodka, the former winning in size, action, head, cleanness of shoulders but losing in feet, to Svodka; both were well shown and in proper coat. These two are of one type. In open dogs type entered into the question, the judge leaning to the "Leekhoi" style in preference to the smoother ones, which come from the Argoss stock. Here Sorvan-antes won, he is well known and while of the "Leekhoi" type has more substance, swell of rib and so on than the general run; he moved very dicky behind, his hind legs being tucked under him, but was in better shape thanwe have seen him lately; Odrooski, the black dog, is also well known but was devoid of all feathering and too smooth, in action he was much superior and was well shown, barring coat. Ivan was lucky to best his little brother Kriletzka, who, if he fills out properly, will be a good one, both were out of coat, but Ivan was more like a thin "streak" than anything else, Kriletzka being bigger is also excellent in head, front and spread of quarters for a nine months pup; he is by Argoss out of Krimena. In the bitch class first went to the judge's old favorite Zmeika, who, barring her faulty, weak hocks, is a capital specimen of the "Leekhoi" type, excellent loin, front and head and is well and correctly coated; Riga is a well put up bitch but like her brother Odrooski, too smooth and lacking feather and frill. Lady Dietz, third, to carry out the type, should therefore have been second, although a little too fat, was in splendid form and coat, whereas Riga needs attention and was bare in places. Daiska has flat feet but is nicely formed otherwise, has a sweet long head and was in nice correct coat and well shown. Olivia was absent. The kennel prize went to the Seacroft Kennels probably on the score of evenness of type of what we have always spoken of as the "distinctly Russian" which this judge seems to favor and grasp the meaning of.

DEERHOUNDS (*James Mortimer, Judge*).—These are never very numerous at Canadian shows, and the entry, as usual, depended on American kennels, Mr. Muir supplying the three entries. Old champion Olga, keeping up well, tacked up another first to her long score. The well-known Bruar II., in open dogs, won again, beating his kennel mate, Paul Potter, in general symmetry, and especially from shoulders back, but losing something in length and strength of head. There were no entries in the bitch class.

GREYHOUNDS (*James Mortimer, Judge*).—This breed is not improving here; that is, the best are imported from the States. We have seen both larger entries and very much better quality all through than those shown this year; in fact, the open classes were only moderate. Gem of the Season, showing age, was alone in challenge dogs; he was shown much better than at late shows. In the corresponding bitch class Southern Beauty met Wild Rose, and the verdict was not long in doubt, the black and white being beaten in head, body and quarters. Beauty is improving in condition, but is still bare on quarters. Some people have thought Rose could beat the Beauty, but it will be only when the latter is altogether off color. In open dogs (6) there was not a real topper in the class. Dallas, an improving dog, scored well in bone, front, ribs and quarters from Lord Torrington, whose shoulders are not clean enough, and his light stary eyes spoil his head and outlook. The well-known Justinian was third; he should have more rib, is faulty in feet and ears. His son, Justinian II., was given hc.; is faulty in front, more depth of chest and rib are necessary to bring him up higher. The winner is a Gem of the Season dog. In bitches (5), Cyclone was to the fore; her head and ears are coarse, but she is a well-put-up bitch, scoring in front and shoulders; more swell of rib would improve her. Jetsam, second, is faulty in feet and pasterns, and loin is too long; is well-ribbed, but coat should be finer. Chips, a fair-bodied one, but losing in front, secured third place; she is well known. Pee-De-Ku, hc., must depend on her hind parts for recognition; she is well developed there, but is heavy in shoulders, and should be better ribbed up, good neck and fair head. Cyclone won in novices, followed by Miss Neversettle and Grimsby Ranger, sister and brother, who are not furnished up yet. As a compliment to the judge's critical eye, Cyclone clinched her claim to first place by afterward winning the greyhound race on the track, as reported elsewhere. The kennel prize went easily to the Terra Cotta Kennels.

FOXHOUNDS (*Major Taylor, Judge*).—As usual at this show the American and English types were mixed, but not so badly as last year. That good old bitch Vexation was the only challenge representative. Open dogs (6) proved a fair class but there was a good deal of the American in the shape of one or two bodies. Ringwood won, a well-built hound, excellent in forelegs and quarters; shoulders should be cleaner and a little better defined; stop would improve an otherwise good head; a nice typical hound. Bugler, second, has an American type of body, but of course deeper and thicker; should be more tucked up at flank and feet are rather flat. Ringwood and Genius II. were last year shown as American hounds and in my report I stated that they (Genius II., Ringwood, etc.) should have been turned out of the American class as they were purely English in type and build. This year we see these same dogs in the English class where they belong. Genius II., third, is a truer built hound than Bugler and could claim second place; his skull is a trifle broad and he is getting a little heavy in shoulders, and better bent hocks would improve him. Touchstone II., vhc., has the best head in the class but feet are open and is back on pasterns and was not well shown; light in flesh. Major I did not see. There were only two bitches, first going to Belle, plain in head and throaty and body more after the American type, excellent front and looks like a worker. Frolic, from the same kennel, was second. In American dog hounds Clinker was the winner; his right place is in the English class and last year we preferred him to Genius II. and Ringwood; he should be better ribbed up but is a good hound in other respects. Trooper, second, has a good hound expression and is of a racy build; rather coarse head for an American. Grip, third, is open in feet and not straight; a bit long cast but good shoulders and bone. Argonaut, that could beat either of them, sticking purely to type, was absent. Clinker, the winner, is of the same litter as Genius II. and Ringwood in the English class. Maud, the winner last year, was again first, a well-built bitch with capital running gear; a little faulty in head. Rush, second, won in the English class last year; she loses to the others in front and hind parts. We should advise in the future that one division only should be made in this breed at this show. All the dogs that are shown are simply English hounds having English characteristics, and when a dog is a bit light off shape or long cast as an English he does duty as an American. The winning American (?) bitch is English bred, being out of the same litter as Ringwood, Genius II., etc.; the sire, old Genius, was really such in his way, for his progeny cover the whole of the foxhound prize money.

POINTERS (*Major J. M. Taylor, Judge*).—The classes in this breed simply provided, with one exception, a series of walkovers for Mr. Davey's kennel. The entries were lamentably weak, and while some of the old cracks were benched, the rank and file were not more than fair to medium. In challenge classes for heavy-weights Josie Bracket was the only one to show up, Hempstead Farm's Sandford Druid and Woolton Game declining their engagements. Josie looked fit to battle for any honors, and would have given Woolton Game the race of her life. In open dogs, same division, Jone had a walkover, as Hempstead Beau and Mack, the other entries, were absent; Jone partakes of his sire Lord Graphic's type of head, broad skull and stary eye; is light in bone and not ribbed up enough, besides being shown in light flesh, having just come from Manitoba field work. In bitches Brighton Leda scored over Phantom, well known, in head and body, Leda's ear carriage spoils her otherwise good head; Phantom was too fat. Duke of Hessen was absent in challenge light-weight dogs and Lady Gay Spanker, looking well, being out for specials only, left the sweet headed Miss Rumor a bloodless victory; she was well shown. In open dogs Ridgeview Comet, an improved dog, in Turk's absence, had no competition. In the bitch class three came forward, Hempstead Blossom, marked absent, Chaira won nicely from Faustina; she is a nicely built bitch all round, barring a little heaviness in shoulders and fine muzzle; Faustina was shown too light in flesh, muzzle should be squarer, and more rib would improve her body; her feet are not just true either. Lucy, also thin, was third; she was hard as nails and is better in front than either of the winners. In novices (2) Faustina beat Dick Taylor, a sleepy looking sort, not so clean in front and shoulders as the winner, being a bit wide there. Mr. Davey won both kennel prizes without competition.

ENGLISH SETTERS (*Major J. M. Taylor, Judge*).—We were sorry to see a distinct falling off in quality and number here, in fact the absence of the American representatives left a

void in all the setter classes, and with about two exceptions there was really not a first class English setter shown. Both challenge classes were empty. In open dogs (6) the well known field dog Paul Bo took his fourth first and now enters the challenge division. He was looking well, barring a little fineness in muzzle, little fault can be found with him. Second went to Washtenaw Grouse, the winner at Detroit last year; if he had a little more stop his head would be well shaped. The well known Matane took third, he was shown light in flesh, with better defined stop his head would be good; is well built in other respects. Brighton Tobe, reserve, should be better bent in hocks and stronger muzzle, other parts commendable, fresh from his Manitoba victory he was not in bench show bloom, but the blue ribbon on the turf was good enough for him. Druid, Jr., vhc., has good bone and front, should have more rib and chest, rather plain in head. Mingo, Jr., is throaty and rather big and coarse and deficient in ribs. The bitch class brought out eleven. Lady Patch scored her third consecutive victory and was looking well. Next came Luna, a nice headed and fronted one, but light in body and rib, shows lots of quality. Misfortune, third, has a weak head but is good in body and legs, but shown light in flesh. Liberty II., fourth, should be deeper in back ribs, and droops in quarters. May, vhc., is a bit straight faced, plain in body, nice shoulders. Forest Trippo, vhc., is heavy in front, head well shaped, is throaty but deserved her position if not more. Forest Louisa, hc., should be squarer in muzzle, and narrower and cleaner in front, nice body and quarters. Nita Gitana, a nice type of bitch, should have been higher up though her light eye and indifferent front are against her, and she could be better behind, still, all over she is more of the winner's type. In novice dogs Brighton Monk took the blue, he is a nice sort whom a little more rib development would improve. Royal Dan, second, is a fair headed one but throaty and long cast. Forest King, third, has a fairly typical head but is let down behind and was shown light. In bitches the winners have been commented upon. The kennel prizes went to Mr. Davey.

IRISH SETTERS (*Major J. M. Taylor, Judge*).—Here was a great falling off and for this the Pittsburgh show and the non-entry of Oak Grove Kennels is responsible, as in former years with the Seminole and other kennels present competition has been very strong, though the decline began last year. No challenge entries. In open dogs (3) a very fair dog in Killane was placed at the top, excellent color, good head, though the nose turns up a trifle, good bone and legs, but a trifle large-sized. Don, second, was not in very good shape, a bit bowed in front, well ribbed and good color. St. Elmo, third, is light in muzzle and skull is too domy, nice color, legs and feet. One entry in bitches, River Roe; she has a sweet, typical head, and it is a good one, but her body is flat-sided, nice, sloping shoulders and good front—a very fine stamp. In novice dogs Don and St. Elmo were the entries, and in bitches Forest Sunset scored over Biddy, so in head and body, though a little off color, the issue was never in doubt. For the first time in years the kennel prizes did not fill.

GORDON SETTERS (*Major J. M. Taylor, Judge*).—Here was another falling off, only five dogs benched and eight entries. Black Prince won in open dogs. There were no challenge entries. He is plain-faced and light in tan, no pencilings, good body and running gear. Second went to Guy, light and plain in body, should have more stop and a stronger muzzle. Rock, third, is heavy in shoulders and a bit straight in hocks, and but a moderate one in a moderate class. In bitches (2) two well known animals in Mount Royal Wanda and Countess Roxie came forward and were placed as named. The winner was the best Gordon in the show, fairly good head, clean shoulders, an improved bitch, and not meeting such hot company as last year, stood out prominently. The novice class was a repetition of the open dogs. Ben Lewis and his team were missed in this breed.

COLLIES (*R. McEwen, Judge*).—It would seem that a prophet is of no account in his own country after all if we may judge by the collie entry which was very mediocre, but we know that Mr. McEwen is of some account, and as he pretty well represents colliedom in Canada we expected a light entry, the big American kennels having gone to Pittsburgh. There were no challenge entries. In open dogs (6) Ightenhill Chief carried out our criticism at Detroit, where he was placed on a level with Finsbury Dude, third here; Chief has a good length of head, eye should be darker and is faulty in quarters, coat not dense enough, but is a fair all-round dog. Second to Finsbury Hero, who was out of top coat but good under, a bit short in muzzle. Finsbury Dude, third, is thick in head but was in good coat. An unnamed one of R. G. Steacey's took fourth; he is big in ear but rather nice head and expression, fair coat. Clip, vhc., has an open coat, but of good texture, a little full and round in skull, good length of head, faulty in tail and shown light. In bitches (3) Old Hall Perfect, the winner, a new one, a daughter of Southport Perfection, was out of coat and shown quite fat enough, ears not well carried and are large, head fairly good but cheeky, nice expression Second to Shepardess, an eleven months pup, by Christopher; plenty of coat but not dense enough, light in loin and feet could be better, too open, and stop is too clearly defined. Nora, third, was last year's winner, is a little fine in muzzle and has big ears carried wide, too full in brow, coat of good length, but not so dense as last year. In novice dogs (5) Rufford Whitefriar, another new one recently imported, scored over Ightenhill Chief; the winner is a nearly all white dog with a fair head, stop too well defined, ears large but well carried, good bone, but forefeet turn out at times, lacks undercoat and is light in body. Canadian Monarch was third, rather coarse in head, and big widely carried ears, coat should be denser. MacLeod, reserve, is faulty in ears, needs more rib and coat to be good. Shepardess won in bitches. Strathella, second, is pinched in muzzle and is a weedy, light-bodied bitch. Stratford Nellie, third, carries her ears like a deer, but has a sweet little head, and was, of course, like the others, out of coat. Ottenburn Peggy has ears like an Esquimaux, and is light in body. The kennel prize went to Saunders and Mighton.

BULL-TERRIERS (*T. S. Bellin, Judge*).—These classes are generally strong in the Queen City, and this occasion proved no exception, but competition was chiefly confined to Mr. Higginson's and the Wentworth Kennels. Duke of Rochester was alone in challenge dogs and scored his debutal win; he looked fairly well, and is keeping his head and filling out in body nicely. In bitches Vesper Belle downed Kit, but considering how very poor in head, coarse and thick the former is, in spite of good front and body, Kit's better head and equally good points behind that member should have been recognized. In open dogs our old friend Billy Bulger is an improved dog, front good, excellent body and stern, head a bit coarse, excellent quarters and shown in rare hard shape; this time he received his deserts, and should have won last year. Chatham Bob wrongly beat him last year; is light of eye and getting bull-headed. Harper's Whiskey, the Hornellsville edible dog, took third honors, and is a very promising sort; toes should be closer, head a trifle thick, and stop should not be so clearly defined, but is excellent in shoulders, body and hindparts, and was well put down. Buxton Baron II. has a light, long body, is thick in skull, and pasterns should be stronger. In bitches (2) last year's winner, Edgewood Robin, won again; she is a bit out at shoulder, is cheeky, stop too defined, and eye should be darker, otherwise good. White Rose, second, I preferred for first, better front, fair bone and good body, eye a bit light, and cheeky. In light-weight dogs there was no denying Principio's claims to first, as he was in tiptop shape and keeping very well. Vesper Willow, second, is a little wide and out at elbow, fair head, that should get no coarser, feet open, nice body, in fact, a smart terrier. Barton, third, is a light-waisted pup of eight months, good bone and fair head and front. Bitches (3) proved a victory for Nellie Harper, a well known face. She is a granddaughter of Vero Shaw's old Nelson, and much like his picture; she was in whelp. Second to Bess of Rochester, her daughter, should be truer in placement of feet, rare bone and substance, fair head, but eyes should be darker, good body and front. Countess of Wentworth, third, is lightly furnished yet, feet turn out, eyes quite large enough, good set on of stern. Harper's Whiskey won in dogs (4) and one of Uncle Dick's guesses came true. The others have been mentioned, and the same in bitches (5).

IRISH TERRIERS (*James Mortimer, Judge*).—Not a great deal of quality this time In challenge dogs Brickbat, Jr., not looking so lusty as usual, was alone. Open dogs (3) saw Martin Shamrock first, a trifle coarse in head, good ears, and a little more rib would improve his body, good legs and feet and hard coat. The Canadian Ambassador, second, has been out before, shows a little black, looked thin but in fair coat. Carleton Blarney, third, is too long cast, and feet should be truer, and has not the terrier eye, too full. The Detroit *debutante*, Glenary Oonagh, won nicely in bitches (6), she is really a smart terrier, nice long clean head, and well made all round if she had a little more rib. Rugby Norah II., second, has her faults in forelegs, ears and muzzle. Killarney Girl, third, a fair sort, but light and full in eye, and faulty in ears. Carleton Norah, vhc., is a trifle short-faced and wide in skull, and was shown short of coat, otherwise fair. Belle of Shandon, hc., has poor ears, and her coat is shot with black, has a fair head and good coat texture. Judy, c., was weedy-looking and ragged in coat, all out of shape, or of course would have done better. With the exception of Rose, second, the novice (6) winners have been mentioned. Rose is too big and rather coarse in head, good coat, body, legs and feet, but ears could be carried better.

DANDIE DINMONT TERRIERS (*James Mortimer, Judge*).—A poor lot. First and second were withheld in dogs (3) and third given to Bruce, a trifle high on leg, out of coat, very crooked in front, and coat and texture not right, not silky enough in head and ears. In bitches there were no entries.

BEDLINGTONS (*James Mortimer, Judge*).—We can always expect a few of these game terriers at this show, but they don't seem to make much headway and are far from good. In open dogs a new lot, mostly owned by Mr. Barber, came forward. Mike, the winner, has a fairly wedge-shaped head, little topknot and ear tips, feet should be truer and loin be more arched, fair coat. Blucher, second, a liver, is heavy in shoulders and weak in muzzle, good topknot, coat soft, but he was in rare muscle and hard condition. Dash, third, is too big and coarse in head and is long cast, good front. In bitches (2) Miss Tack won nicely from Floss, who loses in head, but gains in body and coat, both good in topknot and tips.

SCOTTISH TERRIERS (*James Mortimer, Judge*).—With the Wankie Kennels out in force there was no doubt about the quality, and the display was a fine one. In challenge dogs champion Tiree and Kilroy was again the order, both looked well. Open dogs (5) furnished another win for Wankie Tam, whose forelegs are his worst feature. Wankie Dandie, second, is not so cobby in body as Tam, fair head, but loses in muzzle to the winner. St. Clair Don, third, is a bit on the leg, is quite long enough in body, rather light in muzzle, nice coat. Wankie Caddie, vhc., is soft in coat and skull not flat enough, tail carried a bit too gayly, fair front, and ears should be a little smaller. In bitches (6) Vorda won from Clutha, beating in head, though ears are a trifle large, nice coat and body. Clutha's coat should be harder and muzzle stronger, nice ears and is well developed in quarters. Wankie Janet, third, is too long in body, was short of coat and throws her elbows out a little, good long head and smart outlook. St. Clair Annie is short faced and cheeky, excellent forelegs, but coat too open. Merry Coll, vhc., has been repeatedly described, looked light in body here. Compton Belle has too short a head and is soft in coat, but she has a correct front. The novice dogs were chiefly repetitions and the same in bitches. Burton Bitters, a newly imported one, with some winnings on the other side, took only c., but I could not find her; but she will probably be seen at Providence.

SKYE TERRIERS (*James Mortimer, Judge*).—With the exception of one entry Mrs. E. M. Williams farmed these classes, and we were pleased to welcome such a genial couple as Mr. and Mrs. Williams to the fancy. Skye terriers go well in certain districts, and there is no reason why, with such stock as Old Burgundy and others, the new kennel should not do well in America. Old Burgundy, a champion in the old country, was put down in beautiful shape and is certainly an eye-opener for some of us in regard to coat and other characteristics; and there will be trouble ahead for some of the old cracks when he meets them. In bitches (2), Phumps, though out of coat, scored well over Princess May in head, length of body and substance. In novices (2), Fanbur won over Buccaneer; is a more level-topped one in better coat; both low to the ground and typical.

AIREDALES (*James Mortimer, Judge*).—An increase in numbers in this breed, but with one exception they were poor. Bootles was the only one that really came up to requirements, and he is faulty behind, smart head, well-carried ears, and good coat and forelegs; nice size. Bess, second, is rather woolly-coated and ears not well carried. Nettle is too big and long-coated.

BLACK AND TAN TERRIERS (*James Mortimer, Judge*).—In the challenge class Broomfield Sultan in much better shape than in the spring beat Gypsey Girl in tan, quarters and set on of stern. In open dogs first went to a smart pup in Fred, who only needs time for rib development to make a name for himself; excellent front, head and hind parts and tail, good color, and thumb marks will become clearer, probably. Second to Darkie who scores over Sambo in clearness and shape of head; excellent markings, body should be shorter and muzzle is too Roman; large size. Sambo has too much stop. In bitches Roche Tulip, though a bit snipy and showing in whelp, scored nicely; good tail and thumb marks. Popsy, second, was lucky; though a smart sort is betwixt and between in size—neither in one class nor the other; but for a small one has a clean, long head, is not very true in front and stern is set on too low. Rochelle Majestic, third, drop-eared, is off in front but good in thumb marks, too much stop and should be darker in eye. Chloe, vhc., is dark-faced and light in body, and thumb marks and pencilings not distinct enough, also a little full in eye. Kennel prize went to F. C. McLean, who has a rather nice team and is very entusiastic in his fancy.

POODLES (*James Mortimer, Judge*).—There was a good entry here but the absence of some of the best rather detracted from the quality. Rajah, looking a little gross but in excellent close curl, was unopposed in the challenge class for dogs in Diamant's absence. Chloe, from the Meadowmere Kennels, won in Vivette's absence. Open dogs (7) saw Hill Hurst Nap, in excellent trim and curl, skull rather broad, win nicely from Tribune, whose eye should be darker and muzzle better filled in before the eye, but is a smart sort. Emperor, third, is a little wooly-coated and light in loin. Dan Lamont, vhc., turns his feet out, and but for his light loin would be good in body; his stern is set on too low. Diablo, c, was in poor shape and is entirely too long cast. In bitches (6) Victoria won but I could not find her. Second went to Hill Hurst Posey, a little plain before the eye, but well shown and in grand curl and condition. Hill Hurst Dinah came third; she is well known. Black Maria, vhc., is a little rusty in coat and slack in back. Cybele and Cigarette were absent. In cordeds (3) first went to White Pete, a plain dog, short in cords, good head. Dr. Vair, second, has a back as long as a street and dips as well; cords short. White Bob is something on the bobtail order.

SPANIELS (*E. M. Oldham, Judge*).—One expects a good entry in Canada's breed and we are never disappointed. A change seems to be creeping on in favor of larger and more active cockers, and there was quite an evenness of type especially in the any other color where the reds are making great headway. The blacks, seemingly, are falling off in numbers compared to former years. Several new ones were shown and they generally got well up in the list.

In Irish water spaniels, first went to Dan Rice, a big well built dog, but only in fair curl, fore part of legs not clothed as they should be and has very little topknot; has been used a good deal this month. Second to Jacko, not close enough in curl, fair head. Shot Rhue, a big coarse dog took third, short of coat, and Dennis dropped to a c., for very poor condition. Marguerite was the only bitch entry and she was all out of shape, but was the only one with properly clothed legs.

Only two Clumbers and neither tip-top; Quester alone in dogs, well shown, and Maud, too light in body and leggy and short of coat, secured the corresponding prize for her sex.

Field spaniels showed up well but were more or less out of shape. In challenge dogs Brantford Mohawk, a little light in body, was alone. In bitches Daisy Dean scored over Rosedale Bess especially in condition, the latter showing evidence of recent maternal duties, but she has the best head of the two. In open dogs (3) the issue was not long in doubt, for Staley Baron scores so in length, skull and muzzle, though shown a little light. Echo was in ragged coat; Judge absent. In bitches, first to Maid who scores over Black Queen in head and length, the latter was well shown but dips a trifle in back. Nancy, third, has a light pinched muzzle, skull too domy and shows quite enough daylight.

In liver dogs the heavy headed and deep bodied Coles Hill Rufus won, followed by Napoleon who was shown light and ragged and is not deep or square enough in muzzle; Gypsy Belle, third, turns her feet out and looked tucked up in flank. Any other color fields were a mixed lot, the winner turning up in Jack who having had an argument with a trolley car had a leg smashed, but Dr. Nicoll set it so straight that it beats the other one; Spotted Boy was second, Nellie third, Antique fourth, losing in head and ears. In novices Spracklin's Belle was the only competitor, she is weak in face and body should be longer. In black cocker challenge dogs, Black Duke competing for specials only left the ribbon to Pickpania who was well shown; no challenge bitches. In any other color, Brantford Red Jacket, getting gray in muzzle, scored over Red Obo. Then came the black open dogs, and a new face, Still in the Ring, complied with his master's wishes and won well in hand too; capital head showing lots of quality, and front good if feet were a little truer, stands a trifle high at stern, but a cocker of good size and action; Commodore, well known, second, losing in head and front to winner, also in depth of body; Woodland Clipper, third, is a bit wide in front and rather coarse in head but well shaped; Tim, fourth, is a bit leggy and has a field head and body on same order. In bitches (6) first went to Baby Ruth who is still light in body and not true at elbow, but her charming head still serves her in good stead; Nellie, second, is a nice cobby sort a little full in brow; Rideau Reine was third, faulty in stop, good otherwise, Fossey Wiltshire, fourth, is a little weak in muzzle, nice height and well shown; Miss Phyllis, an old face, was reserve, and Fanny hc., is handicapped by a light eye, else she is nicely put together.

In any other color dogs, Hamilton Jack repeated last year's victory, but had less cause to crow this time, though winning easily in head, front and condition over Keswick, his only opponent. Then came a bad class to judge, nearly all being reds and very even in type. These were any other color bitches (15), and gave the judge a bad half hour before he decided upon Fannie, a liver, for first choice. She was short of coat, but is a well-made cocker, with good running gear, if such a term can be used with this breed, and I think it can in this case. Brantford Beauty I liked quite as well in body, well-ribbed, muzzle a trifle weak below the eye, excellent front, a good working stamp, but looking a little ragged owing to maternal duties. Raglan Russette, third, is one with good legs and feet, body well formed if a little cobbier, rare quarters, but quite as large as we want this breed. Red Rose, fourth, is a trifle heavy in shoulders, but a good working stamp if head were better shaped in skull, good legs and body, and quite large enough. These were all good cockers that could do good work in the field for any one, and that is what we want a cocker for. Queenie Mac I could not find. Among the others I liked Polly Harmon, a little long-faced and also long in body, but an active stamp of cocker, though her front should be straighter. Red Duchess is a pup with a capital head, but small yet, and undeveloped in body; she did better in the puppy class. The novice dog winners have been commented on, and in bitches all but the winner, Cora II., were in the previous classes. None of them are good in head, and faulty fronts are noticeable. Raglan Ruby is too long-faced. In puppy dogs Tim won over Billy, followed by Red Sultan, but neither of them will set the lake on fire. In puppy bitches the judge felt like giving Red Duchess better recognition, and placed her over Queenie Mac, first going to Woodland Princess, a very nice-headed one, but a shy shower; quite long enough in body. Mr. Oldham was consistent and was able to raise them up a bit without creating undue comment—they just ran that way.

DACHSHUNDS (*James Mortimer, Judge*).—There was little quality here in open dogs. Topaz, a large dog, a bit coarse all through, was alone; he is fairly well shaped, but too big, his master, an old reader of FOREST AND STREAM, thinks the world of him. In bitches two pretty little German hound-terriers in Maeuschen von Vento and Vento Flossie were placed as named; they have short ears, heads and bodies compared to the general run of these dogs in America and were black and tan in color. They come from good working stock and are said to be very game

BEAGLES (*Major J. M. Taylor, Judge*).—In the language of the classics these classes were a "cinch" for the Hornell-Harmony Kennels. This is a pity, as with such a team as they are showing now they could look serene no matter how hot the company they found themselves in. In the large sized challenge classes Sherry, looking tiptop, and champion Elf were alone, the latter keeps herself well, although of course rather heavy in neck and shoulders. In open dogs (2) Roger W. beats Pomp in body and length of head, the latter being a bit long, but well formed. Bitches had three entries, but one was absent, and both prizes fell to the Covert Kennels with Daisy Corbett and Rose Graham, the former looking deeper and lustier in body and the latter losing in strength of muzzle, but good behind that. In novices (2) a very fair bitch in Kitty Clover, a bit out at elbow, good head and body, beat Rose Graham.

In under 13in. the challenge prizes fell respectively to champion Royal Krueger and champion Ava W., both, especially the latter, looking in splendid form. Two well known dogs, oft described, furnished the winners in the dog class (2), Razzle and Little Wonder. The only competition was in the next class for bitches, where it was nip and tuck between Evangeline and Kitty Clover. The latter is a little dished in muzzle, elbow out at times, but a well made bitch, with lots of character. Evangeline gets it in head and front a trifle. Dazzle was third; she is light in substance compared to the other two, and but for Hia's fatness should have given place to the latter, as she is beaten in front and body, and carriage of stern. Hia was certainly deserving of something. The H. & H. pack was beautifully shown, and a prettier, more sorty lot, when held together, would be very difficult to find.

FOX-TERRIERS (*T. S. Bellin, Judge*).—We expected to see

a greater improvement in quality, but though the classes were well filled there was not any very noticeable quality in the smooth division. Beverwyck Punster furnished the challenge dog winner, but he looked light and leggy. Ripon Stormer was absent. In open dogs (9) Beverwyck King Pin scored somewhat easily in character, though getting a trifle coarse, especially in skull, excellent front and coat. Belvoir King, second, is a youngster that will keep, he is light and leggy at present, but had the cleanest front and a nice long head; did not carry his ears well in the ring. Rideau Rivet was third, he is too full in brow and skull a bit wide, good front, plenty of coat, but not enough rib. Dusky Diamond, fourth, is snipy and does not show much terrier character; good front and nice ears; of the others I liked Seacroft King, is light in body, very fair head and ears. Seacroft Jessie, second in bitches (9), her muzzle should be stronger, good legs and feet, and with a better spring of ribs would be improved. Stardale Belle stands a little out in front, fair head and body, should be a trifle shorter and deeper. Belvoir Becky, third, showed an excellent front, muzzle a bit weak before the eye, and skull should be deeper and not so round, eye rather light. Beverwyck Twinkle hardly deserved her fourth position, losing in head and front to the others. Belvoir Queen, reserve, has an excellent pair of forelegs, nice ear and head, body needs furnishing yet, but was in excellent coat; should have been fourth. Seacroft Spendthrift was lucky, poor head. In dog puppies (8) Seacroft Duke beat Stardale Sharke in feet, ears and body, but not in bone. Belvoir Queen won nicely in bitches (7) and Seacroft Duke took the novice dog prize from nine others, followed by Stardale Sharke and Stardale Sunbeam had a bloodless victory in the bitch class.

The wire-haired division was strongly supported. Of course the classification was very liberal and duplicates were abundant. In challenge dogs Oakleigh Bruiser beat Undercliffe Cornet in cleanness of head and shoulder, but was shown light. In bitches Sister Pattern, out of shape, was luckily alone. Open dogs was another victory for Brittle, but considering his mouth and age, good dog as he undoubtedly is, Dark Eye might well have scored though he is not so straight in front but was in better coat. Compton Vindex had been in the wars to look at his head, and this is his worst feature; ears are big but well made otherwise, when we could see him properly. Brittle Beaut beat his old antagonist, Mister Great Snap, being better now in head and bone, but rather leggy; Mr. G. S. is a better size. Halifax Revival was dead out of shape but he is all a terrier, with great bone and excellent forelegs. In bitches (6) Roath Rennie, the winner, is not in good shape; a bit wide in front, good skull and ears well carried. Bonnet, from the same kennel, is too full in eye and puts her feet too close; fair coat. Hill Hurst Brunette's nice front and fairly long head deserved her recognition. Roth's Tacit has gone off rather.

The novice dog (6) winner Compton Bruiser will probably get coarse in skull, excellent front, ears and coat. Aldon Fire Ball is a bit bowed in front, and Once Again (we hope so Major Stewart) is a big unfurnished one. In bitches (6), H. H. Bennetta and My Own took the money and the former repeated the win in the puppy class with Once Again the runner up and Aldon Blue Bonnie third in both classes. Hill Hurst Kennel took the kennel prize for wire or smooth and Compton Kennels that for wires. The Canadian Club offered a good lot of specials, but there seems to be a little of last year's enthusiasm wanting this time.

YORKSHIRES (*James Mortimer, Judge*).—Very poor and only a third awarded. Two fair toys were shown, in Paddy, Tricks and Tessie.

PUGS (*James Mortimer, Judge*).—As usual a poor lot. Challenge classes empty. Prizes withheld from a motley crew in open dogs and Daisy Bell, leggy and light in muzzle, won unopposed in the bitch class. Novice prizes withheld.

TOY SPANIELS (*E. M. Oldham, Judge*).—In King Charles spaniels Toronto Royal Duke took the challenge prize. In open dogs Dominion Prince won over Toronto Charlie II., though the latter has the best head, especially skull and tan and coat. In bitches Rose beat Annie Laurie nicely in nearly every point, and the latter excels Ruby, third, in skull and depth of muzzle, but loses behind and in body and color. Romeo won again in the mixed toy spaniel class, followed by a Blenheim with a better, shorter muzzle; both dogs are too big.

ITALIAN GREYHOUNDS (*James Mortimer, Judge*).—Dainty Lass, the Louisville winner, was alone. In the miscellaneous class a fairish basset won over the Chinese crested Too Too, with a white English terrier in poor condition third.

H. W. LACY.

LIST OF AWARDS.

MASTIFFS.—CHALLENGE—*Bitches:* 1st, C. E. Bunn's Lady Coleus; 2d, H. Falconer's Attraction.—OPEN—*Dogs:* 1st and 2d, C. E. Bunn's Ealderman and Leamington; 3d and high com., W. D. Forbes's Grimsby Caution and Nigo. Very high com., J. A. Beier's Beaufort's Boy. *Bitches:* 1st, C. E. Bunn's Mina Minting; 2d, Woodbury Kennels' Cerene; 3d, H. Falconer's H. R. H. Very high com., W. D. Forbes's Ilford Bess.—NOVICE—1st and 2d, C. E. Bunn's Ealderman and Mina Minting; 2d, H. Falconer's H. R. H.

ST. BERNARDS.—ROUGH-COATED.—CHALLENGE—*Dogs:* 1st, Argyle Kennels' Sir Bedivere. *Bitches:* 1st, Argyle Kennels' Rustic Beauty.—OPEN—*Dogs:* 1st, G. Barrow's Imperial; 2d, T. S. Vipond's Duke Wellington II.; 3d, Belle Isle Kennels' Earl Douglas. Very high com., P. F. Carey's Prince Imperial and A. Wilson's Don Nora. Com., P. Zeidler's Leo Z. and J. W. Nagle's Sir Henry Havelock. *Bitches:* 1st, Argyle Kennels' Lady Adelaide; 2d and reserve, Belle Isle Kennels' Artilla and Lady Martin; 3d and very high com., P. Hart's Vera and Queen Vic. Com., J. C. Palmer's Nell Gwynne and J. Miller's Mable. *Puppies:* 1st, J. W. Nagle's Lord Ponto and Twilight; 2d, P. Hart's Lady Wallace.

ST. BERNARDS.—SMOOTH-COATED.—CHALLENGE—*Dogs:* 1st, Argyle Kennels' Alton II.—OPEN—*Dogs:* 1st, Belle Isle Kennels' Clovis; 2d, Argyle Kennels' Argyle Alpha; 3d, F. H. Norris's Dawn. *Bitches:* 1st, Argyle Kennels' Lady Judith; 2d, H. Gorman's Linda; 3d and very high com., P. Hart's Lady Wallace and Wilda.—NOVICE—*Dogs:* 1st, Belle Isle Kennels's Clovis; 2d, G. Barron's Imperial; 3d and reserve, J. W. Nagle's Lord Ponto and Sir Henry Havelock. High com., P. J. Carey's Prince Imperial. Com., D. Cameron's Prince Charlie, J. Ross' Battle Blent and Typical Kennels' Donovan. *Bitches:* 1st, Belle Isle 2d and very high com., P. Hart's Vera and Lady Wallace; 3d, H. Gorman's Linda. High com., J. W. Nagle's Twilight. Com., E. H. Caddy's Royal Mona and J. W. Nagle's Lady Havelock.

NEWFOUNDLANDS.—OPEN—*Dogs:* Extra 1st, Typical Kennels' Rover; 1st, Jas. Craig's Charlie; 2d withheld.

GREAT DANES.—OPEN—*Dogs:* Wortemburg Kennels' Don Cæsar, Sr. *Bitches:* 1st, H. P. Breary's Ruth; 2d, Wortemburg Kennels' Brenda.—NOVICE—1st, Wortemburg Kennels' Brenda.

RUSSIAN WOLFHOUNDS.—CHALLENGE—*Dogs:* 1st, Terra Cotta Kennels' champion Argoss; 2d, Chas. S. Hanks's Col. Dietz. *Bitches:* 1st, Terra Cotta Kennels' champion Princess Irma; 2d, Chas. S. Hanks's Svodka.—OPEN—*Dogs:* 1st, Chas. S. Hanks's Sorvanantes: 2d, Terra Cotta Kennels' Odrooski; 3d, John W. Kerr's Ivan. Very high com., Dr. A. R. Gordon's Kriletzka. *Bitches:* 1st and 3d, Chas. S. Hanks's Zmeika and Lady Dietz; 2d and very high com., Terra Cotta Kennels' Riga and Daiska.

SCOTCH STAGHOUNDS.—CHALLENGE—1st, W. H. Muir's Olga.—OPEN—*Dogs:* 1st and 2d, H. W. Muir's Bruar II. and Paul Potter.

GREYHOUNDS.—CHALLENGE—*Dogs:* 1st, Terra Cotta Kennels' Gem of the Season. *Bitches:* 1st and 2d, Terra Cotta Kennels' Southern Beauty and Wild Rose.—OPEN—*Dogs:* 1st, Terra Cotta Kennels' Dallas; 2d, H. Barker's Lord Torrington; 3d and high com., J. Wolfred Wurtele's Justinian and Justinian II. *Bitches:* 1st, H. Barker's Cyclone; 2d and high com., J. Wolfred Wurtele's Jetsam and Jess; 3d and high com., Terra Cotta Kennels' Chips and Pee De-Ku.—NOVICE—1st, H. Barker's Cyclone; 2d and 3d, W. F. Randall's Miss Never Settle and Grimsby Ranger.

FOXHOUNDS.—CHALLENGE—*Bitches:* 1st, Smith & Clark's Vexation.

ENGLISH FOXHOUNDS.—OPEN—*Dogs:* 1st and 3d, Smith & Clark's Ringwood and Genius II.; 2d, very high com. and high com., Typical Kennels' Bugler, Touchstone and Major. *Bitches:* 1st and 2d, Typical Kennels' Belle and Frolic.

AMERICAN FOXHOUNDS.—OPEN—1st, Smith & Clarke's Clinker; 2d, T. Woolings's Trooper; 3d, J. H. Fleming's Grip. *Bitches:* 1st, Smith & Clark's Maud; 2d, D. Purkess's Rush.

POINTERS.—CHALLENGE—*Bitches* (50lbs. and over): 1st, T. G. Davey's Josie Bracket.—OPEN—*Dogs* (55lbs. and over): 1st, T. G. Davey's Jone. *Bitches* (50lbs. and over): 1st, T. G. Davey's Brighton Leda; 2d, Forest Kennels' Phantom.—CHALLENGE—*Bitches* (under 50lbs.): 1st, T. G. Davey's Miss Rumor.—OPEN *Dogs* (under 55lbs.): 1st, T. G. Davey's Ridgeview Comet. *Bitches* (under 50lbs.): 1st, Mount Royal Kennels' Chaira; 2d and 3d, T. G. Davey's Faustina and Lucy.—NOVICE—1st, T. G. Davey's Faustina: 2d, Forest Kennels' Dick Taylor.

ENGLISH SETTERS.—*Dogs:* 1st, R. Merrill's Paul Bo; 2d, J. Mantz's Washtenaw Grouse; 3d, A. Wells's Matane. Reserve, T. G. Davey's Brighton Tobe. Very high com. and com., Dr. J. Kime's Druid, Jr., and Mingo, Jr. *Bitches:* 1st, Dr. J. Kime's Lady Patch; 2d, A. Wells's Luna; 3d and reserve, T. G. Davey's Misfortune and Liberty II. Very high com., John Smith's May, Forest Kennels' Forest Trippo. High com., Forest Kennels' Forest Louise. Com., C. G. Winchell's Nita Gitana.—NOVICE—*Dogs:* 1st, T. G. Davey's Brighton Monk; 2d, Dr. J. Kime's Royal Dan; 3d, Forest Kennels' Forest King. High com., Miss Bertha Sampson's Camp, E. H. Bickford's Brush. *Bitches:* 1st, Dr. J. Kime's Lady Lucy; 2d, T. G. Davey's Misfortune; 3d, R. A. McCready's Jess. Reserve, Forest Kennels' Forest Trippo. Very high com., John Smith's May. High com., Forest Kennels' Forest Starlight, A. Wells's Dido III. Com., Forest Kennels' (2) Sultana and Forest Lulu.

IRISH SETTERS.—*Dogs:* 1st, J. B. McKay's Killane; 2d, Woodbury Kennels' Don; 3d, S. Coulson's St. Elmo. *Bitches:* 1st, J. B. McKay's River Roe.—NOVICE—*Dogs:* 1st, Woodbury Kennels' Don; 2d, S. Coulson's St. Elmo. *Bitches:* 1st, Forest Kennels' Forest Sunset; 2d, Typical Kennels' Biddy.

GORDON SETTERS.—*Dogs:* 1st, W. P. Moss's Black Prince; 2d, Woodbury Kennels' Guy; 3d, S. R. Graham's Rock. *Bitches:* 1st, Forest Kennels' Mt. Royal Wanda; 2d, H. K. Smith's Countess Roxie.—NOVICE—1st, W. P. Moss's Black Prince; 2d, Woodbury Kennels' Guy; 3d, S. R. Graham's Rock.

COLLIES.—*Dogs:* 1st, A. J. & H. L. Jeffrey's Ightenhill Chief; 2d and 3d, Saunders & Mighton's Finsbury Hero and Finsbury Dude; 4th and very high com. reserve, R. G Steacy's —— and Clip. *Bitches:* 1st, R. G. Steacy's Old Hall Perfect; 2d, Sheppard Kennels' Sheppardess; 3d, Saunders Mighton's Nora.—NOVICE—*Dogs:* 1st, H. N. Crossley's Rufford Whitefriar; 2d and reserve, A. J. & H. L. Jeffrey's Ightenhill Chief and MacLeod; 3d, Saunder & Mighton's Canadian Monarch. *Bitches:* 1st, Sheppard Kennels' Sheppardess; 2d, H. N. Crossley's Strathella; 3d. A. J. & H. L. Jeffrey's Stratford Nellie. Reserve, C. Y. Ford's Otterburn Peggie.

BULLDOGS.—CHALLENGE—1st, Toon & Thomas's Romance.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, W. J. Higginson's Duke of Rochester. *Bitches:* 1st, W. Hammall's Vesper Bell; 2d, G. P. Runton's Kit.—OPEN—*Dogs* (30lbs. and over): 1st, W. J. Higginson's Billy Bulger; 2d, J. McCormack's Chatham Bob; 3d, J Otis Fellows's Harper's Whiskey. Very high com., H. H. Curtis's Buxton Baron II. *Bitches:* 1st and 2d, Wentworth Kennels' Edgewood Robin and White Rose. *Dogs* (under 30lbs.): 1st and 3d, Wentworth Kennels' Principio and Barton; 2d, W. Hammall's Vesper Willow. *Bitches:* 1st and 2d, W. J. Higginson's Nellie Harper and Bess of Rochester; 3d, Wentworth Kennels' Countess of Wentworth.—NOVICE—*Dogs:* 1st, Hornell-Harmony Kennels' Harper's Whiskey; 2d, W. Hammall's Vesper Willow; 3d, G. C. Mashinter's Nap. High com., M. Vaisey's Royal of Rochester. *Bitches:* 1st and 3d, W. J. Higginson's Bess of Rochester and Duchess of Rochester; 2d, high com. and com., Wentworth Kennels' White Rose, Queen Bess and White Star.

IRISH TERRIERS.—CHALLENGE—1st, Toon & Thomas's Brickbat, Jr.—OPEN—*Dogs:* 1st, T. S. Bellin's Marton Shamrock; 2d, J. B. McLean's The Canadian Ambassador; 3d, L. N. Bate's Carleton Blarney. *Bitches:* 1st, Dr. J. S. Niven's Glenary Oonaga; 2d, T. Geoghegan's Rugby Norah II; 3d, P. Brown's Killarney Girl. Very high com., Mount Royal Kennels' Carleton Nora. High com., C. Lyndon's Belle of Shannon. Com., Toon & Thomas's Judy.—NOVICE—1st, T. S. Bellin's Marton Shamrock; 2d and com., T. Geoghegan's Rose and Lady Alice; 3d, Mount Royal Kennels' Carleton Nora. High com., T. Geoghegan's Boxer Pat and C. Lyndon's Belle of Shannon.

DANDIE DINMONT TERRIERS.—*Dogs:* 1st and 2d withheld; 3d, R. Wanless's Bruce.

BEDLINGTON TERRIERS.—*Dogs:* 1st, 3d and high com., R. H. Barber's Mike, Dash and Dan; 2d, F. McCurry's Blucher. *Bitches:* 1st, Mount Royal Kennels' Miss Tack; 2d, R. H. Barber's Floss.

SCOTCH TERRIERS.—CHALLENGE—1st and 2d, Brooks & Ames's champion Tiree and Kilroy.—OPEN—1st, 2d and very high com., Brooks & Ames's Wankie Tam, Wankie Dandie and Wankie Caddie; 3d, W. P. Fraser's St. Clair Don. *Bitches:* 1st, 2d and 3d, Brooks & Ames's Vorda, Clutha and Wankie Janet. Reserve, W. P. Fraser's St. Clair Annie. Very high com., Toon & Thomas's Merry Call. High com., Compton Kennels' Compton Belle.—NOVICE—*Dogs:* 1st and very high com., Brooks & Ames's Wankie Dandie and Wankie Caddie; 2d, Compton Kennels' Compton Styx; 3d, W. P. Fraser's St. Clair Don. *Bitches:* 1st and 2d, Brooks & Ames's Clutha and Wankie Janet; 3d, W. P. Fraser's St. Clair Annie. Very high com., W. L. Crawford's Highland Tatters. High com., W. P. Fraser's Braw Lass and Inverness Girl. Com., C. S. Hanks's Burton Bitters.

SKYE TERRIERS.—*Dogs:* 1st, Mrs. E. M. Williams's champion Old Burgundy. *Bitches:* 1st and 2d, Mrs. E. M. Williams's Fanbur and Princess May.—NOVICE—1st and 2d, Mrs. E. M. Williams's Fanbur and Buccaneer.

AIREDALE TERRIERS.—1st, B. R. McConkey's Bootles; 2d and 3d, D. L. McCarthy's Bess and Nettle.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, Rochelle Kennels' Broomfield Sultan; 2d, Toon & Thomas's Gipsey Girl.—OPEN—*Dogs:* 1st and 2d, F. C. McLean's Fred and Darkie; 3d, G. E. Manson's Sambo. *Bitches:* 1st and 3d, F. C. McLean's Roche Tulip and Rochelle Majestic; 2d, C. Farrow's Topsy. Very high com., Mrs. C. Farrow's Chloe.

POODLES.—CHALLENGE—*Dogs:* 1st, Morey Kennels' Rajah. *Bitches:* 1st, Meadowmere Kennels' Chloe.—FRENCH—*Dogs:* 1st, Hill Hurst Kennels' Hill Hurst Nap; 2d, Morey Kennels' Tribune; 3d, Meadowmere Kennels' Emperor. Very high com., J. P. Wade's Dan Lamont. Com., Woodbury Kennels' Diabolo. *Bitches:* 1st, J. P. Wade's Victoria; 2d and 3d, Hill Hurst Kennels' Hill Hurst Posey and Hill Hurst Dinah. Very high com., Morey Kennels' Black Maria.—RUSSIAN—1st and 3d, Woodbury Kennels' White Pete and White Bob.

IRISH WATER SPANIELS.—*Dogs:* 1st, T. A. Carson's Dan Rice; 2d, Wm. Marsden's Jacko; 3d, Typical Kennels' Shaun Rhu. Com., Andrew Laidlaw's Dennis. *Bitches:* 1st, Andrew Laidlaw's Marguerite.

CLUMBER SPANIELS.—*Dogs:* 1st, Sidney Smith's Quester. *Bitches:* 1st, J. A. Spraklin's Maud.

FIELD SPANIELS.—OVER 28LBS.—CHALLENGE—*Dogs:* 1st, Ed. H. Wilson's Brantford Mohawk. *Bitches:* 1st, J. A. Spracklin's Daisy Deane; 2d, R. P. Keasbey's Rosedale Bess.—BLACK—OPEN—*Dogs:* 1st, Toon & Thomas's Staly Baron; 2d, R. P. Keasbey's Echo. *Bitches:* 1st, Woodbury Kennels' Maid; 2d, J. A. Spracklin's Black Queen; 3d, Typical Kennels' Nancy.—LIVER—1st and 3d, R. P. Keasbey's Coleshill Rufus and Gypsey Belle; 2d, Typical Kennels' Napoleon.—ANY OTHER COLOR—1st, Dr. Wm. Mole's Jack; 2d, J. A. Spracklin's Spotted Boy; 3d and 4th, Typical Kennels' Nellie and Antique.—NOVICE—1st, J. A. Spracklin's Spracklin's Belle.

COCKER SPANIELS (not over 28lbs.)—BLACK—CHALLENGE—1st, J. H. Herbertson's Pickpania.—OPEN—*Dogs:* Equal 1st, Ancient and Modern Spaniel Kennels' Still in the Ring; 3d, George Douglas's Woodland Clipper; 4th, W. B. Palmer's Tim. *Bitches:* 1st and 3d, Andrew Laidlaw's Baby Ruth and Rideau Renie; 4th, George Douglas's Flossy Wilshire. Reserve, Ed. A. Wilson's Miss Phyllis. High com., M. Lellis's Fanny.—ANY OTHER COLOR THAN BLACK—CHALLENGE—1st, Brant Cocker Kennels' Brantford Red Jacket; 2d, Thos. McKay Robertson's Red Obo.—OPEN—*Dogs:* 1st, T. Clappison's Hamilton Jack; 2d, George Douglas's Keswick. *Bitches:* 1st, Andrew Laidlaw's Fannie; 2d and 4th, Brant Cocker Kennels' Brantford Beauty and Red Rose; 3d, Raglan Kennels' Raglan Russette. Reserve, Wm. McDonald's Queenie Mac. Very high com., John J. Guy's Heatherbloom and George Douglas's Polly Harmon. High com., A. M. Ecclestone's Red Duchess and Thos. McK. Robertson's Cora G. Com., Wm. Weeks's Red Vixen and J. T. Boyd's Daisy.—NOVICE—*Dogs* (ANY COLOR): 1st, Ancient and Modern Spaniel Kennels' Still in the Ring; 2d, Andrew Laidlaw's Commodore; 3d, Geo. Douglas's Woodland Clipper. Reserve, W. B. Palmer's Tim. Very high com., Alex. Wilkie's Red Ragland. High com., Wm. Weeks's Red Kaiser. *Bitches:* 1st, Andrew Laidlaw's Cora II.; 2d, Wm. Macdonald's Queenie Mac; 3d, Geo. Douglas's Polly Harmon. Reserve, Raglan Kennels' Raglan Ruby. Very high com., John J. Guy's Heatherbloom. High com., J. B. Early's Judy.—PUPPIES—*Dogs:* 1st, W. B. Palmer's Tim; 2d, Geo. Douglass's Billy; 3d, Miss M. Holden's Red Sultan. Reserve, W. Weeks's Red Mikado. Com., James J. Wilson's Turk. *Bitches:* 2d, A. M. Ecclestone's Red Duchess; 3d, Wm. MacDonald's Queenie Mac. Reserve, J. A. Spracklin's Violet.

DACHSHUNDS.—*Dogs:* 1st, R. McConkey's Topaz. *Bitches:* 1st and 2d, Vento Farm Kennels' Maeuschen von Vento and Vento Flossie.

BEAGLES.—CHALLENGE—*Dogs* (over 13in.): 1st, Hornell-Harmony Kennels' Sherry. *Bitches:* 1st, Hornell-Harmony Kennels' champion Elf.—OPEN—*Dogs:* 1st, Hornell-Harmony Kennels' Roger W.; 2d, G. D. Welton's Pomp. *Bitches:* 1st and 2d, Hornell-Harmony Kennels' Daisy Corbett and Rose Graham.—NOVICE—*Bitches:* 1st, G. D. Welton's Kitty Glover; 2d, Hornell-Harmony Kennels' Rose Graham.—CHALLENGE—*Dogs* (13in. and under): 1st, Hornell-Harmony Kennels' champion Royal Krueger. *Bitches:* 1st, Hornell-Harmony Kennels' champion Ava W.—OPEN—*Dogs:* 1st and 2d, Hornell-Harmony Kennels' Little Wonder and Razzle. *Bitches:* 1st and 3d, Hornell-Harmony Kennels' Evangeline and Dazzle; 2d, G. D. Welton's Kitty Clover.

FOX-TERRIERS.—CHALLENGE—*Dogs:* 1st, C. Rathbone's Beverwyck Punster.—OPEN—*Dogs:* 1st, A. A. Macdonald's Beverwyck King Pin; 2d, R. Gibson's Belvoir King; 3d, P. G. Keyes's Rideau Rivet; 4th, D. J. Kelly's Dusky. Very high com., Dr. J. F. Belt's Hillside Royal, C. S. Hanks's Seacroft King and C. Lyndon's Tally Ho. High com., W. A. Littlejohn's Dusky Luck. Com., Dr. W. Mole's Trap. *Bitches:* 1st and high com., C. S. Hanks's Seacroft Jessie and Lady Spendthrift; 2d, J. O. Bennett's Stardale Belle; 3d and reserve, R. Gibson's Belvoir Becky and Belvoir Queen; 4th, A. Pugs—Best kennel, Woodbury Kennels. Toy spaniels—Best kennel, Allen Trebilcock. Handlers prize, W. J. Tulk, Jr. and Fred Kirby.

## POINTS AND FLUSHES.

[*By a Staff Correspondent.*]

### Field Trial Echoes.

Capt. McMurdo will remain at Union Point, Man., till about October 1st. He, having a domicile of his own in Manitoba, can shoot without restriction after the season opens on the 15th inst.

Mr. J. J. Spracklin will remain at Dominion City for a while before returning home.

Mr. D. E. Rose has decided to remain in Manitoba and give his dogs work on chickens until the season in Indiana is favorable for work on quails, when he will return there and prepare his dogs for the trials of the United States Field Trials Club at Bicknell.

Mr. J. M. Avent said that he would return to Mississippi immediately after the conclusion of the field trials at Morris.

Mr. J. B. Stoddard will remain at Morris, Man., till the season is favorable for work on quails in the States. His pointer dog Tick Boy made a most formidable run in the competition, and will be a competitor to treat with great respect if he is run in any of the forthcoming field trial events.

Mr. J. A. Armstrong made a very favorable impression during the Manitoba field trials, that event marking his *debut* as a field trial handler in America. The quietness and effectiveness he displayed in handling his dogs is worthy the emulation of the American handlers. Constant whistling and shouting are true signs of unskillfulness, providing that the dogs are not deaf.

Mr. W. B. Wells was the subject of much praise for the skillful manner in which he managed the competition and the soundness of his awards. Everybody seemed pleased with his rulings; and when a judge can conclude a competition in such a manner, it must be well done beyond question.

B. WATERS.

WINNIPEG, Man., Sept. 12.

## PITTSBURGH DOG SHOW.

THE Pittsburgh Athletic Club dog show, in spite of the disadvantages under which it was held in clashing with the Toronto show was a success as far as the number and quality of the entries was concerned. Over three hundred dogs were benched, and many of the classes were particularly strong both in numbers and quality, notably the English and Irish setters, pointers, collies, the beagle bitch class and the black and tan terrier bitches. The attendance, however, it is much to be regretted, was very poor throughout, and it was a mistake to have held the show the week the Grand Army were celebrating, there being too many other attractions in the city for a big crowd to come to the dog show. I fear the club will lose money in consequence of this, but all the members are enthusiastic, and declare they will give a better show next year when they will have profited by their experience, for the management was anything but good in many respects this year. Nobody seemed to know how a show of this sort should be run, and if it had not been for Mr. Carl Klocke, the well known dachshund enthusiast, who volunteered his services as ring steward, and of W. Van Essen, who took an active hand in the management after the first two days, things would have been far worse than they were. The president of the club, L. McGrew; the secretary, H. H. Batchelor; the treasurer, H. Woodside, Jr., together with Messrs. Lang and Hamilton of the dog show committee, worked hard morning, noon and night to make the show a success, but not one of them had had any previous experience, which made their tasks all the harder.

Among those present were Mrs. Lee, H. Jarrett, Dr. Daniels, J. R. Purcell, Mark Lewis, H. Northwood, Geo. Battison, Ben Lewis, W. L. Washington, T. H. Howard, W. T. Ford, J. C. Mahler, L. O. Seidel, E. C. Wooliscroft, Dr. F.H. Hoyt, Messrs. Davis and Winter, Dr. Grimes, A. G. Eberhart and A. F. Hochwalt. The auction sale was as usual a failure, very few of the dogs changing hands, and those that did were sold at absurdly low prices, the best *bona fide* sale being of the pointer puppy Rush of Lad, Jr., who was bought by Mr. G. W. Long for $51.

Mr. John Davidson judged all the classes with the exception of mastiffs, which were judged by Mr. Wade, but as there were only two his task was not a very hard one.

MASTIFFS.—There were no entries in the challenge classes, and only two turned up in the open classes, and first went to the symmetrical Marquis, all other prizes being rightly withheld from Boyer, a bad one in all respects.

ST. BERNARDS.—The challenge classes were again drawn blank, and in open dogs Alta Kennels' Grand Master, in exquisite condition and greatly improved in loin and hindquarters, made mincemeat of the class. Pouf II. came next; he is poor in color, lacks quality, is deficient in muzzle and has just a fair skull and body. Rea Fransisco, third, was in poor condition, shown thin and ragged, and is only moderate in bone, skull and muzzle. Knoxville Wayne, reserve, has a poor, common head, but is good in body and is a capital mover. In bitches Santa Rosa, much improved in condition, won, but it is questionable if she should have been placed over Laura C., she had size and condition in her favor, but Laura C. is far better in eye, muzzle and expression, but was not in the best of shape. Gemmie II. lacks quality all over, is faulty in muzzle, but has a fair skull and body properties.

In the open class for smooth-coated dogs Buster was first, but Nicode should have had the coveted blue. Nicode has a capital body, legs and feet, shows plenty of quality, is a big dog, standing over lots of ground, and has a good skull; his muzzle might with advantage be deeper and squarer, and his ears are too large and houndy. Buster has a good skull, good bone and nice color, but is small and very short in body. Alvin Joslyn is a poor one at all points. In bitches, Cathedral, shown heavy in whelp, nevertheless easily defeated her only opponent, Ruth F., a bad one, small and weak-headed. The puppies were not of much merit, Tasso winning in size and substance. All of the Crest Haven Kennels' entries were unfortunately too late for competition, which was lucky for some of the winners.

NEWFOUNDLANDS.—Ben was the only entry, but he well deserved his blue ribbon, being far above the average usually shown, being good in coat, with a head that had some pretensions to Newfoundland type.

BLOODHOUNDS.—The young bitch Vigilant was the only entry. She will never make a crack show bench specimen.

GREAT DANES.—Sandor won; he is a fair-bodied dog, good in color, but faulty in tail and head. Tullia, second, is a small bitch of fair type, clean in neck and shoulders, but weak in muzzle and too light in body. Flora, third, is the best type of the lot, has a really good head and is a nice, graceful mover, but is handicapped by her white markings.

GREYHOUNDS.—Champion Master Rich, put down in splendid condition, was the only entry in the challenge class. Open dogs were not up to much; Jim, the winner, has the most power and substance but is coarse in head and has bad ears. Napoleon has a better head and neck but is too light in body. Archbishop, the only puppy, is a promising one, but was not in the best of shape, but was the best greyhound shown.

FOXHOUNDS.—Ranger II. was alone in the challenge class for dogs as was Bow Sprit in the class for bitches; the latter is the best American hound of the two, Ranger being too much on the English type. Brave, the only entry in the open classes, was not on his bench when I went round.

POINTERS.—These were a grand collection and the classes were properly divided for heavy and light weights. In the challenge class for dogs Rush of Lad was the only entry and was put down in excellent condition. There were twenty entries in challenge bitches. In the open class for heavyweight dogs competition was very keen, and the four first dogs are all good ones. Moulton Banner won with but little to spare from Rod H., and had the latter been shown with more flesh he could have beaten him. Both dogs have excellent heads but Rod beats Banner in cleanness of neck and shoulders, but in hindquarters Banner was the better to-day and he shows a little more quality than Rod throughout. Gem's Beppo, third, has a good skull and capital muzzle, but loses to those above him in ribs, loin and legs and feet. Saddleback, reserve, is a good-bodied dog, shown in grand condition, but somewhat plain in head. St. Blaise well deserved his two letters.

In light-weight dogs Lad of Rush won, but I much prefer London as he beats Lad in head and shows far more quality throughout. Rap's Bud is a good black and white, has capital bone, legs and feet, but could be improved in head. Victor Rent, reserve, is poor in head, otherwise fair.

In heavy weight bitches, that good bitch Emblem won with a good deal to spare. Frankie, an all black bitch came second, she is good in body and has capital legs and feet, but is weak in head and for this reason I preferred the grand headed Beo R., in spite of her poor front and bad feet, and she was not in the best of condition. In light-weight bitches a new one came out and won very easily, and a real good one she is, too; she has a head that could be improved by a trifle more length in muzzle, a shade throaty, has grand legs and feet, ribs and hind quarters, and is a high quality bitch. She was bought by Dr. Daniels for $100 before the judging, and her owners Messrs. Plee and Dean accepted a deposit on her, but acted in a most reprehensible manner in regard to her, for after she had won and they had obtained an offer of $100 more for her, they managed somehow or other to get the bitch out of the show, and there was great difficulty in making Messss. Plee and Dean return her, in fact not till the treasurer of the club had cashed Dr. Daniels's check, and offered Mr. Plee the cash, at the same time threatening to have him arrested if he did not return the bitch, did he see fit to act rightly in the matter, and he then conducted Mr. Woodside and Dr. Daniels's agent to a grocery store a mile and a half away, where he had the bitch hidden. Lass of Kippen came second, Lady Norrish II., third, with Lady Margaret reserve. The latter I liked for second place; she is a good, symmetrical black and white, with excellent shoulders, legs and feet, well sprung ribs and nice quality head and clean neck; her muzzle is a trifle weak. Lady Norrish II. was not in good shape, but has a good skull and excellent muzzle. In puppies Rush of Lad, Jr., won easily; he has a capital muzzle and good skull, splendid legs and feet, grand bone, but is somewhat spoiled by his light eye, and of course being only six months old is unfurnished as yet, but he will undoubtedly be heard from again. Beppo's Diamond, second, is very moderate, and Lassie Rush, third, has an excellent body, but is dished in face. Moulton Banner won the special for best pointer, with little to spare from Belle of Lancaster, and Lad of Rush won the special for the best placed at any field trial in America, but for this I much preferred the black and white bitch Lady Margaret.

ENGLISH SETTERS.—Victress Llewellyn, not looking her best, was the only entry in the challenge classes. In open dogs Bald Rock won; he is a dog of correct type, liver-ticked in color, good legs and feet, capital ribs and loin, and grand carriage of flag and a good mover, but he is too short in neck, somewhat loaded in shoulders, has not good ears, and to my mind is too low and cloddy all over. Albert's Ranger, second, is of correct type, but is not quite nice in expression and skull, has a fair muzzle and good body properties. Worsley Dude was as good as anything in the class, as with the exception of being out at elbows and a trifle leggy, it is hard to find much fault with him. Knight Templar, reserve, is a dog of good quality, has a fair skull and good muzzle, but is light of bone and body. MacMurdo is an almost black dog, has a good body, but is common in head and expression and carries his tail badly. Dad's Bo deserved another letter; he has quite a fair head and nice body and action. Count Monk of Furness was in poor condition, but has a fair head. In bitches that good bitch Flower of Sulphur again won easily. Lady Gladstone, second, is thick in skull, good in muzzle, but lacks quality, and I much preferred the symmetrical and high quality Maid Marian, in spite of her weak muzzle, for second place. Blue Jenny, third, has a good head of correct type, but was out of condition. The rest of the class were poor ones.

IRISH SETTERS.—In the challenge class for dogs, Finglas, Pride of Patsy and Montauk, Jr., was the order. Finglas was in superb condition and Patsy was not, otherwise Patsy has the better neck, shoulders and expression, and given both in equal condition I prefer Pride of Patsy. In challenge bitches, champion Ruby Glenmore, shown for the first time since 1891, was put down in beautiful shape and of course easily disposed of Elfreda. The winner is a beautiful bitch, full of quality, good in color and nice in expression. In open dogs, Bob, Jr., in good coat and feather, beat Dick Finglas, a promising youngster with a better head than the winner, but not furnished in body; but has grand legs and feet. Kildare Royal, third, is good in body, fair in color, but coarse in head. Ray, reserve, deserved his position; a nice dog, with no very glaring faults. Earl of Sarsfield is washy in color and only moderate otherwise. Ruby Glenmore II. won easily in bitches; a greatly improved bitch, with excellent body properties and good color, but faulty in head and eye. Delphinne came second, losing to the winner in body and color. Kildare Winnie is good in body, fair in color, but weak in head. The rest of the class were a poor lot. In puppies, Rex, the winner in the dog class, is fair in body and color, but only moderate in head. Finglasine and Finglas Girl are two promising young bitches that will be heard from again.

GORDON SETTERS.—Leo B. and Princess Louise were alone in their respective challenge classes. In open dogs Homer S. won easily. Gunner, second, lacks quality and has a poor flag. In bitches Santa Maria, good in body and color but plain in head, won from Maid of Waverly, who is very moderate at all points.

FIELD SPANIELS.—Only one put in an appearance, but she is an excellent bitch of good quality and type.

IRISH WATER SPANIELS.—Kitty of Cork, lacking curls, was alone; she is just a fair one.

COCKER SPANIELS.—Fumble and Stumble beat Dandy S. in open dogs; the winner scores in muzzle and feather but will be too large when full grown. Dandy S. is better in body but was out of coat. In bitches Quiss won; she is a poor one but won rightly, as all the others were too large.

COLLIES.—These were good classes, some of the best being present. In challenge dogs that typical collie Wellesbourne Charlie, in fair coat, easily disposed of The Squire who should certainly be retired. In bitches Flurry III. had no trouble in defeating Metchley Surprise. In open dogs Marvel, out of coat, nevertheless rightly won being the best in head, ears and quality. Scotsman with his poor ears, coarse skull and dished face, good as he is in body properties, was not entitled to be in the money. Chesterford Hero, although small is typical and full of quality, has good expression head and ears, and was in fair coat and should have been easily second to his brother Marvel. Clarence reserve, should have been third, a well built dog with a good coat and fair head and ears. Prince Charlie and Roxey were outclassed. In bitches Sadie Wilkes in good coat, a grand bodied bitch with a fair head, but only moderate ears, rightly won. Wilford Maud, second, is a very poor one in all respects, weedy, and weak in head and should not have had more than c Ormskirk Gypsy Maid, although out of coat should have been easily second, and Helen Douglas was in her right place with third. She is a nice headed bitch, with fair coat, but heavy in ear. In puppies Silver King, a sable headed white puppy rightly won. He has an excellent coat, but is only moderate in head and ears. Cowboy came second, he is weak in head and only moderate otherwise.

POODLES.—In the open class for curly dogs Ithel was alone, he is very moderate and is spoiled by his light eye. In bitches Paris, in poor shape, won, with Queen Tip second. Neither of these are true curlies, being far too open in coat, which in some places hangs down in cords. Betsy, third, should have won, she was not trimmed, but was a true curly. In corded Black Jack easily beat Leo, scoring in head, eye, ear and coat, and rightly won the special for best.

BULLDOGS.—Quiberon, a plain-faced, long-bodied, white dog, was alone in open dogs, and in bitches Queen Mab, a good-fronted and fair-headed bitch, although faulty in hind action, easily disposed of the poor-bodied and pinched-face Lorna Doone.

BULL-TERRIERS.—These were a poor lot. In open dogs Reno, third, was by far the best, but his tail was terribly and clumsily faked, but still he should have been first or nowhere. Rex, the winner, is a common, leggy brute, with a butterfly nose. Boxer, second, is coarse in head and full in eye. Dandy is coarse and thick in head. In bitches Lansdowne Thelma beat Beauty, the latter had also had her caudal appendage touched up, but was a far better bodied bitch than the winner and quite as good in head. White Prim, the only puppy, is quite a fair one, but her tail had also been tampered with.

BASSET HOUNDS.—Two put in an appearance. Bow was awarded the blue ribbon and second was withheld from Rodeur, who is not a basset.

DACHSHUNDS.—Fritz K. was alone in the challenge class; he is beginning to show age a bit but is a typical specimen of the German type, although I should like him better were he longer in body and had a bit more loose skin about him. In the open class Nellie S., best in length of body, breast and crook, also in head, rightly defeated Flora K., who is shorter in body and does not show that weasel-like conformation so desirable in this breed. Boo S. is a liver and tan of the old-fashioned type with a terrier head, short ears and short body, more useful for work, probably, but not exactly a bench show dachshund.

BEAGLES.—The challenge classes had no entries, and in open dogs only one was entered, but he was a good one, nice style, short coupled, good coat, a sweet, typical head, although a bit weak in muzzle, and good legs and feet. The open bitch class, as already noted, was remarkable for its quality. Belle of Westchester, a typical-headed little hound, won; she has a good front and nice body but is a bit cowhocked. Molly L., second, was too high in my opinion; she has good legs and feet but is not short enough in couplings and too long in head. The same applies to Gypsy Weller, placed third. Annetta Bannerman has the best head of the lot but is too long cast. Ginger, hc., ought to have been higher; in fact it ought to be a close thing between her and the winner, and I prefer Ginger, for he beats the winner a bit in muzzle, is shorter coupled and her chief defect is she stands a little out in front. Belva Lockwood, hc., deserved another letter, as she has a beautiful head and good cobby body, but shows her age in shoulders and front. In puppies Mollie Bannerman won easily; a very sweet one but will improve with age.

FOX-TERRIERS.—Dusky Trap was alone in the challenge classes; he was not looking blooming, and should be retired from the bench. In open dogs Wordsley Trapper won again, but was too high up; his bad mouth alone should put him back, but the judge never looked at it; he is short of coat and weak in muzzle, but is otherwise a good varmint sort of a dog. Lansdowne Triton came second; he was in his right place, but Cambridge Victor should have won, a nice terrier, with plenty of coat, good expression and ears and a fair head, although not quite clean or flat enough in skull. Lansdowne Poverino should have been third, with the winner reserve. Muncie Mixer, reserve, is a bad one and not worth a c. card. Black Rock was not in good shape, but will be heard from again. Rex of Sharon deserved his three letters, but too long cast in body. Roath Tipster I did not see, but all the rest of the class were very poor. Lansdowne Trim was an easy winner in bitches; she has large ears, a too prominent eye, and is light of bone, otherwise fair. Lansdowne Dimity is weak in head, and too small, and Riot, third, should have had her place. The rest of the class call for no comment, being moderate in the extreme. Wawasset Baron won easily in puppies, a fair dog that will get too coarse. Muncie Mixer had no right to second place, and the wire-hair, Hill Hurst Racquet, although large in ear and soft in coat, should have been second.

IRISH TERRIERS.—The dog class was not a strong one, but John Briggs, reserve, should have won. He is soft in coat and moved a little stiffly in the ring; but he has far the best head, expression and body. Galtees, the winner, was never a good one, and he now shows age and has hardly a sound tooth in his head; but the judge did not examine his mouth. Ned and Blue Ribbon are poor ones. In bitches the well-known Candor was alone.

SCOTTISH TERRIERS.—The Colored Preacher was the only entry, and scored a bloodless victory.

BEDLINGTON TERRIERS.—Beach Grove Leader and Blue Bell were the only entries, and each scored in their respective classes, but both are very moderate.

SKYE TERRIERS.—Mr. Shinn had four of his well-known Skyes entered, but none of them were in the best of condition.

BLACK AND TAN TERRIERS.—Rochelle Oolah was alone in the challenge class for dogs, as was Queen III. in bitches; she begins to show her age and is gone in mouth. In open dogs Chicago Spider rightly won; he is a clean cut dog, with a good lean head and fair muzzle; his ears might be held better and he is a bit shelly in body and his thumb mark not quite distinct enough. Chesterford Victor, second, has a nice head and good markings, but would be improved by being cropped, and is faulty in tail. Pittsburgh Dandy, although too large, should have been an easy second: he is a bit coarse in head and a trifle smutty in markings, but is a grand bodied dog with beautiful legs and feet. The bitch class was the strongest seen for some time. Betsy, the winner at Toronto last year, won; she has a good skull and muzzle and excellent markings and eye, but is a bit too large and is faulty in front. Princess Frederika was in her right place; she has a good skull and muzzle, but a light eye which spoils her expression, and is only fair in body. Othella, third, should have won easily, and was by far the best black and tan in the show, and without doubt the best American-bred specimen yet seen. She is full of quality, has a lovely dark eye, a good skull and was in grand condition. She is a bit pinched and weak in muzzle, and her neck might with advantage be longer, but she will take a lot of beating in the best of company. Rochelle Mab was out of condition, but well deserved her three letters. Canada Queen got all she deserved with reserve, and was outclassed in this company, for her light, staring, full eye, short head and light tan must always tell against her in strong competition.

Three Yorkshires were shown in the class provided for Mexican hairless, Chesapeakes, Yorkshires and toys. Dixie, a fair one, won easily but the other two are bad ones. Only one Boston was shown, a good one with a capital front and good muzzle.

PUGS.—In the challenge class for dogs, Drummer, Attraction and Cashier was the order, and rightly so; Drummer, in spite of his broken foreleg, is so far the best in head properties that he won with a bit to spare, especially as Attraction was looking anything but at his best. In open dogs Patsy Bolivar was placed over Al Von, but this is wrong, as Al Von scores in shortness and depth of body and in ears and color, and is quite as good af Patsy Bolivar in head. Young Penrice is smutty in color and faulty in body but has fair head properties. Sir Douglas has good wrinkle but is coarse otherwise. Queen Zitka, the winner in bitches, is a beautiful little pug, grand in body and color and good in head properties. Rustic Queen II. is not nearly so good, is smutty and loses in body. Lady Bonsor, reserve, might well have beaten Topsy, third, as, although she loses in body, she is far better in head. Legal Tender, the winner in puppies, is quite a fair one and will improve. The others I did not see. The Eberhart Pug Kennels were awarded the special for best kennel.

ITALIAN GREYHOUNDS.—The well-known Sprite easily beat Byron in the challenge class. In open dogs Tacco was placed over Adonis, but the latter should have won, as he is far the better in size and quality, and only loses a little in skull, Tacco being flatter. In bitches the beautiful little Trixie had no difficulty in winning from her kennel companion Vito.

RUSSIAN WOLFHOUNDS.—Only two were entered, and Palma was placed over Armeda; but I much preferred the latter, who beats the winner in head and back, although losing a little in coat.

MISCELLANEOUS.—This class was divided for under and over 30lbs. In the under 30lbs. class a fair whippet and a good schipperke were given equal firsts, but the latter might well have won outright. In the class for over 30lbs. first went to Ben Lewis's black and tan rough-haired terrier, and second to the bob-tail sheep dog Dame Ursa, who is by no means a good specimen. In the selling class for sporting dogs first was easily won by the pointer, Moulton Banner, second going to the Irish setter, Finglas. In the non-sporting division Wellesbourne Charlie, the collie, won very easily, second going to the smooth St. Bernard bitch Cathedral. Ben Lewis as usual captured first in the handlers' competition, George Batterson being awarded a consolation prize of $25 for second. He deserves special mention for the grand condition the Kildare Kennels' Irish setters were in.

E. BARDOE ELLIOTT.

LIST OF AWARDS.

MASTIFFS.—1st, Chas. E. Bunn's Marquis; 2d withheld.

ST. BERNARDS.—ROUGH-COATED—OPEN—*Dogs:* 1st, Alta Kennels' Grand Master; 2d, Mrs. F. E. Moore's Pouf II.; 3d, T. H. Fox's Rex Francisco. Reserve and very high com., Thas. E. Unks's Knoxville Wayne. Very high com., King Graphic Kennels' Chicora Prince. *Bitches:* 1st, Alta Kennels' Santa Rosa; 2d, C. W. Van Essen's Laura C.; 3d, Albert S. Geyser's Gemmie II. Reserve and very high com., Chesterford Park Kennels' Chesterford Lady.—SMOOTH-COATED—OPEN—*Dogs:* 1st, M. J. Gusky's Buster; 2d, Alta Kennels' Nicoda; 3d, Jas. P Hilldorfer's Alvin Joslyn. *Bitches:* 1st, Alta Kennels' Cathedral; 2d, Ed. W. Gibson's Ruth F. *Puppies:* 1st, Harry W. Griffith's Tasso Reg; 2d, Joseph P. Hilldorfer's Lady Murdo.

NEWFOUNDLANDS.—1st, E. Jagdman's Ben.

BLOODHOUNDS.—1st, Roger Williams's Vigilant.

GREAT DANES.—1st and 3d, Frank S. Anderson's Anderson's Saudor and Flora; 2d, Joseph F. Milligan's Tullia.

GREYHOUNDS.—CHALLENGE—*Dogs:* 1st, W. G. Fite's champion Master Rich —OPEN—*Dogs:* 1st, J J. Hammond's Jim; W. J. Friday, Jr.'s Napolean. *Puppies:* 1st, Chestnut Hill Kennels' Archbishop.

AMERICAN FOXHOUNDS —CHALLENGE—*Dogs:* 1st, Seminole Kennels' Ranger II. *Bitches:* 1st, R. Williams's Bow Sprit.—OPEN—*Dogs:* 1st, W. W. Huston's Brave.

POINTERS.—CHALLENGE—*Dogs:* 1st, Eldredge Kennels' Rush of Lad —OPEN—HEAVY WEIGHT—*Dogs:* 1st, Glenrock Kennels' Moulton Banner; 2d, J. R. Purcell's Rod H.; 3d, Dr. John R. Daniels's Genus Beppo. Very high com. reserve, J. Dieter's Saddleback. Very high com., King Graphic Kennels' Spot of Kent. High com., J. R. Purcell's St. Blaise, J. McDowell's Spot S. *Bitches:* 1st, C. H. Clark, Jr's Emblem; 2d, F. Kruse's Frankie; 3d, J. N. Anderson, Jr.'s Beo R. Very high com. reserve, L. McGrew's Belle Swiveler. High com., F. Kruse's Pearl.—LIGHT-WEIGHT—*Dogs:* 1st, J. L. Adams's Lad of Rush; Dr. J. R. Daniels's London; 3d, King Graphic Kennels' Rap's Bud and Victor Kent. Very high com., Dr. J. R. Daniels's Signal; Eldridge Kennels' Rush of Lad's Pride. High com., J. R. Purcell's Cid, I. Ferguson's Dan, McGrew & Woodside's Hessen's Boy. Com., J. R Purcell's Sam Bang and George. *Bitches:* King Graphic Kennels' Belle of Lancaster; G. W. Lovell's Lass of Kip-pen; 3d, Dr. J. R. Daniels's Lady Norrish II. Very high com. reserve, J. R. Purcell's Lady Margaret. Very high com., Eldridge Kennels' Spotty Ale, Dr. J. R. Daniels's Beppo's Gem, R. B Morgan's Promotion's Sister, J. O. Gabriel's Spunk. High com., King Graphic Kennels's Jess Dot. Com., Eldridge Kennels' Maud N.—NOVICE—1st, C. H. Clark, Jr.'s Emblem; 2d, Dr. J. R. Daniels's Lady Norrish II.; 3d, J. R. Purcell's Lady Margaret. Very high com. reserve, I. Ferguson's Dan, J. Dieter's Saddleback and L. McGrew's Flirt Hessen. High com., H. W. Hespenheide's Leon H. *Puppies:* 1st, H. L. Retter's Rush of Lad, Jr.; 2d, J. A. Smith's Lassie Rush; 3d, Dr. J. R. Daniels's Beppo's Diamond. Very high com. reserve, F. Kruse's Coxie. High com., L. McGrew's Plucky Maid.

ENGLISH SETTERS.—CHALLENGE—*Bitches:* 1st, J. Lewis's Victress Llewellyn.—OPEN—*Dogs:* 1st, R. K. Armstrong's Bald Rock; 2d, Warwick Kennels' Albert's Ranger; 3d, H. Northwood's Wordsley Dude. Very high com. reserve, Newell & MacConnell's Knight Templar. Very high com., F. Pastre's MacMurdo, Dr. J. A. Phillis's Pittsburgh Phil, King Graphic Kennels' Count Monk of Furness. High com., D. Swan's Don S, R. B Morgan's (2) Mark's Best and Dad's Bo. Com., W. H. Cline's Count Cline, A. B. Tyler's Pansy Vic, J. F. Bell's Doctor W. *Bitches:* 1st and 3d, J. Brett's Flower of Sulphur and Maid Marion; 2d, King Graphic Kennels' Lady Gladstone. Very high com. reserve, Warwick Kennels' Blue Jenny. Very high com, G. Battison's Queen Emma. High com., F. Pastre's Nellie Kitson.—NOVICE—1st, R. K. Armstrong's Bald Rock; 2d, Warwick Kennels' Albert's Ranger; 3d, Newell & MacConnell's Knight Templar. Very high com. reserve, G. W. Lang's Kansas. High com., G. C. Sutch's Dad Hill. Com., L. L. Voigt's Bonnie M.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, W. L. Washington's Finglas; 2d and very high com. reserve, Seminole Kennels' Pride of Patsy and Montauk, Jr. *Bitches:* 1st, W. L. Washington's champion Ruby Glenmore; 2d, Seminole Kennels' champion Elfreda —OPEN—*Dogs:* 1st, Z. Bartleson's Bob, Jr.; 2d, W. L. Washington's Dick Finglas; 3d, Geo. Elliott's Kildare Royal. Very high com. reserve, W. Kirby's Kay. Very high com., J. C. Richard's Earl of Sarsfield, E. W. Walker's Kildare Duquesne. *Bitches:* 1st, W. L. Washington's Ruby Glenmore II.; 2d, Seminole Kennels' Delphinne; 3d, W. H. Beazel's Winnie. Very high com. reserve, C. L. Beares's Kildare Oriska. Very high com., B. F. Lewis's Molly. High com., Seminole Kennels' Buffalo Madge.—NOVICE—*Dogs:* 1st, W. L. Washington's Dick Finglas; 2d, G. Elliott's Kildare Royal; 3d, G. E. Hermon's Mack, Jr. Very high com., W. Kirby's Kay. High com., W. W. Orison's Kildare Rhue. *Bitches:* 1st, C. L. Beares's Kildare Oriska; 2d, B. Lewis's Molly; 3d and very high com. reserve, G. W. Lang's Rene Woodlawn and Kildare Gladys. Very high com., E. W. Walker's Hetty. High com., J. C. Richard's Lady Sarsfield. Com., C. A. Anderson's Nellie.—PUPPIES—*Dogs:* 1st, C. K. Hill's Rex; 2d, J. C. Richard's Earl of Sarsfield. *Bitches:* 1st and 2d, G. W. Lang's Finglasine and Finglas Girl.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st, Dr. S. G. Dixon's Leo B *Bitches:* 1st, Dr. S. G. Dixon's Princess Louise.—OPEN—*Dogs:* 1st, W.O. Lindsley's Homer S.; 2d, King Graphic Kennels' Gunner. *Bitches:* 1st and 2d, Dr. S. G. Dixon's Santa Maria and Maid of Waverlw.—NOVICE—1st and 2d, Dr. S. G. Dixon's Santa Maria and Maid of Waverley. Very high com., O. G. Bartlett's Charley.

FIELD SPANIELS.—*Bitches:* 1st, M. A. Viti's Gossip.

IRISH WATER SPANIELS.—*Bitches:* 1st, B. F. Lewis's Kitty of Cork.

COCKER SPANIELS.—*Dogs:* 1st, G. Bell's Tumble and Stumble; 2d, Chesterford Park Kennels' Dandy S. *Btches:* 1st, G. Bell's Quess.

COLLIES.—CHALLENGEE—*Dogs:* 1st, Chestnut Hill Kennels' champion Wellesbourne Charlie; 2d, Seminole Kennels' champion The Squire. *Bitches:* 1st, Chestnut Hill Kennels' champion Flurry III.; 2d, Seminole Kennels' Champion Metchley Surprise.—OPEN—*Dogs:* 1st, Chestnut Hill Kennels' Marvel; 2d, W. T. Ford's Scotsman; 3d, J. W. Walkern's Chesterford Hero. Very high com reserve, Chestnut Hill Kennels' Clarence. Very high com., Seminole Kennels' Prince Charlie. *Bitches:* 1st, Chestnut Hill Kennels' Sadie Wilkes; 2d and 3d, W. T. Ford's Wilford Maud and Helen Douglas. Very high com reserve, Seminole Kennels' Ormskirk Gypsy Maid. Very high com., A. W. Anderson's Nell. High com., Seminole Kennels' Belle of Nessledown. *Puppies:* 1st and 2d, Chestnut Hill Kennels' Silver King and Cowboy; 3d and very high com., W. T. Ford's Wilford Ben and Wilford Jim.

POODLES.—*Dogs:* 1st, J. B. Ellison's Ithel. *Bitcehs:* 1st, Dr. S. G. Dixon's Paris; 2d, Eberhart Pug Kennels' Queen Zip; 3d, S. Dalzell's Betsy.—CORDED—1st, Mrs. R. I. Carter's Black Jack; 2d, Dr. S. G. Dixon's Leo.

BULLDOGS.—*Dogs:* 1st, O. G. Ricketson's Quiberon. *Bitches:* 1st, J. C. Mahler's Queen Mab; 2d, Eberhart Pug Kennels' Lorna Doone.

BULL-TERRIERS.—OPEN—*Dogs:* 1st, S. H. Ralson's Rex; 2d, J. R. Tindle's Boxer; 3d, W. Wedgewood's Keno. Very high com., J. S. O'Neil's Dandy. *Bitches:* 1st, Dr. G. B. Darby's Lansdowne Helena; 2d, W. Wedgewood's Beauty. *Bitches:* 1st, W. Wedgewood's White Prim.

BASSETT HOUNDS.—1st and 2d, R. H. Watson's Bow and Rodeur.

DACHSHUNDS.—CHALLENGE—1st, L. O. Seidel's Fritz K.—OPEN—1st and 3d, L. O. Seidel's Nellie S. and Boo S.; 2d, C. Stern's Flora K.

BEAGLES —OPEN—*Dogs:* 1st, 3d and very high com. reserve and high com., Etna Beagle Kennels' Dan J., Gypsey Weller, Annetta Bannerman and Belva Lockwood; 2d, M. Lewis, Jr.'s Molly. Very high com., H. Fitzsimmon's Ginger. Com., J. B. Davis's Flow. *Puppies:* 1st, Etna Beagle Kennels' Mollie Bannerman; 2d, J. A. Schaum's Birdie S.; 3d, R. During's Daisy.

FOX-TERRIERS.—CHALLENGE—*Dogs:* 1st, Cambridge Fox-Terriers Kennels' Ch. Dusky Trap.—OPEN—1st, H. Northwood's, Wordsley Trapper; 2d and very high com., Dr. G. B. Darby's Lansdowne Triton and Lansdowne Poserino; 3d, Cambridge Fox-Terrier Kennels' Cembridge Victor. Very high com. reserve, H. S. Sweitzer's Muncie Mixer. Very high com., F. H. Hoyt's Rex of Sharon, Rochelle Kennels' Brittle Bat. Chesterford Park Kennels' Black Rock, T. Tauiton's Roath Tipster. High com., E. C. Wooliscroft's London Risk, E. H. Powell's Ed, Dr. J. B. McGee's Hill Hurst Racquet, Mrs. Spencer's Strike. Com., E. H. Powell's Jack. *Bitches:* 1st and 2d, Dr. G B. Darby's Lansdowne Trim and Lansdowne Dimity; 3d and very high com. reserve, Mrs. Spencer's Riot and Lulu. Very high com., F. H. Hoyt's Psyche II. High com., Cambridge Fox-Terrier Kennels' Cambridge Vick and Cambridge Blossom. *Puppies:* 1st, J. Ferris's Wawasset Baron; 2d, H. S. Sweitzer's Muncie Mixer; 3d, Dr. J. B. McGee's Hill Hurst Racquet. Very high com., Mrs. Spencer's Lilly. High com., W. Wedgewood's Auburn Fancy and R. Montgomery's Blaine.

IRISH TERRIERS.—*Dogs:* 1st, H. O'Conner's Galtees; 2d, Dr. Kirk's Ned. Very high com. reserve, Chestnut Hill Kennels' John Briggs. Very high com., B. F. Lewis's Blue Ribbon. *Bitches:* 1st, Chestnut Hill Kennels' champion Candor.

SCOTCH TERRIERS.—1st, Chesterford Park Kennels' Colored Preacher.

BEDLINGTON TERRIERS.—*Dogs:* 1st, John Hopkinson's Beach Grove Leader. *Bitches:* 1st, John Hopkinson's Blue Bell.

SKYE TERRIERS.—CHALLENGE—*Dogs:* 1st, C. A. Shinn's Elfinstone. *Bitches:* 1st, C. A. Shinn's Bessie.—OPEN—*Bitches:* 1st and 2d, C. A. Shinn's Lady Stafford and Nellie.

BLACK AND TAN TERRIERS.—CHALLENGE—*Dogs:* 1st, Chesterford Park Kennels' Rochelle Ootah. *Bitches:* 1st, Chas. Wilson's Queen III.—OPEN—*Dogs:* 1st, Chas. Wilson's Chicago Spider; 2d, Chesterford Park Kennels' Chesterford Victor; 3d, W. A. Scott's Rochelle Lord. Very high com. reserve, Davis & Winter's Pittsburgh Dandy. *Bitches:* 1st, Chesterford Park Kennels' Betsey; 2d, Davis & Winter's Princess Frederika; 3d, J. C. Mahler's Othellia. Very high com. reserve, Chas. Wilson's Canda Queen. Very high com., Chesterford Park Kennels' Rochelle Mahn.

MEXICAN HAIRLESS, TOY AND YORKSHIRE TERRIERS AND CHESAPEAKE BAY DOGS.—1st, Chestnut Hill Kennels' Dixie; 2d, S. Fry's Prince; 3d, B. F. Lewis's Nelly.

BOSTON TERRIERS.—H. Crosby's Patsy.

PUGS.—CHALLENGE—1st, German Howard Pug Kennels' Drummer; 2d, Seminole Kennels' Attraction; 3d, Eberhart Pug Kennels' Eberhart's Cashier.—OPEN—*Dogs:* 1st and very high com. reserve, Eberhart Pug Kennels' Patsy Bolivar and Sir Douglas; 2d and 3d, German Howard Pug Kennels' Al Von and Young Peurier. *Bitches:* 1st, Eberhart Pug Kennels Queen Zitka; 2d, German Howard Pug Kennels' Rustic Queen II.; 3d, Miss C. Moroni's Topsy. Very high com. reserve, T. H. Davies's Lady Bonsor.—NOVICE—1st, Eberhart Pug Kennels' La Belle Senora; 2d, German Howard Pug Kennels' Sateen II; 3d, Miss C. Moroni's Topsy. Very high com. reserve, Ed. Caldwell's Royal Teddy. *Puppies:* 1st, German Howard Pug Kennels' Legal Tender; 2d, A. C. White's Young Douglas; 3d and very high com. reserve, Eberhart Pug Kennels' Romeo and Juliet.

ITALIAN GREYHOUNDS.—CHALLENGE—1st, Joe Lewis's Sprite; 2d, F. H. Hoyt's Byron.—OPEN—*Dogs:* 1st, F. H. Hoyt's Tacco; 2d, Mrs. W. G. Benham's Adonis. *Bitches:* 1st and 2d, F. H. Hoyt's Trixie and Vito. Reserve and very high com., D. R. Brown's Brownie.

BARZOIS —1st and 2d, Paul H. Hacke's Palma and Armeda.

MISCELLANEOUS.—OVER 30LBS.—1st, Ben Lewis's Frank; 2d, Chas. Rosser's Dame Ursa.—UNDER 30LBS.—Equal 1st, Joe Lewis's Minnie C. and Chestnut Hill Kennels' Micke.

SELLING CLASS.—SPORTING—1st, Moulton Banner; 2d, W. L. Washington's Finglas.—NON-SPORTING—1st, Chestnut Hill Kennels' champion Wellesbourne Charlie; 2d, Alta Kennels' Cathedral. Reserve and very high com., J. W. Mack's Middy.

SPECIAL PRIZE.

Largest string of dogs: Ben Lewis 1st, George Batterson (25) 2d.

## DES MOINES DOG SHOW.

THE first annual dog show of the Des Moines Kennel Club, if not remarkable for the number of entries, was certainly remarkable for its quality, as may be gathered from the fact that many prominent kennels were represented. The show was held under a canvas tent in the Fair grounds, which, although very warm, was all right so long as the rain kept off but, unfortunately, it poured in torrents all Thursday, and the best part of the night as well, which made things very unpleasant for man and beast alike. The officers of the club did all in their power in the interest of the exhibitors and were fairly successful for a first attempt, but the stalls might with advantage have been kept cleaner and the dirty straw, etc., was in most instances shovelled under the benches, a most reprehensible practice, and one which doubtless will be corrected another year, the benches also in many cases should have been nearer the ground, thus avoiding all possibility of dogs hanging themselves. It is scarcely necessary to say that with Spratts doing the feeding, with Murphy at the head of affairs, no fault could be found on this score. The attendance was excellent and averaged between three and four thousand daily in the first two days of the show, but the wet weather considerably lowered it on the remaining days, but still I believe the club will come out on the right side and they richly deserve to. Among those noticed present were: Arthur Trickett, C. E. Bunn, F. Derier, Mr. Platt, Dr. Quigley, A. C. Shallenberger, J. W. Fornoff, Mr. and Mrs. J. C. Weiss, H. T. Robinson, C. F. Huttenlocker, B. F. Lewis, L. Orr, W. F. Clarkson, Chester E. Clapp, A. G. Eberhart and L. F. Whitman. Mr. John Davidson judged all classes and seemed to give satisfaction.

MASTIFFS.—Sinaloa was the only representative in the challenge class. She is typical, but too undersized. In open dogs it is a close thing between Marquis and Ealderman; the latter scores considerably in skull and substance, but loses in color, eye, ear and muzzle, and taking his faulty ear carriage, light eye and "puggy" muzzle into consideration I think the decision to-day a correct one. Jack Raglan made a good third, a good little all-round dog of excellent type and color. Jack and Grover C. scarcely deserved their letters, both being weedy specimens, faulty in skull, muzzle and expression. In bitches Minna Minting won very easily; she was in good shape; but how Queen came to get second is a puzzle, as beyond being in nice condition she has absolutely nothing to commend her, and both Lady Cobrey and Ruby Chancellor in spite of their poor condition simply smother her in all mastiff points. I like Lady Cobrey the better, as, although Ruby scores a bit in muzzle, Lady has it in all other points, and is a nice quality bitch. Only two puppies put in an appearance, a big and a little one, and the big one got it, but is a bad one, with a very poor head and light body and shows the haw badly. Lady Van, although anything but a flyer, certainly should have won.

ST. BERNARDS.—Sir Bedivere first, Rustic Beauty second was the order in the challenge class. Neither were in full bloom, but will doubtless come round again all right when the weather becomes more favorable and Arthur gets his work in on them. In open dogs Alton III. in good coat and condition won, he is a good-bodied dog with an excellent coat and color, but faulty in muzzle and expression. Alton Boy has a good head of nice quality and expression, but is poor in color and light in body and quite out of coat. Complete is a grand bodied dog, a large, massive dog, sound, with excellent bone, legs and feet, but loses in head in head and expression. In bitches, in their present condition it is a very close thing between first and second, and I rather incline toward Lady Adelaide II. Alta Berne was thin and all out of coat, having only recently weaned puppies; in this respect Lady Adelaide was far better and she also scores in muzzle, although she loses in eye and expression. Myrra is a good headed bitch with an excellent muzzle, but is far too small. Lady Lowden is none too good in head, is too small, but is good in color and shadings. Luce Floretta is excellent in color and shadings, but weak in head and far too small.

The challenge class for smooths was worth going a long way to see, for the three brothers, Alton II., champion Melrose and Lawrence Garza are all three grand and worthy representatives of this beautiful breed, and it is a case of "How happy could I be with either, etc.," but still at the same time I do not agree with the award that put them in the above order, and am of the opinion that Melrose should have had the coveted blue with quite a little to spare. He is a more massive dog all through, far better in loin and hindquarters, also in chest and shoulders, and also scores in color and shadings, and in my opinion is the best in color and type. Lawrence Garza, a greatly improved dog with great substance for his inches, grand skull, good muzzle and expression, is handicapped by being too small. Alton II. was certainly not looking his best, being light, but he is on the houndy side, laks shadings, is none too good behind and faulty in tail carriage. In open dogs Patrician won from Argyle Alpha; the winner was in grand condition and scores in color and shadings, but loses to Alpha in muzzle, expression, size and quality, and had the latter been in as good shape as the winner he certainly would have been entitled to the verdict. Sir Nero is a poor one with a wretched head and awful ears, and never should have been placed over Illinois Pontiff, a nice-quality puppy on the small order. In bitches Lady Judith easily disposed of the ordinary La Flora. In puppies Illinois Pontiff, already noticed, won with a lot to spare.

GREAT DANES.—These were good for a show of this caliber. In open dogs King William, a nice, upstanding, well built, active dog, won; but he is poor in head and expression, light in eye and of wrong type, and for this reason I should have placed the enormous young dog Beau Brummel at the head of affairs; he, although too cheeky and somewhat coarse in head, neck and shoulders, is nearer the correct type, as his breeding (Lord Wolverton—Senta) would indicate. He loses to the winner in front and stifles, he being far too straight behind. Col. Moro, third, has far the best head, a good head of nice quality and correct type, with grand legs and feet, but he is too undersized. Kaiser is coarse in head and neck, but fair otherwise. In bitches Mr. Frank Anderson's blue bitch Flora won very easily, being far the best in type and quality, has a good clean head, neck and shoulders, and is a graceful mover. Her white markings are against her and she is suffering from a "whipped" tail, which the owner of the second bitch seemed to think, after being instigated by another, should have barred her from winning, and tried to make out the bitch was suffering from mange and should therefore be disqualified; but the veterinarian calmed his fears by certifying, after he had examined the bitch, that she was not suffering from mange or any contagious disease, but as the instigator of the whole business is a quack "vet," one would naturally suppose that he at least could tell the difference between mange and a "whipped" tail. Princess Lucile is coarse and common in head, lacking all true type, but is fair otherwise. This bitch escaped from the show and had not been recovered by the time the show closed. Lady Inca is a very moderate specimen. Ina, the winner in puppies, is a really promising red bitch, with nice clean neck and shoulders, a clean cut head, bit weak in muzzle and is a nice, gracefully made bitch all over. The others were a poor lot.

BLOODHOUNDS.—Mr. Roger Williams's young bitch Vigilant came against that good hound, Jack Shephard. As it handicaps a bitch so in this breed to compete against a dog, especially as in this case case, a young bitch against a matured old dog, the judge decided to give them equal first; but I think the dog was entitled to win outright, as the bitch will never be as good, even for a bitch, in head properties as he is. Highland Maxey, a moderate deerhound, in poor shape, was the only specimen. Those two good wolfhounds, Osmaday and Zemoza, were shown in wretched condition. The bitch is the better of the two. Only one greyhound, a bad one that did not deserve a notice, but the judge was lenient and gave it a first.

FOXHOUNDS.—The well known Ranger II. was the only challenge entry, and Mr. Williams's Argonaut and Bowsprit were the only representatives in the open classes; the latter is a very sweet quality bitch.

POINTERS.—Tempest being absent gave Rush of Lad a walk-over in the challenge class for heavy weight dogs, and in bitches there were no entries. In heavy weight dogs, open class, Molton Banner rightly defeated Gamester and easily won the special for best pointer in the show; he has a good head and excellent muzzle. In bitches Emblem was indulged with a walk-over, Lass of Kippen being transferred to the light weight division, where she also scored a bloodless victory, and in light weight dogs Lad of Rush had no difficulty in defeating Ned Stark, a poor one at all points.

ENGLISH SETTERS.—These were good classes, quality and correct type being well to the fore. In open dogs, that grandly made little one, Cactus, was placed at the head of affairs; he is of true type, has good shoulders, legs and feet, grand loin and hindquarters, and nicely sprung ribs; his most pronounced faults are his yellow eyes and faulty carriage of flag. The newly imported Bald Rock came second; he is a liver and white ticked dog with a good skull and excellent muzzle and grand action and tail carriage, but is somewhat short and thick in neck, a bit loaded in shoulders, and, to my mind, is too low and cloddy throughout; his ears are faulty and spaniel-like. Zippo II., third, is an enormous dog, has a good type of head but is a bit coarse all over and is faulty behind. Wordsley Dude I like as well as anything in the class; a fine upstanding, rangy blue belton of excellent type and quality, and bar being out at the elbows is second to none shown. Jack Berwyn has a fair head but was all out of coat. Bitches were another good class, Flower of Sulphur winning, closely pressed by Sousie. The winner is an excellent bitch of sweet quality and type, and was in good condition. Sousie is a good-headed one, but loses to the winner in shoulders, condition and feather, having only recently weaned a litter. Chick, third, a sweet-headed lemon and white, was far too fat, and is faulty in pasterns and might well have given way to Maid Marian, another very high quality and good-bodied one, but a bit weak in muzzle. Chris, the only puppy shown, was a poor one.

IRISH SETTERS.—Pride of Patsey easily defeated Montauk, Jr., in the challenge class for dogs, and in challenge bitches Elfreda was fortunate in being alone, as it would not take a good one to beat her. In open dogs, Bob, Jr., was an easy winner, all things considered, although I do not quite like his head, it being a bit short and thick; but he was in grand condition and feather. Patsey's Pride has a good body, legs and feet, and color, but has a poor, plain head, and I preferred the Claremont Kennels' other string, Chief Red Cloud, as, although a bit weak in muzzle, he is far better in skull and type, and equally good in other respects. Rags well deserved his letters, as did Shamrock Bruce, who has a fair head, but is poor in color and coat, and has a bad eye, but is good in body. In bitches, Pride's Beauty was placed at the head of affairs, but I again preferred her kennel companion, Pride's Heather, who, however, only got third. She is not pleasing in eye and expression, but is the best in skull and muzzle, and beats the winner in loin and in color. Delphine, well known, separated this pair; she has the most substance, but is beaten in quality, color and style. Pat Gleason, the only dog puppy, is a nice one, spoiled by his bad eye. Pat's Rose is weak-headed and weedy.

GORDOF SETTERS.—Heather Lad had no difficulty in disdisposing of Leo B. in the challenge class for dogs and in the class for bitches Princess Louise entered in the catalogue as Lady Waverly was alone. In open dogs Homer S. had an easy win as his only competitor was a bad one. In open bitches Sante Marie won from Dwight Effie, scoring in color and body but losing a bit in head. Maid of Waverly is a poor one.

COLLIES.—Old Squire, looking very gray and ragged but still full of life was alone in the challenge class for dogs, as was Metchley Surprise in bitches. In open dogs Chesterford Hero, looking well, but not in full coat, was an easy winner. Moray, second, is a big, coarse dog, thick head with poor ears and was too high up, Prince Charlie was hardly u-ed with v. h. c. and should have been an easy second, being a good bodied dog and far less coarse than the others. Bitches. Ormskirk Gypsy Maid had an easy win, she is a nice quality of bitch but was not in full coat. Cora Belle has gone thick in head and coarse and Lady Al De Ber II would have beaten her had she had any coat on her, a nice quality bitch with fair head and ears but too small.

Kitty of Cork, Ben Lewis's well known Irish bitch, was the only spaniel in the show.

FOX-TERRIERS.—There were no entries in the challenge classes. In open dogs the competition was fairly keen but they were not well placed, as Lansdowne Triton, only third, should have won easily; he is far the best in head and character, has the best jaw and good legs and feet. Wardsley Trapper, the winner, lacks coat, is weak in jaw and has hardly a sound tooth in his mouth. He is a showy, terrier-like little dog, but was outclassed both by Triton and Poverino. Raby Pitcher had no right in the first rank; he is very moderate in head, has poor ears, is shelly in body and bad behind, and I venture to say will never be as fortunate again. Striker, a white dog, too full in eye and shown too light, ought not to have been placed over Hillside Royal; the latter has a long, powerful head and strong jaw but is dished in face, has too much lip and is too large in ear. In bitches,

Lansdowne Trim won rightly, but it was a close thing between Dimity and Riot for second place; the latter scores in head and substance but loses in front. In puppies Lilly easily defeated Gamester, woo is short and thick in head.

POODLES.—In the challenge class for black curly, Paris was placed over Chloe, a great mistake, as in no one point can she begin to compare with Chloe. Paris was subsequently disqualified for insufficient description in the catalogue, so Chloe got her deserts after all. In open dogs, Emperor rightly defeated Ithel who has good curl, but a poor head and a light eye. In bitches, Queen Zip, a fair one, was alone, and in the class for corded, Black Jack defeated Leo, but had the latter been better groomed the tables should have been turned.

BULLDOGS.—Only one put in an appearance and that a poor one, faulty in body, does not stand out enough, deficient in skull and pinched in muzzle.

BULL-TERRIERS.—In open dogs, Bellerby King, a greatly improved dog since last spring, yet by no means a flyer, won easily from a forward puppy, who will get too thick with age. In bitches, Rex, winner, is a grand bodied bitch, a bit loaded in shoulders, has a good head with a powerful jaw and excellent muzzle, but she is spoiled by a very light eye and will, I fear, soon thicken up too much. Lowland Duchess, second, is a bitch on quite different lines, has a beautiful eye, good expression and character capital, front and good legs and feet, but is weak in muzzle and was not in coat, having just weaned a litter. A promising puppy came third, but the rest were a bad lot. In puppies the second in open dogs was here placed first, but was not entitled to it as the bitch puppy placed second was by all odds the best one, and if she furnishes well will be heard from again.

SKYE TERRIERS.—Mr. Shinn sent some of his well known Skyes, which had things all their own way, but they were not in the best of shape.

SCOTTISH TERRIERS.—These were quite a good collection, Mr. Hertzler sending a nice kennel of four. In open dogs Kiltib is a good headed dog, with good ears and a nice front, but soft in coat, light in eye and too large. The Colored Preacher beats him in size, coat and eye, but loses in head, ears and front. The third dog is too thick and short in head, otherwise fair. The winner in bitches was the best of the lot and is a hard one to beat in any company, her chief fault being her somewhat heavy and rounded ears. A promising puppy came second.

BLACK AND TAN TERRIERS.—In open dogs Chesterford Victor, good in head, color and front, but faulty in tail, was alone, as was Betsy, the winner at Toronto last year, in the corresponding class for bitches.

ITALIAN GREYHOUNDS.—These were a poor lot, being far too coarse and common.

PUGS.—In the challenge class the rivalry was keen, each one thinking they had the best, but the judge placed them correctly. Attraction scores from Duke Howard in size, shortness of face, wrinkle, eye, ear and expression, but loses to him in tail, loin and hindquarters, where he is decidedly weak. Duke Howard is a cobby, compact dog, of nice size, good skull, fair muzzle and nice curl and carriage. Cashier is well known; he is over-sized and had to take a back seat. In open dogs Patsy Bolivar rightly won, scoring in size, face, ear, quality and coat from the somewhat coarse Sir Douglas. In bitches the winner was a long way the best, but the second and third might well have changed places. The second is the best in eye, color and body, but loses a deal in head properties.

DACHSHUNDS.—Nips and Red Riding Hood were the only two; the dog is a good one and is by far the better.

BEDLINGTONS.—Two competed, but both are very moderate.

IRISH TERRIERS.—Galtees was alone in the challenge class, and two competed in the open, the winner scoring well in head, eye and coat, but has faulty ear carriage.

MISCELLANEOUS.—In the class for under 30lbs. equal firsts were given to a pretty Maltese not quite straight enough in coat, and a so-called old English terrier of Ben Lewis's. The Maltese should have won outright. In the class for over 30lbs. a poor Airedale was the only entry.

E. BARDOE ELLIOTT.

### Binghamton Dog Show.

THE fourth annual dog show of the Binghamton Kennel Club was given under the auspices of the Binghamton Industrial Exposition, which ran from Sept. 6 to 13; 104 dogs were benched. The quality was good. The number would have been larger had the club been a member of the A. K. C., for when people show their dogs they want to get a record. Next year it will be all right, as the club will be reorganized and apply at once for admission. With the Exposition back of them they can give a good show every year, and Binghamton is a good market for all kinds of dogs. The officers of the Exposition vied with each other to make visitors comfortable. Mr. H. C. Martin, secretary, was everywhere. He seems to be the right man in the right place. The superintendent, C. H. Barrett, was ably assisted by his wife. They attended strictly to the wants of the dogs, and the place was at all times clean and neat. Sanitas was the disinfectant and Spratts food was used. For steward I had Mr. A. P. Fish, the most prominent breeder in the city. He has had large experience as steward, and everything worked smooth. Mr. S. R. Winans also rendered valuable assistance. The judging was all finished by 2 P. M., and there was no kicking about the awards. The Seminole Kennels sent four dogs, but they were four days on the road, and arrived in horrible shape. It is a shame to treat dogs so. The express companies are well paid to handle dogs, and they should not delay them on the road.

MASTIFFS.—*Dogs:* 1st, Dr. H. H. Tarr's King. Small, smutty, lacks wrinkle and type.

GREAT DANES.—*Dogs:* 1st, F. Silber's Hector. Heavy type. *Bitches:* 1st, W. F. Silber's Minka. Good type; one of the best I have seen in some time.

ST. BERNARDS—*Dogs:* 1st, W. A. Hustace's Duke of Avondale. 2d, H. H. Evans's Rex. Small and bad color.

POINTERS.—1st, D. Stack's Gobler. Very good in body and legs.—NOVICE—1st, E. S. Cave's Isabell. Best in head and feet. 2d, D. Stack's Cora. A bit thick in head; good loin and bone.

IRISH SETTERS.—*Dogs:* 1st, Seminole Kennels' Elcho, Jr., II. Four days on the road; sick and in bad condition. 2d, W. R. Thomas's Kenmore, Jr. Too much white; fine color and condition. Very high com., N. E. Luce's Blucher's Budd. Nose black; not in good condition. High com., A. Root's Carlo. *Bitches:* 1st, Fish & Dinnock's Lottie M. Good body, bone and legs. 2d, Seminole Kennels' Biddy. Light in bone; not shown well. Very high com., Abbott Bros.'s Noreen.

GORDON SETTERS.—1st, C. W. Jones's Clia. Very good type.

ENGLISH SETTERS.—*Dogs:* 1st, A. P. Fish's Jackson Belthus, Very handsome black and white; body, legs and feet good. 2d, M. S. Hellen's Mollo's Echo. Bit heavy in head; will improve. *Bitches:* 1st, A. P. Fish's Mollo B. A very good bitch; very roomy with excellent legs and feet. 2d, A. P. Fish's Mollo's Belle. Very fair.—NOVICE—*Dogs:* 1st, M. S. Hellen's Mollo's Echo. *Bitches:* 1st, T. Briggs's Mollo's Nelley. Good but not developed.

COLLIES.—*Dogs:* 1st, C. H. Kent's Dandy K. Very good; will improve. 2d, C. H. Kent's Scottie. Thick in head; heavy ears. *Bitches:* 1st, E. B. Emerus's Lassie. Best in head and action. 2d, C. H. Beman's Juno. Best in ear. Very high com., C. H. Kent's Gipsie. High com., M. E. Phelps's Maud Muller.—NOVICE—1st, E. B. Emens's Lassie. Equal 2d, C. H. Kent's Midget K. and C. W. Beman's Juno. Very high com., C. H. Kent's Beauty K and Flossie K.

DALMATAINS.—1st, W. Ridd's Sport. A very good specimen, well marked with black, very distinct.

BEAGLES.—*Bitches:* 1st, A. P. Fish's Little Corrine. Very good but body too long. 2d, W. L. Benson's Sport. Too long; light in bone; no brush.

COCKER SPANIELS.—1st, A. K. Martin's Fido. A fair one.

PAISLEY TERRIERS.—1st, A. K. Martin's Annie Rooney.

GREYHOUNDS.—*Dogs:* 1st, Mrs. R. D. Woodford's Prince. A good son of Memnon and a good all round dog. 2d, C. H. Clinton's Thatcher. Fair. *Bitches:* 1st and 2d, C. H. Clinton's Queenie and Nig.

FOX-TERRIERS.—*Dogs:* 1st, C. H. Barrett's Larchmont Nailer. Very good; will improve. *Bitches:* 1st, C. H. Barrett's Larchmont Rose. Nice size; cobby and good. 2d, S. J. Clark's Fly. Light in bone.

PUGS.—*Dogs:* 1st, Seminole Kennels' Golden Shoe. *Bitches:* 1st, Seminole Kennels' Sweet Chimes. 2d, F. O. Day's Break of Day. No flyers in the pug class.

MISCELLANEOUS.—1st, E. L. Hine's Toodles.

Special for largest number of dogs, A. P. Fish. Second largest, C. H. Kent. J. OTIS FELLOWS.

## THE MANITOBA FIELD TRIALS.

### The Derby.

THE trials of the Manitoba Field Trial Club were most successfully run, beginning on Sept. 5 at Morris, Man.

Mr. W. B. Wells, of Chatham, Ont., judged, and his decisions were well received. He was painstaking and thorough, giving the dogs ample opportunity to display their powers.

Birds were not so numerous as they were last year, yet they were in sufficient numbers for field trial purposes, when the dogs were worked in the vicinity of the stubble field. In the open prairie birds were scarce.

On Wednesday evening the club held a meeting and elected officers for the ensuing year. Following is the list: Patron, C. C. Chipman; President, F. G. Simpson; First Vice-President, R. Adamson; Second Vice-President, J. M. Avent; Secretary-Treasurer, John Woolton; Managing Court, W. F. Ellis, D. M. Telford, G. B. Borradaile, T. L. Peters, C. W. Graham; Auditors, T. L. Peters and D. M. Telford. A vote of thanks was tendered the retiring officers. The last Tuesday in August was the date selected for the beginning of the trials next year. Messrs. W. B. Wells and R. J. Gallagher were elected honorary members. The rule concerning all-age winners was changed, in that a dog can now win two all-age stakes before being ineligible in the club's All-Age Stake.

The weather was sultry and trying to the dogs' powers of endurance. Birds were difficult to find in the time between 10 A. M. and 4 P. M., and therefore there was but little attempt at working outside of morning and evening.

Delhi, the winner of the Derby, is a diligent worker and maintains a uniform good pace. On birds he is skillful and true in his point work, and he displays that useful quality called bird sense. He was handicapped by lameness caused by an injured foot, which troubled him a good deal in his second heat. He limped but kept gamely at work notwithstanding. Every one heartily congratulated the genial Capt. McMurdo on his winning, and all were glad at his success.

Cynosure, winner of second, ran prettily, showed great range and speed, but was faulty in locating and pointing, not having sufficient experience probably.

Tony Boy, third, has great range and hunts diligently, but owing to faulty point work, he impaired his performance.

Dash Antonio also showed great range and speed, but his point work was faulty.

All in all the Derby was a notably good one. The prizes were: 1st, $100; 2d, $75; 3d, $50; 4th, $25.

#### WEDNESDAY.

It was announced on Tuesday evening that the trials would be started at 6 A. M. sharp, but breakfast was not served soon enough for the early start contemplated, and nearly an hour was in consequence lost. The morning was cool and bracing. As the sun rose higher the temperature gradually grew warmer until at 9 o'clock it was uncomfortable.

The puppies were diligent in seeking but most of them showed a lack of finish in their pointing. Their work on birds was inferior. Still, it should be considered that most of the puppies had a limited experience. Birds were in sufficient numbers for the trial purposes and were quite tame, therefore easy to work on. It was said that the temperature was about 86 deg. in the warmest part of the day.

The trials began with the Derby, which had the large number of fifteen starters, and all showing good natural qualities. There was quite a good attendance of sportsmen. Among those present were Messrs Thos. Johnson, G. B. Borradaile, W. T. Kirby, Mr. Vanderslice, superintendent of the N. P. Ry.; Mr. Sprado, manager of the Manitoba Hotel; R. J. Gallaugher, secretary of the club; Mr. Chipman, manager of the Hudson Bay Company; Mr. T. G. Simpson, president of the club, and Mr. Telford of Winnipeg, Mr. R. Adamson of Virden, and the well known handlers and owners, Messrs. J. Wooton and W. F. Ellis of Manitou, and Messrs. J. M. Avent, D. E. Rose, J. B. Stoddard, J. J. Spracklin, W. Pickering, Capt. C. D. McMurdo and H. I. Regnoold.

The dogs were drawn in the following order:

Blue Ridge Kennels' blue belton bitch Nellie Fox (Antonio—Can Can), D. E. Rose, handler, with Hempstead Farm Kennels' liver and white pointer dog Hempstead Don (Sandford Druid—Merrylegs), J. M. Avent, handler.

Blue Ridge Kennels' black, white and tan dog Tony Boy (Antonio—Laundress), D. E. Rose, handler, with Charlottesville Field Trial Kennels' liver and white dog Tippoo (Rip Rap—Monterey), Capt. C. E. McMurdo, handler.

Richard Bangham's black, white and tan dog Dash Antonio (Antonio—Lady Lucifer), J. J. Spracklin, handler, with Blue Ridge Kennels' black and white dog Tom Beggs (Antonio—Ruby's Girl), D. E. Rose, handler.

Charlottesville Field Trial Kennels' liver and white dog Delhi (Rip Rap—Queen II.), Capt. C. E. McMurdo, handler, with W. F. Ellis's black, white and tan dog Columbus (Duke of Manitoba—Hickory Link), owner, handler.

T. Cowan's black and white dog Snatch, no pedigree, W. Pickering, handler, with Avent & Thayer Kennels' black, white and tan bitch Clementina (Roderigo—Norah II.), J. M. Avent, handler.

J. Wootton's black and white bitch Bonnie Lit (Orlando—Lady Lit), owner, handler, with Avent & Thayer Kennels' black, white and tan bitch Cynosure (Roderigo—Norah II.), J. M. Avent, handler.

T. G. Davey's liver and white pointer bitch Lucy (Ridgeview Faust—Peggy), J. Armstrong, handler, with F. G. Simpson's black and white bitch Miss Lit (Orlando—Lady Lit), J. M. Avent, handler.

T. G. Davey's liver and white pointer bitch Faustina (Ridgeview Faust—Peggy), J. Armstrong, handler, a bye.

There was not one which could justly be called a duffer, and they displayed remarkably good ranging qualities. There is a vast improvement in that respect. It would pass for a superior stake anywhere. Perfect or good point work could not be expected from puppies which had so short a season of preparation. Everything considered, it was a remarkably superior Derby.

*First Round.*

NELLIE FOX AND HEMPSTEAD DON were started at 6:52. Don was much the wider ranger, he taking long casts and going fast. He was diligent in searching, and his manner of working on birds was the better. Nell made a false point. Don pointed, probably on footscent, as a bevy was flushed close by after he had gone on. Nell backed. Don next made two points on single birds and Nell backed well. She did some inferior roading, carrying a low nose and puzzling on the footscent. Don had poor style. Nell was better in style and, while she beat out her ground well, it was limited to a small area. Up at 7:22.

TONY BOY AND TIPPOO were started at 7:29. Both began badly on birds, each flushing under favorable conditions for pointing. About 300yds. further on Tony Boy pointed a single bird, then ran in on it and wilfully flushed. Next Rose flushed some birds of a bevy, and Tony Boy flushed remaining birds. Next he pointed, probably on the footscent. The heat ended at 8:10. Both were wide rangers, the pointer the wider, some of his casts being fully a quarter of a mile. Tony Boy was a good ranger, beat out his ground with judgment, but he made a very unsteady showing on birds.

DASH ANTONIO AND TOM BEGGS started at 8:14. Plenty of birds were found during the heat, but most of them flushed wild. Dash flushed, then stopped on the remaining birds of the bevy. Both were steady to shot. The warmth of the sun was beginning to assert itself, and it was making the work harder for the dogs. Tom roaded nicely on a bevy down wind, then willfully flushed. Dash roaded well on a single bird which flushed wild. Tom pointed a single bird, and as Rose was walking up to him he moved on and the bird flushed. Up at 8:48. Neither one ranged wide, though both were diligent and showed interest in work on birds, though the work was inferior in finish.

DELHI AND COLUMBUS began their heat at 8:53. Delhi pointed and was well backed by Columbus; moving on, Columbus drew and pointed prettily, Delhi at the same time taking a wide cast. Nothing found. Delhi next pointed two or three birds nicely; Capt. McMurdo failing to flush, the birds lying very close. Columbus at the same time was roading up wind and pointing, probably on the back track. Delhi coming in flushed one of the birds which he had pointed. Next Columbus flushed three birds heedlessly. Up at 9:38. The pointer showed high class capabilities. He had a wide range, uniform speed and was honest and accurate in his point work.

SNATCH AND CLEMENTINA began at 9:43. Snatch was not behaving well and the heat was not over before she began to show signs of weariness. Clementina's work on birds was fairly good. She pointed one accurately and prettily. She next roaded down wind to an excusable flush, then on her next birds she pointed after flushing an outlying single. Up at 10:13. Clementina was much superior to Snatch; the latter had almost quit work when the heat ended.

BONNIE LIT AND CYNOSURE were started at 10:18. The latter pointed a single bird and was nicely backed. Both were steady to shot. The weather was getting very warm. No more birds were found before the heat ended at 10:53. Cynosure exhibited a good range and diligence. Lit was a closer worker, showing good judgement and unifoam speed.

The weather was then so warm and chickens so hard to find that further running was postponed till afternoon. The party returned to town in the meantime.

LUCY AND MISS LIT started at 3:25. Lucy flushed a single bird. Lit secured a good point on a single and was neatly backed. Both were steady to shot. Lucy ranged wide and with judgment. Up to the time birds were found and the gun fired, Lit's range was ordinary, but the find infused energy and effort in her. She had but one good eye, and undoubtedly the infirmity lessened her effort. Up at 5:04

FAUSTINA was cast off at 4:14. Hempstead Don was selected to run with her. He made two false points, then secured a true point on a single bird. It was marked down and Faustina secured a point on it. Faustina was lame and had an indifferent range and was disposed to point on false scents. Don ranged wide and with fair judgment, but he too heeded false scents too much. Up at 4:47.

*Second Round.*

The work had been so meagre on birds that the judge properly gave most all the dogs a new trial. Quite a number of sportsmen were present at the afternoon competition. The work was hardly equal in quality to that of the morning.

TONY BOY AND DASH ANTONIO began their heat at 5:06. Both dogs ranged very wide. Tony at the end of a long cast pointed and held his point till his handler went up to him. Dash coming up also pointed. No birds were found, but some were flushed close by by the wagons after the dogs had moved on. Sent on, Dash pointed at the same time the bird flushed. The heat ended at 5:40. Both ranged wide and fast and covered a great deal of ground.

TIPPOO AND TOM BIGGS were started at 5:29 and ran till 5:40. Tom showed a tendency to false-point, which spoiled all his chances. Tippoo ranged wide, but wasted much time in pottering on some scent, which engaged his attention some minutes. He is a good mover, and with more experience will undoubtedly work well on birds.

DELHI AND CYNOSURE began at 5:46 and ran till 6:02. Cynosure ranged wide. She pointed a bevy in stubble and was well backed. She held her point well for some moments while her handler was walking to her. Sent on, Delhi was next to point. He stood in stubble and had birds, but his handler failed to flush them. Delhi moved on, and Cynosure drew forward and pointed the birds. Next both roaded to edge of the stubble a few yards away and pointed some remaining birds. Both dogs made a good showing, Cynosure the better. Delhi did not equal his first heat in his going.

BONNIE LIB AND CLEMENTINE started at 6:06. Lib made a good point on a single bird and next made a false point. In the meantime Clementine broke away from control for several minutes, and was out of sight. In returning, she pointed where some birds had been flushed by her. The handlers were brought together. Lib's range was irregular and of ordinary compass. Clementine was disposed to point on false scents. They were ordered up at 6:22.

MISS LIT AND LUCY began at 6:26. Miss Lit made two flushes, then held a half point to a flush on a third. She stiffened on point as her handler walked up, and birds were flushed to her point. Lucy's range was ordinary. Miss Lit's range improved and she covered a good deal of ground. Up at 6:42.

FAUSTINA was started at 6:46 with Nellie Fox for a running mate. The latter pointed two birds in a grain field. Faustina made two flushes. Up at 7:01, and the work of the day was ended.

#### THURSDAY.

There was an uncomfortable closeness in the atmosphere, although a light fog deadened the sun's rays in the morning hours. The work on birds was limited, many opportunities to point being lost. While nearly all the dogs were wide rangers they did not distinguish themselves as good finders.

TONY BOY AND CYNOSURE began at 7:10. Both dogs worked out of control for some minutes, some of the time out of sight on the prairie. Tony flushed a bevy. He flushed a single and stood to wing. Each made a false point. Tony pointed a single well and was steady to shot. Cynosure was narrowing her range a great deal in the last of the heat and required constant urging to keep her out. Tony was going well and keeping up his wide range. Up at 7:53, and Cynosure was showing signs of quitting.

DASH ANTONIO AND DELHI were started at 7:58. Delhi flushed twice, once down wind. Delhi next found and pointed a bevy well, and was steady to shot. Dash had a superior range and was fast in his work, but on birds his performance was full of errors. Delhi showed good judgment and honest work to the gun, and uniformly so. He ranged well and maintained good speed, though not so fast as some of his competitors. Still, he covered as much ground as could properly be worked to the gun.

MISS LIT AND HEMPSTEAD DON were run 11m., starting at 8:36. They did nothing to improve their chances.

### The All-Age Stake.

There were twelve starters, several of them being dogs of

national reputation. The work, however, did not rate high so far as work on birds is concerned, except in a few instances. The stake was begun immediately after the Derby was concluded on Thursday.

The winner of first, Brighton Tobe, showed excellent finding qualities, accuracy in his point work and superior judgment in beating out his ground and searching for birds. In this respect he excelled nearly all of his competitors. His work, too, was well sustained in every heat which he ran. He was inferior in style. He carried his head low and he had but little tail action.

Topsy Rod made a most commendable showing, but his knowledge of the best manner of searching the most promising ground for birds was inferior to that of several other of his competitors. While he ranged wide, he went in straight casts regardless of the most favorable places.

Allene was showy in her point work, but it was full of errors as she ranged with poor judgment, cutting her ground too fine and ranging too close.

I fancied the two pointers, Ightfield Diana and Tick Boy, for third, they being her superior in judgment, range and work on birds, taking one heat with another, though she excelled in style.

The prizes were $125, $75 and $50, first, second and third respectively.

The dogs were drawn in the following order:

Blue Ridge Kennels' black and white bitch Allene (Gath's Mark—Ruby Girl), D. E. Rose, handler, with R. Adamson's liver and white pointer bitch Ightfield Diana (Ightfield Dick—Cleo), J. B. Stoddard, handler.

Blue Ridge Kennels black, white and tan dog Dick Fox (Chance—Countess Rush), D. E. Rose, handler, with Avent and Thayer Kennels' black, white and tan dog Tate (Jean Val Jean—Mamie Avent), J. M. Avent, handler.

Blue Ridge Kennels' blue belton dog Blue Ridge Mark (Gath's Mark—Ollie J.), D. E. Rose, handler, with J. B. Stoddard's black and white pointer dog Tick Boy (Duke of Kent—Bloom), owner, handler.

Charlottesville Field Trial Kennels' liver and white dog Ightfield Dogwood (Ightfield Dick—Cowslip), Capt. C. E. McMurdo, handler, with Blue Ridge Kennels' black, white and tan bitch Bessie Shoupe (Gath's Hope—Countess Rush), D. E. Rose, handler.

T. G. Davey's black, white and tan dog Brighton Tobe (Locksley—Liddesdale II.), J. Armstrong, handler, with Avent and Thayer Kennels' black, white and tan dog Topsy Rod (Roderigo—Topsy Avent), J. M. Avent, handler.

A. D. Weldon's black, white and tan Joker, no pedigree. J. J. Spracklin, handler, with Hempstead Farm Kennels' liver and white dog Hempstead Duke, J. M. Avent, handler.

The weather was hot and dry, and birds difficult to find in the forenoon.

*First Round.*

ALLENE AND IGHTFIELD DIANA began at 8:53. Allene pointed a bevy well; Diana backed; both were steady to shot. Allene false-pointed and was backed. The heat ended at 9:33. Allene showed lack of judgment in her ranging, and did not beat out a wide scope of ground. Diana went in a slow gallop, which she, however, maintained steadily, and ranged wide. Her style was inferior. She showed good judgment in her ranging. Up at 9:33.

DICK FOX AND TATE were cast off at 9:36. Tate took wide casts. In some bushes he made a flush on birds of a bevy. Next he pointed a single nicely and was steady to shot. Tate next pointed a close-lying bird. Avent failed to flush it. Dick pointed near the same place where Tate had pointed. Tate coming in again pointed the bird. Dick had a narrow range and ordinary speed. Tate was fast. His judgment in beating out his ground was not above commonplace. Neither made a good showing. Up at 10:06, and the running was postponed till afternoon.

BLUE RIDGE MARK AND TICK BOY were cast off at 3:50. Mark pointed a single and Tick backed. Next Tick pointed a bevy which lay very close. Sent on, and soon Tick pointed and held his point well till his handler went to him. Mark wheeled to a point, moved on and flushed the bird. Tick moved on a few yards and pointed a single. Next he got a point on another single, and Mark made two flushes. Tick about 300yds. away pointed staunchly till his handler went to him, then cast off, roading to the left and pointing every few yards till he got 100yds. or thereabouts away; Stoddard failed to flush. Mark roaded up wind and made two good points on the birds Tick had probably been pointing. After the dogs were sent on a bird was flushed near where Tick made his last point. Up at 4:20. Tick showed great judgment in beating out his ground and was a successful finder. He also was skillful in point work. His speed was uniform and fairly fast.

BESSIE SHOUPE AND IGHTFIELD DOGWOOD were cast off at 4:25. Bessie's range was not wide and she beat out her ground irregularly. Dogwood was much the wider ranger and had more judgment in working the ground. Bessie's point work was faulty. She flushed twice, singles each time. Dogwood made a good point on three birds. Next he pointed and Bessie, crossing about 100yds. ahead of him, caught scent and pointed the birds. Then Dogwood roaded up to where the birds flushed. Bess made a false point and flushed or pointed a bevy, she being too far away to determine whether it was an error or not. Up at 5:04.

BRIGHTON TOBE AND TOPSY ROD started at 5:06. Tobe made a very good piece of work roading down wind on birds which he pointed. He was steady to shot. At the same time Topsy had taken a long cast and got near where some birds flushed, but he was too far away to determine the character of his work. Next, Topsy pointed a bevy well. Tobe coming in got among the birds and pointed or flushed them, the birds going the moment he stopped. The dogs took wide casts. Tobe pointed two birds in the prairie and Topsy, about 300yds. away on stubble, at the same time pointed a bevy. The dogs were doing good work. Topsy got two points on remaining birds. Topsy's work was superior and he carried a high head. Tobe was accurate in his work, but carried a low nose and was slower in locating. His judgment was excellent and better than Topsy's in beating out his ground. Both ranged wide. Tobe the better.

JOKER AND HEMPSTEAD DUKE started at 5:38. Joker made a point on a single, a flush on another, and a false point. Duke false-pointed. Neither showed much skill in work on chickens. Up at 6:07.

*Second Round.*

ALLENE AND TATE were started at 6:15 and ran till 6:30. A heavy rain storm was threatening, and the work ended for the day.

FRIDAY.

The weather was cloudy and cool, with a stiff breeze blowing steadily. Rain threatened. A light sprinkle fell during the last two hours of the trials. The work was better and birds were easier to find, and therefore seemed more plentiful. New ground was worked northeast of town, near the Red River. Six dogs were kept in the second series. They were run as follows, the first heat being the unfinished one of yesterday:

ALLENE AND TATE started at 7:19, resuming their heat. Allene made a point on birds nicely. Tate flushed a single up wind. Allene pointed a single and was steady to shot. Tate flushed, then dropped to a point on some remaining birds. Allene beat out her grouud unnecessarily close and her range was too narrow. She had a pleasing style. Up at 7:48.

IGHTFIELD DIANA AND BESSIE SHOUPE started at 7:52. Bessie had not made a creditable showing, and her work in this heat added nothing to her chances of winning. Diana roaded nicely and located a bevy, pointing it well. Next she drew nicely to a point on a single bird. Bessie showed speed, but lacked knowledge of chicken hunting. Diana showed excellent judgment and knowledge. Her speed was not extremely fast, yet she maintained a steady gallop and covered a lot of ground. Up at 8:02.

DOGWOOD AND TOPSY ROD began at 8:07. Topsy took a long cast and pointed a bevy. Dogwood refused to back and stole the point. Topsy was the faster ranger and took wide casts, but his judgment in beating out the ground was not of the best. Dogwood ranged wide but his speed was lessened by a tenderness in his shoulders or feet. He ranged at good speed nevertheless.

BRIGHTON TOBE AND TICK BOY began at 8:27. Tobe took a cast to the rear and found and pointed well a bevy of chickens. At the same time, Tick took a cast in front about 300yds. and pointed a bevy; he was steady to shot. Next, at the edge of stubble, Toby pointed three birds. Next he pointed a bevy, and Tick coming in a few minutes later independently pointed the same birds. Up at 8:43. Both showed good speed and judgment in work, and ranged well.

*Third Round.*

TATE AND DIANA were started at 8:53. The former had hardly shown merit enough for further competition. He made a better showing in this heat, however, than in any previous one. The conditions for work were more favorable. He pointed some birds at the edge of stubble. Next he pointed or flushed, the stop of the dog and the flush of the bird being nearly simultaneous. Diana made a difficult piece of roading down wind to an excusable flush. Tate false-pointed and was backed. Up at 9:08. Diana was the wider ranger. Tate showed good speed and took wide casts, but beat out his ground with poor judgment.

TICK BOY AND ALLENE started at 9:11. The latter was lacking in judgment in ranging. Tick flushed excusably a bevy across wind. Next, Allene dropped to a point on a bevy and Tick going across wind pointed the same bevy. Allene next dropped to a flush, the bird lighting a few feet ahead of her. She remained down and the birds were flushed ahead of her. Up at 9:25.

TOPSY ROD AND TOBE started at 9:29, and ran a good heat, Tobe, however, outworking his famous competitor. He did not make much demonstration about it, but he kept finding and pointing birds most consistently. His work was even, and there was a good quantity of it. In range, too, he showed the better judgment. While his casts were not so wide as the erratic, long casts which Topsy took once in a while, they were more uniform, quite wide enough to find birds, and were taken with better judgment. A bevy was seen to flush near some bushes, and Topsy was found pointing near the place. The dogs were taken up and started on new ground. Tobe pointed a bevy on stubble; next he pointed a single bird. Topsy pointed a single well. Tobe next pointed a bevy. He next pointed or flushed a bevy, dropping as the birds rose, and Armstrong flushed a remaining single in front of him. He beat Topsy in finding, pointing and judgment in his work. Up at 10:27. Topsy had the better style.

First was won by Brighton Tobe, second by Topsy Rod, third by Allene.

The Amateur Stake was not run. B. WATERS.

### Rhode Island Dog Show.

THE entries for the Rhode Island dog show number 507. This is a satisfactory increase over the entry of 467 a year ago. The depression in business naturally has a slight effect upon the number of entries, and then the fee for entering is fifty per cent. more this year than a year ago. Several of the puppy classes have been cut out this year and that means the loss of quite a number of entries. The quality of the dogs shown can hardly be expected to exceed the quality seen last year, but is expected to be equal, and in some special classes will be even better.

The entries are divided as follows: Mastiffs 9, St. Bernards, rough, 14, St. Bernards, smooth, 13, Newfoundlands 2, great Danes 1, deerhounds 5, wolfhounds 8, greyhounds 8, foxhounds 19, beagles 38, pointers 30, English setters 47, Irish setters 29, Gordon setters 29, field spaniels 4, cocker spaniels 16, Irish water spaniels 1, collies 24, bulldogs 20, bull-terriers 21, fox-terriers, smooth, 43, fox-terriers, wire, 17, Irish terriers 14, Boston terriers 18, black and tan terriers 8, Skye terriers 7, Dandie Dinmont terriers 9, Bedlington terriers 4, dachshunds 2, Yorkshire terriers 2, pugs 6, Japanese spaniels 1, King Charles spaniels 3, toy spaniels 3, Chesapeake Bay dogs 7, poodles 10, schipperkes 1, miscellaneous 9.

NARRAGANSETT PARK, R. I., Sept. 18.—*Special to Forest and Stream:* The show opened auspiciously this morning, with capital quality of dogs and a number of prominent fanciers present. Noticeable classes are mastiffs, St. Bernards, setters, collies, beagles, bull-terriers and especially bulldogs and fox-terriers. The weather is fair and the show promises to be a great success. King Orrey, the bulldog, belongs to the Woodlawn Park Kennels. H. W. LACY.

### Tompkins County (N. Y.) Fair Dog Show.

ITHACA, N. Y., Sept. 9.—At the Tompkins County Fair, held in this city this week, a very entertaining little dog show was held. Local and a few out of town dogmen exhibited some exceptionally fine specimens. Beagles made a good showing, as did spaniels, pointers, setters and pugs. A St. Bernard or two and a few other breeds, indifferently represented, made up an exhibit that was really interesting, and which by a little extra effort next year could be made an attractive and thoroughly recognized feature of the annual county exhibition.

Local fanciers assure me that a good sized building is to be set apart for the use of the kennel interests hereafter and a rattling good dog show given. M. CHILL.

## DOG CHAT.

Mr. Damon tells us that his crack pointer Strideaway will again compete in the All-Age Stake at Bicknell, Ind., and will be sent to Mr. George Gray for preparation. Their breeding operations this summer have been very successful, and Strideaway has sired some very promising stock.

Mr. F. S. Eaton, of Springfield, Mass., has sold his pointer Glideaway, by Soult II. out of Jean of Beauford, to Mr. J. H. Wesson of the same city, for $150.

The Bay City Kennels, of Bay City, Mich., report that all their dogs are doing well. They have recently purchased the cocker bitch Rideau Rhea from the Swiss Mountain Kennels, and she had a litter by Bendigo and only saved two. More about this kennel next week.

Mr. C. A. Sumner, of Los Angeles, Cal., now owns the fox-terrier Raby Rasper, that Mr. Raper sent out to California last year. He has won wherever shown in that State.

Mr. Purbeck writes us that he owned Southern Beauty, the greyhound, at the time of her sale to the Terra Cotta Kennels, and that Mr. Thomas was to make what he could over a certain price; and that explains the whole situation.

The Mere Kennels' (of Tarrytown, N. Y.) late importation Ray of Light, by Ripon Thunderer—Day Dawn, whelped six fine puppies, four dogs, to Raby Barrister on Aug. 21 last. An offer from the Leinster Kennels of New Orleans to take the bitch puppies of this litter, and those to be whelped by Dudley Nettle, in pup to champion Dominie, due about Sept. 21, is being considered by the owner. We understand that Mr. Graef is not to be turned from his purpose of getting a first class dog, owing to their inability to come to terms with the owner of Pendennis, and has instructed his agent to see what one of the young dog's conquerors can be bought for.

During the Toronto show some greyhound racing was indulged in on the track in front of the grand stand. The rain and muddy track were not conducive to good time, and the strangeness of their surroundings and company, and the excitement of the moment impelled several of the competitors to indulge in mild scraps when they should have been putting their best legs first. The dogs were entered in the show after the first round on Wednesday, the finals were run off on Thursday, when Cyclone beat Fawn, Miss Neversettle beat Dallas, Grimsby Ranger beat Southern Beauty. Cyclone finally won, Miss Neversettle was second and Grimsby Ranger third. Cyclone was first in her class at the show as well.

Sales are few at Toronto. Mr. T. A. Carson bought the well known Irish water spaniel Marguerite from Mr. Andrew Laidlaw.

The Bloodhound Club's members, not being pleased with the inducements offered to show their dogs at Rhode Island, have unanimously decided not to exhibit at that show. While specialty clubs are within their rights in withholding support from any club, the Bloodhound Club should remember that at no time, even at the principal shows, have the entries been at all numerous in this grand breed or such as to justify a committee in allotting a large classification. Our idea of the duties of a specialty club may be erroneous, but we imagine that such a club is formed to aid and add to the prizes offered by the bench show committee, and by so working in unison create an interest and an entry such as they desire. When a show is not able to allot sufficient money to a certain breed, that breed's specialty club should come to the rescue, providing the judges are satisfactory. We should think the worst setback a specialty club could inflict upon a breed it is supposed to foster is to withhold their patronage so that the breed is entirely unrepresented at the boycotted show. Specialty clubs should always bear in mind the old saying, "Out of sight out of mind." The way to boom a breed is to put it before the public and—keep it there.

Our columns are so crowded this week that a number of "Dog Chat" notes, letters and other matter are deferred until the next issue. Owing to delay in mails, we were unable to publish the reports of the Manitoba field trials and Des Moines show last week.

The Mascoutah Kennel Club claim the dates Feb. 22 to March 1, 1894, for their next show. Mr. Lincoln the secretary, tells us that the premium list will be the most complete and valuable that has ever been offered for a dog show in Chicago.

We are so pressed for space this week that we can do no more than allude to Mr. Blossom's circular letter calling upon the Gordon men to come to the scratch; there will be at least $200 in money to be won and only $5 required to nominate and $10 to fill, for a chance to win it.

## Hunting and Coursing.

### FIXTURES.

FIELD TRIALS.

Oct. 23.—New England Beagle Club, at Oxford, Mass. W. S. Clark, Linden, Mass., Sec'y. Nominations close Oct. 1.
Oct. 29.—National Beagle Club. Geo. Lalck, Tarrytown, N.Y., Sec'y.
Nov. 5.—Brunswick Fur Club. Bradford S. Turpin, Dorchester, Mass., Sec'y.
Nov. 7.—Northwestern Beagle Club. Louis Steffen, Milwaukee, Wis., Sec'y.

COURSING

Oct. 1.—American Coursing Club's meeting at Huron, S. D. L. Zutaverne, secretary. E. H. Mulcaster, judge.
Oct. 8.—North Dakota Coursing Club, at Oakes, N. D. A. P. Slocum, secretary. E. H. Mulcaster, judge.
Oct. 16.—Kenmore Club's annual meeting at Goodland, Kan. C. F Weber, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 23.—Western Kansas Coursing Club's meeting at Leoti, Kan. W. O. Allphin, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 30.—Cheyenne Coursing Club, at Great Bend, Kan. Ira D. Brougher, Sec'y.
Oct. 30.—Altcar Coursing Club's autumn meeting at Holyoke, Col. S. W. Vidler, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Nov. 14.—California State meeting at Merced, Cal. J. R. Dickson, secretary.

### Brunswick Fur Club Trials.

*Editor Forest and Stream:*

The sixth annual field trials of the Brunswick Fur Club will be held at North Acton, Mass., beginning Nov. 6. The club headquarters will be at the Nagog House, which will make a special rate of $1.50 per day to all attending the trials. Entries for the Derby will close at 10 P. M. Nov. 5, and for the All-Age class at the same hour Nov. 6.

The trial grounds are as fine as can be found in New England; foxes are plentiful, and a cordial invitation is extended to all hunters to attend this meet with their best hounds. The secretary will be glad to give any further information which may be desired. BRADFORD S. TURPIN, Sec'y.

DORCHESTER, Mass., Sept. 14.

We are pleased to hear from Mr. J. V. Young that our western contemporary was in error in crediting him with the sketch of a foxhunt entitled "Death of Old Bob at Last," as he wishes Mr. Bryson to have all the glory of such a run and such a vivid and descriptive story.

## Canoeing.

FROM all accounts the meet of the British C. A., held at Salcombe last month, was quite a success, though the attendance was small, only about thirty, with seventeen canoes. Those who were present had a very pleasant and sociable time, and there was more racing than usual.

THE American representative in canoeing has fared even worse than the larger craft which has aspired to capture the laurels in international yachting, and like Vigilant, Yankee has failed to demonstrate the beauties of the national device, the centerboard. In one of the races at the B. C. A. meet, the centerboard fell out and was lost as completely as was Vigilant's. The reasons for Yankee's defeat are even plainer than in the case of Vigilant; she is a new and untried boat, her speed beside the older American craft being very doubtful in view of the differences of model and in the absence of actual tests. Further, she is in every way unfitted for the waters on which canoe sailing is of necessity done in England; the peculiarities of the American type, especially the long straight keel, being carried out to an extreme, as in all of Mr. Howard's craft. The superior speed of

American canoes has been freely conceded by British canoeists since 1886; and it is a matter of regret that in this, the first American sailing canoe to visit England, the national type has been so poorly represented.

### Mr. Howard's Racing.

IT will be in the memory of most canoeing men that the American canoeist Mr. Howard, having sailed several matches at Bourne End-on-Thames at the Royal C. C. meeting in June, found out that his canoe's "acknowledged superior speed" could not be obtained on "so poor a course as Bourne End reach." Leaving aside the possibility that superior speed may have lain dormant, we had the fact that nowhere near the speed of any of the English canoes was reached by the Yankee at Bourne End. Mr. Howard then published an open challenge to all canoemen to sail on open salt water, and he selected Salcombe Harbor as the locality when his challenge was taken up by Mr. Brand, owner of the canoe-yawl Spruce.

We have now received some very interesting notes from Mr. Howard from Salcombe, and, with his permission, we mention some of them, and especially a description of a capsize, which, had we not received it from the actor therein, we should have been inclined to dub a Munchausonian adventure.

At this moment, with the exception of Mr. Lane's description of the camp and meet of the British Canoe Association, we have no official report of the results of the B. C. A. races; but no doubt with all the hundred and one things to be done in camp, and in packing up and transporting away, the officer responsible for the report finds his hands too full at the moment to fill in the log. But we understand that several races were sailed, the results being favorable to the British canoes. Mr. Howard, however, sailed his match against Spruce and won, but, without saying much as to speed, as indicated by the match, we feel sure Mr. Howard himself will admit that the conditions and circumstances were no test of either boat. A full report of this match was published last week in the *Field*, page 321, which says "the wind was light and fluky." Spruce, before the starting gun, could not, from where she put off, stem the tide, and was 12m. 25s. late in crossing the starting line; Yankee put off from shore at a different place (probably in the slack) and made the line all right. The whole race was in puffs and calms, drifts and spurts on both sides, and the finish, if taken as to times of crossing the start line so as to show difference of time occupied in sailing the course, is 57s. in favor of Spruce; but Spruce had to allow Yankee 6m. 41s. Y. R. A. time for difference of rating, so that Yankee beat Spruce by 5m. 44s. In the race for the Lough Erne challenge cup there appears to have been a better breeze, and, apart from the question of corrected time by handicap, Yankee finished fifth out of ten starters, beating five canoes. But the race was a handicap, and the canoe entry did not include the best flowers, such as Dragon, Battledore, Whizz and other crack racing boats. The canoe yawl Rogue won the cup, with Spruce second.

Thus far, therefore, the "open water" race, so much desired by the Yankee, has not been obtained, and possibly a further match will be sought. We suggested Southampton water some time back, and we have no doubt that in such water a really fair trial could be had almost any day. But it should be against canoes, not against canoe-yawls; the inequalities between the two classes are too extensive to make a race between them worth anything more than a pleasant sail.

Hollow spars have been quite the fashion in canoes for many years past, but the American breed of this nature does not seem to stand the damp at this time so unhappily common; the Yankee's spars all came apart and had to be "whipped up;" probably they were only gummed together, whereas our spars are usually screwed up after being split and hollowed out. But so far the hollow spar is more or less a poetical delusion; bamboos fill the bill, but they are ugly and utterly unshipshape, and very often split and snap without any warning or perceptible spring.

Capsizing we have often pointed out may be quite dangerous, notwithstanding watertight compartments and bucket-wells. The perfect drill of righting a capsized canoe in a few seconds, which has so frequently been displayed by our leading canoe sailors and by Mr. Howard in Yankee, may go wrong and not come off, and then, as we have warned novices, all depends on its being smooth water and close to land. Mr. Howard says:

"On Tuesday, during the Salcombe cup race (probably he means the Town Regatta race), Yankee took a bad case of gripes, and while trying to keep her off the shore I landed myself in the water. The boat was turned up by the great force of the wind, and the tops of the masts stuck in the mud a foot or more. I had to dive down and pull them up bodily. I went on and rounded the first buoy almost benumbed with cold. On the beat back the wind was so strong that my weight—160lbs.—was not enough, even on the end of my long seat, to hold up barely 65 sq. ft. of sail. Benumbed with wet and cold I was unable to do any acrobatic feats, and was thrown bodily to leeward like a stone out of a sling; then I lost my centerboard. No canoe was able to go the course. Spruce, with a rag of canvas, won the race, sailing to windward with center-plate and rudder out of water, her lee deck acting as a center-plate."

If so perfect a canoe acrobat as Mr. Howard in his bottled-up American canoe is unable to prevent the elements from planting the boat roots upward in submerged British soil, let no novice risk such a probable loss of his property and possible loss of his life. He may not be able to accomplish the first-prize aquatic feat of diving to the bottom and prising the mast bodily out of the mud; he had better sit contentedly on the keel and wait the rising tide to either lift the hull off the masts or the masts out of the mud.

Any way, the whole thing seriously shows the folly of racing 30in. canoes, unballasted, on open water; a bulb-keel ballasted canoe would possibly be uncomfortable, but very unlikely to serve her owner such a trick. Were the canoe races frequently on open waters, or comparatively open waters, no doubt the type of racing canoe would rapidly change from the narrow bucket-well and no ballast form to that of the utmost beam allowed and a moderate allowance bulbed-fin liftable keel.—*The Field.*

The following letter for Mr. William Willard Howard appears in the last issue of the *Field:*

SIR—Kindly give me space for a few words on your canoeing notes of last Saturday.

1. If the racing at Salcombe has left any doubt as to the speed of my canoe Yankee, I have only to point out that my challenge to British canoeists for match sailing is still open, and to say that I should be glad of a race with the "best flowers" of English canoeing on Southampton water, or any convenient place large enough to contain a trianguiar course. I should prefer to meet Dragon (R. C. C.), as I consider her to be the best English racing canoe that I have seen. I expected to meet Dragon at Salcombe, but I understand that her owner found it impossible to attend the B. C. A. camp.

2. It is true that Yankee finished fifth in the B. C. A. cup race, but, as you say you have had no report of the racing, I may add that she started 10m. 7s. late (owing to her skipper having sailed as mate in a yawl race the same afternoon), but had the race been decided on corrected sailing time, as with yacht racing in America, she would have won the race. On the official figures of the race, had Yankee started even with Rogue (winner) she would have finished 2m. 47s. after Rogue, and so won on time allowance, Rogue giving Yankee 3m. on the B. C. A. handicap. On Y. R. A. rules Rogue would have given Yankee 4½m. In actual sailing time Rogue did the course in less time than Spruce I. or any other boat in the fleet except Rogue. Under R. C. C rules Rogue would not be admitted to either yawl or canoe races, as she carries two sliding seats. I quite agree with you that yawls and canoes should be kept in separate classes, or, if they are raced together, a craft like Rogue, with two sliding seats, should give a canoe the full Y. R. A. time allowance.

3. I cannot quite see how Yankee's mishaps in the Salcombe cup race, Aug. 14, "show the folly of racing 30in. canoes, unballasted, on open waters." The capsize happened in a narrow waterway, South Pool Creek, and was due entirely to the fact that the nearness of the shore prevented luffing out of the circular squall that swept down on her. Spruce III. was luffed ashore at the same time but she quickly got off uninjured. Had I been able to luff without danger of wrecking my boat, I should have escaped the squall and doubtless finished the race. I did continue the race, but too benumbed with cold to prevent another capsize, and the loss of Yankee's center-plate half an hour later. In that race much larger craft than Yankee were sunk or disabled, and only three boats finished out of fourteen entries.

4. What sort of boat would you recommend to novices? Surely not yawls, for during the B. C. A. races and cruises no fewer than four yawls capsized—Spruce I., Rogue, Vestal and Slaney. Surely not open-well canoes, for when they capsize, they are run ashore and taken in tow, as anyone may have seen in the case of Dragon and Whizz at Bourne End, Vanessa and Meryl at Teddington reach, and Banshee at Salcombe. As a matter of fact, Yankee is the only canoe that I have seen in England that is able to get up and continue a race after a capsize. Now if you cannot recommend a craft of that sort to a novice, what kind of marine curiosity are you going to advise recruits in canoeing to take up? My observation of bulb-plate canoes in America is that they capsize quite as readily as boats like Yankee. Of course it is possible to make a non-capsizable canoe by giving her a tremendously heavy bulb-fin, but she would not be a canoe worth the notice even of a novice. During the race on Aug. 14, Spruce III., (weighted center-plate ½-rater) was kept from capsizing only by the unusual skill of her skipper, Mr. Brand, and the letting fly of the main sheet at critical moments Yankee never lets fly a sheet, even when on her beam ends, but sails with cleated sheets at all times.

In conclusion, permit me to say that, as a racing machine, Yankee is a very mild sort of craft indeed when compared with the canoe that an English canoeist intends to build under the R. C. C. rules for next year. As at present outlined this craft will be 16ft. over all, 10ft. water line, and 3ft. beam. She will have a Yankee self-draining well and a 7ft. sliding seat, and will carry 180 sq. ft. of sail.

Salcombe, S. Devon, Sept. 3. WM. WILLARD HOWARD.
New York Canoe Club.

THE committee recently appointed by the Yacht Racing Association to report on the desirability of a change of the rule, held a meeting on Sept. 10, and after consultation with Messrs. Watson, Fife, Payne and Dixon Kemp, adopted a resolution recommending that negotiations be entered into with the New York Y. C. looking to the adoption of an international rule; and that, in the event of these negotiations being a failure, modification of the present rule be made in 1895, to take effect at the end of next season; the modifications being such as to produce a more compact form. A suggestion was made that beam should be included in the formula, and also that a premium be put upon depth of hull at a quarter of the beam, thus insuring a desirable depth of body and internal space.

The proposed coöperation of the two countries can only work to mutual advantage if carried out, and there are no serious obstacles in the way if both parties really desire to make such a step. There is a certain difficulty in this country from the fact that there is no union of clubs and yachtsmen such as the British Y. R. A. and the Union des Yachts Français, and any action would depend on the harmonious coöperation of the leading American clubs.

The matter really hinges on the New York Y. C., if that club takes up the subject in earnest and invites the assistance of the Seawanhaka, Larchmont, Eastern, Atlantic and a few other clubs, the work can be carried out by a conference committee; but if the New York Y. C. opposes the scheme, either actively, or only by neglecting to take it up and push it, there is little likelihood that the other clubs will do anything. The systematizing of international racing under one common rule, with definite class limits, means more racing, better racing, and generally more satisfactory results than under the existing system, with its inducements toward outbuilding and overpowering. The outcome of the committee's work is likely to be a formal overture from the Y. R. A. to the New York Y. C. to assist in a revision of the present rules.

ONE of the mortifying things in life is to be compelled to explain in cold blood a remark that was intended to be facetious or sarcastic; and just now we are in that unpleasant predicament. Our contemporary, the *Yachtsman*, has innocently taken in sober earnest our recent remarks about the two national airs, "God Save the Queen" and "America." For the enlightenment of the *Yachtsman* we must needs explain, that when the American patriot desires to chant the praises of liberty and freedom he borrows the identical tune in which the enslaved subjects of an *effete* monarchy are used to extol the virtues of their sovereign, whether Queen or Kaiser. We may take the *Yachtsman* further into our confidence, and say that our remarks were directed at a class of Americans who extol or condemn a thing not on its merits, but merely according to their belief, often erroneous, that it is of American or foreign origin. It is hardly a matter of national pride that in over a century the greatest nation on earth has not been able to produce a fitting national air.

The *Yachtsman's* comments, however, fail to explain a most exceptional breach of yachting usage—the failure of the fleet to salute the winning yacht. If ever the millenium comes in yachting, one of the signs will be the total suppression of the senseless whistling and cannonading which marks the termination of a race; but as long as it is the custom to thus salute the winner, the failure to do so in the case of Vigilant is certainly a fair ground for criticism.

All sorts of rumors are rife as to new challengers, one being to the effect that Mr. Will Fife, Jr., is at work on a design for a syndicate composed of Lord Dunraven, Lord Lonsdale, Capt. Harry McCalmont and Mr. A. B. Walker. It is fairly certain that Mr. Watson will design a challenger for Lord Dunraven and Lord Lonsdale, and the challengers are desirous of such terms as will allow them to select a representative yacht from the class, by a series of trial races, just as the defender is selected on this side. There is nothing at all unfair in this proposal, or in any way contradictory to the spirit of the *bona fida* deed of gift, however it may conflict with the complicated verbiage of the new deed; but it remains to be seen whether the New York Y. C. will go so far. If an agreement be made to build to one standard size for challenger and defender, no further necessity exists for demanding the exact dimensions ten months in advance so as to be able to outbuild the challenger; and it matters little to the defenders what the particular name or ownership of the challenging yacht may be. It is true that a selection by a series of trial races will probably produce a faster yacht than the building of but one boat; but if the challenger is to reap the full amount of benefit from such trial races, the only place to hold them is at New York. If sailed, as they naturally would be, off Cowes, they would probably show the fastest boat for the channel, but not of necessity, as has been often proven, for Sandy Hook.

The great value of the trial races of recent years lies not in the fact that they tend to the selection of the fastest of the three or four boats built to defend the Cup; but that through these races, just prior to the main competition, the boats are worked up to far better form. The building and fitting out of the defending yachts is always done in a hurry, they go on the August cruise as a trial trip, and the cruise racing serves to work them up to tolerable form; but it is in the final trial races in September that they are properly tuned up for the international races for the Cup. In the case of the challenging yacht, though ready earlier in the season and sailing more races, all the work of tuning up is thrown away by the Atlantic passage in July, and should be done anew after refitting at New York. To do it properly is manifestly impossible, as there is nothing for the challenger to race with, and only by real racing can the best trim be ascertained. If the privilege of trial races and the subsequent selection of a challenger is accorded, the challenging club should send at least two yachts to New York to sail against each other until one is manifestly superior, thus avoiding the mistake of last season, of sailing Valkyrie with no positive knowledge as to her new trim and ballasting.

The suggestion has been made from the other side, and seconded by some American papers, that the next Cup races be sailed elsewhere than New York, and it is reported that Lord Dunraven will ask that Newport be chosen. The principal reason for this, on the part of Lord Dunraven, is to avoid the attendant crowd of steamers and tugs which caused so much annoyance last year, and which, sooner or later, will go further and actually interfere with a race. If Lord Dunraven were fully posted as to the steamboat and tugboat business, he would know that there is not an available place on the Atlantic coast where this nuisance can be avoided, and that Newport would be quite as bad as New York. The races come most providentially for the steamboat men just after the end of the busy season before the steamers are laid up and when almost all they can take in is profit. If there are a few dollars to be made at Newport, every idle tug and steamer, large and small, not of New York alone, but of Boston and the Sound ports, will be on hand, the dozen hours' steaming being no obstacle at all.

While many yachtsmen from the vicinity of New York would be deprived of a chance of seeing the races at little loss of time, their places would be taken by others from New England, and especially from Boston, and the attendant fleet would be quite as large as ever. Much the same applies to Marblehead; some of the smaller tugs would be absent, but their places would be taken by others, not to speak of small sailing craft by the hundred; a nuisance which is not experienced outside of Sandy Hook. We have seen a fleet of catboats and small sloops off Marblehead and Half Way Rock, in 1887, so dense that it was dangerous to sail a large racing yacht. In going so far to sea, off the Hook, this evil of many small sailboats is at least avoided, but off Newport or Marblehead it will be a new and serious complication.

UNFORTUNATELY, there is no gainsaying the truth of all that is urged against the course outside of Sandy Hook, it is most inconvenient of access, and the long tow of twenty miles each way, with the loss of time, is a serious drawback which would be avoided at Newport or Marblehead. On the other hand, however, even if the New York Y. C. were at all inclined to give up its home waters, the winds at the other two places are quite as uncertain and fickle as off the Hook, and the chances of postponement quite as great. The vicinity of Point Judith, Brenton's Reef and Block Island is the very home of fluky winds, as witness the many drifting races for the Goelet cups and other prizes, and the record of Marblehead in any season shows innumerable postponements through calm or fog. Even though no worse than Sandy Hook in this most important particular, it cannot be urged that either place is better provided with wind in September and October.

Another serious objection is found to the selection of Newport, the absence of hotel accommodation, the hotels being few and poor, though quite up to the standard in the matter of charges. Though the races are not run for the benefit of the spectators, they attract a very large number of yachtsmen from all parts of the country, and it would be a disappointment to many were they held in a place like Newport with poor railway facilities and few hotels.

There can be no doubt about the importance of getting an international rule for the rating of yachts in competitive sailing, and the present appears to be a ripe time for achieving the object. As we have many times pointed out, it would be an easy matter to alter the present rule, or to devise another which will secure more under-water body; but in doing so we shall be departing from the practice of our great yachting rivals, the Americans. That is really what we have at present to reckon with. There will be the usual rush of new rules and old rules refurbished; but just at present it would be a sheer waste of time examining any of them until it is decided whether or not we are to have an international rating rule.

With regard to the under-water body, it does not very much signify whether the body is under water or above it as long as the body exists somewhere, and means exist for keeping the vessel on her feet. Still, however good, fast and seaworthy a yacht, say of 46ft. waterline, may be, she is not a very desirable craft to turn into a cruiser when her racing days are over if she has only about 4ft. 6in. of head room; and it is argued that the expenses of yacht racing would be decreased if a higher price could be obtained for the cast-off racers. Of course, this argument will not appeal to the men of large means, and it must be remembered that it is really these favorites of fortune who keep yachting going in its most prominent form.—*The Field.*

### American Model Y. C.

THE American Model Y. C. sailed a regatta on Sept. 1 on Prospect Park Lake, the course being ¼ mile to windward and back, with a fresh east wind; two out of three heats in each class. The times were:

SCHOONER CLASS—FIRST CLASS.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Irving B. | 11 29 00 | Withdrew. | | |

| Dolphin | 2 09 28 | 2 28 40 | 0 19 12 | 0 21 42 |
| Marjorie | 2 09 21 | 2 25 14 | 0 15 53 | 0 18 25 |
| Anna | 2 09 34 | 2 27 05 | 0 17 41 | 0 19 51 |
| Ida May | 2 09 35 | Finished outside the flag. | | |
| THIRD HEAT. | | | | |
| Dolphin | 2 47 14 | Did not finish. | | |
| Marjorie | 2 47 00 | 3 04 03 | 0 17 03 | 0 18 55 |
| Anna | 2 47 09 | 3 06 42 | 0 19 33 | 0 21 03 |
| Ida May | 2 47 25 | 3 08 05 | 0 20 40 | 0 21 57 |

Schooner class—May wins with Dora S. second. First class—Declared off, Magic refusing prize on a walkover. Third class—Marjorie first, Dolphin second.

### Horseshoe Harbor Club Regatta.

LARCHMONT—LONG ISLAND SOUND.

*Saturday, Sept. 8.*

THE Horseshoe Harbor Club, of Larchmont, was to have sailed its annual regatta on Sept. 3, but a postponement was made to Sept. 8. The day was rainy with a squally S.W. wind, and one catboat, the Anglesea, capsized, her crew of seven being rescued by Bon Ton of the same class. The times were:

CLASS A—SLOOPS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Madrine, F. M. Freeman | 29.97 | 2 21 31 | 2 16 04 |
| Louise, J. W. Hall | 31.20 | 2 23 31 | 2 23 31 |
| CLASS F—OPEN CATS 20FT. AMD UNDER. | | | |

| Ione, C. M. Bird | 18.50 | 1 54 42 | 1 53 25 |
| Anglesea, L. H. Spence | 19.92 | Capsized. | |
| Bon Ton, E. W. Post | 18.00 | Withdrew. | |
| CLASS J—OPEN CATS 18FT. AND UNDER. | | | |
| Moses, L. D. Huntington | 18.00 | 2 15 11 | 2 15 11 |
| Gobelin, Bart Jacob | 17.00 | 2 16 25 | 2 15 30 |
| Given, F. W. Smedley | 17.00 | 2 14 27 | 2 13 33 |

The winners were: Class A, Madrine; class F, Ione (also wins the $150 Bevan cup); class J, Given.

## Current Comment.

INTERNATIONAL yacht racing, so far as this country is concerned, is over for this year. The second accident to the Vigilant's centerboard on the eve of a great race made further attempts to defeat the Britannia futile, and the Prince of Wales acted gracefully in promptly consenting to the withdrawal of Mr. Gould's challenge. The series of races in which the Vigilant was engaged numbered eighteen, of which she won six, not a very flattering summary for the American yacht. It is usual, in a long contest, to admit defeat after one of the contestants has been beaten two to one, and the vast majority of the American people will, doubtless, do so in this instance, though there will be some who will continue for a long time to come, to talk of light breezes, narrow courses, hard luck and the like. There is no discredit in defeat after one has done everything possible to secure victory, but there is discredit in refusing to acknowledge defeat.

It is possible that the Vigilant, under altered conditions, might have beaten the Britannia, but not probable. The latter is an exceptionally fine yacht, and won under all sorts of conditions. She won when the wind was strong and when it was light, but she was especially fortunate in tacking, which we take to be one of the most necessary qualities of a fast yacht, and one to be especially sought after in a racer. The Vigilant, in her races with the Britannia, nearly always lost ground when there was much going about to be done. This cannot be explained away by ignorance of the course, as some have suggested, but seems to be very strong proof of the superiority of the keel boat over the centerboard craft. Nor is it to the point to urge that the Vigilant might have beaten the Britannia in a plain race to windward and back. The sort of race in which to test the superiority of yachts is that which brings out their points under all conditions, and the angular courses in British waters appear to do this.

The experience of the Vigilant this summer inevitably leads to the conclusion that whatever may be the merits of the centerboard in American waters, the English cutter is the better boat for racing purposes in British waters. This was demonstrated both by the large number of defeats sustained by Vigilant, and the loss or disarrangement of her centerboard twice at the most critical moments, involving each time a sacrifice of an important race. With regard to American waters, the superiority of the fixed keel is not so obvious; but if the future American courses are marked out like the British, with a view of showing all the good points which a yacht has, there is a possibility that the centerboard will not retain its popularity very long, even in this country The English are said to be anxious to try conclusions with the Americans in American waters next year, and will build a boat for that purpose; but it would be more instructive and quite as interesting to have Britannia come over here and race with Vigilant.

Mr. Gould has lost nothing in the estimation of British or American yachtsmen by defeat. He did all in his power to achieve success, and is entitled to the thanks of American yachtsmen for so pluckily carrying the American colors under difficulties.—*Baltimore American.*

---

Our general suspiciousness is very prettily illustrated by the various reports circulated about the Vigilant in England. No sooner was Mr. Gould's intention announced than the press accused him of a determined assault upon American Society by means of forcing himself upon the acquaintance of the Prince of Wales. When he lost races it was darkly hinted that he did it on purpose, and when he won them it was grossly suggested that he did it by accident. Even these gossipy insinuations did not satisfy our appetite for malice and all uncharitableness. The British public did not make enough noise when the Vigilant finally won a race, and the whole War of the Revolution had to be fought over again in the editorial columns of American newspapers. Then some one discovered, or thought he did, that the Vigilant was "jockeyed" out of an important race, and finally American writers on sporting subjects decided that an American yacht could never win glory on the other side, as she had to be steered by a British pilot. Out of this choice assortment of allegations we may take our pick, or we may believe them all without extra charge. The pity is that a noble sport and one which has always claimed special exemption from the sullying influences of "professionalism," should lead to discussion which would disgrace a prize-fight.—*Kate Field's Washington.*

---

To return again to the subject of the centerboard, the experience of the Vigilant has shown that when a 10-foot board made of bronze and weighing four tons is clapped on to a boat that already draws over 13ft. of water, it involves grave disadvantages. It necessitates elaborate hoisting apparatus that is always liable to get out of order. It will be remembered that in the last of the Cup races on this side the Vigilant's centerboard got jammed to her detriment. Then the draft which it necessitates—23ft. or more—is excessive. It is pretty near enough for a battleship. It limits the waters which she can successfully navigate. It spoils her for cruising purposes. One of the claims made for the centerboard was that it was particularly adapted to shoal waters. And the claim was well founded when it was attached to boats of light draft—such boats as were rightly called typical American centerboard boats. But it doesn't hold good when it is applied to boats that may already be properly termed deep-keel boats.

The Britannia with a draught something like 17ft.—and that is more than most yachtsmen care to have under them—has proved to be a handier boat than the Vigilant. Certainly it cannot be maintained that the results of the contests between the two boats had demonstrated the superiority of the centerboard. The most that an unprejudiced observer would say is that it has left the question of the relative merits of keel and centerboard unsettled. Britishers will certainly draw the inference that the centerboard has been shown to be superfluous. After the Vigilant's mishaps nobody will be sorry if the next successful cup defender Herreshoff turns out proves to be a keel boat. He came very near doing the trick with the Colonia. Many persons are of the opinion that with a little deeper keel, enough to give her about the same draught as the Valkyrie or Britannia probably, she would have beaten the Vigilant. She was only inferior to the latter in windward work, and the increase of keel would have overcome that defect. It should be remembered, in this connection, that the Vigilant's centerboard is a very different affair from the boards which did such valuable service on the Volunteer and Mayflower and Puritan. The latter were all of wood. Their comparatively light weight made them easily handled. They were designed merely to enable the boats to sail close to the wind. But the Vigilant's centerboard has been loaded down with a double mission—to supply ballast as well as windward qualities. That has necessitated weight, and it is the weight that has caused the trouble. And the fact must not be lost sight of that the Vigilant draws several feet more water than any of her centerboard predecessors.—*New York Evening Telegram.*

---

There has not been such an utterly uninteresting racing time this season as was experienced yesterday in Start Bay. The morning opened with a soft easterly breeze which lasted long enough to carry Vigilant and Satanita once round the course at the rate of five knots, but it died away in the afternoon and the vessels lay in the doldrums, totally unable to cover another round. It was thought by every one, especially as the committee had allowed the 40-rating match to be decided on the first round, that a like course would be adopted with regard to the big cutters, but the astonishing announcement was made by the executive that the match was void owing to its not having been completed in eight hours. There was a clause in the conditions to that effect, it is true, but the committee had reserved to itself the right to make any alterations. The time clause has become utterly obsolete with every club in the Kingdom but the Royal Dart; and after the Vigilant had hurried from Cowes to be present at the regatta better treatment should have been meted out to her. The Royal Dart has an unenviable reputation for doing things in maladroit fashion and the course pursued yesterday will certainly not tend to make the club more popular. The worst feature of the decision was its inconsistency. The Corsair and Carina being allowed to win at the end of the first round, the match could, according to precedent, have been finished at the end of the first round. It was officially stated that nothing further could be done in the matter, as no day was available for re-sailing, "so the club retains possession of the £50." As showing the wretchedly paltry weather it may be said that none of the 20-raters were able to finish one round of the course, and this race was also declared void. It was dark ere many of the yachts could get back to harbor and wind up a very unpleasant experience.—*London Times.*

---

## Vigilant's Centerboard.

THE *Field* gives the following account of the loss of Vigilant's centerboard:

"Anticipations that a cross channel match for the Cape May cup between the Vigilant and Britannia would result in a reliable trial of the relative merits of the two vessels in a tidal jump of sea remain unfulfilled, consequent on an almost analogous course of events which culminated in the collapse of the Wolverton cup match between the two vessels on the 18th ult. The withdrawal of the Britannia from the racing list for a time after the Portland disaster prevented the two vessels meeting at Dartmouth, from which port the Vigilant hurried back to Cowes, it having been mutually agreed that they should race for the cup on Wednesday last, the 5th inst. The Vigilant left Dartmouth soon after day dawn on Sunday, and before nightfall had a taste of dirty weather. With Portland Roads a back door, the yacht had a quiet night, and in a smart breeze easterly, left on Monday morning for Cowes,

"She turned in through the western end of the Wight—an ill-fated locality for the Vigilant—about noon, and then worked on against the first hour of the ebb. Tom Diaper, who has been pilot of the Vigilant throughout her racing career on this side, wished the vessel worked up the rift, and of course, expected that a call of 'leeho' would have been responded to. Capt. Jeffrey, who is in charge of the Vigilant, except when racing, did not let the vessel come round at the word, and the consequence of keeping the ship going too long was that she scraped the ground. A local fisherman states that it was on the Fives Rocks she grazed, and that she careened very much (suddenly) when going off on starboard tack toward the fairway.

"Diaper complained that Capt. Jeffrey afterward almost put the ship on the Shingles through not tacking when requested. Capt. Jeffrey, who is a big ship man, saying he wanted time for his men to 'shift over.' It was thought that the board, which had been dropped 9ft., had broken from the hook fastening and gone down through the trunk until soundings had been got, and that it was then held by the cham pendant and towed over the ground until an inevitable parting came. The strain on the winding or windlass gear was evidenced in the cogs of the big tooth wheel flying, and the smaller cog wheel being also broken, while the crank handle flew, struck a forward 'bulkhead' 12ft. away, and eventually landed in the forecastle. Mr. Howard Gould and a friend, who were in the main cabin, had a rather startling experience, as the table by which they were sitting was smashed.

"Capt. Haff, who has had no responsibility except when the Vigilant is actually under racing colors, was helpless to make any report of the matter until seeing Mr. G. J. Gould, and the owner of the Vigilant lost no time in making a clean breast. It may be said that no one on the American yacht had any wish to be let off anything—being like men fortified in a strong position—and owner and crew were ready to race their vessel at the time appointed. There was no 'barney' about the business, either, as Mr. Gould said that four tons of lead ballast had been put into the ship to make up for the loss of the board, and that, as he was advised the wind was generally up and down channel, the Vigilant would go 'there and back again' as fast without a centerboard as she would with one.

"The Prince of Wales was, of course, sent to, but the matter was quite left in the hands of the R. Y. S. sailing committee, they, in default of getting a reply, took action, and Mr. W. G. Jameson and Col. J. Sterling went off to the Vigilant. They were afforded every facility to gauge the racing condition of the Vigilant, and a glance sufficed to raise a feeling of sympathy for Mr. Gould. There was the wreck, and a report ashore was sufficient to warrant any wish of Mr. Gould's being met. In sporting spirit, Mr. Gould wrote a withdrawal at the R. Y. S. Castle of his challenge for the Cape May cup, and the R. Y. S. sailing committee accepted his withdrawal in a spirit which could not have failed to have satisfied Mr. Gould."

---

## Hudson River Y. C. Fall Regatta.

THE thirty-first annual regatta of the Hudson River Y. C. was sailed on Sept. 9, over the club's triangular course on the Hudson River, the wind being light and variable, with almost a drift at the end. The times were:

CLASS A - CABIN SLOOPS.

## Beverly Y. C. 217th Regatta.

MARBLEHEAD—MASSACHUSETTS BAY.

*Saturday, Sept. 8.*

THE 217th race of the Beverly Y. C. was sailed at Marblehead Sept. 8 in a very light S.S.E. air and a drizzling rain. The feature of the race was the performance of El Paso, who has been sold and re-christened Cleopatra. She gained on every leg, winning by 26m. The race in the dory class was very close. Course for the second and knockabout classes was 10 miles, for the rest 5⅞.

SECOND CLASS.

Winners: Knockabouts—First, Spinster; second, Jane. Class 2—M. L. E. Class 3—Cleopatra. Class 4—Bonita. Dory class—First, Pointer; second, Snipe.

Regatta committee—F. Elliot Cabot.

---

## Almira—Mary Matches.

LONG ISLAND SOUND.

*Sept. 10–11.*

THE very keen rivalry which has existed for two seasons between the cabin cats Almira, W. H Hanan, and Mary, W. E. Ellsworth, resulted in a challenge from Mr. Ellsworth for a series of three match races, for $100 per side, which challenge was accepted by Mr. Hanan. The races were sailed on Sept. 10-11, Almira winning the first two, so that a third was unnecessary.

The first race was over a windward and leeward course, from off the Indian Harbor Hotel, 3½ miles ou into the Sound and return, 2 rounds making 14 miles. The regatta committee of the Indian Harbor Y. C., Messrs. F. B. Jones, F. S. Doremus and Mr. Osborne, Jr., had charge, while Mr. John M. Sawyer acted as judge for Mary, and H. E. Doremus for Almira. By the terms of the challenge each boat carried a scrutineer. There was little wind in the morning, and both boats sent some lead ballast ashore in expectation of a drifting match. The wind came out fresh, however, from S.W., and the ballast was badly needed, Mary being unable to stand up properly. The start was timed:

Gun.....12 11 18 Mary.....12 13 34 Almira.....12 13 50

Almira gained steadily on the wind and the first turn was timed:

Almira.....1 15 33 Mary.....1 19 13

They ran home fast, Mary gaining, the round being timed: Almira, 1:49:15; Mary. 1:51:08.

The second windward leg was a repetition of the first, the times being: Almira, 3:04:18; Mary, 3:09:07.

Almira held her lead on the run in, the finish being timed:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Almira | 12 13 50 | 3 36 40 | 3 22 50 | 3 22 34 |
| Mary | 12 13 34 | 3 41 25 | 3 27 51 | 3 27 51 |

The second race was sailed next day under the management of Messrs. G. W. Pfeiffer and G. I. Field, of the Indian Harbor Y. C., the judges being Com. Henry Andrus, New Rochelle Y. C., and G. S. Tyson. The course was from off Little Captain's Island around Center Island Buoy, 6 miles to leeward, the wind being fresh from the north, and a beat back. The start was signalled at 1:05, but both were handicapped, being timed at 1:08. After a brisk run under spinnakers, the mark was turned: Almira, 2:17:41; Mary, 2:19:07.

On the wind Mary went to the front and led for a time, but Almira finally passed her, the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Almira | 1 08 00 | 4 05 05 | 2 57 05 | 2 56 50 |
| Mary | 1 08 00 | 4 05 41 | 2 57 41 | 2 57 41 |

Almira wins by 51s. The steam yacht Embla carried the judges on each occasion.

---

## Cohasset Y. C. Dory Race.

COHASSET, MASS.

*Saturday, Sept. 8.*

THE Cohasset Y. C. on Sept. 8 gave a dory race for working dories for prizes amounting to $100 in gold, contributed by Mr. B. C. Clark. The boats were divided into three classes—double banked, one mile and return; singles, ¾ mile and return; boys under 17 years, ½ mile and return. There was a large attendance at the start and 27 dories were entered, and nearly all competed. The doubles started at 4:00:50 P. M., the boys after the finish of the doubles, and the singles after the finish of the boys. The races were very interesting throughout, and the excitement was high, as all the contestants worked with a will. The dories were all blackleaded and several were soaped over that. There was a moderate breeze, S.E , and at the upper mark a long, heavy sea. During the last of the race a very heavy rain gave every one a thorough drenching. This probably ends the club racing this season. The new house is well along and will be about ready by Oct. 1. The club has a charter from the State. It has adopted the old Nahasset Y. C. signal, a triangular blue field, crossed diagonally by a white bar, with red star in center of bar: The times were:

DOUBLES—1 MILE AND RETURN.

| | |
|---|---|
| Frank Martin and Jos. Grassie | 0 34 50 |
| Antoine Salvador and Jos. Antoine | 0 35 08 |
| P Hefferen and Jerry McCarty | 0 36 26½ |
| Jos. Jason and John Smith | 0 36 43 |
| M. P. Valine and Manuel Salvador | 0 37 09 |
| Andy and Nat. Prouty | 0 37 13 |
| Harry Studley and J. Smith, Jr. | 0 40 42 |
| Tom Mannicks and partner | Broke seat. |
| Fred. Higgins and W. Cushing | Withdrew. |
| Antoine Fiquerado & Bro | Withdrew. |
| Emanuel Trombers & Bro | Withdrew. |
| Frank Salvador and Jack Ainslie | Withdrew. |

First prize $25, second $15, third $10.

SINGLES—¾ MILE AND RETURN.

| | |
|---|---|
| Tom Mannicks | 0 33 03 |
| Antoine Sidney | 0 34 33 |
| Fred Studley | 0 35 12 |
| Con. Murphy | 0 39 08 |
| George Denithorne | Withdrew. |
| Jos. Grassie | Withdrew. |

First prize $15, second $10, third $5.

BOYS UNDER 17 YEARS—½ MILE AND RETURN.

| | |
|---|---|
| J. Fratus | 0 22 02 |
| Philip Fox | 0 24 48 |
| Gus Silvie | 0 25 03 |
| John Jason | 0 27 54 |
| George Valine | 0 29 00 |
| Frank Sidney | Withdrew. |

First prize $10, second $7, third $3. QUAMINO.

---

## The 21-Footers.

THE sixth race of the Larchmont Y. C. for the 21ft. class was sailed in a fresh S.W. wind and hard rain on Sept. 8, the courses being from off the harbor around the Scotch Caps Buoy, then around Execution Buoy and home, 6¼ miles; only one round being sailed instead of two as at first proposed. Eight boats started, the absent ones being Flirt and Vaquero. After starting at 12:25, Minnetonka led on the reach to Scotch Caps, where the times were:

| | | | |
|---|---|---|---|
| Minnetonka | 12 38 15 | Hoodoo | 12 39 48 |
| Maysie | 12 39 20 | Dorothy | 12 40 15 |
| Adelaide | 12 39 35 | Celia | 12 40 46 |
| Houri | 12 39 45 | Blonde and Brunette | 12 41 20 |

On the beat to Execution with a fresh breeze positions changed considerably, the times being:

| | | | |
|---|---|---|---|
| Dorothy | 1 26 00 | Minnetoka | 1 30 07 |
| Adelaide | 1 27 22 | Maysie | 1 31 45 |
| Houri | 1 27 48 | Hoodoo | 1 31 58 |
| Celia | 1 28 58 | Blonde and Brunette | 1 33 10 |

The last leg was before the wind, the positions being unchanged, the times were, start 12:25:

| | Finish. | Elapsed. |
|---|---|---|
| Dorothy | 1 45 30 | 1 20 30 |
| Adelaide | 1 45 55 | 1 21 55 |
| Houri | 1 47 12 | 1 22 12 |
| Celia | 1 47 58 | 1 22 58 |
| Minnetonka | 1 48 58 | 1 23 58 |
| Hoodoo | 1 51 52 | 1 26 52 |
| Maysie | 1 52 16 | 1 27 16 |
| Blonde and Brunette | 1 52 44 | 1 27 44 |

Dorothy wins.

The seventh race was sailed on Sept 11, the course being across the Sound, from off the harbor, around a buoy off Mott's Point, 6½ miles to leeward and a beat home, the wind being fresh N.W. Seven yachts started, Vaquero being first away, all carrying spinakers to port. The turn was timed: Vaquero 2:04:55, Dorothy 2:05:36, Blonde and Brunette 2:06:55, Houri 2:07:02, Adelaide 2:07:08, Maysie 2:07:18, Hoodoo 2:07:20.

On the wind Vaquero gained on the fleet, the final times being. Start 1:25:

| | Finish. | Elapsed. |
|---|---|---|
| Houri, W. B. Duncan | 3 28 05 | 2 03 05 |
| Blonde and Brunette, H. B. Seeley | 3 22 25 | 1 57 25 |
| Vaquero, H. Duryea | 3 09 22 | 1 44 22 |
| Hoodoo, J. H. Adams | Not timed. | |
| Dorothy, H. P. Whitney | 3 15 18 | 1 50 18 |
| Maysie, W. Osborne | 3 23 07 | 1 58 07 |
| Adelaide, W. P. Douglass | 3 21 40 | 1 56 40 |

Adelaide broke the jaws of her gaff at the start, and sailed the course with the gaff lashed to the mast.

Vaquero wins, with Dorothy second. Blonde and Brunette won a private stake of $50 from Maysie.

---

## Douglaston Y. C.

DOUGLASTON—LITTLE NECK BAY.

*Saturday, Sept. 15.*

THE last race of the Douglaston Y. C. series was sailed on Sept. 15 in a moderate S.W. breeze, the times being:

CLASS 2.

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Kittie | 3 35 00 | 5 56 10 | 2 21 10 |
| Eloise | 3 35 00 | 5 58 55 | 2 23 55 |
| CLASS 3 | | | |
| Eleanor | 3 35 00 | Did not finish. | |
| Crescent | 3 35 00 | 4 22 40 | 0 47 40 |
| CLASS 4. | | | |
| Punch | 3 35 00 | 4 20 35 | 0 44 25 |
| Constance | 3 35 00 | 4 23 55 | 0 46 07 |
| Violet | 3 35 00 | 4 20 45 | 0 44 22 |
| MIXED RIGS. | | | |
| Minerva | 3 35 00 | 4 49 45 | 1 14 45 |

The winners were Kittie, Crescent, Punch and Minerva. A prize was awarded to Violet in the Saturday afternoon series, she having won the most races. Prizes were also awarded to the winners in the annual regatta of June 24. Punch took the Webster trophy, Kittie the Taylor cup and Sasqua the Hoyt trophy. The Webster trophy and Taylor cup must be won again to become permanent property. Sasqua having won the Hoyt trophy the required number of times, retains permanent possession.

---

## Riverside Y. C. Special Races.

RIVERSIDE—LONG ISLAND SOUND.

*Saturday, Sept. 8.*

THE Riverside Y. C. sailed two special races for cabin cats on Sept. 8, the course being from Little Captain's Island around Matinnicock and Center Island buoys, 15 miles naut. The day was rainy and foggy. The times were:

OPEN CLASS—CABIN CATS, UNDER 30FT.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Mary | 12 36 00 | 4 14 00 | 3 38 00 | 3 38 00 |
| Almira | 12 36 30 | 4 13 15 | 3 36 45 | 3 36 42 |
| Kittie | 12 37 00 | 4 44 30 | 4 07 30 | 3 56 30 |
| Allegro | 12 38 00 | 4 40 30 | 4 02 30 | 3 50 51 |
| CLUB CLASS—CABIN CATS, 25FT. AND UNDER. | | | | |
| Oconee | 12 37 30 | 4 44 50 | 4 07 20 | 4 07 20 |
| Nixie | 12 39 30 | 5 03 30 | 4 24 00 | 4 24 00 |
| Pearl | 12 37 30 | 5 03 31 | 26 01 | 4 23 48 |

The winners were Almira and Oconee.

## Larchmont Y. C.

LARCHMONT—LONG ISLAND SOUND.

*Saturday, Sept. 15.*

THE racing season of the Larchmont Y. C. ended on Saturday with a series of races, for the schooner cup, one between Wasp and Gloriana, one between Madrine and Pyxie and one for the 21-footers, besides a private stake in the schooner class between Viator and Loyal. After a hazy morning, a nice S.W. wind came in and held all day, while the weather was clear and warm. The course for the schooners sailing for the Larchmont schooner cup, and for the 46 footers, was to Easton's Neck and Stamford, 35 miles; the smaller boats all sailed the Matinnicock course. The start was made at 11:40, the leaders being timed:

| | | | |
|---|---|---|---|
| Emerald | 11 42 26 | Dagmar | 11 43 28 |
| Ariel | 11 42 29 | Elsemarie | 11 43 32 |
| Loyal | 11 42 46 | Viator | 11 44 50 |
| Atlantic | 11 42 50 | | |

The 46 and 25-footers were timed:

| | | | |
|---|---|---|---|
| Pyxie | 11 48 16 | Wasp | 11 49 15 |
| Madrine | 11 48 43 | Gloriana (handicapped) | 11 50 00 |

The single gun for the 21-footers was fired at 11:55, the starters being Skimaug, Hoodoo, Adelaide, Maysie, Dorothy, Blonde and Brunette, Minnetonka and Celia. Skimaug is a new Clapham boat, sailing with the class for the first time Shamrock was entered, having a private match with Elsemarie for $100, but she was delayed on the ways at Newport and was not present, the match being postponed until the 19th. Emerald showed the way to Lloyd's Neck, a reach, then spinakers were set to the turn at Easton's Neck, where the times were:

| | | | |
|---|---|---|---|
| Emerald | 2 03 29 | Gloriana | 2 15 26 |
| Ariel | 2 05 25 | Loyal | 2 16 07 |
| Elsemarie | 2 08 03 | Dagmar | 2 16 38 |
| Atlantic | 2 09 23 | Viator | 2 18 45 |
| Wasp | 2 12 50 | | |

They came on the wind for a reach to Stamford mark, where they were timed:

| | | | |
|---|---|---|---|
| Emerald | 2 58 55 | Gloriana | 3 18 20 |
| Ariel | 3 00 42 | Dagmar | 3 20 00 |
| Elsemarie | 3 05 08 | Loyal | 3 23 58 |
| Atlantic | 3 09 56 | Viator | 3 24 20 |
| Wasp | 3 14 06 | | |

They started to beat to the Hempstead mark, and with a stronger breeze, Emerald worked out a longer lead, the times at the mark being:

| | | | |
|---|---|---|---|
| Emerald | 4 37 33 | Gloriana | 5 06 26 |
| Ariel | 4 42 21 | Dagmar | 5 12 00 |
| Elsemarie | 4 56 04 | Viator | 5 18 04 |
| Atlantic | 5 01 08 | Loyal | 5 21 17 |
| Wasp | 5 01 26 | | |

The finish was timed:

| | | | |
|---|---|---|---|
| Emerald | 4 57 52 | Gloriana | 5 36 57 |
| Ariel | 5 04 07 | Dagmar | 5 38 51 |
| Elsemarie | 5 18 04 | Viator | 5 48 33 |
| Wasp | 5 27 06 | Loyal | 5 50 45 |
| Atlantic | 5 26 56 | | |

The smaller classes could not be seen from the committee boat, but their times are as follows:

RACE FOR LARCHMONT CUP, FOR SCHOONERS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Emerald, J. R. Maxwell | 89.51 | 5 15 26 | 5 15 26 |
| Atlantic, W. Marshall | 86.31 | 5 45 06 | 5 42 35 |
| Ariel, G. H. B. Hill | 83.53 | 5 21 38 | 5 16 49 |
| Elsemarie, J. B. King | 75.60 | 5 34 32 | 5 22 30 |
| Dagmar, Robt. Inman | 73.00 | 5 55 23 | 5 40 43 |
| Viator, W. G. Brokaw | 65.92 | 6 03 43 | 5 41 07 |
| Loyal, B. F. Sutton | 65.40 | 6 07 59 | 5 44 47 |

PRIVATE MATCH RACE.

| | | | |
|---|---|---|---|
| Wasp, Lippitt Bros. | 54.97 | 5 37 51 | 5 37 51 |
| Gloriana, H. M. Gillig | 54.67 | 5 46 57 | 5 46 29 |

PRIVATE MATCH RACE.

| | | | |
|---|---|---|---|
| Madrine, F. M. Freeman | 26.97 | 3 02 06 | 3 02 06 |
| Pyxie, O. Sanderson | 25.60 | 2 56 09 | 2 53 44 |

SPECIAL 21FT. CLASS—EIGHTH RACE.

| | Finish. | Elapsed. |
|---|---|---|
| Minnetonka, Geo. Work | 2 56 15 | 3 01 25 |
| Blonde and Brunette, H. B. Seeley | 3 02 15 | 3 07 15 |
| Hoodoo, J. H. Adams | 2 58 30 | 3 03 30 |
| Dorothy, H. Whitney | 2 53 46 | 2 58 46 |
| Maysie, Wm. Osborn | Did not finish. | |
| Adelaide, W. P. Douglass | Did not finish. | |
| Celia, C. A. Gould | 2 57 03 | 3 02 03 |
| Skimaug, O. H. Mallory | 3 02 17 | 3 07 17 |

Club record of prizes won by the 21-footers:

Commodore's cup, offered by Com. Seymour L. Husted, Jr.—Won by Vaquero.

Larchmont Y. C. cup—Won by Dorothy.

Brokaw cup, for yacht winning first three races—Won by Vaquero.

Crew prize, offered by Al Marshall, for the amateur crew making the best record—Won by Herman Duryea, of Vaquero; Winthrop Rutherford, of Vaquero; Harry P. Whitney, of Dorothy, and Dr. John M. Woodbury, of Adelaide. The private match between Viator and Loyal was declared off, and will be sailed on the 19th. Viator carried a clubtopsail, while Loyal had none on board.

## Fast Yachts in the West.

*Editor Forest and Stream:*

I SHOULD like to say a few words regarding an article from the *Minneapolis Journal* which was quoted in the FOREST AND STREAM of June 30. The writer speaking of the yachts in the Minnetonka Y. C., refers to them as "the finest fleet of sloops on any inland water in the world." Now it is very natural that a member of the Minnetonka Y. C., should be proud of the number of fast yachts which it possesses and especially of the success which their local yachts have had (on their own waters) in competition with eastern yachts, notably with the Herreshoff Alpha, one of the fastest of her class. Yet I can conceive of nothing which can substantiate the statement above referred to. It must certainly have been made in ignorance of the fact that enrolled in the Lake Geneva Y. C. which I may add is the oldest organization of its kind in the West, are several yachts brought from the East, with the reputations of being the fastest of their kind at Bridgeport and at Cow Bay, the home of the sandbagger. Among these may be mentioned the old timers Lorna, Tattler, Expert and Rival, and the newer ones. Precept, Vanadis, Mephisto and Mystery; the latter new this season and from the board of Stewart & Binney.

If the writer, to whose statement I have taken exception, still holds to his opinion, he must be ignorant of the history of the yachts which I have mentioned, and I would refer him to the forty or more successive victories achieved by Rival when owned by Com. Burritt over all boats of her class which cared to compete with her, and to the victories won by Lorna when sailed in the Corinthian races at Larchmont.

It is a pity that the distance separating Lake Geneva and Lake Minnetonka makes a meeting between yachts from the two clubs difficult to arrange. Representative yachts from the Oconomowoc and Fox Lake clubs have been raced against Geneva yachts, and have invariably met defeat, and we are very prone to think that the result would not be less favorable to our yachts should they meet those from Minnetonka.

LAKE GENEVA.

## New Yachts.

Among the rumors afloat of new yachts for 1895 is one, based on the expected challenge from Lord Dunraven, of a cup defender from the Delaware, to be owned by a syndicate of the Philadelphia Corinthian Y. C., headed by the Messrs. Drexel. The report also states that the yacht will be built by the Cramps, though it is not stated who will design her. At the other end of the fleet, the 21 footers, several new boats are promised, for Messrs. H. Maitland Kersey, R. N. Ellis, Royal Phelps Carroll and August Belmont. Mr. A. Cary Smith has orders for several sailing yachts, one for Mr. C. W. Chapin, to be built of steel by Harlan and Hollingsworth, 68ft. over all, 50ft. lwl., 16ft. beam and 4ft. 6in. draft, for Florida waters. She will be completely fitted for cruising. Another yawl is for Mr. M. R. Muckle, of Philadelphia, a wooden boat 57ft. over all, 40ft. lwl., 15ft. 9in. beam and 4ft. 3in. draft. Still a third, a schooner, is for Com. F. S. Brown, of Philadelphia, 63ft. over all, 45ft. lwl., 16ft. 6in. beam and 4ft. 8in. draft. Several boats will be built in the new 30ft. class of the Larchmont Y. C., and two members of the Seawanhaka C. Y. C., are discussing the possibilities of somewhat similar craft, of reasonable accommodation, staunch construction, and moderate sail area, to be about 35ft. lwl.

## Corinthian Y. C. of Philadelphia.

HANDICAP RACE.

*Saturday, Sept. 15.*

COURSE No. 6, twice around, one prize, a silver cup presented by Isaac W. Jeanes, distance 8 miles, weather clear, sea smooth, wind S.W., moderate, tide ebb, start 2:32:00:

| | Length. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Irex, H. S. Jeanes | 32.95 | 4 09 31 | 1 37 31 | 1 37 32 |
| Mermaid, R. J. W. Koons | 26.57 | 4 22 17 | 1 50 17 | 1 45 36 |
| Dawn, J. C. Uhler | 20.61 | 4 20 54 | 1 48 54 | 1 37 52 |
| Louise, J. W. Brock | 20.34 | 4 27 34 | 1 55 34 | 1 44 09 |
| Lenni Lenape, C. H. Brock | 19.85 | 4 21 45 | 1 49 45 | 1 37 40 |

Race committee, A. F. Bancroft, I. W. Jeanes.

## Lake Geneva Y. C.

SATURDAY, SEPT. 8.

THIS was the last race of the season. The club prizes were given this year to the boats winning the largest number of points in the series of races sailed by the respective classes, the winner of each race receiving four points and the second boat two. In the 25ft. class Julian M. Rumsey's Lorna won the cup. Benj. Carpenter's Rival took the prize for the 21-footers with eight points to his credit. H. H. Porter's Major was second with six. Puckachee, by scoring two points in the last race, wins in the 15ft. class, having ten points. Ysabel second with eight, Little Dipper third with six.

| | Length. | Start. | Finish. | Elapsed. |
|---|---|---|---|---|
| Little Dipper, Miss Sturges | 15.00 | 11 31 01 | 2 05 10 | 2 52 06 |
| Puckachee, Miss E.V. Rumsey | 14.11 | 11 15 16 | 2 26 10 | 3 10 54 |
| Gretchen, Billings & McCrea | 14.10½ | 11 15 58 | 2 29 19 | 3 14 21 |
| Ysabel, B. Carpenter | 14.11½ | 11 15 25 | Did not finish. | |
| Johanna, C. Corwith | 15.02 | 11 15 48 | Did not finish. | |

Little Dipper first, Puckachee second. Little Dipper is a Stewart & Binney stationary ballast boat, carrying a Tobin bronze centerboard. The other boats are all sand-baggers, Puckachee and Gretchen by J. H. Cornwall of Port Washington, L. I., while Ysabel and Johanna are by local builders. Judges, H. W. Marsh and F. E. Rich.

## YACHT NEWS NOTES.

As we go to press the fall sweepstakes of the New York Y. C. is being sailed, there being two classes, for schooners and single-stickers, the prizes being $200 first and $100 second in each class, entsy $50. The course is a triangle outside the Hook.

A new yacht club, called the Navesink Y. C., has just been organized at Navesink, N. J., on the Shrewsbury River, starting with a membership of forty and the following officers: Com., E. M. Gillett; Sec'y-Treas., Arthur Smith. The club will prohibit shifting ballast and professional sailors, and crews will be limited.

Mr. Howard Gould has offered the Start Bay Y. C. a cup costing $300 for the regatta of 1895.

Mr. George Gould has been invited by the Balloon Society, of London, to deliver a lecture on yachting, but he has declined, being about to leave England.

Embla, steam yacht, has been sold by J. H. Hanan to E. W. Bliss.

At its September meeting the American Model Y. C. decided to make no change in its present rule of length and sail area for the coming season.

Sagamore, steam yacht, Mr. Edgar Scott, anchored off Staten Island on Sept. 14 after a voyage of 18 months, to Yokohoma and back. She sailed from New York on May 6, 1893, and has visited Norway, the Mediterranean, the Red Sea, the Indian Ocean and Japanese waters.

Messrs. West & Son, of Southsea, England, have this season secured an unusually large and fine collection of yacht photos, including all classes from the 1-raters upward. The gems of the collection are the large photos of Vigilant, Britannia and Satanita. The first two were photographed in dock, and in all of the Cowes races. Among the views specially suitable for club house are some enlargements of Vigilant and Britannia, 24×17in. The photos of the new yachts in the smaller classes are very interesting as showing the marked peculiarities of modern racing craft.

# Rifle Range and Gallery.

## Golden Gate Riflemen.

SAN FRANCISCO, Sept. 8.—*Editor Forest and Stream:* To-day was held the semi-monthly shoot of the Columbia Pistol and Rifle Club. Several new members entered the competitions, and one of them, Lieut. Davis, of the U. S. Cavalry, stationed at this point, distinguished himself by making 87 at the 50yds. pistol range on his first score. He also did well with the target rifle, considering that it was his first score with this weapon. Mr. Dennis, president of the Mount Eden Rifle club, who has joined the Columbia, was on the range spying out what scores he would have to contend against.

The president of the Columbia had to "stand treat" on being top score man in all the competitions he entered. Scores:

Club medals for members only—Pistol, 50yds., standard American target, no re-entry, champion class: F. Young 86, C. M. Daiss 83; first class: Dr. Rodgers 89, F. Gehret 89, Lieut. Davis 87, F. Baumgartner 84, A. H. Pape 83, F. Poulter 82, D. W. McLaughlin 70, Capt. Klein 67; second class: A. Fetz 83, L. Zimmerman 79, C. Perry 76, A. H. Kennedy 76, R. H. Brown 72, C. Ludington 69, G. F. Mannek 26.

Rifle, any, 200yds., champion class: Dr. Rodgers 79, F. O. Young 78, D. McLaughlin 77, H. R Brown 75, Kellogg 51; first class: A. H. Pape 83, Gehret 81, Klein 76, Bohr 76, Poulter 71; second class: Perry 76, Fetz 68, Dennis 62, Kennedy 61, Davis 61.

All comers, re-entry, pistol, 50yds.:

| | | | |
|---|---|---|---|
| Dr Rodgers | 10 8 9 10 10 9 10 8 9 10—93 | 93 | |
| F O Young | 92 92 | C M Daiss | 84 |
| F Gehret | 90 89 | A Fetz | 79 |
| F Baumgartner | 86 | Lieut Davis | 76 |

Roos medal, any rifle: Dr. Rodgers 85, A. H. Pape 85, Young 81, Bohr 77, Gehret 75.

Rest match: A. H. Pape 105, Young 100, Capt. Kenitzer 91.

The San Francisco Schuetzen Verein held their thirty-fifth fall shooting festival last Sunday at Shell Mound Park. The attendance was large both at the picnic and at the rifle butts. All public shooting was on the point target, 3in. bullseye a red flag, 6in. a blue flag, and the rest of the 12in. black a white flag; red flag equals 3 points, a blue 2 and a white 1; single tickets, 6 shots, $1, and as a novelty, for the benefit of those who like to mix a little skill with hard work, 30-shot tickets, called champion tickets, were furnished for $5, re-entry allowed. This induced a number of marksmen, who do not like "sawing wood," to enter. In addition to prizes for most points and best centers, special prizes ranging from $20 to $2.50 were offered for most red flags on 30-shot tickets. Competition was very keen in this contest and some very good shooting was done. Ties on red flags were decided by preponderance of blues on the two tickets: Some of the bests scores were:

| | Red. | Blue. | | Red. | Blue. |
|---|---|---|---|---|---|
| A Strecker | 9 | 12 | Dr Rodgers | 8 | 13 |
| J Utschig | 9 | 11 | R Finking | 7 | 12 |
| D Faktor | 9 | 10 | W Glindeman | 7 | |

Best centers: P. Jacobi, D. Faktor, D. W. McLaughlin, A. Strecker, Dr. Rodgers, L. Haake, H. Huber, L. Bendel, J. Utschig, H. Wicker.

Most points were made by A. Strecker, who is a very accurate and rapid shot. He scored 363. Most of our accurate marksmen do not like the mere mechanical shooting that brings most points. It necessitates some skill, of course, but otherwise it is downright hard work.

ROEEL.

## Cincinnati Rifle Shooting.

CINCINNATI, O., Sept. 9.—The Cincinnati Rifle Association held its regular practice shoot at its range to-day and made the scores appended. Conditions 200yds., off hand, at the standard target:

| | | |
|---|---|---|
| Gindele | 10 10 10 9 8 7 5 7 7 10—83 | 83 |

## Zettler Rifle Club.

CYPRESS HILLS PARK, Long Island, Sept. 16.—Seven members of the Zettler Rifle Club met in the park this morning to participate in the bi-monthly shoot. The weather was warm and the atmosphere close and oppressive, but these conditions did not seem to have much effect upon the experts. Their shooting was of the usual high order. Fred Ross added another fine score to his recard; his 50 shots were grouped in ten-shot strings as follows: 218 219 229 232 225—1123. Messrs. Hansen, Flach, Holges, Busse and Engel made themselves prominent by their fine shooting. There was the usual contest for high score on the man target. Ross was first with 56, Engel 55, L. Busse 54, Hansen 54, Flach 53. Bullseye target, 4in. center, 3 shots, possible 3: Holges 2, Flach 2, Engel 1, Busse 1, Hansen 1. Scores:

German ring target, 200yds. off-hand:

Bullseye target—Champion class: Schmidt 3, Muller 3, Schroeder 2. Second class—Jorden 1. Third class—Lowe 2, Ficken 1. Fourth class Jutgens 2.

Point target: Champion class—Reitweisner 74, Schmidt 36, Schroeder 18. First class—Rohde 40. Second class—Jorden 34. Third class—Lowe 27, Schneweiss 7, Forsch 5. Fourth class—Jutgens 13.

Man target: Ficken 57, Schroeder 54, Muller 54, Schmidt 53, Schneweiss 48, Jorden 47.

Winners of class medals: Champion class, F. Schmidt: second class, Jorden; third class, Lowe; fourth class, Jutgens.

Man target medals: First medal, M. Ficken; second, F. Schroeder.

HENRY D. MULLER.

## Rifle in Texas.

SAN ANTONIO, Sept. 9.—An ugly puffy 3 o'clock wind spoiled what would otherwise have been a good day at the San Antonio range. While the scores are not great, still, taking everything into consideration, a good average was maintained. 200yds., muzzle rest, 10 shots, open sights:

| | | |
|---|---|---|
| E Dosch | 10 8 10 9 12 8 9 9 10 11— 96 | 96 |
| A Uhl | 10 12 9 12 9 12 12 12 9 9—106 | 106 |
| G Altman | 11 10 9 6 9 11 7 10 9 12— 94 | 94 |

| G Altmann | 7 5 5 4 8 6 7 9 7 6— 64 | 64 |

O. C. G.

## Worn vs. Martin.

CYPRESS HILLS PARK, Sept. 16.—There was an interesting rifle match here to day between two members of the Williamsburgh Shooting Society. The contesting riflemen were Messrs Ignatz Martin and Geo. Worn. The conditions of the match called for 100 shots per man, Martin granting Worn a handicap of 200 points for the match. The stakes were $25 a side. Worn's shooting was a surprise to Marten, for at the finish he was only 55 points behind Martin on a total of 1,987, with his handicap added he had a total of 2,187 against 2,042 for Martin, thus winning the match with a margin of 145 points. Scores:

| | | |
|---|---|---|
| I Martin | 194 191 206 207 218 189 217 205 195 220 | —2042 |
| G Worn | 184 190 209 207 202 193 204 211 204 183+200 | —2187 |

## New York Rifle Club.

GREENVILLE, N. J., Sept. 15.—Three members of the New York Rifle Club attended the weekly practice shoot in the Schuetzen Park to-day. Many of the club members are enjoying a vacation in the country and the attendance at the weekly practice is light. Scores, standard American target:

| | | |
|---|---|---|
| Case | 8 6 10 9 10 9 9 7 5 6—79 | 79 |
| | 6 10 9 7 8 9 8 5 8 9—79 | 79 |
| Young | 9 5 7 9 8 10 4 8 7 6—73 | 73 |
| | 8 7 8 6 9 7 6 9 4 8—72 | 72 |

## Schlicht Rifle Club.

WEST NEW YORK, N. J., Sept. 11.—At the weekly gallery shoot of the Schlicht Rifle Club, held last evening, the following appended scores were shot by the members present. Medal winners: G. Schlicht champion medal, J. Diehl first class medal, F. Lambrix second class medal, C. Merger third class medal. Scores: A. Tribout 208, G. Schlicht 242, C. Meyer 227, G. Richert 205, F. Lambrix 221, L. Dorr 214, G. Dorr 232, W. Schlicht 216, C. Schlicht 202, H. Aufderheide 220, J. Diehl 238, J. Schlicht 201.

## Greenville Rifle Club.

GREENVILLE, N. J., Sept. 15.—At the weekly gallery competition of the Greenville Rifle Club, held at its headquarters last night, eight members were in attendance and participated in the competition. The old veteran, M. Dorrler, led the way with the good score of 243. Scores: M. Dorrler 243, W. C. Collins 239, Agneau 234, Scheeline 230, Charlock 230, Graef 228, Renker 223, Becker 207.

## RIFLE NOTES.

L. P. Hansen of the Excelsior Rifle Club, Jersey City, will meet Frank C. Watts of the Newark Shooting Society on Saturday of this week and convince the "Old Obadiah" that he is not in it in a 100-shot match. The contest will take place in the Schuetzen Park at Newark. On Monday, Sept. 24, Mr. Hansen will meet John Rebhan of the Hudson Rifle Club in a 100-shot match. The contest will be shot on the Marion range.

The New York Schuetzen Corps, Capt. Henry Offerman, will hold its last and closing shoot for the season of 1894 in the Union Hill Schuetzen Park on Sept. 27. This corps will hold weekly shoots in the Zettler gallery during the winter. The corps contains many new members, who will derive much benefit from the use of the gallery rifle.

The Zettler Rifle Club has appropriated $200 for prizes for its winter gallery practice.

The German-American Shooting Society held a two-days' shoot in Ridgwood Pard (Deckleman's), Long Island, on Monday and Tuesday of this week; all of our own local experts were there to participate. A report of the shoot will appear in our next issue.

Gus Zimmerman, who returned from Europe a few days since, brought a large collection of trophies, the result of many matches in which he participated while abroad. Zimmerman is one of our most popular experts.

## Maine National Guard.

AUGUSTA, Me, Sept. 15.—*Editor Forest and Stream:* Your able correspondent, in giving an account of the competitions at Sea Girt, unintentionally gives a wrong impression regarding the interest taken and work done by the National Guard of Maine in rifle-practice, and I feel sure that he will be pleased to know that he is in error regarding the same. He says "Georgia and Maine have taken but little interest in developing the shooting ability of their national guard" etc. Since 1880 no little attention has been given to rifle practice in the national guard of Maine, and from time to time the conditions have been more difficult in qualification, till for several years the following conditions demanded.

Third class marksman: Two scores of 15 each at 200 yds. five shots.
Second class marksman: Two scores of 18 each at 200 yds. " "
First class marksman: Two scores of 21 each at 200 and 500 yds.
Sharpshooter: Two scores each of 22 at 200 yds., two of 24 each at 500, and two each of 23 at 600yds.

Under the foregoing conditions 58 per cent. of all the guard qualified in some of the classes. This year the practice has been more general and it is fair to assume that 75 or 80 per cent. of the entire force will become marksmen in these classes.

Every soldier in several companies will have qualified before the practice season closes. A good per cent will be first class and sharpshooters. The numbers of superior marksmen have simply been the outgrowth of usual practice, as our efforts have been to secure as many as possible of good average marksmen. We claim that the guard of Maine stands second to no State in its ability to shoot a rifle, and we have to learn of any State that excels it. Every company in the State has a rifle range in the town where organized.

E. C. FARRINGTON

Our reference to Maine and Georgia was in no wise a criticism upon the National Guard of these States. The work of the teams representing the two States at Sea Girt would be a refutation of any criticism that might be placed upon them. Our remarks were directed entirely toward the governments of the two States who for some reason have in the past failed to make the necessary appropriation to place the National Guard upon an even footing with that of some of their sister States such as Pennsylvania, New York and New Jersey.

# Trap-Shooting.

All ties divided unless otherwise reported.

If you want your shoot to be announced here send in notice like the following:

### FIXTURES.

Sept. 19 20.—Interstate Manufacturers' and Dealers' Association's tournament, under the auspices of the Chattanooga Gun Club, at Chattanooga, Tenn.

Sept. 19-20.—OTTUMWA, Ia.—West End Gun Club's third annual tournament.

Sept. 20.—NEW BRUNSWICK, N. J.—New Jersey Trap-Shooter's League.

Sept. 20.—PENACOOK, N. H.—New England Shooting Association championship tournament, under auspices of Penacook Gun Club.

Sept. 20-21 —MT. KISCO, N. Y.—Mt. Kisco Rod and Gun Club's fall tournament.

Sept. 21.—CHATTANOOGA, Tenn.—Tennessee State shoot. Events open only to residents of the State

Sept. 25-20.—Rochester (N. Y.) Rod and Gun Club tournament, with Central New York League team shoot, at Rochester. J. B Mullan, Sec'y.

Sept. 26 —Central New York Trap-Shooters' League, sixth tournament, at Rochester.

Sept. 27-28.—HARRISBURG, Pa.—Harrisburg Shooting Association; live birds and targets

Oct. 3-4.—READING, Pa.—Independent Gun Club; targets.

Oct. 3-5.—West Newburgh (N. Y.) Gun and Rifle Association tournament. Last day live birds. W. C. Gibbs, Sec'y.

Oct. 10-11.—Interstate Manufacturers' and Dealers' Association's tournament, under auspices of the Palmetto Gun Club, at Charleston, S. C.

Oct. 11.—LEWISTON, Me.—New England Shooting Association championship tournament, under auspices of Androscoggin Gun Club.

Oct. 22-24.—Emerald Gun Club tournament, at Dexter Park. Targets and live birds. Dr. G. V. Hudson, Sec'y, 9 Madison street, New York.

Oct. 24.—Central New York Trap-Shooters' League, seventh tournament, at Utica.

Oct. 25.—RICHMOND, Me.—New England Shooting Association championship tournament, under auspices of Richmond Gun Club.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

1895.

April 3-5 —Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York.

May,—Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

May 14 16.—DAYTON, O.—Ohio Trap-Shooters' League annual meeting and tournament, under the auspices of the Buckeye Gun Club, of Dayton, O. Ed. Taylor, Sec'y, 8 West Third street, Cincinnati.

June 19-21.—CLEVELAND, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

Oct. 3-6.—Pennsylvania State Sportsmen's fifth annual tournament, under the auspices of the Keystone Shooting League of Philadelphia. John C. Shallcross, Sec'y, Frankford, Pa.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

Capt. Ward, of the Sherman Rod and Gun Club, Columbus, O., is well in the lead for the Barton Trophy, which becomes the property of the member making highest average in the season's badge matches, providing that member takis part in 50 per cent. or more of the whole number of matches shot, usually thirty in number. Ward's average for eleven shoots is a fraction over 93 per cent., his nearest competitor being French with eight shoots and a percentage of 91⅙. There are yet nine more contests for the badge. The conditions are 25 targets per man, weekly shoots during the season.

Justus von Lengerke is recovering the use of his right hand, and is much more cheerful in consequence Mr. von Lengerke has been practically paralyzed in the member by inflammatory rheumatism ever since the Interstate Manufacturers' and Dealers' Association tournament in Pittsburgh last April. Although far from all right, the symptoms are such as to warrant the belief that before long Mr. von Lengerke will be able to hold a gun to his right shoulder and call "pull."

W. H. Skinner, who represents the Forehand Arms Co., was present at the Climax gun shoot on Wednesday last. Mr. Skinner introduced a new scheme to the boys, under the name of "Chicago Freezeout." The idea is that of a miss-and-out, each man paying five cents into a pool for every target he fires at. When two men are left, it's a division. Tee Kay says it's just his size, and as a matter of fact he took to it kindly, everything coming his way.

Mr. W. W. Dornin, representing the firm of Thos. B. Dornin & Son, of Lynchburg, Va., was present at the shoot at Rutherford, N. J., on Saturday. Mr. Dornin also called upon FOREST AND STREAM during the week. Mr. Dornin is a member of that live organization the Lynchburg Gun Club, an organization which shows its appreciation of FOREST AND STREAM by numbering no less than 21 members as regular subscribers.

The Winchester Gun Association, of Winchester, Va., will hold its fourth annual tournament on Sept. 25. The programme includes 10 20-target races at a uniform entrance of $2, targets 2½ cents extra. The club adds $10 to every purse; it also adds $10 in the third and sixth events to a purse made up by novices, who shoot in those events but for their own money. Novices are 75 per cent men. The Taylor Hotel is headquarters for shooters.

The seventh and last shoot of the New Jersey Trap Shooters' League takes place Thursday, Sept. 20, at New Brunswick, N. J. The Maplewoods lead in the contest with twenty-one more breaks than their nearest opponents, the South Sides, and apparently have a sure thing of first place. The prize is awarded for the highest aggregate number of breaks in any four of the seven contests.

The members of the Altoona Rod and Gun Club have gone into camp—Camp Uncle Joe Carlin—about three-quarters of a mile from B ree, a small station on the main line of the Pennsylvania, between Altoona and Harrisburg. The members extend a cordial welcome to all shooters. Traps, both live bird and target, are part of the camp equipment; so take your gun along.

The combination of a balky team, a vicious dog and Tee Kay's pants caused a good deal of fun at the close of the shoot at Rutherford, N. J., on Saturday. Tee Kay's pants were torn by the "brindled bull pup;" it was a sight to see Tee Kay gunning for the pup with Van Dyke's pump gun; the dog knew the man and the gun and fled incontinently.

"Redwing" by scoring 23 out of 25, expert rules, on the Cleveland Gun Club grounds, on Sept. 3, wears the Cleveland *World's* badge for one month. Previous winners are Perry Sherman, W. Tamblyn and D. A. Upson. Each of the above have won the badge once; it must be won three times before it becomes the property of the holder.

A large crowd visited Oakwood Park, near Dayton, O., on Labor Day, to see the match between Capt. Bogardus and Phil Wentz. Conditions were, 50 live birds per man, $100 a side, 80yds. boundary, use of one barrel, any bird killed within 10yds. of the trap counted as a lost bird. Bogardus killed 41 to Wentz's 38 and won the match.

Secretary Van Gilder, of Knoxville, has 60 names down on his list of those who will pay in their $10 for the pleasure and privilege of shooting in the tournament next May. He wants 100 and he'll get them.

The last of the '94 series of tournaments given by the Interstate Manufacturers and Dealers' Association will be held at Charleston, S. C., on Oct. 10 and 11. A detailed notice is given elsewhere.

The prospects for a big shoot at Harrisburg on Sept. 27 and 28 are very bright. Mr. H. B. Shoop is the secretary of the Shooting Association.

The Rochester Rod and Gun Club's tournament on Sept. 25 and 26 should be well attended. The programme is an attractive one.

The third annual tournament of the West End Gun Club, of Ottumwa, Ia., is in progress this week.

EDWARD BANKS.

## Des Moines, Iowa.

DES MOINES, Ia., Sept. 6.—To-day was the last of a three days' tournament held on the State Fair Ground, under the management of Mr. C. O. Perkins and C. W. Budd, of the Highland Gun Club. The State Agricultural Society donated $100 to be added to the purses, and also refunded each contestant his admission to the Fair Grounds, and did everything they could to make it pleasant for the shooters. Among those in attendance were More Chandler and Wm. Evans, of Red Oak; Dr. Dauthett and McFarland, of Osceola; Ed. Stay, of Clinton; Dr. Doan and Mr. Hozzelwood, of Humboldt; G. P. Christianson, Hamaker and Peterson, of Randall; Hon. J. G. Smith and Henry Durant, of Algona; Curtis and Cottrell, of Menlo; M. and W. Gorber, of Altoona; John Georgeson, of Kelly; Von Emmons, of Ottumwa; Marsden and Sheelly, of Pella and Harris, Kessler, Miller, Kersher, Bennett, of St. Paul; Peterson, of Coon Rapids; Eason, Selby, Johnson, Perkins, Budd and Gwinn, of Des Moines; Lewis and Goodman, of Indianola.

The shooting was from 5 traps, and all but 3 or 4 events were shot, rapid-fires or walk around system. Targets were thrown about 70yds., and with the half of a strong wind made the shooting difficult. The weather on the two first days was fine but during the last day was rainy and disagreeable. A large crowd of spectators witnessed the shooting; among them being quite a large number of ladies. Scores:

*First Day.*

No. 1, 10 targets, entrance $1, 4 moneys, 10 entries:

| | | | |
|---|---|---|---|

C. W. BUDD.

## Trap at San Antonio.

SAN ANTONIO, Texas, Sept. 9.—As your correspondent predicted, Mr. Rothwell has added another winning to his lead. This makes him five winnings and brings him head and shoulders ahead of his competitors, Messrs. Samuels, Paris and Thiele, who have each three winnings. There are three more shoots before the trophy competition closes and should Rothwell win once again, it gives him a "cinch" on the prize. The following are the scores made in a strong wind:

No. 1, 10 singles and 3 pair targets: Samuels 8, Paris 8, Chabot 10, Veith 10, Rothwell 10, France 12, Thiele 9, Smith 13, Epp 5.

No. 2, for trophy, 20 singles and 5 pairs: Paris 11, Smith 18, Rothwell 25. Samuels 18, Thiele 24, France 18, Veith 21, Barr 13, Shields 16. Chabot 16, Weyl 16, Epp 19, Prescott 13, Grossman 15, Volbrecht 17.

No. 3, 15 singles: Barr 12, Grossman 11, Paris 10, Rothwell 12, Thiele 10, France 10, Chabot 9, Shields 7, Samuels 9, Veith 8, Rahmsdorf 8, Smith 11, Vollbrecht 8.

No. 4, team shoot, 15 singles: Paris, (captain), 6, Rothwell 8, Grossman 6; total 20. France 10, Thiele 12, Vollbrecht 6; total 28.

O. C. G.

## Live Birds at Scranton, Pa.

The Green Ridge Gun Club, of Scranton, Pa., will hold a live bird shoot at the Scranton base ball park, on Friday, Sept. 28. Shooting will commence at 9 A. M. sharp. The special event will be a race "to decide who is the champion wing shot of northeastern Pennsylvania." Conditions of this race are 25 live birds per man, 21yds. rise, use of one barrel only, elbow at the side and heel of the gun below the elbow, 1¼oz. shot allowed, entrance $10, including the price of the birds. The following is a list of prizes offered for competition, with the names of the donors: Green Ridge Gun Club $75 gold medal; Greene Ridge Gun Club, $60 hammerless gun; lumber dealer of Scranton, $45 gold stop watch; George W. Schlager, gun case; M. Jurish, rifle; E. R. Parker, fishing rod; George Felton, hunting coat; Alex Dun, Jr., umbrella The winner of the gold medal becomes the absolute owner. All entries must be received from Sept. 20. Send entrance fee either by check or post-office order. Address all communications to H. D. Swarts, Secretary and Treasurer, Box 566, Scranton, Pa.

## Vernon Gun Club.

VERNON, Tex., Sept. 7.—The regular club shoot of the Vernon Gun Club on this date resulted as follows, 15 targets and 3 pairs:

| | | |
|---|---|---|
| Matthews | 101110111111011 | 11 11 11—13 |
| Lorance | 010111011011111 | 11 11 11—17 |

## Altoona Rod and Gun Club.

ALTOONA, Pa., Sept. 9.—A few members of the gun club, some of whom felt that they need practice, visited Wopsononock yesterday just to see what they could do. "Doc" has the same old suit of clothes on and is cracking them right along. "Abe" Shirk made an acceptable referee, his decisions not being questioned more than three times. Scores: No. 1: Fay 3, Bishop 5, "Frank" 2. No 2: Clark 4, Doc 8, Davis 4. No. 3: Doc 10, Bishop 7, Fay 4. No. 4: Davis 4, Bell 6, Frank 2. No. 5: Doc 10, Bell 7, Patterson 5. No. 6: Doc 8, Fay 2. PROF.

## Club Championship of New Jersey.

SATURDAY, Sept. 15, was the date fixed for the contest for the club championship of the State of New Jersey. Last year the Boiling Springs Club, of Rutherford, N. J., won the emblem, a cup presented by *Shooting and Fishing*. The contestants this year were the Boiling Springs and Climax Gun Clubs. Both of these clubs count many expert trap-shooters on their rosters; a team from either club would be considered warm company at any tournament.

The weather on Saturday was all that could be desired for trap-shooting, hardly enough wind stirring to keep the air cool. The attendance at the club grounds during the afternoon could not but be flattering to the home team—the Boiling Springs team—the shoot taking place at Rutherford. In the various open events no less than 25 shooters took part, honors undoubtedly resting with "Uncle Billy" Siegler, who broke pretty nearly every target he shot at. Among those who took part were Van Dyke, who is now handling the Winchester repeating shotgun, and W. H. Skinner, representative of the Forehand Arms Company, of Worcester, Mass. "Tee Kay," of course, was there, and showed that the United States Cartridge Company's material was equal to the task he set it. Messrs. Wygart, Mason, Halstead and Southard formed a strong Peekskill delegation. (N. B.—They wont to see a team equal their recent record!)

The contest for the cup was watched with intense interest until it became an assured fact that the trophy would remain with the Boiling Springs Club. The conditions under which it is shot are: Five-men teams, 30 singles and 10 pairs per man, the singles to be shot one man up, 5 unknown traps. The teams were: Messrs. McAlpin, Richmond, Collins, "Hyde" and Van Dyke for the Boiling Springs; Messrs. E. D. Miller, T. H. Keller, Terry, Brantingham and Neaf Apgar for the Climax. "Hyde" and McAlpin carried off the honors, although Eddie Collins made a most remarkable brace, scoring 6 out of his first 16 and then getting no less than 30 out of his last 34. The shooting was hard, particularly the doubles, the angles being very acute. Mr. Jacob Pentz, of *Shooting and Fishing*, acted as official scorer, FOREST AND STREAM's representative being given the post of official "button-toucher" or puller. Empire targets, bluerock traps and North's electric pull were the order of things at Rutherford. Scores:

Club championship of New Jersey, 5-men teams, 30 singles and 10 pairs, one man up, 5 unknown traps:

## The Charleston Tournament.

THE tenth and last of the series of tournaments given by the Interstate Manufacturers' and Dealers' Association during the season of 1894 is announced for Oct. 10 and 11, at Charleston, S. C. The tournament is held under the auspices of the Palmetto Gun Club of Charleston, the club adding $100 in sums of $5 to every purse. The programme is the same as that scheduled for Chattanooga this week, consisting as it does of ten events each day, five at unknown angles and five under the novelty rule. The entrance moneys are uniform, $1.50 in each event. Headquarters for shooters during the tournament will be the St. Charles Hotel, corner of Meeting and Hasell streets, where special rates for shooters have been secured. The Enterprise cars, which pass the hotel, run direct to the shooting grounds. Shooting commences at 9:30 sharp each morning. For further information inquiries should be addressed to Geo. Steck, Secretary, P. O. Box 259, Charleston, S. C.

An interesting page on the programme is the one on which the Interstate Manufacturers' and Dealers' Association make the following announcement:

"This, the Palmetto Gun Club's tournament, being the tenth of the series given under our auspices during 1894, will mark the close of the season for the present year. These tournaments have been so uniformly successful that they are the talk of the trap-shooting fraternity throughout the country. Wherever one has been held trap-shooting has received a decided stimulus, interest has been revived and clubs have taken on a new lease of life, as shown by the active part members take in the club's welfare. A review of the various tournaments will be issued in a short time which will be replete with statistical data of particular interest, such as names of the winners, best averages, number of targets trapped, amount of money divided, etc., which in a measure will convey the immensity of the interest taken in these tournaments. It is our intention to continue giving tournaments during 1895, and we recognize in the South a good field for our work. Clubs in North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi and Louisiana desiring tournaments should make early application for same."

## Dropping for Place Must Go.

CHICAGO, Ill., Sept. 14.—Mr. Irby Bennett, acting manager of the late Memphis tournament, writes the following straightforward words about the ethics of modern trap-shooting. I sincerely advise all trap-shooters who go to next spring's Memphis shoot to go with the intention of shooting honestly. Elsewise they may lose their car fare. Mr. Bennett says:

"I assure you such encouragement as you have given us will strengthen us in our purpose and intention of giving a strictly square shoot or closing our grounds forever. Mr. Divine is now fully recovered from his recent illness and says he fully approves of all I did here, and together we will run our future events on the dead level if we have to refuse the entry of half, or even all the shooters."

That is the right sort of talk, and those men mean it. It is only a question of time when the dishonest shooter will have to go out of the society of gentlemen, just as much as the card sharper or crook of any other kind. The quicker that day comes the better for trap-shooting, and all credit to the management first to speed that day. Mr. Divine writes me in just the same tenor as the above. They deserve the support of every reputable sportsman. I hope to see Knoxville hang out a similar banner. These two towns can make history for trap-shooting in just one week each.

Mr. H. McMurchy, of the Hunter Arms Co., is in town to-day and will remain for some days, with a trunk full of ejectors.

Capt. A. W. Du Bray, of the Parker gun, writes me that he will be here in a few days at the latest, and will show Chicago the handsomest gun in the whole wide world—meaning the new Whitworth Parker.

909 SECURITY BUILDING, Chicago. E. HOUGH.

Saturday, Sept. 29, is the day set by the New Utrecht Gun Club for the first shoot for the American E. C. Powder cup. The shoot, which is at live birds, takes place at Woodlawn. The Third avenue grounds are not open on the above date.

## Binghamton Gun Club.

BINGHAMTON, N. Y., Sept. 15.—Inclosed find scores made at our tournament for amateurs. The attendance was not as large as we expected, but what it lacked in numbers it made up in enthusiasm. The strong wind of the first day kept the scores down somewhat. Another spring we intend to give an open tournament and it will be a hummer. Scores:

Live bird shooting is but very little indulged in here but it would not be very healthy for any one not prepared to shoot the race of his life to come around this neck of the woods looking for a match. A few days ago a couple of the leading members of our club became engaged in conversation as to their relative merits in live bird shooting, the outcome of which was a challenge, which was promptly accepted. The conditions 25 birds a side, for $100. Yesterday the match came off. The birds were clinkers, every one of them. The luck running about even. The following is the score:

Kendall.....1111121111202211112212123—24
Boss.....2012111221112201112221222—22

Kendall's shooting was first-class, not a "slobbering" kill in the lot, his birds being centered every time. His twelfth bird, which got away, was an ugly twister. Boss is by no means satisfied with the outcome of the match, and another contest on the same terms is likely to come off soon. WINFIELD.

## Trap-Shooting at Baltimore.

EARLY last spring the management of the Baltimore Gun Club decided to hold its annual tournament and selected dates with an eye to the weather possibilities, yet struck a blizzard, and with it went all hopes of a successful meeting. As usual, there were those who did not fail to say it was all the fault of the club managers; but notwithstanding discouragements elections were held, and the new officers got down into the collar with enthusiasm. The grounds secured for the year were now sold or leased to an athletic association. This necessitated a change, and with no little trouble other grounds were secured and laid out in time to begin a series of weekly shooting for money prizes offered by the club, which has just been completed, with the following results:

Class A: Hall 84¾%, R. Cantler 84%, Claridge 81%.

Class B: Malone 82%, G. Coe, Jr. 75%, E. Fox 75%, Greener 72%, Cox 73%.

Class C: Williar 75%, Dr. Fort 74%, Walters 65%, Zollinger 64%, Vance 60%, Stewart 60%, Mitchell 58%.

Class D: Beck 57%, Johns 56%, Brehm 45%, Dr. Linthicum 36%, Haupt 51%, Talbott 54%.

The shooting was at 25 targets per man each week for fourteen weeks, known traps and angles, covering the entire season with us when there is nothing else to shoot. During the same time a 6-man team of the club won second place in the team race of the Standard Gun Club tournament, beating the crack team of the Capitol City Gun Club, and being but 6 targets behind the best team of the Standard Club.

The following day four of this same team again pulled out second place in a four-man team race, breaking 94 out of the 100, the Pennsylvania team breaking 95 in the pluckiest up-hill race seen about here for many a year.

Individually, some of the members have been doing great work. Hall beat Bonday, of the Standards, in a 100 target race, known traps, unknown angles, with a score of 90 to 82. Mr. Hall also beat Vance, of his own club, the same race, only allowing Mr. Vance 25 dead; score, 91 to 80.

Malone, Hall and Cantler trotted close behind the winner of the Standard cup, representing the championship of the State, July 4.

Dr. Fort won first prize in a 100 target race at Jessups, Md., Aug. 9, breaking 93, at known traps and angles, and the general average of the entire club has been improving, showing the effects of the regular practice.

Preparations are now being made for a tournament to be held either in the late fall or spring, which will, it is hoped, prove a greater success than any yet held under the club's auspices. H. A. Penrose has agreed to be present and manage affairs, and that means something. With him as manager on the present beautifully located grounds, if the hoodoo can on only be caged, 1885 will see the Baltimore Club in the van as leader.

Too much cannot be said of Mr. Malone's management through the past season. Elected to this responsible position against some opposition, he has faithfully performed his onerous duties, at no time giving cause for just complaint, and by his prompt attendance at the grounds has made it possible for many to shoot regularly who otherwise would have been shut out from lack of time. PICUS.

## Climax Club Shoot.

THE monthly shoot of the Climax Gun Club was held at the club's grounds near Fanwood, N. J., on Wednesday last, the members competing receiving the usual target handicaps; Keller and Brantingham were scratch men. Score:

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## Shooting at John Watson's.

SEPT. 14.—The following are the scores made at the grounds.

*Sept. 4.*—Chicago Shooting Club, medal shoot, 15 live birds:

## Morfey vs. Pier.

PATERSON, N. J., Sept. 11.—The match between Morfey and Pier, which took place this afternoon on Rogers's grounds, ended in a tie, each man killing 10 out of his 15 birds. The conditions of the match were 15 live birds per man, 30yds. rise, 80yds. boundary, Long Island rules, $50 a side.

The time announced for bringing off the match was 2:30 P. M., but it was almost 4 before Rogers came to the grounds with the traps. All preparations had to be made at that hour, even to measuring off the boundary. A large crowd of supporters of both men were present, Morfey being the favorite at 5 to 3. Among those present were Frank Class and Lennard, of Morristown, who were accompanied by Mrs. Class and Mrs. Lennard. When the match commenced Pier rather dampened the ardor of his supporters by missing his first three birds. On Pier's 8th bird a curious thing occurred. The pigeon was a fast right-quartering twister which left the trap like lightning; Pier's gun snapped for him; on examination by the referee it was found that the shell had no powder in it, although it was shotted; the referee declared it a lost bird. Morfey seemed to get rattled by the way in which Pier's backers yelled each time he missed, for he dropped his 12th, 13th and 14th birds in succession. His 12th was hard hit, but got outside the boundary; but his 13th was a clean miss. The 14th was hit lightly on the wing and went home.

In the luck of the birds Morfey had the worst of it, drawing most of the hard ones. The tie will be shot off under the same conditions on Oct. 23. A good deal of money has been wagered on the event, the tie having created increased interest in the meeting between these two shots. Referee, Chris Wright; judge for Morfey, Arthur Bunn; judge for Pier, Jim Burns; trappers, Tom Rogers and Robert Boyle; scorer, Wm. Dutcher. Scores:

## Lynchburg Gun Club.

LYNCHBURG, Va., Sept. 15.—Capt. J. L. Brewer is in town on something of a business trip, talking Winchester gun and ammunition and saying a good word for empire targets. The Captain has made some good friends among the gun cranks. Yesterday afternoon he gave an exhibition shoot at the gun club grounds, delighting quite an audience with his skill in expert work with the "pump gun." Afterward some of the club members joined him in a friendly contest. Captain Brewer is much pleased with the town and people. Following is a short score made after the exhibition shoot:

No. 1:

J L Brewer.....1111011101111111111111111—24
Cleland.....1000110111111101111011010—17

No. 2:

J L Brewer.....1111011101111111111111111—23
Nelson.....0110111111100101011000111—16

No. 3:

Moorman.....0111011110111101110110001—17
Stearns.....0111100111011001100 00011—13

# Answers to Correspondents.

### No notice taken of anonymous communications.

D. J. W., Wilkesbarre, Pa.—Armin Tenner treated exhaustively of the relative merits of all powders in issues of Dec. 2, 9, 16 and 23, 1893, of FOREST AND STREAM. A reference to them will probably give you the information you desire.

H. E SABINE, Mishawaka, Clatsop County, Oregon.—The gun you refer to was exhibited by Charles Lancaster, of London, England. It was called the "Colindian gun," and was described by Mr. Lancaster as a "combination ball and shotgun, a non-fouling, smooth, oval-bore, rifled gun, from which can be fired conical-shaped, solid or express bullets, with the accuracy of an Express rifle, to 100yds., and shot of all sizes, with the excellent pattern of a shotgun." As to its capabilities we cannot say anything further. The "Paradox" gun, for shot or ball, has been used very successfully in both India and the South African colonies. It is manufactured by Holland & Holland, of London, England, and, we believe, also by Lancaster. "The Gun and its Developments," by W. W. Greener, is a standard work and will give you the other information you ask for. You will find it advertised in FOREST AND STREAM's Sportsman's Library.

## Fairyland for the Children.

NEXT December, Madison Square Garden will contain one of the most interesting exhibitions ever presented to the public of New York. The entire floor space of the vast amphitheater will be fitted up to represent the ancient and historic city of Nuremberg, with its old Castle, City gates and quaint streets, providing for upwards of one hundred stores. In these stores will be exhibited for sale, toys, notions and fancy articles from every part of the world. The management will attempt not only to duplicate the famous Annual Toy Fair of Nuremberg, but to present additional features of interest that will make the first Toy Fair of New York the greatest children's exhibition and aggregation of juvenile entertainments ever collected under one roof. The fair will be open daily from 10 A. M. till 11 P. M., and apart from the promenade concerts by one of New York's most famous bands, and intermediate concerts by a Vienna Ladies' Orchestra, there will be a continuous performance, probably the longest ever attempted by a management, of a thirteen hours' programme, comprising Punch and Judy shows, marionettes, performing dogs, etc., and specially imported novelties from Europe. The price of admission to this Fairyland for the children has been fixed at twenty five cents, and no extras for side shows will be allowed. The fair will be opened Dec. 5, and continue till Christmas, and will be under the direction of Mr. Frank W. Sanger, the General Manager of the Garden, and Mr. H. J. Leslie, the General Manager of the Toy Exhibition Company.—*Adv.*

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

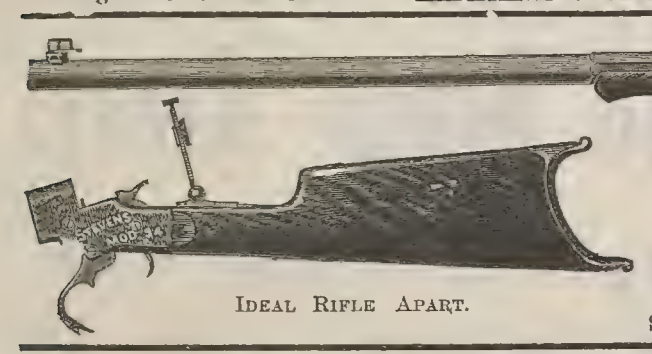
Schoverling, Daly & Gales, New York.
Geo. Worthington Co., Cleveland, O.
W. Fred Quimby, Gen Agent U. S. and Canada

The growing popularity and success of the EMPIRE TARGET are causing our competitors to renew their efforts to malign its qualities by calling it a "cheap imitation and inferior substitute," but it would seem by the enormous sales and the large list of leading jobbers and dealers handling the EMPIRE that their efforts were not "panning out" as they would wish. We are informed by the largest dealers that the Empire is giving better satisfaction than any other target they ever handled. The reason for this is that the Empire is a strictly first-class article and sold on its merits. It is manufactured under the management of experts, who have been in the business from its beginning, and made by the most expensive and perfect automatic machinery, from the very best composition that is possible to put in a target, and so shaped and constructed as to make the surest breaker and flyer, and we challenge our competitors to prove otherwise.



**Empire targets cost no more—perhaps less—than any other, and can be thrown from all principal traps.**

OUR LATEST MODEL 1894.

**THE NEW IDEAL RIFLE.**

---

A gentleman who was thinking of taking a trip to Nova Scotia by way of a hunting vacation, had the idea suggested to him that he had better start by finding out what the laws of that Province were regarding aliens. This information was furnished with a bill for looking up the law, which might have been procured in New York at only a fraction of the cost. For the modest sum of 25 cents, FOREST AND STREAM, the well-known sportsman's journal, publishes *Game Laws in Brief*, a recapitulation of the laws in both the United States and Canada, the editor of which is so certain of its correctness that he publishes a standing offer of $5 to any one who can find an error in it. That the reward has yet to be claimed speaks volumes for the accuracy of Mr. Charles B. Reynolds, the editor, and commends it to the attention of all who use the gun or rod.—*New York Mail and Express, Sept.* 3.

The *Brief* gives all that resident or non-resident sportsmen need to know of the fish and game laws of this continent It is the standard authority. All dealers sell it. FOREST AND STREAM sends it on receipt of price.

**BY HOWLAND GASPER.**

**Cloth, Royal Octavo, 277 pages, 17 Illustrations. Price $2.00.**

A manual of scientific and practical knowledge, designed for the instruction and information of all votaries of the gun. "The author has had in view only one object—so to familiarize the sportsman with the habits of the game he pursues, and the methods of hunting it, that his success in the fields and marshes may be practically assured."—*Introduction*

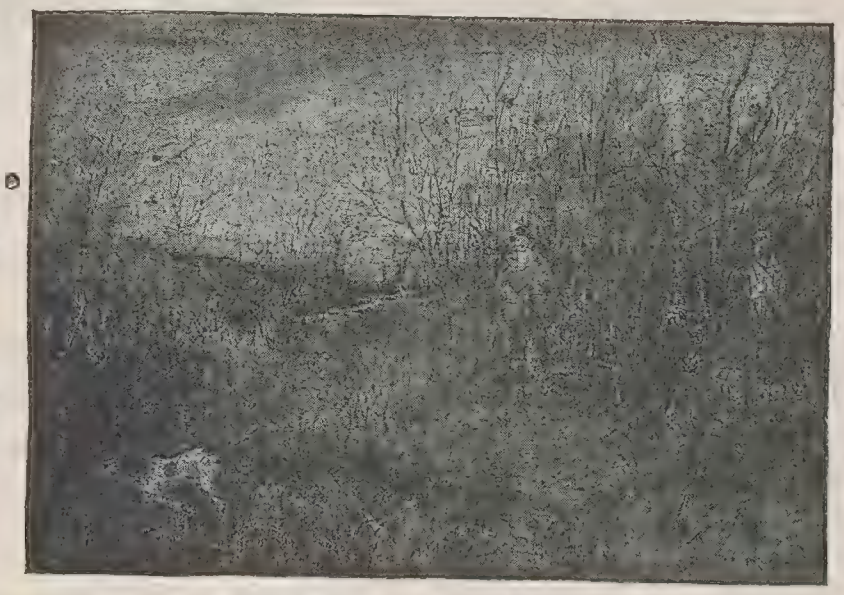
**FOREST AND STREAM PUBLISHING CO.,**

---

# American Big Game Hunting

The Book of the Boone and Crockett Club.

EDITORS: THEODORE ROOSEVELT, GEORGE BIRD GRINNELL.



Entertaining sketches of hunting and exploration by members of the Club. The handsome volume comes from the DeVinne Press; a large octavo of 345 pages, with 16 full page Illustrations by leading artists. Price $2.50, postpaid.

**FOREST AND STREAM PUBLISHING CO.,**

**318 Broadway, New York.**

# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

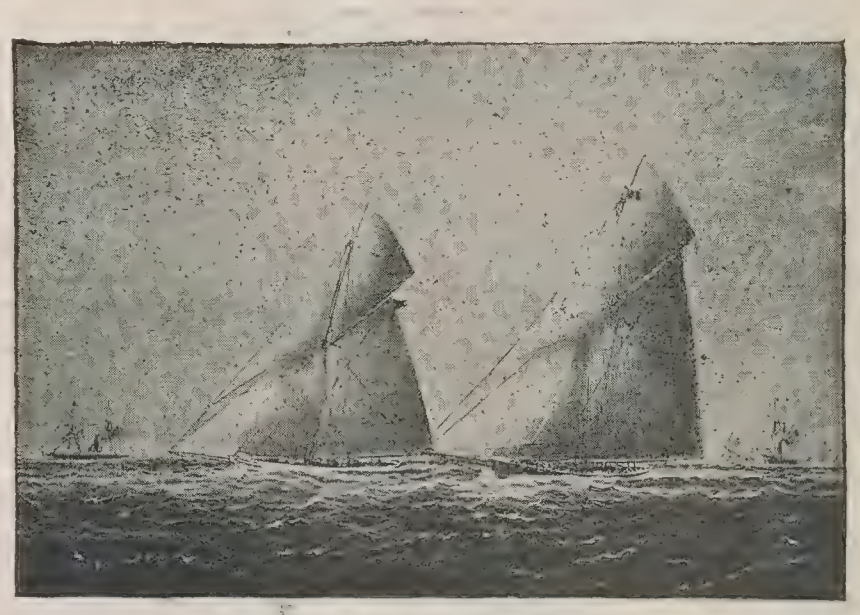
## AS PREMIUMS.

We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** *6 months and any two pictures*, **$3.**

If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.



Copies of them may be seen at this office, and inspection is invited.

BASS FISHING AT BLOCK ISLAND.

JACKSNIPE COMING IN.

VIGILANT AND VALKYRIE.

Guns, Revolvers, etc.

# Daly Guns

Are the finest finished and most carefully fitted; they

# Beat the World

For shooting qualities. Made with or without cross bolt.

WANTED.—FOUR THOROUGHBRED DOGS TO train on quail, woodcock and partridge. Satisfaction guaranteed. FRANK GRANT, Torrington, Conn. 13

**Field Trial Training**

BY LUKE W. WHITE.

**Illustrated with Portraits of Famous Field Trial Winners.**

This little book is written by a practical field trial trainer, and is the result of many years experience. The author believes in suasion rather than punishment, condemns the spike collar, and recommends a sparing use of the whip.

Paper covers, 30 pages, postpaid, 25cts.

FOREST AND STREAM PUBLISHING CO.
New York.

# FISHERMEN, ATTENTION!

# $225 in Gold Given Away!

## THE NATCHAUG SILK CO.

**will give nine big cash prizes for the following catches of fish taken during the season 1894, viz.: From the 1st day of April to the 1st day of November inclusive, with the NATCHAUG SILK FISHING LINE:**

| | |
|---|---|
| FIRST PRIZE— | $25 in Gold for the heaviest Muskallonge. |
| SECOND PRIZE— | $25 in Gold for the heaviest small-mouth Bass. |
| THIRD PRIZE— | $25 in Gold for the heaviest large-mouth Bass. |
| FOURTH PRIZE— | $25 in Gold for the heaviest Lake Trout. |
| FIFTH PRIZE— | $25 in Gold for the heaviest Brook or Mountain Trout caught in other waters than in the State of Maine. |
| SIXTH PRIZE— | $25 in Gold for the greatest variety and largest number of fresh water fish caught in one day by one person. |
| SEVENTH PRIZE— | $25 in Gold for the greatest weight of any kind of fresh water fish caught in one day by one person. |
| EIGHTH PRIZE— | $25 in Gold for the heaviest fish of any kind caught with the Natchaug Silk Line in fresh or salt water. |
| NINTH PRIZE— (SPECIAL) | $25 in Gold for the heaviest Brook Trout caught in the State of Maine. |

As the Trout caught in the lakes of Maine are acknowledged to be genuine Brook Trout, on account of the size of these fish we bar them from our Fifth Prize, and offer this as a special prize for these waters.

A sample card of our Lines sent free on application.

## CONDITIONS:

All these fish must be caught with the Natchaug Silk Fishing Line in fresh water (except Prize 8) and by fair angling.

Competitors must forward to us their full name, P. O. address, together with the description and weight of fish caught, and name of dealer from whom line was purchased, together with the name of one reputable witness affixed. On November 7th, 1894, the award will be made, and the list of successful competitors announced in the FOREST AND STREAM and the *American Field*.

All successful competitors before receiving their prizes will be required to send an affidavit as to their statement of fish caught.

If your dealer does not keep the Natchaug Silk Fishing Lines, order direct from

**THE NATCHAUG SILK CO., Willimantic, Conn.,**

# FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, $4 A YEAR. 10 CTS. A COPY. SIX MONTHS, $2.

NEW YORK, SATURDAY, SEPTEMBER 29, 1894.

VOL. XLIII.—No. 13. No. 318 BROADWAY, NEW YORK.

*For Prospectus and Advertising Rates see Page* iii.

**The FOREST AND STREAM is put to press on Tuesdays. Correspondence intended for publication should reach us by Mondays and as much earlier as may be practicable.**

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**

Remit by express money order, postal money order, or postal note. Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *PORTRAITS IN INK.*

VII.—THE DOCTOR.

OUT at all hours of day and night, pelted by storms of rain and storms of snow, chilled by bitter cold of winter and scorched by downright beams of the summer sun, our country doctor leads a hard and wearing life. He rides over roads now heavy with mire, now blocked with snow, now choking with dust.

With body so overworked and mind perplexed by difficult cases and the worry of unreasoning and exacting patients, it is a wonder how he preserves health and strength without his own physic, or maintains a cheerful spirit, yet he does both.

In an obscure corner of his office you may discover a gun, a rod and a box of fishing tackle, none too carefully kept, yet all serviceable and ready for use in their season; and these constitute his private medicine chest, with judicious draughts wherefrom he preserves the health and vigor of body and mind.

Sometimes when you meet him on his way to visit a distant patient of the continually but never dangerously ailing sort, the gun shares with him the narrow seat of the sulky, unskillfully masked under a blanket, or the red case rests between his knees, and you guess his intention of stealing an hour's shooting in some patch of roadside woods, or as much fishing in the stream that intersects his route. The entire days of such recreation that fall to his lot, lie far apart in the year.

It often happens when a day of freedom has apparently come, it slips away from him into the uncertainties of the future. Shells are loaded over night, the gun cleaned and oiled, or the rod put in order, tackle overhauled, flies arranged or bait secured. He falls asleep with a prayer for an auspicious morrow, to dream pleasant dreams of frost-painted woodlands or waters rippled by the south wind's breath and shadowless beneath a clouded sky.

The slow dawn brings an answer to his prayer, and his dreams seem about to materialize into tangible realities His horse is at the door, his gun or rod in hand, his heart is light with the thought of throwing physic to the dogs for a day, when in rushes a messenger with an urgent call to some serious case.

In an instant the promised day of recreation is changed to one of wearing toil and anxiety, but he meets the disappointment with a cheerful face and takes up the scarcely dropped burden of care without a murmur.

Indeed he has grown so accustomed to such miscarriage of his plans that he is least disappointed when most so, and hope deferred does not make his stout heart sick.

He comes home weary and worn at night, but drops in at the shoemaker's and refreshes himself with a half hour's chat of reminiscent or prospective shooting or fishing. He finds the musty atmosphere of the cobbler's den more congenial than the finer air of the Major's neat hop, and his visits are so frequent that the neighbors have ceased to ask him if the shoemaker is ailing.

The mending of bodies and the mending of soles, notwithstanding their dissimilarity, seems to bring the practitioners of the two arts into an affinity which leads both to field sports and scientific pursuits more than any other professors and craftsmen.

When at last a day arrives that leaves him free to practice the lighter arts of recreation, with what zest for them and entire abandonment of weightier duties he enters upon them.

The faculties sharpened in his regular profession are keen in the pursuit of these, and sensitive to every touch of nature. He enjoys to the utmost her beauties, discovers her secrets, and acquaints himself with the lives of her children, the wood folk and water folk whom he loves, that have grown dearer through continual longing and rare opportunity.

Far apart in the years of his professional life he breaks the links of the lengthening chain, and escapes into the great woods beyond the recall by night-bell, messenger or telegram.

His comrades tell how he revels in his brief season of liberty, when he is the life of the party, the ready deviser of expedients, the inventor of camp conveniences, the closest observer of nature, the keenest and yet the gentlest of sportsmen.

He is the better doctor for being a good sportsman, and his patients have no cause to blame him for deserting them, for he brings back to their service a clearer brain, firmer nerves and a stronger body.

### *NETTING BASS IN LAKE ONTARIO.*

COMPLAINT is made by anglers residing in the western part of this State that the fishing on the Niagara River and on Lake Ontario has been greatly injured by the taking of black bass in nets set in the lake. It is alleged that during one week a single net owner, whose operations were conducted near Four Mile Pond, caught 1,700 black bass in his nets. General complaint is made of poor fishing, which is attributed altogether to the nets. The statement has been made that such nets may be set within one mile of the shore in the lake, and anglers there make the same complaint that those on the Jersey coast do against the pound nets.

A reference, however, to Chapter 627 of the laws of New York for 1894 shows in Section 9 an amendment to an earlier law, which reads in part: "No fish shall be fished for, caught or killed in any manner or by any device except angling * * * in Lake Ontario within one mile of the shore." It would appear, therefore, that any nets set within one mile of the shore are put there in violation of the statutes and should be removed by the local game protector.

Not only should the nets themselves be placed at the distance of at least one mile from the shore, but if long wings or fences are built from the nets toward the shore with the purpose of leading the fish into the nets, these also are set in violation of the spirit, if not of the letter, of the statute. It is altogether probable that the courts would hold that such fences are a part of the nets and that their erection and maintenance is illegal.

Anglers allege that as a result of the nets and of the fences which are built leading to them, practically very few bass pass by these traps and that the destruction is so great as to threaten the absolute ruin of the fishing. It is urged that the law be so amended as to absolutely forbid any taking of bass with nets, on the ground that bass are game fish and that they afford about all the sport that is to be had in these waters.

It would seem worth the while of the local anglers' associations to investigate the facts in this matter, and to make public the results, calling to the attention of the local game protectors any violation of the law.

THE opinion has lately been expressed in our hearing that kennel matters in this country were at a low ebb and that the fondness for dogs which for some years has been so general, is a fad which has run its course. This opinion is scarcely borne out by the condition of our kennel columns, which last week reported three important dog shows and one field trial, besides a great deal of other interesting kennel news. In addition, two or three pages of news were left over for want of space to print them. It may safely be said that no matter how the fashions shall change, there will always be left plenty of people who love a good dog and who will want to read about man's oldest and best friend.

### *SNAP SHOTS.*

THE law-abiding citizen may well feel discouraged when those who are appointed to enforce the law are themselves guilty of violating it. Unfortunately this occurs not very infrequently, and often when public attention is called to it, the offending official avers that he sinned through ignorance, and that he is willing to pay his fine. This is all very well so far as it goes, but it goes only a very little way, for the mere payment of a fine counts for nothing in the matter of repairing the harm done to the cause of game protection by a prominent person who violates the game law—and is caught at it. In another column we reprint an item printed in the Toledo *Blade* of Sept. 19, which states that the Chief of Police of that city left there on Saturday, the 15th inst., for the State of Illinois and there shot quail in violation of the Illinois statute. Not only this, but—if we may judge from the account—he boasted of it on his return. At all events, the reporter who wrote the item evidently thought that the Chief of Police had done quite a smart thing. While perhaps nothing better than this is to be expected from a newspaper reporter whose main object is to make space and not to preach the observance of the law, what shall be said of a Chief of Police—an individual whose whole business is to enforce respect for and observance of the law—who leaves his own State and deliberately, with his eyes open, breaks the law of a neighboring State. To every question there are usually two sides, and we should be glad to learn that there has been any misstatement of facts in this case or that there is any explanation which will make the act of the Toledo Chief of Police seem a less grievous offense against law and morals than it now appears.

Before the next issue of FOREST AND STREAM is put to press, the shooting season will have opened in Connecticut, where only a few years ago reasonably good bags were the rule, and at the end of a day's tramp the gunner who worked hard might hope, when he came in at night, to turn out of his pockets from fifteen to twenty birds—quail, partridges and woodcock. Nowadays, however, he who follows his dog all day long, over hill, through swamp and along swale, must be content with a much more moderate recompense for his toil. If he gets eight or ten birds he feels that he has done well. Quail seem to have absolutely disappeared along the shores of Long Island Sound, woodcock are not, and ruffed grouse—though holding their own much better than the other birds—exist only in diminished numbers. Unless some action is soon taken either to restock the State or to put a stop to the shooting, the prospects are that before very long there will be absolutely no shooting. On the other hand, there are localities where the unprofitable tillage of the soil has been abandoned and the farms deserted, in which it is said that the birds have increased, and that both quail and ruffed grouse still are found in something like their old-time abundance. Connecticut is so near New York that a few years ago it was a favorite shooting ground for New York sportsmen; but many of these have given up their autumnal journeys thither, discouraged by the scarcity of the birds.

The name Gordon-Cumming is one well known in the annals of big-game hunting, though chiefly under the equator and among the beasts of the tropic. Recently, however, one of this name has started for the far north in an endeavor to penetrate to the land of the musk-ox. The travel is by canoe, and the expedition numbers only four men who carry provisions for six months. To reach the musk-ox country they must first pass through that of the barren ground caribou, which they will meet on the southern migration, and on the flesh of which they must largely depend for food. A most interesting account of life in this desolate northern land may be found by any one who is interested in this subject, in Mr. Warburton Pike's fascinating volume, "The Barren Grounds of North Canada."

The Mongolian pheasant has entered Massachusetts under State patronage. The last Legislature appropriated $150 for the importation and breeding of the birds; and the work is in charge of Fish and Game Commissioner Brackett. The appropriation does not provide for more than an humble beginning; but if the pheasants shall do as well in the East as they have in the Northwest, the few birds already received will insure an abundant stock for the future, provided they are protected.

# The Sportsman Tourist.

## BIRDS THAT PASS IN THE NIGHT.

THE glow of sunshine is gone, and the night herons have long since departed on their regular foraging expedition to the "fish ponds" in the bay. Only an occasional *quah* is heard from some straggler, as he hurries through the dusk of this quiet evening.

Were it not for "insect music," and now and again the intermittent rustle of a leaf under the touch of the light southerly air, the stillness would be complete.

The sky is beautifully clear, and the planets, as they swing far out in space, are glowing with the mellow light of early autumn. The moon, a slim crescent in the south, casts its dim light about me as I wait here for the birds.

'Tis a perfect night for the little migrants. A light southerly air to bear them on, faint moonlight to guide them, and the season, too, Sept. 12, is about the proper time for their first flight.

Hark! Here they come! Now I can hear the soft call and chirp of little voices in the sky. It falls with an indescribable charm of suggestion, this "small talk" of the little travelers. How swiftly they pass! They are gone!

There! Another flock! Crisp and silvery the tiny notes drop thro' the darkness. Seldom do I hear a voice that I may identify. The sweet sounds float in the air, but the little fellows hurry on, as though desirous of escaping recognition.

*That* was a plover! What a start his ringing call gave me, as he slipped by unseen.

There is a fascination in being alone at this hour, under the stars.

There is the added charm of mystery. It lurks in the tangle of the thickets where the shadows rest. It breathes in the damp mist of river fogs. It is voiced by the "Birds that pass in the Night." WILMOT TOWNSEND.

BAY RIDGE, N. Y., Sept. 17.

## ON THE TRAIL.

*Editor Forest and Stream:*

Most people, during some part of their lives, have been alone. But there are degrees of loneliness. I have heard a young woman sigh heavily when for a period of twenty-four or thirty-six hours there were no callers outside of the family at the fine residence of her parents. She selected first one book and then another, dropped them in despair, assailed the piano, and tried numerous other arts to pass the dragging and heavy hours. She seemed to have no recourse independent of her surroundings or her particular friends, and probably suffered more than some persons would in the most dreary desert.

In the center of a city I have found it difficult to find companionship or themes for quiet or pleasing contemplation. After the novelty of artificial surroundings has passed, nothing, it seems to me, is more difficult to endure than idleness in a great city. It is true there are many things constantly happening to attract and divert the attention, but most that occurs seems rather to weary than satisfy the spectator. To him all is artificial, and beyond man, in his constant strife and selfish competition, the paved streets, rails and wires, engines and smoke, fires and furnaces, gaudy colors and grinding wheels, seem false, heartless and superficial.

Surrounded by all the din and bustle, and in the midst of thousands of his own species, I believe a man can feel loneliest in the heart of a city. I mean a man who is not identified with such surroundings, or interested in the weal or woe of those about him, any more than those about him manifest their recognition. The "Ancient Mariner," who was

> Alone, alone—all, all alone,
> Alone on a wide, wide sea—

(unless he was a city man) could not have felt so painfully solitary if he had a few biscuits and a little fresh water with him. He had the sea and sky, the sun, moon and stars all to himself, and then he could have fished until he got a breeze.

Under present conditions, I have no doubt, cities are almost as necessary as taxes. He was a wise man who observed that "necessity is the mother of invention," but I cannot help but admire the villain who proclaimed that "invention is the mother of necessity." In my ideal Utopia, which will precede the millenium, there will be no great cities. Those who wish to lose their identity and merge themselves into a soulless sea, will please follow the illustrious example of Jonah in his contact with the whale. I would have my whales less eructive.

However, I am endeavoring to explain what it is to be alone. In the midst of the most deserted part of a great American desert there is a sign post set up. On the ghostly white board, in large letters, is the word Solitude; but as hundreds of people pass there on the railroad trains the sign is a standing falsehood. Besides there are jack-rabbits, prairie dogs, owls and coyotes there. Away out in the oceans there are islands, some of them mere rocks, protruding from fathomless depths of briny billows, but from them a sail is occasionally seen and migratory or native birds are there. As far as my knowledge reaches there is no place where man can exist and be absolutely alone. There is society everywhere, and man is alone nowhere. He may be lonely in a city and he may be lonely in a desert. There are degrees of loneliness, and these degrees are the imaginary gradations of man himself.

That man is a social animal is true—but whether he can exist without companionship of one or a thousand of his species is probably a mere habit or custom. If I was to select a man to experiment with, to see if he could survive in solitary existence for say ten years, I would select a wise man, give him Shakespeare's works and ask him to manage to endure worse society when he got back. The foregoing statements which I have made are comprised in some of my incomplete philosophy, which I expect one of these days to array more attractively, thereby using many more words.

The other day I felt unusually carnivorous, and as I had seen a large-sized deer track a short distance from my lair, I deliberately decided to go forth, like Esau of old, and get venison. I devoted the evening to putting my rifle in shape, sharpening my knife, and other aggressive and warlike preparations. About an hour before daybreak the morning following I was well up on the side of a mountain, making progress toward the top of a deep cañon. I say top because the cañon is inclined to incline more than ordinary cañons. If it only tipped up a few degrees more it would, I think, be the biggest well in the world. As it is, however, it is really open on one side, although the front has tried its utmost to close it completely. The stream which tumbles down through it is at constant war with the huge granite boulders, logs and trees which impede its course, and if the water was not so fresh and vigorous it could never continue in its eternal roaring and tumbling, I should think the trout would crawl out on the banks and rest.

I had reached a big shelf that there is near the cañon, about the time it was light enough to see to shoot, and two deer ran across it 50yds. from me. I might have shot one of them but I didn't know they were there, and I was out of breath. Besides, just as I saw the deer I stepped on some moss which felt like a snake and stepped back so quickly that I took my dog by surprise and almost went over a precipice with him. The dog is very well trained, but he saw the deer going away, and doubtless thought I was trifling, so he started out to catch the deer. He is one of those dogs which, in order to run fast, yelp every jump. Sometimes he gives out two yelps to one jump. In fact he makes so much noise with his mouth that he forgets to work his feet properly, I think.

If this dog didn't yelp when he runs he would be a better dog than he now is. He is speedy, and he made those deer run for their lives. If he had only shut his mouth for a few jumps, and had devoted the surplus energy to his legs and feet he would have made the connection. As it proved the deer got out of sight and the dog got tangled up in the noise he made and gave up the race. All the deer in the vicinity knew he was a bad dog and so they left there also.

This was rather discouraging after the hard climb I had made, but I never waste energy after I know an effort is futile. I found a good place to rest and wait for the dog to recover his voice, so I made the most of circumstances by thinking them over. I sat down under a big fir and contemplated. After I had been there an hour or so, four or five big grouse flew from a limb above my head. The dog wanted them, too, but as they flew across the cañon he only made two jumps and a few yelps, found he couldn't sail and gave it up. If I had known the grouse were just over my head for an hour I would have killed something. However, I discovered that my dog, in order to yelp well, had to be moving. Whenever he stopped going his mouth quit also. It is a fact worthy of note that dog can sit and howl, but when a dog yips and yelps it is a sign he is in motion in other respects. I bethink me of a proverb here which I will do up in a package for posterity, viz.:

> When yips the cur
> You'll see him whirr.

Whirr does not suit all dogs, but my dog whirrs—that is he goes with a sort of a whizz—especially when he wants to make so much noise that he cannot hear me call him back.

After I had discovered these good traits in the dog I began to observe that I was in a lonely, weird sort of a place. The big trees made deep shade, the stream sent up a dreamy roar, several squirrels barked in subdued tones—probably making remarks about the dog—and somehow, although the mountain, the cañon and forest were full of life and sounds, all seemed marvelously still and soothing; probably owing to the contrast caused by the opening and closing of the dog—at any rate it was a queer, wild place.

I thereupon fell again to thinking. What a wonder is the mind of man and how unceasingly it labors! What a multitude of subjects it harbors in a day, or an hour. How few of the things it entertains are comprehended or understood; they are taken up and dropped as quickly, and thoughts pass by myriads in superficial review—reviewed by the soul, or what we call the soul—whatever that is I wondered why so many animate forms of animal and vegetable life should have been created. Must not every thing endowed with life prey upon the essence of some other living thing or creature? Ah, may not all life in plant, or beast, or bird, or man be merely but a portion of some great all-pervading and mysterious element, and no life more than an atom of the whole.

Amid the awful surroundings of oceans, mountains, storms, thunders, tempests, the myriads of orbs and planets away into infinite and unknowable space—it is sometimes strange to me that man should consider himself as a responsible being, or as a solitary and sole creation in himself. While I cannot indorse the fundamental theory of Pythagoras—that souls are shifted about from one domicile to another in the world, I am fain to believe that all life is identical—an all-pervading essence, transmitted to differing material forms—differing veins or muscles or faculties, and that in these material and superficial forms all distinction is confined.

Recalling my attention to myself, I concluded that I was a mere atom, endowed with some incomprehensible essence which animated my anatomy, and operated upon certain muscles, glands or "gray matter," and produced in me effects which I considered motion and reason. Here I was, then, carrying my soul around in a bone box that might be shattered and destroyed by a limb falling from a tree—aye, by a burr dropping from the lowest branch of a giant pine! Here I was, with the dog, prowling about with a deadly instrument, constructed by man, in a fruitless and laborious effort to prey upon some other insignificant atom of creation

My gun seemed to have lost its attractive shape, and seemed now but an iron tube with a handle to it, containing the villainous combination of sulphur, saltpeter and lead, made to deface and destroy things endowed with the mysterious and inexplicable blessing, life. I thereupon called my dog—although he always comes without calling—except when he is whirring—and set off for home.

However, I think now, I will go out again and try and get a deer. I have an inclination to exist longer. To do it I must prey upon something. I can be omnivorous for awhile, but even if I eat grass I must destroy life, for it lives, and is full of bugs besides. The fittest must survive, and, therefore, if my dog can be suppressed, I expect to bring in something about the size of a deer shortly. If this much philosophy will supply you until then, trust me to send in a more copious installment. You have intimated that you prefer prose. I could have rhymed some of this, but I defer to your excellent taste and trepidation. This final sentence I write to save the balance of this sheet of paper. You may leave it off. RANSACKER.

SHASTA MOUNTAINS, Aug. 31.

## A WOMAN'S VIEW OF IT.

TO THE masculine mind, even though only slightly balanced in favor of the ground covered by FOREST AND STREAM, there is an unfailing freshness in its weekly issue; but may I add to this another bit of praise, and say that there are just as many ladies who devour the contents of the one addressed to a certain F. F. K. as there are gentlemen? And precisely the same number await it when it has started on its missionary rounds into another county of our State.

In the sense of being ardent followers of current periodical publications we are a literary family, and how can we best talk about other than our neighbors' affairs, unless we all keep up with the same literature? If the world at large doesn't fill our minds, our own little treadmill of trading, farming, manufacturing, baking, brewing and boiling will, so we tacitly have taken the wider horizon for the limit of our view. Our shortened vision will impel us to views at hand, but with field glasses and microscope, have we not the world at our feet?

I can surely wish you "God speed" in the many paths your feet are treading, and those that are blazed, but are yet unbroken, and those, more remote, that the experienced editorial eye cannot yet discern between the giant boles blocking his sight. I read the editorials; and some of your correspondents have a rare gift at tying my eyes to their adventures; but mostly I skim through the fishing—because the fish will never take my bait—the gunning is beyond the abilities of either my brain or body; the dogs I love and fear, and I am their unswerving slave so long as they are spiritualized on paper; the yachts—ya-chets I heard a not *very* ignorant woman call them the other day—are beyond my mathematical, or mechanical, skill, and possibly you may think I have narrowed the boundaries of your usefulness. But the spirit is less captious than the latter. For what could be more intellectual than the lessons you gave us on the training of dogs? Or more graceful than those artistic lessons from nature on "Hunting Without a Gun?"

It isn't the dictionary, tradition, poetry or joints, that make either rod or pole; it is the "divine afflatus" that makes the fisherman, that electrifies his weapon. My husband, my father, my grandfather, who can wade to their waistbands all day, or lie "belly-whopper" over a dark and rich pool—dark to the eye, but rich in patience and reward to the soul—for the two-pound beauty one will bring home in the basket, they fish with rods, whether it is a fresh-cut alder or an 8oz. split bamboo, with silver gleaming joints and daintiest appointments.

May I tell you how I am an angler? It is only as fish become things of beauty and joys forever, when somebody else has tramped over field and sailed over flood, safely netted, securely bottled, and finally poured forth the contents of his vials into my aquarium; when the dust, as the children call it, has settled, the water cleared, and beneath the surface moss I see my "Johnny Roach," my pretty shiners, graceful, tidy and ceaselessly attractive, my eel, who only vouches infrequent glimpses of his lithe form, my mussels plowing their way across the sands; the delicate greens of pondwort, arrow-heads, called pond lilies, and the daintier water worts I cannot classify, and finally when the field ponds are teeming with their myriad forms of animalcu'æ, and for a few minutes we have red spiders, fancy shrimps, and millions of microscopic monsters, oh, this is my angling! This is when Walton's gentle fever burns my veins and I take a subdued delight in watching the panorama before my eyes as I lift them from sewing or reading, or go to and fro about my washing, ironing, baking, sweeping and dusting.

Thus with the prospect of a useful existence, added to your encouraging of those elements of sport that make the human heart reach out to attain other ends than a narrow, clannish life, to attain to the development of individual life, whether in bird, beast or fish, on earth, in air or water, whether in man, woman or child, I wish you all prosperity. A CONNECTICUT WOMAN

# Natural History.

## THE CATBIRD.

FROM the time when I first became interested in our common birds, I have always been especially attracted by the catbird—not because of any peculiarity in its general habits, but by reason of the song and personal character of the bird.

The catbird (*Galeoscoptes carolinensis*) is not ranked among famous song birds, but there are few bird songs more interesting than his. I take the catbird to hold the place among song birds of a serio-comic singer; his forte (if I may use such weighty term in speaking of a bird) is comedy rather than tragedy, the burlesque rather than the pathetic. If to burlesque be not his intention he shows very bad taste in his combinations, for he will render his imitation of the harsh screams of the bluejay or hawk in the same breath almost with such soft, delicate notes as those of the goldfinch, and introduce a sudden nasal *me-ew* right in the middle of a soft-toned soliloquy. The song of the catbird, like that of his gifted cousin, the mockingbird, seems to vary according to his mood, and his mood seems usually a very changeable one. He will mimic, or parody, and turn his song into every shape he can think of, and then lowering his voice, soliloquize in a sott-toned argumentative way, for perhaps half an hour at a time. He has an amusing way, too, of speaking, as it were, rather than singing the various sounds belonging to his song, and in a low-toned mysterious manner suggestive of the narration of a ghost story.

The manners of the catbird are no less interesting than his song. A prominent trait of his character is his inquisitiveness, he desires apparently to know the why and wherefore of everything he sees. As I pass through his haunts he will leave whatever he is occupied with and come out through the tree branches, not in a manner suggestive of fear, but rather to see if there is anything about me to gratify his love for the marvelous, or, I suspect, something that will amuse him, and serve as food for future ridicule. I was amused by a catbird one time in my youthful bird-catching days. The mate of a pet goldfinch having died, I took a trap cage and a call bird to a little wood much frequented by goldfinches, with the hope of replacing it. I was passing a group of cedars when a catbird came along and showed so much curiosity that for his gratification I put the cage down, and after showing him the way it worked, retreated a little to see

what he would do. He came immediately down and on it, and after examining it with much interest and amusement, he went back to his boughs, and if he did not laugh it was for lack of the necessary feelings. He swung himself about on those branches, and me-ewed and sang random selections of other bird notes in a riotously mirthful manner. The idea of the thing. And to think that any bird would be green enough to be taken in by it. Then he would come down and look at it and watch the movements of the call bird through the wires, and repeat its notes derisively.

The catbird appears to be rather more rational-minded in regard to his domestic affairs than most birds. His family are as well brought up as any bird's, but he does not apparently regard their well being as the sole object of his existence. He seems to look upon the nest building and worm hunting as an amusement rather than important occupation, judging from the way he proceeds about them. He goes about such work with a mysteriously interested manner, with an air of subdued amusement, as if he thought the whole thing a joke, but it wouldn't do to say so. And when his possessions are interfered with he shows a proper concern, but he does not usually become frantic like some birds—the robin for instance. On the contrary, he shows often on such an occasion an admirable presence of mind. He will endeavor to persuade me of the non-existence of a nest in a place I know it is with a suave dignity and show of candor, which would be convincing but for my knowledge to the contrary. C. A. TYNDALL.

## HAD ENOUGH.

WHILE stopping a few days at the Sault Ste. Marie the past summer, en route to Clear Lake, Canada, I witnessed a prize fight between a full grown mink and a red or fox squirrel—the stakes evidently being the satisfaction of seeing which should lay the other out. It was in a small shoe shop, near the hotel, just before early breakfast, while waiting for the boy to make an extra dime by giving me a "shine."

The owner of the shop was evidently fond of pets, judging by the cages of owls and other birds, with small animals lodged on shelves about the room. In one cage was a large red or fox squirrel, and on the floor near the amateur boot black was a small paper box containing a couple of young robins. While watching the job, I saw a long, slender, full grown mink dart out from beneath a bench and take a bee line for the robins. The lad excitedly exclaimed, "He's out of his cage," and struck at the mink with his brush. The robin cage was upset and one of the birds ejected, but in the scuffle the mink was driven back minus his prey. For a minute or two the mink disappeared, when I noticed him climbing a corner of the shelving beneath the red squirrel.

The moment his eyes caught a glimpse of the squirrel he darted at the cage with lightning quickness, and winding his lithe body around the wires, sought to get contact with the now highly excited prisoner. The latter chattered and bit at his foe and faced him on every turn as the mink, "not spakin' a word," rapidly traveled over the bars hunting an entrance. Blood was up on both sides—one the eager assailant and the other the desperate defender of his life. Disappearing behind the cage after half a dozen circuits, the mink in some way found a loop-hole, as the next moment the two were locked in deadly embrace inside the cage, fighting furiously. Over and over they went—a streak of black and red—shifting positions so fast it was impossible to tell where either was using his teeth or which was head and which was tail. The squirrel still kept up his now subdued chatter—too busy to strike the loud notes, while the mink maintained his ominous silence.

For several minutes the battle waxed hotly until suddenly the mink dropped on the bottom of the cage on his back, and the now maddened squirrel, with his back to his foe, angrily attacked the bars of his cage near the top. At first I thought the mink was done for, but closer inspection showed his small beadlike eyes sharply watching the squirrel's movements. He was clearly playing possum and watching for a neck hold.

Seeing an apparently favorable opening, he suddenly darted at the squirrel, and again the battle was on. Round and round they went, over and over, for another three-minute round, and again the mink dropped to the floor on his back and the squirrel resumed his attack on the bars. Neither seemed much the worse for wear and no blood stains were visible. The shop lad was in sore trouble for fear the combatants would be slain and the boss be very mad. Getting a slender iron poker, he inserted it between the bars and pressed it across the mink's body. It didn't require anybody to hold the squirrel.

When the mink got ready, the poker didn't seem to bother him much, as he was up and grappling with the squirrel in a twinkle. The fight didn't last long before the mink again lay on the bottom of the cage in his usual pugilistic attitude.

Deeming my breakfast waiting, and fearing the fight might spin out to forty rounds or more, I left the shop for the hotel. After breakfast, with two of my comrades, we went back to learn the issue of the fight. Entering, I found the mink in a small cage gnawing a piece of raw meat, and the squirrel in his own cage "sucking his thumb," which had evidently been considerably chawed during the fight. Neither seemed ready for the hospital.

Inquiring how the battle terminated, the shop boy stated that shortly after I left the boss came, and getting a small cage, opened the door and placed it opposite the open door of the squirrel cage. Seeing a way out, the mink slid himself into the small cage—saying never a word—and left the squirrel sole sovereign of his realm. The mink evidently had had enough, and the squirrel was satisfied, as he "hadn't begun that fight nohow." OLD SAM.

### Flew Through the Window.

BARTON, Vt., Sept. 19.—*Editor Forest and Stream:* I have read of instances of partridges flying against windows and breaking them, but never knew of an instance personally until this morning one flew against the window of Mr. E. E. Liddell in this village, breaking through two heavy lights of glass, the lower sash being raised, the bird striking just above the bar, breaking both lights, going through the sitting room and falling in the kitchen. Its throat was cut by the glass so that it bled to death in a few minutes, and it was served for dinner. The bird must have been going with great velocity, as both lights of glass were shattered to atoms. One also flew into the house of C. E. Hamblet this morning, breaking out a large glass, but escaped through the opening made. Both houses are in the thickly settled portion of the village, but are situated about one-half mile apart. J. W. W.

[Such cases are of course not uncommon, and seem to occur most often in early autumn, when the partridges (ruffed grouse) are shifting quarters.]

# Game Bag and Gun.

## ADIRONDACK DEER.

*Editor Forest and Stream:*

I passed three weeks of August and the first week of September of this year at a lake where I first camped nearly forty years ago. I have been a visitor to the same lake a dozen or fifteen times in the interim.

On my first visit we occupied the winter camp of the noted guide, Alvah Dunning. Now there is a comfortable house there, holding twenty-five persons, with fifty acres cleared around it and the ordinary belongings of a farm. But as regards game the region seems absolutely unchanged. Possibly the partridges are fewer, but the deer seem more numerous. During the three weeks when night-hunting was lawful, some one was out almost every night, and deer were seen or heard every time; and in four cases out of five could have been gotten if the hunter had been skillful. Four were secured during that time, which were as many as the house could use. Two of these were the largest I have ever seen in the Adirondacks and one of them would probably weigh 250lbs.

In the region drained by this particular lake, which lies at the head of a system, it was estimated by good judges there were from seventy-five to one hundred deer, which is as many as the food supply would sustain.

Among the causes which help to maintain this continued supply, I think the following may be enumerated:

First—The better observance of the game laws. There was no attempt among the eight or ten hunters in the house to violate these, except in one case. This particular person wished to begin on the 13th instead of the 15th, but he was unsuccessful until the law was up. The guides and innkeepers have discovered that every deer in the region is worth to them, as a body, about $75, and they hinder in various ways illegal shooting and over-killing on the part of ambitious visitors.

Second—Large sections have become so settled, and formerly isolated regions have so many visitors, that the deer are driven from them, and others are cleared, so that food and shelter are destroyed. The regions adjacent to the lines of lakes, on which the main travel is, sustain no deer. The space they occupy is thus greatly limited, but within this space they are as abundant as ever. A little more discomfort and some more expense are necessary to reach them, but these things will tend to preserve them.

Third—While the number of hunters is greatly increased, their skill has not increased in proportion. They are out for a good time. The waters abound with pleasure parties shouting to wake the echoes, and laughing and filling the air with strange noises, all the day: all of which tends to make the deer timid and wary, and so keeps them out of harm's way. And then they are unskillful shots, especially the women.

It has become a fad with women to shoot with the rifle. They seldom hit anything. Some make the attempt who never before had a gun in their hands. I met with one who called the stock a handle. They generally bang away half the day at targets, and then go out at night, and if a deer is seen, bang away at that, without doing any harm to the deer, except to frighten it, and make it more fearful and cautious in future.

Hounding is undoubtedly most fatal to the continued supply. A month is too long. If the use of dogs could be limited to two weeks it would probably be better—any limit would be an improvement. If the deer do not diminish under the present law, well and good. Certainly they have not diminished in secluded places, and away from the thoroughfares, during the life of a generation of hunters. W.

*Editor Forest and Stream:*

If the Adirondack deer were a blight which man sought to drive from earth, it could suffer no more unfair persecution than it has or does suffer. It is possible that I take rather a pessimistic view of the situation, but my fears that ten years more will see the deer a rarity in the paradise of New York State sportsmen, are founded on more than mere chimerical rumors.

In the first place, the deer laws are not and cannot under the existing method of enforcement be effective. A law is gauged as a law and a protection by the manner in which it is enforced, and no sportsman can tell me that either in Herkimer or Hamilton counties the laws covering illegal killing are regarded in any manner other than as a spice to the so-called sport. The authorities in whom the protecting power is vested are perhaps not to blame; I believe they attempt to do their duty, and here lies the peculiarity of the situation. How any legislator with the encephalon of a field mouse can expect that the miserable financial provision made at present can provide wardens and watchers enough to cope with the situation is beyond my humble powers of conception. How is the pot-hunter, the cur who sets traps at the drinking places, the salter or the spring-gun fiend to be foiled? Unless something further is done by legislators and done before long, the stable door will be shut too late, and what is more the horse won't be found again.

All men should have convictions and the following is one of mine. I consider hounding a sport in name only. A surer means of deer extermination does not exist; it is also an incentive to law-breaking. It has its own excuse to offer when hounds are caught running out of season. Many times this excuse has been given me, "My dogs are deer mad and have been running on their own hook." In some cases this is true, but even so—I appeal to every true sportsman—are the benefits a few derive from hounding a sufficient recompense to the few for the outrageous doe-running, fawn-tearing proclivities possessed by these brutes? Is not a menace to the means of the recreation of society a blow at society itself, and is not a human being who loses control of himself called mad, and for the safety of society locked up? Then why not, if hounding is detrimental to the breeding and spreading of the American deer, why not stop hounding?

Another menace to the deer is that animal known as the great American game hog. He kills two deer in the morning, but can not allow two more to pass by at night, and keeps as much meat as he has use for, burying the rest. You will recognize this delicious creature as a rule by his bragging; so many deer in so many hours! Perhaps you have met the type.

In my hearing a well known Bisby guide told a tale of trapping deer. The good man it appears had brought a party into the Cauchaagala wilderness, and deer being shy and scarce, he, with the whole genius of a mighty brain, set large steel traps among some lily pads at various intervals. The jolly fellow described to an admiring audience how "By ged, you couldn't beat it. I got them folks three deer in one night; broke their forelegs mostly, and I and one of the girls who wanted to shoot her deer came out and fixed them the next morning."

I endeavored to secure the young ladie's (?) name, wishing to express to her my esteem for her Diana-like ways. I was unable to do so, but made up for it in part by losing the good man who told the tale a twenty days' fishing trip into Moose River.

Salting is a pastime that even the youth of the Adirdacks often indulge in. A nice easy low-down way of securing meat it is, just the thing for a man too lazy to still-hunt. I don't believe my hand ever itched to swing a horse whip as they did one day in August, 1889. An old toothless reprobate had just told me with many a cackle how he had salted eight deer within two months, and in proof of his statement showed me the skins tacked up in his barn when he wheezed, "I'm old, an' I've the rheumatiz an' the asmay, but begosh I kin lay it out them yit."

He far from realized that his age saved him from a practical demonstration of his last words.

Something must be done, brother sportsmen, and the only thing at present to do is either for private parties or the authorities to offer the informers such large rewards that no man will dare either to evade or to break the law. A man would think twice before he attempted illegal hunting if a reward of $200 was to be the incentive for all about him to prove the crime. Let us have the remedy, may it be quickly applied, strongly administered, and the good wishes of good sportsmen go with it.

R. P. F.

## PRAIRIE CHICKENS IN THE SIXTIES.

AWAY back in 1865 I lived in what I called the chicken paradise, near the confluence of the Platt and Elkhorn rivers in Nebraska. A magnificent valley ten miles wide stretches away in the distance; and clumps of willows and box alders border the low sandy banks of the little lakes, which dot here and there the beautiful landscape. I lived about midway between the two streams on a farm, five miles from neighbors. Prairie chickens had lived and flourished here for ages, undisturbed, save by a few hunters, the freighter and emigrants on the old military road which ran hard by.

Long rows of sunflowers lined this road, producing rich nutritious seed by the bushel, on which the chickens thrived and grew fat. However, they soon learned that corn was sweeter than sunflower seed, and exactly filled a long felt want in the chicken's craw. The way they went for that corn was a surprise even to the Indians, who visited me quite often. A friendly old buck sagely remarked to me one day, as he pointed to the corn field, "Heap corn, heap chickum, pretty soon him eat white man's corn all up. Chickum heap fat"

As soon as the corn was ripe, at the first streak of dawn, a few early birds could be seen headed for the field, then as dawn developed into daylight, the air was full, and a wild rush of wings could be heard coming from every point of the compass, till they must have numbered thousands. And what a noisy lot they were, holding a regular jubilee over the wonderful discovery they had made, and taking full possession under the right of squatter sovereignty. How they did squawk and chatter about it. The din was incessant. With the rustle of the dry leaves as they chased each other about in their play, the stripping and picking of the dry shucks, the thumping of their wings on the stalks in rising up and lighting again, they frequently deceived me, and I ran out expecting to find a herd of 500 or more Texas steers ranging the field.

It was really becoming a serious matter with me, as corn was a ready sale at my door to freighters and emigrants at 50 cents a bushel. It began to look as if the old Indian had formed a correct estimate of their number and the capacity of the Nebraska chicken for storing away corn. He was a Pawnee and had learned to talk English of the soldiers at the fort. He and his squaw stopped one day to get watermelons, of which they are very fond, and I had them in such abundance I was hauling them out by the load for my cows. "Ugh!" he grunted. "Bad chickum, heap too much chickum."

At that moment a flock came sailing past. As quick as a flash he let fly two arrows, one after the other, and two chickens fell fluttering to the ground. The squaw shuffled after them, brought them back, and squatting down before the fire on which their coffee was boiling, she proceeded to roast them after having picked a portion of the largest feathers off. They ate all of the flesh and "innards;" nothing remained but a few bones. Patting his stomach, the Indian said, "No like chickum much; chickum bad; buffalo heap good."

This then explained why the birds were so numerous; the Indians only killed them when out of other meat. I spent the greater part of my time hunting and endeavoring to drive them out of the field. When I fired they would rise with a roar like distant thunder, only to circle around and alight again just out of reach of my gun. Dan Parmelee, the crack shot of the State at that time, came out with two of his friends from Omaha, and slew them by the hundreds, until I could get men to shuck my corn in order to save it.

As other game became scarce, the demand became greater for chickens in market, and the pot-hunters and trappers wiped nearly all of them out of existence. To-day they are a rare bird in that locality.

D. E. FULLER.

**Chickens, Ducks and Geese**

are going to be very plentiful along the line of the Northern Pacific this season. Make your arrangements to go and get some of them. Send Charles S. Fee, General Passenger Agent, St. Paul, Minn., 4 cents in stamps for "Natural Game Preserves of the Northwest."—*Adv.*

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

### Camp "Forest and Stream's" Fourth Annual.

II.

CHICAGO, Ill., Sept. 12.—As I remember it the editor of FOREST AND STREAM himself had promised to this year visit the tabernacle which for four years had borne the banner of the paper aloft among the oaks of Mukwonago's domain, but he didn't come, contenting himself with the promise to come next year, when very likely he will come again the same way. At any rate, he and the other enthusiasts who had agreed to join us for a time, foiled us at the last. J. B. H. and I awoke alone at sunrise of our first day in camp. Ah! but the absentees; how unfortunate they all were. They missed seeing the sun filter through the oaks that guarded our pleached spot of rest. They missed the run down the hill and the plunge into the cold lake, here all the colder by reason of the springs at the foot of our hill. They missed the curling blue of our little morning fire, and missed also the diamonds on the grass, and the big fox-squirrel on the rail fence, and the fat woodchuck at breakfast as of yore upon the stony side of the hill beyond us. They missed—last of all, the breakfast of red hot bacon and eggs, good bread and butter fresh from our icy spring and cold and firm as ever on earth butter gets to be. They missed the stirring fragrance of the morning cup of coffee and the crispness of potatoes absolutely boneless. In short, they missed, and I am sorry for them all because they missed it, the first morning in camp. Perhaps the first meal, or the first night in camp, is not after all so glorious, so delicious, so absolutely best as the first morning in camp. Indeed, perhaps not even the first morning is so good as the next morning, or the next. Where each moment slips in golden grooves along an accelerating path of pleasure, and every breath you draw is happier than the one before it, who shall say where, what or at what time or station anything is best. It is all best, after we have lost our yardsticks of comparison.

After breakfast we did not at once joint our rods and rush down without washing the dishes to begin the labor of going fishing. Nay, of such are the ways of only the careless uncultured members of the craft. In Camp FOREST AND STREAM all is done decently and in order, with no boyish haste or undue dignity. J. B. H. knew perfectly well that the bass were there, waiting for him to come and catch them. He knew the exact corner of the lake, and the precise spot in that corner, where he would coax out a lusty fellow in his first few casts. He knew we would not need any fish to eat before supper time, and knew very well that a bass taken just before supper time and cooked under protest, so to speak, was better eating than one killed early in the day. J. B. H., I am glad to say, is one of those few generous and kindly souls whose logic does not include the supposistion that dead fish will stock future waters. For him quality of sport and not quantity is the jewel to be sought. Our rule had always been to take daily what food we or our immediate camping neighbors needed to eat, or to put in only one or two days of the trip in a deliberate hunt for big bass, always selecting those days when the weather just exactly suited us. As three or four bass a day would make all we cared for, and as we preferred the little fellows of not over a pound weight for eating purposes, what need had we to search for better waters than these, and indeed, what need to search even had we been disposed to go out and try what we could do? I doubt not we could have killed 50lbs. or more of bass a day, many and many a day, if we had wished. But what glory is there in that? J. B. H. could see none. But the glory of a cultivated heart is a perfectly equipped and well conducted camp, and with that, in his opinion, there can nothing at all of the world in the least compare.

What we might have done that morning, then, along the rush bank where we saw two or three bass jump out just to give us a tip that they were there and waiting for us, is of no consequence. The main and immediate thing was to finish the arrangement of our camp. Before even that was the washing of the dishes. In some camps dishes are washed spasmodically. In Camp FOREST AND STREAM they are washed methodically. While J. B. H. can skin a squirrel or broil a bass better than I can, I yield the palm to no one when it comes to washing dishes, and the task has been mine exclusively ever since the building of the city.

In washing dishes I am not one of those who slosh around with a dishcloth in the hand. The water fit for washing greasy camp dishes is so hot no mortal hand can slosh therein. I always cut me a stick with a crotch on the end, and thereon, binding a voluminous rag upon the end, and covering the whole with a section of discarded landing net. There is nothing in the world so good to cut grease off a plate as a piece of fine twine netting. But before the net, I must needs get the *pièce de résistance* of my washing rag.

It happened that about four years ago J. B. H. brought into camp a pair of flannel shirts of which I could not altogether approve. As each year has rolled by, I have approved of them still less, yet each year he has fished them up out of that same old battered-up valise. This year, in casting about me for the body of my dish rag, I fell upon one of these shirts, which J. B. H. in an unguarded moment had left lying upon the tent floor. I cut the sleeve out of it, bound it on the end of my dish rag stick, and found it to serve excellently a double purpose. It made a good dish rag, and it rendered one of the shirts practically *hors du combat*. The discovery of this caused J. B. H. great grief, and he promptly hid the other shirt. Still, I reason that he will not bring it along again next year, and then if I have luck I will get a sleeve off of it, too.

After breakfast I went down and dug out our old iron spring, which we found full of oak leaves, and undiscovered, under its close cover of long grasses, by any wandering summer resort being. This spring we found deep and cold. Our glass butter jar, with its tightly-screwed top, we always kept in this spring, which was just barely short of the freezing point in coldness. Our bass we kept out in a certain reed bunk in the lake, and when we wanted one, we just pitched him a frog and hauled him in out of the cold storage. J. B. H. long bemoaned the ruining of our pet springs on the opposite shore by the hotel builders, but he came to like the water of this iron spring better than any about the lake.

The next step in our camp preparations was the building of our camp table, which the head man of our camp proceeded to construct out of some bits of board, flotsam and jetsam of the quiet Phantom regions. I rather think we had a better table this year than we ever did. We found that you can easily level up a table top by setting a pan of water on it when you are in course of the construction. Yes, we had a grand table, perhaps two feet by three in size—think of it! But we cared nothing for the expense of things.

Well, along about this time farmer Moxon came over to renew his acquaintance of other years, and he and J. B. H. had quite a good time again together talking crops and religion. That makes him popular up in Mukwonago, where he is as well known as any of the other leading citizens, though he lives 400 miles from there, and only gets there once a year, when Camp FOREST AND STREAM is in session. My recollection is that neighbor Moxon and J. B. H. talked crops and religion for about four or five hours, having a good time while I was getting the boat ready and sorting out the size of Natchaugs we intended to use for casting lines. Then I carefully put together J. B. H.'s favorite casting rod, indulging myself in a sigh of satisfaction at the silent and speedy response to a twirl of the thoroughbred Kentucky reel which is one of my cherished properties. Then I sorted out a bagful of frogs of just the correct maculation and longitudinal striation, and took a look at the sun. Well, you know a day in camp glides along. I don't just remember when we ate our lunch, we were so long. But here it was growing evening and before long the bass would go on feed. Really, I had to stop their conversation, because it is one of the rules of Camp FOREST AND STREAM that we must have fresh bass for supper the second night we spend in camp.

It may be that J. B. H.'s fingers are not as deft as they once were, or that his far more than three score years and ten have left his eyes not so bright as they once were. At any rate he begins his fishing every year with a battle royal with the limber-jointed thoroughbred Kentucky casting reel. All men know what singular things a casting reel can do upon occasion. J. B. H., as I may earlier have intimated, is a deacon in the church, and always has been all his life. Sometimes I think the holding of a deaconship and a casting reel, both at the same time, must be a difficult thing. The ideas are not altogether compatible. Really, I hardly know which one J. B. H. would resign if it came to a vote, but he so far has always managed to hold on to both and usually comes out in command of the joint situation at the end of the camp. This evening, however, he had a monstrous hard wrestle with the reel, and many a frown and pucker chased across his troubled countenace. Of course, it's no good to speculate on such things, and not polite, but I sometimes wonder if the good old men we know didn't ever say a single swear word—not never, not once, not in their whole lives? I remember, once J. B. H. and the Chief-with-Two-Stomachs and myself were fishing on the creek below the dam, and the Chief caught a pickerel that bit his thumb and he said a swear word, which he wouldn't have done for a thousand dollars cold cash on the spot. But J. B. H. couldn't help laughing. Now, how could he—but perhaps this is becoming too philosophical.

Anyhow, to-night the reel wouldn't work, in spite of my sage advice to J. B. H. to put some oil on his thumb. Of course, the more exasperated you get over a casting reel, the worse it cuts up, and there you are. "I wish you'd try this thing yourself, young man," said J. B. H. after a last elegant sample of raw silk pyrotechnics. My duty in Camp FOREST AND STREAM, as we have regularly conceived it, is to wash dishes, row the boat and catch frogs. It does not extend to catching fish, and I resent this extra labor, usually putting only one rod in the boat. This time, however, I relented, because it was growing late. Taking the rod, I made a few casts among the rushes in the shallow water, and as luck would have it, almost at once had a couple of bass—nice little green, wriggly fellows, about a foot long, just right for cooking. Upon this, we cheerfully pulled for camp, I all the way reviling J. B. H. upon the indignity of having to ask another fellow to catch the fish. His placid spirit was proof against this. "We've got 'em," said he tersely, "and we'll eat 'em." Both of which propositions I am willing to set down as of established truth. We did eat 'em, and they were good.

But why set down in order incidents which did not happen in order? Why, indeed, attempt any sort of classification of life in camp, where we did nothing in regular order except our camp work, and where the great charm of existence was that we should, each day and each hour of the day do just what we felt like doing. One day we took our whole tribe of young Waukesha Indians with us, and explored the Mukwonago River below the dam as far as the Fox River. Here we discovered great numbers of small-mouth bass, some ancient hoary fellows, with leisurely habits and much portliness of person, but it was warm and we could only get two to rise to the fly (the Johnson-fancy), both of which lived long enough to wish they hadn't. But the shallow, weedy stream never had much attractions for the senior member of the firm, and we went there no more, though bearing the big small-mouths long in memory.

One morning our young neighbors on the hill announced their intention of returning home. They said they didn't want to go, but had to, though they were reticent as to the actual reasons. They had been living strictly on their own resources, as became young woodsmen, but of late their diet had dwindled down to bread and milk, and I think they longed for the flesh pots of their Waukesha homes. The year before this the extreme scarcity of frogs had led us to pay these boys the fabulous price of 30 or even 35 cents a dozen. This year, alas! for them, frogs were all too abundant, and under the inexorable laws of political economy, the abundant supply cut down the demand. Six boys couldn't live on 20 cents a day, and the industrial panic broke up their little community, much to our regret. We gave such relief as we could by way of canned tomatoes, jam, etc., but it could not avail. They were too hungry and too many, and the inevitable had to happen.

One of the boys, a tough and hardy youngster, in his early teens, by name of Ben Bugbee, was made of sterner stuff than the others, and refused to abandon the fort. He stayed on alone in the big wall tent, living on supplies which he obtained in some mysterious manner. J. B. H., who is always disposed to talk to boys, formed an admiration for the lad who wouldn't go home, and we finally concluded that Ben was about the right sort of stuff, moved him over bodily into our camp, thereby making him probably the happiest boy in Wisconsin, for reasons which I shall later on disclose.

If Ben had done nothing but tell us about the little perch he would have earned a right to our gratitude. We had been eating bass, and the boys had been eating perch, little fellows about 4in. long, which they found ever ready, in any weather or at any time of the day, to yield to the blandishment of a hook dangled over one particular weed bed. "You want to catch the little ones," said Ben, "not longer than your finger. The big ones aren't good." Following his advice, we caught eighteen little baby perch one evening, just big enough to fill a skillet, with their tails all turned nicely to the center. We carefully rejected all croppies, rock bass and large perch which annoyed us by getting hooked while we were after the small perch. We found that these little fellows fried in fine bread dust and served on a hot plate, still with their tails pointing centerward, and garnished with fine strips of fried bacon, made absolutely the best fish we could find in the lakes. They were of just that size you can eat bones and all, and were delicious fried brown and crisp, as our chief cook turned them out. After that we often went out and caught our regulation dozen and a half of baby perch when we happened to want something exceptionally good. Until Ben insisted on our trying this dish, we had never bothered with any fish but bass.

We discovered among other things that the caddis fly cases were coming ashore in considerable numbers one morning, and that reminded us of certain suspicious splashing we had been hearing of nights among the rushes in front of our camp. We took the hint at once, and thereafter for several nights we had furious fun with the fly-rods, just after dusk, when the fish of all sorts, from sunfish and rock bass up to black bass, were feeding on the caddis as they rose. This sport nearly caused us to abandon our evening fishing for black bass in the reeds, though the caddis only rose for a short time each night. We were the only ones on the lake to take advantage of this fishing, which we discovered long ago.

We rediscovered one day that old maxim that necessity is the mother of invention. We had started off for the Fox River, where we had always had good sport with the small-mouths. It was a walk of three miles and back, but J. B. H. said he didn't mind that. Remembering our earlier experiences as to the capriciousness of taste in the small-mouth family, we stopped by the wayside to catch some dragon flies for bait. We managed to get some of these sprightly insects on the mullein stalks, but the question arose what to do with them after we had caught them, for we had no sort of receptacle for their confinement. J. B. H. tried carrying them in his hat, but his hair not being as abundant as it once was, they tickled, and he couldn't keep them there. We solved the question by sitting down by the wayside then and there, and eating the marmalade out of a wide-mouthed marmalade pot we had along in the lunch basket. We found this did very well, though of course it was useless as long as the marmalade was in it. Then we went placidly on and caught our string of bass.

We spent a little time one day in experimenting with a new model canvas canoe which Wm. Armstrong, of Chicago, had sent up to our aquatic proof-house for trial before going into the manufacture. We found it a fine birch bark model, paddling easily, though needing a new arrangement of the stretching device. Under our advice the youngest of the "kids," a boy of about twelve, whom we knew by the name of Lud, paddled the boat out into the deep water, upset it, got on top of it, paddled it ashore, and by himself righted it and got the water out of it. All of which served to pass away an hour or so.

We discovered, in course of our further experiments, that the little Skinner single-hook casting spoon, about as big as one's finger nail, really did make a difference over the bare hook frog. We used small frogs, about 2½ to 3in. long, on this spoon, and found the bass struck far more readily at this bait than at the large frogs alone. We were troubled more with crappies; small bass, etc., in using this bait, but some of the largest bass we killed were taken on this bait, and the very biggest bass of all fell victim to it—the bass which is very apt to win the Natchaug Silk Co.'s big-mouth prize for this year. Of all which more in due season.

One day we walked five miles or so through the green woods off toward Eagle P. O., climbing to the top of the highest hill in the county, whence we could see a lovely panorama of lake, stream and wood, of green and yellow grain, of shadow and of sun. This, we thought, was as good as catching a great many fish. And that we ate our lunch by the great crystal Kellogg spring, which is so clear you cannot tell where the air leaves off and the water begins. Of this J. B. H. drank a dozen cupsful, and stood a half-hour watching the liquid silver bubble out from under a confining board which some one had placed across the stream which is formed by the mighty spring. This, in his opinion, was as good as catching several fish, and as usual he was unwilling to go away from this favorite spot, but calmly went to sleep beneath the trees. Meantime Ben and I, having discovered an exceptionally fine brand of big frog in the cold marsh near by, we set to work to accumulate a mess of frogs' legs for supper, which did not take so very long. I saw an odd and shocking thing then. We usually tapped the frog over the head with a stick, and then unceremoniously cut off his hindlegs at once, dividing him into two equal parts. Coming back over our trail, I saw something clumsily moving in the shallow water, and to my surprise and horror found it to be the front half of the running gear of a frog, which had no hindlegs about his person. This frog, or half a frog, had crawled on its two front feet a distance of several feet over the grassy bank into the water. I do not know of any Indian massacre story that comes up to this. Had I been satisfied that this plucky frog's hindlegs would ever have grown out again, I should certainly not have finished killing him.

Another day we went over to Eagle Lake, and spied also afar off from that point the distant gleam of a tiny river called Lulu Lake, which nobody knows anything about, and which we are going to explore next year. And by Billy Tuohy's kindness we were invited by Mr. Mullin to go over to his farm and catch, if we could, every last one of the big trout which for years have been growing fat since their planting in the cold spring water of the marsh in front of his house. We went over and saw the trout, but it was warm and bright and we got none. They lie out in the heart of an awful bog, and he who gets one earns it. To a long line and a grasshopper they sometimes yield—big fellows, more than 4lbs. in

weight. J. B. H. got over his boots in the ice-cold bog, and vowed we should have no more to do with trout.

And then, another day, we went over and visited once more that lovely little sheet of water hid among the hills about a mile from our camp and known now as Craig's Lake. This lake was bought not long ago by Mr. A. H. Craig, the superintendent of the county schools. I told last year how he was good enough to give our little party a special dispensation allowing us to fish in these private waters. It was here that the Chief-with-Two-Stomachs caught the 6lbs. 2oz. bass which last year tied the Natchaug record for big-mouths. Since our success there, marauding parties of senseless fishermen had made Mr. Craig so much trouble that he had strictly posted the lake; but when he learned that J. B. H. was again in Mukwonago, he softened his heart, told us to take our boat over and fish all we liked, and even one evening came with his wife and had a boat ride, taking home with them the biggest bass his little lake had yielded for this year.

It was a sigular thing about this bass. We only fished Craig's Lake two evenings, each time getting a nice basket of bass, but nothing over 3lbs. the first evening.

On that evening we tried with especial care the edge of the rushes on the far side of the lake, and as we passed here I had a savage strike at the little casting spoon and small frog, but the fish broke away after a vicious run into the lilies. We marked this spot down carefully, and in about three-quarters of an hour came around again. J. B. H. was using a big fat frog of most engaging personality, and he had it all figured out just how he was going to nail that fish if he raised him again. Well, we raised him all right, but J. B. H. didn't do just the way he had figured on doing. The fish struck with such surprising fury that it disconcerted even so old an angler, and instead of letting him run off with the line and swallow the frog later on, J. B. H. unthinkingly put his thumb on the reel and tried to check the fish as he started for the lily pads. There was a great surging swirl, an eddy made by we knew not what, and that was all. The slender silk line had parted, thanks to our neglect in not examining and reversing it on the reel.

"Oh, blame it all!" said J. B. H., in great distress, "that's too bad." We both sat looking at the circling swirl in the water. At length J. B. H.'s naturally cheerful disposition got the better of his gloom.

"That was no bass, young man," said he. "That was nothing but an old pickerel, and it was a big one, too. I'm sure it would weigh 10 or 12lbs. at least. It didn't run like a bass" But I had seen the gleam of the fish which had struck my bait near there, and knew it was a great bass, and thought that J. B. H. had lost the chance of his trip to land a big one, one of our old-time sort. Over this I was disconsolate.

The next evening we were skirting along exactly the opposite shore of the lake over water which we had never found very good for fish. I was casting the same little spoon which had had the honor of so many strikes the day before, using a sinker to get it down in the water, for I fancied the bass were not rising well. At once I felt a heavy, surging strike, away down deep in the water. It bent my tip down, and J. B. H. cried, "Hit him; strike him quick." We had already learned that while with big frogs the only way to hook the fish was to wait till the "second run," with the spoon and small frog the fish was nearly always lost unless we struck at the moment the fish touched the bait. I think they strike at the middle of the whole gleaming object, which, figuring from the spoon to the end of the small frog's legs, brings their upper jaw about where the point of the hook is, when the spoon stops moving they let go. Anyhow I promptly socked the hook into this creature's anatomy as hard as I could, thereby making much submarine commotion.

"I've got a big pickerel this time, sure," I said. "See how deep he runs, and how far." And then at once I had to shout to Ben to pull out into the deep water, for the fish started for the boat in a most determined rush. We could not see him or tell what his nationality, and out in that deep, clear lake, with not a thing to mar the fight of rod and fish, we for six or eight minutes had a surging, swinging, tugging, worrying fight, one of the hardest I ever saw in these waters. At length the line began to come in more easily, and I saw the fish was going to break. With a great shake of his wide jaws he went out, and three joyful shouts announced our joy. It was a big bass! Four times more he tried this same risky maneuver, but the hook held, and at length we got him in the net. As we lifted him into the boat, we saw a bit of silk gut sticking out of his mouth, and there, deep in his throat, we found the very identical hook which J. B. H. had lost in his "big pickerel" of the night before. There was no mistaking the hook, and no longer any mistaking of the fish, which had given us two and possibly three game chances and only yielded at the last after a thoroughbred fight, which made us think more of big-mouths. The usual reason why big-mouths seem not to fight better is that they are taken in weedy waters. The drag of the line on the vegetation tires them as much as the rod does. Get them in clear, deep water, and it is a different proposition.

The taking of this bass disturbed my preconceived notions about bass habits. I always thought these big fellows lay around in pretty much the same place all the time, but this fellow was just as far away as he could get from the scene of his yesterday's hostilities.

We thought our bass would weigh at least 5lbs., though singularly slim and lean, but Mr. Craig told us it only weighed 4lbs. 4oz. in town, so it wasn't so very big after all; not nearly so big as several we got the next day we went out, and not anything like the equal of our biggest one.

I can not tell all about the pleasant days we spent in thus prowling around in the out-of-way corners of this pleasant country, allowing things to go as they pleased, and not working hard at anything. But at length the time came when J. B. H. began to get uneasy after a day with the big bass. There came a windy, rough, cloudy day, which kept all the Jew salesmen indoors at the big hotel. It only started us out post haste for certain favorite waters of which we wot. J. B. H. and Ben were ahead. In half an hour I joined them. As I came up they shouted, and held aloft a monster bass the largest bass I ever saw weighed out of these waters, though not, I think, so large as the one J. B. H. caught but did not weigh the first year we came up to Mukwonago.

"Well, you've got a five-pounder," I called, hurrying up At that moment the old fellow wriggled and spread out his gills full width, and I thought I had never seen the like. J. B. H. smiled happily. "He weighs just six and three-quarters," said he. And so the pocket scales said. Yet two days after, in Chicago, on the fine silk scale of the Natchaug Silk Co., the same bass weighed more than 6¾lbs. and I think 7lbs. I think proper weighing would have set the weight at over 7lbs. the first day, for bass lose weight fast after capture. On our pocket scales he actually weighed 6¾lbs. full, a few minutes after he was taken. The weighing operation he resented by a vast shake, which set him free, he falling out of hand in the shallow water, where had his dense big-mouth brain taken action he could have swum away. But Ben plunged into the water after him, and was lucky enough to hale him forth a second time.

For after all it was Ben, our camp protégé, who caught the biggest bass of our trip and very likely the biggest of the season. Ben was using my rod and reel, and that same contemptible looking little spoon with a meager frog on the end of it. He made just one cast to the edge of a bed of grass and reeds. Out from under the hollow bank shot a dark form, and Ben, remembering our counsel, struck when he felt the first shock of the fish. And then, I well opine, did that old monarch bass wish he had let strange things alone, for such a stretching of the neck and general hustling about I imagine no bass ever had before. In the creek, below the mill, Ben had lost a great small-mouth, for his stiff cane pole had broken the hook square off in the mouth of the unfortunate fish. But now the languid, willowy action of my old rod—a played-out lancewood, which always has the luck to get the big bass, having landed the record fish of last year and a dozen others of over 5lbs.—allowed no sudden strain to break the tackle. Ben tugged desperately up, the old rod going into a horseshoe, but staying together. The bass went out of water three times, heavily, not being built for athletics of the sort, and each time Ben thought, so he said, that he could have jumped into his mouth. All the time the boy was calling to J. B. H., and the latter soon had the monster in the landing net, after a fight which was short and eminently discouraging to the bass, who was corpulent and not used to violent physical exertion.

And then we went our ways, much excited, and Ben, with a rope and a chain stringer both passed through both lips of his great fish, resolved to take no more chances with it, and frightened if it flopped its tail.

We met even more than our usual luck in our quest for big bass, and J. B. H. nearly equaled Ben's catch that day. He killed ten bass in the evening, four of which weighed 16¼lbs., one 5¼lbs., two 5lbs. each even, and the rest hardly one under 3lbs. These were actual weights, not guesses, and bass actually so heavy rarely come into any boat so often in any one day, in any water in the country. "We have had our sport," said J. B. H. "Now I am ready to go home."

Having more bass than we could use, we took them over to the Phantom Inn and gave them to Dr. Ennis's folks for use on the hotel table. The entire place was in a flutter as we lugged the enormous string up from the landing.

"My chracious!" said the Sheeny salesmen, as Ben laid down his big one. "Vere you getch 'im? Vat you got 'im mit?" And smilingly we told them that we caught this bass out in the grass, chased it up a tree, and finally killed it with a club. "I go me out to-morrow by that same blace," said one of them, irrelevantly. And on the morrow every boat at the hotel was rented.

But it would do our friend of Israel no good to go him out by the same place, even if he knew where the same place was, which he doesn't. The big bass will wait now till next year, when J. B. H. comes again. They always wait for him. Perhaps then we will have another head to add to the preserved head of the big bass Mr. Stanton, manager of the Natchaug Silk Co. here, now has of the FOREST AND STREAM bass of 1894—a bass which I doubt not even now causes commotion in youthful circles in Waukesha. For Ben's sake, I hope the bass wins the $25 prize.

"I never saw a bass like it," said Mr. Stanton, "never in all my life."

I rarely have either, if indeed ever. And after all, it is very likely that 1895 will see the fifth annual Camp FOREST AND STREAM go to the shores of Phantom, in the land of Mukwonago; for though there may be better places for us, we do not know where they are. We know the oaks, and the grass, and the water, and we know the secrets of the bass, whom may beneficent Nature always shield from the sons of Israel and preserve for men who only want a few.

E. HOUGH.

909 SECURITY BUILDING, Chicago.

### Progress of the Rail Season.

THE rail season opened with much promise and more birds than usual were reared on near-by marshes. It did not take very long, however, for the gunners to kill off these birds, and as the weather has been so warm very few migratory birds came from the North during the first half of September to take the place of those which had been killed. The two days' storm of last week brought on quite a flight, however, and as the tides were good a great many birds were killed. Reports from the Hackensack meadows give boats of from 15 to 37 birds in a tide, as the following scores show: Dr. Curry 37, ex-Senator Griggs of Paterson 30, W. F. Ryle 31, G. W. Van Buskirk 30, W. Cronkhite 25 and George Seiss 28. Mr. Van Buskirk secured a king rail, but whether it was a salt-water marsh hen or one of the gallinules is not stated.

PRESTON, Conn., Sept. 21.—*Editor Forest and Stream:* The rail season is here and these toothsome little birds are quite plentiful in this vicinity. J. R. Robbins, ex-Game Warden of Norwich, and A. F. Hale of New London, were on the marshes along the Connecticut River Tuesday, and on one tide bagged 174 birds; 100 birds went to Mr. Robbins and the remainder to his campanion. Smaller bags are often reported but it is doubtful if Mr. Robbins's bag of 100 birds on one tide is beaten this season.

E. M. BROWN.

### Prairie Chickens.

RECENT reports received by the Chicago, Milwaukee & St. Paul Railway from stations in the prairie chicken country of Minnesota and South Dakota all indicate a prospect of the best hunting for years. Chickens are very plentiful and in fine condition. Duck shooting prospects are also good. Full information can be had by addressing Ticket Agent, Chicago, Milwaukee & St. Paul Railway, 207 Clark street, Chicago.—*Adv.*

## TEXAS AND THE SOUTHWEST.

AT the present writing (Sept. 17) a norther is on and a great many blue-wing teal have been on the wing for the past week. One party killed sixty to two guns, another thirty-five to two guns, and reports from all the lagoons in this region show that the web-foot paddlers are at work in the shallow feeding grounds.

### All Females in the Fall.

If any one should stop and take notice of it he would find that the plumage of the blue-wing drake does not develop until late in the winter. I have seen a blue-wing drake in the fall, that is, to know the bird's gender by his plumage. They all look alike until the latter part of November, when the bright feathers come out on the drakes.

### Moody's Rice Farm

Is in full blast. The single strand of wire fence has been rescued from the mud wherein it has lain all summer, the "Keep oud of dis field" signs doubled in number and the Colonel expects to ornament the rice cane with neat glass designs bearing the dread "Keep off the grass" legend, for fear that some sportsmen might invade the sacred precincts of the canvasback rice farm.

The hired duck assassins are also brushing up their big 10 and 8 gauges and putting in big supplies of black powder and shot, anticipating a rich harvest off the canvasback crop.

### Three Kinds of Quail.

There are three kinds of quail in southwest Texas. My friend Jacob Staff of Marshall, Texas, will never call our Texas Bob White a quail, however, as he always insists that it is a partridge, because as he says, of its migratory habits. That our Bob White migrates, there is no doubt, for where they were once very plentiful four years ago, they have been exceedingly scarce during the past three seasons, but they are returning in large numbers this year. Where they go or where they come from is unknown. One thing is certain that the localities wherein quail have been the most plentiful during the past three years' drouth are the sandy distiricts. The black lands were entirely deserted and the birds could only be found where the sand is deep and red.

Five years ago the writer came across the Massena quail in Edwards county. The bird is fully twice as large as the ordinary Virginia quail, and the dark plumage is responsible for the appellation of "black quail" which the natives have given it. It is the gamiest bird I have ever seen, lying very close to a dog. Upon putting up a coyey, which is never more than ten birds, they pitch near a stunted oak, and you will instantly conclude that the birds have made for cover, but you will be astonished to find that they are lying close to the rocks in the open and not seeking cover like the Bob White.

The blue quail is the meanest thing on earth. It is quite a good table bird, but nature has provided it with extremely long legs and short wings. If you are a good racer, you probably will find that they have wiugs, otherwise not.

### A "Sportsman's" Seine.

I don't know how true it is, but I have it from fairly reliable source, that a San Antonio sportsman who is wealthy enough to own a yacht and who keeps it on the coast, has a long 300ft. seine thereon, which is put to practical use occasionally. While there may not be much harm in drawing a seine in the Gulf of Mexico, I contend that the presence of that seine on the sportsman's yacht looks badly.

### Stop the Sale of Game.

The war cry adopted by FOREST AND STREAM meets with general approval here. Nearly every member of every club has expressed his approval of the idea. It is a good and grand one. It is comprehensive, and I really believe is the only way to actually and effectively protect game. Of course, it don't suit the pot-hunter. It isn't supposed to suit him, nor will it suit any individual who prefers to shoot game during the close seasons.

### Another Outrage.

This time it is near Boerne, about thirty miles from San Antonio. An intelligent farmer living near there had noticed a buck and doe and two fawns come up to his water tank nearly every evening. He had his eye on the buck and thought he would wait until the velvet had worn off its antlers ere he sent forth the deadly bullet. He intended to kill it later on in the season when the whether got cold. But in an unguarded moment he told a "butcher" about it, one of those small-souled, narrow-minded and self-dominated men whom you would delight in throttling. He awaited the coming of the deer at the water's edge and fired two buckshot cartridges at the doe. It hobbled away, hard hit, but the "butcher" didn't find the carcass. The humane farmer found it the next evening, stone dead, and the two fawns lying by their dead mother, endeavoring to draw nourishment from the udder that hung cold in death. Another nice picture for the hunter out of season to contemplate.

### A Big Tarpon.

State Senator Perry J. Lewis has again distinguished himself by capturing an immense tarpon at Corpus Christi. The big silver king measures 7ft. 4in., and weighed nearly 160lbs. It has been mounted and presented by Mr. Lewis to the popular general manager of the Aransas Pass Railway, Col. M. D. Monserrate, who has placed it in his office for exhibition. Col. Monserrat will send the big 'un to the Cotton Palace at Waco, which opens next month.

O. C. G.

### Nebraska Notes.

GRAFTON, Neb., Aug. 29.—*Editor Forest and Stream.* A party of six shooters left here yesterday going overland for the sand hills in the vicinity of Hyannis and Whitman with the intention of killing grouse or anything else, "as they say," for the market. There is a cold storage house at Hyannis and the owner offers large inducements for such men to come there and kill for market.

Mr. Editor, just stick another spike in that "Stop the sale of game" platform for me.

Chickens are scarce in this vicinity, but Bob White is ot e found most anywhere. There is a covey that stays in the city park, and one can hear the call "Bob White" at any time in the day. No fish to speak of are being taken from the Blue, as the seiners got in their work last spring and practically cleaned the river of anything that would stay in the seine.

DIAMOND WALT.

## DOVE SHOOTING IN KENTUCKY.

CLARKSVILLE, Tenn., Sept. 10.—*Editor Forest and Stream:* I have just finished reading Mr. Hough's experience at dove shooting in West Tennessee, and he describes it as it actually is. A dove can get away faster with more shot in him than anything I ever looked at over a gun barrel, or else I can make more clean misses at him than at any other bird. I would like to see some of our game hogs go to a dove roost for one evening's shooting. I would like to see their downcast looks as they wearily wended their homeward way, and to listen to their many excuses for not killing more birds. I'll warrant they would blame the gun, the cartridges, or something else besides their poor marksmanship.

Last week I had an invitation from Mr. Geo. Snadon, to go up to his Kentucky farm to a dove roost. So equipped with a good gun, plenty of shells loaded with nitro powder and No. 7 chilled shot, I took the train for Haydensville. George was at the depot to meet me, and we had a delightful drive over to his farm, passing through some of as fine wheat and tobacco country as the sun shines on. On the way over we picked up Walton and Watkins Northington and Harry Borders.

After dinner, preparations were made for the start, the roost being two miles distant. George and I took a buggy, the other boys going in a carriage drawn by mules. When we arrived at the roost not a dove was in sight and I was discouraged, but George reassured me by telling me that they do not come in until late, which I found to be the case. We killed a few at the ponds and in the adjoining wheat fields until the sun began to near the western horizon; then we stationed ourselves along an osage orange hedge that was nearly a mile long.

You should have been there then to see them come in! They came in droves, in pairs and singly, and I never saw as many doves in my life. At times I think there were fifty in sight at once. Doves were in front of them, doves to the right of them, doves to the left of them, and doves behind them. It was a continual bang, bang, bang. I had often heard of men shooting until their guns got so hot they couldn't hold them, but this was my first experience of that kind. I had to take my handkerchief and hold it in my left hand my gun was so hot. The next time I go I will take a forehand protector.

From sundown until dark we kept it up. The shooting was continuous as long as we could see. We lost a great many in the hedge, and as it grew dark the negro boys could not find them in the open field. When we stopped I had thirty-eight doves and two bull bats, and about seventy-five empty shells were lying around my feet. I thoroughly enjoyed every minute of the day and I am going again. I would like so much to have Mr. Hough with me. I think he is a good conscientious sportsman, and I enjoy his writings very much. My friend Snadon is a thorough Kentucky host, and does all in his power to entertain you. SLIPPERY.

## A TRIP FOR BEACH BIRDS.

BOSTON, Sept. 10.—We headed for Lieutenant Island Aug. 24—which island is part of South Wellfleet and about seventeen miles from Provincetown—in quest of beetle-heads, doe-birds, turnstones, curlews, ox-eyes, peeps or plover of any kind.

We reached the island about 4 P. M., where we were cheered by the sight of our stove waiting to have pipe fitted to it before our appetites could be appeased. Claude shinned up to the roof to run the elbow through the hole, while Brann passed up stones to wedge it tight, Glennie dashed away to the beach after driftwood and I sprinted to the pump for water.

On my way to the pump, which was only fifteen minutes' walk from our place, I was joined by a sociable bevy of mosquitoes, who gave me a warm welcome; and they made it lively for us during our stay. Night and day for two weeks they stood by us, and were full-grown and robust when we sailed away for home. I have often wondered as to what mosquitoes live upon before they espy man, poor man. We got supper very quickly, and left the cabin in charge of the ladies while we seized our trusty guns and went in quest of birds.

We found an abundance of ring-necks and beach sandpipers on our first trip, and later some bitterns. All of the beach birds were just enveloped in fat, which condition goes far to prove the healthfulness of sea air for birds as well as man. But we soon tired of gathering such small trash, and found ourselves yearning for something worthy of our metal.

Claude had his yearning partly satisfied by stopping a fine specimen of the barred owl that was chasing the dog. The breast of the bittern is used by some people here, and is pronounced very tender and palatable.

On the third day we were greeted by the cheery whistle of *Totanus melanoleucus* or "winter yellow-legs." This bird decoys very readily, and we called down the flock and captured eight of them. At no time did we find them plentiful. Brann picked up a few ruddy plover but he got all there were. We were too early for the birds and the weather was too fine. We saw just one bunch of beetle-heads during our stay, but they passed over and left us hoping, and our hopes were not realized.

We had some excellent tautog fishing out near Billingsgate Light. Securing our supply of hermit crabs for bait, with a favorable wind we could reach the Light in about an hour. On our first trip we took two barrels of tautog, ranging from 4 to 15lbs. each. And very lively sport we found it, especially when we hooked on to the 15-pounder. Our skipper took the bulk of the catch for the market, we simply keeping enough for our table. I noted a very human look about the teeth of this fish, some big fellows who had lost some of their front teeth closely resembling old people who had also dropped their incisors. I expect to hear from some injured old people pretty soon.

In FOREST AND STREAM of July 7 I expressed the wish that some lovers of shore shooting might join us in a trip to the Cape. But not until to-day, Sept. 11, have I heard from any lovers of the gun who would care to have joined us. Mr. J. M. Hartner, of Boston; Mr J. W. Babbitt, of Danvers, and Mr. George Poland, of Wakefield, have expressed a desire to be with us. But as we did not get their letters until Sept. 11, when our trip was over, I must express my regrets at not hearing from them sooner.

We will be visiting the Cape again when the geese and and ducks are about, and if any of those who failed to connect with us on this trip would like to face the exhilarating zephyrs that cavort about the Cape during the winter months we should be pleased to have them with us. We have a cottage large enough to contain a dozen with comfort. If any are desirous of getting particulars, and will promise not to be disappointed if they fail to get a trunk full of geese, they can get my address from FOREST AND STREAM, or else write me as previously.

On this trip, though we failed to secure any new specimens to add to our collections, still we had a royal good time. Between bathing in the surf, sailing and fishing, going after driftwood to replenish the fire, meekly taking buckets and lugging water and eating the pies that Virgie made, we had a jolly good time, and intend to repeat it next year. We had fresh eggs and new milk every day from the mainland, and life would have been as blissful as a dream were it not for that blood-thirsty, blood-sucking vampire who never cried quits—the infinitesimal mosquito.

Just about dusk, when night was drawing her mantle over the face of nature, one could stroll about among the hills and valleys, and be entertained by the varied voices of nature's wild childen. From the hills across the marshes came the short snappy bark of sly reynard, from the bogs and sloughs would float the harsh cry of the disturbed bittern; at your feet among the beach plum roots, was the humble mole with his muffled squeal, while from overhead near the clouds came voices and calls from feathered travelers, travelers whom we could not name, and not knowing always felt a sense of loss at our ignorance, as their voices died away in the distance.

JAY PEE.

## THE BIG GAME HUNTERS.

ON Friday of last week. Sept. 21, Gen. Nelson A. Miles left Chicago for a trip to New Mexico, where he will do some shooting. There are said to be plenty of bears where he goes, and as all the circumstances of his trip are exceptionally favorable for success, he is likely to make a killing.

Mr. W. Austin Wadsworth, who is well known as the master of foxhounds of the Genesee Valley Hunt, of Geneseo, N. Y., returned East a short time ago, after a hunt on the borders of the National Park. His trip was successful, and Mr. Wadsworth killed all the game he needed. He was greatly pleased with his new rifle, carrying the old .45-70 cartridge, and says that the elk needed only a single bullet.

A hunting party taken out by Schultz and Jackson into the main range of the Rocky Mountains found on the summit near the head of Badger Creek elk, deer and goats in fair numbers, and lots of bear signs. They saw no sheep, however. Much of the weather while they were out was bad, with snow and rain, and this prevented their giving all their time to hunting. Most of their time was spent on the high plateau from which the streams flow east and west to the Columbia and Missouri rivers.

There recently returned to Glenwood Springs, Col., after two months in the mountain, a large hunting party made up of New York men. Its members were Robert L. Gerry, son of ex-Com. Gerry of the New York Yacht Club; Dr. Russell Bellamy and Robert Oelrichs. They were accompanied by half a dozen men and had thirty-five or forty horses. Their trip included Big Fish Lake, Lost Lake and the elk country about Pagoda Peak in Routt county, as well as tributaries of Bear River. The trip was one of great interest, and included fishing, shotgun shooting and big game shooting. Mr. Gerry had a camera with him, and is reported to have secured many very interesting photographs, some of which include living game.

### New London County Rod and Gun Club.

THE County Rod and Gun Club of New London, Conn., was organized May 11, 1893, with the following officers and members: George Bindlose, President; Dr. E. L. R. Thomson, Vice-President; Chas. H. Tate, Treasurer; Stephen M. Crocker, Secretary; Enoch A. Crandall, Chas. A. Chase, John J. Gannon, Willis A. Janes, James W. Keefe, H. A. Penrose, A. G. Treigar, Wm. T. Smith, Clayton H. Redfield and John Merwin. The membership is limited to twenty, and each member must subscribe to four shares of stock in the club at $10 per share.

The club was formed for the purpose of protecting the game by enforcing the game laws, and to provide a place where the members of the club could go and enjoy themselves hunting and fishing. The club has leased a large tract of land in the town of East Lynne, about eleven miles from New London, and have erected thereon a very comfortable club house, which is large enough to accommodate ten or more members, and it is surrounded for miles by good country for hunting and fishing. There is a lake near the club house that will be stocked with bass. This lake was once a favorite stopping place for ducks, and it is hoped by sowing wild rice near the shores to draw them there again in large numbers. The quail last year were rather scarce owing to the severe winter of the year before, but there were a few coveys left, and they were not shot into last year in order that they might have a chance to increase. Partridges were plentiful, and there will be more this fall. There is also good woodcock shooting, and the members of the club are anticipating good sport when the season opens.

DREDD WARE.

### Toledo's Chief of Police.

TOLEDO, Ohio, Sept. 20.—*Editor Forest and Stream:* Inclosed please find clipping from the Toledo *Daily Blade*, of Sept. 19, which is self-explanatory. With such examples being set before a gun-ridden people is it any wonder that game is scarce?

"Chief of Police Benjamin Raitz returned to the city this morning, after a brief vacation hunting on the prairies. The chief left Toledo last Saturday in company with John Robinson, of the Lake Shore detective force, on a hunting expedition along the line of the Wabash. They went to a point in Illinois, about sixty miles east of St. Louis. They had splendid luck, securing a fine lot of prairie chickens and quail. The season for the latter is still closed in Illinois, but the chief shot a dozen for a sick friend in this city, easing his conscience that he broke the law in behalf of charity. The prairie chickens, a full bag of which the chief brought back with him, are plump and fat and fine specimens. The chief looks brown and hearty after his few days' outing, and will take hold of the duties of the office with renewed zeal."

### Sportsmen Lost in Forest Fires.

*Editor Forest and Stream:*

You will see from the inclosed clipping taken from the Hallock (Hilton county, Minn.) *Enterprise*, Sept. 14, that apprehensions of sportsmen having been caught in the terrible forest fires of Sept. 3 are not without foundation. It reads: "G. H. Tiffany, of St. Paul, while hunting here last week received word that three of his intimate friends, connected with him in the St. Paul & Duluth Railway, had perished in the flames at Hinckley. He took the next train for St. Paul."

Ex-Mayor C. D. O'Brien, of St. Paul, one of your oldest contributors, was on the ill-fated train which was consumed near Hinckley, after running the gauntlet of flames. A letter to the undersigned, just received from him, says that he and his son were both badly burned. They were *en route* from their permanent camp on the Wisconsin Brulé. C HALLOCK.

### Game Reports.

KEENE, N. H., Sept. 15.—Gray squirrels are very plentiful in this vicinity this year. The two best strings yet reported are 16 and 11, the former being the bag of one man and the latter that of two boys. Last Wednesday saw a large "grayer" in an elm in the very center of the city. Partridges and woodcock are also fairly abundant, but owing to the very warm weather so far this month there has been very little shooting. MONADNOCK.

**"Indianland and Wonderland"**

tells about some of the most interesting Indians in the Northwest, about the Yellowstone Park and other beautiful spots in the Northwest also. Send me 6 cents in stamps for it. Chas. S. Fee, General Passenger Agent Northern Pacific Railroad, St. Paul, Minn.—*Adv.*

# Sea and River Fishing.

## ANGLING NOTES.

### Architecture of Some Angling Articles.

IF the experienced angler ever reads the angling articles that it is quite the fashion now to print in the daily newspapers, he must be amused at some of them because of their peculiar construction. I do not refer to those which are supposed to give the personal experience of somebody or another in making a remarkable catch of fish, but the more pretentious articles, often illustrated with cheap cuts, supposed to be written to instruct the reader about the habits, habitat and characteristics of some particular fish, with description of the tackle for and manner of using it to catch the fish in question. In places the workmanship is as smooth as if it were adapted from a guide book, or taken bodily from a standard text book on the subject; then a bad joint will appear where some old and disused ichthyological description is spliced to the common name of the fish, or there may be gaps poorly bridged, as if the guide book had failed at a critical point, making the whole article a piece of patchwork, with some of the seams badly stitched. At this moment I have on my desk three articles of this description from three of the leading New York morning newspapers. One is written to instruct the novice in black bass fishing with the fly, and it is well written, as all these articles are, as a rule, but the writer shows the 'prentice hand in his use of terms as well as in the soundness of his advice. For instance, he advises for fly-fishing a soft-finished braided silk line "left unprotected," meaning an undressed line. For the rod, he says, "eyelets will be much better than raised guides." Why not fasten the fly to the leader with a hook and eye? The reel should have, not terra cotta or red brick, but "German silver trimmings." There is no choice given in case one wishes "trimmings" of Honiton lace or Hamburg edging, for they must be German silver. A rule worth observing is given thus: "Let all the tackle be light from tip to fly, and let that have all possible weight." Further it is soberly stated by the writer that the discussion as to whether the smoke-colored, pink or white strainless leaders are best leads to no decision."

Another article in another paper is about the lake trout, and it begins by saying, "If the lake trout could be fished for with light tackle and light rod as salmon are, the title of salmon as king of the game fishes would fade at once; but the Mackinac trout, like the salmon trout of the New York lakes, is not built for fine tackle." Then follows a lot of other rot. As the lake trout has been fished for, and caught, too, for more than twenty-five years to my personal knowledge, with finer tackle than is ever used for salmon, the observation is not of much value.

The third article concerns the ouananiche of Canada, and it reads as if it were a cousin, once removed, or that it had married into the family of a book recently published by FOREST AND STREAM. The family resemblance is so striking that I rather expected to see the book mentioned as the parent of the article.

In one place where the seam has ripped, the article says: "When fresh-run the fish is silvery like the salmon." As it is a salmon, pure and simple, this is not strange, but I am still guessing where the salmon run from, as previously the article had stated that the fish found its home in Lake St. John. Pardon my haste—it says also that this fish is "equally at home in mid air or in the depths," so it may be fresh-run from mid-air or the depths. I have said enough to give an idea of how these articles appear when constructed, and I think I have discovered how they are built, from sub-cellar to ridge-pole.

The last number of the London *Fishing Gazette* has an article by W. Carter Platts, in which he relates that the editor of the *Daily Grinder* was sitting in his office and sent for an associate or department editor of the same paper. When he appeared the following conversation took place:

"Purvis, I believe you have no practical knowledge of fishing?"

"Couldn't tell a fisherman's 'paternoster' from a 'curse'."

"Have we nobody on the staff who ever goes fishing?"

"Not a soul. But what on earth are you driving at?"

"I want some angling copy—a few good readable specials. Must have them. The public taste has taken a turn that way of late. The British public, speaking generally, does not care a hang about actual fishing, but the B. P. has at present got a decided hankering after some other fool's account of his pursuit of salmon or trout

under difficulties, and the B. P.'s fancy has got to be pandered to. The monthlies and quarterlies have taken the thing up, and the other big dailies are following in the same rut. Can you do it, Purvis, do you think?"

"Oh, if that's all you want, I'll work off a couple of columns in time for to-morrow's issue. It is the essence of simplicity. All you want is a par. from 'Father Izaak.' 'We may say of angling,' etc. Then you babble a little of murmuring streams, of lichen-clad boulders, etc., with casual reference to the unpropitious state of the weather (that is always a safe card to play (quote Johnson's 'Worm at one end and fool at the other,' showing he was utterly wrong, drunk or insane, and then prove that he never said it; trot out the old feeble witticism, 'Better to have fished and lost than never to have fished at all,' with a touching allusion to 'Hooks in the running brooks,' etc.; sling in a smattering of catch phrases and angling slang (which you can crib from back numbers of the *Fishing Gazette*); lift a little local color from a Black's Guide, etc., etc."

"Won't do, my boy. I want the real stuff with the hayseeds sticking in it—something bright and breezy, that brings a genuine whiff of the riverside into the room with it."

"Well, you'll have to get somebody outside the staff to do it."

"No, I want you to do it."

To complete the story briefly, Purvis started into the country to learn how to fish and then write about it, that his story might have the real flavor. Remittance after remittance was sent to the absent editor and no angling copy came back in return. The last paragraph reads: "When the editor of the *Grinder* wants angling copy now for his paper he gets it from a contributor to the *Fishing Gazette*."

Perhaps after all I am unwise to give this excellent recipe for angling stories so nearly in full as I have done, for the country weeklies may follow in the footsteps of the great dailies, now that the secret is out, and we will have a lot of boys growing up to men who do not know enough about fishing, from following such guides, to spit on their bait when they bob for bull pouts.

I desire to be perfectly fair in this matter, and, therefore, must pay a compliment to the gentlemen of the daily press in connection with fishing stories. At one of the tournaments of the National Rod and Reel Association in Central Park, where I was serving as one of the judges, I was introduced to a reporter for one of the New York morning papers, and he said very frankly that he was in a hole, as he had been assigned to do the tournament, and if there was one thing he knew absolutely nothing about it was fly-casting or fishing. Hurriedly I explained the thing to him, telling him to come again if he found himself fogged; but he was so quick to grasp every point and understand its relation to other features of the art, that the next morning he had three-quarters of a column in his paper, in which he not only gave the bald facts of the contest, but discussed the style and form of the casters like a veteran fly-caster of many years' standing.

### Record Black Bass.

A small-mouthed black bass was caught this season in Lake George, near Diamond Point, by Frank Laufaier, that weighed 7lbs. 2oz The weight was vouched for by Frederick Truesdale, a merchant of Hill View, a little settlement on the shore of the lake. It was claimed at the time that the fish was the largest of the species ever taken from the lake, but under date of Sept. 2, H. S. Paine, of Silver Bay, Lake George, wrote to the Lake George *Mirror* that in August, 1886, John McShattuck caught a black bass of 8lbs. 12oz. on a deep shoal near Sabbath Day Point. The fish is reported to have been caught with minnow bait on a lancewood rod of seven ounces in weight and one and one quarter hours were required to land it. Editor Lippetts prints the letter without comment, but it seems strange that a bass of this size should be sprung on an unsuspecting public eight years after the date of its capture. The Diamond Pond bass was large enough to break the record for size in Lake George without the other, and familiar as I am with the big bass of this lake and thorough as my inquiries have been among professional fishermen and others about the size of the largest bass taken, I am surprised that I never before heard of this bass weighing 8¾lbs. Nevertheless stranger things than that have happened. Why I have been so interested in searching for big bass in Lake George, is that Glen Lake, which has produced the largest small-mouthed black bass in the world, was stocked with Lake George fish, and never until this year have I heard of a bass from the parent lake weighing over 7lbs. I do not mean that literally, for years ago I did hear of two bass being caught near Balton that weighed over 8lbs. each, but my informant had been in an insane asylum (and is there now), so I was not sure that his memory was to be depended upon.

During the past week I weighed a small-mouth black bass, taken in Glen Lake by Ira Witherell and I made the weight exactly 8lbs. It is claimed that when first taken from the water the fish weighed 8¾lbs., but I do not think the scales could have been accurate, for the fish had not dried out when it came into my hands.

### Extract from a Personal Letter.

"The nets at the hatchery were put out last Monday night (10th) for the first time, when twelve trout, some four-pounders, and two salmon were taken, beating last year's record for the first night, when the nets were put out on the 14th of September. Last night only five trout were taken, but for the two nights we have had a full moon and it has been very clear, so that it is extraordinary that any fish were taken. The trout and salmon can see the nets in moonlight 5ft. away. The largest salmon ever handled here knocked one of the hatchery men down as he was taking it from the net, and leaped the net and made for deep water with a splash like the screw of a steam launch."

That is not from the superintendent of the hatchery, not from one of his men, but it is from a very charming young lady whose father has a summer cottage on the shore of a New England lake not far from a State hatchery where trout and landlocked salmon are propagated. That she takes an interest in fishculture, and can cast a fly and catch fish, sail a boat alone and unaided, or row a boat with a stroke that might put many a man to shame, is because her father is a sportsman of the highest type and believes in bringing his children up to know well all healthful and maidenly out-of-door sports that strengthen and improve both body and mind and so fit them better to live their lives in this world.

I may add in this connection, that the wife of a sportsman friend had occasion last summer to write me for some historical information concerning colonial and State fish laws which I gladly furnished, and recently she again wrote me: "Since I began my chapter of the history of this town, I have learned many interesting things upon the subject of fishing, and perhaps in consequence of it I have learned to fish. It required considerable coaching on the part of my husband before I could land my fish successfully, but one day when I caught three black bass and two pickerel in a lake near where we are spending the summer, I no longer wonder why this sport had such a fascination for the men."

### A Young Enthusiast.

Perhaps I may be pardoned if I bring this matter of woman's interest in fishing a little nearer home. During the summer my young daughter got up one day about daybreak and went fishing with her cousin, a young man just home from college. A man long in the employ of the family went with them to a black bass pond three miles away. A couple of hours after their departure it began to rain, and rained hard all day. As the hours passed and the young people did not return the mothers were in despair, and it was with difficulty that they were restrained from sending the town crier out—so to speak.

Just at dusk the carriage drove up with two of as wet and draggled young fisher people as it was ever my good fortune to see, as they were happier than prince or princess, for they had a good catch of black bass and yellow perch.

The daughter was questioned: "Why did you not come home when it began to rain?"

"The fish were biting then and I did not think anything about the rain."

"Did you take shelter anywhere when it was raining the hardest?"

"Shelter! No; why I caught a 3lbs. bass, and we sat in the boat all day and took it, hoping to catch another; and just at night I did catch one almost as big. It was a little hard for John, but I will get wet again to-morrow if I can get as many fish as I did to-day." And I said she did just right, whereupon there was a division in the family; but they did go again and again, and the young man caught a 5lbs. bass, the largest that ever came from the pond.

A. N. CHENEY.

## CANADIAN ANGLING PERMITS.

DETROIT, Mich., Sept. 19.—The fishermen of Detroit—I mean the enthusiastic amateurs who like to spend a day or two at the Flats with their rods—have been much put out of late by being approached while in Canadian waters and given the option of paying $5 for a permit or placed under arrest for breach of the Canadian fishery laws. This action of the Canadian officials has caused considerable kicking by the unthinking, and there have even been claims made that the man collecting the license money has no rights for so doing under the Canadian laws.

Some time ago George A. Johnson, secretary of the Tri-County Fish and Game Protective League and a resident of Detroit, wrote Sir Charles Tupper, Minister of Marine and Fishery of the Canadian Government. Sir Charles said that permits were required of American fishermen. A few days later Mr. Johnson received the following detailed conditions:

"The conditions on which such permits can be obtained are as follows: First, fee, $5 for a period of three months and $10 for a period of six months.

"Second, one angling permit only is issued to each applicant, and is not transferable.

"Third, only one fishing line to be used under each permit, with not more than three hooks.

"Fourth, no one is allowed under an angler's permit to catch or kill in one day more than twelve bass or pickerel, twenty trout or four maskalonge.

"Fifth, no bass to be killed measuring less than 10in. in length and no trout under 6in. in length. All fish of less size than the above to be returned to the water alive.

"Sixth, no person holding an angler's permit shall export, sell, or offer for sale, any fish caught with hook and line."

G. W. Raymond, who is at present engaged in and around the Flats issuing permits, and whom some have believed unauthorized to issue permits or make arrests for violations of the law, has full authority to do just what he has been doing. Mr. Raymond is a well known Canadian, being postmaster at Mitchell's Bay. He is the regular officer of the Province of Ontario, charged with the enforcement of the fisheries laws.

Mr. Johnson says that he believes the law a good one and that all true lovers of the sport should aid in its enforcement. Mr. Johnson believes the enforcement of the law by the Canadian Government is doing much toward protecting the fish, and it would be of advantage to American sportsmen if the laws were equally well enforced on this side of the border.

A. D. B. VAN ZANDT.

### Surf Fishing in New Jersey.

WM. W. HART, the taxidermist, has been spending his vacation at Belmar, N. J., and had good surf fishing there. On two or three occasions he took fine 3lbs. bluefish with light surf pole, common light bass line and reel. It was necessary to cast about 200 to 250ft. out into the surf with heavy 6 to 8oz. sinker, but the fish bit ravenously, and when hooked they gave lively work until landed high and dry on the sand. When the bluefish did not bite, plaice, a large species of flounder, were caught, weighing from 2 to 6lbs. The largest catch was made by Mr. Hart, which was twelve fish weighing 40lbs.

### Sheriff Hilleary's Big Haul.

As a result of complaints of unlawful fishing on Lake Lochloosa, Sheriff Hilleary, of Alachua county, and his deputies recently captured sixteen fishermen who were violatiug the fishing law. They also seized seven nets. The men were all bound over to the county court.

The sportsmen of Gainesville have signed a document in the shape of a pledge, which obligates themselves to do all in their power to enforce the game law. If the sportsmen of other towns in the State would do likewise it would be a step in the right direction.

G. A. I.

JACKSONVILLE, Fla., Sept. 12.

## CANADIAN EXPLORATION AND FISHING

*Editor Forest and Stream:*

Some exceedingly interesting facts have been made known to civilization concerning the interior of the great Labrador peninsula, and the fish and game that inhabit it by the return to Quebec of the Dominion Exploratory Survey, led by Messrs. Low and Eaton, after an absence of nearly fifteen months. They took accurate measurement of the great falls of the Hamilton River, which drops nearly 800ft in five miles, and has one sheer fall of 300ft. Then Lake Michikamaw was found to be bigger than great lake Mistassini, and quite a number of lakes were found bigger than Lake St. John. The fish in these northern waters are exceedingly plentiful, and include large whitefish, lake and brook trout, ouananiche and red and white carp. At Natvak sea trout up to 14lbs. weight are taken. Immense herds of caribou cross the northern rivers in late autumn, usually furnishing ample food supply to the Indians, who slaughter them by thousands. Their entire absence last year, which caused death by starvation of hundreds of Indians, is supposed by the aborigines to have been caused by the polluted atmosphere, due to the number of carcasses left to decay in the previous season.

Ouananiche have the most unreliable habits of any game fish in Canada. No amount of careful observation seems to warrant anybody in professing a thorough knowledge of Canadian fresh-water salmon. This year they have beaten all previous records in regard to the time they have remained in and about Lake St. John, at the head of the Grande and Petite Discharge. Upon the occasion of a very recent attempt to follow these somewhat highly educated fish amid the beautiful islands at the head of the great lake's outlet, I was privileged to enjoy the companionship of the charming angler and author, Mr. A. Nelson Cheney, of Glens Falls, and his good friend, Mr. W. D. Cleveland. We had some fishing, but to me the outing would have been one of the most enjoyable I ever had, even if I had never seen a fish during it. Mr. Cheney had heard much and received many conflicting stories respecting the ouananiche in Canada, and it will be most interesting to note what so keen and accurate an observer has to say to the readers of FOREST AND STREAM concerning the specimens that he met and vanquished during the last days in August at Lake St. John.

As illustrative of the sport afforded by our Northern trout waters just now, I clip the following item from an evening paper of this date published in this city:

"Four members of the Nonantum Fish and Game Club, consisting of Messrs. F. M. Ryder, formerly American Consul here, now of New Haven, Conn., J. T. Morse and J. T. Benham of the same city, and A. G. Henderson of New York, returned to town to-day after a couple of weeks' fishing and shooting at the club's preserves a few miles back of Lake Bouchette, where the association has a fine new club house and are building two others. The gentlemen are enthusiastsc over the sport enjoyed during the trip. An immense black bear was captured at Lake Lapeche, partridges were in abundance and half a dozen could easily be brought down with a single shot, while trout fishing with the fly in Lake de Commisaire was simply immense. Fish weighing from 1½ to 3½lbs. were easily hauled up two at a time, while one gentleman of the party broke the record by capturing at one cast two fish weighing 3¼ and 4lbs. respectively. Mr. Ryder captured the largest fish of the lot, a huge fellow weighing close on 6lbs.

E. T. D. CHAMBERS.

QUEBEC, Sept. 14.

### Big St. Lawrence Fish.

CLAYTON, Jefferson County, N. Y., Sept. 6.—*Editor Forest and Stream:* Mrs. W. R. Farrington, of Poughkeepsie, N. Y, successfully landed a 39lbs. muscallonge off Clayton on the 17th inst., which was generally conceded to be as handsome a specimen as ever seen here, and to Mrs. Farrington must be awarded the championship for the largest and finest muscallonge caught this or any other year from these waters by a lady. I have asked Mrs. F. to favor FOREST AND STREAM with a copy of the photograph of the fish, taken with herself and guide, Ed. Denny, of Clayton, and same will be mailed to you in a few days. On the same day Mr. W. R. Farrington, with Leander Denny as guide, landed a 15lbs. muscallonge.

A few days previous Mr. and Mrs. Farrington, fishing at Loughborough Lake, had a curious experience. Mrs. F. fishing with live bait hooked a large pickerel, measuring 31in. in length. Before this fish was brought to the surface there was a sudden and unusual strain on the line, and a lively tussle which lasted several minutes. Eventually landing the 31in. pickerel it was found that for a space of 20in., by actual measurement, it had been scraped, proving that a much larger fish had gorged it to that extent, as the skin was literally scraped off and the fish was bleeding from the encounter. Not being clean, deep cuts, showed it was not a larger pickerel's work, and the thing happening in deep water the occupants of the boat were unable to see what the larger fish was, but it is supposed it was an immense salmon trout. This instance may prove interesting to your readers and it can be relied on as absolutely true and unexaggerated.

J. G. FRASER.

### Connecticut Trout Prospect.

PRESTON, Conn., Sept. 21.—*Editor Forest and Stream:* The outlook for good trout fishing here the ensuing spring is gloomy indeed. After an almost unprecedented drought, the large streams are nearly dry, most of the smaller ones quite so. I know by personal observation that several of these small streams have always contained large numbers of 5 and 6in. trout, which must all have perished. Montville Brook, a fine trout stream, flowing through the township of that name is nearly dry, and the farmers along the stream, although not members of the guild or particularly friendly to the angler, are doing good work by scooping the stranded trout from the shallow places and transferring to the deep pools. Good for the farmer, and may I live to see the day when a more friendly feeling shall prevail between him and the sportsman. We are now having copious rains and the streams are filling up and the few trout that are left may winter through.

## FISHING ON THE JERSEY COAST.

ASBURY PARK, N. J., Sept. 14.—*Editor Forest and Stream:* I have spent the greater part of two weeks last past on the waters of famous old Barnegat, and while the fishing is much better than the two previous years, yet lacks much of its old time excellence. Weakfish were fairly plentiful, but not a kingfish nor a striped bass rewarded our earnest efforts. That these fish have almost disappeared from our waters is becoming painfully apparent to all. I was greatly pleased to find at all points below Forked River abundance of sea bass. They were everywhere and in prodigious numbers. At Beach Haven, in two hours' fishing, we took 83, varying in weight from ¼lb. to ½lb. each. We distributed them among a number of hack drivers at that point. While these fish are of not much interest to the angler, yet their economic value is great and their habits very interesting.

Little Egg and Great Egg Harbor bays we found swarming with porpoises, in fact, we met them as far north as Cedar Creek, a very unusual occurrence, by the way, and it may account largely for poor fishing at many points, as they feed ravenously on the weakfish. All of the last named species we took were tide runners, and we met with none of the school fish usually so abundant. Our best catch for a single day was 46.

I would advise anglers to confine their efforts to that portion of the bay lying between Toms River and Forked River, with a decided preference to Cedar Creek Point. Shedder crab for bait can be purchased at the drawbridge, and it is by all odds the best bait for bay fishing. At the present time every point along the coast is being industriously fished, and a few striped bass have been taken from our piers, while at Avon the conditions are somewhat better. James Ronan, of Trenton, has landed several, the heaviest 21½lbs., while Judge Wm. B. Guild has followed him closely in point of numbers and weight. Bluefishing is at best an uncertain quantity. An occasional school breaking in near shore has afforded some excellent sport to those who were fortunate enough to be on hand at the time.

In seeking to arrive at—if possible—a theory for the abundance of sea bass in the bay, I conversed with several captains and fishermen, and in each case they explained that the pounds were set later than usual this year, and thus the spawning fish were able to enter the bay.

The next four weeks will witness some earnest fishing along our coast, if great preparations count. We have completed arrangements for several all-night excursions, bass fishing at various points, and these should be productive of some results. Snapper fishing in Shark River claims hundreds of votaries daily. This truly delightful sport is being indulged in now by anglers who a few years ago cared nothing for its pleasures. The possibilities are great, with proper tackle and the knowledge of where, when and how to do it. The angling interests of our coasts are growing to enormous proportions, and may be classed as an important industry of the State.

LEONARD HULIT.

### With Trout in the Blue Ridge.

IT WAS not yet day, although the silver beams of the full moon lit up the country and made the mountains discernible a long way off, but I had started for a tramp along the country road, my destination being the head waters of a certain brook where I knew full well there were trout in numbers.

Soon I am at the foot of the mountain over which I must go to reach the stream. Up its steep sides winds the road, like a huge serpent, going back and forth to make the ascent possible. After a long tiresome climb I finally reach the summit; the grandeur of the scene that presented itself is beyond description. The sun is just beginning to announce the coming of the new day. Long rays of light shoot up from the east and bathe the few floating clouds in a halo of red and gold and amber, most delicate in shading, yet richer and more gorgeous than could be the conception of the beautiful to the trained artist. Down in the valley the fog rolls away before the advance of its regal enemy; like the retreat of some phantom army.

After feasting my eyes on this grand panorama of nature I made my way down a blind trail to the head of the brook. It took me but a short time to get my tackle ready and make a cast into a pretty little pool, just below where the trail crossed the stream. As the fly settled on the water there was a swirl as the first fish rose and took the lure. With a deft turn of the wrist I had him hooked, and soon in my creel. Down the stream I went, casting in riffs and pools. The fish rose well and the unwilling occupants of my creel were constantly increasing. Often in coming round a bend in the stream I surprised a pheasant, come down for its morning drink, and away it would go with a whirr and soon be lost to sight in the undergrowth of the virgin forest. Coming to a fall in the brook about eight or ten feet in height I crept to the brink and cast into the deep pool below. As the fly touched the water there was a splash, and before I had time to tighten my line the fish was up the fall and had passed between my legs. After untangling myself I succeeded in landing the plucky fellow. He was the largest of my day's catch, weighing more than a pound.

A thunder stoam came about noon and so hard did it rain that I had to seek shelter in the ruins of an old "moonshine" distillery that had long been deserted. While waiting for the rain to pass I ate lunch and took a short nap. When I awoke the storm had passed over and left the sun shining and the air much cooled. The brook now ran through such rough country that sometimes there would be a stretch of several hundred yards that I could not fish at all. The fish continued to bite, when I could find a place where the stream was accessible and my creel began to increase enormously in weight, at least it seemed to, for the day was growing into twilight. Darkness stopped my sport, so I tramped back to the house to enjoy for supper some of the fruits of my day's labor. Upon counting I found that I had taken during the day eighty-seven fine fish, having put back in the stream the little fellows.

JOHNNIE.

**New Equipment on the Pennsylvania.**

The celebrated Pennsylvania Limited was never so luxurious in all its appointments as it is at present with its splendid equipment of new cars. Every car in the train has just come out of the shops as bright and as fresh as a new coin. This is the only perfectly appointed Limited train in service between New York and Chicago.—*Adv.*

## MY TIME AGAINST HIS'N.

BOSTON, Mass., Sept, 7.—*Editor Forest and Stream:* After a few days' rest and quiet at the hospitable residence of a friend in Jefferson, N. H., I took a team from his well-filled stable and drove about forty miles to Dummer, a farming and lumber town on the Androscoggin River. The road was familiar, every rod of it, for I had passed over it many times in company with my old camping partner, genial Jack Riedell of Manchester.

When I pulled up in front of John Chandler's snug hostelry I received a cordial welcome from the ladies of the family. Inquiry for John elicited the information that he had gone up Bog Brook, and Mrs. Chandler informed me further that John was a good deal like the boy who was after the woodcock—he had got to have some trout, for in three days there was to be an excursion party from Berlin with an annual dinner in which trout was to figure to a large extent. As the twilight was rapidly approaching darkness a team was hitched up and Miss Adley, the trim young lady who loads the table with good things to eat, went after John. Half an hour showed that he would be obliged to look elsewhere for his trout.

While we were having a social smoke, John broke out, "Well, Smart, if you'll put your time against mine, I'll take one of the boys (from the farm) and we'll go into the pond." I knew that it meant a six mile walk, but I also knew it meant trout, and I closed with the offer. The next afternoon at 4:30 we looked upon the pretty pond nestled away up in the hills of Millsfield, and we also looked upon trout feeding and jumping in all directions. We soon had our rods up with a silver-doctor for stretcher and a white-miller for dropper; and as we began to cast we found that the trout were simply playing—they could hardly be called feeding, as not one in ten that jumped would try in the slightest degree to take fly. However, we managed once in a while to strike one, and by the time Bob had supper ready, I had fourteen from ¼ to ¾lbs. each. After doing justice to the "feed," pipes were lit and a sense of enjoyment settled down over the snug little camp, before which a cheerful fire was kept burning far into the night.

When it was fairly daylight we found the playful fish again enjoying their frolic of the night before, the surface of the pond, as far as we could see being continually broken by their antics. I have been where trout were pretty thick—in fact, I have seen this particular sheet of water under favorable conditions before, but I never saw them so playful as on this bright, clear morning. When the sun got over the hills it was bright and warm. I shifted my flies, using a Montreal and a professor.

During the forenoon we took it easily, going ashore several times, and when we stopped finally for dinner I had added twenty-one to my string. Scoring only the largest caught, John and Rob had as many more, and the trout problem of the Berlin High School alumni dinner was solved. Five o'clock found us out of the woods and I got away with such a supper as nearly paralyzed Miss Ellen. It was a delightful trip and the next day as I rode to Jefferson, fully rested from the six mile walk, I began to fully realize it. Another day took me to Boston, and I surprised Mrs. S. with the handsome results of my trip, getting them home in fine condition.

WM. B. SMART.

### At Artist Lake.

*Editor Forest and Stream:*

A few weeks ago D. W. Phillips, S. L. Johns and myself went for a day's outing at Artist Lake in the middle of the Island, and the good time we had more than paid for our time and expense. After we reached the lake we got our tackle in order and started in our boat, and after a few casts the fish began to strike at the fly in a manner which made our hearts beat.

Before long I heard Mr. Johns say, "Oh, I have got him this time," and sure enough, he had a beauty hooked, and then came a battle which made Johns hustle before he landed his fish. Then came Mr. Phillips's turn, and he likewise had a nice one hooked, and it made him laugh with excitement to see the line cut through the water, first one way and then another.

I did not have to wait long before I was kept busy for a while with a nice 4-pounder. After landing my fish I tried to coax another to take the fly, but met with poor success; but in the mean time Phillips and Johns were having a lot of sport, so I tried a different fly, which met with better luck, and when we got through we had about forty fish in all.

Artist Lake is a pretty sheet of water, but it is so far out of the way that it is not troubled much by anglers. Perch and black bass are the only fish that abide there, but the bass fishing is as good as you may find anywhere.

Arrived at home we had a great deal to tell about our luck. I have been once since then, and hope to go again before long.

F. B. R.

### The King Rainbow of the Gunnison.

DENVER, Col., Sept. 20.—*Editor Forest amd Stream:* In yours of Sept. 15 I notice an article on the large rainbow trout recently taken on the Gunnison River, Colorado, and being a party in this act I beg leave to correct the statement as made and give you facts.

On Aug. 29 Mayor Shove of Gunnison took with a fly the king of the rainbows. To quote from a letter which I received from Mr. Butters, who was with him: "One caught by Shove actually weighed 10lbs., and in forty-five minutes he landed him." With this letter in my pocket I left, Saturday evening, Aug. 31, for the Gunnison, as has been my custom for several years, getting Sunday and Labor Day for an outing. About noon on Sunday I got two 8¾lbs. fish and shortly after another of 5½lbs., both with a No. 6 coachman and a 7½oz. rod.

The next morning the two fish were sent to Denver to be mounted. From the larger one I had some plaster casts made, and by the bye would be glad to send you one if you would like it. On the same day Mr. Shove sent the skin of his big fish to the taxidermist, where the three of them now repose peacefully side by side.

I ask for no commiseration from "my brothers of the craft," as I am not entitled to it. I got the biggest fish there was left in the river at the time I fished it—at least as far as heard from. Since then there has been another taken that weighed 8½lbs., and I believe that within two years we will get them up to 12 and 15lbs. From the fact that they were placed in the Gunnison only about six years ago the growth is remarkable.

H. M. BOSTWICK.

### A New Phantom for Black Bass.

MY attention was called this summer to an improvement on the artificial minnow bait known as the phantom, and largely used by bass fishermen all over the country. The old sort in present use, sold at all tackle stores, are of oiled silk, very handsomely colored, and have metal fittings at head and for propelling fins. The weight of these brass trimmings is so great in proportion to the lightness of the rest of the fish. that these lures sink easily and become very annoying when trolling among thick grass or weeds, the tops of which may be only six inches below the surface. In open work, trolling or casting in clear, deep water, there is no objection to them whatever, though the white coat of the new home-made sort described below is much more conspicuous for twilight fishing.

The new pattern used by the backwoods fishermen and guides, and which I saw accomplish great results at Lake Hopatcong this season, where the fishing was the poorest known for years, is larger than most of the silk minnows, being five or six inches long and three-quarters of an inch at its greatest diamete It is whittled out of light wood, and tapered nicely to resemble the general contour of a minnow, but being rounder—more like a pike in shape than any other fish. There is no tail and no fin, save the two flanges of brass bound to the head, which act as revolving propellers. To a ring at the tail a gang of hooks is hung, and two other gangs hang from the sides, one of them being at the head. The whole is painted white and striped either with red or gray or black, with a dash of scarlet at the side to counterfeit the red fin of the striped perch, a favorite food of the bass. A swivel at the head allows the minnow to revolve easily and swiftly. The great beauty of this minnow is its buoyancy. For casting among lilypads and pickerel weed it is without an equal. Your long reach of heavy, wet line does not drag it more than an inch or so below the surface, and as you reel in a cast, it struggles along the top for all the world like a real live, gasping, wounded or frightened fish. Late in the afternoon its coloring renders it a valuable tempter, for it can be seen so clearly. Without the shadow of a doubt it is the greatest casting rig for universal use ever devised.

H. PRESCOTT BEACH.

### Bullheads vs. Bass.

MY first experience in bullhead fishing occurred on the evening of Sept. 13, 1894. We had been staying at our summer cottage, situated at South Bay, Oneida Lake, since July 19; and had had very poor fishing. Our largest catch being fifty-one perch, one bass and one pickerel.

We waited very patiently for the bass to show up; but they wouldn't. When Sept. 13 arrived we thought they surely would appear, for a year ago on that date my parents and oarsman captured fifty-one beauties; but they still refused, so we concluded to forsake them and turn our thoughts toward bullheads. So, shortly after supper one evening, we started to try our luck.

The evening was rather cool and cloudy, and the wind kept shifting from the south to the east. There was only enough wind to cause a slight ripple on the water. Bullheads will not bite on a windy evening as the boat moves too much, causing the bait to move also.

The way to fish for bullheads is to use a stiff pole, angle worms for bait; and let your line reach within 2 or 3in. of the bottom. Keep your line as still as you can and when you have a bite pull it in.

We had no sooner got our anchor out than we began to pull them in. Oh! how fast they did bite. We had twenty-six in no time and lost as many more through lack of practice in that line of fishing. I tell you they made music for a little while. It was more than sport to see them flop around. They seemed almost as gamy as our friends the bass.

After a while they stopped biting. We waited some time for them to commence again, but in vain, so we started for home about 9:30 P. M., and arrived just in time to escape the rain, with twenty-six bullheads instead of fifty-one bass. We had had a lovely time and had made no mistake in making friends with the bullheads.

"A Little Fishermaiden," MAMIE LOFTIE.

### Oil in the Delaware.

HANCOCK, Delaware County, N. Y.—*Editor Forest and Stream:* Will you kindly call the attention of the State Fish Commissioner to the flagrant violation of law by the Standard Oil Co. at this point? At the pumping station on the west branch of the Delaware, half a mile above the village of Hancock, the waste oil is allowed to flow into the river, where it forms a disgusting scum, polluting the stream for more than a mile and certainly poisonous to the fish, for large numbers of them are seen with ulcers upon them, and dead fish on the bottom are not an infrequent sight. Oil waste could be burned if a pit were provided for the purpose, and there is no excuse for the present state of affairs. The local fish and game constable is very much on hand if a poor devil is seen with a five-inch trout, or has taken one out of season, but for reasons best known to himself has permitted this illegal pollution of the river to pass uncensured. The Delaware swarms with bass and wall-eyed pike, but a season or two of conversion of its channel into a sewer for the Standard Oil Co. will make it barren of fish as a pipe line. HACKLE.

### Cast of Rainbow Trout.

MESSRS. WILLIAM MILLS & SON, of 7 Warren street, have on exhibition in their window a fine plaster cast of an 8¾lb. rainbow trout caught in the Gunnison River, Colorado, by Mr. Harry M. Bostwick, of Denver. It was taken on a No. 6 coachman fly and a 7½oz. Leonard fly rod.

**Good for Everybody.**

NEW YORK, Sept. 20.—*Forest and Stream Pub. Co.:* It is our intention to withdraw our advertisement from several other sporting papers and double our space in the FOREST AND STREAM. Our taxidermy business has increased so materially within the past year, and while no doubt much of it is due to our superior work, reasonable prices and general satisfaction to customers, we can trace without question that your paper brings us far better returns than any other advertising medium we can employ.

Kindly have your representative call in reference to enlarging our space and oblige

## FIXTURES.

### DOG SHOWS.

Oct. 2 to 5.—Danbury Agricultural Society, at Danbury, Conn. C. M. Rundle, Sec'y.

Oct. 30 to Nov. 2.—Terrier Show, by New England Kennel Club, at Country Club, Brookline, Mass. D. E. Loveland, Sec'y, 128 Tremont street, Boston.

### FIELD TRIALS.

Oct. 23.—New England Field Trial Club, Members' Sweepstake. A. R. Sharp, Sec'y, Taunton, Mass.

Nov. 5.—United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 6.—International Field Trials, at Chatham, Ont. W. B. Wells. Sec'y.

Nov. 16.—Eastern Field Trials Club, at Newton, N. C. All-Aged, Eastern Subscription and Selling Stakes. Entries close Oct. 1. W. A. Coster, Saratoga Springs, N. Y., Sec'y.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

## RHODE ISLAND DOG SHOW.

**Sept. 18 to 21. Entries 502, Dogs Benched 496.**

ONCE more has the Rhode Island Fair Association convinced themselves that their dog department not only proved one of the main attractions of the fair, but that the fixture is such a timely and popular one that their show would do credit to any kennel club in the country. Aware of this fact, which they must certainly be, it is astonishing that the fair management does not seek to co-operate more liberally with the bench show committe and its chairman, on whom devolves most of the preliminary work, to further rather than hinder such a successful undertaking.

One does not expect at a fair show to see it managed with that strict observance of particulars that marks, or should mark, shows given by independent kennel clubs. There is in these fair shows considerable red tape to unravel and a lot of obstinate committeemen and managers of other departments to tackle who think that dogs do not amount to much anyhow, and that a few fat pumpkins and a long corncob or two are vastly more interesting to the bucolic visitor. This is a mistake that was plainly shown by the crowds that passed through the dog show building at Cranston last week. The show was characterized by a snap and vim that was particularly gratifying to old show goers, proving that the show is becoming a very popular one, and if properly managed in the future, with a little more liberality in the classification of certain breeds, the Cranston fixture may be depended upon to take its place among the principal dog shows of the year.

The class of dogs on exhibition could not in many breeds be excelled at any show, and the sporting classes and fox-terriers and beagles, were particularly good, while a glance at the following names of exhibitors with whom we came in contact the first day will show the interest that is taken by prominent fanciers in the show. L. and W. Rutherford, Edward and Harry Brooks, H. H. Hunnewell, Jr., H. W. Smith, Clarence Rathbone, Renshaw Mason-Jones, G. W. H. Ritchie, W. Comstock, Frank Comstock, Dr. Foote and Mrs. Foote, A. R. Sharpe, E. M. Oldham, Dr. Kenney, C. Fred Crawford, Dr. Thurber, M. A. Viti, J. C. Sharpe, Johns H. Congdon, A. Fred Church, C. Stedman Hanks, L. Prince, R. M. Jones, R. Leslie, L. Contoit, H. Pape, Dr. Lougest, D. E. Loveland, Hollis White, H. Hanson, F. W. Chapman, H. V. Jamieson, H. Tallman, John Read and Mrs. Read, T. Aldrich, J. J. Scanlon, G. L. Tarr, G. T. Reed, W. A. Small, Mrs. Nicholson, E. H. Moore, Joe Lewis, R. L. Keach, Dr. Huidekoper, J. Robinson, A. D. Fiske, M. J. Flaherty, Frank F. Dole, Henry Jarrett, C. T. Brownell, Donald Monroe, John Brett, W. J. Turner, Alfred Heald, B. F. Lewis, George Thomas, as well as others with whom we are not personally acquainted.

The show was well managed and the judging commenced early, progressed speedily and was completed early on Wednesday morning only a few specials and the beagles being left over for the second day. The entry, as the numbers at the head of this report will show, was a solid one, composed of dogs and not duplicates, and very few puppies were exhibited. Too much praise cannot be awarded to Mr. Chas. R. Roberts on whom depended the management and preliminary work to be done and for a man entirely unacquainted with the practical running of a show the result is all the more surprising, but then he is a newspaper man and the reason is obvious. He was ably seconded by Mr. Fred Otto the superintendent in the conduct of the show as well as by the members of the bench committee, active among whom as stewards in the rings of which there were four in use, were Messrs. J. W. Lawson for Mr. Mortimer, C. B. McPhilip for Mr. Bellin and D. C. Hook, C. F. Crawford for Mr. Tallman, A. R. Sharp for John Davidson and Mr. Roberts himself for J. Otis Fellows. The judging as last year was in the open air alongside the show building which is fairly well arranged with good alley-ways, good light and plenty of ventilation. The weather clerk was generous excepting on Wednesday afternoon and night when the rain poured down in no half hearted manner. The benching is of the old fashioned solid partition style.

Spratts Patent attended to the feeding, which was directly under "Captain" Murphy's supervision. This company also had a display of their goods, with the urbane Mr. Ehrmann in charge. The "boys" seemed well pleased with the many courtesies extended to them, and for ourself we return thanks for the help and courtesies shown.

The catalogue was well arranged, although there were a good many typographical errors in names and a few dogs wrongly entered, which may be expected when entries are not made on proper blanks and get mixed up with the horse and cattle entries. The interleaved catalogues supplied to the press were worthy of imitation; the leaves were in to stay. A defective catalogue of this sort is a delusion and a snare, for the leaves that fall out and are lost are just the ones you wanted most. The bench show committee was composed of Samuel R. Roberts, chairman; C. C. Gray, Jas. W. Lawson, Johns H. Congdon, C. Fred Crawford, W. C. Codman, an old English exhibitor, and R. L. Keach. Dr. W. L. Burt, a dogman himself and whose fancy runs to bulldogs, was on the ground all the time and devoted to his duties as veterinarian.

MASTIFFS (*James Mortimer, Judge*).—Although the quality was excellent, especially the male portion of the classes, the entries were not large, Dr. Lougest furnishing six out of the nine. Ingleside Minting, in beautiful condition, had a walkover in challenge class. He has grown all round since the last show and is now a splendid specimen of the breed. Lady Diana scarcely graced her position, being almost bare of outer coat, but she has been suckling a litter and had one pup with her, a promising one, too, to drain off the milk. In open dogs there were but two entries, both repeatedly described in these columns—Emperor William and Maximilian. The former scores very much in massiveness of head and size and body, but loses behind. In Maximilian his new purchaser has a very typical dog. Colonel, hc., is a long-faced one that was lucky to be mentioned in such company. The open bitch class produced five, but there was a distinct falling off in quality. First went to Vere, who has the best front, a good deep body, well ribbed and is better and stronger in head than Gerda II., whose worst feature is her forelegs, Cerene, well known, secured three letters, but was looking thin. She will make her home in Peoria, Ill., after this show. Eider, hc., although a trifle plain in head, though fairly well shaped, not so abnormally short as some of them, stands on such good legs, has a good body and was so nicely shown that she might have changed places with Cerene at least. The kennel prize of course went to Dr. C. A. Lougest.

ST. BERNARDS (*James Mortimer, Judge*).—At first glance in looking through the catalogue we thought there would be a good display here, but taken all round the quality was mixed, and nothing new to approach the old winners. Otos' absence in challenge dogs left the battle between Altoneer and champion Kingston Regent, and it was scarcely long in doubt, for Regent looked out of shape and moves rather "dicky" these days; grand dog as he undoubtedly is, he loses to his younger and more symmetrical competitor, Altoneer, who scores in hind parts, legs, action and quality. He was thin, but nicely shown. Our old friend Lady Livingstone claimed a challenge ribbon once more; out of coat, but little the worse for wear. Open dogs brought out five, Roland, Jr., absent. There was nothing striking in the lot, and the winner eventually proved to be Columbus, second here last year. He was far away the best both in head, in his handsome coat and general make-up; his muzzle should be deeper and squarer. Second went to Prince Karl, good in front and stronger perhaps in head than the winner, but lacking his type and quality; a brindle. The others, Duke of Roxbury and Mountaineer, were given an encouraging c. apiece, the judge being in a good humor. Rough bitches (2) were decidedly weedy, Nun Bayard being the only one with any pretensions to type in head. The prizes were withheld. Kingstonian Beauty was absent.

Then came the challenge classes for smooth dogs with Melrose King and Miss Alton competitorless in each class, both were shown in good fettle considering the season of the year, Melrose King especially. Smooth dogs had four, Belisarius absent; first went to Counch an excellent fronted dog with good bone, head if broader would be good as it is deep, correct coat and markings, rather straight behind; Karl second, loses in quality and head though a big well formed dog; Ponce, vhc., is too light in muzzle and was thin and weedy looking; King George, vhc., probably got the letters for true coat, for in all other respects he is very far short of the mark, with a wretched head, bad stary eye, ears on top of head and other faults. The bitch class was better but I could not understand the placing of Melrose Judith, thin as a rail and tucked up, long weak head, slack in back, curled tail, etc., over either Scottish Ruby or Eulalie II.; Scottish Ruby scores in body, and if stronger in muzzle and not quite so houndy, her head would be a good one, excellent forelegs, broad hips and hind legs, good coat, a very fair bitch; Eulalie II., reserve, would have a good head if a little deeper in stop, it is more massive than Ruby's, but ears are two large, ribs should be better sprung and more flesh would improve her, good bone and legs; either of them can beat the winner; Miss Nellie, vhc., a brindle, has too much coat for a smooth, is light in bone, long and narrow in head, turns his feet out, good body; Lady Isabella, vhc., has a very long snipy head with little character, otherwise fair and a true smooth. Mr. E. H. Moore, of course took the kennel prize with a team showing much quality.

NEWFOUNDLANDS (*John Davidson, Judge*).—Only two entries and these decidedly moderate; heads not massive enough, being snipy and long, just ordinary black dogs. When will this grand old breed be properly represented? The little boom it received when Prince George came over seems to have died out, and the dogs we see now are just black dogs, with no true character such as a Mayor of Bingley, the best and only real good one seen on American benches. Most of these black dogs have full, light eyes, ears like St. Bernards, and more or less curly, soft coats.

GREAT DANES (*James Mortimer, Judge*).—Only one entry and that a black one with fairish head, but coarse throughout.

The English bloodhound class did not fill. It is a pity the class was not divided by sex, and if this had been done there would have been ten entries and several good specials.

DEERHOUNDS (*H. W. Smith, Judge*).—Mr. Thayer sent on five, the only entries, just sufficient to take the prizes which fell to Hillside Warrior in the challenge class, Hillside MacGregor and Raven in open dogs and Hillside Feodora and Heather in bitches, reversing last year's placing; all looked well and have been repeatedly described in these columns. Mr. Thayer deserves credit for sticking so well and faithfully to this breed; but for his continued support the breed would surely languish much more than it does at present.

RUSSIAN WOLFHOUNDS (*H. W. Smith, Judge*).—With the Seacroft and Terra Cotta kennels showing their best the quality could not be denied, though entries were few. In challenge dogs and bitches, which should certainly have been divided, Vinga, Argoss and Col. Dietz appeared. We can scarcely endorse the decision that placed Vinga first, grand bitch as she undoubtedly is; her bent foreleg, the result of the unfortunate accident at Detroit, is against her in such hot competition; she was, however, beautifully shown, and there are many that will uphold the decision. Argoss and Col. Dietz should have been split by a reserve card to one or the other. Sorvanantes and Odrooski occupied their Toronto positions in open dogs, but in bitches Riga should have been thrown out for skin disease and first given to Olivia and Lady Dietz awarded second instead of reserve. The placing of Riga and Olivia equal we cannot understand unless it be on the score of difference in type, and this was settled for the time being when Vinga beat Argoss in the challenge class. Olivia and Lady Dietz follow the type which we have always alluded to as "distinctively Russian," while Riga follows that of her sire Argoss, only more so.

GREYHOUNDS (*H. W. Smith, Judge*).—In challenge class, Bestwood Daisy, looking as dainty as ever, was placed over Gem of the Season, principally, we believe, on account of Gem's broken hind toe. In open dogs a rare-made one in Spring of the Valley, that has filled out into a really good greyhound, barring a little coarseness in head and a light eye, excellent front, ribs good, but better if a little deeper at back, good loin, exceptionally good long, broad quarters and second thighs, shoulders well placed and action perfect. Dallas, second, loses in many points to the winner. Strideaway, vhc., is big in ear, flat-ribbed, light in bone, and not strong enough in pasterns. Open bitches had three entries and the blue went to Wild Lily, a Gem of the Season—Lily of Gainsboro bitch, nicely made all round, and Chips with her broken toe and splay feet could not hope for more than second. Eureka, vhc., was lucky to get so many letters, as her head is poor, shallow in chest, feet out and faulty in off hock.

FOXHOUNDS (*J. Otis Fellows, Judge*).—There is little use in criticising these, as the diversity of type and general mediocrity do not demand it. There were dogs that were wholly English, half English, and others a mixture of every indifferent hound point. To begin with, Elite cannot beat Commodore or Ranger II. in the challenge class, though put first. It is useless to attempt criticism when there is no decided standard to go by. Elite is as much unlike Commodore or Ranger as a mule is to a horse, but the two latter have better hound properties, especially Ranger II., who is, however, a bit too heavy for American and too light for English, but has good hound properties. If Elite is right Femur should have had first instead of Elite. In open dogs (10) the well-known Deacon, another of Dr. Thurber's dogs, won, but I like his other dog Parson's head better. Second went to Glider, snipy-headed, but fairly well formed. Jowler is a fair stamp of dog, with good legs and feet. In bitches (5) first went to Daisy, last year's winner at Providence, snipy-headed and only moderate in running gear. Second, Susie B., I am not certain about as numbers were very mixed on some of these hounds. Winsome, reserve, a very fair stamp of English hound, was the truest formed hound all round of any on the bench, and in a mixed class with no restrictions as to type should have been easily first in her class.

BEAGLES (*Jos. Lewis, Judge*).—With thirty-seven entries and many of them good ones, the judge had reason to feel proud of his position. He had no sinecure, but acquitted himself well in nearly every class. Challenge dogs brought out Forest Hunter and old champion Fitzhugh Lee, once more, the latter looking little different from last year, he was beaten by the younger dog as before in cleanness of shoulders, but yields to no beagle on the bench in forelegs and general type. Topsy S. had little difficulty in scoring over the long headed and bodied Parthenia and Twintwo, as she is so much better in head and true beagle type. She was well shown too, and Twintwo looked improved from her last appearance. In open 15-inch dogs (13), we had a treat, for the three dogs that Mr. Mortimer brought over, belonging to Mr. Joachim, were in a class by themselves where type and quality is concerned; their good heads with no suspicion of snipiness, great bone and good bodies should be considered by breeders and as a cross on some of the light weedy, long bodied stock we are running to in some of the kennels' should prove of estimable benefit. First went to Ringleader, not quite true in front, to be critical, but great bone, a little more rib would improve his body and he looked light in loin at present, quarters are good and he has nice action. These dogs did not do well on the voyage over. I preferred the second prize winner, Robin, though out of shape; I am told that he had a narrow squeak for his life, being more dead than alive when taken out of his crate; he is shorter in the body and better ribbed up than the winner, has an excellent head with beautiful expression and ears, good bone and straight forelegs, good hound markings and well carried brush; with luck he will carry many a blue ribbon yet. Diamond Forest was reserve, he is well known. Raffler, vhc., another of the English dogs, is a trifle coarse and long in body, fairly good head, throws elbows out a little, but all-round is better than the average. These English dogs are by old champion Ringwood out of champion Lonely, that is now in Mr. Krueder's kennel. Lewis, vhc., is coarse in skull, stands back on pasterns and should be lower on the leg. Sport R., the Boston winner looked light, and Investigator, also vhc., is leggy, has too much stop, a bit long in head and is light in loin. In the corresponding bitch class, Wake and Blossom were absent, leaving four in the competition. First went to the winner, Gypsey A., who had the best bone and body, is getting heavy in shoulders, is throaty and muzzle should be shorter and squarer. Belle of West Chester, second, should have more substance, forelegs straight, should be better ribbed up, has a sweet head, a little more stop would improve it, and ears should throw over a little more, a flat ear on a beagle is not desirable. Flash R., reserve, looked tucked up, is faulty in head, throws her elbow a little, good ribs; she showed an honorable scar, having lost part of one ear in an argument with a woodchuck, though some one unkindly remarked that our "purple" friend had shot the piece out to save expressage—we don't believe it. Vick R. was out of it in this company, her forte is among the briers and swamps.

In open dogs under 13in. first went to Little Corporal, a nice, pert little fellow, but head too snipy and flat, overreaching skull, good front and body, but faulty in carriage of brush. Second to Blarney, who carries his tail too straight, is light and weedy in body, snipy, but better head and expression than the winner. Reserve was given to Clarion of Glenrose, whose head is not a good one; it is better, however, than the others. He stands a trifle wide in front, good body if ribs had a little more swell; showed himself poorly, but sufficient to beat either of the others handily. It is only when the decision is very close that shy showing should be so scored. The bitch class brought out six. First to the well-known Lady of Denmark, who is getting heavy in shoulder, is a bit long-faced, but nicely formed otherwise. Clio, second, is beautiful in skull and ear, a bit pinched in muzzle, but nice body and running gear; in fact, I picked her for first; shows a bit more quality, too. Spot R., that lively little hunter, deserved her reserve card; she should be straighter in front, but the rest of her make-up is all right. Gypsey Forest, vhc., is long-faced, brow too prominent and muzzle pinched, good forepart and body. Cleopatra of Glenrose has filled out nicely and deserved her letters, though her muzzle is too fine and her shoulders should be cleaner, good body but less flesh next time, Mr. Chapman. In puppy dogs (4) there were only two left in. Tim is a giant already and was put out. Little Corporal won from Kit, long-faced, fairly good in front, but, like his brother, will be too large. A fair bitch puppy in Tossie was alone and won. Glenrose Kennels took the kennel prize in a hot competition.

POINTERS (*John Davidson, Judge*).—The display of pointers, while scarcely up to last year's form, was certainly good, and some of our best were there. This time but two turned up in challenge dogs against five last year. Duke of Hessen, in better shape this time, scored over his kennel mate, Sanford Druid, in head, quality and general finish; Druid was in excellent condition. Old Woolton Game cocked her game eye at the judge and walked off with another ribbon; she keeps up well and looked quite lusty. In heavy open dogs (6) the well known Molton Banner, nicely shown, won in straightness of forelegs, rib and set on of stern, but is faulty in hocks, over Hempstead Beau, who was shown a little fat, his feet could be better and neck cleaner. Skip, reserve, is a black dog, fairly well made, bit flat in stop. Dan, vhc., has a fair head, a little too much out before the eye, is faulty in feet and pasterns. In bitches (4) the blue went to that good bitch Springside Nell, with whom, had she deeper ribs and body and a bit better muzzle little fault could be found, she was well shown. Emblem, second, is a bit houndy in head, should have more stop, good bone and front. Tolby, reserve, is rather long cast, but excellent in front, muzzle should be deeper. Lass of Kippen, vhc., is throaty, fair head, but too lippy, faulty in ear carriage and stern is set on a bit low, otherwise good.

Light-weight dogs had nine entries, one absent, Lad of Rush, well known, took the blue; he has not a show head, but is good in other parts, and was very fit. Ridgeview Prince, second, is light in body as well as loin, and slack, good front if toes were closer, fair head, should be stronger in muzzle. Springside Tammany took reserve, a little heavy in shoulders and not straight enough in front, well ribbed up and good behind, eye light and ears could be better, but all round preferred him to Prince. Rex B., vhc., has a full light eye, too much stop, fair body, feet rather flat. Kentwood, hc., is a fair sort, but light in rib and body; the others call for no particular menton. In bitches that nice bitch Hempstead Blossom, second last year, took the blue this time in rather easier competition, rare good body, feet and pasterns could be improved, very nice head and a smart bitch all over, showing much quality. Kent's Belle, second, well deserved her place, pushing the winner, a bit straight in shoulder, nice head and body. Daisy, reserve, is a little dished in face, should be better in pasterns and feet, rather light in body and leggy. Lady Lil, vhc., should have the stop better defined and muzzle squarer, nice body and legs. Only one puppy was shown, Hedgewood Lass. The Hempstead Farm Kennels took the kennel prize and Molton Banner the special for best in the show.

ENGLISH SETTERS (*W. Tallman, Judge*).—No one, with a proper conception of what the type of an English setter should be, could help being pleased with the well-filled classes and the number of good, typical heads that were to be seen on the benches. Type—not of the flap-eared, snipy-muzzled, wild-eyed sort too frequently met with nowadays,

is always strong round Boston and Providence, and this show proved no exception. There were dogs here, not one nor two, but many that were lightly built enough to suit any field enthusiast, but still retaining their quality and the sort of head we want on an English setter. Old champion Paul Gladstone again missed another ribbon, being entered for specials only; it is wonderful how well this old dog keeps up; he was twelve years old last June. In bitches there was no denying the claims of champion Blue Nell for first place over Victress Llewellyn, whom she scores so in head and hindparts and general look of quality. Open dogs dogs (23) was a very large class, and a difficult one to judge. Cactus was all right for first place, as he is a well-made dog all round, but Leonard, second, was a decidedly lucky dog, and there were several that could claim his place; he is large, long-headed and plain in such company; good legs, but more rib would improve his body. Albert Ranger, reserve, is a much better dog, a little full in brow and light in loin, otherwise of good shape, and a dog that can give Leonard points. Harry L., a very good, typical-headed son of Prince L., who is himself thick and heavy in head, but deserved mention, should be shorter in loin and have deeper back ribs, but his head is a model for type and quality, and was assuredly overlooked when in the ring. Gasseau, vhc., has another nice typical head, and should have been higher. Bald Rock, also vhc., is rather large in head but of good English type, a little throaty, but can beat Leonard all over. San Pablo, hc., has a very fair head, faulty in pasterns, and a little drooping in quarters, good ribs. Joe Brown, hc., is a trifle coarse in head and throaty, well shown in nice coat. Worsley Dude must have been surprised to get only a card, but his faulty forelegs may account for it, though it was hard on him Then there was Dad Monarch, unnoticed, heavy, but he has lots of quality and true type. Tom Aldrich showed three nice looking black native setters, but of course they are not "Anglo" enough for these days. Open bitches (11). The winners are well known, and at last John Brett was satisfied when his Maid Marion scored for first; she was in exquisite shape considering her long journeying lately. Prima Donna, another well made bitch, equally well known, came second. Flower of Sulphur, reserve, is a trifle long cast, just a shade more stop and toes should be closer, good legs and ribs. Reverdy's Leah, vhc., well deserved her letters, a nice type of bitch all over, but back a little too flat. Nellie F., vhc., droops a trifle in quarters, body should be deeper, very fair head. Monk's Nun has scarcely kept her promise; she will always be on the small side. Lilly L., hc., is not true at elbow, and none too good behind. A very fair pup in Saxon won in dogs, muzzle should be stronger and squarer. Pendennis, second, has an excellent front and bone, head a trifle coarse. Nell's Flora won in bitches, nice legs and head, loses in shoulders. Daisy Hunter II., second, is light in body yet, and more stop would improve an otherwise good head. Joseph Lewis took the kennel prize.

IRISH SETTERS (*W. Tallman, Judge*).—Here was a challenge class calculated to try the nerviest judge of "reds." Inchiquin, champion Tim, Pride of Patsy, Montauk Jr., champion Kildare, champion Kildare Glenmore, Duke Elcho and champion Seminole. To champion Kildare, the dog we have always said would wear Tim's mantle, fell the honor of winning, followed by Inchiquin, both of them well shown, while the Seminoles showed the effects of travel. In bitches champion Queen Vic could not be denied in another hot class with such matrons as champion Norna, who took the reserve card, Edna H., champion Laura B. looking fat, champion Elfreda who should be shown in better flesh, and Delphinne. In open dogs (5), one absent, Bob Jr., in beautiful feather and condition, scored; his head is a trifle coarse, but excellent body and hind parts and very pretty. Second went to Pemberton, a little plain headed, but good color and well shown. An old acquaintance in Eudora showed up once more and proved a winner in open bitches (7); if she had a little better muzzle little fault could be found with her. Lena, second, seemed in whelp; not clean cut enough in head and neck. Delloraine, reserve, I could not find. Lizzie, vhc., is small and has an English head. Mollie was also in the three letter division. Rochdale was absent in dog pups and but two came forward in bitches. It is no use saying much about them as they will be different twelve months hence.

GORDON SETTERS (*W. Tallman, Judge*).—The classes were exceptionally well filled. In challenge dogs (3), Heather York absent, first went to that smart setter Ranger B , who put out Leo B., and is better in body, cleanness of markings and rib. The well-known Princess Louise had a walkover in the next class and was looking well. In open dogs (8) first went to the familiar Homer S., often described in this journal. Second to Dixie, not very good in front and should be deeper and squarer in muzzle. No other mention was given, but Trim B. and Comus should have been noticed. Open bitches (11), Maid of Waverly did better than at Boston by winning first here. A little more flesh would improve her; she lacks penciling and thumb marks on feet and pasterns; too much tan on head. Sante Marie, second, should be squarer in muzzle; was well shown. Nora, reserve, is a fair-made one, faulty in head and rather small, if I got the right one. These dogs were benched in sundry places instead of in a batch. The well-known Fenmont, first at Boston in the spring, could do no better than vhc. here, and Countess Roxie—shades of fame—saw hc. tacked over her stall. In puppies, King Mont and Flo Noble were the winners, but we could not find them. Criticising puppies is an unsatisfactory business, anyhow. Flo Noble and Belle Noble took the bitch prizes from Nola and Minnie-Ha-Ha, the former being full in eye and brow, and could be better in front, while Minnie is mixed in tan and a trifle coarse-headed, nice body, ribs and quarters, and she might have been reserve.

SPANIELS (*J. Otis Fellows, Judge*).—These were few in number and there was no redemption in quality. Brantford Mohawk took the challenge prize in field spaniels. In open dogs Manuscript, the only entry, did not turn up. In bitches there were only two, Maid and Gossip, and for the first time in history the former got ahead of the latter at the finish. Maid is too high on the leg and straighter in forelegs still. Gossip gets it a trifle in type and general quality and body. Gossip is wofully crooked in front and head is rather narrow. In cocker challenge dogs the well-known Bim, looking very well, secured the ribbon unopposed. In open dogs, other than black, Brantford Rufus took the ribbon in spite of his coarse, high skull. Cousin Dick is not a bad sort; a bit high in skull, excellent muzzle, fair legs, not quite straight enough in front, good body. In open black dogs Black Baby, in Donovan's absence, had a walk-over, and luckily, too, for he is a big curly dog that must be over weight, excellent feather and earage. In bitches Miss Phyllis scored once again, this time having nothing better than Doddie, faulty in front, to beat. In any color bitches Floss won; she is ten years old and this year 41 partridges were shot over her in one day, in Maine; front straight, but too much daylight under her for modern ideas, though not for a good working stamp; eye is too full and muzzle weak. Judy, second, is scarcely up to form, is light in body, front good, but warts on underjaw make it appear undershot, and they should be removed at once. The puppies showed nothing of much moment. Taunty, the winner in bitch puppies, has a fair head, but is pinched in muzzle, yet good in front. Juanita II., second, is curly. As may be surmised from the above, the principal kennels were conspicuous by their absence, and the mutterings at Boston really did amount to earnestness, after all. G. L. Farr took the kennel prize for cockers. Kitty of Cork was the only water spaniel and took the blue ribbon, though almost bare of curl and topknot.

COLLIES (*James Mortimer, Judge*).—Lots of quality here and one or two new ones to gather honors. In challenge dogs poor old Squire, dirty and ragged in coat, hung his head as much as to say, "I know it, but what can I do; I have no voice in this matter and would much rather stay at home." What is the use of subjecting this grand old dog to such humiliation, surely he has earned a comfortable retirement after years of triumphs such as seldom fall to the lot of one dog. Wellesbourne Charlie, although short of coat, looked bright and healthy and his action was in marked contrast to the Squire's, who could scarcely pick his way across the ring. Flurry III. had little difficulty in scoring over Metchley Surprise, being in excellent trim for the season. In open dogs (11) competition soon narrowed down to Seminole Kennels' Golddust and Woodlawn Trefoil, Mr. Jarrett handled the former and made the most of him, he was out of coat and looked light, showing his faults in hind parts conspicuously; his head and forepart pulled him through, but he had a close shave, as Trefoil scores from head back both in coat and formation, is not true in front, but boasts a good head and ears fairly well carried, though too far over. Curzon, looking light and out of coat, as usual, was vhc. The others call for no mention, except it be Glenfyne, who is long cast, a little broad in skull, good ears and fair coat. Open bitches (11) showed a few good ones, notably Woodlawn Sunset, whose star is rising, sweet, clean, long head, nice ears and excellent coat for the season. Shepardess, not so clean in skull as the winner, but dense in coat, ears well carried, good legs and action. Ormskirk Gypsey Maid, short sharp faced, took reserve, and Fannie, vhc., shows too much stop and brow, fair ears, nice body. Cora Belle of Nesseldown, also vhc., is rather full and round in skull and ears are heavy. Aurora, hc., shows quality, but ears are too large and inclined to prick, fair head. The kennel prize went to Seminole Kennels.

BULLDOGS (*James Mortimer, Judge*).—A capital showing, and seldom do we get such a lot outside of New York or Boston. The fun started with King Lud and Wal Hampton in challenge dogs, and bulldog men will surmise the result; finish, quality, head and body were all in His Majesty's favor. Saleni, The Graven Image and Adiscombe Gypsy made up an interesting bitch class, but the issue was never in doubt, Saleni scoring so in body, ribs, chop and wrinkle and skull. All were well shown and, of course The Image scored over Gypsy in head properties and body. In open dogs, over 45lbs., His Lordship stood out like a statue, unapproachable and indifferent, while Rustic King II. did his

W. NORMAN HIGGS'S MASTIFF BRAMPTON BEAUTY.

best to look older and more fit for such company; at present he is promising, not broken up enough yet in face and stop, but well shown. King Orrey was absent. In the bitch class Katisha, who would be improved with more cushion, deeper in under jaw and muzzle, good shoulders well out, fair body, rather loosely hung together, and not short enough, won over Lady Nan, plain in front and long backed. Juno, a litter sister of Rustic King's, is faulty in ear carriage, excellent legs, if a bit more out at shoulder would be better. Derby May, hc., is too wedgy in head, has big ears carried down; should be deeper and squarer in muzzle. Hucknall, Gypsey and Mischief, the new ones, were absent, as well as Charmion.

BULL TERRIERS (*James Mortimer, Judge*).—Although the classification was simple, some good dogs put in an appearance and the quality was even. Cordona shown very fit, disposed of Duke of Rochester beating in front and head and condition; in bitches champion Attraction, who keeps herself wonderfully well, forced Loumont Kit to the rear especially in muzzle, eye, bone and depth of rib. A smart terrier in Little Flyer took the blue in open dogs (9) beating Billy Plimmer, second, in strength of jaw, set on of stern, etc.; Harper's Whiskey, described last week, was reserve, thus displacing Billy Bulger who was vhc.; Bruce also given three letters has a long head but is cheeky and heavy in shoulders; Prince Gully, vhc., is wide in front, cheeks not flat enough, nice body; Gully the Great and Aspiration were absent; London C., is too broad in skull. In bitches first went to the well known Edgewood Matchless, with New Market Siren, second, light eye, cheek too prominent and a bit straight behind; Nellie Harper was vhc., seemed in whelp, she was at Toronto; Honey Bee, vhc., stands too close in feet, which throws her elbow out; Young Miss Giddy, vhc., has excellent front and body though the latter is a trifle long, very fair head, well deserving her place; Bess of Rochester could do no better than vhc. here, she is unfinished yet. The puppy class was divided and firsts given to Harper's Whiskey and Bess of Rochester.

FOX-TERRIERS (*T. S. Bellin, Judge*).—So many familiar faces were seen in the ring here, both of dogs and owners, that it looked almost like a New York or Boston gathering, and the quality was naturally of the best. The challenge dog class brought out three cracks—Blemton Victor II., Warren Safeguard and Starden's King, in the order named. Victor looked light and leggy to the others, but his cleanness of head, shoulders, neck, etc., pulled him through. Starden's King and Safeguard are more terrierlike, to my idea, but the former loses in neck and shoulders; was well shown and so was Safeguard. Warren Captious had the next class to herself. Then came another well-known lot of dogs in the open class (11). Blemton Rasper proved the winner; he looked a trifle light and long in body. Beverwyck Royalist secured second; he looked light, too, and has not filled out in rib yet. Reserve to Werner, whom I did not catch—as a puppy he took an early departure. Blemton Stickler, Warren Salesman and Warren Tip Top were the vhc. dogs. Tip Top and Stickler are well known, and Salesman has an excellent front and is a terrier all over; could be closer in toes and brow should be flatter. Worsley Trapper could only get hc. in this company, while Seacroft King, described at Toronto, was also in the two-letter division. Hillside Royal is light in body and skull too full.

The bitch class (13) was another warm lot, but the Rutherford kennel supplied first and second winners with Warren Ripple and Duty; this old kennel keeps the others guessing all the time with their home-bred ones. Ripple I thought a bit lucky to beat Duty, standing a little wide in front, and is too round in skull, yet better bone than Duty, but not so hard in coat; nice ears. The well known Blemton Vindex was reserve; should be stronger before the eye and in pasterns. The vhc. division had Spinster and Beverwyck Twilight; both are well known and neither is good in muzzle, while Spinster's ears should come down. Seacroft Empress, hc., a nice-bodied bitch, is pinched in muzzle. Blemton Erminie, hc., has a nice head if eye were darker; is not quite straight in front and body should be shorter. Warren Salesman won in dog puppies with Blemton Fire Brand second, but he will not set the Thames on fire unless he "fines down in skull." Dominican and Domino were placed as at the specialty show. In bitches a nice-fronted daughter of Starden's King pulled off the victory over Hill Hurst Diana. In Wires, which were also good, Oakleigh Bruiser and Sister Pattern farmed the challenge classes for Mr. Hunnewell. In open dogs (5) another blue ribbon fell to his share by the aid of Cribbage, who looked better than we have seen him in some time, but needs his whiskers trimming. Brittle came next, repeating the Toronto placing under the same judge and our criticism then is good for this occasion. Brittle was lucky, good dog as he is; he was not in bloom and with no front teeth he should give way to his son Brittle Beaut. Mister Great Snap and Halifax Revival were absent In bitches (4) Mr. Hunnewell scored first and second, the blue coming to his new one, Bushy Bramble, excellent body, coat and legs, a bit sharp in muzzle, nice skull and ear. Brunette was at Toronto. Petition from the same kennels took reserve, a bit fine in muzzle, excellent bone and front and plenty of coat but a trifle long in body. Roche Tacit, out of shape, was vhc. St. Trick, a smart puppy by Brittle, was alone in puppy dogs, and the Hill Hurst Kennels supplied the winners in bitches with Brunette and Vamp.

IRISH TERRIERS (*James Mortimer, Judge*).—A capital show, but most of the winners are well known. Challenge dogs brought out six, and it does seem a travesty on wins that count when such a lot should come forward to battle for a solitary prize of $10. Merle Grady won nicely over Jackanapes, who is not so clean in skull and cheek as he used to be; reserve to Brickbat, Jr., and vhc. to Crib and Boxer IV., and rightly placed. Candor, well shown, was the only representative in the corresponding class for her sex Open dogs were poor, Mr. Comstock getting the ribbon with Hanover Boy and His Honor, both old customers. Brevety, vhc., is light in eye and ears are too large; soft in coat and stop should be flatter. Shamus is leggy and feet are open. John Briggs, a neat terrier, should have had something; his skull is broad; more rib would be better and his coat should be harder. In bitches (2) Bella Rush, slack in back and not very good in front, was alone, and won, Judy being absent.

BOSTON TERRIERS (*W. C. Hook, Judge*).—There were nine dogs in the open heavy dog class and two in bitches, three in light-weight dogs and two in bitches and two in puppies. As we can make neither head nor tail, especially head, of the decisions in these classes, we let the awards stand without quibble. That the judge was well up in the breed is palpable, for in addition to the numbers of the winners in the judging book he also gave their names, a familiarity with the breed that proved his judicial acumen.

BLACK AND TAN TERRIERS (*James Mortimer, Judge*).—Broomfield Sultan and Gypsey Girl again in the challenge class. Old Jasper came forward once more in open dogs; his only opponent was a toy, which was transferred to the toy terrier class. Jasper is getting very coarse. Lady Prudence, the Boston winner, was the only one in the bitch class, the others being toys. The toy terriers were of the usual order.

SKYE TERRIERS (*John Davidson, Judge*).—Most of them are well known and need no comment except that there was a shortness of coat all round. Sir Thomas took the challenge prize and Rhoderick Dhu won in dogs and bitches (4), Lady Stafford coming second and Nelly, reserve, faulty in ears and out of coat.

SCOTTISH TERRIERS (*James Mortimer, Judge*).—Rhudaman beat Kilroy in style and condition for the challenge prize. In the open classes the awards followed Toronto. Burton Bitters, vhc in bitches, is weak in face, otherwise a fair stamp.

DANDIE DINMONTS (*James Mortimer, Judge*).—Heather Daisy beat Amphion, but I prefer the dog, longer in body and better head, and the bitch was short of coat. In open dogs Heather Deacon won, light in body and very crooked in front, but nice long, strong head; second withheld. Mr. Brooks showed some home-bred ones by Amphion, but they are not up to the mark. Maggie, first, beats Mary in front, but is not so strong and well shaped in head. Gyp V. looked weedy.

BEDLINGTON TERRIERS (*James Mortimer, Judge*).—Chemist had no difficulty in beating Beechgrove Leader, a puppy, but the latter's owner won the blue with Beechgrove Blue Belle in the bitch class over Ini Va La, vhc., who was out of it altogether, and second was withheld from her.

Dachshund entries were absent, and the Yorkshires were so poor that no awards were made.

PUGS (*James Mortimer, Judge*).—Attraction was far away the best pug on the bench and took the challenge prize without competition, while prizes were withheld in open dogs. Belle D., shorter in muzzle, lower on the leg and better bodied, took first from Daisy Belle, the Toronto winner.

TOY SPANIELS (*James Mortimer, Judge*).—The Japanese spaniel entry was absent. In the King Charles class first went to the well known Boston dog, Cockney Charlie, who beats Minnie in skull and muzzle very much, was nicely shown. King of the Charlies, that could smother both, was absent, and so was Old Gold in the bitch class.

CHESAPEAKE BAY DOGS (*John Davidson, Judge*).—The same old faces and a perusal of the prize list will convey as much information as we can do. Cleveland's win makes him a champion.

POODLES (*Jomes Mortimer, Judge*) | Only a fair showing. First went to Leo in cordeds, needs trimming and more flesh. Beauty, an untrimmed one, was second, and Paris, getting in better shape, vhc., all were short in cords and unkempt. In the curly-coated class Hill Hurst Nap and Ithel took the prizes, both are well known now, and H. H. Posey, vhc., was at Toronto last week. The nice curl and trim the Hill Hurst poodles are shown in should be imitated by other poodle owners. The Meadowmere entries were absent. One fair schipperke was shown in Lotze II., big in ear and deficient in frill.

MISCELLANEOUS CLASS (*John Davidson, Judge*).—This was divided. Drayman, the basset, won in heavys, with a terrier called Frank second, and the Chinese, Too-Too, reserve. Spring, the well known Italian greyhound, also took first, and a toy terrier, Tiny, second.

H. W. LACY.

LIST OF AWARDS.

MASTIFFS.—CHALLENGE—*Dogs:* 1st, George W. Glazier's Ingleside Minting. *Bitches:* 1st, Dr. C. A. Lougest's Lady Diana.—OPEN—*Dogs:* 1st and 2d Dr. C. A. Lougest's Emperor William and Emperor Maximilian. *Bitches:* 1st, 2d and high com., Dr. C. A. Lougest's Vere, Gerda II. and Eider. Very high com., Woodbury Kennels' Cerene.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—*Dogs:* 1st, E. H. Moore's Altoneer. Reserve, Mrs. J. M. Nicholson's champion Kingston Regent. *Bitches:* 1st, E. TAUNTON, Mass., Sept. 17.

---

The New England Field Trials Club expect their Members' Stake to provide the occasion for a merry gathering. The draw and meeting of the club will be at Taunton, Mass., on the evening of Oct. 22, and a little banquet will follow, naturally. In the morning the members and their friends will drive over to Assonet and run off the stake, which is expected to fill with about ten entries.

## United States Field Trials' Derby B Entries.

A VERY satisfactory entry has been received for the Derby B of the U. S. Field trials. There are 42 English setters and 25 pointers, all whelped in 1893.

[*By a Staff Correspondent.*]

### Barring All-Age Winners.

THE action of the Manitoba Field Trial Club at its recent meeting, in so amending its rules that any dog can win twice in All-Age stakes before becoming ineligible to competition in the club's future All-Age Stakes, was ill-advised and harmful. Prior to the recent amendment, the rule was that one win of a dog in the All-Age Stake of a recognized club, would be a bar to competition in the All-Age Stake of the Manitoba Club.

The new rule opens the competition to all the first prize winners in the States and Canada. It is sure to detach much support from the club's trials, a support which comes from a class whose interest it should most earnestly endeavor to permanently engage in field trials, namely, the owners of small kennels, the amateurs and the breeders. With a rule so unfavorable to them, they will naturally hold aloof from the competition.

The new rule greatly enlarges the scope of a dog's competition, much more than is apparent on the surface. A dog may never win more than one first prize in an All-Age stake, though he may afterward be a sure second, third or fourth winner in such stake; thus he may be a deterrent factor in the competition year after year.

Now supposing that there are four or five such winners in an All-Age stake, is it not a safe presumption that they would win every prize? It would be many years before all won first prizes again, and thus be rendered ineligible; but if one became ineligible, there would be a number of new winners to take his place, or compete with him if he did not win, since all the first prize winners in the States and Canada in the field trials this fall and winter, are eligible to compete in the Manitoba Club's All-Age Stake next year, as are also all the first prize winners of past years.

If every winning dog were to win his two wins in succession, it would require two trials to bar them, and at the same time there being four or five recognized contemporaneous field trial events, there would be four or five new All-Age winners to compete in the place of the one which is barred by a second win. The new rule practically throws the stake open to the world without restriction.

Undoubtedly all the first prize winners in the States and Canada will not be present in the club's engagements, but it is quite probable that enough of them will enter to destroy the interest and support of the weaker professional and amateur. In that respect three or four first prize winners accomplish as much as a dozen.

It is true also that even against the odds some unknown dog might beat the famous winning dogs in a stake, but also it should not be overlooked that such dog would be a deterrent and disintegrating factor in the competition in the following year. However, in respect to the unknown dog, the records do not support such argument very positively—therein the names of many dogs will be found many times repeated as winners in different events.

Several of the club members, notably, I think, Messrs. Simpson, Wootton, Ellis and Avent, were strong advocates of the change and instrumental in bringing it about. The latter advanced the novel plea that, as the rule stood, some man who owned a winner of an All-Age stake could boast that his dog could beat everything in the country if he could but compete, but with an opportunity afforded him to compete again by removing the bar such boaster would be silenced.

It is not very clear, however, who such boaster is, nor why the boasting of a mythical personage should have so much weight in the club's domestic affairs, or any importance at all, or even if the boasting personage were real, why the club should change a rule, founded on good sense and equity, to silence empty boasts. But accepting the plea as sincere, how could any rule, directly concerning the club's own affairs, silence the boastings of any one? A man can boast about his dog without running in a field trial once. To further the plea, let us assume, though it is far-fetched, that the rule would effectually silence such boaster, what effect has that then on the inherent equity of a field trial competition? Again, is it worth while to have several boasters come in with winning dogs if by so doing they keep many more competitors out? But in making that plea concerning the boaster, the pleader forgot to mention that the new rule removed the bar from the boaster and he who does not boast; in short, from all winners. In view of this I presume those who are not boasters, but own All-Age winners, will not attempt to run a second time. Who own the prize winners any way?

If the club starts out to so amend and add to its rules as hedge in or silence every boaster it will have a task indeed.

### Precedents.

Are good precedents of value in this connection? Then there are the conditions of the stakes for many years past, enforced by the great field trial clubs of this country. Their rules, too, are specific and explicit on this matter. The older clubs have had occasion to consider and settle it years ago—but had all the members of those clubs owned first prize winners they might have ruled differently. Their rules at present are uniform on this subject. Each club recognizes the wins made under the auspices of the other clubs, and first prize All-Age winners are barred from All-Age stakes.

If precedent is worth considering in relation to the subject, the uniform ruling of all the older and more experienced club members is worthy of careful consideration. There is plenty of precedent. One can safely infer that they found good reasons for introducing and maintaining the rule, and indeed it is not difficult to learn those reasons.

After a dog has won an All-Age stake, he has achieved fame and prestige which, it may reasonably be assumed, are known throughout the sporting world, and will be a part of the permanent history of field trial competition. He will live in the traditions of sportsmen. If he has previously won a Derby, his fame is still greater. Such winnings are widely published in field trial reports, advertisements, circulars, private letters and orally. Thus the competitive powers of a winning dog become well known to all sportsmen.

If such winning dog were allowed to compete thereafter in an All-Age Stake, he would discourage many owners from making entries. No man cares to enter a competition unless he has a belief or a hope that there is a chance for him to win. Against untried competitors, there is a hope. Against a dog which has proved himself a formidable competitor, the owner may know that he has no chance of winning. With several formidable winners in the competition, many more owners would hold aloof. There are numerous such famous winners which are now eligible.

There is no handicap at a field trial. The equity of the competition can only be imperfectly maintained by barring winners. In all other sports a handicap obtains. How many horsemen would enter their horses in one stake against Robert J. and against such other eminent competitors near his ability, with no handicap to equalize chances? In bicycling, running and other sports where large fields compete, the winner whose superiority is well known is handicapped. The only protection so far applied at field trials is barring the All-Age winner from All-Age events.

Some clubs, to make an opportunity for the All-Age winner, have in the past made a champion or other stake in which such winner could run with his kind, but it was found in most instances that he did not care to run under such conditions very much. He wanted something easy. Something like a cinch was better. The All-Age winners seemed to be afraid of each other. The man who boasted and the man who didn't looked askance on a champion stake. Winning such a stake was a small gain compared to the loss of reputation and value if defeated, and defeat meant less earnings of a dog in the stud. To prevent walkovers in the champion stake it was found necessary to make a condition that there must be a certain number of starters or the stake was off.

Stripped of all sophistry, the new rule has a direct bearing in the interest of the great kennel owners who are better equipped in every way for competition than are their smaller brethren. It makes them still more formidable, as they own many winners or can control them, and can campaign their strings of dogs better and cheaper than can the small breeders, the amateurs and small owners.

Instead of promoting Canadian interests in breeding and developing dogs, the managers of the Manitoba Club have multiplied the difficulties and discouragements which their home breeders must encounter. They are competing against kennels which represent the effort and expense of years of the best talent, while their own began comparatively much more recent, and with all the bars, they were competing against heavy odds.

Lest I should be misunderstood, as I am quite sure I have been on related subjects which referred to amateurs and professionals, I will say that I am not writing against professionals personally. My desire is to call attention to such features of the competition as are harmful to it. If professionalism has unduly absorbed too much field trial interest to the detriment of the trials, the professional handler needs no argument to make him realize that his own interests are correspondingly injured. If the field trials were strictly professional events, there would be no question then as to the relative standing of professional and amateur; but if field trials cannot live without the amateur—and it is generally the amateur who puts up the purses—it might not be unwise to give him at least a peep for his money.

It was said to me not long since by a professional handler that field trials could not be run without professional handlers. The statement was not quite precise, since trials could be run without them, but not so well as with them. But handlers should not for a moment overlook the fact that they could not run without field trials. Handlers and trials are mutually dependent on each other, with the somewhat unimportant distinction that to the club members the trials are largely a diversion or side matter, while to the professional they are a means of livelihood. To determine just how much belongs to sport and how much to business is the field trial problem of the age in this age of trusts. Nothing herein is intended to be understood as advocating a bar against professional handlers. I believe the time will come, however, when they will have to be limited to one or two entries from a kennel. This does not mean that each handler could have but one entry. He might have a dozen for that matter to handle in a trial, but they should be owned by six different owners at least. Such ruling would break up the strings which are campaigned for revenue. To insure that there is no deception, an affidavit of ownership should be required with every entry.

### Recognitions of Wins.

In this connection it may not be amiss to consider the rulings of other clubs in respect to wins. In particular I will refer to the U. S. Field Trials Club, which might wisely cast its eagle eye on the competition in the All-Age Stake of the Manitoba Field Trials Club, at Morris, this year, for wins there are worthy of recognition. The U. S. F. T. C., in times of past, has exercised great forbearance in recognizing Canadian wins, although the trainers went many hundred miles to participate, and famous dogs competed in Canadian stakes every year.

The former club does not recognize the wins made in the trials of the Manitoba Club, but with this year's competition in evidence, it cannot consistently refuse to recognize them. A fixed principle should not be sacrificed for a little revenue. With a competition made up from the best kennels of the United States and Canada, there is no equitable reason why the wins of the Manitoba Club should not be recognized. The United States can show no more important competition than that in the All-Aged Stake of the Manitoba Club, namely, the Charlottesville Field Trial Kennels, the Blue Ridge Kennels, the Avent & Thayer Kennels, Mr. T. G. Davey's kennels, and others, and the handlers were the most expert and famous of America.

The trials are not the small affair which they were sometime ago when a handler could scoop the whole pot with no penalty to the winner by a bar at the events in the States.

I hope it is possible that the Manitoba Club may reconsider its recent action in respect to All-Age winners. If they return to their recent ruling thereon, they may mildly displease a few, but may please many. B. WATERS.

### Newburgh Dog Show.

THE small show held in connection with the Orange County Fair (N. Y.) seems to have been quite a success, as a number of well known dogs were present. There was no catalogue, so that a correct list of the awards was difficult to get at. The Mere Kennels exhibited Ripon Stormer and other fox-terriers. Mr. E. H. Morris had a string of winners in thirteen classes, and the Castle Point Kennels took the prizes for bull-terriers. Outside of these kennels the awards went to local dogs. The best English setter was J. S. Cleeves's Trouble. Best Irish setter, E. H. Morris's Dash. Best fox-terrier, Mere Kennels' Ripon Stormer. Best pug, Dr. A. V. Joy's Boodle. Best pointer bitch, A. Krom's Lass of Bang. Best great Dane, J. B. Miller's. Best Newfoundland, T. H. Rea's. Dr. Glover judged.

## DOG CHAT.

In the awards at Antwerp International Exhibition we notice that a Diplome d'Honneur has been awarded to Spratts Patent, Limited.

Dr. C. A. Lougest has sold the well known mastiff Emperor Maximilian to Mr. J. F. Stone of Columbus, O., at a good figure.

We were sorry to hear that Mr. Comstock lost that good Irish terrier bitch Crate during the summer, as well as her eight pups by Valley Boxer. He purchased this bitch from Mr. G. R. Krehl when in England a couple of years ago, and she was considered one of the best on the bench. Mr. Comstock intends visiting England in the near future, and will probably bring a couple of others over.

During Toronto show Mr. C. E. Bunn, of Peoria, Ill., purchased the well known mastiff bitch Cerene from the Woodbury Kennels. This bitch, while by no means a flyer, is a very fair one when properly shown. She is by Minting, and although some breeders were disappointed with Minting as a sire, yet the fact remains that his daughters are about the best brood bitches we have, and this accounts for Mr. Bunn's anxiety to secure Cerene. She was mated with his Leamington during the show and the result should be entirely satisfactory. Mr Bunn has now four litters on hand, and six bitches have been bred, so there should be no dearth of mastiff stock in the land of the Whisky Trust.

Mr. Joe Lewis, the beagle judge at the Rhode Island show, indorses our criticism on the placing of the winners in the open dog class by purchasing the second prize winner, Robin, before the show closed. He has a good beagle and one that will be useful to the breed as a stud dog. As to Robin's hunting qualities we are not informed, but probably he will soon have to give an account of himself. We understand that Robin earned a stud fee or two before leaving for his new home and several "futures" were booked, so that it looks as if the purchase was a bargain, though $200 was the price asked.

Mr. J. L. Winchell has been trying an experiment in breeding back his Beaufort's Black Prince to one of his best daughters, and he has produced a litter of pups which are three-quarters champion Black Prince. The litter is a great success, as he thinks they are the best he has ever produced. "I think I have bred what has never been bred in America before—show bitches."

Several letters and other matter are unavoidably deferred till next week, owing to the pressure on our columns this week.

Mr. Bernheimer writes us that his Morey Kennels won the kennel prize for poodles at Toronto, and not the Woodbury Kennels, and that his Cigarette won third in open curly bitches, instead of Hill Hurst Dinah. We cannot understand this, as the records of these wins in the judge's book were as we published them.

A most remarkable case, not to say outrageous abuse of power, was brought to light by the Providence *Evening Telegram* during the Rhode Island Fair show. On the 19th this journal published the following editorial, which gives the whole particulars—"Does the Crime Fit the Punishment?" "From Sept. 4 to Jan. 12 is a pretty long time for a poor man, the father of a family, to be in jail, leaving wife and children to beg or starve, when that man has been guilty of no more serious a crime than keeping an unlicensed dog. We have referred to this outrage in connection with the arrest of James J. Kelly by a so-called dog officer before, and we may have more to say about it. Kelly was sent to jail on Sept. 4 because he could not pay a fine and costs amounting to $27.05, of which $5 was the dog officer's share of the fine and inducement to the arrest. Dogs ought to be licensed. We do not object to that. A man who can't afford to pay can't afford to keep a dog, except in certain cases. But how an officer can afford to have a man sent to jail for four months because the man is too poor to put $5 into the officer's pocket we do not see. To work out $27.05, Kelly has to stay at Cranston until he has "worked it" at the rate of twenty-five cents for each working day. Sundays and Christmas and Thanksgiving Day, think of that in this connection! are not working days. Probably election days don't count. Any way, the first two weeks in January will be gone before the man is out unless something is done for him. It is now too late to take an appeal, the only thing is for somebody to pay the man's fine. The *Telegram* is willing to help. It will give $5 for the dog officer's share. Are our readers ready to make up the balance?"

This was brought to the notice of several fanciers and the suggestion was at once made that the dogmen subscribe the amount necessary to get the man out of jail. It was proposed to have a popular subscription of $1 each, and Dr. Foote and Mr. T. S. Bellin were not long in securing $51. In the meantime through the financial assistance of Mayor Olney and the intervention of Judge Wilbur, the man had been released, so the money subscribed by the dogmen was turned over to James Kelley's family, which was destitute. The dogmen have a name for wrangling among themselves, gained more by exaggeration than reality, but no warmer-hearted set of men exist, and the mutual love for a dog is an open sesame in the time of trouble. The citizens of Providence are justly indignant over this affair. Had every man who has failed to pay his dog's fee been subjected to the same prosecution they might feel different, but that this poor man with a family depending upon his daily labor should have been singled out by the dog officer, has raised an amount of indignation against that individual that will make his name anything but an enviable one. This officer is probably perfectly satisfied with the outcome of his Shylock-like action, for the feelings of others cannot have much influence on such a man.

There was almost a riot among the regulars during the closing hours of the Providence show on Friday evening. Orders were given by the President Mr. Perkins, that no dog was to leave the building until 10 P. M. Several handlers had been promised release, so that they could get home before Sunday. Mr. Roberts was between the devil and the deep sea, but he realized that if the "boys" were detained they would bear it in mind next year. Then there was the public to be considered, but they not having to pay admission to the dog show would come again next year any how, and he did his best for the boys. But President Perkins was obdurate; Mr. Walter Comstock tried his persuasive powers on the man at the helm but unsuccesefully; Fred Kirby could not move him and the smooth, imploring plaint of Ben Lewis met with no responsive throb. Then the boys got down to business, signed a petition to the president setting forth that they would not show there again unless treated fairly in regard to this matter and all was over. The edict was repeated and the "boys" will win more money next year they hope. Still rules are rules and the show rule XI, says that no dog shall be removed until 10 o'clock on Friday night, Sept. 21, and therefore the management could not be blamed in the affair; still in a fair show when few people come at night to see anything but the fireworks, this rule might well be relaxed.

On the last day of the show some home-made fox-hunting on the race track was arranged for. Dr. Thurber, as an intimation that his hounds are up with the game at every point, had a fox in a box, marked dangerons, hung over his pack in the show. This fox was taken to the track and walked around it and then the dogs were slipped. The crowd surged round and the dogs became excited; Tom Aldrich's hound Jowler, made a steady point and his owner "hied" him on but he held it staunch. The dogs were taken up, the fox boxed up and the hunt declared off. Nothing but trotters and money seem to go on that track.

*Stock-Keeper* (Eng.) gives Mr. Mortimer, in the issue of Aug. 31, a characteristic send-off on his departure for home. After enumerating the shows he attended, a description is given of the notable purchases Mr. Mortimer made. Speaking of King Orry, which accompanied Mr. Mortimer on the voyage, this journal says: "Of all his purchases this was, no doubt, the happiest and best timed, as the value of King Orry must have been nearly doubled by the death of Dockleaf. There are excellent judges of the breed who believe that in parting with this specimen England is losing its most valuable stud dog. Orry's conspicuous point of excellence is the breadth of turn-up of underjaw; he has proved his excellence by a number of wins on the bench, scoring firsts at Brighton, Cruft's, Bulldog Club, Birmingham, Enfield, Romford, Nottingham, Portsmouth and Preston, where he secured also the 25-guinea and the 50-guinea challenge cups. He showed his soundness when he beat Dockleaf in the walking match, and among others the famous Facey Romford and Storm Fiend, Burglar and Prince Orry may be adduced as evidence of his quality at stud. Of the four prize bull bitch purchases, Hucknall Gipsy, Grosvenor Lass, Miss Mischief and Enfield Vixen, the first-named went on in advance with the schipperkes. Gipsey, before leaving, was served by Sir Garnet Wolseley; she is also a well-known winner, having won firsts at Preston, Bath and Bicester. Miss

Mischief went on a visit to Facey Romford before sailing. There are two good bob-tails in the party, Boxer III., a good-sized dog of much merit, and Mayoress of Newport. There is one black and tan terrier bitch named Surrey Gem, and four schipperkes, one of which has been put to Mephisto. The hound family is represented by three beagles from Mr. Joachim's kennel, they are Ringleader, Raffler and Robino, and in their pedigrees combine the blood of the only two champion beagles in England. From Mr. Krehl's kennel Mr. Mortimer has taken the stud and show Irish terrier Brian O'K., and the wire-haired fox-terrier Marden. The party is completed by a team of foreigners, eleven black poodles of the "fuzzy" kind. Since Mr. Mortimer bid us adieu we have received a letter from the Parisian vendor of the poodles to whom we gave Mr. M. a letter of introduction. This person writes: 'Mr. Mortimer peut se flatter d'avoir été servi en ami, tous sont des sujects de premier choix.' So that is all right." Mr. Mortimer tells us that Lady Eva, the Irish terrier he purchased, did not prove in whelp after all.

## American Kennel Club Meeting.

THE regular quarterly meeting of the executive committee of the American Kennel Club was held at Delmonico's on Monday, Sept. 17, at 8 P. M., Vice-President T. H. Terry presiding. Present: Associate members, T. H. Terry, Dr. H. T. Foote, A. C. Wilmerding; American Spaniel Club, E. M. Oldham; Brunswick Fur Club, N. Q. Pope; Gordon Setter Club of America, James B. Blossom; Mascoutah Kennel Club, C. F. R. Drake; National Beagle Club, H. F. Schellhass; New England Kennel Club, Edward Brooks; New Jersey Kennel Club, E. H. Morris; Omaha Kennel Club, Dr. M. H. Cryer; Southern California Kennel Club, James Watson; St. Louis Kennel Club, J. M. Taylor.

Credentials were read of the following named delegates to represent the following named clubs: Francis G. Taylor, the Philadelphia Kennel Club; James Robinson, the Saratoga Poultry and Kennel Club; Frederic S. Webster, the Northwestern Beagle Club of America, and Charles Heath, the Pointer Club of America. On motion the credentials were approved, and the delegates' names accepted.

The secretary's report was read, and on motion was accepted and placed on file. The same is as follows:

NEW YORK, Sept. 15.—I beg to submit an application from the Pittsburgh Athletic Club Kennel of Pittsburgh, Pa., for admission to membership in the American Kennel Club. All of our requirements have been complied with and the club so far as its constitution is concerned is eligible to membership. This club has just held its initial show, occurring upon the same date as the show of the Toronto Kennel Club, against which the Canadian Kennel Club by resolution has filed a protest with me. Under the present order of things the American Kennel Club does not protect show dates, and in case the Pitsburgh Athletic Club Kennel had been a member, we could not have rendered the Toronto Club any assistance. The only objection that can be presented is, that we already have on our list of members a club in good standing hailing from the same city, and holding a show therein, and according to precedent we must protect that club against the recognition by us of any other club in that territory.

We have a communication from the National Beagle Club of America, requesting that said club be given a place on our field trials and coursing meetings committee. The request should be complied with. At our last meeting the Akron Poultry and Kennel Club was given thirty days to pay its prizes awarded at its last show or the officers would be disqualified in default thereof. No reply has been received. By resolution at our last meeting, Mr. E. P. Schell was given thirty days to file his defence against the action of the Pacific Kennel Club, in answer to his expulsion from that club for cause. Under date of May 30, 1894, Mr. Schell filed his defence, together with documentary testimony in his behalf.

In accordance with your resolution I mailed to each delegate a copy of the proposed rules governing registrations, and now I present them for final action.

T. A. Howard has filed an appeal from the decision of the Louisville Kennel Club in the matter of an award of a special handlers' prize at its late show. The Louisville Kennel Club has filed its answer to this appeal.

Charges have been filed against the Philadelphia Kennel Club for non-payment of prizes at its late show, by two exhibitors—Messrs. B. Alton Smith and Robert Dudley Winthrop. The secretary promised that these claims would be met the first of the current month.

I beg to call your attention to a letter from Mr. T. A. Howard, the delegate from the Columbus Fanciers' Club, as published Aug. 10, and would recommend prompt official action by this club in the matter.

At the meeting of the advisory committee, held May 3, 1894, in the case of Martin vs. Bell, it was ordered "that George Bell be and is hereby disqualified for the term of one year from this date, the committee having found him guilty of misconduct."

During the investigation by the secretary's office it was ascertained that Bell had not sent Martin the particular animal that he had sold to him, and after Bell had been advised that such was the case, some time in September, 1893, he never offered to rectify the matter, nor did he inform Martin of it. This is a much more serious case than the one for which Bell was disqualified. It might have caused the stud book to publish pedigrees, as Martin had already bred the bitch, supposing it to be the bitch he had paid for, and the stud book would have accepted the application of Martin for the registration of the puppies. In view of this information, I would recommend that this meeting should instruct me to prefer charges against Bell to the Canadian Kennel Club.

Applications have been filed for the following prefixes: Woodlawn Park Kennels, for "Woodlawn Park;" James Ferris Belt, for "Wawaset;" E. K. Butler, Jr., for "Banty;" Theodore Sturges and Charles H. Phelps, for "Eldred;" O. W. Donner, for "Milton."

A. P. VREDENBURGH, Secretary.

The treasurer's report was also read, and on motion accepted, and is as follows:

NEW YORK, Sept. 15.—I beg to submit herewith my quarterly report of all moneys received and disbursed by me during the year 1894:

| | |
|---|---|
| Balance on hand Jan. 1, 1894 | $2,815.82 |
| Receipts from all sources to date | 4,887.50 |
| | 7,703.32 |
| Disbursements for same period | 6,102.47 |
| Balance on hand | $1,600.85 |

A. P. VREDENBURGH, Treasurer.

The report of the advisory committee was read by the secretary, and on motion received and placed on file. The same is as follows: Meeting of advisory committee, held May 4, 1894. Present: Messrs. Terry, Brooks and Cromwell. In the matter of Preston vs. Morris, the committee having been notified by the parties in interest that it was in litigation, it was on motion ordered that the committee deem it inadvisable, and do hereby decline to act pending the decision of the courts.

Mr. James Watson, chairman of the stud book committee, reported as follows:

NEW YORK, Sept. 17.—The stud book committee reports as follows as to matters passed upon since the last meeting.

Beagle dog Louie Fitz Lee (26,164).—The owner of the dog gives notice of further information regarding its pedigree, and asks whether the registration will be allowed to stand. He further states that he is advised that persons aware of these facts will take advantage of their knowledge and seek the disqualification of his dog at the field trials. The information is that in the dam's pedigree there is a foxhound cross in the fourth generation, and in the sixth generation it is stated that pointer blood was introduced. Louie Fitz-Lee has been very successful in beagle trials, and has therefore been used a good deal at stud. From a photograph of the dog, it is very evident that he shows nothing but beagle characteristics. Your committee is of the opinion that it would not be well to disturb this registration. We register dogs with nothing whatever beyond the third generation, and in this case the alleged pointer cross, no name of dog or owner being given, is a very remote one, while foxhounds are at least hounds, differing practically only in size from the beagles. This view is also that held by several members of the Beagle Club pedigree committee, to whom, should our recommendation be sustained, the pedigree will be returned as there is yet a little discrepancy as to names, and when straightened out a new registration will be ordered.

English setter Ben C. (26,416).—The breeder of Ben C., four months after the dog had been registered by Joy Bros. informed the A. K. C. that the pedigree was questionable. In response, the present owners volunteered a mass of testimony from reputable citizens of Huron, South Dakota, which conclusively established the fact that Ben C.'s pedigree had never been reported in any other way by the breeder, C. M. Wilson, to the man to whom he sold the dog, nor his subsequent owners. All agree that the present statement is made for the purpose of injuring the Joy Brothers in their breeding and sale of English setters. Wilson has produced no testimony in response, although advised that he could do so, and your committee recommends that the pedigree stand, and C. M. Wilson, of Huron, S. D., be suspended from all privileges of the American Kennel Club.

St. Bernard Lady Gladys (23,043).—An objection was lodged by Mr. A. Russell Crowell to the registration of this bitch on the ground that Valour, the well known English St. Bernard (sire of Mr. Crowell's Nanon), is not the sire of Lady Gladys, and that the pedigree is therefore fraudulent. There is no suggestion in the extended pedigree that the same Valour is meant. In fact, the pedigree, so far as the blood lines is concerned, is valueless, being made up of unknown dogs. The St. Bernard Club committee has, however, passed the pedigree, and we are not disposed to upset it. Lady Gladys, having won at Pacific Coast shows, has claims to recognition, and we recommend that the objection be not allowed.

We have still in our possession the case of E. P. Schell, for alleged fraudulent pedigrees. This is practically the same case as that now ordered before the advisory committee, and we abstain from taking action thereon pending the advisory committee's decision.

JAS. WATSON, Chairman Stud Book Committee.

The recommendations contained in the above report were adopted.

MR. VREDENBURGH—It being in order, I submit the application of the Pittsburgh Athletic Club Kennel, of Pittsburgh, Pa., for admission to membership in the American Kennel Club.

Dr. Cryer moved that it be accepted, and stated that the Duquesne Kennel Club of that city was already a member of the A. K. C. and said that this is the second season that the Duquesne Kennel Club has omitted holding a show.

MR. MORTIMER—I move that the application be not accepted.

Motion seconded and carried. The original motion was lost.

In regard to the communication from the National Beagle Club of America, requesting that said club be given a place on the field trials and coursing meeting committee, on Major Taylor's motion Mr. H. F. Schellhass was elected to fill the vacancy, representing the National Beagle Club.

The secretary called attention to the communication from Spratts Patent, requesting permission of the American Kennel Club to publish electrotype reductions of pictures of dogs as published in the supplements of the *Kennel Gazette*, and stated that they had notified Spratts Patent that their proposition would be submitted at the next meeting of the club. After discussion the request was granted, provided they secure owners of dogs' consent.

THE SECRETARY—At the last meeting the Akron Kennel and Poultry Club was given thirty days' notice to pay its prizes. There was a charge made against the club by W. L. Washington to the effect that he had not received his prizes. The secretary notified said club of the resolution of this club, adopted at the last meeting, to which they have paid no attention. The Akron Club has been dropped from our roll of membership for non-payment of last year's dues, and the resolution adopted at the last meeting was to the effect that if these prizes were not paid within thirty days the officers of said club should be disqualified. It was so ordered.

The case of Mr. E. P. Schell was referred to the advisory committee.

The next order of business being the adoption of the rules governing registration, the secretary read the rules, which, after discussion, were adopted:

1. A dog is eligible for registration in the A. K. C. stud book under either of the following conditions:

(*a*). If it has a full pedigree for three generations, or traces to a registered dog when the pedigree is not so extended.

(*b*). If it has won two first prizes in open classes at a recognized show.

2. No change in a dog's name shall be permitted after it has been published in the annual volume of the stud book.

3. In the event of change of ownership a dog may be entered in a subsequent volume of the stud book, but a new number shall not be assigned to it, reference being made to the old number and volume in which the dog is registered.

4. No list of awards shall be given in connection with a registration, except in the case of a dog only eligible under condition *b* of rule 1, in which case reference shall be made to that fact, and the dog's wins necessary to entitle him to registration shall be quoted.

5. No kennel name shall be given as owner or breeder of a dog unless such name has been registered with the American Kennel Club. The right to be considered the breeder of a dog remains always with the individual or partnership owning or leasing the dam at the time of her being bred.

The request of E. H. Morris to be relieved from the committee on transportation was brought up, in connection with which Mr. Morris recommended that the committee should be continued, with the addition of two or three more members.

Mr. Mortimer moved that the original committee be retained, and that some other member be appointed in the place of Dr. Foote, who resigned from said committee. Motion carried.

The appeal of Mr. T. A. Howard from the decision of the Louisville Kennel Club in the matter of an award of a special prize at its last show, was referred to the advisory committee.

In regard to the charges filed against the Philadelphia Kennel Club for non-payment of prizes at its show, the secretary stated that he had received a letter from the secretary of the Philadelphia Kennel Club stating the claims of the three gentlemen who filed the charges had been settled, as well as all others of which they had any knowledge; that the delay in paying said prizes had been caused by the absence of the secretary of said club for some weeks, but that as soon as he had returned and had received knowledge of any complaints against the club, said claims had been settled immediately. This was considered satisfactory.

The matter of the letter from T. A. Howard, the delegate from the Columbus Fanciers' Club, as published, was brought up for action, and same on motion was referred to the advisory committee.

Concerning the charges made by Martin against Bell, in connection with which said George Bell was disqualified for one year, Major Taylor moved the absolute disqualification of Mr. Bell at this meeting.

Dr. Cryer moved that the secretary be directed to prefer charges against Mr Bell. Motion seconded and carried.

Applications for prefixes were on motion granted as follows: Woodlawn Park Kennels, for "Woodlawn Park;" James Ferris Belt, for "Wawaset;" E. K. Butler, Jr., for "Banty;" Theodore Sturges and Chas. H. Phelps, for "Eldred;" O. W. Donner, for "Milton."

THE SECRETARY.—I desire to call your attention to the fact that we have had a very valuable addition to our records Mr. Watson has presented us with almost a complete set of catalogues from the year 1877 up to date for all shows held in this country. A vote of thanks was extended to Mr. Watson.

Meeting adjourned.

The delegates and visitors then passed into an adjoining room, where a cold collation with champagne was served. Mr. Terry was the toastmaster and called upon those who were expected to speak in the following order, their healths being previously drank in flowing bumpers:

Introductory—"The growth and increasing popularity of our kennel interests"—August Belmont. The American Kennel Club—"The completion of its first decade"—Alfred P. Vredenburgh. Our ex-officers—"Though few in numbers, their support and advice are both valuable and invited"—Elliot Smith. Our ex-delegates—"Though absent in person, we trust they will ever be present with us in spirit"—James L. Anthony. Our associate members—"One of the sources of our strength"—Edward Brooks. The press—"The instructor of the people"—James M. Taylor.

We regret exceedingly that the space taken up by the show reports and other news matter prevented our publishing the speeches in full.

## Canadian Kennel Club's Annual Meeting.

THE annual meeting of the C. K. C. was held in Richmond Hall Toronto, on the evening of Sept. 12, President Dr. J. S. Niven in the chair, and a large number of members present. The president spoke at some length on the affairs of the club and said the most important business to come before the meeting to-night was the proposed agreement with the A. K. C. Minutes of last annual meeting read and adopted.

Secretary-treasurer's report as follows read and adopted, subject to official audit, auditors to report at next meeting of the executive.

SECRETARY-TREASURER'S REPORT.

Registrations.—The total number of registrations is now 3,576, number made during year ending Aug. 31, 1894, 532, number made during year ending Aug. 31, 1893, 868, showing a decline of 336. This is as was expected owing to the withdrawing of the free registration privileges.

Duty on Dogs.—I understand the duty on thoroughbred dogs coming into Canada for breeding purposes has been removed, though there seems as yet to be no clear understanding with the Customs authorities as to this, as the following correspondence will show. No doubt your executive will at once take steps to have this put right:

TORONTO, Aug. 31, 1894.—*Jno. Small, Esq., Collector of Customs, Toronto*: Would you kindly inform me what form is necessary to pass dogs free, as I understand the duty has now been removed, and greatly oblige, H. B. DONOVAN, Sec.-Treas.

TORONTO, Sept. 6, 1894.—*H. B. Donovan, Esq:* In further reference to your inquiry *re* the free admission of dogs for breeding purposes or the improvement of stock, item No. 491, Schedule B, free goods includes dogs, but the Treasury Board has not yet, as far as I know, made any regulation governing their admission. The regulation or Order in Council passed on Nov. 8, 1887, does not include dogs. Until an Order in Council or Regulation by the Treasury Board is made governing the admission of dogs, I do not well see how a free entry can be accepted. THOS. MCLEAN, Chief Clerk.

Membership. The membership roll stands as follows:

| | |
|---|---|
| Number paid for year ending Aug. 31, 1894 | 143 |
| Number paid for year ending Aug. 31, 1895 | 18 |

Agreement with the A. K. C.—This matter with the correspondence and draft of agreement already published will be brought before you for final decision. This I believe to be the turning point in the club's career and both sides of the question deserve the most careful discussion. I do not feel it is my place to advise as to a decision in either way.

Finances.—Following will be found the financial statement for the year. I am sorry to report a deficit, though but a small one:

ANNUAL STATEMENT C. K. C., AUG. 31, 1894.

| | | |
|---|---|---|
| To cash, September, | 1893 | $106 25 |
| " October, | " | 97 75 |
| " November | " | 22 50 |
| " December | " | 13 75 |
| " January, | 1894 | 17 25 |
| " February, | " | 7 75 |
| " March, | " | 26 50 |
| " April, | " | 4 25 |
| " May, | " | 6 25 |
| " June, | " | 23 25 |
| " July, | " | 21 25 |
| " August, | " | 71 25 |
| | | $418 00 |
| By balance due secretary, Aug. 31, 1893 | | $32 74 |
| " Secretary's salary to date | | 191 67 |
| " Postage account | | 67 73 |
| " Publishing Regs | | 54 00 |
| " Advertising account | | 12 50 |
| " Printing account | | 46 75 |
| " Rent of rooms for annual meetings, 1893 | | 5 00 |
| " Postage Pres. account, 1893 | | 2 55 |
| " Refund Regs. overpaid | | 3 50 |
| " E. Brown, engrossing diplomas | | 3 80 |
| " H. C. Stone, clerical help, Totonto show of 1894 | | 6 70 |
| " Sundries, bank charges, express, etc | | 2 95 |
| | | $429 89 |

*Summary.*

| | |
|---|---|
| To cash | $418 00 |
| By cash | 429 89 |
| Deficit balance | $11 89 |

*Liabilities.*

| | |
|---|---|
| Balance due secretary-treasurer | 11 89 |
| President's expenses to New York | 43 00 |
| | $54 89 |

H. B. DONOVAN, Sec.-Treas.

Proposed agreement with the American Kennel Club read, and after discussion it was moved by Dr. Wesley Mills and seconded by Mr. J. S. Williams, and resolved that in the opinion of the C. K. C., as expressed at its annual meeting, the agreement existing between the A. K. C. and C. K. C. up to a recent date, and, as we understand, never legally abolished, was satisfactory, and that this club is in favor of continuing the same.

Letters to the president read from Mr. S. F. Glass relating to his late treasurership.

Moved by Mr. Beddington, seconded by Mr. Sweetnam, that Dr. Niven with Mr. Smith be requested to close account as soon as possible. Carried.

Agreement with the A. K. C.—A lengthy and warm discussion ensued, when it was moved by Mr. Wetherall, seconded by Mr. Lindsay, that proposed agreement be reconsidered. Carried.

Moved by Mr. Klein, seconded by Mr. Sweetnam, that draft of agreement be read point by point.

Moved in amendment by Dr. Wesley Mills, seconded by Mr. Davey, that agreement be discussed as a whole. Amendment carried.

Agreement read again and discussed, when on motion of Messrs. Wetherall and Klein, it was discussed clause by clause.

Clause 3 (Bench Show Rules) rejected. Clause 5 (Delegates) made to read, the C. K. C. "may" appoint three delegates, and added to end of clause "the A. K. C. to be accorded like privileges." Clause 7 (Publication of Registrations in A. K. C. S. B.), on motion of Dr. Mills and Mr. Wetherall, the first line was changed to read, "The C. K. C. shall be free to publish its registrations," etc. Moved by Dr. Wesley Mills, seconded by Mr. Klein, that details in regard to Clause 7 and also details regarding registration be referred to executive committee with power to act. Carried.

Field trial rules referred to executive committee.

H. B. DONOVAN, Sec.-Treas.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

BRED.

☞ **Prepared Blanks sent free on application.**

*Bonnie Buena—Raby Rasper.* A. P. Robinson's (Los Angeles, Cal.) fox-terrier bitch Bonnie Buena (Blemton Vesuvian—Bonnie Bess) to C. A. Sumner's Raby Rasper (Drone—Miscreant), Aug. 23.

*Connie Belle—Bonnie Brush.* C. A. Sumner's (Los Angeles, Cal.) fox-terrier bitch Bonnie Belle (Blemton Vesuvian—Bonnie Bess) to his Bonnie Brush (Le Logos—Bonnie Buzz), July 1.

*Pansy—Bonnie Brush.* A. B. Chappell's (Catalina Island) fox-terrier bitch Pansy (Blemton Vesuvian—Hart's Nannie) to C. A. Sumner's Bonnie Brush (Le Logos—Bonnie Buzz), July 30.

*Doris Blade—Sir Dixon.* Dr. E. C. Myers's English setter bitch Doris Blade to G. O. Smitch's Sir Dixon (Gath's Mark—Esther), Aug. 17.

*Frisky Viola—Bonnie Brush.* T. S. Casey's (Los Angeles, Cal.) fox-terrier bitch Frisky Viola (Blemton Vesuvian—Finnette II.) to C. A. Sumner's Bonnie Brush (Le Logos—Bonnie Buzz), Aug. 13.

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Hilda.* Lawn Gordon Setter Kennels' (Chicago Lawn, Ill.) Gordon setter bitch Hilda (Jack—Becky Sharp), Aug. 17. twelve (nine dogs), by their Regnald H. (Leatherstocking—Smith's Rhoda).

SALES.

☞ **Prepared Blanks sent free on application.**

*Bonnie Brush.* White, black and tan head, fox terrier dog, whelped May 7, 1893, by Le Logos out of Bonnie Buzz, by C. A. Sumner, Los Angeles, Cal., to A. J. Griswold, Nogalez, A. T.

*Raby Rasper.* White, tan patch on eye, fox-terrier dog, whelped June 2, 1892, by E. Cawston, San Francisco, Cal., to C. A. Sumner, Los Angeles, Cal.

*Ealderman.* Mastiff dog, by Beaufort out of Emma, by W. Wade, Hulton, Pa., to C. E. Bunn, Peoria, Ill.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will also receive careful attention.*

J. W. B., Danvers, Mass.—My pointer dog gets used up after a few hours' work, with sore feet and scratches. Is there any way I can harden his feet by an application, and tell me the best wash to use on his feet after a day's hunting; also how to rid the dog of fleas. Ans. Soak the feet for ten minutes twice a day in a solution of creolin (1 to 40); afterward apply the following ointment:

| | | |
|---|---|---|
| ℞ | Ichthylo | ʒ ii. |
| | Bismuth sub nit | ʒ iss. |
| | Mg. zinci | ʒ iss. |

Mix. Sig. Apply to sore twice a day. For fleas, when washing the dog, add a pint or more of kerosene to the water or rub him all over with a mixture of one pint of kerosene and two pints of cotton-seed oil.

E. J., Boston, Mass.—Write to Netherwood Farm Kennels, Plainfield, N. J.

J. M., Irvington, N. Y.—My Irish setter dog has a habit of suddenly dashing out of his kennel and howling as if in pain, and at the same time sitting on his haunches, and his belly works as if in convulsions. Then he will wind up with licking his jaws and lying down, as if relieved. The dog is about six years old. Ans. Treat for worms.

G. S. B., Newport News, Va.—1. I have two setter dogs. One has an occasional involuntary discharge of urine of a milky appearance, and sometimes blood in the same manner. He has been in that condition for a year or more. The blood and urine come in drpps. 2. The other one has a skin disease, which commenced three years ago on his stern around the roots of his tail, and turned the hair red and it has come off in spots. There are hard lumps under the skin where it is bare. It has now spread over different parts of the body. He is scratching continually. Ans. 1. Without a personal examination we cannot advise you on this. 2. Treat for worms. Give following mixture:

| | | |
|---|---|---|
| ℞ | Mag. sulph | ʒ i |
| | Ferri sulp | ʒ i |
| | Acid sulph. dil | ♍ i |
| | Aq. ad | ʒ viii |

Mix. Give one tablespoonful twice a day. Well rub all over the dog the following dressing: Kerosene, 1 pint; cocoanut oil, 1 lb.; sperm oil, 2 pints. Apply every other day for a month.

# Hunting and Coursing.

## FIXTURES.

FIELD TRIALS.

Oct. 23.—New England Beagle Club, at Oxford, Mass. W. S. Clark, Linden, Mass., Sec'y. Nominations close Oct. 1.
Oct. 29.—National Beagle Club. Geo. Laick, Tarrytown, N.Y., Sec'y.
Nov. 5.—Brunswick Fur Club. Bradford S. Turpin, Dorchester, Mass., Sec'y.
Nov. 7.—Northwestern Beagle Club. Louis Steffen, Milwaukee, Wis., Sec'y.

COURSING

Oct. 9.—American Coursing Club's meeting at Huron, S. D. L. Zutaverne, secretary. E. H. Mulcaster, judge.
Oct. 16.—Kenmore Club's annual meeting at Goodland, Kan. C. F Weber, secretary. E H. Mulcaster, judge. R. Taylor, slipper.
Oct. 23.—Western Kansas Coursing Club's meeting at Leoti, Kan. W. O. Allphin, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Oct. 30.—Cheyenne Coursing Club, at Great Bend, Kan. Ira D. Brougher, Sec'y.
Oct. 30.—Altcar Coursing Club's autumn meeting at Holyoke, Col. S. W. Vidler, secretary. E. H. Mulcaster, judge. R. Taylor, slipper.
Nov. 14.—California State meeting at Merced, Cal. J. R. Dickson, secretary.

### The Greyhound Stud Book.

*Editor Forest and Stream:*

As the rules of the American Coursing Board have never been published in full and are not generally familiar to either the public or patrons of coursing, will you kindly publish the following rules relating to registration? Dogs that are now registered in the National Greyhound Stud Book are entitled to free registration in the American Coursing Board Stud Book. Any one desiring registration blanks will be supplied upon application to me.

ROGER WILLIAMS, Keeper Stud Book A. C. B.

LEXINGTON, Ky.

Rule 4. The colors, sex, names, pedigrees and ages of all greyhounds, with the names of their owners, and the owners of their sires and dams, shall be registered in a greyhound stud book. The registration fee shall be twenty-five cents for each dog registered. The keeper of the stud book shall give a receipt for the registration fee of every greyhound, which shall be called a Certificate of Registration.

Rule 5. The greyhound stud book shall be published under the authority of the American Coursing Board, on Nov. 1, or as soon after as possible. No greyhound shall be allowed to run at any coursing meeting held after Oct. 1, 1894, unless it shall have been duly registered in the greyhound stud book.

Rule 6. Applications for registration of greyhounds shall be made on or before the first day of July, and registrations applied for subsequent to that date that do not appear in the stud book of that year will appear in that of the following year.

Rule 7. If the same name has been given to more than one greyhound, the keeper of the stud book shall give priority to the dog first registered, and all other dogs of the same name must be renamed before they can be registered.

Rule 8. All greyhounds whose names do not appear in the stud book or whose owners cannot produce a certificate of registration from the keeper of the stud book, on being requested to do so by the committee of any coursing meeting, shall be disqualified, and shall forfeit all entry moneys which may have been paid, and any stake or prize or share of any stake or prize won at such meeting, and such entry moneys, stake or prize, or share thereof, won by any dog so disqualified, shall be disposed of as provided by rule 37, applicable to disqualification.

• • • •

### American Coursing Club's Meeting.

MR. J. HERBERT WATSON, the secretary, writes us that the eighth annual meeting of the American Coursing Club will be held at Huron, S. D., on Oct. 9, and following days, instead of Oct. 2, as previously announced. This change has been made necessary by the abandonment of the North Dakota Club's meeting at Oakes.

The Huron people have added $200 in cash and they anticipate a most successful meeting. This will be assured if the Eastern sportsmen who have greyhounds will ship them at once to Huron. If men like Mr. N. Q. Pope, who have plenty of material, will support the meeting by making entries, they will do much to encourage the sport and may rest assured that they will have just as fair a chance to win as though they were present at the meeting in person. Any dogs shipped to Mr. John Longstaff, Huron, South Dakota, will receive the best of care, and will, if requested, be handled before and during the meeting by a competent and honest trainer at a very small expense to the owner. Eastern sportsmen who would like a gallop on the Plains and see some of the most exciting coursing to be found on earth should not miss this meeting, for once experienced we are convinced that it would not be long before they had a team of longtails and were down with the form in real earnest.

• • • •

### Northwestern Beagle Club's Field Trials.

*Editor Forest and Stream:*

A meeting of the field trial committee of the Northwestern Beagle Club was held on Sept. 16, at 2 P. M., at Milwaukee, Wis. There were present G. A. Buckstaff, H. A. Dillingham, E. H. Rummele, Fred F. Merrill, Chas. Niss, Louis Steffen. The minutes of the last meeting were read. The committee appointed to select grounds reported in favor of Columbus, Wis., which place was chosen. Mr. Joe Lewis, of Moodus, Conn., and Mr. Chas. C. Sidler, of Milwaukee, were chosen as judges. The entry fee is only $5, and a large entry is expected. Over $3,000 worth of valuables will be distributed among the winners in addition to the cash. Hotel rates have been secured at $1 per day for all wishing to attend. Transportation to and from the grounds, 50 cents a person. It is not necessary to be a club member in order to run dogs in these trials, they are open to all. Premium lists and entry blanks will be ready in a few days and will be sent to all parties known. Those that do not receive any will please send in their address. Columbus is on the La Crosse Division of the C. M. & St. Paul R. R., 63 miles northwest from Milwaukee. Any other information will be cheerfully furnished. LOUIS STEFFEN, Secretary.

781 THIRD ST., Milwaukee, Wis.

• • • •

### Higher Entry Fees.

DENVER, Col., Sept. 15.—*Editor Forest and Stream:* In reply to Dr. Q. Van Hummell, in your issue of Sept. 15, I would state that the $5 entry fee for Altcar Produce Stakes had nothing to do with the entry fee of the Kenmore meet last fall, inasmuch as the Kenmore Club did not have any Produce Stakes, and therefore we could not copy them in that respect. My article states that our executive committee followed the example of the Kenmore meet to a certain extent. In so far as they could follow the example of the Kenmore meet they did so, to wit, in fixing the fees for members in the Puppy Stakes and the Aged Stakes, at $10. Had the Kenmore Club had any Produce Stakes they probably would have followed the club in that respect, but as the Altcar Club were the first in the field with a Produce Stakes, it follows that they had no precedent to follow in this country, and therefore the executive committee fixed the fees at the figure they deemed best. As the Kenmore Club did not go beyond an Aged Stake and a Puppy Stake, the executive committee could not follow their example any further; but to this extent in regard to fees of the Altcar Club they did follow it. L. F. BARTELS.

• • • •

## HUNTING AND COURSING NOTES.

A few weeks since we spoke of the draft of foxhounds that Mr. Wadsworth, master of the Genessee Valley Hunt, had imported from England. Five couple were from the Holderness Hunt, that good old Yorkshire pack that hunts over the chalk wolds, and to the music of their progenitors we have enjoyed many an exciting run, and their advent brings to mind the day when Miss Hall, the daughter of old Mr. James Hall, the master, familiarly called "Pop" Hall, pounded the field at that sluice near Market Weighton. The spirit to follow was willing in most of us, but the horseflesh was weak. If these new hounds live up to the speed and stamina of their sires and dams some fast fun is in store for the Genessee men. The names of the new dogs, kindly furnished us by the master, are as follows: Jailer, by Belvoir General—Holderness Rosemary. Saucebox, by Belvoir Shamrock—Holderness Laundress. Warden, by Belvoir Saracen—Holderness Woodlark. Fielder, by Holderness Batchelor—Holderness Flourish. Silvia, by York & Ainstey Falstaff—Holderness Skillful. Songstress, by Holderness Ajax — Holderness Singwell. Audible, by Holderness Gaffer—Holderness Aspen. Barmaid, by Holderness Bellman—Holderness Willing. Blemish, by Holderness Bellman—Holderness Willing. Beauty, by York & Ainstey Falstaff—Holderness Brazen. The others were from Lord Fitzhardinge's pack—the Berkeley.

• • • •

Through the courtesy of the keeper of the English greyhound stud book, Mr. W. F. Lamonby, we are in receipt of the thirteenth volume, containing the names, colors, ages and pedigrees of greyhounds registered up to July 1, 1894. The registrations show a marked increase over those of last year, numbering 4,374 against 3,674. The number of individual owners who registered dogs during the past year is 1,627, 266 more than in 1893. The new rule compelling owners to register litters within two months of whelping, which came into force Jan. 1, is a success, no less than 636 litters having been registered up to the end of June. The "Pedigrees and Index of Winning Greyhounds" in 1893-94, compiled by Capt. Ellis, is a valuable feature of the book to all greyhound breeders, and "Dromas" again contributes a "Review of the Past Season," which is very interesting. Next year it is promised that all the registrations of the year will appear under an alphabetical list of sires, so that sires, dams and their produce may be seen at a glance. According to the list of sires and the bitches that have been mated to them, Herschel and Young Fullerton seem to have been the favorites. The pictures of leading lovers of the leash are by no means the least interesting features of the book. Texture and her trainer, Mr. James Cowlin, are given, as well as Mr. Salter, Mr. James Hedley and others.

• • • •

The Altcar Club, Mr. L. F. Bartels informs us, have changed the place of meeting from Holyoke, Col., to LaCrosse, Kans. The date of the meeting will be Oct. 30 and following days, as announced. It is expected that the Cheyenne Club will change their dates to the week following, so that there will be no conflict. The change in Altcar dates and location was made to suit the coursing men, for the location of LaCrosse is better for those desiring to attend the different meets. It was quite a distance to go from Great Bend to Holyoke, especially after the dogs have been knocked about for a month. Under the present arrangement it makes it easier on the coursers' pocketbooks, easier on the dogs, shorter distances to travel, and saves time to rest the dogs after each meet. In making this change the Western boys from Colorado have put themselves out no little, as by going to Lacrosse they have to travel 400 miles from Denver, instead of only 180 to Holyoke.

• • • •

The entries for the National Beagle Club of America's field trials will close on Oct. 8. GEORGE LAICK, Secretary, Tarrytown, N. Y.

### Interstate Fair at Trenton, Sept. 24 to 28.

The great Interstate Fair at Trenton grows more extensive and important each succeeding year, and the exhibition to be held from Sept. 24 until the 28th, inclusive, promises to be unusually attractive and comprehensive. Every department is replete with interesting and instructive sights. The blooded stock is particularly fine and the daily programme of races contains the speediest classes obtainable. Circus acts of rare merit and daring, and vaudeville entertainments of all kinds will be presented.

The large purses offered for supremacy in the manifold species of exhibits and contests insure earnest efforts in the endeavor to prove superiority and excellence in the various departments.

The Pennsylvania Railroad, as is its yearly custom on this occasion, will sell excursion tickets at greatly reduced rates from many of its principal stations within a wide radius, and special trains over the New York, Belvidere and Amboy Divisions will be run *direct to the grounds*. The tracks of this company are the only ones within three miles. Extensive preparations have been made by both the management of the Fair and the railroad company for the accommodation and the convenience of the thousands who will not fail to attend an affair of such increasing importance.—*Adv.*

# Yachting.

## FIXTURES.

SEPTEMBER.

29. Miramichi, Race, Chatham to Newcastle.
29-30. San Francisco Cor., Cruise to McNear's.

OCTOBER.

6. Cor. Phila., Sweeps, Del. River
13. San Francisco Cor., Final Sail.
20. Cor. Phila., Club, Del. River.

WE publish this week a specific repudiation on the part of Mr. H. Maitland Kersey of an alleged interview with him which appeared some weeks since in the Boston *Herald*. Another story of the *Herald's* which we recently reprinted, attributing the blackballing of Mr. A. D. Clarke by the Royal Yacht Squadron to the adverse influence of Lady Algernon Gordon Lennox, is now contradicted by the *Yachtsman*, which pronounces the report to be totally untrue.

### A Pilot's Responsibilities.

THE question of the duties and responsibilities of a pilot has come up several times this season for discussion in relation to Vigilant and her British pilot, Capt. Diaper. In the case of a racing yacht there are other considerations than the mere legal ones, but these are at the same time the more important. The following, from the *Marine Journal*, deals very thoroughly with the legal side:

We are asked what is the legal relation of a pilot to the master of a vessel, and how far is pilot liable for the safety of the vessel on board which he may be acting?

Answer—The pilot is subordinate to the master when he is on board, and is required to possess all the knowledge requisite for the safe navigation of the vessel.

In the case of Atlee vs. Packet Co., 21 Wall. 389, the Supreme Court of the United States defined his qualifications in the following words:

"The character of the skill and knowledge required of a pilot in charge of a vessel on the rivers of the country is very different from that which enables a navigator to carry his vessel safely on the ocean. In this latter case, a knowledge of the rules of navigation, with charts which disclose the places of hidden rocks, dangerous shores, or other dangers of the way, are the main elements of his knowledge and skill, guided as he is in his course by the compass, by the reckoning, and the observations of heavenly bodies, obtained by the use of proper instruments. It is by these he determines his locality and is made aware of the dangers of such locality, if any exist. But the pilot of a river steamer, like the harbor pilot, is selected for his personal knowledge of the topography through which he steers his vessel. In the long course of a thousand miles in one of these rivers, he must be familiar with the appearance of the shore on each side of the river as he goes along. Its banks, towns, its landings, its houses and trees and its openings between trees, are all landmarks by which he steers his vessel. The compass is of little use to him. He must know where the navigable channel is in its relations to all these external objects, especially in the night. He must also be familiar with all dangers that are permanently located in the course of the river, as sandbars, snags, sunken rocks or trees, or abandoned vessels or barges. All this he must know and remember and avoid. To do this he must be constantly informed of changes in the current of the river, of sandbars newly made, of logs or snags, or other objects newly presented, against which his vessel might be injured. * * * It may be said that this is exacting a very high order of ability in a pilot. But when we consider the value of the lives and property committed to their control, for in this they are absolute masters, the high compensation they receive, and the care which Congress has taken to secure, by rigid and frequent examinations and renewal of licenses, this very class of skill, we do not think we fix the standard too high."

Judge Clifford, one of the judges of the Supreme Court, wrote the opinion in Camp vs. the ship Marcellus, an appeal in admirality from the District Court to the Circuit, tried by him, which is reported in the first of Clifford Reps., 491. He said:

"While on board, the pilot, in the absence of the master, has the exclusive control and direction of the navigation of the vessel; but if the master is present, the power of the pilot does not so far supersede the authority of the master that the latter may not, in case of obvious and certain disability, or gross ignorance and palpable and imminently dangerous mistake, disobey his orders and interfere for the protection of the ship and the lives of those on board. Divided authority in a ship with reference to the same subject matter is certainly not to be encouraged, and can never be justified or tolerated, except in cases of urgent and extreme necessity. While standing by and witnessing a self-evident mistake, manifestly and imminently endangering the ship, and certain to cause a collision, the master should not remain silent, but might well interpose, so far at least as to point out the error and suggest the proper corrective."

In the case of the Earnmore, 44 Fed. Rep., 376, Judge Brown said:

"It is, perhaps, but reasonable to assume that the master had by this time perceived that the pilot had been drinking, and was under the influence of liquor, and feared to trust him. In such a situation he was called on to exercise his best judgment—whether to resist the pilot openly, and go according to his own judgment, or to come to anchor. The situation was an embarrassing one."

### Current Comment.

THIS has been the most remarkable year since 1851, and when the slight degree of friction occasioned by the unfortunate occurrences to the Vigilant has passed away it will be universally admitted that the pressure has been beneficial not only to the racing fraternity but to the pastime. The whole intercourse of the great English-speaking countries cannot be better promoted than by peaceful contests between vessels. These contests may engender a little bad blood between individuals, but they create good will among nations.

What appeals to us most is the effect of the international rivalry upon yachting. It may be expected that the visit of the Vigilant will largely increase the demand for yachts, and we believe that the Vigilant's voyage will prove a lesson to our designers. The excellence of her 'bronze beauty' is undoubted. Given her own rules and her own elements and it will not be a foregone conclusion for the Britannia. In the Vigilant her designers had a splendid opportunity. Heretofore we have built yachts for this clime instead of America.

"The Yankees have pursued a parallel course, being defenders and not challengers. The Vigilant may be a boat for one kind of weather, but we believe the lesson of the season teaches us that the Britannia cannot beat the Vigilant under New York rules, in the vicinity of Sandy Hook. In the past, designers have always made the mistake of using the experience gained here to determine the type most effective there. The Vigilant has shown us the folly of this proceeding, and if we read the lesson aright the America's Cup will soon come to the land to which it belongs.—*The Yachting World.*

English workmen are not accustomed to bronze centerboards, but at the same time, it is not unlikely that the first accident to the boat was caused by a strain upon some part of the mechanism which had been overlooked. Nevertheless, it is a remarkable coincidence that in each case the breakdown occurred in the same locality while the boat was on the same errand. Perhaps all this comes from sailing on Sunday. Mr. Gould is a sportsman, and we sympathize with him in the ill luck he has sustained with his bronze beauty. His trip must have cost him a fabulous amount of dollars, and the result in respect of glory is very little. The Vigilant is an undoubted giant, but she met another giant who was a trifle her superior. The repeated damage to her centerboard does not impress our yachtsmen with the advantages of the contrivance, and few owners of yachts would make such victims as Mr. Gould, who has been compelled to scratch two out of three races in which he especially desired to compete. It was a cruel fortune.—*Yachting World.*

A great many of us are old enough to remember the murmurs and growls there used to be at the old club rule which declared a race null and void if not finished before 8 P. M. or 9 P. M., as it might please a committee to determine. In 1875, when the yacht owners drew up their own rules, this closing time was abolished, but the Royal Dart Y. C. adhered to it in a special form, altered from time to time, the intention of all meaning that the duration of the race should be limited. The American clubs have a similar rule to pursue, so far as possible, that the matches are sailed in a good moving breeze, so that the yachts are fairly tested. This, no doubt, is all very well in America, and at one time might have been unobjectionable in this country; but, as far as we are concerned, the time limit is quite an obsolete precaution. There are now no days for re-sailing matches, as the yachts have just as much as they can do to get from port to port to fill their engagements, according to the fixtures; the result is that declaring a race null and void simply means leaving the prizes in the hands of the clubs; in fact, if the time limit had been generally adopted this season, at least half the prizes would have been retained by the clubs. Considering the cost of a day's racing, it is small wonder that yacht owners always objected to race twice—or it might be half a dozen times—for the same prize, and it is a matter of surprise that the sailing committee of a well managed club like the Royal Dart should not recognize the objection and do the same as other clubs do—stop the races early in the afternoon when there is no prospect of their being concluded by sundown.—*The Field.*

Comment on the Vigilant's record should not be closed without a word or two about "jockeying." The British press has made somewhat sarcastic comments on the complaints in some American papers about the "unfairness" of the Britannia's tactics in "weather-bowing" Vigilant in going to windward, or in "jockeying" her by luffing to prevent her passing when on a reach.

The comments are justified, and the American papers making the complaints have not known what they were talking about, or have made them from misplaced patriotic motives. No such complaints have come from those who were at all posted in the rules or practice of yacht racing. On the contrary, they have had a full appreciation of the skill of Britannia's skipper and the speed and handiness of his boat which enabled him to do these things. The wisdom of so doing in some cases has alone been questioned.

In almost every race the Britannia has secured the weather berth, as much by reason of her quickness of movement as in any other way, and has thus been able to "weatherbow" the Vigilant for a time at least. In the light-air races she has been able to keep this position, but in stronger breezes Vigilant has always crawled out from under her lee, and when once clear has gone away so fast as not to need a return of the tactics. There is no "unfairness" here, nor in "blanketing," or taking another boat's wind by luffing across her stern when running off the wind with spinnakers set.

Nor is there any "unfairness" in luffing to prevent a boat from passing to windward on a reach. The question is then simply one of judgment as to whether it is better to go away off the course in a "luffing match" and let a following boat profit by it, or to go on about your business and depend upon your speed.

In forcing a "luffing match," honors appear to be easy between the boats. Britannia was apparently in bad judgment when she forced the Vigilant so far in shore on the south side of the Isle of Wight that both boats grounded, while Vigilant was certainly in error in starting the "luffing match" with Britannia, which let Satanita win the prize.

So far as the writer has been able to see from the accounts of the racing, there has been no unfair "jockeying" on either side, but plenty of good "up and up" sailing.—*Boston Globe.*

## Displacement as a Factor of Measurement.

*Editor Forest and Stream:*

The question of measurement is being agitated in consequence of a well-grounded dissatisfaction with the present racing model, and a belief that there can be built a boat not only faster and more able but of a model with merit in regard to utility. The engineers of former days decried the idea of ever making an iron-clad fast, dry, and seaworthy. Thus to-day we are told that a fast boat cannot be a comfortable cruiser; or in other words that a comfortable craft such as we would desire for a world's cruise and whose model would make a profitable merchant craft, cannot be built to sail faster than the modern cracks.

This is untrue, as the thing has been done. There are fishermen of Vigilant's length and less sail area that make 13 knots in a good breeze on the quarter, and are able boats to windward. Vigilant's best record on one leg is 12 knots. There was built for the lake trade in 1854 the two-masted topsail schooner Clipper City of 100 tons register.

Loadline.....97.33ft. Weight of hull equipped.....121.5 tons.
Breadth extreme..27.72 ft. 110,000ft. lumber(3-5 on deck).....185.0
Draft.....7.5ft.
Centerboard..24ft by 9ft. Displacement on 7.5 draft.....306.5 tons.

Her mid-section had a nearly flat floor. She could sail without ballast, never rolled over 5 degrees, and never buried her bow or shipped solid water when sailing over 16 knots in a heavy sea. The harder it blew the faster she sailed. She sailed 25 miles in 80 minutes in a heavy lake sea, and a lake sea is as troublesome as that on the ocean. This is 16.5 knot speed. She sailed 90 miles from Chicago to Milwaukee in less than 5 hours. This was done with a heavy deck load equal to .4 her displacement, instead of carrying her weight in a lead keel as the modern cracks do. Yet there is not a yacht in existence that can approximate her speed. She would not be over 100ft. sailing length.

Why after all our boasted improvements and extra 40 years experience do we find boats in which everything is avowedly sacrificed for speed full four knots slower corrected time than a 97ft. schooner built 40 years ago with a view to utility and profit? It is as much a fact that this schooner, year in and year out, logged 12 to 16 knots in anything like a good breeze, as is the fact that Vigilant cannot be driven over 13 knots. Designers are on the wrong tack. "There is something rotten in Denmark."

Despite the heresy of refusing to bow down to the pet designers of two continents, I claim that the shovel bow is useful only as a length cheater. When every pound a boat carries in a race has to be on her when measured, as it undoubtedly will in the near future, the shovel bow and the round lines that made it will be consigned to the oblivion from which they should never have emerged. It is possible to obtain a fair amount of speed with great resistance and great power, as exemplified by Vigilant; but undoubtedly the boat of greatest speed is the boat of least resistance, coupled with good driving power. In the convex line the angle of the entrance is greatest at the cutwater, where it should be least. It is a notorious fact that the latest boats with very full shovel bows pile up as great a wall of water on their bows as the bluffest old freighting tub. No further evidence is needed that their model is slow. "From the law that governs waves we may learn two things in relation to the shape of vessels. First—Inasmuch as the ocean wave only breaks when the depth below the level is less than the height above the level, so the bow of the vessel never breaks the surface of the water into foam unless the resistance be greater than the atmospheric pressure on the surface. Second—That as an abrupt beach causes the whole wave to fall over on the shore without previous notice, so an abrupt bow, or the round lines of flotation, cause the water to be heaped up at the anterior extremity; and as the breaker on the surface of the water is an index to the fullness in the bottom, so the wave generated at any particular part is an index that the vessel and the water are not adapted one to the other." Full round lines give a greater displacement with more lead and canvas; but this extra power is not sufficient to counterbalance the greater resistance—in fact, power enough to rend the vessel would not drive such a model fast. Water can be moved from a vessel's path only by an easy motion given by fine lines and the displacement arranged longitudinally with regard to the resistance to be encountered at the desired speed. We may have, and should have, great beam and still have a fine entrance. The use of round lines is only a futile attempt to reverse the immutable laws of the universe.

Frictional resistance is in inverse ratio to the speed; for it is so much resistance in a given time regardless of the speed, thus having less effect per mile as the speed increases. Wave making resistance increases as the square, cube, fourth and fifth powers in progression as the speed increases. Thus a vessel with a great wave-making tendency is brought very suddenly to a speed that nothing can increase. This is the case most emphatically with the "Gloriana bow." A vessel of moderate displacement to dimensions, with fine lines, and especial care to the longitudinal distribution of buoyancy, and a like distribution of weight of hull to guard against warring elements of strain, will have no appreciable wave-making tendency at even what is now thought phenomenal speed. Her resistance factor would be mainly friction, which is a constant quantity; thus she could utilize all obtainable power in overcoming friction, and not be handicapped by raising a wall of water against one ton a foot pressure at increasing powers. Such a vessel would sail faster in direct ratio to the increase of wind propulsory power. There is a limit to speed before the wind because the apparent wind is less just the speed of the vessel. With strong wave-making vessels have sailed before the wind at two-thirds to three-fourths its speed. With a model with friction the main resistance, nine-tenths the speed of the wind may be attained. On the wind the apparent wind increases at greater speed, but the forward exponent of power is relatively so small that the increase must be great to obtain equal speed; but a vessel encountering friction and but slight transverse waves can sail faster through the water on than off the wind. With the wind abeam she may make a speed quite equal to that of the wind. Of course every model creates transverse waves at some speed, according to the speed for which the model is adapted. What I mean to emphasize is that boats under 100ft. length can be so built that transverse waves and increasing powers of resistance will not be encountered under 15 knots. In a word, that this speed can be reached in moderate weather with a rational sail area; but the model must be built for small resistance in transverse wave-making, for when this occurs at the cube of speed the driving power is not economical, especially with a tax on sail. Also, the maximum speed of a vessel is found when the transverse wave resistance is increasing as the cube, and any power applied to drive beyond this is wasted. A fine vessel of Vigilant's length can be driven as fast on 8,000ft. canvas. Valkyrie is finer, but all the new boats create transverse waves at eight knots speed.

Furthermore, remember that length is not such an all-powerful exponent of speed as has been claimed. It is not necessary to have a ship 500ft. long to obtain an economical speed of 20 knots, it may be had on half the length. Economical speed is found below the cube resistance, and this depends far more on model than on length. A larger vessel of the same model will be faster, but because a vessel of different build is a few feet longer is no sure indication of her being faster. A long, narrow craft is faster reaching than a shorter, broader one; not because she is longer on the waterline, but because she has greater excess of lateral over longitudinal resistance. Shake off the mania of demanding great length for great speed instead of working for it in excellence of model, where it alone can be attained! Built properly, the broader boat should have the finer lines; but this can never be with round lines. Then she is the fastest on all points and in all weathers. In fact, it is possible to obtain the form of least resistance and sufficient stability only in a beamy boat, 3.5 beams at least.

There is but one thing to be settled in yacht racing—the fastest model of given weight and driving power. The one question which the yachting, commercial, and naval world is waiting to have solved is the best distribution of a certain weight of displacement to obtain the greatest speed. Dimensions have nothing to do with the question; it is certainly unfair to race vessels of 100 and 150 tons displacement on equal terms as done with the Cup defenders. We hear of a fast cruiser of 4,000 tons and 12,000 I.H.P., we hear of another of 7,500 tons and 21,000 I.H.P.; they have the same speed, and are we surprised? Do we dream for a moment that the larger vessel should have the least power, that she should be taxed for the extra 9,000 I.H.P. to drive the extra weight. *The canvas of a boat should not be taxed except for excess of area in relation to displacement over the ratio of another boat.* This is a tax on light displacement and the fin-keel; both inimical to the "true sailorman's boat." A tax on sail area is a tax on power, and as a greater power is needed for a greater weight, the displacement is decreased and the depth of lead increased for greater ratio of driving power or equal ratio and time allowance. Result—fin-keels and extreme cutters of same section. With displacement out of the question and only sail area on length to regard, the smallest displacement on a given length needing the least power to attain a certain speed is the fastest under the rule. Under the present rule we can hope for nothing in the future but more extreme fin keels than yet produced—46ft. aluminum fin-keels of 20ft. draft and only ten tons displacement, until the displacement is barely above the weight of hull and the fabric is so weak that all its votaries are drowned. Let no one say, "Retain them because they are fast," they are faster than others under the discrimination of the present rule, but in actual speed in knots per hour they are not faster than boats of better type.

No rule is equitable without displacement as a factor. In all mechanics the main question is the load and velocity, the desideratum being the greatest load at the same power and velocity, the greatest speed with the same power and weight, or the least power with the same load and velocity—all tending in the direction of least resistance. The fault with previous displacement rules is that the greater displacement had to give time to the less without regard to the fact that a larger weight needs more power for the same speed. This inevitably leads to the fin-keel as the exponent of least displacement and greatest power—for an exaggerated fin can carry more sail than the Vigilant type. Sail as the exponent of power should be considered, since the converging point of all our efforts is economical speed—the model of equal weight that requires the least power for a given speed.

If one pound pressure exerted upon canvas will propel a certain number of pounds weight through the water at a given speed, then one pound force exerted upon another vessel should propel an equal number of pounds weight at the same speed if the models are equally good—and the advantage should be given to the better model as that which we wish to adduce. It may be assumed that the wind pressure per foot is equal upon two vessels sailing in consort, hence we may claim that if two models are equally capable of speed (there being no great disparagement in length, though widely differing in breadth, draft and section), they should attain the same speed with equal ratios of sail area to disagreement. If they do not, the vessel requiring the least ratio for equal speed (in other words, the vessel in which one pound force propels the greatest weight at equal speed) is the better model, and should have the benefit of the advantage given under the proposed rule. This is the only scientific rule, though somewhat difficult in operation. As before stated, the load carried, the velocity attained, and the power to accomplish it are the only things that need considering, and they must be considered, or no definite settlement of the best model will ever be made.

| | | | Actual S.A. | Allowed S.A. | Extra S. taxed. | Do. correct. |
|---|---|---|---|---|---|---|
| Vigilant | (about) | 150 t.D. | 11,300ft | 11,300 | ..... | ..... |
| Colonia | " | 140 " | 11,000ft. | 10,500 | 500 | ..... |
| Jubilee | " | 120 " | 10,000ft. | 9,000 | 1,000 | ..... |
| Pilgrim | " | 100 " | 10,000ft. | 7,500 | 2,500 | 1,625 |

Beginning with the larger, Vigilant has 75ft. per ton displacement. At the same ratio of power to displacement Colonia is allowed 10,500ft, Jubilee 9,000ft. and Pilgrim 7,500ft. without time allowance. All over these amounts must be paid for. Colonia has 500ft. more than allowed and should give an allowance to Vigilant equal to the extra speed that the extra 500ft. should give Colonia. Herein lies the difficulty of operation at first, but it is the only fair test of a yacht's capabilities and just manner of allowing time. At first the allowance must be estimated much as it has been in the past, until a broader knowledge is gained of the influence of certain areas of canvas upon vessels of varied form. The justice of this classification can be easily seen not only by its manifest subservience to nature's law, without which no success is assured, but by the light of experience in the comparison of Vigilant and Colonia. Colonia is if anything slightly faster off the wind, but slides off frightfully, due to want of keel. With sufficient draft, or with a centerboard, she would no doubt prove slightly faster than Vigilant on a wind. Colonia would allow Vigilant 5 to 15 seconds, and this should equalize the greater speed due to Colonia's finer lines. They are very near alike, and except for Colonia's want of keel, of about equal merit in model. Thus experience shows the equity of this rule. If Jubilee and Pilgrim cannot attain equal speed on the same ratio of power they are not as good models, and should bear the penalty. This illustrates the working of the proposed rule in discouraging the production of "freaks."

No fear need be entertained of very heavy displacement, for experience has shown that such a model has not stability to carry the canvas to make her fast with her full lines and sections. Furthermore, the transverse wave-making tendency is so strong in her that she is debarred from making great speed; and the sail area required for equality at low speeds would exceed the area allowed, or be above the ratio, and be therefore taxable. The last is true of very small displacement, that the ratio allowed in comparison with moderate displacement gives too little area for speed, and the taxable amount is too large to be profitable. Thus vessels must be of medium displacement, which engenders all the good qualities besides speed under a fair rule. They must also be of medium dimensions (beam and draft) for the boat that carries the largest ratio of sail area to displacement must give allowance. There will be a fairly wide margin within which designers can work for the "golden mean," without fighting so shy of it as of late. Fin-keel construction will be ended in its most exaggerated form at least; because, first, the area she carries by aid of her deep, loaded fin is unprofitable; second, the amount allowed can be carried without or on a small fin; third, as before shown, the small displacement is likely to be forced out of competition because of the great chance of losing in the first place by time allowance and the second by actual time. Under such a rule the type of least resistance (that most adapted to moving water from its path with least disturbance in consequence of obeying the laws of fluid action) will not only be found the fastest in actual speed in knots per hour, but fastest under the rule. This, of necessity, must be of moderate dimensions and displacement, with fine lines to create little but frictional resistance, and its greatest merit will be "speed, safety and comfort" in an extra degree. This is not only the scientifically correct model of greatest speed, but the "true sailorman's yacht" of comfort and seaworthiness—in fact, a type of fast cruiser for racing. Such has been attained in a form adapted to practical utility, and unfettered brains should be able to do it again. If we cannot reproduce or improve the work of our fathers, the great seafaring race of Anglo-Saxons had better forswear the sea in disgrace as the chickens of a mother duck. In our mortal wisdom we may never attain the "golden mean" of absolute greatest speed; but the proposed rule will point in the right direction, or at least stop hindering designers from aiming that way.

Although computing allowance according to ratio of sail area to displacement, yachts should be classed according to length on the loadline. Present knowledge is too limited to estimate the exact extent of influence of extra length on dissimilar models. Therefore, vessels of equal displacement and unequal length should not be classed and raced together, even under a rule with displacement as a factor. No rule or time allowance table ever formulated could make a fair race between 46 and 87-footers. Time allowance cannot be made exactly correct; therefore the limits of classes should be very circumscribed to make the error inconsiderable. Outbuilding is baby's play; it does not settle the question of better model and should be penalized. Take, for example, the 75ft. class. The displacement should be computed at the time of measurement by the measurer or sailing committee to the actual measured waterline from the design verified as having been built from (not a difficult process to a competent hand, when the displacement calculations of the designer have only to be verified; and when models have to be given, the showing of design should not be refused a private committee). This should be compulsory early in the season—subsequent changes in displacement can be easily computed between the changed waterlines, though all remodeling should be done before the year's racing begins. If this last is enforced, boats will be out earlier with better success. A man, except from habit, can just as well know in September whether he wants a new boat next season as he can in December. As most convenient, find the ratio of sail area to displacement in one boat; and from that find the amounts thus allowed to the rest. Allowance will then be given to or received from, these according as their areas are less or more than an equal ratio. The amount of allowance should be what the committee decides such extra areas are worth—no more difficult than now. The above, however, presupposes the yachts to be of precisely equal length. When not, the excess of length over the class length (85ft.), should be doubled, this plus the class length squared minus the class length squared should be deducted from the canvas allowed without tax. Each yacht should be referred to the class length. Nothing should be allowed for want of length under the class length, thereby keeping the yachts of very nearly equal lengths. An 86ft. boat would pay for excess of length ($87^2-85^2=344$) 344ft. of canvas; *i. e.*, the allowed area as computed from the ratio to displacement would be decreased that amount, and so much added to the area liable for time allowance. Doubling the excess takes one foot for actual excess in length and one foot for the advantage gained under the same power, both expressed in power. This penalty is somewhat greater than the advantage obtained by extra length, as it should be, and thus curtails outbuilding (simple excess without doubling makes Vigilant and Satanita equal, about as at present).

Designers can build a vessel within 6in. of the required length, and they should be compelled to do so. The only uncertain quantity is the crew's weight, and that can be had by "retaining" them ahead in the fall. In our first reference to last year's boats as illustrating the rule, they were for a simple explanation incorrectly supposed equal in length. When arranged for excesses of length Colonia receives 519ft., Pilgrim 875ft. and Jubilee 1,056ft., more than stated in the first illustration. The area charged Vigilant for length over class length is added to her actual area in finding the proportion that the others have without allowance; their area charged for excess of length is taken from this last amount, and allowance apportioned according to this result. In the cases of Colonia and Jubilee these areas over first computation just equal the previously assumed taxable areas, making Vigilant, Colonia and Jubilee on equal terms. Apropos my previous remarks on Vigilant and Colonia, Jubilee, despite her ill luck, laid a well founded belief that she was equal to the best. Pilgrim's taxable area is reduced to 1,625ft. If she was of equally good model her allowed share of canvas in equal ratio to the rest should propel her as fast.

As before remarked, we must avoid racing yachts of greatly different lengths even if of equal displacement, because we can not make fair allowance for length. When classed in equal lengths, the fastest model of equal ratio of sail area to displacement will be found the fastest of her length when either enlarged or diminished. (Large and small yachts can be built on the same model, and the vessel of absolute greatest speed is of the same model, whatever the size.) The best model for the larger yacht will be thus found in a surer way than by racing unequal lengths.

This exhaustive exposition of the subject is somewhat lengthy, but any treatment of such a subject which does not take in all phases of the question is worthless. This rule is not impractical, and can be carried out to the great success its foundation on nature's laws insures.

INVESTIGATOR.

## The Straining of Large Yachts.

THE *Yachtsman* of Sept. 6 publishes the following letter:

*To the Editor of The Yachtsman:*

In your issue of the 9th inst. you refer to an interview said to have taken place between a reporter of the *Herald* and myself with regard to the racing between Britannia and Vigilant.

No such interview has taken place, nor, until I received my copy of the *Yachtsman*, had I seen the supposed result in print. As you further allude to this in your issue of the 16th, permit me to say that I have never made any statement to the effect that Valkyrie's hull was strained or injured in any way on her passage across. On the contrary, it was in excellent condition, as was Queen Mab's, after her much more severe passage.

That Valkyrie's trim was altered, and that the boat that met Vigilant here was not the same that tackled Britannia in England, is, presume, ancient history.

No doubt Vigilant in England—at any rate during the first races—suffered in a similar way; but she and Navahoe had the great advantage of numerous trials before sailing their match races in the Solent, an advantage practically denied to or impossible for an America Cup challenger.

As to Vigilant's racing in England, I can only say that I am the proud possessor of a few dollars and some odd cents, the result of a wager made prior to her departure hence, that she would be beaten three races out of five in English waters. H. MAITLAND KERSEY.

THE COLUMBIA, 29 Broadway, Aug. 27.

P. S.—The average speed for the three Valkyrie—Vigilant races for the America's Cup was 8 313 (knots). I make the average for 17 races in England 8.317, or, exclusive of the third day's drifting match on the Clyde, 8 63 knots.

At the time when the Boston *Herald's* alleged interview appeared we passed it over without comment, it evidently belonging to a class of yachting news which has been even more prevalent than usual this summer. Having seen Valkyrie in dock and afloat a great many times between the morning of her arrival last year and the day prior to her sailing this spring, we know that the statements as to her straining are without foundation; and we are equally well aware that Mr. Kersey, a practical and experienced yachtsman and by training thoroughly familiar with shipbuilding, would be the last man to make such a statement. In addition to being quoted in the *Yachtsman*, the "interview" has been republished in a number of American and English papers, and has unquestionably worked injustice to the large racing yachts. The two hard passages of Valkyrie across the Atlantic, the unusually severe buffeting that Queen Mab went through, and the many voyages of Valkyrie I., Deerhound, Castanet, Blue Rock and Britannia to and from the Mediterranean, crossing the Bay of Biscay in winter, should settle positively the question of the sea-going powers of the modern composite-built racing cutter. The weakest structurally are Vigilant and some of the new boats of this year in the 20-rating classes, of extreme S section and great beam, the wide flat floor from the bilge down to the union of the body proper with the keel being essentially deficient in strength, and requiring such bracing as was put into Vigilant in New York for the Atlantic voyage and removed at Glasgow. Though tending strongly toward the fin type, yachts such as Britannia and Valkyrie are still closely enough allied to the narrower cutter to retain much of the stiffness of side and the box-girder construction, which was an admirable feature of the old craft.

## The Rating Rule.

*Editor Forest and Stream:*

The evasion you point out of my proposed alteration to the rating rules is so palpable that when it was first suggested I specially mentioned that it should be prohibited, and I now beg to point out that if you object to the employment of Lloyd's depth in a rating rule, the same result can be obtained by the following modification of my proposal: Add to the length of hull for rating any excess of extreme beam over 2½ times the depth of hull at ¼-beam, measured from top of deck beam to under side of grown frame at or about end section. This would have the same effect as any former proposal and get over hollow keels. It encourages a large over water hull, but windage will prevent racing owners from going far in that direction. It moreover lends itself to the issue of a builder's certificate for yachts coming within the terms of the proviso—such yachts thus avoiding special measurement as they would have no alteration of rating.

THALASSA.

[This later proposal would tend to limit beam and encourage depth of body, while being free from the objection which we urged to the previous proposal. We have not had the opportunity to apply it to known yachts so as to form an idea of its probable action.]

## Miramichi Yacht Club.

CHATHAM, N. B.

*Thursday, Sept. 13.*

THE weather was perfect for the annual triangular race off Newcastle, a big breeze and sunshine, and the race was one of the prettiest ever seen on the river. Three of the four contestants were within 60s. of each other from the first mark to the finish line, and considerable luffing was done to prevent following boats from getting to windward. The wind was across the course, the yachts having close hauls and broad reaches on the different legs. The course was twelve miles, twice around a six mile triangle. There were four starters:

| | Length. | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|---|
| Oriana, J. L. Stewart | 23.09 | 2 32 45 | 4 01 48 | 1 29 03 | 1 24 52 |
| Maude, J. C. Miller | 23.09 | 2 31 05 | 4 02 05 | 1 31 00 | 1 26 49 |
| Learig, A. S. Burr | 27.00 | 2 33 00 | 4 02 30 | 1 29 30 | 1 29 30 |
| Kilbride, C. Sargeant | 22.09 | 2 31 18 | Not timed. | | |

Oriana won on elapsed time by 27s., on corrected time by 4m. 38s. Her record for the season is two firsts and one second for three starts.

J. L. STEWART.

## Larchmont Y. C.

THE match races set for Sept. 19 were postponed to Saturday, but owing to the light airs no start was made until 2:20 P. M. Elsiemarie and Shamrock were matched together, Viator and Atlantic, and Wasp and Queen Mab. The start was timed:

| | | | |
|---|---|---|---|
| Elsiemarie | 2 21 34 | Atlantic | 2 25 15 |
| Shamrock | 2 22 50 | Wasp | 2 30 50 |
| Viator | 2 23 58 | Queen Mab | 2 31 22 |

The wind was very light S.E., but soon shifted to S.W. All sailed the Stamford course, turning the outer mark as follows:

| | | | |
|---|---|---|---|
| Elsiemarie | 4 36 15 | Atlantic | 4 47 38 |
| Wasp | 4 43 47 | Queen Mab | 4 48 30 |
| Shamrock | 4 47 10 | Victor | 4 52 45 |

The wind held for a time, but finally dropped; the finish being made after the time limit, ½ hour after sunset, so that the races were declared off. The times of finish were:

| | | | |
|---|---|---|---|
| Wasp | 6 40 00 | Elsiemarie | 6 40 55 |
| Queen Mab | 6 44 00 | | |

## YACHT NEWS NOTES.

On Sept. 15 a meeting of yachtsmen from the vicinity of Huntington was held and a club was organized under the name of the Huntington Y. C. The club will be incorporated at once with a capital of $5,000, and a house will be built.

Verena, centerboard cutter, went ashore on Manursing Island, Long Island Sound, on Sept. 17, and was badly damaged, a hole being stove in the bottom. She was lightened of her fittings and furniture and towed off.

Atalanta, sloop, the Cup challenger of 1881, after a varied career, during which she has been burned and rebuilt, is now afloat under a schooner rig and a new name, Columbia, her new owner being J. J. Warde of Chicago. She is now 74ft. over all, 65ft. l.w.l. and 19ft. 1in. beam.

Sultana, steam yacht, under charter to J. R. Drexel, has had an unusual run of hard luck. On Sept 16 she struck a rock off Shelburne, N. S., coming off with no serious damage, but on Sept. 18, while bound out of Halifax Harbor, she was in collision with the ocean steamer Halifax City, losing some of her head gear. On Sept. 23 she steamed into Bar Harbor, towing the schooner Jennie B. Hodgdon of Gloucester, the schooner having lost both masts in collission with the yacht at 3 A. M. on Sept. 22 in a heavy fog.

Thetis, sloop, has been hauled out at Lawley's to be lengthened and altered to schooner rig.

Mate Clayton Haff and part of Vigilant's crew arrived at New York on Sept. 22 on the Paris. Captains Haff and Jeffrey will arrive this week.

The *Mail and Express* of Sept. 22 contains a very interesting article on the development and possibilities of the fin-keel, with some instructive diagrams of comparative types.

## Beverly Y. C.

MONUMENT BEACH—BUZZARD'S BAY.

*Saturday, Sept. 15.*

THE third championship for Buzzard's Bay and the 218th race was sailed off Monument Beach Saturday, Sept. 15, in a strong reefing sou'wester.

The sloops Chappaquoit and Isem had made a match of $100 a side to be sailed the same day, and as part of the race they were to start off Pines Buoy and finish at the usual place off Toby Island, course being a dead beat to West Island and return, 23½ miles.

The day opened with a strong southerly wind, shifting to S.W., a pouring rain and a heavy sea. The sloops were started at 11 A. M., both having housed topmasts and Chappaquoit having in two reefs. They sailed a close race and finished under spinakers and ballooners. Isem has not been officially measured, but her building length is 30ft. 6in.

Second class sailed the usual 10¼ mile course and made a very pretty race; Gymnote jumped off with the lead, and as far as Abiels Ledge looked a winner, when she seemed to get tired and Linotte and Bernice who had started last seemed to take on new life and went by her.

In fourth class sloops it is a pity that none of the knockabouts were on hand. It is claimed that in a breeze and sea they can beat Grilse, and this was a chance lost. Every boat in the race except Isem, Anonyma, Grilse, Fin and possibly Dawdle started reefed, many of them having two or more. Fin shook out reefs before the start, but could not carry her sail. Grilse carried whole sail well and at end of first round led Fin 7m. 40s. She was rapidly increasing this lead in second round when Fin retired.

Dawdle lead easily in fourth class cats, but spoiled race by sailing wrong course. She left her race circular behind her annd sailed fifth class course. Course for first, third and fourth classes 8¼ miles. for fifth class, 5 miles. The rain stopped before the regular race started.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| SPECIAL CLASS | | | |
| Chappaquoit, C. H. Jones | 29.10 | 4 26 16 | 4 11 18 |
| Isem, H. R. Reed | | 4 29 27 | . . .. |
| FIRST CLASS. | | | |
| Violet, Toby Club | 24.04 | 1 51 40 | 1 41 14 |
| SECOND CLASS. | | | |
| Linotte, W. P. Wilson | 23.03 | 1 55 14 | 1 40 58 |
| Bernice, J. G. Young, Jr. | 23.04 | 1 55 41 | 1 41 31 |
| Gymnote. W. E. C. Eustis | 23.08 | 1 56 21 | 1 42 36 |
| Kalama, Chas. Brewer | 23.07 | 1 58 06 | 1 44 15 |
| Anonyma, F. L. Dabney | 23.08 | 1 58 11 | 1 44 26 |
| Mist, G. H. Lyman | 23.09 | 1 58 40 | 1 45 01 |
| Ulula, W. H. Winship | 22.04 | 2 01 25 | 1 45 29 |
| THIRD CLASS. | | | |
| Nobska, A. A. Beebe | 19.06 | 1 41 00 | 1 25 19 |
| Gilt Edge, D. L. Whittemore | 19.07 | 1 45 48 | 1 30 14 |
| Colymbus. Alfred Winsor | 19.11 | 1 48 34 | 1 33 25 |
| Doris, John Parkinson | 19.08 | 1 49 31 | 1 34 11 |
| FOURTH CLASS—SLOOPS. | | | |
| Grilse, W. E. C. Eustis | 16.11 | 1 48 34 | 1 29 20 |
| Fin, Howard Stockton | 16.02 | Withdrew. | |
| FOURTH CLASS—CATS. | | | |
| Dodo, H. Parker | 16.06 | 2 13 21 | . .. .. |
| Dawdle, R. S. Hardy | 16.03 | Sailed wrong course. | |
| FIFTH CLASS—CATS. | | | |
| Weona, H. Ware | 14.00 | 2 00 30 | 1 10 38 |

Winners: Special class, Chappaquoit; second class, Linotte first, Bernice second; third class, Nobska first, Gilt Edge second; fourth class sloops, Grilse first; fourth class cats, Dodo first. Violet, Grilse. Dodo and Weona win and hold pennants. Linotte ties for pennant with Anonyma and Kalama. Judge, W. Lloyd Jeffries.

## New York Y. C. Autumn Sweepstakes.

NEW YORK—OUTSIDE COURSE.

*Tuesday, Sept. 18.*

THE New York Y. C. closed its racing on Sept. 18 with a sweepstakes race for schooners and singlestickers, a class for each rig, the prizes being the sweepstakes, $50 per yacht, with a $200 cup added by the club for a first in the schooner class, a $100 cup for second, and a $100 cup for the cutters. The starters were:

| | | |
|---|---|---|
| SCHOONERS. | | |
| Emerald | J. R. Maxwell | Allows. |
| Ariel | G. H. B. Hill | 3 22 |
| Elsiemarie | J. B. King | 8 23 |
| Shamrock | W. P. Ward | 10 04 |
| CUTTERS. | | |
| Queen Mab | Percy Chubb | Allows. |
| Wasp | H. P. and R. L. Lippitt | 8 14 |

The tug Walter A. Luckenbach carried the race committee, Messrs. Chester Griswold, W. Butler Duncan, Jr., and Secretary J.V. S. Oddie, the latter two serving in place of the regular members, Messrs. Kane and Grinnell. There were also a number of club members as spectators. The day was far from pleasant, a driving N.E. storm prevailing, but there was a strong working breeze, making a good race between the two principal boats, Ariel and Emerald. The course was a triangle of 10 mile sides, starting from the Scotland Lightship, the first leg, due east, being to windward, Supt. Olsen in a second tug setting a mark buoy. The start was given at 11:32, the interval being but 2m. Wasp went over first on starboard tack on the weather end of the line, Queen Mab following, and berthing herself on Wasp's weather quarter. The schooners were started at 11:35, the times of the start being: Wasp 11:34:15, Queen Mab 11:34:48, Ariel 11:35:33, Emerald 11:36:39, Shamrock 11:37:02, Elsemarie 11:37:50.

All crossed on the port tack, but at once swung about and headed in for the Long Island shore, in the wake of Wasp. Some time was lost on the tug in getting the anchor, and the racers were lost in the mist. When they were again picked up, Queen Mab was sailing alone, Wasp, as it proved, having lost her bowspsit and towed in. Emerald was leading, but with Ariel in hot chase, so close as they neared the mark that, having the winning tack, Emerald was forced to give way for her. Ariel, however, was a little slow in tacking, and failed to blanket the other as they turned. The times at the first mark were:

| | Actual. | Corrected. |
|---|---|---|
| Emerald | 1 27 58 | 1 51 19 |
| Ariel | 1 28 14 | 1 52 41 |
| Queen Mab | 1 39 43 | 2 04 55 |
| Elsiemarie | 2 02 00 | 2 24 10 |
| Shamrock | 2 03 00 | 2 25 58 |

Sheets were eased off, and with booms to starboard they ran for the second mark, Emerald dropping her rival a little. Only these two were timed:

| | Actual. | Corrected. |
|---|---|---|
| Emerald | 2 24 25 | 0 56 27 |
| Ariel | 2 26 00 | 0 57 46 |

Clubtopsails were set over jibheaders on the last leg, and spinakers filled for a time, as well as balloon jibtopsails, but toward the end the studding sails were taken in. The finish was most exciting, Emerald crossing a little over 3m. ahead of Ariel, or so near to the allowance that the result was not known to those on board either yacht. The final figures made Emerald a winner by but 14s. The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| CLASS 1—SCHOONERS. | | | | |
| Emerald | 11 36 39 | 3 24 26 | 3 47 47 | 3 37 47 |
| Ariel | 11 35 33 | 3 26 56 | 3 51 23 | 3 48 01 |
| Shamrock | 11 37 02 | 4 06 29 | 4 29 27 | 4 19 23 |
| Elsiemarie | 11 37 50 | 4 12 38 | 4 34 48 | 2 26 25 |
| CLASS 2.—CUTTERS. | | | | |
| Queen Mab | 11 34 48 | 3 50 03 | 4 15 15 | 4 15 15 |
| Wasp | 11 34 15 | Disabled. | | |

It is reported that Elsiemarie lost some time through the jamming of her centerboard.

## The Sailboat and The Horse.

*From the New York Times.*

At a summer resort not far from New York a debating society, composed of citizens calling themselves Afro-Americans, recently discussed the important question, "Which is the more dangerous animal, a horse or a sailboat?" Undoubtedly this question was suggested by the accidents which have happened recently and not by the pecuniary disasters which accompany racing on either land or water. There is no doubt that men lose money in betting on yacht races, but still no one has yet been ruined by playing the sailboats. The question is often asked in all seriousness, and it certainly is worthy of discussion. It is greatly to be regretted that, owing to the president's having left his razor at home, it was not decided at the Afro-American meeting.

No doubt, if it were left to a popular vote, the decision would be in favor of the horse. This, however, would not be a fair decision, because the majority of people have at least a street-car acquaintance with horses, while their knowledge of sailboats is wholly gained from the casualty columns of the daily newspapers. The only acceptable opinion would be that of a man who has had as much experience with horses as he has had with boats, and such men are rare. The popular prejudice against the sailboat, however, seems to be founded on the knowledge that if you capsize your boat or are run down you are in the water; whereas if your horse runs away or throws you you are on land. It is beyond dispute that in proportion to the number of horses and sailboats in use there are far fewer accidents with the former.

But it ought to be remembered that the opportunities of the average man and woman for learning how to handle a horse are much more numerous than their opportunities for learning how to manage a sailboat. If people who go out sailing knew all about the management of boats, accidents would be extremely rare. For it ought to be remembered that a boat has no will of its own, whereas a horse has. The patient and faithful beast of burden sometimes takes the bit between his teeth and runs away, or he is so frightened that he loses his horse sense, and in either case he gets beyond control.

The sailboat, on the other hand, is a creature in the hands of man, and when she upsets and hurls him into the water it is a direct result of his own ignorance. It would be a very good thing indeed if there were some way to prevent those foolish persons who go out in stiff breezes without reefs or take cockleshells out into open water from obtaining the use of boats at all, but that does not appear to be practicable. It is all very well to say that if ignorant persons go out in boats and meet with mishaps they have themselves to thank for it, but as they almost always imperil others it would be a good idea to treat them to some punishment in case of survival. Persons who attempt suicide are punished, and going out sailing without the necessary skill is the next thing to such an attempt. In the meantime the poor boat gets all the blame, and there are many who honestly believe that sailing is dangerous in itself, while they will not hesitate to go out riding behind a horse whose temper they do not know.

## Seawanhaka Corinthian Y. C.

A SPECIAL ladies' race was sailed on Sept. 22 for a prize offered by Mrs. S. V. R. Cruger, a pair of Bohemian glass vases. Three of the club catboats were manned by Mrs. Cruger, Mrs. C. W. Wetmore and Mrs. Francis L. V. Hopper. Mrs. Cruger won, but presented one of the prizes to each of her rivals. A race of the 21ft. class, for the Roosevelt Memorial cup, was sailed after the catboat race. The times were:

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| LADIES' RACE. | | | |
| Mrs. Wetmore't boat | 11 05 39 | 1 55 43 | 2 50 04 |
| Mrs. Cruger's boat | 11 06 10 | 1 47 40 | 2 41 30 |
| Mrs. Hopkins's boat | 11 06 15 | 1 47 46 | 2 41 36 |
| 21-FOOTERS. | | | |
| Dorothy | 11 54 00 | 3 11 00 | 3 17 00 |
| Houri | 11 54 00 | 3 12 02 | 3 18 02 |
| Celia | 11 54 00 | Did not finish. | |

# Canoeing.

## Red Dragon C. C.

THE fall regatta of the Red Dragon C. C. was held off the club house at Wissinoming, Saturday, Sept. 15. The weather was perfect, cool and pleasant, with a steady breeze from the S.E. A special race was added to our regular programme for boats of the Atlantic City mosquito type, as quite a number of the boats are now owned on the river, the Philadelphia and Riverton Y. C. giving regular races for them.

Great interest was centered in this match, as one of the best boats of the Corinthian Y. C. of the Corinthian Y. C. of Atlantic City was present.

The course was to windward and back, five miles, the Corinthian boat winning. Had her crew been familiar with the river, they could have won by a wide margin, as she is much faster than anything in these waters. The start was at 3:03 P. M., finish as follows: No. 11, Riverton Y. C.; Vixen, Corinthian Y. C.; No. 8, Riverton Y. C.; No. 3, Riverton Y. C.; Georgie, Philadelphia Y. C.; Olie, Red Dragon C. C.

Vixen wins on allowance, 32s. Prize, a handsome silver cup.

The other events were:

Senior sailing, triangular course, 3 miles: Kielve, F. W. Noyes; Smuggler, A. S. Fenimore; Cricket, E. K. Lewis; Pirate, H. E. McCormick.

Junior sailing, course as above, 3 miles: Fineen, J. M. Hamilton; Ted, W. E. Gray; Her Name. M. D. Wilt.

Upset sailing: Smuggler, A. S. Fenimore.

Single paddling: Ardee, J. J. Murray; Dragonet, M. D. Wilt.

Tandem paddling: Dragonet, Wilt and Van Dusen; Wandering Willie, Bachman and Wise.

Upset paddling: Kielve, F. W. Noyes.

Tournament: Osceola, Noyes and Fleischman.

Refreshments were served after the races in the club house.

## Mr. Howard's Racing.

THE circumstantial letter of Mr. Willard Howard, the American canoeist who has been with us the whole season competing in all the canoe sailing races, will have been read last week by most canoemen interested in canoe racing. His arguments, though ingenious, hardly alter the fact that Yankee has not succeeded in vanquishing English canoes in sailing races.

The Salcombe racing of which he writes is very fully reported in the September number of the *Model Yachtsman and Canoeist*, and these reports in no way alter the facts given to us by private report; and on the whole it seems clear that Salcombe proved no more acceptable a racing course for the Yankee than did Bourne End Reach, on the Thames.

Whether the Yankee's fresh challenge to all or any British canoeists will be taken up by Dragon, the boat he particularly names, remains to be seen, but at so late a period of the year it is scarcely likely; and the challenging fever is seldom found to take a strong hold on Englishmen. On the whole, there is little to be learned from a single match race between two canoes especially when of widely different types. Where a match race is held to decide a well-balanced season's racing, in which two boats have, through the varying chances of crowded races, fluky days and accidents, been prize winners to about an equal extent, a match is of value, and may conclusively point out the best boat. This, however, cannot be claimed in the case of the 1894 racing. We do not in any way cast doubt upon the possible speed latent in the Yankee, but the season's racing has not opened it out; and the only definite point she has proved is that a racing canoe may be so constructed as to be herself safe, or nearly so, in capsizing. But her owner's exploits, especially those chronicled from Salcombe, clearly advise that such capsizing had better be confined to smooth water close in shore.

Then, as to type, we can only strongly urge that such a craft, or what might be made as a vast improvement upon Yankee under the new R. C. C. rule, is a most undesirable type: such craft will not lift canoe sailing out of the doldrums into full racing life. The Bogy craft which Mr. Howard threatens us with as about to be built for next season will, if of the dimensions he gives, depend very much for success on where the season s races for 1895 are sailed. However, we need say no more on the Bogy, because, under the particular data and dimensions given, and which do not govern any particular form or displacement, mode of ballasting or of sail plan, the craft may be anything in shape, from the deepest pegtop section to the mildest of skim-milk saucers.

SIR, As Mr. Wm. Willard Howard, of the canoe Yankee, has thought fit to make mention of my canoe's name in his letter published in your last week's issue, and has done my boat the honor of referring to her as the best English canoe, a few words from me may not be out of place to explain the reasons why I do not see my way to take up the challenge he there throws down.

At the present time the Dragon is under extensive alterations to fittings and sail plan which, besides necessitating much delay in arranging a series of matches, even if he and I could agree upon some neutral waters in which the event could be brought off, would mean at the end of a season bringing out practically a new craft to race against one that has been constantly sailed throughout the racing season. I am a busy man, and my professional engagements even prevented my devoting one week at Salcombe for the B. C. A. meet, although the Dragon was built first with a view of competing against Mr. Howard's canoe in the £50 Challenge Cup of the Royal Canoe Club, and secondly, to compete for the County of Fermanagh Challenge Cup there; and to expend the necessary time in arranging for, tuning up practically a new craft, and competing in a series of matches far away from town, is quite, from the point of view of time alone, out of the question at this period of the year.

The Dragon, whether she is the best English canoe or not, did on six separate occasions compete against and beat, on what is admittedly the fairest Thames course that could have been selected by the Royal Canoe Club for its season's races, Mr. Howard's canoe Yankee. The two canoes were in competition on those six occasions only.

For the challenge cup (the race for which Mr. Howard presumably primarily came over) the Yankee did not start. It was pretty certain to any impartial critic, judging from the previous and subsequent displays, that the Yankee, leaving out the question of the Dragon, stood little or no chance of winning against the Battledore, Stella, Whizz or Curlew on that occasion also.

Mr. Howard now again challenges English canoeists, knowing full well that he has everything to gain and nothing to lose if a race is brought off. Such a challenge I, for one, have neither the time nor the inclination to take up.

In the fourth paragraph of the same letter Mr. Howard refers to a capsize by the Dragon at Bourne End, and states that she is an open well canoe, and was either run ashore or taken in tow. The former assertion is not a fact, and neither of the latter events happened on the only occasion she has ever capsized. DRAGON, R. C. C.

## American Hollow Spars.

APROPOS of the quotation from the *Field* which we published last week, a correspondent writes us as follows in regard to hollow spars. We can vouch for the quality of the spars mentioned, as they have been very thoroughly tested for several years in some of the larger racing catboats, and have proved not only much lighter than the solid sticks but reliable and durable:

*Editor Forest and Stream:*

I do not know who made Yankee's spars, but I believe they were gotten out by the same man who built the boat. If such is the case they are not representatives of the American breed. With one or two exceptions all the hollow sticks used by canoeists are made at Bridgeport, and stand all kinds of weather without coming apart, and it is not necessary to use screws to keep them together. I feel that I can speak with some knowledge since I have used sixteen of them in my canoes on different rigs, and have since had eight for a Scarecrow model. Only one ever came apart, and that from no fault of the maker. I know a number of other men who have used them, and I never heard or knew of one failing. The "American breed" of spar cannot therefore be far wrong.

The statement that "so far the hollow spar is more or less a poetical delusion" may be true in England, but the hollow spar is an absolute necessity here for racing, with big rigs especially. Solid sticks are a great deal too heavy in the first place, and are not as stiff as hollow sticks of the same diameter in the second place. Further, they can be shaped in any desired way so as to take the strain. This cannot be done with bamboo. Also, hollow sticks do not split and snap as the *Field* says bamboo do. HOLLOW SPAR.

## A. C. A. Membership.

# Rifle Range and Gallery.

## Revolver Shooting in England.

THE season at the revolver clubs is drawing to a close. There is only one more day at the South London Club, on Sept. 25. Last week Capt. Heath and Mr. Winans had tied for the revolver championship of the club, so the shoot on Sept. 11 was an important one.

A few days before it took place, Mr. Winans was breaking a young mare of his own breeding, and she started bucking suddenly and caused him to sprain his wrist badly, unfortunately the right one.

He had to have his arm in splints for forty-eight hours, and shot on Sept. 11 at the South London and on Sept. 12 at the North London clubs, with his wrist bandaged in plasters and shot in some pain. This, of course, greatly handicapped him, but at the South London he was able to improve his scores for the revolver championship four points, and is now pretty well sure of the championship of that club. Below are details of scores:

Revolver competition 20yds.:

| | | | |
|---|---|---|---|
| Walter Winans | 6 7 7 7 7 7—41 | Capt T W Heath | 7 7 7 7 6 6—40 |
| F Rand | 7 7 7 7 7 6—41 | Lieut J Howard | 7 7 7 7 5 7—39 |
| E Howe | 6 7 7 6 7 7—40 | C F Lowe | 6 5 7 7 6 5—36 |

Revolver competition. 50yds.:

| | | | |
|---|---|---|---|
| Walter Winans | 6 6 7 7 6 6—39 | Capt T W Heath | 6 5 6 7 6 6—37 |
| E Howe | 6 5 7 7 7 6—38 | C F Lowe | 4 5 7 4 7 7—34 |
| F Rand | 4 7 6 6 7 7—37 | | |

Scores for revolver championship of the club now stand:

| | 20yds. | | | | 50yds. | | | | |
|---|---|---|---|---|---|---|---|---|---|
| Walter Winans | 41 | 41 | 40 | 40 | 39 | 40 | 40 | 39 | —320 |
| Capt T W Heath | 41 | 40 | 40 | 40 | 40 | 39 | 38 | 38 | —316 |
| F Rand | 41 | 40 | 40 | 40 | 38 | 37 | 38 | 37 | —312 |
| Howe | 40 | 38 | 38 | 38 | 37 | 38 | 35 | 35 | —299 |
| C F Howe | 39 | 38 | 37 | 36 | 35 | 38 | 34 | 34 | —292 |
| Howard | 39 | 39 | 36 | 36 | 36 | 35 | 35 | 30 | —286 |
| Clementi Smith | 39 | 37 | 36 | 34 | 35 | 38 | 33 | 32 | —284 |
| Kemp | 37 | 35 | 34 | 33 | 31 | .. | .. | .. | —170 |
| Capt Peters | 32 | .. | .. | .. | .. | 29 | .. | .. | — 61 |

At the North London Club they were very busy on Sept. 12. In addition to the usual competitions for revolvers, the details of which are given below, there was a revolver handicap started on novel principles. The idea is to encourage men to shoot the revolver who under actual shooting are unable to win a prize. Therefore a handicap tournament was started for twelve shots at 20yds., only one entry allowed, no previous practice on the day, the shooters to have points added to the scores they made according to what was considered their shooting capabilities. Mr. Winans had to stand on his score, no points added. Capt. Heath and Mr. Rand had two points added to their scores, Mr. Andrews three points, Mr. Lowe four points, and so on. After the handicap was over Mr. Winans made the following score for twelve shots in the revolver competition, which is the best on record for 50yds.: 6 6 7 7 7 7 6 7 7 7 6—40, which is two points more than his best on record at 50yds. Revolver series, 20yds:

| | | | |
|---|---|---|---|
| F Rand | 7 7 7 7 7 7—42 | Maj Palmer | 7 7 5 4 7 7—37 |
| Walter Winans | 6 6 7 7 7 7—40 | Capt Richardson | 7 6 6 7 7 3—36 |
| C F Lowe | 6 7 7 7 7 6—40 | Denyer | 4 5 6 4 7 5—31 |
| H Andrews | 7 7 7 6 7 6—40 | Lieut Baxter | 7 2 6 2 7 7—31 |
| Maj Munday | 7 7 7 6 5 7—39 | Knapp | 7 4 3 7 6 2—29 |
| Capt T W Heath | 6 7 7 5 7 6—38 | Dr Orton | 2 5 6 2 4 5—24 |
| Skilton | 5 7 7 6 7 5—37 | Treadwell | 3 7 6 5 0 2—23 |
| Carter | 7 7 6 7 4 6—37 | | |

The leading scores for revolver championship now stand:

| | 20yds. | | | | | | 50yds. | | Total. |
|---|---|---|---|---|---|---|---|---|---|
| Walter Winans | 41 | 41 | 40 | 40 | 40 | 40 | 30 | 29 | 301 |
| F Rand | 42 | 40 | 40 | 36 | 39 | 39 | 28 | 27 | 294 |
| C F Lowe | 40 | 40 | 40 | 39 | 39 | 39 | 27 | 27 | 291 |
| Andrews | 42 | 40 | 39 | 39 | 37 | 37 | 29 | 29 | 292 |
| Skilton | 40 | 39 | 39 | 39 | 39 | 38 | 27 | 27 | 288 |
| Maj Munday | 39 | 39 | 39 | 38 | 37 | 36 | 28 | 27 | 283 |
| Cowan | 38 | 38 | 38 | 38 | 37 | 36 | 27 | 26 | 278 |
| Clementi-Smith | 35 | 34 | 34 | 34 | 31 | 30 | 29 | 28 | 256 |
| Ashby | 36 | 35 | 34 | 33 | 32 | 32 | 28 | 25 | 255 |
| Luff | 34 | 33 | 31 | 31 | 31 | 30 | 26 | .. | 216 |

The scores for the first round of the handicap are not yet known but all who made 69 or over remain in. Messrs. Andrews and Winans are among those remaining in.

## Hansen vs. Watts.

L. P. HANSEN, of the Excelsior Rifle Club of Jersey City, and F. C. Watts, of the Newark Shooting Society, Newark, N. J., met at the Schuetzen Park in Newark on Saturday afternoon of last week to shoot off a 100-shot match. The conditions of the match called for 100 shots each, the stakes to be a supper and fixings for six. The following rifle enthusiasts were present to witness the contest: Messrs. Wm. Hayes, of Newark; Jas. T. B. Collins, of Bayonne; Richard Daniels, of Greenville; Geo. W. Varick and Mr. Williams, of Jersey City, and G. W. Plaisted, of FOREST AND STREAM. The weather was warm and pleasant, but the light was decidedly bad, owing to a blue haze that filled the atmosphere. Mr. Watts did not arrive in the park until nearly 4 o'clock, which made it impossible to undertake to shoot 100 shots before darkness would set in, so it was decided to restrict the match to 50 shot each. Wm. Hayes was selected as referee and Richard Daniels scorer. Mr. Hansen shot a Ballard rifle with a Schalk barrel, .30-40, weight of rifle about 12lbs. Mr. Watts shot a Schalk muzzleloader, .35cal., weighing 17lbs. This rifle is owned by Wm. Hayes and has been in constant use since 1878. Scores:

| | | | |
|---|---|---|---|
| L P Hansen | 25 21 22 15 22 22 18 8 22 20 | —195 | |
| | 21 19 23 21 16 19 19 14 20 24 | —196 | |
| | 22 24 20 22 24 20 23 24 19 24 | —222 | |
| | 23 22 20 20 22 16 18 22 20 22 | —205 | |
| | 23 23 23 23 20 25 22 19 14 20 | —212 | —1030 |
| F C Watts | 24 22 19 21 23 20 21 25 20 23 | —218 | |
| | 20 17 22 22 24 21 24 23 16 20 | —209 | |
| | 22 21 25 20 22 21 18 25 19 19 | —212 | |
| | 15 14 18 20 19 21 19 22 21 16 | —185 | |
| | 21 20 18 19 22 15 18 20 24 18 | —195 | —1019 |

A new match was made between Messrs. Hansen and Watts, to be shot on Oct. 6.

## Schlicht Rifle Club.

WEST NEW YORK, Sept. 17.—The Schlicht Rifle Club held its weekly shoot for class medals at headquarters last night. Medal winners, Geo. Schlicht, champion medal; Aug. Meyer, first class medal; Geo. Reichert, second class medal. Capt. Dedrick, third class medal: Scores: C. Meyer 229, John Banders 208, Geo. Reichert 220, H. Aufderhide 213, Aug. Tribaut 202, Jacob Diehl 222, Fred Lambrix 220, J. Schlicht 213, Conrad Schlicht 213, Aug. Meyer 232, Geo. Schlicht 238, Capt. J. Dedrick 230, Wm. Schlicht 220, Geo. Dorr 229.

## Hansen vs. Rebhan.

THE 100-shot handicap match between L. P. Hansen and John Rebhan was shot off on the Marion range, Marion, N. J., on Monday last. The weather was fine but a strong fishtail wind caused many unexpected shots. Rebhan received 50 points handicap. Hansen won by 125 points. Scores:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Hansen | 213 | 201 | 186 | 206 | 198 | 186 | 213 | 213 | 219 | 211 | —2046 |
| Rebhan | 201 | 193 | 179 | 158 | 192 | 199 | 198 | 183 | 186 | 182+50 | —1921 |

### German-American Association.

THE seventeenth annual festival and prize shoot of the German-American Shooting Society, President Otto Uehlein, was held in Deckman's Ridgewood Park, L. I., on Monday and Tuesday of last week.

This society is one of the largest shooting organizations in New York. It contains a membership of over 1,200, made up of some 20 odd separate companies. Many of the most expert riflemen in New York are members of the society, and so the annual festival of this organization brings together a group of riflemen who make the shooting house a scene of decided interest. This year unfortunately for the society the weather conditions were such as to make the annual festival much less successful than is usually the case. Heavy rains on Tuesday kept many of the members and their friends from visiting the park.

Owing to the weather conditions only 104 members participated in the shoot. There is considerable rivalry between the various companies in the society for the honor of kingship, and as each company contains one or more of the expert class of marksmen, these individuals are the center of much interest in their efforts to secure the coveted honor. The competition this year developed the usual excitement Two of the members made a tie score of 68 out of a possible 75. The two fortunate marksmen were Messrs. John Facklam and Charles Frankel. The tie was decided by the last best shot. Facklam's last shot outranking that of Frankel, he was awarded the honor and was crowned with the usual ceremonies.

Another feature of interest to the members of the society is the annual team contest, each team representing its separate company. This year there were only six teams in the competition. The Lutzow Company team won the honor.

The ring target offered twenty-five prizes, ranging from $30 to $1, three shots per ticket, the two best to count for the first five prizes. There was the usual struggle for first position on this target, and resulted in some good scores. Fred C. Ross and Louis Flach divided first and second. Gus Zimmerman took third. Messrs. Fred Eisele, Otto Uehlein, M. Dorrler and Philip F. Schmidt divided the next four prizes.

The premiums for the most points made on the prize target during the festival was won by Gus Zimmerman. The veteran Chas. G. Zettler shot himself into first position on the man target, making 58. Scores: Target of honor, 3 shots, possible 75, 12 best scores: John Facklam 68, Chas. Frankel 68, Gus. Zimmerman 67, C. Rein 64, Schincke 62, B. Zettler 60, G. Albig 60, B. Walther 60, M. Wirth 68, H. Zimmer 58, A. Stolzenberger 58, P. Schmidt 57.

Prize target (25 prizes), 3 shots, possible 75:

| | | | | | |
|---|---|---|---|---|---|
| F C Ross | 68 | 71—139 | Otto Uehlein | 72 | 65—137 |
| Louis Flach | 68 | 71—139 | M Dorrler | 70 | 67—137 |
| Gus Zimmerman | 69 | 69—138 | P F Schmidt | 69 | 68—137 |
| Fred Eisele | 69 | 68—137 | | | |

F. Kalb 69, L. P. Hansen 68, Ignatz Marten 67, Otto Hinz 66, Gus Ringler 66, B. Zettler 65, B. Walther 65, Jos. Lurch 65, Louis Buss 64, Louis Vogel 64, Fred Lindkloster 64, R. Busse 64, C. Rein 64, C. G. Zettler 63, Henry Zimmer 63, C. Horney, Jr., 63, P. Meyer 62, W. Weber 61, J. Marz 61.

Premiums (5 prizes) for the most rings: Gus Zimmerman 1,967, Ignatz Marten 793, Ph F. Schmidt 736, R. Busse 687, Louis Flach 595.

Man target (18 prizes), 3 shots, possible 60: C. G. Zettler 59, Gus Zimmerman 57, Fred C. Ross 57, Otto Uehlein 56, Ignatz Marten 56, M. Dorrler 56, B. Zettler 55, Louis Vogel 55, Thos Lloyd 55, Geb. Krause 54, Louis Flach 54, Louise Busse 53, Ph. F. Schmidt 53, Wm. Weber 52, Mr. Wirth 51, P. P. Hansen 51, Henry Zimmer 50, Fred Lindkloster 49.

Medal target, 3 shots, possible 75: Gus Zimmerman 73, Ignatz Marten 70, Fred Eisele 69, L. P. Hansen 68, F. C. Ross 68, Gus Ringler 66, Fred Lindkloster 65, Henry Zimmer 65, C. G. Zettler 65, Chas. Rein 64.

The team match followed:

| Lutzow Co. No. 12. | | | | | | Columbus Co. No. 2. | | | | | |

### Rifle in Texas.

A SMALL delegation from the San Antonio Rifle Club attended the prize shoot of the Green Valley Club, Sept. 16. They went there with blood in their eye, intending the utter annihilation of their shooting brethren in the contest that was to come off. But the country fellows didn't do a thing to us. Oh, no! They just pounded us into the earth, individually, teamually and all. In the list of prize winners below it will be seen that one man from San Antonio alone shows up, Mr. Albert Steves. The names of the other San Antonio riflemen who participated are withheld by special request.

At the San Antonio range there were only three men present. They shot through their hats all the afternoon, so it was thought unnecessary to print the scores.

Conditions: Four shots at 150yds., rest, off-hand target; 4 shots at 185yds., rest, off-hand target: Alf. Hartman 77, H. Bruemer 77, O. Voges 76, H. Adams 75, O. Forcke 74, L. Sahm 73, Jos. Fey 73, A. Eberling 73, C. Schmelpfennig 73, D. Knibbe 73, A. Steves 72, C. Pape 72, A. Kneuper 72, H. Mittendorf 72, J. Schnabel 72, C. J. Marnoch 71, O. Krause 71, G. Koch 71, W. Triesch 71, G. Reininger 71, F. Kaderli 70, Conrad Pape 70, Wm. Pape 70, H. Syring 70, A. Toepperwein 70, Ed. Koch 70, John Hillert 70.

### Hartford Rifle Club.

HARTFORD, Conn., Sept. 22.—I inclose you scores made by the Hartford Rifle Club at their bi-monthly shoot this afternoon. German ring target, 200yds., off-hand:

Medal Match (one entry).

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| H M Pope | 25 | 17 | 23 | 22 | 22 | 19 | 18 | 23 | 24 | 23 | —216 |
| D S Seymour | 24 | 24 | 19 | 18 | 22 | 22 | 21 | 21 | 18 | 23 | —213 |
| W J Dunbar | 21 | 21 | 16 | 20 | 22 | 22 | 13 | 25 | 20 | 17 | —198 |
| H A Fox | 25 | 22 | 24 | 23 | 19 | 16 | 16 | 20 | 15 | 16 | —195 |
| J Edwards | 23 | 23 | 20 | 14 | 22 | 21 | 18 | 11 | 14 | 24 | —190 |

Re-entry Match.

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Seymour | 18 | 23 | 19 | 21 | 22 | 22 | 19 | 19 | 21 | 23 | —207 |
| | 22 | 22 | 21 | 19 | 24 | 22 | 23 | 22 | 22 | 22 | —219 |
| | 21 | 21 | 21 | 23 | 21 | 17 | 24 | 21 | 20 | 17 | —206 |

| | 21 | 25 | 20 | 17 | 24 | 21 | 16 | 22 | 21 | 22 | —208 |

H. M. POPE, Secretary.

### Greenville Rifle Club.

GREENVILLE, N. J., Sept. 22.—The Greenville Rifle Club opened its new series for winter practice on the gallery range last night. Twelve members were present and participated in the competition for class prizes. Scores: First class—Scheeline 239, Purkess 235, C. Boag 238, Plaisted 235. Second class—Gotthardt 221, Chase 229, Chavant 226, Charlock 227, Spahn 233. Third class—Hill 224, Renker 218, Holzapfel 228.

## RIFLE NOTES.

While on a visit to Wissel's Cypress Hill Park last week, friend Wissel reminded us of the fact that the shooting season of 1894 was fast drawing to a close and that Election Day (Nov. 6) would soon roll around. He then shot a query at us in reference to another "champion" match on that day on the same lines of that held Nov. 7, 1893. He followed his query with the proposition to donate another trophy as an inducement for the experts to turn out and join in the competition. Under these circumstances we could do no less than to say to Mr. Wissel, We will have another match on Nov. 6, 1894; and we will try to have all the experts lined up in the park on that day. To those readers of FOREST AND STREAM who have forgotten about the champion match of 1893, or who were not patrons of the paper at that time, we will take this opportunity to recall some of the circumstances of the inception and the carrying out of the previous match. It is well known to the fraternity that the Zettler Bros'. "den" is the nest where many germs pertaining to rifle matters are hatched; so it was with the champion match of 1893. It came about in this manner. While making a call there in the early fall of 1893, the two brothers, Charles and Barney being present and rifle topics being uppermost in the minds of all of us, we broached the subject of a rifle match to bring together all of the experts and as many of the lay shooters as would care to go into a contest. In 1886, a match was held in Union Park in which twenty-five of our best marksmen participated. The conditions of the match were $5 entry, half winners and half losers, 100 shots per man. We argued that inasmuch as it had been some years since a match of this kind had been held, the time was ripe for holding another one, and in order to add to the interest of the match a trophy should be put up. This seemed feasible, but where was the trophy to come from? Who would go down into their pockets for the expense of it? We made up our mind to bring about the match and have a suitable trophy for the winner. After a week's work canvassing among the people who are interested in the rifle we landed at the starting point. The trophy was not in sight and doubtless it would not have been to this day if Chas. C. Wissel had not discovered our dilemma and generously come to our assistance with the proposition to donate the trophy himself. Mr. Wissel's generous proposition cleared away all obstacles from our path; the Zettler Bros took up the matter with their usual zeal and the tournament was carried out to the end and the result was a grand success. Now comes Mr. Wissel's offer for a trophy for another champion match for Election Day (Nov. 6), 1894. The entry list for 1893 contained 38 entries and on the day of the match 29 men shot in the competition, 23 of whom shot their 100 shots. In the champion match for 1894, let us have 50 men entered and facing the targets on the morning of the shoot. Why can not the expert riflemen from distant States arrange their affairs in such a way as to visit New York and participate in the contest? A programme of the coming match will be published and distributed in due season. In the mean time let our riflemen one and all get into condition for the closing shoot of the season.

The New York City Corps will have a day's outing and prize shoot at Stimmel's Park, Whitestone, L. I., on Thursday of this week.

The New York State Rifle Club held its annual fall tournament at Dover Plains, Dutchess county, on Tuesday and Wednesday of this week (25-26).

Those who delight in rest shooting with the telescope find great pleasure in the possibilities for close grouping and small strings in this style of shooting.

A further experience with Troisdorf nitro in the .38-55 Ballard on the Greenville Park range last week gave us the following results in a series of 20 shots, off-hand, German target:

First string.....23 24 18 18 21 23 24 21 24 22—218
Second string.....19 25 22 22 17 25 22 20 22 23—217

The powder charge was about 17grs. in weight, with a lead bullet tempered about one to ten, using the Winchester No. 3-W. primer.

A local correspondent of Fayetteville, N. C., writes that the Fayetteville Independent Light Infantry Company is in a most flourishing condition. It recently held its one hundred and first annual election of officers. It has a finely equipped 200yds. range. At the recent annual target practice Capt. E. L. Pemberton won the Wilmington medal of 1856, which was presented to the company by James D. Nott. Scores, out of a possible 25: E. L. Pemberton 23, S. Widdifield 22, Maj. J. C. Van 20, W. H. Russel 20. How many other rifle or shooting organizations in the county can boast of having passed the century mark?

The Greenville Rifle Club has decided to hold a gallery tournament within a few weeks; programmes will be issued at an early day.

## Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Sept. 25-26.—Rochester (N. Y.) Rod and Gun Club tournament, with Central New York League team shoot, at Rochester. J. B. Mullan, Sec'y.

Sept. 26.—Central New York Trap-Shooters' League, sixth tournament, at Rochester.

Sept. 27-28.—HARRISBURG, Pa.—Harrisburg Shooting Association; live birds and targets.

Oct. 3-4.—READING, Pa.—Independent Gun Club; targets.

Oct. 3-5.—West Newburgh (N. Y.) Gun and Rifle Association tournament. Last day live birds. W. C. Gibbs, Sec'y.

Oct. 10-11.—Interstate Manufacturers' and Dealers' Association's tournament, under auspices of the Palmetto Gun Club, at Charleston, S. C.

Oct. 11.—LEWISTON, Me.—New England Shooting Association championship tournament, under auspices of Androscoggin Gun Club.

Oct. 13.—ASHBOURNE, Pa.—Ashbourne Gun Club; targets. E. Bilting, Jr., Sec'y.

Oct. 18-19.—ELIZABETH, N. J.—Elizabeth Gun Club's annual tournament. Live birds second day; lunch and loaded shells on the grounds.

Oct. 22-24.—Emerald Gun Club tournament, at Dexter Park. Targets and live birds. Dr. G. V. Hudson, Sec'y, 9 Madison street, New York.

Oct. 24.—Central New York Trap-Shooters' League, seventh tournament, at Utica.

Oct. 25.—RICHMOND, Me.—New England Shooting Association championship tournament, under auspices of Richmond Gun Club.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

1895.

April 3-5.—Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York.

May 14-16.—DAYTON, O.—Ohio Trap-Shooters' League annual meeting and tournament under the auspices of the Buckeye Gun Club, of Dayton, O. Ed. Taylor, Sec'y, 8 West Third street, Cincinnati.

May 21-24.—Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

June 19-21.—CLEVELAND, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

Oct. 3-6.—Pennsylvania State Sportsmen's fifth annual tournament, under the auspices of the Keystone Shooting League of Philadelphia. John C. Shallcross, Sec'y, Frankford, Pa.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

Two trophies are offered for competition at the two days' shoot of the Harrisburg Shooting Association, which takes place Sept. 27 and 28 at Harrisburg. Both are individual trophies, one being competed for at targets, the other at live birds. The Harrisburg Shooting Association donates the target trophy, the Keystone Trap Shot Wad Company being the donor of the live bird trophy. Only members of the Pennsylvania Association are eligible to compete. The programme for the two days of events open to all is one that is sure to draw well; the graduating handicap is used, winners of first and second shooting at unknown angles in the next event.

Mr. H. L. Gates, of Utica, N. Y., who captained the Oneida County Sportsmen's Association's team at the recent tournament at New London, Conn., writes that the 100,000 standard keystone targets which were won by his team, have been received. Mr. Gates expresses the appreciation of himself and of the other members of his team at the action of the management of the tournament in so promptly forwarding the carload of targets in the face of the fact that the number of teams stipulated for in the programme did not enter.

On Oct. 30 and 31 a full two days' shoot at targets will be held at Marion, N. J. The tournament, which is promoted by Messrs. Fred Quimby, M. F. Lindsley, T. H. Keller and Al. Heritage, is intended as a complimentary benefit to Mr. C. H. Townsend, the late trap editor of this paper. The promoters have already secured promises from several of the best known trap-shooters in New Jersey and New York that they will take part in the tournament.

At the final tournament of the New Jersey Trap-Shooters' League held at New Brunswick, N. J., on Thursday last, seven clubs competed, with the following result: South Side Gun Club of Newark, 109; Union Gun Club of Springfield, 101; Climax Gun Club of Plainfield, 99; Myrtle Park Gun Club of Irvington, 99; Brunswick Gun Club, 94; Maplewood Gun Club, 92; Endeavor Gun Club of Jersey City, 90

The Emerald Gun Club's tournament at Miller's Dexter Park on Oct. 22, 23 and 24, gives every promise of a successful meeting. The first two days are target days, Oct. 24 being reserved for live birds. The main event in the live bird programme is the Empire City handicap at 25 live birds per man, $10 entrance, birds extra. A detailed programme will be given next week.

Miss Annie Oakley will shortly leave the States and sail for the Old Country, where she will star in "Miss Rora," a play specially written for her. The play gives Miss Oakley plenty of opportunity for displaying her wonderful talents as a horsewoman and as a shot. A realistic fox hunt which takes place on the stage is one of the features of the play.

The live bird shoot which will take place on Thursday of this week, Sept. 27, at Elm Park grounds, Port Richmond, Staten Island, is an assured success; entries number about 22. The conditions are 20 live pigeons per man, 30yds. rise, $10 entrance, with $200 added. The grounds are about three minutes' walk from Elm Park station.

Notwithstanding the steady downpour on Sept. 18, Wm. Stewart and Jones met at Willard's Park, along with about 50 friends, to settle a live bird dispute for $50 a side. The birds, which were furnished by Rogers, were fast, too fast for the shooters, who got 3 and 1 respectively out of their 10 birds.

Rollo Heikes's trophies which he won at the New London tournament recently are on view at the store of the Winchester Repeating Arms Company, 314 Broadway. The Chamberlin Cartridge Company of Cleveland, O., claim to have loaded Heikes's shells with which he has been so successful this year.

The Poygan Gun Club, a Chicago association, has leased 2,700 acres of land, having a frontage of eleven miles. This land includes Pine River, Willow Creek and Pumpkin Seed, all that portion on the west end of Poygan, and all of Norwegian Bay, Lake Poygan.

Next week's fixtures include the Independent Gun Club, of Reading, Pa., tournament at targets on Oct. 3 and 4, and the live bird and target tournament of the West Newburgh Gun and Rifle Association on Oct. 3, 4 and 5; live birds on the last day.

During the second day of the California State Sportsmen's Association's tournament at Santa Monica, President Crittenden Robinson, of San Francisco, killed every pigeon he shot at—52 straight.

The semi-monthly shoot of the Metropolis Gun Club of Kansas City resulted as follows: Horton 24, Pugh 22, Peck 20, Cosby 18, Rooney 17, Winters 17, Smock 16, Estep 15, Stilwell 14, Peterson 6.

The Ashbourne Gun Club, of Ashbourne, Pa., will hold a shoot at targets on Oct. 13. For programmes and further information address E. Bitting, Jr., Ogontz, Montgomery county, Pa.

That shoot at Chattanooga was a most successful one, and has boomed trap-shooting in that vicinity. Remember Charleston, S. C., on Oct. 10 and 11.

The Sioux Gun Club, of Clinton, Ia., is making extensive arrangements for a shoot at the Interstate Fair which will be held in that city shortly.

Although there are no new developments in the proposed international live bird shoot, the project is not slumbering.

EDWARD BANKS.

### Knoxville and Memphis in '95.

THIS year the "$1,000-added-money" tournaments made the eyes of trap-shooters bulge with astonishment. To divide $1,000 among those who took part in the different programme events was without question a big thing. The Knoxville Club, however, have announced that they will at their '95 tournament add $1,500 to the purses, together with an additional $1,500 to be raised as follows: Every shooter who wishes to compete at the Knoxville tournament in 1895 shall pay an entrance fee of $10; the club counted upon 100 shooters doing this, and that means $1,000; the remaining $500 to be donated by the sporting goods manufacturers and dealers of the country.

Memphis, Knoxville's sister, can look with pride upon her gun club, that organization having gone her friendly rival at least $500 better in money added by her club. The following is how the matter stands now, the facts having been obtained from Messrs. Irby Bennett, Divine, Allen and Frank during the tournament at Chattanooga, in which they took part:

The Memphis Gun Club at a recent meeting appointed Messrs. Thos. A. Divine, president of the organization, W. F. Allen and Irby Bennett an executive committee to arrange for and carry out a tournament in 1895, authorizing that committee to pledge the name of the club for from $2,000 to $5,000 in added money. It is understood that $2,000 has been deemed sufficient, and that that sum will be added to the purses during a four-days' tournament next year. The date has not been definitely settled so far, but in all probability the tournament will take place the week following the shoot at Knoxville, the dates for which are May 21, 22, 23 and 24. In Messrs. Divine, Allen and Bennett the club has selected a strong trio, a guarantee that the shoot will prove the success it deserves to be.

The Ohio Trap-Shooters' League tournament at Dayton, O., on May 14, 15 and 16, the Knoxville shoot the week following, with the Memphis shoot one week later, will make a circuit that will give the boys all the shooting they want for three weeks, the Dayton shoot acting as an eye-opener. The added money in the last two weeks, $5,000 in all, should draw shooters from their very death beds.

In regard to the proposed 100 shooters at $10 each for the Knoxville shoot, it may be as well to state that Mr. Summers Van Gilder raised the number of those entered to date to 78, adding several to his list by his visit to Chattanooga.

### Weir City Gun Club.

WEIR CITY, Kan., Sept. 13.—The following scores were made by members of our gun club during the present week. The monotony of target shooting was somewhat fractured by a liberal donation to a live bird shoot. The good crop in southeastern Kansas is all that ever induced the business men of Weir City to engage in the hilarity of a pigeon shoot, and judging from the way the boys came out behind it will take two good crops to get them in another pigeon sweep: Ten live birds, entrance $7.50: Wilkinson 7, McIlhany 9, Blackett 9, Featherson 7, King 6, Calhoun 9, Best 5, Morrison 8. Ties on first and third divided, Morrison won second.

After the pigeon shoot the club fell back on the old reliable bluerock and spent the balance of the afternoon cracking mud. The main event was at 25 singles. Scores: Calhoun 24, Doan 23, McIlhany 21, Abbott 18, Morrison 17, Beadle 15, Ayers 16.

The North handicap has firmly established itself among our shooters. It was used at the tournament recently given here, and was pronounced by all shooters as just the thing. While entirely satisfactory to shooters it was so simple and easy to handle that the "cash man" didn't know he was figuring on a handicap. Its main advantage lies in the fact that it encourages and benefits the poorer shooter without any real detriment to the better shot, for while the high man may occasionally drop down and lose his place, this fact so pleases the low man that he takes his third and fourth money and stays with the game, thus keeping each event well filled up. Our own shoot, conducted under the North system, was most flattering to Mr. North's inventive genius, and showed that his thought in this line had produced something needed.

MAMALUKE.

### Americans on British Grounds.

PHILADELPHIA, Sept. 17.—*Editor Forest and Stream:* I have read Mr. Moore's article in your issue of the 15th inst., in which he apologizes for his statements published in the public prints shortly after his arrival from England. Had he stopped at the apology I should have been better pleased, and it would have put an end to a disagreeable incident, but unfortunately he again draws my name and that of Mr. Alberger of this city into the controversy in his review of the facts upon which he founded the charges.

For myself and Mr. Alberger I desire to reaffirm the statement which I have already made, namely, that neither Mr. Alberger nor I have any fault to find with the treatment which we received from any of the gun clubs in England or their members. I take advantage of this occasion to thank those clubs at which I shot for the privileges extended to me as a guest.

Should Mr. Moore desire to write another letter on the subject I must ask him to speak for himself alone, and to leave me out of the affair.

R. A. WELCH.

### Binghamton Gun Club.

BINGHAMTON, N. Y., Sept. 20.—By shooting a double score to-day the Binghamton Gun Club finishes their series of shoots for prizes. First prize was the Lefever hammerless gun which Harvey McMurchy won at our spring tournament and then so generously donated it to our club to shoot for. Our arrangement was for twelve shoots, 25 birds each shot, highest average to take first choice, and so on. Below find scores of five leaders. McHenry being away has two scores to shoot yet, but will probably land fifth with Boss following closely:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Brown | 21 | 22 | 19 | 24 | 23 | 19 | 23 | 24 | 19 | 23 | 47—264 |
| Hobbie | 13 | 19 | 18 | 24 | 22 | 21 | 24 | 24 | 19 | 22 | 45—251 |
| Kendall | 21 | 20 | 20 | 12 | 23 | 21 | 17 | 16 | 19 | 22 | 44—245 |
| Waldron | 20 | 21 | 16 | 23 | 15 | 20 | 21 | 21 | 20 | 22 | 45—244 |
| McHenry | 19 | 22 | 18 | 19 | 22 | 18 | 20 | 15 | 16 | 18 | ..—187 |

WINFIELD.

### Peekskill Gun Club.

PEEKSKILL, N. Y., Sept. 22.—Following are the scores of the members of the Peekskill Gun Club of the month of September in the 1894 prize competition. The shooting is at 25 targets, rapid-firing system, with added birds not to exceed 10:

| | | |
|---|---|---|
| H L Armstrong | 0111101101111'1111111101101001 | —24 |
| Dr H B Wygant | 1110110010101111111111111111 | —22 |
| Dr P H Mason | 1001011111110111111'1111 | —21 |
| H P Dair | 1110011100100111110111101111 | —22 |
| O J Lud[illegible] | 1101111111100110011101111111 | —24 |

Other high scores for the month, not in the above competition, are: Pierce, 98 out of 100; Mason, 49 out of 50; Everinghim, 39 straight; Halsted, Dain, Horton, Perry and F. Southard, 24 out of 25.

B. C. EVERINGHIM, Sec'y.

## CHATTANOOGA.

LAST week was a gala one at Chattanooga. Odd Fellows covered with badges pervaded the city and filled the hotels, leaving room enough, however, for those who attended the first annual tournament of the Chattanooga Gun Club, held Wednesday, Thursday and Friday, Sept. 19 to 21. There are two or three ways of getting to Chattanooga from New York, all of which are through the most picturesque portions of the South. If you're in a hurry, the Southern Railway Co.'s Vestibuled Limited, leaving New York at 4:30 P. M., lands you at Lynchburg, Va., in ample time to make Norfolk and Western connections so that Chattanooga is made by 7:25 the following evening. But if you're not in so much of a hurry leave at the same hour, 4:30 P. M., and go through to Atlanta, stop the night in the Gate City of Georgia, and leave for Chattanooga next morning. You may lose half a day, but you've seen the South, or rather a good part of her. And just now she's looking beautiful. Tobacco is being cut, cottonfields are white, and the darkies are busy saving "fodder" for the cattle in the winter; fields of cane from which sorghum will shortly be crushed, melon patches, and scantily clothed darky children, all go to make a trip to Chattanooga, via Atlanta, always a treat to a Northerner, and an experience that time can never efface.

On Sept. 19 and 20, just thirty-one years ago, a good deal of powder and lead was used up in the vicinity of Chattanooga, Tenn. The battle of Chickamauga was in progress, and thousands of men lost their lives or limbs in the vicinity of the Mountain City of Tennessee during those two days. On Sept. 19 and 20 of this year of grace, 1894, powder and lead were again raising a disturbance within a few miles of the scene of the struggle which marked an important epoch in the history of the war between North and South. Then it was all black powder that was used, and human beings were the targets. This time it was all nitro powder, while asphalt targets were the victims in the one-sided discussion.

As a matter of fact, the Chattanooga Gun Club, a young organization, has been the means of bringing together Northerners and Southerners in friendly competition before the traps, the Interstate Manufacturers' and Dealers' Association giving a tournament under the auspices of the Chattanooga Gun Club. This tournament was a most decided success, and the club is due more than the ordinary amount of congratulations accorded on such occasions. Its membership is not large, but, as is often the case, the few make up in quality what they lack in quantity. The present officers of the club are: F. I. Stone, President; D. J. O'Connell, Vice-President; Wm. White, Secretary, and F. H. Woodworth, Treasurer. All four of the above, together with several other members, took an active part in the proceedings, Mr. Stone, although he shot but little, being in evidence pretty nearly all the time and succeeding admirably in his self-imposed task of putting the guests of his club at their ease.

The scene of the tournament, the shooting park of the club, is beautifully situated, and is also conveniently located only a few minutes' walk from the line of the electric streetcar line. The ride from the city takes about twenty-five minutes, the distance being about three miles. The line is laid over one of the most crooked tracks it has ever been FOREST AND STREAM's representative's lot to ride over. If it wasn't for Lookout Mountain, which towers 2,000ft. above the city, it would be impossible for a stranger on his arrival at Riverview to locate his starting point, unless he possessed the instinct of a homing pigeon, as the cars turn around corner after corner, even after the city limits have been reached.

The traps are placed on the summit of a gentle rise, the shooters standing slightly down hill. The trapper boys have been well looked after by the club, the screen, built in the shape of a long, low shed with a front that lets down when the traps are to be used, being absolutely safe, stout 2in. boards forming the backing. A deep trench also enables the boys to do their work with comparative ease and comfort. In the rear of the score the club has erected a solid grand stand that seats about 150 persons, every one of whom would be enabled to get an uninterrupted view of the shooting. On Wednesday and Thursday the stand was taxed to its utmost capacity, several ladies being present as interested spectators. Elmer Shaner, the Interstate Manufacturers' and Dealers' Association's manager, arrived in Chattanooga on Sunday, Sept. 16, and had everything in readiness for the opening event at 9:30 on the morning of the 19th. The blackboards were placed to the left of the score, close to the cashier's office, which was located in the tent of the Leroy Shot and Lead Works. Next in order were the tents of FOREST AND STREAM and the U. M. C. Co., the latter immediately to the left of the stand. On the right were the tents of the American E. C. Powder Co., Standard Keystone Co., Von Lengerke & Detmold, Tatham & Brother, and the S. S. Powder Co. in the order named.

The scene was a lovely one, the weather being absolutely perfect. To the right was Lookout Mountain, with its wonderful history made 31 years ago. In front was the undulating line of Mission Ridge, with Bragg's headquarters now marked by an iron-framed tower that stands up prominently against the sky. There was plenty of food for thought furnished by the location of the last but one of the series of tournaments for 1894 given by the Interstate Manufacturers' and Dealers' Association.

To return to the shoot. The skyline was all right, the targets rising well above the distant background of Mission Ridge; as a natural consequence scores were good. Of the "crackerjacks," the *bête noir* of "Dock," of Springfield, O., Heikes, Bartlett and Brewer, were well to the fore. Van Dyke, although he did not come up to his usual standard, was more than satisfied with his work, as he was somewhat handicapped by a new gun and a new load. Van Dyke has joined the noble army of "pumpers" and will in future be found using exclusively a Winchester repeater. Heikes made a great run on the first day and attempted to break the record of 181 straight which he made at Corry, Pa. His work at Chattanooga was this: Beginning in event No. 7, he made a clean score to the end of the programme, making 60 straight, 45 of them at unknown angles and 15 (event No. 9) at the Novelty rule; four extra 15-target races at unknown angles were then shot, Heikes going straight in all four events, making his record for the day 120 straight. On request he started in to shoot until he dropped one, breaking 17 more before he missed, making his score 137 straight, 122 of them at unknown angles.

Among those present from a distance on the first day were Capt. "Andy" Meaders, Frank Legler and Tom Callender, of Nashville, Tenn., the latter talking and shooting Troisdorf powder to advantage; Col. Anthony, Charlotte, N. C., who shot as well as ever; W. M. Thomas, better known as "U. M. C." Thomas, representing the U. M. C. Co., of Bridgeport, Conn., and courteously explaining to those anxious to know, all the mysteries of the shells, wads and primers on exhibition at the U. M. C. tent (N. B.—Why don't other manufacturers exhibit their manufactures at these shoots?); Arthur E. Mead, Knoxville; W. W. Watson, Louisville, Ky.; W. L. and W. J. Brown and R. M. Cleveland, Sweetwater, near Chattanooga; F. C. Etheridge, Macon, Ga., and FOREST AND STREAM's representative. The home club was well represented by Messrs. Wm. White, D. J. and A. L. O'Connell, F. I. Stone, F. H. Woodworth, R. Pritchard, Charles Reif, Price, Douglas Everett, "Dupont" Waddell and others.

*First Day.*

There was a settled appearance in the sky on this day that cheered the hearts of the management. Monday's heavy storm had freshened things up wonderfully, and the country looked its best. Riverview cars were patronized at an early hour, a start in the programme being promptly made at 9:30. The list for the day included ten 15-target events, five at unknown angles and five shot under the novelty rule. The Association's bluerock traps, with Ben O. Bush's electric pull attached, were used, keystones being the targets thrown. Manager Shaner speaks in the highest terms of his traps, terming them his "pets;" so far he has thrown almost 100,000 targets from them with a fatality of only one broken spring. That everything worked well goes without saying, the scores given below showing that; in addition to the four regular papers, four extra 15-target races were shot off, making a total of 210 shots for those who went through every event during the day.

There were two noticeable features in connection with this tournament at Chattanooga; the first was the fact that not a single charge of black powder was fired; the second, the marked popularity of pump guns, eleven Winchesters and two Burgess guns being handled at Riverview.

The executive work in connection with the shoot was well carried out, the officials discharging their duties in a thoroughly able manner. Officer J. T. Moseley, of the Chattanooga police force, a member of the club, shoots well and is fond of the sport, but on this occasion he denied himself, acting as referee throughout the three days' shoot. Cashier Fred. Philips and assistant Cashier Woodworth, Sr., the father of F. H. Woodworth, were the right people in the right place. The manifold and blackboard work was performed with such accuracy that FOREST AND STREAM regrets that a lost memorandum forbids the names of the officials detailed for those duties being handed down to history. Scores:

No. 1, 15 targets, novelty rule, entrance $1.50, $10 added, 4 moneys:

| | | | |

*Second Day.*

Another glorious day for trap-shooting, a typical September day in the Sunny South. Barely enough air was moving to cool the atmosphere even in the shade of the tents and stand. Ice cold lemonade at a nickel a glass was consumed by the gallon, the restaurant at the southern end of the stand doing a rushing business in that commodity.

Schedule time was again made when it came to starting the programme. An important addition to the list of shooters was that of the Memphis crowd, consisting of Messrs. Irby Bennett, the Southern representative of the Winchester Repeating Arms Company; Thomas A. Divine, W. F. Allen and Abe Frank. Mr. Summers Van Glider, of Knoxville, paid a brief visit, just to look up the boys and to talk Knoxville in '95. What he says about that event is found elsewhere in these columns; it's worth looking up. Maybe they're not hustlers in Tennessee! Capt. Du Bray, of the Parker Gun Company, and Mr. C. C. Napier, Messrs. Hartley and Graham's representative, were also in attendance.

The programme was the same as on the previous day—five events at unknown angles and five under the novelty rule. An addition was made in the shape of a team race between "pump guns" and double barrels. Capt. Bartlett was chief of the "pumpers" and chose the following team: Heikes, Van Dyke, W. W. Watson, L. Brown, Capt. Brewer and Capt. Bartlett. Col. Anthony was placed in charge of the double guns and picked as his crew: Livingston, Divine, Mead, Etheridge and himself. The result was a remarkably close race, the pump guns winning by a single target, the score standing 78 to 77 at the finish. Col. Anthony announced his determination of having revenge the next day. Bartlett and Watson shot Burgess guns, the other men on the team shooting Winchesters.

During the afternoon Captain Bartlett gave an exhibition of his powers with the Burgess gun, his feats of markmanship meeting with considerable applause from the crowd present. The attendance of spectators was very flattering when the numerous counter attractions, such as horse races, etc., are taken into consideration. Bartlett's "flipper" act caught the popular fancy immensely. This closed the tournament so far as the Interstate Manufacturers' and Dealers' Association was concerned. Friday, Sept. 21, had been announced as Tennessee Day, the events being open to residents of the State alone. Before the shooting on the second day was brought to a close, Mr. F. H. Woodworth made the announcement that, owing to the comparatively small attendance of Tennesseeans, Friday's events would be open to all, and that a special programme would be arranged to meet the exigencies of the case. This decision of the management was well-timed and met with unanimous approval. Scores of the second day:

*Third Day.*

The cup of the management must surely have been filled. The weather was once more all that could be desired, and the attendance decidedly satisfactory after the two previous days' hard work is taken into account. The regulars were all there, the first event opening up with 22 entries. The programme contained 10 events, the first 9 being 15-target races at unknown angles, the tenth being at 10 pairs. The latter was a most interesting event, plenty of applause greeting every super-excellent shot. Heikes won first money with 18. F. H. Woodworth of the home club being second with 16; ties on 15 were too numerous to mention.

Col. Anthony felt inclined to take a fall out of the pump guns on this day, following up his expressed determination of the previous day. The match was made as before, six were to a team, but entrance money this time was $2 per man. The Colonel's team was himself, Meade, Livingston, Woodworth, Thomas and Legler; Capt. Bartlett was again the chief of the pump gun brigade, the following constitut his team: Heikes, Bennett, Bartlett, Brewer, Van Dyke and L. Brown. Bartlett winning the toss decided to set the pace; his team went to the score and rolled up the total of 83 out of 90 at unknown angles, a great score when it is considered that Van Dyke, handicapped as stated above, was responsible for four of the seven lost targets. The pace set was too warm for the double guns, who were beaten four targets, scoring 79 out of 90, by no means a poor score in itself.

A photographer put in his appearance late in the day and took two shots at the grounds and the assembled shooters, after which Captain Brewer brought the Chattanooga tournament of '94 to a close with an exhibition of his skill with a Winchester. What Captain Jack can't do with a pump gun is hardly worth talking about. Captain Bartlett was called for by the crowd, and responded by going through his "flipper" performance. In this act Bartlett hands his gun to a friend who stands close to him; he then throws a small block of wood high into the air, turns a handspring, takes his gun and hits the block two or three times before it reaches the ground. Captain Brewer's most difficult feat apparently, and one which requires great quickness, is to break two targets thrown into the air simultaneously, breaking his first from his left shoulder, reversing his gun, pumping out the empty shell and breaking the other from his right shoulder. Scores in this day's events:

## Notes of the Shoot.

Capt. Meaders, of Nashville, one of the most popular men in the South, and formerly one of her best trap shots, has found out that lack of practice is fatal to consistent trap-shooting. The Captain says he does very little shooting at the trap now, quail shooting being about all the sport he indulges in. This season he anticipates great sport, as quail are as thick as fleas.

Col. Anthony, of Charlotte, N. C., states that there are "millions of quail" in the Tar Heel State. Second broods are very numerous, 30 to 40 birds being found in some of the coveys.

Irby Bennett is responsible to a very large extent for the sudden eruption of Winchesters in the South. Irby is the representative of the Winchester Repeating Arms Co. in that section of the State, and his popularity and enthusiasm always carries his point.

DuPont's smokeless powder has a capital representative in Mr. Waddell, of Chattanooga. What Mr. Waddell did for the boys last week "was a plenty."

Few people are blessed with as many faculties as "Jack" Brewer. He can shoot (everybody knows that); he can tell a story; sings "Sweet Marie" well when accompanied by the U. M. C. quartette, and is blessed with a healthy appetite.

Rollo Heikes proved once more very conclusively that he is "the daddy of them all." Note his run of 137 straight on the first day.

The dates of the Knoxville shoot have been fixed. That $3,000 added money will be ready for distribution on the Tuesday, Wednesday, Thursday and Friday of the third week in June. S. Van Gilder got several more $10 subscribers at Chattanooga; he has 78 on his list now.

If there are many boys in Memphis like Abe Frank, that city is in no danger of going to sleep.

Mr. Thomas A. Divine, of Memphis, although he has recovered from his recent illness, was unable to do himself justice at the traps.

Capt. DuBray, representing Parker Bros., was present at the shoot on Thursday and Friday. The captain brought with him a 20-gauge quail gun built for President Stone, of the Chattanooga Gun Club. Mrs. DuBray is accompanying her husband on this trip.

That was a happy quintette that drove over the scene of the battle of Chickamauga last Saturday morning. The thanks of the fortunate five, Capts. DuBray and Bartlett, Messrs Van Dyke and Thomas and the FOREST AND STREAM representative, are hereby tendered to our excellent cicerone and charioteer, "Dupont" Waddell, of Tennessee's Mountain City.

Capt. Bartlett is a successful relic hunter.

Kickers were conspicuous by their absence.

Mr. C. C. Napier, who travels for the well-known sporting goods house, Messrs. Hartley & Graham, arrived on Wednesday afternoon and spent Thursday in that city.

The local press did not do itself proud, nor the club justice, by its reports of the tournament.

EDWARD BANKS.

## Emerald Gun Club.

*Editor Forest and Stream:*

Following are the scores of the Emerald Gun Club at Dexter Park. Club point handicap and handicap rise. Event No. 1 at 10 live birds per man:

Class A, 30yds.

| | | | |
|---|---|---|---|
| Herrington | 2 2 1 2 1 1 1 1 1 1—10 | Phister | 2 • 2 2 2 1 1 1 2 1— 9 |
| Voss | 2 1 1 1 1 2 1 1 1 1—10 | Doeinck | 2 1 1 1 1 1 2 • 1 2— 9 |
| Sch'rtemeir | 1 1 1 1 2 2 1 2 1 2—10 | | |

Class A, 28yds.

| | | | |
|---|---|---|---|
| W Hudson | 2 2 1 2 • 1 1 2 2 2— 9 | GLeveredge | • 1 1 2 1 1 1 • 1 •— 7 |
| Than | 1 1 1 1 • 1 1 1 1 2— 9 | Russell | 1 • • 1 2 • 1 • 2 1— 6 |
| Coady | • 1 1 1 1 1 1 1 1 1— 9 | Floyd | 2 2 2 1 2 • • • 2 •— 6 |
| J Maesel | 1 • 1 1 2 2 2 2 • 1— 8 | | |

Class B, 25yds.

| | | | |
|---|---|---|---|
| F W Place | 2 2 2 1 1 1 2 1 2 2—10 | N Maesel | 1 1 • 1 2 • 2 1 • 1— 7 |
| J H Moore | 1 2 2 1 1 2 2 1 1 1—10 | J Hodge | 1 • 2 • • 2 • 2 2 1— 6 |
| R Regan | 2 2 • 2 2 2 1 1 1 2— 9 | J Woelfel | • 2 1 • 2 1 1 1 2 1— 8 |

No. 2 sweep at 15 targets, four moneys:

| | | | |
|---|---|---|---|
| Leveredge | 110111100110101—10 | Floyd | 111111101111101—13 |
| Woelfel | 000011001110 01— 7 | Moore | 000101101101010— 7 |
| Voss | 011000101010100— 6 | Phister | 010111111111101—11 |
| Regan | 000000000000000— 1 | Hudson | 111111101111111—14 |
| Hodge | 000000000010010— 2 | Schortemeier | 111111111111111—15 |
| Coady | 000110100111100— 7 | | |

No. 3, 10 targets: Woelfel 4, Floyd 7, Phister 8, Coady 4, Schortemeier 8, J. Maesel 7, N. Maesel 5, Voss 8. S. H. S.

THE regular shoot of the Emerald Gun Club was held Sept. 18 at Dexter Park, L. I. Eighteen members faced the traps, a fair average under the circumstances, as the weather was not the very best and it rained continually while the shoot was in progress. Weather or no weather it would not keep them home, as the boys are trying hard to get into form for our first annual tournament at Dexter Park on Oct. 22, 23, 24, and particularly for the great Empire City handicap, which will take place on the last (Oct. 24) day, and will be at 25 live birds, $10 entrance, birds extra, four moneys, class shooting, Emerald Club adds $100 to this event, four misses out, 80yds. boundary, 26 to 33yds. rise, gun in any position, open to all; and in order to please the expert shooters, the first 15 birds in handicap will constitute another event, extra entrance money, straight shooting, high guns to get the money, entrance to either or both optional, handicap unknown to shooter until he steps to the score. A forfeit of $3 to be sent with entry to Dr. Hudson, 9 Madison street, New York. He will also give any information the shooters require. The first day will be at empire targets and will be called New York day. The second day will also be at empire targets and will be called New Jersey day. Extra events will be made to suit the shooters present if time and endurance will permit. Will send you a copy of programme when we receive it from printer.

Club shoot, 10 live birds, Emerald Club rules:

G. V. HUDSON, M.D.

## Belfast Gun Club.

BELFAST, Me., Sept. 19.—The Belfast Gun Club have just completed their cup contest for 1894. The cup was won by Ralph H. Howes under the following conditions: There were 12 shoots; at the first shoot each man shot at 25 targets; at all subsequent shoots the man or men making the highest score to shoot at 25, and all the rest to have as many more targets to shoot at as their scores fell below the highest score made. The highest score counted 5 points and the next 4, and so on down to 1. Any member being absent from a shoot to lose his score and also his handicap, and must shoot at 25 targets at next shoot. Ralph H. Howes won the match by a score of 49 points, with John Healey second with 47 points. Much interest has been manifested in this contest, several members running along very close in number of points until the last. The prize is a silver cup finely engraved.

BOB BLACK.

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## Massachusetts State Shoot.

CHELMSFORD, Mass., Sept. 18.—The second monthly meeting of six clubs representing Lowell, Worcester, Boston, Marblehead, Hingham, Middlesex Sportsmen's and Massachusetts Rifle Association, Walnut Hill, was held here to-day at the grounds of the Lowell Rod and Gun Club. The grounds are pleasantly and conveniently situated about two miles from the Lowell post-office and within three minutes' walk of the electric cars. A five-trap plant, well arranged and adapted to the grounds, answer the practice requirements of the club, which is composed of sixty-five members. An extra three-trap plant is utilized for special events. The day opened with an inauspicious fog which soon lifted and fine weather was afforded the shooters.

A serious fire in Lowell detained several members of the club until afternoon, and the fact that many members of the different clubs are off bird shooting made the attendance slimmer than was expected. Under the management of President Dr. W. A. Downs and Secretary Derby the events were shot off rapidly and harmoniously, and the able manner in which Mr. Frank A. Derby handled and disbursed the moneys gave universal satisfaction to the shooters. The following scores show how well the boys can shoot:

No. 1, 10 targets, keystone regular: Dickey 7, Snow 8, Davis 9, Brown 3, Bates 8, Robinson 5, Daly 6, Dock 5, Colt 4, Allison 6, Furrow 8, Brun 9

No. 2, 10 targets, keystone reversed: Daly 4, Jones 7, Snow 7, Furrow 5, Davis 10, Brown 8, Bates 7, Dock 6, Allison 5, Brun 8, Dickey 9, Climax 7.

No. 3, 10 targets, unknown angles: Dickey 7, Snow 9, Davis 9, Jones 7, Brown 9, Bates 9, Daly 8, Dock 4, Allison 10, Farrar 5, Brun 6, Warren 6, Climax 8, Puck 7.

No. 4, 5 pairs:

| | | | |
|---|---|---|---|
| Brown | 11 10 11 00 00—5 | Davis | 11 11 11 10 10—8 |
| Farrar | 11 10 11 10 00—6 | Snow | 10 10 11 11 10—7 |
| Allison | 11 11 00 11 11—8 | Dickey | 11 11 10 10 11—8 |

WAYLAND.

## Trap at San Antonio.

THE agony is over as far as the trophy shoots of the San Antonio Gun Club is concerned. As predicted by your correspondent, who, as a shooting prognosticator poses at the same notch that Foster does as to cyclones, Mr. I. N. Rothwell added another winning to his string of five. This makes him seven winnings to the others' four, and as there are but two more shooting dates, Mr. Rothwell is receiving the congratulations of his friends on his victory.

Rothwell is one of the most popular shots in San Antonio. He began shooting only seven years ago, and still handles the same gun (Scott 12-gauge) that he placed to his shoulder for the first discharge. His winning the trophy for 1894 so easily places him head and shoulders above his confreres of the San Antonio Gun Club, and somehow we are all glad of it.

The shoot on the 16th was a poor exhibition, as far as the scores are concerned, which explain themselves:

No. 1, 10 singles and 3 pairs: Samuels 9, Rothwell 15, Smith 10, McCormack 7, Black 10, Thiele 13, Veith 9, Chabot 8, France 10.

No. 2, trophy shoot, 20 singles and 5 pairs: Rothwell 23, Chabot 15, Vollbrecht 16, Samuels 16, McCormack 20, Barr 16, Heyel 14, Veith 18, Grossman 15, Shields 15, Thiele 19, France 14, Smith 17, Black 16, Eppstein 19.

O. C. G.

## Princeton Notes.

PRINCETON, N. J., Sept. 15.—With the advent of the open season trap-shooting will probably languish for a time in this old college town. But meanwhile our mascot and pride, Master George Rule (of whom I wrote you earlier as having never shot on the wing previous to June 15 of this year, and yet as having won the Winchester prize repeating gun last month, against all comers, in a series of five shoots), is not letting any pasture grow under his feet in getting acquainted with his new gun. Daily practice is getting him in wonderful form for a 16-year-old. Last week he smashed 25 empires straight, from known traps. Inclosed score shows what he did this week, 26 out of 30, from 5 screened traps, 16yds. rise, expert rules; 86⅔% wouldn't be a gait to be ashamed of even in professional company. By the way, why doesn't somebody take up the challenge I understand he has posted with you? He offers to shoot anybody under 16 years a match at live birds, targets or glass balls (the latter to be thrown by hand and shot with repeating rifle, .22cal., using bullet cartridge). The local fraternity are ready to back him; let some one take up the gauntlet and show what boys can do.

WADS.

## Shooting at Saratoga.

A LIVE bird match between a couple of two-men teams, one belonging to the Saratoga Gun Club, and the other representing the West End Gun Club of Albany, took place at the Saratoga Shooting Grounds on Saturday, Sept. 22. It proved to be an interesting race. The principals in the affair were J. Nelson Ramsdill and W. L. Pike, for Saratoga, and H. R. Sweny and A. C. Stone, for Albany. The shooting was rocky in spots and the average below first-class work; but the tenacity with which the teams hung to each other, and the desperate efforts of the Albanians, made to overcome the lead gained by their opponents in the first round of 10 birds, kept the excitement up to a feverish pitch, and afforded a very considerable amount of pleasure to the onlookers, particularly the natives, who were present in goodly numbers.

The pigeons were tip-top for early flyers, most of them starting promptly at the opening of the trap; the few that lingered at the trap were immediately put to death under the "no bird" penalty, with the exception of a few loggy ones, were "shooed" to flight by the antics of "Washy" Coster late in the day to save time in trapping. The weather was clear and hot, though at no time did the heat reach a degree of discomfort. With the exception of a few of the visitors, who had to catch homeward-bound trains, not daring to stay over night in that beautiful but wicked village, the audience did not desert the performance until the curtain was rung down at the fall of the last bird.

Among the prominent sportsmen present were A. Nelson Cheney, president of the Mohican Rod and Gun Club of Glens Falls, and Myron F. Roberts, president of the Granville (N. Y.) Gun Club, though the latter gentleman is a resident of Rupert, Vt. Mr. Cheney's presence was explained by the fact that a team of Mohicans had an inanimate target match with the Saratogians, prior to the live bird event, in which the braves were the losers by a very narrow margin. This target match was under way when the Albany contingent, accompanied by the FOREST AND STREAM'S correspondent, arrived on the ground, about 1:30 P. M., and the saucer smashing ate well into the afternoon, so that the live bird match, pushed on one side for the time, was not concluded until "The shades of night were falling fast." The windup of the shooting at the pigeons, fluttering about with the uncertain flight of bats in the dusk, was largely guess-work in aligning the gun, and luck in hitting the object.

The conditions of the live bird team match were 50 birds per man, 100 per team, $50 a side and the loser to pay for the birds, American Shooting Association rules to govern, except that the boundary shall be a 30yds. circle in the first half of the match and a 50yds. circle in the latter half, the circle in each case being struck from the center trap and bisecting the dead line at the firing point. Mr. Thomas H. Greer, a well known pigeon shooter on the eastern New York circuit, was chosen referee, FOREST AND STREAM'S correspondent official scorer. The retrieving of the birds was performed by Harry M. Levengston's liver-colored pointer Dick, who is quite a wonder for this part of the country, a "fly catch" of Ramsdill's first bird, which, though fatally wounded, would have fluttered over the deadline, brought forth the plaudits of the crowd. The Saratoga team won the match, but the individual honors for the best shooting were carried off by Young Sweny, of Albany, as the following scores show:

| | |
|---|---|
| W L Pike | 1110122110211122111121211—23 |
| | 0021111111•11110110122l••—18—41 |
| J N Ramsdill | 2211211111•2100211210002•—18 |
| | 1222212122122122l1•10111•0—21—39—80 |
| H R Sweny | 1111121110111211111221101—23 |
| | 2221012111•211101111•1201—20—43 |
| A C Stone | 2100101210l•111101•012••0—14 |
| | 2102110121011121011111101—20—34—77 |

Previous to the above highly-colored event, a return match was loudly talked of, the same to take place on the private estate of John T. Betts, at Brunswick (a suburb of Troy); but Albany fell down with such a dull, sickening thud, that another team race is not likely to arise from the ruins of this one, though to the credit of our boys it can be said that they were good losers, and accepted their defeat and the consequent inroad on their purses with that good-natured imperturbability that characterizes your thoroughly game man.

HORACE B. DERBY.

## Hawkeye Gun Club.

DUBUQUE, Ia., Sept. 13.—The Hawkeye Gun Club held a shoot on their grounds to-day, the shoot proving a success in every way. Some good shooting was done and all enjoyed a fine day's sport. A number of shooters from out of town were present, besides representatives of the E. C. and Standard gun clubs. The 600 pigeons which were sprung from three King traps, kept everybody guessing, some sensational kills being made. The day was dark and so were most of the birds. Chas. Bros was referee and W. E. Jones scorer. Following are the scores:

No. 1, 5 live birds, entrance $2.50, 3 moneys: F. Mindorfer 5, W. Glab 2, F. Drasda 3, E. C. Baumhover 4, A. Heeb 4, O. Dietrich 4.

No. 2, 5 live birds, entrance $2.50: F. Mindorfer 4, J. Chaloupka 3, O. Dietrich 3, N. Glab 2, A. Heeb 3, F. Drasda 5, E. C. Baumhover 4, A. J. Walters 1.

No. 3, 7 live birds, entrance $3.50:

| | | | |
|---|---|---|---|
| F Drasda | 0210202—4 | F Mindorfer | 2120222—6 |
| J Chaloupka | 2102002—4 | A Heeb | 0•22211—5 |
| J O'Brien | 2222201—6 | O Dietrich | 1012212—6 |
| N Glab | 2211110—6 | E C Baumhover | 2222122—7 |
| A J Walters | 0•00200—1 | | |

No. 4, 5 live birds, entrance $2.50: N. J. Thiel 4, A. Heeb 3, J. O'Brien 4, O. Dietrich 3, N. Glab 4, F. Mindorfer 3, J. Chaloupka 5, S. R. Showers 3, A. J. Walters 3, F. Drasda 2, E. C. Baumhover 5, W. Cox 3.

No. 5, 5 live birds, entrance $2.50: E. W. Coburn 3, N. J. Thill 3, S. R Showers 2, J. O'Brien 4, J. Chaloupka 2, A. Heeb 2, W. Cox 4, F. Drasda 3, N. Glab 4, L. Van Vleck 3.

No. 6, 7 live birds, entrance $3.50:

| | | | |
|---|---|---|---|
| J Chaloupka | 111•112—6 | J G Brown | •10•210—3 |
| F Jaeger | 2110011—5 | E W Coburn | 2202102—5 |
| N J Thill | 0122112—6 | W Cox | 0102121—5 |
| G Wunderlich | •122121—6 | A J Walters | 1000000—1 |
| A Heeb | 1000221—4 | S R Showers | 1000202—3 |
| J O'Brien | 022201•—4 | N Glab | 0020221—4 |
| L Van Vleck | 2022012—5 | | |

No. 7, 5 live birds, entrance $2.50: F. Jaeger 3, J. Chaloupka 4, Dr. Riglow 4, H. Williams 4, E. W. Coburn 8, F. Denert 3, S. R. Showers 3, J. O'Brien 4, W. E. Bean 3, N. Glab 4, A. Heeb 4, W. Cox 5, H. Thill 4, J. G. Brown 5, G Wunderlich 4, L. Van Vleck 1. Ties for second money were shot off miss and out, N. Glab and Williams dividing.

No. 8, 7 live birds, entrance $3.50:

| | | | |
|---|---|---|---|
| J O'Brien | 122•111—6 | G Wunderlich | 1201221—6 |
| W Cox | 0111111—6 | R P Evison | 20112•0—4 |
| S R Showers | 121121•—6 | H Williams | 0121212—6 |
| N Glab | •12••02—3 | F Drasda | 1000022—3 |

The day's sport was brought to a close with a couple of $1 miss-and-outs. In the first one, with 6 entries, J. Miller and H. Williams killed 6 and divided; in the second, with only four entries, F. H. Mindorfer and E. C. Baumhover killed 3 and divided.

O. F. SCHILL.

## Elliott Defeats Carver.

KANSAS CITY, Sept. 19, James A. R. Elliott, the crack western wing shot, who was defeated in July by Dr. W. F. Carver in two out of a series of three 100 bird races under Hurlingham rules, recovered his lost prestige in a series of three matches shot here on Saturday, Monday and Tuesday under the same rules, with the exception that the Hurlingham rules were modified in the matter of boundary, the American Shooting Association 50yd. limit being placed on them. The matches were for $100 a side each and $100 additional on the odd race, making the side stakes $400 a side.

Elliot shot a good match against Carver in July and although beaten in two out the three races the general score on the series showed him to be only 2 birds behind the victor. Elliot claimed after the July match that Carver was favored by the enlarged English boundary and as soon as he could raise another stake challenged Carver to a return match but insisted that the American boundary govern. Carver accepted and three matches shot during the past week were the result, and Elliott's victory over the "Evil Spirit of the Plains" as Carver is theatrically known was decisive. He showed himself unmistakably Carver's master as a wingshot winning all three races by the great scores of 99, 95 and 96, killing an aggregate of 290 birds out of the 300 shot at, and making a world's record at the 50yd. boundary, his score of 99 out of 100 on Saturday never having been equalled in a match under like conditions.

Andy Thomas refereed the matches, E. F. Swinney judged for Carver and George Stockwell for Elliott. There was not a single decision that was questioned, there being little for referee or judges to quibble over. James Whitfield was stakeholder and scorer. The guns and loads used were practically the same used in the July shoot, Elliott using a 7lbs. Greener, and Winchester shells loaded with 3½drs. E. C. powder and No. 7 shot. Carver shot a 7½lbs. Cashmore and Winchester shells loaded with 3½drs. wood powder and No. 7 shot. The general work of the two men led experts to the opinion that Elliott's loads were far more effective than Carver's, being more uniformly deadly in their action. Elliott's work was clean throughout, and out of the birds that got away there were few but carried out some pellets of shot, and many of them were hard hit and fell dead just beyond the boundary line or over the fence.

Elliott set a championship pace in the opening race, leading off with 58 straight kills, lost his sixtieth, a right-quartering driver of a cinnamon color, which circled out of the two loads; he then ran out with 40 straight, a record that will be hard to beat. Carver lost 9 birds in that race, four of which fell dead out of bounds. The birds were a selected lot of old campaigners and needed but little flagging.

The second race, on Monday, was more exciting. Elliott was the first to miss, but he shot a great uphill race, and won out by two birds on a score of 95 to 93. They were also good birds.

The third and last race was still closer and more interesting, Elliott losing three before Carver missed, after a 40 run. When Carver missed his 41st it appeared to anger him, and reckless shooting cost him the two next birds, and the score was a tie. From that on it was a hard race. A yell of triumph went up from Elliott's friends and supporters when he grassed his last bird and won the third consecutive race by the narrow margin of one bird. The birds on Tuesday were slower to wing than in the two preceding matches. The scores in the three matches are as follows:

JAMES WHITFIELD.

## The Indianapolis Amateur Tournament.

THE fine weather combined with a large crowd of shooters from far and near, went to make the Indianapolis Amateur Tournament the largest and most successful gathering ever held in Indiana, of its kind. Sept. 11, 12 and 13 were the dates, and seventy different shooters were present at some time during the shoot. The weather was perfect, neither too hot nor too cold. Everybody was happy, things ran smoothly, with no kicking, was it not good reason to be happy? The traps and grounds under the eyes of Dr. J. A. Martin and M. W. Burford, gave first class results and H. S. Humphrey handled the cash in a prompt manner with the money ready for the shooter as the event was finished. From one set of 5 traps, 3,875 bluerocks were trapped the first day and 3,475 bluerocks the second day, while 2,190 sparrows was the grand finale for the third day. The sparrows under the immediate direction of W. J. Hill, the original sparrow man, were as good a lot as ever flew from a trap, hardly a one refusing to fly on opening the trap. The shooting continued till moonlight and birds were shot after the moon had risen.

Those who came just to be coming were C. W. Raymond (Ray), President Ohio Trap Shooters' League; Ed. Rike, A. M. Mumma, of Dayton, O.; Alvin Grube, Chas. Lockwood, D. M. Smith and T. A. Gentle, Southport, Ind.; M. Whitney Thompson, Capt. N. Long, Al. Livenguth, of Lafayette, Ind.; J. T. Park, Brook, Ind.; L. B. Fleming (Short), T. J. Goodwin (Brown), both of West Lebanon, Ind.; Chas. Proctor, Union City, Ind.; Frank Murphey, Brazil, Ind.; Jno. T. Buker, Rockford, Ill.; Chas. E. Strawn, Jacksonville, Ill.; Frank L. Bills, Ed. Overly, C. C. Geers, A. J. Miller, Weddle and Rogers the Urbana, Ill., shooters. J. W. King was from Rennsalaer, Ind., and J. B. Reeder and C. Thomas, from Logansport, Ind.; J. Ed. Isgrigg, Chicago, Ill.; J. M. Hershey, Matsville, Ind.; Ed. Vories (Howard) and Davis, from Crawfordsville, Ind.; M. T. Hampton and W. P. Cook, Richmond, Ind.; W. W. Washburn (McCaffrey), New Richmond, Ind.; Hyatt L. Frost, Connersville, Ind.; Mr. Bower and several whose name and residence are not at hand.

Among the local shooters were Dr. O. F. Button ("Partington"), Dr. S. H. Moore ("Jacksnipe"), Dr. C. C. Evarts, J. H. Kerr, Prof. H. D. Vories, M. A. Morris, J. W. Cooper, L. A. Wessling, W. J. Fugate, H. A. Comstock, G. J. Marott, L. C. Scott, C. Wright, Col. G. W. Spahn, A. T. Quick, Geo. Beck, Jr., J. Hymer, R. D. Townsend, F. J. Hinsdale, Chas. Polster, H. C. Roney, J. B. McGuffin, E. N. Fuliweder, Dr. R. T. Oliver, W. Wildhack.

*First Day.*

No. 1, 10 singles: Lockwood 8, Grube 10, Murphy 9, Mumma 7, Ray 9, Rike 9, Becker 8, Jacksnipe 9, Strawn 9, Partington 9, Bartlett 10, King 7, Reeder 8, Thomas 6, Martin 6, Burford 5, Girton 9.

No. 2, 15 singles: Lockwood 13, Grube 11, Mumma 12, Ray 11, Becker 15, Jacksnipe 14, Partington 12, Bartlett 14, Martin 13, Burford 11, Rike 12, Murphy 10, Kink 10, Park 13, Strawn 14, Thomas 12, Girton 10, Reeder 11.

No. 3, 15 singles: Lockwood 15, Grube 12, Mumma 14, Ray 12, Becker 11, Jacksnipe 9, Partington 15, Bartlett 10, Martin 10, Burford 9, Rike 13, Girton 14, Strawn 14, Hymer 10, Murphy 10, Erwin 13, Jones 10, King 11, Thomas 11, Park 9, Herschey 11.

No. 4, 20 singles: Lockwood 17, Grube 16, Mumma 14, Ray 19, Buker 20, Jacksnipe 19, Partington 16, Bartlett 18, Martin 16, Burford 16, Strawn 18, Murphy 14, King 17, Rike 19, Reeder 12, Girton 18, Thomas 16, Jones 9, Herschey 11, Park 17.

No. 5, 10 singles: Lockwood 8, Grube 9, Mumma 7, Ray 10, Buker 10, Jacksnipe 6, Partington 10, Bartlett 9, Martin 10, Burford 5, Girton 7, Erwin 5, King 9, Murphy 8, Thomas 7, Jones 6, Strawn 8, Rike 5, Reeder 6, Herschey 8.

No. 6, 15 singles, $50 guaranteed by H. S. Humphrey and M. W. Burford: Strawn 13, Herschey 12, Reeder 8, Ray 13, Berker 13, Martin 10, Wesling 11, Partington 13, Grube 11, Bartlett 14, King 11, Girton 12, Proctor 13, Murphy 10, Smith 10, Thomas 9, Erwin 11, Lockwood 12, Mumma 12, Jacksnipe 10, Jones 10, Rike 10, Hymer 6, Burfor 11, Morris 6, Fugate 11, Evarts 12, Kerr 11, Parks 9, Humphrey 11, Long 13.

No. 7, 10 singles: Lockwood 8, Grube 9, Mumma 9, Ray 8, Buker 10, Jacksnipe 8, Partington 10, Bartlett 9, Martin 8, Burford 10, Townsend 5, Gerton 10, Hinsdale 3, Fugate 10, Morris 3, Smith 6, Kerr 8, Polster 8, McGuffin 1, Roney 7, Rike 10, Irwin 4, Strawn 10, Everts 6, Hymes 6, Tutewilder 8, Oliver 6.

*Second Day.*

No. 1, 15 singles: Thomas 11, Buker 12, Thompson 12, Mumma 13, Bartlett 14, Rike 14, Lockwood 13, Livenguth 13, Grube 13, Short 11, Reeder 9, King 11, Ray 14, Irwin 9, Strawn 13, Partington 12, Girton 8, Martin 12, Fugate 12, Tag 4, Park 13.

No. 2, 20 singles: Buker 16, Thompson 17, Mumma 15, Livenguth 15, Partington 18, Rike 18, Lockwood 19, Grube 16, Bartlett 19, Short 13, King 18, Strawn 18, Ray 15, Fugate 18, Girton 14, Martin 16, Burford 16, Bills 11, Davis 14, H. Vories 15, Howard 11.

No. 3, 10 singles: Buker 9, Thompson 9, Mumma 10, Livenguth 7, Partington 10, Rike 6, Lockwood 10, Grube 8, Thomas 4, Ray 9, Bartlett 9, Short 7, Bills 7, King 8, Strawn 8, Howard 7, Davis 4, Martin 8, Burford 7, Fugate 6, Overly 3, H. Vories 6, Girton 6, Everts 9, Irwin 4, Scott 4, Park 8.

No. 4, 20 singles: Buker 19, Thompson 15, Mumma 10, Livenguth 17, Partington 18, Rike 19, Lockwood 15, Grube 13, Short 19, King 19, Everts 15, Bartlett 19, Strawn 17, Thomas 17, Ray 18, Howard 17, Brown 8, Martin 16, Burford 17, Scott 15, Fugate 15, Davis 12, Girton 14, Bills 14, H. Vories 16, Park 18.

No. 5, 15 singles: Buker 13, Bartlett 14, Bartlett 14, Mumma 13, Rike 12, Short 9, King 13, Partington 12, Grube 10, Ray 13, Thompson 13, Livinguth 10, Everts 11, Brown 13, Strawn 12, Davis 10, Wright 10, Roxey 10, Townsend 8, Scott 8, Tutewiler 12, Cooper 9, H. Vories 10, Martin 12, Howard 11, Kerr 10, Bills 12, Jacksnipe 14, Girton 12, Erwin 11, Overly 13, Morris 5, Lockwood 11, Humphrey 11, Fugate 15, Burford 12, Bowen 8.

No. 6, 15 singles: Buker 12, Thompson 12, Mumma 13, Ray 12, Partington 13, Rike 11, Lockwood 14, Grube 10, Thomas 9, King 14, Bartlett 13, Howard 13, Short 8, Brown 12, Everts 11, Jacksnipe 10, Martin 14, Strawn 11, Kerr 12, Comstock 12, Overly 12, Gerton 11, Davis 10, Bowen 9, Fugate 12, Livenguth 13, Marott 6, Park 13.

No. 7, 10 singles: Buker 10, Thompson 7, Mumma 10, Everts 8, Partington 8, H. Vories 5, Wright 4, Roney 6, Tutewiler 7, Townsend 3, Cooper 4, Marott 5, Oliver 7, Short 5, Brown 6, Spahr 4, 4, Morris 8, Martin 8, Burford 7, Bartlett 4, King 8, Lockwood 8, Livenguth 7, Rike 9, Ray 8, Howard 5, Bills 8, Strawn 9, Girton 8, Jacksnipe 7, Fugate 9, Erwin 7, Humphrey 8, Thomas 6.

No. 8, 10 singles: Buker 10, Thompson 8, Mumma 10, Strawn 10, Partington 10, Fugate 10, Bartlett 9, Everts 7, King 10, Short 5, Townsend 8, Tutewiler 9, Ray 8, Cooper 3, Lockwood 7, Brown 6, Rike 10, Martin 10, Burford 7, Morris 6, Oliver 9, Jacksnipe 6, Livenguth 8, Girton 8, Humphrey 8.

No. 9, 15 singles: Buker 14, Thompson 13, Mumma 14, Strawn 14, Partington 14, Rike 15, Lockwood 11, Grube 14, Everts 14, Howard 12, King 15, Bartlett 12, Fugate 11, Ray 13, Davis 10, Jacksnipe 9, Oliver 12, Martin 13, Livenguth 11, Girton 11.

Silver cup for best average was won by A. M. Mumma, Dayton, O., 90%; second average was J. W. King, Rensselaer, Ind., and Dr. O. F. Britton (Partington), city, $89^{3}_{13}$%; third average, John J. Buker, Rockford, Ill., $88^{6}_{13}$%; fourth average, Ed. Rike, Dayton, O., $87^{9}_{13}$%.

*Third Day.*

No. 1, 5 sparrows: Mumma 3, DuBray 5, Weddle 5, Rogers 5, Girton 2, Rike 4, Martin 5, Bills 4, Howard 5, Hampton 2, Cook 4, Emery 4, Ray 4, Burford 5, Strawn 2, McCaffery 5, Irwin 5, Partington 5, Short 0, Brown 3, Fugate 1.

No. 2, 10 sparrows: Mumma 8, McCaffery 9, Martin 8, Rike 8, Howard 9, Roy 5, Rogers 7, Weddle 9, DuBray 7, Short 8, Brown 3, Lockwood 7, Partington 5, Emery 5, Cook 8, Hampton 7, Thompson 8, Davis 7, Girton 7, Livenguth 8, Fugate 5, Overly 6, Irwin 9, Burford 4, Baker 7, Bills 8, Strawn 8.

No. 3, 5 sparrows: Mumma 5, McCaffery 5, Martin 5, Rike 5, Howard 5, Short 4, Brown 2, Ray 5, Rogers 4, DuBray 5, Buker 4, Thompson 4, Bills 5, Jacksnipe 4, Weddle 3, Burford 5, Cook 5, Overly 4, Livenguth 4, Tramp 5, Emery 5, Partington 4, Geers 0, Miller 4, H. Vories 4, Hampton 2, Frost 4, Girton 3, Fugate 4.

No. 4, 15 sparrows: Mumma 11, McCaffery 12, Martin 14, Short 8, Brown 7, DuBray 12, Partington 12, Lockwood 12, Miller 12, Pike 14, Jacksnipe 12, Rogers 7, Howard 11, Strawn 10, Buker 11, Tramp 12, Bills 10, Geers 10, Thompson 12, Emery 12, Girton 11, Overly 13, Burford 13, Cook 12, Weddle 14, Ray 12, Davis 8, Livenguth 7, Frost 11, Humphrey 11, Fugate 4.

No. 5, 7 sparrows: Mumma 6, Martin 6, McCaffery 6, Shott 4, Brown 6, Howard 4, H. Vories 5, Hampton 6, DuBray 5, Bills 2, Partington 5, Lockwood 7, Rike 6, Weddle 6, Irwin 7, Polster 7, Bartlett 3, Thompson 4, Cook 4, Strawn 6, Geers 5, Ray 6, Livenguth 5, Burford 5, Fugate 3, Frost 4, Girton 3, Miller 5, Buker 6, Jacksnipe 5.

No. 6, 20 sparrows: Mumma 7, Martin 16, McCaffrey 15, Short 15, Everts 15, Buker 18, Polster 14, Rike 16, DuBray 17, Partington 16, Ray 16, Thompson 13, H. Vories 12, Brown 9, Cook 18, Hampden 13, Kerr 12, Howard 13, Burford 15, Herschey 15, Waddle 15, Tramp 17, Bartlett 18, Strawn 15, Lockwood 18, Livenguth 15, Morris 15, Comstock 16, Overly 17, Grube 18.

No. 7, 8 sparrows: Mumma 4, Marten 8, McCaffrey 7, Polster 5, Jacksnipe 5, Everts 7, Thompson 4, Irwin 6, Frost 6, DuBray 3, Beck 6, Rike 8, Marott 7, Burford 5, Buker 7, Herschey 8, Cook 8, Wessling 8, Quick 2.

No. 8, 15 sparrows: Burford 11, Marten 14, McCaffrey 14, Polster 11, Irwin 12, DuBray 14, Mumma 11, Ray 11, Marott 12, Grube 15, Cook 15, Buker 11, Rike 14, Lockwood 9.

Gold medal for sparrow championship, 1894, for best average, was won by Dr. J. A. Martin of this city on $89^{7}_{17}$%; second average, E. Rike, Dayton, O., $88^{4}_{17}$%; third average, W. P. Cook, Richmond, Ind., $87^{1}_{17}$%; fourth average, McCaffrey and Irwin, $85^{15}_{17}$%.

Best average for all sorts in tournament was made by E. Rike, Dayton O., 85⅔%; second by J. A. Marten, city, 84½%; third by A. M. Mumma, Dayton, O., 82½%.

# Answers to Correspondents.

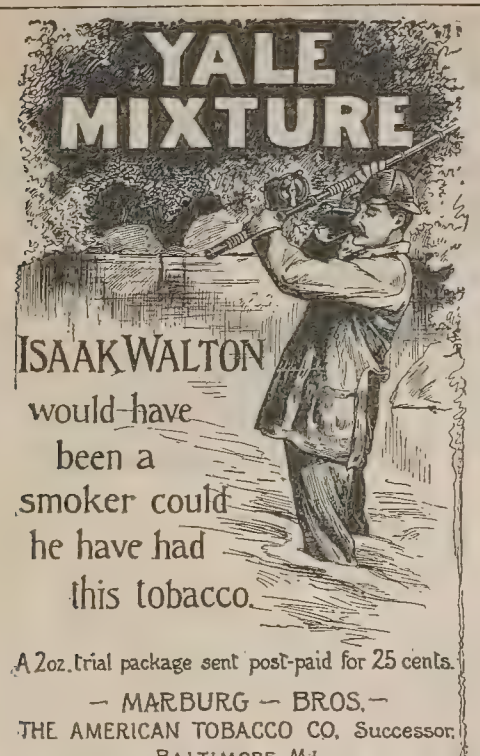
**No notice taken of anonymous communications.**

W. S. M., Spencer, Ind.—The national colors are displayed from the peak of the after sail.

A. B. R., Brooklyn.—Inquire of the Steamboat Inspectors, in the Post Office Building, New York.

G. S. I., Chicago.—The rating rule of the Yacht Racing Association is length on waterline, multiplied by sail area, the product divided by 6,000; thus 20ft. l.w.l., 300sq. ft. of sail, would give 1-rating.

J. T. D.—We have published the line of various canoe-yawls in the FOREST AND STREAM and in "Canoe and Boat Building for Amateurs." The builders' catalogues will give you information as to price.



N. E. M., West Alexander, Washington county, Pa.—Please send me the American rules for rifle target shooting. Ans. There are no regular rules published. Write to Gus Nowak, secretary Zettler Rifle Club, No. 219 Bowery, New York, or to A. F. Adams, secretary of Massachusetts Rifle Association, Walnut Hill, Mass.

B. W., Milton, W. Va.—What can I do to prevent the bugs from eating all my wads up? And also please tell me if you think that the corrosion in brass shells used in a shot gun will injure the powder if left loaded for any length of time. Ans. 1. Throw the wads out the window and get some new ones. 2. Not to any great extent, provided you don't keep them too long.

W. B. C., Saratoga Springs, N. Y.—Am contemplating spending the next six months in the South. Will you kindly inform me as to the hunting, (duck etc.) and fishing at Beaufort N. C. Ans. We can do no better than refer you to Charles Hallock's articles on "North Carolina Winter Sports" published in FOREST AND STREAM, December '91 and Jan. '92, which will give you all the information you desire.

S., Harrisburg, Pa.—Would like to know through columns of your paper whether our speckled trout (*S. fontinalis*) exists in Alaska streams. A gentleman who visited Alaska in 1893 told several of his friends of the many speckled trout he saw caught there. The gentleman is a native of this State. I remarked that our speckled trout were unknown in Alaska. Do our speckled trout exist in Alaska? Ans. No. The trout there are speckled, but they are not *S. fontinalis*, not the Eastern brook trout.

W. L., Lachine, Canada.—Can you let me know through your paper a good way of preparing musk-rat skin for use? I can not get rid of the fat which seems to come out of the skin after it is cured. Ans. Cleanse the skins in warm water and scrape off all the fat and superfluous flesh that can be removed. Then immerse in a solution made accordingly to the following proportion: Five gallons cold, soft water; 5 quarts wheat bran; 1 gill salt and 1oz. of sulphuric acid; allow the skins to soak 4 or 5 hours and then put them in the tanning solution which is made as follows: Into 5 gallons of warm, soft water stir 1 peck of wheat bran, and allow the mixture to stand in a warm room until fermentation takes place. Then add 3 pints of salt and stir until it is thoroughly dissolved. A pint of sulphuric acid should then be poured in gradually, after which the liquor is ready. Let the skins soak in this solution 3 or 4 hours. To finish, "flesh" the skin with some blunt tool, such as a dull butcher knife, and keep working till the skin is dry so as to insure pliability. The skin of a musk-rat is very tender, and requires careful manipulation.

A 2oz. trial package sent post-paid for 25 cents.

THE AMERICAN TOBACCO CO. Successor.
BALTIMORE. Md.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

# FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, $4 A YEAR. 10 CTS. A COPY. SIX MONTHS, $2.

NEW YORK, SATURDAY, OCTOBER 6, 1894.

VOL. XLIII.—No. 14. No. 318 BROADWAY, NEW YORK.

*For Prospectus and Advertising Rates see Page* iii.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

SEE REDUCED HALF-TONES IN OUR ADVT. COLUMNS.

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**
**Price of the pictures alone, $1.50 each; $5 for the set.**

Remit by express money order or postal money order Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

## *PENNSYLVANIA GAME LEGISLATION.*

THE Pennsylvania State Sportsmen's Association has an important work on hand. At the annual meeting of the Association, on Aug. 21, held at Wopsononock, near Altoona, the president, Mr. N. A. Hughes, of Williamsport, Pa., was authorized to appoint a committee, whose duty it shall be to carefully consider the matter of a reorganization of the Association. As in the State of New York, so also in the State of Pennsylvania, members of the State associations have come to realize that it is impossible to adequately discuss the problem of game protection and propagation during the progress of a trap-shooting tournament.

The New York State Association now has two meetings annually; one held in the summer for the purpose of bringing together the trap-shooters and lovers of the gun; the other, a convention in the winter at which game protection and kindred topics are discussed. Pennsylvania sportsmen can hardly do better than reorganize on the lines of the sister organization in New York State, remembering that the senior organization, after years of trial, has found it necessary to separate trap-shooting and the discussion of game questions in order to carry out successfully the objects of the Association as set forth in the constitution.

In regard to the adoption of a uniform law for the State of Pennsylvania, the Association also has work before it. The State itself is so large, and the interests of the different sections so diverse, that opposition is sure to be encountered on all hands when the subject of a uniform law is discussed. Success can only be obtained by mutual concessions on the part of both the eastern and western portions of the State. Sectional laws are now forbidden under the constitution of Pennsylvania, hence the open season for the extreme east must be the same as those for the wildest and coldest portions of the northwestern counties. There is a very general feeling throughout the State that barring the summer woodcock shooting, the present seasons are as nearly right as possible, if only the laws themselves were everywhere stringently enforced. The appointment of a State game warden with power to appoint his deputies, is what most sportsmen in Pennsylvania ask for. It is urged in this behalf that the odium, if any, of conducting prosecutions against violators of the game laws would then devolve, not upon game and fish protective associations, but upon officials properly so constituted by the State authorities, who could act upon information conveyed to them either by private individuals or by the aforesaid associations.

The Fish Commission has done much for the anglers of the Keystone State, and the shooters of Pennsylvania claim that they are entitled to at least as much consideration as their brethren of the rod.

It would seem wise then for the State Sportsmen's Association of Pennsylvania, instead of going in for a wholesale revision of the present game laws, to work for the appointment of a game official, whether through a regular game commission or in connection with the present Forestry Commission; and also to see to it that the propagators of foreign game birds and animals, such as Mongolian and English pheasants, English and Belgian hares, and English partridges are duly protected in their efforts for a period of at least two years.

## *PORTRAITS IN INK.*

### VIII.—A PROFESSOR OF FISHING.

WHENEVER you may chance to visit his haunts, in almost all weathers and seasons, you are likely to meet the old fisherman, wearing dilapidated clothes and bearing unconventional equipments.

Robins are not yet mating, nor the plovers calling in the tawny grass lands, before he is stealing along the brimming trout brooks, or is discovered on the flood-invaded river bank, in sun and shower and flurry of sugar-snow, so silent and so seldom moving, that the uninterrupted purr of the frogs arises from the drift of dead water-weeds close beside him, and the turtles bask undisturbed on the nearest log, the muskrat swims beneath the steadfast slant of his pole, and the wild duck whistles past him in unerring flight.

He is alert for the first sharp-set trout and tempts the hungry perch and bullhead with the earliest worm. No flies are looped about his shapeless, battered hat, no fly-book in his pocket, for he scorns all such gimcracks as he does reel and jointed rod.

A pole that only nature has had a hand in making, save in trimming, is good enough for him, and so is an honest bait that in no wise deceives but in concealing a hook.

Only when it comes to trolling has he departed from the ancient usage of pork rind and red flannel and become a late convert to modern metallic lures.

All day long, with the stout line held in his teeth, he trails the fluttering spoon along marshy margins and rocky shores, impelling his craft with slow oars or dextrous paddle, lazily laborious, always expectant, never excited by good luck, nor ever cast down by bad.

He fishes solely for fish, never for sport. In spearing and netting suckers when they come up stream to spawn and in hauling his seine when the law allows it, he has as much sport as in angling. If the pickerel, perch and smelt bite well, he apparently enjoys ice-fishing, with its cold and desolate environment, quite as much as casting his bait in open waters under softer skies.

He wastes no time on the fine arts of the craft, but brings each fast-hooked fish to boat or grass with short shrift, whether it be plebeian pickerel, eel and pout, or patrician trout and bass.

Despise him not in the day of small things, for out of the abundance of his store many a light creel has become heavy, and blank scores been made reputable, to the credit of rods and flies quite innocent of piscine blood. Also, it is well to remember that if he is somewhat greedy, there are those no less so, who profess to be truer anglers than he.

If he is touched by the fine and subtle influences of nature, if he rejoices in the gladness of the birds, the beauty of the flowers, the greenness of woods and fields, the babble of waters, the glory of dawn and sunset, he makes no sign. Yet he is a close observer of what concerns his business, wise in the manners and moods of fishes, and whoever studies nature in any of her ways must in some sort be her lover.

He has the quaintness and originality that flavor men who live much by themselves and think their own thoughts, and if you approach him without assumption of superiority, you will find him an entertaining and profitable companion.

---

TWO POINTS brought up in Mr. Waters's interesting recollection of old time chicken shooting in the Dakotas have an especial interest for sportsmen everywhere, and are paralleled by events that have taken place in the East within twenty-five years. The change of habits of the birds, due to changed surroundings and more constant pursuit, is just what has been seen in our native quail in the comparatively recent past. In many localities in New England and the Middle States where quail are few and are constantly pursued during the open season, it is believed by many experienced sportsmen that the birds leave the cover to feed only for a short time in early morning and evening, and fly back to the swamp in the middle of the day, instead of walking to nooning places as they used to in old times. The march westward of the posting idea is another striking fact and shows how rapidly—though perhaps unconsciously—the belief in the game preserve is extending. It is apparent that the sportsman of the near future must take his choice between a universal game preserve on the one hand, or, on the other, game laws rigidly enforced, except for a short open season.

## *THE LESSON OF THE SEASON.*

NEARLY all of the members of the Vigilant party have now returned and undergone the interviewing process, and their stories, which are substantially identical, give very little support to the idea that the yacht and all connected with her received other than fair treatment at the hands of their opponents. In international contests of this kind there is inevitably a certain amount of feeling and friction on both sides during the excitement of the races, but in this case it will be found, we believe, when all the facts are fully known, that there has been quite as little as could be expected, and that throughout the entire series of races there has been no overt act of either party which will be remembered after the present season.

So far as Americans are concerned, there is a great deal to be learned from a careful and serious study not only of the Vigilant-Britannia races; but of the whole system of yacht racing in England; a subject which, as has been proved by the many absurd criticisms of the past season, is very imperfectly understood on this side. While the superiorty in point of speed has remained largely on this side of the Atlantic since the days of the America, it must be admitted on the other hand the sport of yacht racing is not only much more generally patronized, but much better understood on the other side. There are many well-informed American yachtsmen who have this year for the first time learned of the methods of racing in vogue in England; methods which they have not hesitated to condemn for no better reason than that the American champion has been defeated.

A sober and impartial comparison of the various points, the "one gun" and "time" start, the sailing each race to a finish as compared with a time limit, the racing rules of the road, the general management of races and the common usage of yachtsmen in a race, will show that in point of fairness there is little to choose between the American and the British methods.

The most important point for Americans to consider is that while yacht racing here is spasmodic, the larger classes having no continued existence from year to year, but disappearing for long intervals, and even the smaller classes seldom lasting for two successive seasons, in British waters there are certain fixed and permanent classes, which race year after year, sailing not six or eight races in a season, but more, probably thirty or forty. The fact is not generally understood here that many of the details of racing which have been criticised this year as inferior to American methods are made necessary by the great number of races sailed and the distance covered in attending a majority of them.

No friend of American yachting can wish for more than that yacht racing here may become as popular, as generally distributed, and as systematically managed as in Great Britain, and in order to attain such an end it is necessary that Americans should comprehend thoroughly how, after years of trial, it has been brought about; and should follow more or less the same methods. The opportunities for building up a splendid system of yacht racing in half a dozen established classes are in many respects far better here than in England; and it only rests with the individual yachtsmen and the clubs to avail themselves of them. If no other good results shall follow the visit of Vigilant, it will at least be a material benefit if American yachtsmen are led to study both the strong and weak points of the greatest system of organized yacht racing that has ever existed.

---

THE Springfield *Republican* tells us that a very strong petition is to be presented to Governor Greenhalge advocating the appointment of Mr. E. H. Lathrop of Springfield as Fish and Game Commissioner of the commonwealth of Massachusetts in place of one of the commissioners—Edward A. Brackett of Winchester and Isaiah C. Young of Wellfleet—whose terms expired Oct. 1. Mr. Lathrop has already served two terms as Fish Commissioner of Massachusetts with a brilliant record, having originally been appointed by ex-Governor Robinson ten years ago without any knowledge that the appointment was contemplated. Mr. Lathrop is not specially desirous of filling this office again, but Massachusetts sportsmen interested in game protection are exceedingly anxious that he should take it. Mr. Lathrop is well known outside of his own State as a thorough sportsman and just such a man as is needed on the game commission of any State. He ought to be appointed and he ought to accept the appointment.

# The Sportsman Tourist.

## BEARS IN THE YELLOWSTONE PARK.

We extract the following from a private letter written by a gentleman recently returned from the Park:

When we reached the Lake Hotel the clerk at the desk asked us if we wished to see a bear, as he could show us one after we had finished dinner. We went with him to a spot some two hundred feet back of the hotel, where was deposited the swill and refuse. It was then a little after sunset. We waited some moments, when the clerk, taking his watch out of his pocket, said, "It is strange he has not come down; he is now a little over due." Before he had replaced his watch, he exclaimed "Here he comes now," and we saw descending slowly from a hill close by a very large black bear. The bear continued to approach us, when I said to the clerk, "Had we better not get behind the timber; he will be frightened off should he see us?" He answered "No, he will not be frightened in the least," and continued to converse with us in a loud voice. We were then standing in the open close by the swill heap, and the bear continued coming toward us, there being no timber intervening. We did not move, but continued talking. The bear came up to us without hesitation, diverging slightly from his direct route to the swill heap so as to approach nearer to us. He surveyed us leisurely with his nose in the air, got our scent, and seeming content that we were only harmless human beings, turned slowly away and went to the swill heap, where he proceeded to make a meal. We watched him for quite a while, when a large wagon passing along the road nigh to where we stood, the bear stopped feeding and went toward the hotel, in the direction in which the wagon was traveling. Our guide exclaimed, "He has gone to visit the pig sty," and in a little while we were satisfied this was so by hearing a loud outcry of "bar," "bar," which we afterward found proceeded from a Chinaman, one of whose special duties it was to keep bears out of the pig sty.

After the departure of the black bear, we retraced our steps, but before getting to the hotel I suggested to my friend Dell that if we returned to the refuse pile we might see another bear. We accordingly went back on the trail to within a few yards of where we stood before. When we stopped we heard, in the timber near by, a great noise as if dead pine branches were being smashed, and there emerged into the open a large grizzly. Although he was not quite so familiar as the black bear, he showed no hesitation but walked straight toward us and the object of his visit—the swill. Before reaching his destination, however, he stopped and squatted down on his haunches, calmly surveying the scene before him. The reason why he stopped became at once apparent. From the same hill down which the black bear had come we saw another grizzly, larger than the first, moving toward us at a rapid gait, in fact, on a lope, while the first grizzly regarded him with a look not altogether friendly or cordial. The second bear did not stop an instant until he reached the swill heap, where he proceeded to devour everything in sight without any regard to us or to his fellow squatted near by. The latter apparently had had some experience on a former occasion which he was not desirous of repeating.

Three men coming through the timber toward us, made a considerable racket, and the two bears moved off at no rapid gait in opposite directions. Until I left the spot I could see one of them on the edge of the timber, looking toward us, and no doubt, waiting for more quiet before partaking of the delights before him. When the three men joined us and were talking about the late departed, one of them shouted, "Here come two more," and before we could realize it we saw two good-sized cinnamons at the feast. They paid no attention whatever to us, but were entirely absorbed in finishing up what the other bears had left. By this time it was fast becoming dark and we returned to the hotel. I should have said that we measured the distance from the nearest point from the black bear to where we stood, and found it to be exactly twenty-one feet. The other bears were but a few yards further from us.

The squirrels, of which there were quite a number, were most diverting. Their presence alone added a playful element to a scene made solemn by twilight and the huge animals passing to and fro. We could tell when a bear was approaching by the chattering of bunny. He would run along the ground toward the bear with tail defiantly uplifted, jerking his head from side to side and scolding incessantly. I believe his anger was increased because the bear took no notice of him and yet he never allowed his animosity to lead him far from a place of security which he sought whenever his great enemy moved toward him. Doubtless his hatred was due to the remembrance of many careful hoards of piñon nuts, laboriously shelled and stored away for winter use and ruthlessly devoured by the huge and ugly beast.

When we entered the hotel we entertained our friends with an account of what we had seen, and had there not been three eye witnesses, we probably would have been entirely disbelieved. As we were giving our account, a man came into the room and said "If you want some fun come outside; we have got a bear up a tree." We went outside of the hotel and not over forty feet from it found a black bear in a pine tree. It seems, the wagon I have mentioned, had been stopped at the pine tree, and left there after the horses had been taken out. The owner, returning to his wagon found the bear in it, and this was the explanation why the bear had so suddenly taken to the tree.

The animal was considerably smaller than the one we had seen earlier; in fact it was not more than half as large, but still full grown. Quite a number of packers and teamsters stood about, amusing themselves by making the bear climb higher, till at last one of them asked our driver, Jim McMasters, why he did not climb the tree and shake the bear out. It was quite dark and McMasters, replied that he would not mind doing so if there were enough daylight for him to see. His companions continuing to banter him, he finally said "I believe I'll go up anyhow," and up he went, climbing, however—instead of the tree the bear had ascended—a companion tree which grew alongside of the other, the two not being more than a foot or so apart and the branches interlaced. We soon lost sight of McMasters and of the bear also for as Jim climbed the bear would climb too, until at last they both reached the top of their respective perches; when we heard Jim cry out, "Boys, he's got to come down; I can reach him." With that he proceeded to break off a small branch of his tree and we could hear him whack the bear with it and also could hear the bear remonstrating with a very unpleasant voice, at times approaching a roar. But at last the bear seemed to have made up his mind that it was better to come down than stay up and be whacked with a pine branch, so down he came, but not with any great rapidity, stopping at every resting place until Jim came down too and gave him a little persuading.

We could now see the action, but its dangerous features were lost sight of in its amusing ones. Jim had climbed on the tree down which the bear was descending, and when he was not persuading the bear he was pleading with us, somewhat as follows: "Now, boys, don't throw up here, and don't none of you hit him until he gets down. If he should make up his mind to come up again he'd clean me out, sure." After each speech of this sort he would move down to where the bear was and apply his branch, whereupon both the man and the animal would come down a few pegs lower. At last the bear was almost at the ground. We all formed a circle around the tree prepared to give both man and beast a reception when they should alight. The beast came first, and every fellow who had anything in the way of wood in his hand gave the bear admonishing blows that he might not return to the wagon again. Bruin did not stop to make us any promises at the time, but made off into the timber with great precipitancy. Jim, when he got down, did not seem to think that he had done anything more than if the bear had been a possum, which he had shaken out of the tree. And so ended our bear symposium of that evening, an experience one would fail to meet with even if he stopped at the best appointed hotel at Saratoga or other fashionable resort. Jim told me—and after what I had seen him do I did not doubt his word—that he had met this spring thirteen bears near the hotel at the cañon at one time.

## A TRIP TO THE BIG HORN MOUNTAINS.

Hot Springs, S. D., Sept. 30.—*Editor Forest and Stream:* I have just returned from the Big Horn Mountains, where I had two weeks' trout fishing in the South and Middle Forks of Little Goose Creek.

The ride by rail on the Burlington route from Hot Springs to Sheridan, Wyo., is made in twelve hours. The Sheridan Inn is opposite the station, and is owned by Col. Cody, known to fame as "Buffalo Bill." In its magnificent surroundings Sheridan reminds one of Denver. The Big Horn Mountains on the south and east are within fifteen miles of the town, and from the foot of the mountains to the town is a valley with small ridges, between which are the Big Goose, Little Goose, South Goose, Prairie Dog and other streams of water that run into the Big Horn River.

Our fishing and hunting party started from the Sheridan Inn at 10 A. M. with two wagons, single teams, and eight riding horses. We drove up the Little Goose near to the foot of the mountains and camped for the night on the ranch of the Wallup Brothers, a pair of fine young Englishmen, who had almost finished the harvesting work, and were prepared for a month's hunt on the Big-horn Mountains and in the Big Horn Basin. Their ranch is in fact a plantation, having fields of fifty acres or more all under irrigation. The alfalfa grass is mowed four times, yielding two to two and one-half tons of hay per acre each mowing; wheat yields thirty-five bushels, oats sixty. The crops are fed to cattle and horses. Timothy and herds grass do well, as does clover. For cattle alfalfa is preferred, and for hogs the growing alfalfa; it is better than clover. This ranch is as charming to the eye as the best blue grass farm of Kentucky.

The second day we made the top of the first range of the Big Horn Mountains, 6,700ft. above the sea, and went into camp about sundown, on the banks of Tepee Creek that empties into Little Goose Creek. The pitching of the tents and the making fire for supper was done in a jiffy. Two parties with shotguns went out for grouse, and returned in an hour. One party brought in three, and the other, the lone hunter, with his dog, bagged seven brace. The grouse feed and fatten on the Oregon grape, choke cherry and sarvis berry, with now and then a grasshopper. The feeding is in the early morning and in the evening on the sides of the mountains and on the banks of the creeks. After the sun is well up, they return to the rocks near the summit,, bask in the sun and wallow in the dust. They roost near the summits. The flesh of the mountain grouse is delightful, being free from all weedy taste, and infinitely better than the grouse of the lowlands. Our cook spoiled the first lot by par-boiling, under the supposition that these grouse were something like the sage hens, that require par-boiling and washing out in soda. We subsequently broiled or fried them as young chicken are served, hot dressed in butter, salt and pepper. We skin them, instead of picking the feathers. The flesh is better of course, after cooling in the frosty air over night.

The next day we reached our permanent camp on the banks of the middle fork of Little Goose, about as far as the wagons could go. This brought us within twenty miles and in sight of Cloud Peak Mountain, which is covered with perpetual snow. Just below the Cloud Peak range is a chain of lakes that are reservoirs for the various streams that run down the mountains and into the Sheridan Valley. In these lakes there are no trout. The trout in the streams is the speckled trout. When young, and up to 6in., they look like the brown trout, if it were not speckled; but when it measures 8in. and over the meat is a yellowish salmon color. The longest we caught were 16in., and caught only in pools below the greatest cañon. Fishing in the mountains with flies was an utter failure; the live grasshopper was the only bait the trout would accept. We came two weeks too late for good fishing. The trout season opens about July 15 and continues to Aug. 15. Of course one can have fair sport in September, but one must yield to and court the fancies of this wary mountaineer. Two score in your basket after an hour's fishing is about as much as you can count on. The creeks are, say, 20ft. wide, the banks are covered with pine and willow and the rocks huge, and now and then you find under a fall a good sweep, with 5 to 7ft. deep, and a chance to make a good cast and to use 50ft. of line.

I was greatly disappointed by the trout rejecting every kind of fly in my book, and I was disgusted when I put on my hook a mountain-hornet half alive, and a trout snapped it up so quickly that I almost wished it was strong enough to sting. To my surprise the trout only measured 6¼in.

Our party numbered eleven, but as nine of them came for big-game hunting, the three remaining in camp made a nice fishing group. The trout in those streams on the Big Horn in September do not feed—at least they do not take the hook—till evening. From 3 to 6 P. M. I found the best fishing. I found roe in quite a number, and in forward state for spawning. The big-game party left our camp on horseback and with pack horses and rations for four days for Cloud Peak range. On the third day one of the party returned with a pack horse for more provisions. He reported two herds of elk, one of bulls and the other of cows, and that the mating and running season was just opened, but that the elk were on the highest ranges, just below the line of perpetual snow, and above the chain of lakes, and that the snowstorms soon to come would drive the elk down as well as the deer.

These calculations or predictions were in the main verified, but the herds had been scattered and the pairs were seeking secluded places, which made the finding of the game quite difficult. A slight fall of snow helped the boys greatly, but the sun in mid-day is blistering, and with the winds the snow soon passed away, but a pair of elk and three deer were killed. No bear were sighted; ducks and geese were not disturbed.

The Big Horn Mountains and the Big Horn Basin will be very accessible by next season. The distance by dirt road from Sheridan to the eastern rim of the basin over the mountains is seventy-five miles; just about half the way there is a lake called the Dome Lake, on the banks of which a hotel will be built, and within two hours' walk of the snow, under the shadows of the Cloud Peak range.

We paid our guide $3 per day; hire of riding horses, 50 cents per day; wagon, driver and single team, $2 per day. Of course I shall dispense with a guide next season.

The bracing air, the snow water streams on the sand rocks, the trout fishing, grouse hunting, and now and then an excursion for big game, are all to be found on the Big Horn Mountains—indeed as charming surroundings as the best sportsman may desire, and the native grass up to the snow line is abundant feed for the horses.

Andrew J. Kellar.

## THE EPISODE OF THE SOAP.

In his preface to the "Man from Corpus Christi," Dr. Peirce tells us: "Friends who have had the courage to read this book in the manuscript, and to read it through, have quarreled with me over its name. The true hero of the story they aver is the dog Absalom, and he should have given title to it. The interest, they claim, centers in him, in his canine eccentricities, his wonderful memory, his patient endurance, and above all his faithful defense or chaperoning, as it were, of those thrown under his protection. All of these they declare make him the central figure of the play in which the human actors—the Man from Corpus Christi and the Author—were but subordinate characters, acting their parts only to develop his. The book then, my friends contend, should have been given some such title as 'Honest Absalom' or 'Absalom the Great'."

The qualities of Absalom are seen in this chapter of Texas experience. It is interesting to be told, as we have been by Mr. Frank M. Chapman, who has camped out with the "Man from Corpus Christi," that the idiosyncrasies of that queer character are in no wise exaggerated in Dr. Peirce's tale. But to the soap:

April 14, we drove into Bee county and camped on the river. Packing up what bird skins we had, and leaving the camp in care of Absalom, we drove to the railroad town of Papalote, to ship our trophies and do some trading.

The settlement of Papalote consists of one dwelling house, one store and post office combined and the railroad station. The store and post office commanded the greater part of our attention. We purchased some coffee and grain, and after a long consultation between Priour and myself in regard to advisability, etc., we decided to invest in a cake of soap. Making our want known to the grocery man, he proceeded to attack a large lump of yellow something with a chisel and hammer. This lump was about as large as a bushel, and I could not remember having seen soap on sale in such style before. After chiseling a while, the man held in his hand a piece of the substance, weighing perhaps a pound, for which we were to pay one dollar. Making a hole in this lump with a nail, he threaded it with a stout piece of bark, that would serve as a handle to carry or hang it by.

As we had seen no human beings besides each other, for a week, it was natural that we should remain here a time and talk with people as they came and went from the store. Where they came from was uncertain, they all emerged from the wood surrounding the clearing, and disappeared in a similar manner, no two persons entering the wood at the same place when going away. They came and went like bees from the hive, every man bringing a back-load of some merchantable article, and taking away something in exchange.

Shortly after we had secured our soap, a customer entered the store and accosted the proprietor, "Have ye got 'ny beeswax here?"

"Yes; what in thunder d'you want of beeswax?"

"None your darn business what I want it fer. I want beeswax, I do."

"But yer ain't got no gun, and wax is no good ter ye; I don't see what ye want wax fer."

"I want wax fer a sore on my gal's foot. Wax is good 'nough fer any gal's foot."

"Well, how much wax yer want; and how ye goin' to put it on yer wife's foot?"

"When I want yer to help put my gal's foot ter soak in hot wax, I'll ask ye! Gim me a coon-skin's wuth o' wax."

To my astonishment, the man in charge chiseled the customer off a piece of the same stuff he had sold us for soap. Soon after this, and while I was studying the subject over, and wondering whether we had been sold wax for soap or if the last buyer had been given soap for wax, still another customer entered and called for hard-bread and cheese. He was supplied with both, the cheese being chiseled from the same amorphous body that had supplied two other articles. Tightly clinging to the piece we had bought, I determined at the first opportunity to hold an inquest and learn its precise nature.

We remained an hour or more, and I saw skunk skins

traded for coffee; wild game exchanged for bacon; potatoes bartered for jerked beef, and dog hides swapped for molasses, until I was tired of confusion and longed for our camp again.

We had hardly alighted from our wagon, after reaching camp, when Absalom, instead of being pleased to see us, began to growl and bark in a savage manner. He had forgotten our faces, and showing his sharp teeth, defied us to approach the tent. It was in vain we saluted him by his name, Absalom, called him "good doggy," or adopted any procedure to show him who we were: he would not allow us to approach him. We tried to knock him out by throwing clubs of wood. but he was a good dodger, and such mode of attack only seemed to make him worse. I was a little afraid he might make a dash at us, for having once felt his teeth, I knew them to be sharp and capable of inflicting a painful wound.

After beating the bush for half an hour, Mr. Priour became desperate. "Give me my gun," said he, "I'll see if I'm going to be kept from my own camp by that whelp."

"What are you going to do?" I asked.

"What am I going to do! I'm going to blow that cur back to Corpus Christi!"

I gave him the gun, but hadn't the slightest idea that he would shoot. Taking the weapon in his hand, he turned to me and exclaimed: "You fool! Do you suppose I'm going to kill my dog!"

I was getting tired myself, and stating the same to my partner, I went into a thick clump of brush down the bluff, and lying upon my face, watched the maneuvers of the opposing forces. I could do no good at camp, and thought it only a question of time when the dog would recognize us.

Mr. Priour walked around and around the tent in a large circle. but whether he went fast or slow the savage animal kept between him and the goal, all the while showing his gleaming canine teeth and barking vociferously. At last the man went to his wagon, got his harness lines, and making a noose in them, returned to the vicinity of the dog. Going as near his foe as he cared to, he cast the noose over the animal's head, and then breaking into a run, choked the animal into quietude by dragging him over the rough ground. He then entered the tent hauling the dog behind.

I had a comfortable bed in the brush, and not wishing my partner to know that I had seen the performance, I waited ten or fifteen minutes before going to camp. When I entered the tent Mr. Priour was smoking and the dog lay at his feet, nearly lifeless from garroting. Saying that I had just awakened from a sound sleep I asked how he had made himself known to the dog. He answered that as soon as I was out of sight the intelligent animal had come to him of his own accord, and it was I against whom his threats had been so furiously directed. An inquiry as to the cause of the dog's present unconsciousness elicited the opinion that having barked at me so energetically he had completely exhausted himself. My partner evidently was not quite sure that the explanation he offered would prove satiofactory to me; however, he said but little more on the subject, omitting the customary eulogy on the animal's wonderful memory. By daylight on the following morning the dog had recovered his sensibility enough to be about, and exhibited evidences of rapid convalescence.

* * * * * *

In re-arranging our property I came across the cake of soap which we had bought at Papalote, and which I had not thought of since leaving camp on the Aransas River. The pigs had eaten nearly half of this substance and I determined to try the remainder of it for washing purposes.

Taking the soap in my hand I walked to the creek and prepared to shampoo my head. The soap-like substance was odorless and not very soluble, but after soaking it in the water a short time it felt a little moist and I rubbed it thoroughly into my hair, now quite long.

After having, as I supposed, insinuated a sufficient quantity into my flowing locks I attempted to lay the material upon the ground, but it stuck fast to my plumage. I labored diligently and tried my utmost to liberate my head from the sticky mass, and as a last resort was obliged to take my pocketknife and cut all the hair between the soap and my head. I then tried to wash away what had stuck to my hair, but it was as useless as to try to wash off pitch, and I was thankful when, after a severe exertion, I had succeeded in freeing my hand from my occiput.

I had to spend a half-hour rubbing my hands in the sand before I could take hold of anything and let go again; and if this was a fair sample of Texas soap I felt that a thorough washing once a year would be often enough for any one.

Harpooning with a sharp stick the piece that I had cut from my head, and pulling out the tufts of hair clinging to it, I returned to camp.

Mr. Priour was getting ready to go to the creek and take a wash himself.

"How's that soap for washing?" he asked, for, like myself, he had never seen anything like it before.

"Fine," I replied. "I don't care whether you call it soap, cheese, glue or scrap iron. It's the best thing to remove dirt that I have ever seen, and I wish I had bought another dollar's worth to take home with me and show the people that Texas is far ahead of New England in the soap line."

Mr. Priour's face assumed a pleased expression at my compliment to the State of which he was a native, and taking the soap by the handle I had left in it, he proceeded to the creek.

I watched him until the brush hid him from view, and felt just a little guilty at the false report I had made concerning the soap, for I knew from what he had previously said that he would use it on his head before trying it elsewhere. I imagined myself as cruel and heartless as the uncle in "Babes in the Woods," who smiled upon his brother's children just before sending them away to die, and I repented almost to the point of running after the man and correcting my statements. But he was now out of sight and hearing, and I thought he could not well get stuck up worse than I had been, and I let him go.

During his absence I took a stroll with my gun and killed a barred owl from the top of a cottonwood tree. The top of this tree was thickly set with short branches, and my owl caught fast in his network of twigs. Going back to camp I procured the harness-lines; and by their help reached my bird. The place in which it had lodged was such an almost impenetrable tangle of branches, that I tore my clothing in many places, and after I had descended to the ground I found that I had left a large piece of my overalls among the highest branches. I thought little of my loss, and hearing my partner shout, I picked up my bird, shouldered my gun and hurried back to camp.

Mr. Priour was there. His hands were stuck fast in his hair, and as he had removed his coat and shirt before wrestling with the soap, the upper part of his body was entirely nude.

"Where's your shirt?" I asked.

"Where's my shirt! Down by the creek, you fool, and to keep my pants from coming off, I've had to walk bow-legged all the way up here! Get that axe and cut off my head or my hands. I don't care which. Some cuss'll come along and carry off my gun if I don't get back to the creek pretty soon."

"Did you see any mermaids in the creek?" I asked.

"No, you fool! Do you suppose I'd come to camp this way if I'd seen a mermaid? I'd rubbed the dog-gon'd stuff all over her."

Conducting the man to a tree, and backing him up against it, with the axe I chopped him from his fetters. He then asked me why I had deceived him in regard to the character of the soap. I told him that I had had no difficulty with it, and that he must have struck an imperfection that was not uncovered when I had made use of it.

This answer satisfied him to a certain extent, and calling Absalom to him, he cleaned his hands as best as he could by rubbing them the whole length of the animal, ears and tail included. But he took from the poor dog about as much hair as he gave him pitch in return. and I thought if Absalom should attempt to scratch himself against a tree, he too, would have to be chopped out. Having his hands free again, my partner hurried away to get his shirt and gun.

Although we had had such a serious time with the soap, I thought our experience must have been a good deal less trying than if we had bought the stuff for cheese.

I thought of the family of the man who had bought cheese at Papalote on the day we were there, and I could picture them seated around their humble board, all anxious for a bite of the infrequent food which the loving husband and father had procured at the expense of a pint of buzzard oil. In my imagination I could see some wee tot's face, all aglow with pleasing expectancy as she said: "Papa, papa, I want teese." Poor child. How her little heart would ache from the keen disappointment in store for her. I pitied her. That sweet innocent mouth bedaubed with such sticky stuff. I felt like howling to the Papalote merchant: "If you didn't have cheese, why didn't you say so! If you had never seen any soap, why didn't you own up to it like a man, and not be the cause of men losing their hair and scalp, and babes their tongue and teeth!" But the man who had bought the substance for something edible was broad-shouldered and well-built, and I fancied that on the day following his tussle with the sticky compound, the groceryman might need to be pitied most of all.

Seating myself upon an old log near our camp, I skinned and stuffed my barred owl. Priour had reached the creek in time to get ahead of any "cuss" after his gun, and down in the depth of the grove I heard him shooting rapidly. Thinking he had come across a flock of warblers, and was going to get a dozen or two, I at first paid little attention to the continued banging, but as it continued without abatement I was curious to know its meaning, not knowing but he was in trouble, and was firing as a signal for me to come to his rescue. Going rapidly in the direction of the sound I soon found him directly under the tree from which a short time before I had taken my owl. The piece of cloth from my overalls, which I had left in the tree, was still there, and it was at this that Mr. Priour was sending charge after charge of No. 4 shot. Without desisting from firing he informed me that there was a bird in that tree not described in any book, and that it was so protected by vines that the shot didn't seem to reach it, but he was going to have it if it took the last charge of powder and shot he possessed to bore a hole to it through the briers.

From where I was standing I could see this object very plainly, and as it fluttered back and forth with the wind it did resemble a living thing. I had often been deceived in a like manner myself, for very often a bird almost hidden from view in a tangle of twigs and branches will only show its whereabouts by the slightest visible movement.

Many a charge of shot have I sent after a bunch of feathers, a piece of moss, or the remains of a dilapidated nest, and as Priour always laughed at me on such occasions, I was glad at last to see him deceived likewise. I should not have mourned the loss of my whole suit, if by leaving it in a treetop I could have sold my partner, for I was tired of such questions as "What you going to do with that snarl of grass you killed this morning?" "You've killed that bunch of briers, now why don't you climb the tree and get it?"

Wishing the man good luck in his undertaking I returned to camp.

Ten or fifteen minutes later Mr. Priour came for his harness-lines, stating that he had killed the bird, and was going back to get it.

I wondered what he would say upon his return.

I thought if I were in his place I should be likely to report that during my absence from the tree a hawk had come and carried away the prize. But Priour would know the source of the piece of cloth as soon as he reached it, and I was anxious for his arrival at camp with some explanation or excuse for his fierce attack upon an inanimate thing.

It was getting late, and I made coffee, and cooked as good a supper as possible with our supply of provisions, for I thought Priour could find some solace in filling his stomach. I expected the man every minute. I knew he had plenty of time to climb the tree and reach camp while I was getting ready our fare.

An hour passed. It was quite dark and I was somewhat anxious, and thinking the man might have met with some accident in climbing the tree, I went into the timber to look for him. But everything about the scene of the heavy canonading was as quiet as death, and satisfying myself that the man was not in the near vicinity, I returned to camp, knowing that a search for him in the darkness would be in vain. Building a large and bright camp-fire I seated myself by it, and smoked my pipe.

It was a dark night, and my range of vision extended only a short distance from the blazing pile which was just far enough from the timber to outline indistinctly the tall trees, which stood about like so many motionless sentinels.

Absalom I supposed to be with his master.

I could hear an occasional squeal and grunt from the pigs which had made their headquarters near our own. These being the only sounds that came to my ears, they were rather agreeable than otherwise—much more agreeable than when the animals were ravaging our stores.

Having smoked to my satisfaction. and being tired of sitting by the fire without company, I crept into the tent and was soon asleep.

I had camped long enough in Texas to know that a man was liable to have his sleep disturbed at almost any time.

By spending eight nights out of every ten in the open air for years, a man may accustom himself to the tolerance of all kinds of noise, and all sensations short of severe pain; but I hadn't camped out long enough for that, and when Mr. Priour came creeping back to camp at about midnight, I was fully aware of his proximity before he entered the tent. Keeping perfectly quiet and feigning sleep I waited for his entrance.

Going to the dying fire he mended it, and by its light appeased his hunger with the stew that I had left for him. He then came to the tent, and carefully pulling back the fold of cloth at the entrance, peered in, and satisfying himself that I was unconscious, he noiselessly stepped over me and crawled into his blanket. He said nothing to me nor I to him, and we were both soon asleep.

The next morning Mr. Priour was an entirely different person from what he had been on the day before. His loquacity had entirely disappeared and his face bore an expression of general dissatisfaction. I asked him no questions about the heavy firing, but he volunteered a story himself.

He said that he had reached the bird, that it was different from any he had ever seen, but so torn in pieces by the shot as to be worthless, and he was going to try and get his mate, which he had seen flying about the same tree.

As he had broached the subject, I thought it safe to say something myself. "Did you have much trouble in climbing the tree?" I asked.

"No, not very much. I saw a piece of your overalls about 6ft. above where my bird was killed. Did you climb that tree?"

"Yes; I climbed it to get an owl I had killed in its very top; and by the way, what kept you out so late last night?"

"O, I was hunting for Absalom. He's gone somewhere. I haven't seen him since 4 o'clock yesterday."

Mr. Priour told such a straight story that I could hardly discredit it, but I couldn't quite believe that he would spend half a night tramping through that dark grove looking for his dog, neither could I think he wasn't deceived by the piece of clothing which I had left in the tree. But I said nothing of my doubts.

Absalom had not yet returned, and Priour asked me if I had seen anything of him during my ride up the creek.

He mused awhile and finally exclaimed: "I know where that dog is; he's at the San Antonio River."

"How do you know he is there?"

"I know dog-on'd well he is. Some coon has followed us and stole him, and I'm going to ride back there tomorrow and kill every nigger in the bottoms!"

In the afternoon it rained in torrents. About dark we saw some object approaching us from the direction of the creek. It was moving slowly and apparently with great effort. From our position near the tent we studied the appearance and gait of this oscillating body which was so clumsily nearing us, and tried to decide whether it was a huge tortoise or a devil-fish. "Well, I'll be dog-on'd." said Priour. "I've traveled over every square foot of this State and I never saw anything like that before. What kind of a critter can that be; I'll have his hide and make a stew of his liver whatever it is," and he reached for his rifle.

The object drew nearer and nearer. and we could see that there were projections from its sides and after part—projections somewhat suggestive of crippled wings in front and a dragging parachute behind.

"Isn't that a pterodactyle?" I asked of my partner.

"No, sir; it's no pterodactyle. Pterodactyles don't have that style of motion. They can travel faster than a nigger chased by bees; and what's more, did you ever see a pterodactyle so far from the salt water?"

"I never saw one anywhere. That animal's near enough to shoot now, why don't you do it?"

My words were lost, for with an enthusiastic spasm of joy my comrade made a dash forward and embraced the object in his arms. Peeling the leaves, grass, brush and bark away he at last reached the nucleus—Absalom. Poor buzzard, he had evidently had a serious time with the soap Priour had rubbed into him, while trying to clean his own hands.

Probably the dog had tried to clean himself by rolling among the underbrush until he had incased himself in a straight-jacket; and it was surprising what an amount of vines and briers he had been able to drag about.

The return of the missing dog filled his master's heart with ecstasy. He at once reassumed his wonted mirthfulness, and not even reminiscences of the "undescribed specimen" interfered with his glee.

"I tell you," he said, "I knew that was Absalom as soon as I saw him; I knew he wouldn't be away from this camp another night, if he had to drag out the bottom of the creek to get here."

"If you knew it was Absalom, what did you get your rifle for?" I asked.

"To clean it, of course. Wa'n't it under all them waterspouts in the tent? I take care of my rifle if I don't do anything else. I hope you don't think I didn't know my own dog."

"I didn't know but you might have been deceived by the cocoon he had spun about him."

"No, sir, no cocoon has the memory of that dog. He does beat all, coming back to camp all alone and bringing specimens too. I found the prettiest set of vulture's eggs wrapped up on his back you ever saw. He'd found them and remembered his master."

"I didn't know the dog was an egg hunter."

"Well he is; I've known him to crack open a turtle shell as big as your hat, and dig out the eggs and bring them to me."

Finding that Priour could do nothing but sing the praises of Absalom, I left him with the dog, while I cooked our supper.

# Natural History.

## WAYS OF THE BEAVER.

Budleigh Salterton, Devon, England, Sept. 14.—*Editor Forest and Stream:* The article upon the beaver by Mr. Thos. Chester in Forest and Stream of Sept. 1, contains a greater amount of interesting and highly instructive detail about that animal than any account I have ever previously read.

The explanation of the means by which the sticks, stored for winter use, are held at the bottom of the pond, is certainly new to me. I never believed in the nonsensical theory that they are made heavy by the air being sucked out of the pores of the wood, but thought that the sticks were kept under water simply by being forced a sufficient depth into the mud. I have observed that most of those with the bark peeled off, which float on the surface of the pond when the ice melts, are sharp-pointed at one end, apparently for such a purpose. Doubtless, however, the vacuum produced at the end of the stick would assist in keeping it down, even if this be not the sole means of holding it.

Mr. Chester remarks that, when dam-building, the beaver has a wonderful facility in adapting itself to a change of conditions.

In upper Canada, about thirty years ago, I met with an astonishing instance of this, the dam being constructed in such an unusual manner that it would be absurd to attribute the skill shown to mere instinct. There was the clearest proof of great reasoning powers. The place selected for making a pond was on some moist land where the surface was level on both sides of a slow and small stream, so that the beavers had no slope or hollow to assist them. They had, therefore, cut the stems of the live alder bushes to a certain height and twined the cut off pieces between the stumps, filling the crevices with mud and weeds.

The total length of the dam thus formed appeared to be quite 200yds. It was carried in a curved shape across the stream, with the two ends extending, one on each side, in the direction whence the current came. The pond was therefore something like the letter U in form, and instead of the water flowng over the dam in an unbroken sheet, a smooth trough-shaped sluice had been made in one place, keeping the pond about 4ft. deep.

I helped the trapper, with whom I was then staying, to open the top of one of the houses. After pulling away 2ft. thickness of sticks and earth we found that the inside wall was formed of thin alder stems neatly interlaced, almost like a hurdle. The floor was about 18in. higher than the water, with a bed of sedges upon it, and there was a well at one side through which the beavers could dive under the wall.

Some of the trees near the pond, that had been newly cut down, were 12 to 18in. in diameter.

This trapper used to soak the flesh of the beavers in water in order to take away a peculiar muddy flavor and then roast it. To my taste it seemed more like mutton than anything else.

Lord Milton and Dr. Cheudle state in their book, "The Northwest Passage by Land," that when in the neighborhood of the Saskatchewan River they found the remains of old works which proved that beaver, before their numbers were reduced by trapping, were in the habit of cutting down much larger trees and making much larger dams than they do at the present time.

The largest work I ever saw was an old dam in the bush of New Brunswick, which must have been originally uite 60yds. in length, 4yds. in width at the top, and 8yds. at the base. The meadow formed after the waters had drained away was about a mile long and a quarter of a mile wide. J. J. Meyrick.

## IT SHOULD BE PRESERVED.

Citronelle, Citrus County, Fla.—*Editor Forest and Stream:* I have hesitated writing you for some time, hoping to describe in glowing terms a successful wildcat hunt; but each time we started for the cats our dogs "jumped" deer or turkeys, and went after them as though the law did not protect them from our guns.

But my object in writing is to mention a place where the "plume bird" is still a reality, not by laws of the State, but by the watchful care of a man who desires to preserve the beautiful birds from destruction and keep one rookery from being broken up by plume hunters.

I first visited this place four and one-half years ago and made a collection of birds, and was surprised one day to find in a neighborhood long settled a large rookery on a man's homestead. Permission was easily obtained of him to shoot a few birds with a .22cal. rifle.

He told me he had refused to allow any one to shoot them, and only once when he was away had hunters been there, and then they killed several hundred, many without plumes. Shortly after he proved up his claim he left the place, and when I returned here last winter I expected to find the birds all gone; but as spring came on I went there and camped three weeks to make a few skins and watch the birds.

I made a step ladder into a big cypress tree, and there, concealed in its branches, I looked down for hours on the birds nesting in the bushes. I judged there were several hundred each of Louisiana and little blue herons, about fifty snowy herons or little white egret, and about a dozen American egrets. Besides these there were a pair of big blue herons, green herons, gallinules and other birds. At night, just before sunset, hundreds of herons, white ibis and wood ibis would come in to roost, and the cries and croaking were far from musical.

The rookery is in a small pond about three and one-half miles from the Citronelle depot and about one-quarter of a mile from the Withlacoochee River, on a homestead of 160 acres of ordinary pine land, about forty of which is cleared. Between it and the river is a palmetto scrub, where deer, turkeys or wildcats can most always be started with good dogs. The woods around everywhere are filled with quail, while for a distance of about ten miles around I consider one of the best deer sections in the State. The river has plenty of fish.

I have entered into the details because the place is now offered for sale, and a purchaser may not care to protect the rookery, which it seems a shame to have destroyed now, as it surely will be.

It would make a splendid place for hunters, and it would be a grand work if some sportsmen would purchase it and keep a man on it during breeding season, as the birds leave for the coasts and islands soon after.

The writer has tried to make a clear statement of it, to arouse an interest in this last of accessible rookeries (so far as I can learn) in Florida. Frederic L. Small.

## SOME GROUSE OF WASHINGTON.

*Editor Forest and Stream:*

The first trip I made with a team across the plains in 1856 I noticed pinnated grouse on the Big Blue River, in Kansas, but not further west than that.

Then in 1860 I saw a good many between Plum Creek and Fort Kearney, on the Platte. The first sharptail grouse I remember to have seen was at the old Cœur d'Alene Mission, in Idaho, and along all the streams from there to Walla Walla Valley they were quite plentiful.

Before they began to farm the bunch grass hills of the Walla Walla Valley there were thousands of them, but since all of the valley has been put under cultivation, they have become very scarce. Up here on the Okanogan they are quite plentiful, and range on the bunch grass hills from the Okanogan to Kettle River.

When the winter is very severe they range up among the pine and fir, although birch seem to be their favorite buds. In the winter they burrow in the snow at night, and I have often seen them come up out of the snow where it was over two feet deep.

The dusky grouse, or blue grouse as we call them, leave the high mountains in the spring to raise their young, and they stay down until the sarvis berries and wild currants are gone; then they work back on to the mountain, in time to help harvest the huckleberries. Kinnikinick berries, as well as wild rosebuds, are favorite food for them. They are much larger than the sharptail grouse, and will lie much better to a dog.

The ruffed grouse here are quite plentiful. They are much smaller than the ruffed grouse of the East, and are generally found along the creeks. Here near the mill they drum at all times; sometimes in the night. In the winter their principal food is rosebuds and fir browse. They are much the best table bird we have here.

Then there is the Franklin grouse or fool hen, which stays pretty well up on top of the mountains, both winter and summer. They are a little larger than the ruffed grouse. Their flesh is much darker, but the young ones are very palatable. They are a strange bird. When they are flushed by a dog they generally fly high, but if put up by man they will fly but a little way. I have often caught them with a noose in a string on a stick not 10ft. long. I have had old hens stand and peck my feet when I was near their young. Lew Wilmot.

Okanogan, Sept. 9.

## BREEDING QUAIL IN CONFINEMENT.

It will be remembered that last year we printed some notes on quail reared in confinement by Mr. Allen Duncan, of Wyoming, Ontario, who seemed to have attained a measure of success greater than has attended other persons who have made similar efforts to rear quail. This season Mr. Duncan has continued his experiments and they have been attended with great success. He reports this in the following letter:

Wyoming, Ont., Sept. 24.—*Editor Forest and Stream:* I have at present twelve young quail. Three of these are about two months old and the nine are a little over a month old. I left ten eggs in the quail's nest which were hatched out by the male bird. One of these unfortunately strangled itself by getting a blade of grass, of which the nest is composed, twisted round its neck. Those on hand are all doing splendidly.

I would be in favor of bantam hens to look after the young quail as they are then likely to be much tamer than when raised by a mother quail, because the quail is continually giving cautionary signals and warnings, which the bantam finds no occasion for.

Of the birds I raised last year, I sent two to Mr. Wells, and one to Mr. Taylor, of Chatham, Ont., only keeping one hen for my own use with the above result. This hen was mated with a bird from the State of Mississippi, which I obtained from Mr. Wells, of Chatham.

The feed given to the young quail is hard boiled eggs chopped fine, followed later on with seeds and grain of all kinds.

The quail are very quick to detect strangers and will invariably protest, if I take a stranger to look at them.

The male bird is very courageous in defense of his charges and will promptly do battle in their behalf. On one occasion one of the young birds got separated from the others and was making lament in consequence. I went to put them right, but the old bird seemed to think I was responsible for the trouble and promptly charged me with great courage and ferocity. Allan Duncan.

### Rose-Breasted Grosbeaks.

Preston, Sept. 29.—*Editor Forest and Stream:* Your correspondent "A. L. H." writes, Sept. 22, of a tame grosbeak of the rose-breasted variety, and expresses surprise at finding it in his locality, New York. The bird, though somewhat rare, is met with all through the United States, and is most commonly seen in autumn. Those who ramble through the orchards and shrubbery will occasionally catch the simple call, *quick quick*, or hear his queer song, hard to reproduce but to my ear something in this strain, *ka-co-que-it, ka-co-que-it.* Its coat of rich black with the white spots of its wings and the dainty rose-red of the breast, make a beautiful contrast of colors, to which are added the white abdomen and tips of several of the tail feathers. The rose-breasted grosbeak is a great lover of fruit, and is found frequenting the orchards, and yet I have found him in the dense thickets, while trouting along the wildest streams, and have known him to accompany me at a short distance for several hours. I have invariably found them alone; never in pairs. They are of good size, being upward of 8in. in length.

E. M. Brown.

### The Linnæan Society of New York.

Regular meetings of the Society will be held at the American Museum of Natural History, Seventy-seventh street and Eighth avenue, on Tuesday evenings, Oct. 9 and 23, at 8 o'clock. Oct. 9, Juan Gundlach—"Notes on Cuban Mammals." Oct. 23, R. W. Shufeldt—"On Peculiar Phases of Color assumed by Certain Birds."

Walter W. Granger, Sec'y.

### Albino Squirrels.

Preston, Conn., Sept. 27.—*Editor Forest and Stream:* Now and then albinos of different species are described in your Natural History column, and these communications are always entertaining and instructive to me. J. Cobb, while out gunning Monday last, saw two small squirrels of a pure white color and shot one, while the mate escaped. Mr. Cobb will have the squirrel mounted. They resembled the common chipmunk in all but color. Now, were they chipmunks? E. M. Brown.

### Two-Headed Kitten.

Mr. John G. Gilbert, 2d, of Marblehead, Mass., writes us of what he calls the "greatest wonder on earth," now in his possession. It is a two-headed kitten which was born alive and in good condition, but was killed by accident after two days.
